Congressional Record.

PROCEEDINGS AND DEBATES OF THE SIXTY-FIFTH CONGRESS, FIRST SESSION.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *June 6, 1917.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We bless Thee, Infinite Spirit, our Heavenly Father, for a great country, the father of all modern republics, the genius of which is our glory and has been the inspiration of all liberty-loving people round the world. We thank Thee for that providence which has shaped and guided our destiny from its beginning, and which has brought us through every great trial laid upon us, foreign or domestic, and made us stronger as American citizens. Be with us now, we beseech Thee, in the great trial through which we are passing not only for our own preservation but for the preservation of humanity in its quest for a purer, higher, nobler civilization. For Thine is the kingdom and the power and the glory, forever. Amen.

The Journal of the proceedings of Saturday, June 2, 1917, was read and approved.

LEAVE TO EXTEND REMARKS.

Mr. RUSSELL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a funeral oration delivered by Hon. John F. Philips, of Kansas City, Mo., a former Member of this House, at the funeral of Hon. Francis M. Cockrell, who represented Missouri in the United States Senate for 30 years. It has just been called to my attention, otherwise I would have asked it before.

The SPEAKER. The gentleman from Missouri [Mr. RUSSELL] asks unanimous consent to print in the CONGRESSIONAL RECORD a speech made by Hon. John F. Philips, a former Member of the House of Representatives from the State of Missouri, about Gen. Francis Marion Cockrell, who served 30 years in the United States Senate from Missouri. Is there objection?

There was no objection.

Mr. PHELAN. Mr. Speaker, I ask unanimous consent to insert in the RECORD the speech made yesterday by the President at the Confederate reunion.

The SPEAKER. The gentleman from Massachusetts [Mr. PHELAN] asks unanimous consent to print in the CONGRESSIONAL RECORD a speech made yesterday by the President of the United States to the Confederate veterans. Is there objection?

There was no objection.

Mr. DUPRÉ. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an address delivered by Hon. FRANK CLARK, Member of the House of Representatives from Florida, at Arlington, on Sunday last.

The SPEAKER. The gentleman from Louisiana [Mr. DUPRÉ] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. TIMBERLAKE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing the correspondence between Mr. G. H. Thompson, a patriotic citizen of Colorado and myself, and the acknowledgement by the President of this man's patriotic devotion in giving three sons to the service of the United States.

The SPEAKER. The gentleman from Colorado asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. CARY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on prohibition.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent to extend his remarks in the RECORD on prohibition. Is there objection?

There was no objection.

Mr. RANDALL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the same subject about which the gentleman from Wisconsin will extend his remarks—prohibition.

Mr. LONGWORTH. Will the gentleman's remarks be on the same side of the question? [Laughter.]

The SPEAKER. The gentleman from California asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Minnesota [Mr. KNUTSON] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. BARNHART. Mr. Speaker, reserving the right to object, what is the subject of the gentleman's extension of remarks?

Mr. KNUTSON. It is an account of the new method used in Minnesota to stimulate subscriptions for the liberty bonds.

The SPEAKER. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, I ask leave to extend my remarks in the RECORD by inserting a short letter.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. DILL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a speech of Hon. Franklin K. Lane, Secretary of the Interior, on the war.

The SPEAKER. The gentleman from Washington [Mr DILL] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. RAKER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of food production in California.

The SPEAKER. The gentleman from California asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. SANDERS of Indiana. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a patriotic poem entitled "Buy a Liberty Bond."

The SPEAKER. The gentleman from Indiana asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HICKS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the espionage bill.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HOLLINGSWORTH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an original poem on Gen. Grant.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. CANNON. Mr. Speaker, I ask unanimous consent to have printed as a document (H. Doc. No. 167) a letter from Hon. George E. Adams, of Chicago, a former Member of this House, touching the financial system. It is not a long letter, and I would like to have it printed as a document.

The SPEAKER. The gentleman from Illinois [Mr. CANNON] asks unanimous consent to have printed as a House document a letter by Hon. George E. Adams, an ex-Member of Congress from Chicago, on certain financial subjects. Is there objection?

There was no objection.

Mr. CHANDLER of New York. Mr. Speaker, I ask unanimous consent to print in the RECORD a poem entitled "A War Monologue," by Gen. SHERWOOD, a Member of the House.

The SPEAKER. The gentleman from New York [Mr. CHANDLER] asks unanimous consent to extend his remarks in the RECORD by printing a poem entitled "A War Monologue," by Gen. SHERWOOD, of Ohio. Is there objection?

There was no objection.

Mr. HULBERT. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the food question.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD on the food question. Is there objection?

There was no objection.

Mr. EMERSON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing some suggestions made by the superintendent of schools of Lakewood, Ohio.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. AUSTIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a speech made by the gentleman from New York, Mr. SIEGEL, in New York City, May 30, on the one hundred and fortieth anniversary of the birth of Old Glory.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

LEAVE OF ABSENCE.

Mr. POWERS, by unanimous consent, was given leave of absence indefinitely, on account of illness.

COMMISSION OF FINE ARTS (S. DOC. NO. 48).

The SPEAKER laid before the House the following message from the President of the United States, which was ordered printed and referred to the Committee on the Library:

To the Senate and House of Representatives:

I transmit herewith, for the information of the Congress, the report of the Commission of Fine Arts for the fiscal year ended June 30, 1916, with accompanying illustrations.

WOODROW WILSON.

THE WHITE HOUSE, *June 2, 1917.*

ESPIONAGE.

Mr. WEBB, chairman of the Committee on the Judiciary, presented a conference report on the bill H. R. 291, the espionage bill, for printing in the RECORD under the rule.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent for the present consideration of the bill S. 1816.

Mr. MANN. I ask for the regular order.

The SPEAKER. The regular order is demanded, which is the call of committees.

Mr. HARRISON of Mississippi. Mr. Speaker, I make the point of order that no quorum is present.

The SPEAKER. The gentleman from Mississippi makes the point of order that no quorum is present. The Chair will count. [After counting.] Two hundred and nine Members present, not a quorum.

Mr. KITCHIN. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The doors were closed and the Sergeant at Arms ordered to notify absentees.

The clerk called the roll, and the following Members failed to answer to their names:

Anthony	Farr	Kennedy, R. I.	Rowland
Ashbrook	Fess	Kettner	Scott, Pa.
Barkley	Fields	Key, Ohio	Scully
Borland	Fisher	Kincheloe	Sells
Britten	Fitzgerald	Kreider	Shallenberger
Bruckner	Flynn	Lea, Cal.	Sloan
Campbell, Kans.	Fordney	Littlepage	Smith, Mich.
Capstick	Foss	Lobeck	Snyder
Carew	Francis	McAndrews	Stafford
Clark, Pa.	Fuller, Ill.	McClintic	Sullivan
Costello	Gallivan	McCormick	Swift
Currie, Mich.	Garland	McCulloch	Talbott
Dale, N. Y.	Garner	McKenzie	Tinkham
Davis	Graham, Pa.	Madden	Vare
Dempsey	Gray, N. J.	Maher	Volstead
Dewalt	Hamill	Martin, Ill.	Waldow
Dixon	Hayes	Mason	Walsh
Dooling	Hill	Mays	Ward
Drukker	Howard	Morgan	Welty
Dunn	Hull, Iowa	Morin	White, Ohio
Dyer	Ireland	Overmyer	Williams
Eagan	Johnson, Wash.	Paige	
Estopinal	Kearns	Parker, N. Y.	
Fairchild, G. W.	Kennedy, Iowa	Powers	

The SPEAKER. On this call 336 Members have answered to their names. a quorum.

Mr. KITCHIN. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

THE ORPHAN BRIGADE.

Mr. THOMAS. Mr. Speaker, I ask unanimous consent to address the House.

The SPEAKER. The gentleman from Kentucky asks unanimous consent to address the House. Is there objection?

There was no objection.

Mr. THOMAS. Mr. Speaker, I desire to have incorporated in my remarks a short history of the Confederate Orphan Brigade in Peace and War, written by Adjt. Thomas D. Osborne. The article is as follows:

KENTUCKY "ORPHAN BRIGADE"—A SKETCH OF ITS WAR AND PEACE RECORD.

[By Adjt. Thomas D. Osborne.]

At the approaching United Confederate Veteran Reunion in Washington, June 4-8, Kentucky will furnish a prominent figure, the Orphan Brigade, a body of soldiers with what is probably an unparalleled record.

When the war began Kentucky tried to be neutral, but neutrality was violated and many Kentuckians decided to fight for the South; the famous Camp Boone was formed near the Kentucky line a few miles north of Clarksville, Tenn. Fifty companies from 84 counties in Kentucky enlisted. These composed the larger part of the First Kentucky, or better known "Orphan Brigade," made up of the Second, Fourth, Fifth, Sixth, and Ninth Kentucky Infantry, Byrnes's, Cobb's, and Graves's batteries of artillery.

NOTABLES.

Jefferson Davis, who, like Abraham Lincoln, was a Kentuckian, called this brigade the "seed corn of the Confederacy." Lincoln had two brothers-in-law in this command. Both were killed in battle.

This organization furnished the Confederacy 1 cabinet officer (secretary of war), 1 congressman, 2 war governors (1 killed at Shiloh, the only governor who lost his life in battle), 1 lieutenant general, 1 major general, 2 division chiefs of artillery, 4 brigadier generals, and 15 colonels. This was only a part of the crop from the "seed corn." Two members declined commissions as brigadier generals. Their blood was shed on the soil of every Southern State, and their graves are scattered from Richmond, Va., to El Paso, Tex. They fought as infantry, artillery, cavalry, and marines (Gen. W. B. Haldeman, their present commander, after the Battle of Chickamauga was made a midshipman and with five others served for a brief time in the Confederate Navy, returning to the Orphan Brigade in 1864, taking part in the subsequent engagements, and was paroled with it at Washington, Ga.).

The main engagements of the Orphan Brigade on land were as follows:

BATTLES.

Abbeville, Ackworth, Adairville, Altoona, Alpine, Athens, Atlanta, Augusta, Bacon Creek, Balls Ferry, Bardstown, Barnesville, Baton Rouge, Bear Creek, Beech Grove, Benson Ridge, Bentonville, Big Black River, Big Creek Gap, Big Hill, Big Shanty, Boonville, Bowling Green, Brandon, Buzzards Roost, Calhoun, Camden, Canton, Cartersville, Cassville, Champion Hill, Chattahoochie River, Chattanooga, Chicamauga, Coobs Mill, Columbus, Corinth, Crows Valley, Dallas, Dalton, Decatur, Dover, Dug Creek Gap, Eatonton, Entrenchment Creek, Ezra Church, Flat Creek, Flint River, Fort Donelson, Gordons Mill, Hartsville, Hickory, Hillsboro, Hudson Place, Ishams Ford, Iuka, Jackson, Jonesboro, Kenesaw, Kingston, La Fayette, Lee and Gordons Mills, Lookout Mountain, Manassas, Manchester, Marietta, McDonough, McLemore Cove, Mill Creek Gap, Missionary Ridge, Murfreesboro, New Hope Church, New Market, Okolona, Peachtree Creek, Picketts Mill, Pine Mountain, Ponder Spring, Pumpkinville Creek, Reed Oak, Reeds Bridge, Resaca, Ringgold, Rockyface Ridge, Rossville, Shiloh, Snake Creek Gap, Spring Place, Sumter, Taylor Ridge, Tilton, Tunnel Hill, Tupela, Utoy Creek, Vicksburg, Waynesboro, Whippoorwill Creek.

FAME'S TRUMPET.

Leading military men and scientific writers have commented on the conduct of the Orphan Brigade as follows:

"On May 7, 1864 the brigade marched out of Dalton 1,140 strong. In the subsequent 120 days the brigade was almost continuously in action or on the march. In this period the men of this command received 1,860 deaths or hospital wounds, the dead counted as wounds and but one wound counted for each visitation of the hospital. At the end of this time there were less than 50 men who had not been wounded during the 120 days. There were 240 men left for duty.

"A research into the history of warlike exploits has failed to show me any endurance to the worst trials of war surpassing this." (Dean N. S. Shaler, Harvard University, Boston, Mass.)

Scientific estimate: "The record of the Orphan Brigade has never been surpassed." (Dr. Philip Combs Knapp, in Essay on Endurance.)

Best: "The Orphan Brigade is the best in the Confederacy." (Gen. Joseph E. Johnston.)

A cavalry verdict: "The truest and hardest fighting command in the Confederate army." (Gen. W. H. Jackson.)

After winning all army prizes: "The Orphan Brigade is especially entitled to commendation for soldierly appearance, steadiness of marching, and an almost perfect accuracy in every detail." (Maj. Gen. T. C. Hindman.)

The Hundred Days' Battle.—"The Orphan Brigade obeyed all commands; the 100 days were days of battle; the silent skies looked down on north Georgia, a solid battle field; the streams were red with the blood of two armies." (Gen. William B. Bate.)

After Bloody Friday Fight, at Murfreesboro.—"My poor Orphan Brigade! They have cut it to pieces." (Gen. John C. Breckinridge.)

REUNIONS.

Lieut. Gen. Buckner, organizer of this brigade, remained with his men—when Gens. Floyd and Pillow left—and made the first surrender of the war, at Fort Donelson, February 15, 1862, and he made the last surrender, May 15, 1865, to Gen. E. S. R. Canby, in the Trans-Mississippi Department. The last man killed in the war was a member of the Orphan Brigade, Oscar Doyle, in an engagement April 29, 1865, several days after the surrender of Gens. Lee and Johnston.

The brigade has held reunions for over a third of a century, commanded by Lieut. Gen. S. B. Buckner, Brig. Gen. J. H. Lewis, Capt. John H. Weller, Capt. Sam H. Buchanan, Private William B. Haldeman, present commander. Beginning with Gen. Lewis, each commander has been elected for life. At the election of Gen. Lewis, Thomas D. Osborne, the present adjutant, was elected adjutant for life.

The lamented Adjt. Gen. George Moorman, creator of the United Confederate Veterans' Organization, was connected with the Orphan Brigade, his father, Maj. S. M. Moorman, being brigade commissary.

BRECKINRIDGE BADGE.

In honor of Gen. J. C. Breckinridge, who, after serving as Vice President of the United States, left his seat and a six-year term in the Senate Chamber to command the Orphan Brigade, Gen. Haldeman had placed on the badges for this reunion a metal-framed portrait of Breckinridge.

The brigade will be guests of Gen. Haldeman, at Hotel Varnum, throughout the Washington reunion. The brigade was paroled at Washington, Ga., May 6, 1865. Since the war of 1861–1865, a list of the men, members of the Orphan Brigade, who have filled important official positions—Federal, State, county, and city—would require more space than can be given in a sketch such as this. United States ambassadors, governors, Senators, and Representatives in Congress have been chosen from the roll of the Orphan Brigade and have served with honor and credit the constituencies that honored them.

Cut in stone in almost every cemetery in America are these words of Theodore O'Hara, who was with the Orphan Brigade, serving on the staff of Gen. John C. Breckinridge:

On Fame's eternal camping ground
Their silent tents are spread,
And Glory guards with solemn round
The bivouac of the dead.

The valor of the Orphan Brigade in the Civil War stands alongside that of the Iron Brigade of the Federal Army. The Orphan Brigade was composed originally of about 6,000 men. It arrived at Dalton, Ga., in the spring of 1864, but a little over 1,100 strong, and 120 days of almost continuous battle reduced the number to about 250 effective men. That brigade was first commanded by John C. Breckenridge, a former Vice-President of the United States, and was called the Orphan Brigade because it was almost continuously fighting within the Federal lines and because nearly all its commanders were killed in battle.

There is only a remnant of these brave volunteer sons of Kentucky left now. They fought four desperate years against overwhelming odds under the stars and bars, but when the war was over they sorrowfully furled the conquered banner and, returning home, became good citizens, as they were brave soldiers.

They are now in this Capital City in annual reunion, with their battle-torn flags lovingly entwined with the Stars and Stripes, marching down Pennsylvania Avenue to the inspiring strains of Dixie and the Star-Spangled Banner. [Applause.]

This city and this Congress bid them welcome in the name of a united and indivisible Union. [Applause.]

This Union has no more devoted adherents than these heroic old veterans of the thinned and thinning remnant of the Orphan Brigade. They are men of the highest ideals and loftiest courage, and to-day would lay down their lives for the preservation of this Union. All of them, like many in this House, have crossed over the crest of the great human divide and are passing along down on the other side. Soon the lengthening evening shadows of their mortal lives will deepen into the darkness of eternal night. I trust when dissolution comes the immortal spirit of each of them will be wafted on angel wings to the land of perpetual sunshine and perfect rest. [Applause.]

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes.

The message also announced that the Senate had passed with amendments the bill (H. R. 4188) to provide further for the national security and defense by stimulating agriculture and facilitating the distribution of agricultural products, had insisted upon its amendments, had requested a conference with the House of Representatives on the bill and amendments, and had appointed Mr. GORE, Mr. SMITH of South Carolina, Mr. SMITH of Georgia, Mr. PAGE, and Mr. KENYON as the conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1918, and for other purposes.

The message also announced that the Senate had passed without amendment joint resolution of the following title:

H. J. Res. 94. Joint resolution authorizing the Board of Regents of the Smithsonian Institution to permit the Secretary of War to erect temporary buildings in the Smithsonian grounds.

The message also announced that the Senate had agreed to the following concurrent resolution:

House concurrent resolution 11.

Resolved by the House of Representatives (the Senate concurring), That the statue of Sequoyah, presented by the State of Oklahoma, to be placed in Statuary Hall, is accepted in the name of the United States, and that the thanks of Congress be tendered to the State for the contribution of the statue of one of its most eminent citizens, illustrious for his distinguished civic services.

Second. That a copy of these resolutions, suitably engrossed and duly authenticated, be transmitted to the governor of Oklahoma.

URGENT DEFICIENCIES FOR MILITARY AND NAVAL ESTABLISHMENTS.

Mr. SHERLEY. Mr. Speaker, I present a conference report upon the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes, for printing under the rules.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. SHERLEY. Mr. Speaker, I present herewith a conference report upon the bill (H. R. 11) making appropriations for the sundry civil expenses of the Government for the fiscal year ending June 30, 1918, and for other purposes, for printing under the rules.

CALENDAR FOR UNANIMOUS CONSENT.

The SPEAKER. The Clerk will call the first bill on the Calendar for Unanimous Consent.

STATUE OF JAMES BUCHANAN.

The first business on the Calendar for Unanimous Consent was House joint resolution 70, authorizing the erection on the public grounds in the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States.

The SPEAKER. Is there objection?

Mr. AUSTIN. Mr. Speaker, I object.

The SPEAKER. The gentleman from Tennessee objects.

Mr. LINTHICUM. Mr. Speaker, I move to suspend the rules and pass House joint resolution 70.

The SPEAKER. The gentleman from Maryland moves to suspend the rules and pass the House joint resolution which the Clerk will report.

The Clerk read as follows:

Resolved, etc., That the Chief of Engineers, United States Army, be, and he is hereby, authorized and directed to grant permission to the trustees designated in the will of Mrs. Harriet Lane Johnston for the erection of a memorial to James Buchanan, a former President of the United States, on public grounds of the United States in the city of Washington, D. C., in the southern portion of Meridian Hill Park, between Fifteenth, Sixteenth, W, and Euclid Strets NW.: *Provided*, That the design and location of said memorial and the plan for the treatment of the grounds connected with its site shall be approved by the Commission of Fine Arts, and that the United States shall be put to no expense in or by the erection of said memorial.

The SPEAKER. Is a second demanded?

Mr. MILLER of Minnesota. Mr. Speaker, I demand a second.

Mr. RAKER. Mr. Speaker, I demand a second.

Mr. LINTHICUM. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

Mr. RAKER. Mr. Speaker, I object.

The SPEAKER. The gentleman from California objects, and the Chair appoints the gentleman from Maryland [Mr. LINTHICUM] and the gentleman from Minnesota [Mr. MILLER] to take their place as tellers. The question is on ordering a second on the motion to suspend the rules and pass the resolution.

The House divided; and the tellers reported—ayes 129, noes 87.

So a second was ordered.

The SPEAKER. The gentleman from Maryland has 20 minutes and the gentleman from Minnesota has 20 minutes.

Mr. LINTHICUM. Mr. Speaker, I do not desire to make any speech upon this subject. This resolution passed the House at the last session of Congress. It is to provide for a monument to James Buchanan, a former President of the United States. The money is provided for the monument by the will of Mrs. Harriet Lane Johnston, deceased, of Maryland. James Buchanan was elected from the State of Pennsylvania.

Mr. RAKER. Mr. Speaker, will the gentleman yield?

Mr. LINTHICUM. In a few minutes. Mrs. Harriet Lane Johnston, as I stated, in her last will and testament provided $100,000 for the erection of a monument in the city of Washington to James Buchanan. The bequest runs out in March of next year, and unless we pass this resolution and provide for the erection of the monument within that time the money will revert to the family. The location has been fixed at Meridian Hill Park. It has been settled by the Fine Arts Commission. The statue has already been designed by Mr. Hans Schuler, an artist of the city of Baltimore. I do not think that there is much that I can say to the House about James Buchanan that is not fully known. Everyone knows his history and his administration, and this monument will not cost the Government one dollar. It is absolutely provided for. Every provision is made and the resolution ought to pass.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. LINTHICUM. Yes.

Mr. MANN. How soon does this money have to be expended before it reverts to the estate?

Mr. LINTHICUM. Unless the resolution is passed by March of next year it lapses.

Mr. MANN. Who gets the money if it is not used for this purpose?

Mr. LINTHICUM. I understand it goes to the family. I do not know to what member. It goes back to the estate.

Mr. MANN. Some one told me that it would go to some member of the family who is very much in need of the money, and I wondered if the gentleman knew.

Mr. LINTHICUM. No. I think it reverts to the estate. I have not heard anything of that kind.

Mr. RAKER. Mr. Speaker, will the gentleman yield?

Mr. LINTHICUM. Yes.

Mr. RAKER. Has the Commission of Fine Arts consented to this location?

Mr. LINTHICUM. The Commission of Fine Arts has selected the location in the Meridian Hill Park, and they have made every provision for it and have provided for a large basin to be erected in front of the statue.

Mr. RAKER. About what is this monument to cost?

Mr. LINTHICUM. One hundred thousand dollars.

Mr. RAKER. And it will be an ornament?

Mr. LINTHICUM. Absolutely. The whole thing is left to the Commission of Fine Arts, and they have decided upon the monument and the location.

Mr. RAKER. Who is the designer of the monument?

Mr. LINTHICUM. Hans Schuler, a young artist in the city of Baltimore, a very good man, a most excellent artist, selected by the commission.

I yield five minutes to the gentleman from Texas [Mr. SLAYDEN].

Mr. SLAYDEN. Mr. Speaker, my colleague [Mr. LINTHICUM] stated all the essential facts in connection with this resolution, but there was so much confusion in the House that a number of gentlemen did not hear him.

At least, sir, I assume they did not hear him because of the number of Members who asked for information on the points he had just plainly stated. Now, the facts are that Mrs. Harriet Lane Johnson, niece of the late James Buchanan, left a $100,000 bequest for the purpose of erecting a memorial of some sort to her uncle in the city of Washington. The only part that the Government has been called upon to play in the matter is to provide the site for the monument. It was brought to the committee of which I have the honor of being the chairman and was very carefully considered by that committee. I myself raised the question of the form of the monument. I thought, as I believe my friend from Illinois [Mr. MANN] thinks, that we were getting most too many bronze effigies in the city of Washington, too many figures of men; that we were making too many futile efforts to keep some people from plunging into oblivion, where a good many of them are entitled to rest; and therefore I suggested that there should be a different form given to this design from that which was usually accepted, which you might consider the conventional design, of a man standing on a pedestal. So it is now the purpose to develop that region that has been selected by the Commission of Fine Arts, which has power over such matters, to embellish it by fountains and other ornamentations of that sort, which will add tremendously to the beauty of the landscape. It does not cost the Government anything except the privilege of locating it upon public land. It will be a great ornament to Meridian Hill. It will be a refreshing delight to all the people of Washington in the hot summer days, and to Members, when you work here during the summer considering bills calling for an unusual amount of taxation, to go up Sixteenth Street and see the play of that beautiful fountain; and I hope, in our own interest and in order to develop the delights of a summer's sojourn in Washington, that every Member of the House will vote for this bill. I think it passed unanimously before. I do not remember that there was any opposition to it. It was unanimously reported by the committee that considered it, and I hope you are going to approve the verdict of the committee, which was that the bill should pass.

Mr. MILLER of Minnesota. Mr. Speaker, I am certainly only one of many who are very much amazed that it is proposed to pass this bill at this time. When this Congress was convened in extraordinary session April 2 last, the query at once arose, What shall be considered in the extra session of Congress? Shall there be legislation exclusively upon war subjects or shall there be legislation upon general subjects? It was a patriotic call of the country that Congress should focus its attention upon those measures which were absolutely necessary for the conduct of the war. It was the opinion of all Members whom I heard express any opinion at all that Congress should confine itself to the consideration of the necessary and essential war measures. There are many measures of public concern, of general interest to the United States, in which many Members of this House are rightfully interested, that ought to receive early consideration if general legislation at all is to be attempted. While I have no means of inside information, yet I am reliably informed that the Democratic caucus at the outset of this extra session passed a hard-and-fast rule that there should not be taken up for consideration any but war measures. Here, Mr. Speaker, we find brought up this morning a measure that in no sense can be considered a war measure.

Mr. MEEKER. Will the gentleman yield?

Mr. MILLER of Minnesota. I will.

Mr. MEEKER. Can the gentleman conceive of a more peaceful subject for legislation than the one we have before us this morning?

Mr. MILLER of Minnesota. Well, I confess James Buchanan did everything he possibly could to prevent the United States from entering into war more than 50 years ago at least to prevent the northern part of the United States from preparing any defense against the gathering storm. But that is past history, and let it be put to one side. I appeal to the Democrats of this House and ask them when they vote in a few minutes to realize that they are deciding whether we are going to take up general legislation or whether we are not.

Mr. GORDON. Will the gentleman yield?

Mr. MILLER of Minnesota. I will be very pleased to yield.

Mr. GORDON. Will the gentleman tell me how Congress can prevent, without violating its own rules, the consideration of a proposition which comes up as this comes up?

Mr. MILLER of Minnesota. Well, the House by its rules and by a general agreement can, of course, carry out a program of legislation or avoid a program of legislation; it can effectuate a gentleman's agreement that is just and fair. We had the same thing in 1911. There was no general legislation during the entire extra session of Congress excepting on one subject. We have had the same thing in other extra sessions. For instance, during extra sessions called to revise the tariff, it would be agreed to consider a tariff bill only and nothing else was considered. I want to say to the Democratic part of this House, and I say this to you in the most friendly spirit, if you insist on passing this, I submit that to do so will violate the faith of the House pledged to consider only war measures. Now, the two branches of the House are about equally divided. It seems to me to be of the utmost value to the country that we start the session with harmony, that we carry on our work in harmony, and that when we shall have concluded our work we shall go to the country in harmony. [Applause.] Harmony can not be served by passing such a piece of general legislation as this, uncalled for and not needed in the country's service.

Mr. LINTHICUM. Will the gentleman yield for a question?

Mr. MILLER of Minnesota. Certainly.

Mr. LINTHICUM. I want to say to the gentleman that the idea of having this passed at this time is that this bequest expires in March. If we wait until December, then very likely we will not get it through, and we will lose the monument. It is a magnificent gift and no harm can be done.

Mr. MILLER of Minnesota. That is a most astounding statement. If his proposition has the merit the gentleman thinks it has, let me say to him that Congress will convene on the first of next December and remain in session for many, many months, and this resolution can then be passed in a very short period of time. If it lacks merit and can not pass in four months, then why try to jam it through now willy-nilly when we are gathered here for the purpose of considering and legislating for the welfare of our country. We certainly are not here for the purpose of considering whether or not to permit the members of a family to erect a monument to one of its deceased members, whoever the deceased may be.

Mr. LINTHICUM. Would the gentleman be willing to confine it to war measures and vote on war measures absolutely?

Mr. MILLER of Minnesota. We have done that so far, and I have been heartily in favor of that proposition.

Mr. LINTHICUM. How about the woman-suffrage amendment?

Mr. MILLER of Minnesota. We have not reached that yet.

Mr. LINTHICUM. How will the gentleman vote on that?

Mr. MILLER of Minnesota. That is a bridge we will cross when we come to it.

Mr. LINTHICUM. The gentleman should answer that question.

Mr. MILLER of Minnesota. The gentleman can not get me away from considering the malicious features of this proposition by asking me about something else and totally different.

Mr. GORDON. Is not the reason the gentleman is opposed to this because he wants to get up this suffrage proposition?

Mr. MILLER of Minnesota. The gentleman certainly never made a greater mistake in his life, and he has made as many as any man that ever sat in the House. [Laughter.]

Now, let me say just one word further, and I am very serious about this. Here is a resolution that has been officially reported from the committee having it in charge, and its consideration has just been voted for by practically every Democrat here. The situation thus presented has no semblance to that the gentlemen from Maryland and Ohio have suggested. It is for the Democratic Members of the House now to decide whether they are going to keep the faith, the faith that we made and were glad to live up to, that the committees of this House should not report out any legislation except that which is devoted to war propositions, or whether they, having made the rule with sounding trumpets, now play favorites and start the passage of little pet schemes in which the public welfare has no concern. And it seems to me not the best time in the world for us to authorize the building of a monument to an ex-President of the United States—and I say this with all sincerity—who has perhaps little other than that he once was President to recommend him to our consideration. [Applause.] There have been much greater men than James Buchanan in this Nation whose memories have not been blessed with shafts of marble or memorials of any kind. They did not happen to have rich relatives willing to spend $100,000 in a marble shaft that will tend to make future generations believe he was one of the Nation's great. I am willing to let that pass to one side, if need be, but I would like to have some one tell me, if he can, what distinguished service this man rendered—what service of any kind he rendered anybody that will justify erecting a monument costing the enormous sum of $100,000 to be paid for by anybody in Meridian Park, one of the big show places to be of the land. If these would-be donors are filled with patriotism, if their souls are on fire with love for country, I will tell them how to spend this $100,000—buy liberty bonds, and that will be infinitely better for our country in every respect. [Applause.]

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I am in sympathy with the gentleman in his statement that this session should be confined to war measures. Therefore I move that the House do now adjourn.

The SPEAKER pro tempore (Mr. SAUNDERS of Virginia). The gentleman from North Carolina moves that the House do now adjourn.

Mr. MANN. Mr. Speaker, I ask for the yeas and nays.

The SPEAKER pro tempore. The gentleman from Illinois demands the yeas and nays. Those in favor of ordering the yeas and nays will rise and stand until counted. [After counting.] Sixty-two gentlement have risen in favor of ordering the yeas and nays—not a sufficient number.

Mr. MANN. Mr. Speaker, I ask for the other side.

The SPEAKER pro tempore. The gentleman asks for the other side. The Chair will count. [After counting.] On this vote the ayes are 62 and the noes 112—a sufficient number, and the Clerk will call the roll.

The question was taken; and there were—yeas 208, nays 120, answered "present" 3, not voting 98, as follows:

YEAS—208.

Mr. TALBOTT with Mr. MADDEN.

Mr. SHALLENBERGER with Mr. MCKENZIE.

Mr. RIORDAN with Mr. WILLIAMS.

Mr. MAYS with Mr. IRELAND.
Mr. MAHER with Mr. KEARNS.
Mr. SULLIVAN with Mr. PAIGE.
Mr. BRUCKNER with Mr. HILL.
Mr. DIXON with Mr. COSTELLO.
Mr. FLYNN with Mr. DAVIS.
Mr. GARNER with Mr. HAWLEY.
Mr. KINCHELOE with Mr. DRUKKER.
Mr. LOBECK with Mr. GRIEST.
Mr. MCCLINTIC with Mr. DEMPSEY.
Mr. CAREW with Mr. POWERS.
Mr. DOOLING with Mr. MASON.
Mr. RUCKER with Mr. DUNN.
Mr. HAMILL with Mr. FESS.
Mr. MARTIN of Illinois with Mr MCCULLOCH.
Mr. GALLIVAN with Mr. ROWLAND.
Mr. CANTRILL with Mr. SNYDER.
Mr. STEPHENS of Nebraska with Mr. SLOAN.
Mr. CLARK of Florida with Mr. FULLER of Illinois.
Mr. LITTLEPAGE with Mr. COOPER of West Virginia.

Mr. HAWLEY. Mr. Speaker, is this a call of the House?

The SPEAKER. No.

Mr. HAWLEY. I was out during the progress of the roll call.

The SPEAKER. The gentleman is not recorded.

Mr. BLACKMON. Mr. Speaker, I desire to vote "aye."

The SPEAKER. Was the gentleman in the Hall listening?

Mr. BLACKMON. I was at the door.

The SPEAKER. The gentleman can not vote.

Mr. TAGUE. Mr. Speaker, I voted "yea." I am paired with Mr. KENNEDY of Rhode Island. I want to withdraw my vote and vote "present."

The SPEAKER. The Clerk will call the gentleman's name.

The Clerk called the name of Mr. TAGUE, and he answered "Present."

The result of the vote was announced as above recorded.

Thereupon (at 1 o'clock and 44 minutes p. m.) the House adjourned until to-morrow, Thursday, June 7, 1917, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of the Treasury, transmitting an estimate of deficiency in the appropriation for materials and miscellaneous expenses, Bureau of Engraving and Printing, for the fiscal year ending June 30, 1917 (H. Doc. No. 168); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting copy of communication of the Postmaster General submitting an estimate of deficiency in the appropriation for shipment of supplies, Postal Service, payable from the postal revenues for the fiscal year ending June 30, 1917 (H. Doc. No. 169); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of the Treasury, transmitting copy of a communication of the Secretary of War submitting additional estimates of appropriation required for the service of the fiscal year ending June 30, 1918 (H. Doc. No. 170); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. DENT, from the Committee on Military Affairs, to which was referred the resolution (S. J. Res. 70) relating to the service of certain retired officers of the Army, reported the same without amendment, accompanied by a report (No. 72), which said joint resolution and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. MONDELL: A bill (H. R. 4874) to expedite and simplify designations under the stock-raising homestead law; to the Committee on the Public Lands.

By Mr. HULBERT: A bill (H. R. 4875) as to medals of honor; to the Committee on Military Affairs.

By Mr. TAYLOR of Colorado: A bill (H. R. 4876) to expatriate citizens who leave the United States to evade registration or selective draft; to the Committee on Immigration and Naturalization.

Also, a bill (H. R. 4877) to prohibit the return of citizens who leave the United States to evade registration or selective draft; to the Committee on Immigration and Naturalization.

By Mr. MONDELL: A bill (H. R. 4878) providing for appeals from decisions of the Secretary of the Interior; to the Committee on the Public Lands.

By Mr. CRAMTON: A bill (H. R. 4891) to amend an act entitled "An act to increase the pensions of widows, minor children, etc., of deceased soldiers and sailors of the late Civil War, the War with Mexico, the various Indian wars, etc., and to grant a pension to certain widows of the deceased soldiers and sailors of the late Civil War," approved April 19, 1908, and for other purposes; to the Committee on Invalid Pensions.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CRAMTON: A bill (H. R. 4879) granting a pension to Lindsey Clark; to the Committee on Invalid Pensions.

By Mr. FOSTER: A bill (H. R. 4880) granting an increase of pension to William S. Rosborough; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4881) granting an increase of pension to James J. Harris; to the Committee on Invalid Pensions.

By Mr. GOULD: A bill (H. R. 4882) granting an increase of pension to William A. Bennett; to the Committee on Invalid Pensions.

By Mr. KRAUS: A bill (H. R. 4883) granting an increase of pension to Christopher D. Winters; to the Committee on Invalid Pensions.

By Mr. PRATT: A bill (H. R. 4884) granting a pension to Ella Drake; to the Committee on Invalid Pensions.

By Mr. ROGERS: A bill (H. R. 4885) granting a pension to Catherine Gardner; to the Committee on Pensions.

By Mr. ROSE: A bill (H. R. 4886) granting an increase of pension to William R. Smith; to the Committee on Pensions.

By Mr. RUSSELL: A bill (H. R. 4887) granting an increase of pension to George W. Pack; to the Committee on Invalid Pensions.

By Mr. STRONG: A bill (H. R. 4888) granting a pension to E. Fay Lowry; to the Committee on Pensions.

Also, a bill (H. R. 4889) granting a pension to Mrs. Harriet Alexander; to the Committee on Invalid Pensions.

By Mr. THOMPSON: A bill (H. R. 4890) granting a pension to Anna M. Barrett; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of the National Association of Piano Merchants of America, favoring the Stephens-Ashurst bill; to the Committee on Interstate and Foreign Commerce.

Also (by request), petitions of Methodist Episcopal Church of Bellflower, and citizens of Union Star, all of the State of Missouri, favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of John P. Boyle, of Gardner, Kans., favoring resolution relative to freedom of Ireland; to the Committee on Foreign Affairs.

Also (by request), memorial of Brotherhood of Locomotive Firemen and Engineers, of Galesburg, Ill., relative to levying war tax; to the Committee on Ways and Means.

Also, memorial of Virginia Association of Colleges and Schools for Girls, relative to protection for morals of young men in training camps; to the Committee on Military Affairs.

Also, memorial of International Shingle Weavers' Union of America, relative to investigation of bomb throwing in San Francisco in July, 1916; to the Committee on Labor.

Also, memorial of the Division of Rhode Island, Sons of Veterans, United States Army, favoring universal military training; to the Committee on Military Affairs.

Also, memorial of Essex County (N. J.) Socialist Party and National Woman's Party of New York, favoring suffrage amendment; to the Committee on the Judiciary.

By Mr. ALEXANDER: Petitions of sundry citizens and church organizations of the State of Missouri, favoring national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. BRUMBAUGH: Petition of C. A. Hughes, R. H. Oman, and many citizens of Columbus, Ohio, favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of Men's Bible Class, Indianola Methodist Episcopal Church, of Columbus, Ohio, favoring the prohibition of the liquor business as a war measure and opposing war tax on same; to the Committee on the Judiciary.

Also, petition of residents of Columbus, Ohio, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. CALDWELL: Petitions of citizens of Jamaica, Borough of Queens, New York City, favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petitions of sundry citizens of the State of New York, protesting against any kind of prohibition; to the Committee on the Judiciary.

By Mr. COOPER of Ohio: Petition of churches, Sunday schools, public-school teachers and pupils, and sundry private individuals of Mahoning, Trumbull, and Ashtabula Counties, Ohio, urging prohibition of the traffic in intoxicating liquors as a means of conserving the manhood, womanhood, and childhood of the Nation, and preserving its foodstuffs; to the Committee on the Judiciary.

By Mr. CRAMTON: Petition of George Mitchell and 125 others, of Lapeer, Mich., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of Mrs. D. D. Campbell and 50 others, of Fairgrove; faculty of Michigan State Normal College, of Ypsilanti; Rev. F. T. Kyle; Erskine Methodist Protestant Church, of Bad Axe; A. G. West and 10 others, of Columbiaville; Albert S. Volz and 2 others, of Pigeon; congregation of Gratiot Park Methodist Episcopal Church, of Fort Huron; congregation of Methodist Episcopal Church of Sandusky; Rev. E. F. Hildebrand and 25 other residents of Mayville; and Woman's Christian Temperance Union of Lapeer County, all in the State of Michigan, favoring the prohibition of the liquor business as a war measure; to the Committee on the Judiciary.

By Mr. DALE of New York: Petition of members and friends of the National Woman's Party in mass meeting at Ritz-Carlton Hotel, New York City, demanding the passage of the Susan B. Anthony national woman-suffrage amendment; to the Committee on the Judiciary.

Also, petition of National Retail Hardware Association of Argos, Ind., opposing the Hardwick amendment to the Federal reserve act; to the Committee on Banking and Currency.

Also, petition of Travel Club of America, New York City, N. Y., signed by Henry Collins Walsh, president, favoring the retirement of Col. David L. Brainard as a brigadier general; to the Committee on Military Affairs.

Also, petition of National Cloak & Suit Co., of New York, signed by S. G. Rosenbaum, president, favoring the daylight-saving bills recently introduced in Congress; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Brewer Bag Co., of New York, favoring resolution No. 73 of the House of Representatives, protesting against British censorship and interference of American trade and shipping; to the Committee on Foreign Affairs.

Also, petition of the Merchants' Association of New York City, N. Y., urging the enlarging and continuation of the Advisory Board of the Bureau of War-Risk Iinsurance; to the Committee on the Merchant Marine and Fisheries.

Also, petition of Mailer's Union No. 6 of the International Typographical Union of New York City, opposing increase in second-class postal rates; to the Committee on Ways and Means.

By Mr. DALLINGER: Petition of undergraduates of Radcliffe College, favoring national prohibition; to the Committee on the Judiciary.

By Mr. DIXON: Petitions of Presbyterian Sunday School, Brownstown; Presbyterian Church, Hanover; Christian Sunday School, Brownstown; First Methodist Episcopal Church, Columbus; Leland Scott Bible Class, Madison; faculty and students of Hanover College, Hanover; Brownstown Methodist Church, Brownstown; Blish Milling Co., Seymour; Sardinia Baptist Sunday School, Sardinia; and 26 citizens of North Vernon, all in the State of Indiana, favoring national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. EAGAN: Petitions of Max Spiegel and others, against proposed tax on cigarette tubes; to the Committee on Ways and Means.

Also, memorial of Sixth Assembly Republican Club of Brooklyn, N. Y., favoring food control by Government; to the Committee on Agriculture.

Also, petition of the Middle West Crop Bureau relative to promising crop conditions; to the Committee on Agriculture.

Also, memorial of Chicago Permanent Conference on Terms of Peace relative to permanent peace; to the Committee on Foreign Affairs.

Also, memorial of New Jersey State Organization for Public Health Nursing, favoring suffrage for women; to the Committee on the Judiciary.

By Mr. ELSTON: Petition of Berkeley Center of the California Civic League, urging prohibition of liquor traffic and protection of Army camps; to the Committee on the Judiciary.

By Mr. GALLIVAN: Memorial of League of Greek Liberals of Haverhill, pledging loyalty and support to the United States; to the Committee on Foreign Affairs.

By Mr. GOOD: Petition of sundry citizens of Mount Vernon, Iowa, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. GRAHAM of Illinois: Petition of sundry citizens of Roseville, Ill., and vicinity for the immediate enactment of prohibition of the manufacture of alcoholic liquors as a measure of food conservation and for the immediate prohibition of the sale of liquors for beverage purposes in order to conserve the health, wealth, labor, transport facilities, and military efficiency of the people; to the Committee on the Judiciary.

Also, memorial of 300 citizens of Monmouth, Ill., urging prohibition of liquor traffic as war-emergency measure to conserve food supply and make for efficiency in factory, farm, and military service; to the Committee on the Judiciary.

Also, petition of the churches of La Harpe, Ill., urging prohibition as a war measure; to the Committee on the Judiciary.

Also, memorial of Methodist Episcopal Church, Carthage, Ill., urging national prohibition of liquor traffic to conserve food supply and wages of laborers for necessities and to make for efficiency in factory, farm, and military service; to the Committee on the Judiciary.

Also, petition of the congregation of the Baptist Church of Moline, Ill., urging national prohibition of liquor traffic as a war measure in order to conserve food supply and make for efficiency in factory, farm, and military service; to the Committee on the Judiciary.

Also, memorial of members of the First Swedish Lutheran Church, of Rock Island, Ill., urging nation-wide prohibition; to the Committee on the Judiciary.

Also, memorial of congregation of Zion Lutheran Church, Rock Island, Ill., urging prohibition; to the Committee on the Judiciary.

Also, petition of Augusta Township Sunday School Association, Hancock County, Ill., urging measure leading to dry Nation during the war; to the Committee on the Judiciary.

Also, memorial of C. C. French and sundry other citizens of Monmouth, Ill., urging prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of sundry citizens of Watertown and Hampton, Ill., for the enactment of prohibition of the manufacture of alcoholic liquors as a measure of food conservation and for the immediate prohibition of the sale of liquors for beverage purposes in order to conserve the health, wealth, labor, transport facilities, and military efficiency of the people; to the Committee on the Judiciary.

Also, petition of congregation of Memorial Christian Church, of Rock Island, Ill., urging national prohibition during the war so that American manhood, unhampered, may lead other nations to victory and to peace, and as a means of conserving America's supply of food; to the Committee on the Judiciary.

Also, memorial of Methodist Men's Bible Class, of Kirkwood, Ill., urging prohibition of alcoholic liquors as war measure to conserve food and efficiency; to the Committee on the Judiciary.

Also, petition of Second Congregational Church, Moline, Ill., for prohibition of liquor traffic as a war measure to conserve food supplies and to assure firm, factory, and military efficiency; to the Committee on the Judiciary.

Also, petition of Congregational Church, Plymouth, Ill., urging national prohibition as a war measure to save 100,000,000 bushels of grain for food and to save our soldier boys, who defend the homeland, from temptation and disgrace; to the Committee on the Judiciary.

Also, petition of Moline Ministerial Union, representing 4,000 people, urging national prohibition of the liquor traffic as a war emergency measure to conserve food supply and make for efficency in factories, farms, and military service; to the Committee on the Judiciary.

Also, memorial of 600 people of United Presbyterian, Methodist, Episcopal, and Presbyterian Churches of Biggsville, Ill., for immediate national prohibition as a war measure, in the interests of efficiency, national preparedness, food conservation, public morals, and protection of men enlisting; to the Committee on the Judiciary.

Also, memorial of Presbyterian Churches of Aledo and Burgess, Ill., for national prohibition of liquor traffic as war emergency measure; to the Committee on the Judiciary.

Also, petition of congregation of the Methodist Episcopal Church of Plymouth, Ill., for national prohibition as a war measure, to save 100,000,000 bushels of grain, now being used for liquor, for food, and to save our soldier boys, who defend the home land, from temptation and disgrace; to the Committee on the Judiciary.

Also, petition of Chili Township Sunday School Association, Hancock County, Ill., for passage of bill prohibiting the use of all grains and foodstuffs in the manufacture of alcoholic liquors; to the Committee on Agriculture.

Also, memorial of congregation of the United Presbyterian Church of Aledo, Ill., urging prohibition of liquor traffic as war emergency measure in order to conserve food supply and to make for efficiency in factory, farm, and military service; to the Committee on the Judiciary.

Also, memorial of congregation of the United Presbyterian Church of Media, Ill., urging adoption of national prohibition as a war emergency measure; to the Committee on the Judiciary.

Also, memorial of Central Presbyterian Church of Rock Island, Ill., to prohibit the manufacture and sale of spirituous liquors as an emergency war measure for the conservation of the food supply and for efficiency in factory, farm, and military service; to the Committee on the Judiciary.

Also, memorial of congregation of the United Brethren Church of Colusa, Ill., for national prohibition of the liquor traffic as a war emergency measure in order to conserve the food supply and to make for efficiency in factory, farm, and military service; to the Committee on the Judiciary.

Also, memorial of congregation of the United Presbyterian Church of Rock Island, Ill., to prohibit the manufacture and sale of intoxicating liquors as an emergency war measure, for the conservation of food supply, and for the efficiency of the factory, the farm, and the military service; to the Committee on the Judiciary.

Also, memorial of the Toll Sunday School of Hancock County, Ill., for national prohibition of the liquor traffic as a war emergency measure and to make for efficiency in factory, farm, and military service; to the Committee on the Judiciary.

Also, memorial of sundry citizens of Viola and New Windsor, Ill., for prohibition of the liquor traffic as a war measure in order to conserve the food supply and make for efficiency in factory, farm, and military service; to the Committee on the Judiciary.

Also, memorial of congregation of the Methodist Episcopal Church of Oquawka, Ill., for national prohibition as a war measure; to the Committee on the Judiciary.

Also, memorial of Illinois Congress of Mothers and Parent-Teachers Associations, for prohibition of the manufacture of alcoholic beverages for the period of the war, at least; to the Committee on the Judiciary.

Also, petition of sundry business men of the city of Monmouth, Ill., for national prohibition during the war; to the Committee on the Judiciary.

Also, petition of Methodist Episcopal Sunday School of Terre Haute, Ill., for national constitutional prohibition; to the Committee on the Judiciary.

By Mr. HAMILTON of New York: Petitions of members of the Baraca Class of First Baptist Church of Olean and sundry citizens of Falconer, N. Y., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. HERSEY: Memorial of Union Evangelical Church, of Greenville, Me., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, memorial of National Woman's Party, New York City, favoring suffrage for women; to the Committee on the Judiciary.

By Mr. KEATING: Petitions of the First Baptist Church, Denver; La Jara Women's Christian Union, La Jara; Longmont Women's Christian Temperance Union, Longmont; the Central Union, Woman's Christian Temperance Union, Pueblo; the Eighth District Women's Christian Temperance Union, Denver; the congregation of the Methodist Church, La Junta; citizens of Aguilar; citizens of Center; citizens of Arvada; Men's Organized Bible Class, First Presbyterian Church, Boulder; members and friends of the Sand Arroya; Friends (Quaker) Church, Sugar City; citizens of Idaho Springs; citizens of Hartman and vicinity; and citizens of Manzanola, all in the State of Colorado, favoring national prohibition; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Petition of the Providence (R. I.) Atheneum, favoring amendment to the existing Federal estate tax law; to the Committee on Ways and Means.

Also, petition of Providence (R. I.) Typographical Union, No. 33, protesting against proposed increase in postal rates on second-class matter as proposed in revenue bill; to the Committee on Ways and Means.

Also, petition of E. J. Horton & Co., of Providence, R. I., favoring Nation-wide prohibition; to the Committee on the Judiciary.

Also petition of Rhode Island Anti-Saloon League, favoring prohibition legislation; to the Committee on the Judiciary.

By Mr. KING: Petitions of Mr. Alexander Thompson and divers citizens of Camp Point, Ill., favoring prohibition; to the Committee on the Judiciary.

By Mr. KRAUS: Petition of sundry citizens of Peru, Ind., favoring prohibition as war measure; to the Committee on the Judiciary.

By Mr. LINTHICUM: Petitions of sundry citizens of Baltimore, Md., favoring the daylight-saving bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Union Central Life Insurance Co., of Baltimore, Md., against tax of 8 cents per hundred on new life insurance; to the Committee on Ways and Means.

Also, petition of sundry citizens, boards of trustees of the Anti-Saloon League of Maryland, and Social Service Commission of the Diocese of Maryland, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. LONERGAN: Petitions of Manufacturers' Association of Connecticut and Hartford Chapter, American Institute of Banking, favoring the daylight-saving bill; to the Committee on Interstate and Foreign Commerce.

Also, petitions of 343 men and 173 women, employees of Stanley Rule & Level Co., of New Britain; members of First Church of Christ, of Glastonbury; and Frega Lodge, No. 17, Independent Order of Good Templars, of Hartford, all in the State of Connecticut, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. MAGEE: Petition of Samuel Clayton, of Skaneateles, N. Y., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. MONDELL: Petitions of citizens and individuals of Cheyenne, Laramie, Jireh, Sheridan, Wheatland, and Lusk, Wyo., favoring the prohibition of the liquor business as a war measure and opposing war tax on same; to the Committee on the Judiciary.

By Mr. MOTT: Memorials of sundry churches and church societies of the State of New York, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. NOLAN: Petition of Charles Peter Weeks, of San Francisco, Cal., relative to the proposed tax on tobacco, snuff, and cigarettes in the pending revenue bill; to the Committee on Ways and Means.

Also, petition of California Federation of Women's Clubs, favoring prohibition of the use of grain in the production of alcoholic beverages during the continuance of the war; to the Committee on Agriculture.

Also, petition of Foster & Kleiser Co. and the John Bollman Co., of San Francisco, Cal., protesting against the proposed increases of internal revenue on tobacco and cigarettes; to the Committee on Ways and Means.

Also, petition of Cigarmakers' Local Union, No. 228, San Francisco, Cal., protesting against any proposed amendment or abrogation of existing laws or agreements to restrict or regulate immigration; to the Committee on Immigration and Naturalization.

Also, petition of Local No. 31, Bridge and Structural Iron Workers, and Local 278, Retail Delivery Drivers' Union, of San Francisco, Cal., protesting against any proposed amendment to the Chinese-exclusion act to permit of the importation of Chinese into the United States; to the Committee on Immigration and Naturalization.

By Mr. PETERS: Petition of citizens of Athens and E. A. Pattee and others, of Harmony, Me., favoring national prohibition; to the Committee on the Judiciary.

By Mr. PLATT: Petitions of sundry citizens of the State of New York, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. POLK: Petition of 78 citizens of Cheswold, Del., and vicinity, for prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of 38 citizens of Townsend, Del., for national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. PRATT: Petition of George R. Barker, Royal Gilkley, and sundry others of the Baraca Bible Class of the First Baptist Church, of Ithaca, N. Y., favoring national prohibition during the war; to the Committee on the Judiciary.

Also, petition of the Council of the Diocese of Western New York of the Protestant Episcopal Church, by Rev. G. Sherman Burrows, secretary, favoring a measure to forbid the use of cereals and grain for the manufacture of malt liquors and in-

toxicating beverages during the duration of the war; to the Committee on the Judiciary.

Also, petition of M. B. Dean, Mrs. K. O. Ward, and sundry others of the McKendree Methodist Episcopal Church, of Candor, N. Y., favoring the prohibition of the manufacture of alcoholic liquors as a measure of food conservation and for the immediate prohibition of the sale of intoxicating liquors for beverage purposes; to the Committee on the Judiciary.

Also, petition of Rev. M. R. Chapman, E. E. Swain, Floyd Conderman, and sundry others, of the Park Methodist Episcopal Church, of Hornell, N. Y., favoring the prohibition of the use of any kind of foodstuffs for use in the manufacture of intoxicating liquors; to the Committee on the Judiciary.

Also, petition of Owen Card Publishing Co., National Art Publishing Co., and Baker Bros., all of Elmira, N. Y., protesting against any increase of rates on postal cards; to the Committee on the Judiciary.

By Mr. RANDALL: Petitions of Burnett Baptist Church, Long Beach, 90 citizens of Altadena, 100 of Compton, 125 of Lovesburg, and members of San Gabriel Methodist Episcopal Church, all of California, favoring national prohibition; to the Committee on the Judiciary.

By Mr. ROGERS: Petition of members and congregation of First Evangelical Church of Lowell, Mass., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of sundry citizens of Lowell, Mass., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. ROSE: Petition of congregation of Grace United Evangelical Church, of Hyndman, Bedford County, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of St. Paul's Lutheran Church, of Altoona, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of Church of God, Roaring Spring, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of St. Matthew's Lutheran Church, of Schellburg, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of First Methodist Church, of Altoona, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of Methodist Episcopal Churches of Huntingdon, Bedford, and Blair Counties, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of the pastor and congregation of the Franklin Street Methodist Episcopal Church, of Johnstown, Pa., favoring prohibition during the period of the present war with Germany; to the Committee on the Judiciary.

By Mr. ROWE: Petitions of citizens of Brooklyn and National Institute of Social Sciences, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of L. Schepp Co., of New York, against 10 per cent duty on goods on free list; to the Committee on Ways and Means.

Also, petition of E. O. Spindler, of New York City, against Hardwick amendment to Federal reserve act; to the Committee on Banking and Currency.

Also, petition of New York Stenographers' Union, No. 1, against increase in postage on second-class mail; to the Committee on Ways and Means.

By Mr. SANDERS of New York: Petitions of sundry citizens and organizations of the State of New York, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. SCHALL: Petitions of sundry citizens of the State of Minnesota, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. SHOUSE: Petitions of sundry citizens of Kinsley and Turon, Kans., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of sundry citizens of Hutchinson, Kans., favoring closing of boards of trade to prevent gambling in foodstuffs; to the Committee on Agriculture.

By Mr. SNELL: Petition of citizens of Piercefield, N. Y., favoring the passage of a law providing for a total prohibition of all intoxicating liquors during the period of the war, except for sacramental, medical, and scientific purposes; to the Committee on the Judiciary.

Also, petition of residents of Elizabethtown, N. Y., and vicinity, for the immediate enactment of prohibition of the manufacture of alcoholic liquors as a measure of food conservation and for the immediate prohibition of the sale of liquors for beverages in order to conserve the health, wealth, labor, transport facilities, and military efficiency of the people; to the Committee on the Judiciary.

Also, petition of Methodist Episcopal Church, Clintonville, N. Y., for the passage of a bill to effectively prohibit the use of any kind of foodstuffs during the war for the manufacture of intoxicating beverages, to limit liquors on hand to nonbeverage uses, and protesting against increasing the tax on liquors, and thus raising a higher revenue barrier to the securing of national prohibition; to the Committee on the Judiciary.

By Mr. STRONG: Petitions of Woman's Foreign Missionary Society of the Methodist Episcopal Church, Erie Conference, Clarion district, Brookville, Brockwayville, Big Run, Clarion, Du Bois, Hazel Hurst, Johnsonburg, New Bethlehem, Punxsutawney, Reynoldsville, Rimersburg, Summerville, Tylersburg, and Valier auxiliaries, all in the State of Pennsylvania, favoring national prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of the residents of Reynoldsville and vicinity and the members of the East Mahoning Baptist Church of Indiana County, Pa., favoring the prohibition of the manufacture of alcoholic liquors as a war measure; to the Committee on the Judiciary.

By Mr. SWIFT: Petitions of Men's Club, of Ocean Avenue Congregational Church, and Vanderveer Park Methodist Episcopal Church, of Brooklyn, and Long Island Diocese of Episcopal Church, of the State of New York, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. TEMPLE: Petition of members and adherents of the Mount Pleasant United Presbyterian Church, of Hickory, Pa., favoring national prohibition in view of present war; to the Committee on the Judiciary.

Also, petition of voters of New Castle, Pa., favoring national prohibition law in view of the present war situation; to the Committee on the Judiciary.

Also, petition of members of Epworth Methodist Episcopal Church, of New Castle, Pa., favoring enactment of national prohibition law in view of present war situation; to the Committee on the Judiciary.

Also petition of members and adherents of the Pine Street Presbyterian Church, of Harrisburg, Pa., favoring enactment of national prohibition in view of present war situation; to the Committee on the Judiciary.

By Mr. TIMBERLAKE: Petition of sundry residents of Hillrose, Colo., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of Methodist Episcopal Church of Brush, Colo., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of Boulder Commercial Association, of Boulder, Colo., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. TINKHAM: Memorial of members of St. Andrews Methodist Episcopal Church, of Roxbury, Boston, Mass., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. TOWNER: Petition of Rev. W. T. Rink and 62 other citizens of Coin, Iowa, petitioning Congress for the immediate enactment of prohibition of the manufacture of alcoholic liquors as a measure of food conservation and for the immediate prohibition of the sale of liquors for beverage purposes in order to conserve the health, wealth, labor, transport facilities, and military efficiency of the people; to the Committee on the Judiciary.

By Mr. YOUNG of North Dakota: Petitions of E. B. Mattus and 80 others, of Fargo; A. N. Wiley and 52 others, of Turtle Lake; C. G. Olimb and 10 others, of Granville; W. E. Howe and 67 others, of Edgeley; E. Burling and 167 others, of New Rockford, all in the State of North Dakota, favoring prohibition as a war measure; to the Committee on the Judiciary.

HOUSE OF REPRESENTATIVES.

THURSDAY, *June 7, 1917.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Behold, how good and how pleasant it is for brethren to dwell together in unity!

It is like the precious ointment upon the head, that ran down upon the beard, even Aaron's beard; that went down to the skirts of his garments;

As the dew of Hermon, and as the dew that descended upon the mountains of Zion; for there the Lord commanded the blessing, even life for evermore.

We thank Thee, our Father in heaven, that all the animosities growing out of the great Civil War, which threatened the con-

tinuance of our Republic, have passed into oblivion; that the Confederate veterans have been received into our Capital City with a royal welcome out of respect for the loyalty, patriotism, and valor displayed for a cause which they deemed right; that they have the pleasure of marching in review before the President of the United States with their sons who to-day are as loyal to the Old Flag as all true Americans should be, and may be counted upon to give their support and lives, if need be, for the preservation of the Union. Let Thy blessing be upon them, take them in safety to their homes, and grant them long life and happiness under the graceful folds of the Old Flag which we all love; and all praise be Thine in the name of Him who taught us brotherly love and kindness. Amen.

The Journal of the proceedings of yesterday was read and approved.

SWEARING IN OF A MEMBER.

Mr. WASON. Mr. Speaker, I present the credentials of Mr. SHERMAN E. BURROUGHS, Representative elect from the first congressional district of New Hampshire, and I ask that the oath be administered to him. [Applause.]

The SPEAKER. The Chair has examined the credentials of Mr. BURROUGHS and finds them to be straight. He will please present himself.

Mr. BURROUGHS appeared at the bar of the House and the Speaker administered to him the oath of office.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. WELTY, indefinitely, on account of sickness.

To Mr. ASHBROOK, indefinitely, on account of the death of his father.

SPEECH OF M. VIVIANI.

The SPEAKER. The Chair has received from the Secretary of State a communication inclosing the speech of M. Viviani, recently delivered in the House, in French and an English translation thereof, which the Secretary of State requests to have printed in the RECORD. Without objection, it will be so printed.

There was no objection.

The communication is as follows:

DEPARTMENT OF STATE,
Washington, June 4, 1917.

The Hon. CHAMP CLARK,
Speaker of the House of Representatives.

SIR: I have the honor to inclose herewith for inclusion in the CONGRESSIONAL RECORD the French text, with a translation thereof, of the speech delivered by M. Viviani, of the French mission, before the House of Representatives.

This text and the translation were furnished to the department by Mr. Emile Hovelaque, of the mission.

I have the honor to be, sir,
Your obedient servant, ROBERT LANSING.

M. VIVIANI. Messieurs, nous voici donc une fois encore, mes compatriotes et moi, admis aux honneurs de la séance dans une enceinte législative. Pourrai-je vous dépeindre l'émotion qui nous étreint devant cette dérogation solennelle à vos règles séculaires, et, en ce qui me concerne, pourrai-je vous dire, comme parlementaire habitué, depuis plus de vingt ans, aux passions et aux orages des assemblées, que je goûte peut-être plus qu'un autre à cette heure la joie suprême de me trouver à cette tribune, à cette tribune si haute, que, si faible que soit la voix, elle est entendue de l'univers.

Messieurs, je ne vous remercierai pas, non parce que notre gratitude est épuisée, mais parce que sont épuisées les paroles nouvelles par lesquelles je pourrais la traduire; je ne vous remercierai pas de votre accueil. Nous avons tous senti, mes compagnons et moi, que les acclamations qui montaient vers nous ne sortaient pas seulement de vos lèvres. Nous avons tous senti que vous ne remplissiez pas seulement les obligations de la courtoisie internationale; brusquement, nous avons vu se dévoiler à nos regards, dans son intimité charmante, la complexité de l'âme américaine.

Lorsqu'on aborde un Américain, il semble qu'on aborde un homme pratique, seulement pratique, vivant pour les affaires, par les affaires, dans les affaires. Mais, lorsqu'à certaines heures de la vie privée, on se penche sur l'âme américaine, on en découvre à la fois la fraîcheur et la délicatesse; et lorsqu'à certaines heures de la vie publique on interroge l'âme nationale, alors on voit surgir d'elle toute la puissance de l'idéal; si bien que ce peuple américain, admirablement équilibré, est à la fois pratique et sentimental, réaliste et rêveur, et qu'il est toujours possible de mettre ses qualités positives à la disposition de sa forte pensée.

Et voyez, Messieurs, le parallèle glorieux qu'à notre profit, à votre profit, nous pouvons établir entre nos ennemis et nous. Mandataires d'un peuple libre, nous venons au milieu des hommes libres pour confronter nos idées, pour échanger nos vues, pour apercevoir le formidable problème surgi de la guerre. Et toutes les nations alliées, par celà même qu'elles reposent sur des institutions démocratiques par leur gouvernement, se concertent à la même hauteur, dans la même égalité et dans la même liberté.

Je sais bien qu'à l'heure actuelle au milieu des empires centraux, se trouve un monarque absolu qui rattache à lui, par les liens d'une vassalité de fer, d'autres peuples. On a dit que c'était le signe de la force. Ce n'en est que l'apparence dérisoire. Et en effet, il y a quelques semaines, à la veille du jour où l'Amérique frémissante allait se dresser de tout son élan, au lendemain du jour où la révolution russe, fidèle au pacte d'alliance, appelait en même temps les soldats aux armes et le peuple à l'indépendance, on a vu ce monarque absolu trébucher sur les degrés de son trône, sentant passer sur sa couronne le souffle des premières tempêtes. Et il s'est abaissé vers ce peuple, s'est humilié, et, afin de le gagner, il est allé emprunter aux nations libres leur institution suprême en promettant à leurs sujets de leur donner le suffrage universel.

Ici comme aux heures de notre histoire, comme aux heures de la vôtre, c'est la liberté qui fraye le chemin aux combattants. Nous voici tous debout pour la civilisation et pour le droit. Avant-hier, dans une réunion publique à laquelle j'assistais, j'entendais un de vos plus grands orateurs dire, avec une émotion concentrée: "C'est juré sur le tombeau de Washington." Et j'ai compris alors l'émotion forte et le sens profond de ces paroles. Si Washington pouvait se lever de son tombeau, du haut de sa montagne sacrée, s'il pouvait apercevoir le monde tel qu'il est, devenu plus petit, par le rapprochement des distances matérielles et morales, et par l'enchevêtrement des relations économiques, il sentirait que son œuvre n'est pas finie, et que, de même qu'un homme puissant et supérieur se doit aux autres hommes, de même un peuple puissant et supérieur se doit aux autres peuples, et, après avoir établi sa propre indépendance, doit aider les autres à maintenir leur indépendance ou à la conquérir. C'est la logique mystérieuse de l'histoire qu'a si merveilleusement comprise M. le Président Wilson, cet esprit si fort, si fin, à la fois capable d'analyse et de synthèse, d'observations minutieuses vite suivies d'une forte action. C'est juré sur le tombeau de Washington! C'est juré sur le tombeau des soldats alliés, tombés pour la cause sainte! C'est juré sur nos blessés! C'est juré sur la tête de nos orphelins! C'est juré sur les berceaux et les tombeaux! C'est juré!

[Translation.]

Gentlemen, once more my fellow countrymen and I are admitted to the honor of being present at a sitting in a legislative Chamber. May I be permitted to express our emotion at this solemn derogation against rules more than a century old, and, so far as my own person is concerned, may I say that, as a member of Parliament, accustomed for 20 years to the passions and storms which sweep through political assemblies, I appreciate more than anyone at this moment the supreme joy of being near this chair, which is in such a commanding position that, however feeble may be the voice that speaks thence, it is heard over the whole world.

Gentlemen, I will not thank you, not because our gratitude fails, but because new words to express it fail. No; I do not thank you for your welcome. We have all felt, my companions and myself, that the manifestations which rose toward our persons came not only from your lips. We have felt that you were not merely fulfilling the obligations of international courtesy. Suddenly, in all its charming intimacy, the complexity of the American soul was revealed to us.

When one meets an American one is supposed to meet a practical man, merely a practical man, caring only for business, only interested in business. But when at certain hours in private life one studies the American soul, one discovers at the same time how fresh and delicate it is; and when at certain moments of public life one considers the soul of the Nation, then one sees all the force of the ideals that rise from it; so that this American people, in its perfect balance, is at once practical and sentimental, a realizer and a dreamer, and is always ready to place its practical qualities at the disposal of its puissant thoughts.

And see, gentlemen, what a glorious comparison, to our profit, yours also, we can establish between our enemies and us. Intrusted with a mandate from a free people, we came among free men to compare our ideas, to exchange our views, to measure the whole extent of the problems raised by this war; and all the allied nations, simply because they repose on democratic institutions, through their Governments, meet in the same lofty region on equal terms, in full liberty.

I well know that at this very hour, in the central empire, there is an absolute monarch who binds to his will by vassal links of steel other peoples. It has been said this was a sign of strength; it is only a derisive appearance of strength. And in truth, only a few weeks ago, on the eve of the day when

outraged America was about to rise in its force, on the morrow of the day when the Russian revolution, faithful to its alliance, called at once its soldiers to arms and its people to independence, this absolute monarch was seen to totter on the steps of his throne as he felt the first breath of the tempest pass over his crown. And he bent toward his people in humiliation, and in order to win its sympathy borrowed from free peoples the highest institutions and promised his subjects universal suffrage.

Here, as in the crucial hours of our history as in these of yours, it is liberty which clears the way for our soldiers. We are all now united in our common effort for civilization, for right.

The day before yesterday, in a public meeting at which I was present, I heard one of your greatest orators say with deep emotion, "It has been sworn on the tomb of Washington." And then I understood the full emotion and import of those words. If Washington could rise from his tomb, if from his sacred mound he could view the world as it now is, shrunk to smaller proportions by the lessening of material and moral distances and the mingling of every kind of communication between men, he would feel his labors are not yet concluded, and that just as a man of superior and powerful mind has a debt to all other men, so a superior and powerful nation owes a debt to other nations, and after establishing its own independence must aid others to maintain their independence or to conquer it. It is the mysterious logic of history which President Wilson so marvelously understood, thanks to a mind as vigorous as it is subtle, as capable of analysis as it is of synthesis, of minute observation followed by swift action. It has been sworn on the tomb of Washington! It has been sworn on the tomb of our allied soldiers, fallen in a sacred cause! It has been sworn by the bedside of our wounded men! It has been sworn on the heads of our orphan children! It has been sworn on cradles and on tombs! It has been sworn!

RIFLES TO STATES AND TERRITORIES.

Mr. DENT. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 995) authorizing the issuance to the home guard of the different States and Territories of rifles not necessary to be used by the Army, together with certain committee amendments, which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the title of the bill.

The Clerk read the title of the bill (S. 995) to authorize the issue to States and Territories and the District of Columbia of rifles and other property for the equipment of organizations of home guards.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, let the bill be reported.

The SPEAKER. The Clerk will report the bill, and also report the committee amendment.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized, in his discretion, to issue from time to time to the several States and Territories for the equipment of such home guards having the character of State police or constabulary as may be organized by the several States and Territories and District of Columbia, such rifles and ammunition therefor, cartridge belts, haversacks, canteens, in limited amounts as available supplies will permit, provided that the property so issued shall remain the property of the United States and shall be receipted for by the governors of the several States and Territories and Commissioners of the District of Columbia and accounted for by them under such regulations and upon furnishing such bonds or security as the Secretary of War may prescribe, and that any property so issued shall be returned to the United States on demand when no longer needed for the purposes for which issued, or if, in the judgment of the Secretary of War, an exigency requires the use of the property for Federal purposes.

With the following amendments:

Page 1, line 3, after the word "war," insert the words "during this existing emergency."

Page 1, line 8, after the word "Columbia," insert the words "and such other home guards as may be organized under the direction of the governors of the several States and Territories or other State troops or militia."

Page 1, line 5, after the word "Territories," insert the words "and the District of Columbia."

Page 1, line 10, after the word "Territory," in the committee amendment, add the words "and the Commissioners of the District of Columbia."

Mr. MANN. Mr. Speaker, I do not know what amendments the Clerk reported, but they were not all committee amendments.

Mr. DENT. These amendments were authorized by the committee.

Mr. MANN. They are not all printed in the bill as committee amendments.

Mr. DENT. Well, they are committee amendments that were provided for since the bill was reported.

Mr. MANN. These are amendments that the gentleman expects to offer?

Mr. DENT. Yes.

The SPEAKER. Is there objection?

Mr. LANGLEY. Mr. Speaker, reserving the right to object, I am in favor of the bill, but I would like to be heard for two or three minutes on a matter somewhat related to this.

Mr. MANN. The gentleman will have no trouble in getting his opportunity if consideration of this bill is agreed to.

Mr. LANGLEY. All right.

The SPEAKER. Is there objection?

There was no objection.

Mr. MANN. This is a Union Calendar bill.

The SPEAKER. This bill is on the Union Calendar.

Mr. DENT. I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Alabama asks unanimous consent to have this bill considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. Does the gentleman from Alabama want to be heard?

Mr. DENT. No, Mr. Speaker.

Mr. MANN. I move to strike out the last word. The committee amendments have not been disposed of. Perhaps they had better be voted on. I would like to have the gentleman from Alabama [Mr. DENT] explain the bill. Of course, I know its general purpose. Perhaps we had better have the committee amendments disposed of.

The SPEAKER. The question is on the committee amendments.

Mr. MANN. Mr. Speaker, they will have to be offered.

Mr. DENT. Mr. Speaker, I offered them.

The SPEAKER. The gentleman from Alabama sent them up here and offered them.

Mr. DENT. That was a part of my request.

Mr. MANN. That form of offering will not go.

Mr. DENT. I offer the committee amendments.

Mr. MANN. There are certain committee amendments printed in the bill in italics in the usual way. Those come up automatically, but the others will have to be offered.

The SPEAKER. The first vote will be taken on the committee amendments printed in the bill.

Mr. MANN. I think one of them has to be amended.

The SPEAKER. The Clerk will report the first amendment.

The Clerk read as follows:

Page 1, line 5, after the word "Territory," insert the words "and the District of Columbia."

So that the lines as amended will read:

To issue from time to time to the several States and Territories and the District of Columbia, for the equipment of such home guards, etc.

Mr. LANGLEY. Mr. Speaker, I move to strike out the last word. I am not opposed to this bill. On the contrary, I am heartily in favor of anything designed to aid the State militia, both the old and the new. That is a subject which is very close to my heart. I listened with deepest interest and sympathy yesterday to the eloquent tribute paid by my colleague from Kentucky [Mr. THOMAS] to the Orphan Brigade and, incidentally, to the Iron Brigade, and I heartily concurred in all that he said of their courage and their valor. As I listened to him yesterday, while the crowded floor and galleries gave him generous applause, and again to-day, as I looked upon that inspiring pageant of the heroes of the Confederacy as they proudly marched up the Avenue, carrying the flag of the Union and receiving the plaudits of hundreds of thousands of enthusiastic and patriotic Americans, and which evidenced a united and unconquerable Republic, my thoughts turned instinctively to the old militia soldiers of Kentucky and Missouri, whose valiant service to the Union cause and whose patriotism no one will deny. [Applause.] I could not help recalling on both these occasions with shame and sadness that, while the Nation has provided pensions for the Iron Brigade and Kentucky has provided pensions for the Orphan Brigade, no provision has been made for these old militiamen. I am aware, Mr. Speaker, that, in view of the legislative program which has been agreed upon, such a law can not be passed at this extra session, although I think it would do the Nation many times more good than it would do the Treasury harm to enact it now, because it would show to our young men who are preparing to enter this great war that the Republic appreciates to the fullest the sacrifices of all of its soldiers, and that its purpose is to go to the extreme of liberality in providing for all those who enter its service, including those who need its help in their old age. I still have an abiding faith that this Congress will do justice to these old men, and I give notice now that this question will be brought again to your attention when we meet in regular session next December. [Applause.] Some of these old Kentucky militia-

men still live in the mountains of eastern Kentucky, and many of their sons and grandsons came forward on registration day and had their names placed upon the Nation's honor roll, thus showing that the patriotism and loyalty of their sires have been handed down to them. In proof of this I am proud to read the following telegram, which I have received from the city of Hazard, now well known to most of you:

HAZARD, KY., *June 6, 1917.*

Hon. JOHN W. LANGLEY,
Washington, D. C.:

Hazard precincts registered 709. The county totals nearly 2,000, while only 1,400 cards were furnished.

J. B. HOGE.

Mr. Speaker, while I have not received specific advices as to the results of the registration in other sections of the Kentucky mountains, that land where only the devotees of liberty dwell, I know that when they are received they will show that there exists the same unswerving obedience to the law and loyalty to the country that are demonstrated by this telegram to exist in Hazard and Perry County. [Applause.]

The SPEAKER. The question is on the committee amendment.

The committee amendment was agreed to.

The Clerk read the following committee amendment:

Page 1, line 10, after the word "Territory," insert the words "and the Commissioners of the District of Columbia."

The committee amendment was agreed to.

The Clerk read the following committee amendment:

Page 2, line 13, at the end of the sentence, amend by striking out the period and inserting a proviso, as follows:

"*Provided*, That all home guards, State troops, and militia receiving arms and equipment as herein provided shall have the use, in the discretion of the Secretary of War and under such regulations as he may prescribe, of rifle ranges owned or controlled by the United States of America."

The committee amendment was agreed to.

Mr. MANN. Mr. Speaker, I move to strike out the last word. This provides for furnishing the home guards such rifles and ammunition as may be available. What is it intended to be done, may I ask of the gentleman? We all know there has been a good deal of talk about our being short of both rifles and ammunition.

Mr. DENT. Mr. Speaker, the object of this resolution, as I understand it, is this: There are a number of rifles in the possession of the National Guard owned by the Government of the United States that are not up to date and would not be used by the regular forces when the National Guard of different States is called into the Federal service, as they leave the States. The purpose of this resolution is to furnish the useless and surplus rifles to the home guards for the protection of the communities.

Mr. MANN. How many of these rifles does the Government possess?

Mr. DENT. I can not say, but I think several hundred thousand.

Mr. MANN. If they are useless, what have we been keeping them for?

Mr. DENT. The gentleman will have to ask the Secretary of War.

Mr. KAHN. Mr. Speaker, there are 300,000 of the Krag-Jörgensen rifles, which was the service rifle during the Spanish-American War. Subsequent to that time the Ordnance Department developed the Springfield rifle of 1904, which the Government is now using. It is considered the best small arm in the world. The Krag-Jörgensen uses a different ammunition from that of the Springfield rifle, and it was proved in the Spanish-American War that where we had two kinds of rifles using different ammunition it was a serious defect that materially interfered with the efficiency of our Army.

The Krag-Jörgensen rifles have been sold to rifle clubs in the past and are now being distributed free among rifle clubs under laws more recently passed by the Congress. They are also being distributed to schools that maintain military instruction. The department has not been able to distribute them all, and there are still something like 300,000 of them now in the hands of the Ordnance Department.

Mr. MANN. Why should we possess 300,000 useless rifles, when we do not have anywhere near enough of the useful rifles? Why have we kept them for twenty-odd years?

Mr. KAHN. The only way to get rid of them was to sell them or destroy them. Instead of doing either of these things, the department has been trying to put them to some use by giving them to rifle clubs for the purpose of rifle practice, but they have not been able to get rid of all of them up to the present time.

Mr. HAMILTON of Michigan. And, as a matter of fact, they are very good guns?

Mr. KAHN. They are very good guns, only they have not the range of the Springfield rifle.

Mr. OSBORNE. I would like to ask the chairman of the committee a question.

Mr. DENT. I will yield.

Mr. OSBORNE. The bill provides for the furnishing to home guards these rifles. I have had a great many inquiries, and I presume other Members have also, from organizations that are not technically home guards, but which desire arms for drilling purposes. Will the bill as amended provide for those organizations where they have the approval of the governor of the State?

Mr. DENT. What kind of an organization is it?

Mr. OSBORNE. They are military organizations that have been formed since the war commenced—voluntary organizations.

Mr. DENT. The bill provides for a supply to any organization of State troops not a part of the regular National Guard, such as police and State constabulary organizations, organizations of that kind—home guards.

Mr. OSBORNE. Does not the term "home guards" have a technical meaning?

Mr. DENT. If the gentleman will read the resolution, he will find that the home-guard organizations are provided for having the character of State police or State constabulary.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. DENT, a motion to reconsider the vote whereby the bill was passed was laid on the table.

URGENT DEFICIENCIES FOR MILITARY AND NAVAL ESTABLISHMENT.

Mr. FITZGERALD. Mr. Speaker, I call up conference report on the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishment on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes; and I ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. The gentleman from New York asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The Clerk read the statement.

CONFERENCE REPORT (NO. 70).

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 4, 9, 43, 51, 80, 82, and 85.

That the House recede from its disagreement to the amendments of the Senate numbered 5, 6, and 83, and agree to the same.

Amendment numbered 2: That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the matter inserted by the amendment of the House to the amendment of the Senate insert the following:

"EMERGENCY SHIPPING FUND.

"The President is hereby authorized and empowered, within the limits of the amounts herein authorized—

"(a) To place an order with any person for such ships or material as the necessities of the Government, to be determined by the President, may require during the period of the war and which are of the nature, kind, and quantity usually produced or capable of being produced by such person.

"(b) To modify, suspend, cancel, or requisition any existing or future contract for the building, production, or purchase of ships or material.

"(c) To require the owner or occupier of any plant in which ships or materials are built or produced to place at the disposal of the United States the whole or any part of the output of such plant, to deliver such output or part thereof in such quantities and at such times as may be specified in the order.

"(d) To requisition and take over for use or operation by the United States any plant, or any part thereof, without taking possession of the entire plant, whether the United States has or has not any contract or agreement with the owner or occupier of such plant.

"(e) To purchase, requisition, or take over the title to, or the possession of, for use or operation by the United States any ship now constructed or in the process of construction or hereafter constructed, or any part thereof, or charter of such ship.

"Compliance with all orders issued hereunder shall be obligatory on any person to whom such order is given, and such order shall take precedence over all other orders and contracts placed with such person. If any person owning any ship, charter or material, or owning, leasing, or operating any plant equipped for the building or production of ships or material shall refuse or fail to comply therewith or to give to the United States such preference in the execution of such order, or shall refuse to build, supply, furnish, or manufacture the kind, quantities or qualities of the ships or material so ordered, at such reasonable price as shall be determined by the President, the President may take immediate possession of any ship, charter, material or plant of such person, or any part thereof without taking possession of the entire plant, and may use the same at such times and in such manner as he may consider necessary or expedient.

"Whenever the United States shall cancel, modify, suspend or requisition any contract, make use of, assume, occupy, requisition, acquire or take over any plant or part thereof, or any ship, charter, or material, in accordance with the provisions hereof, it shall make just compensation therefor, to be determined by the President; and if the amount thereof, so determined by the President, is unsatisfactory to the person entitled to receive the same, such person shall be paid 75 per cent of the amount so determined by the President and shall be entitled to sue the United States to recover such further sum as, added to said 75 per cent, will make up such amount as will be just compensation therefor, in the manner provided for by section 24, paragraph 20, and section 145 of the Judicial Code.

"The President may exercise the power and authority hereby vested in him, and expend the money herein and hereafter appropriated through such agency or agencies as he shall determine from time to time: *Provided*, That all money turned over to the United States Shipping Board Emergency Fleet Corporation may be expended as other moneys of said corporation are now expended. All ships constructed, purchased, or requisitioned under authority herein, or heretofore or hereafter acquired by the United States, shall be managed, operated, and disposed of as the President may direct.

"The word 'person' as used herein shall include any individual, trustee, firm, association, company, corporation, or contractor.

"The word 'ship' shall include any boat, vessel, or submarine and the parts thereof.

"The word 'material' shall include stores, supplies, and equipment for ships, and everything required for or in connection with the production thereof.

"The word 'plant' shall include any factory, workshop, warehouse, engine works; buildings used for manufacture, assembling, construction, or any process; any shipyard or dockyard and discharging terminal or other facilities connected therewith.

"The words 'United States' shall include all lands and waters subject to the jurisdiction of the United States of America.

"All authority granted to the President herein, or by him delegated, shall cease six months after a final treaty of peace is proclaimed between this Government and the German Empire.

"The cost of purchasing, requisitioning, or otherwise acquiring plants, material, charters, or ships now constructed or in the course of construction and the expediting of construction of ships thus under construction shall not exceed the sum of $250,000,000, exclusive of the cost of ships turned over to the Army and Navy, the expenditure of which is hereby authorized, and in executing the authority granted by this act for such purpose the President shall not expend or obligate the United States to expend more than the said sum; and there is hereby appropriated for said purpose, $150,000,000: *Provided*, That this appropriation shall be reimbursed from available funds under the War and Navy Departments for vessels turned over for the exclusive use of those departments or either of them.

"The cost of construction of ships authorized herein shall not exceed the sum of $500,000,000, the expenditure of which is hereby authorized, and in executing the authority granted herein for such purpose the President shall not expend or obligate the United States to expend more than said sum; and there is hereby appropriated for said purpose, $250,000,000.

"For the operation of the ships herein authorized or in any way acquired by the United States, except those acquired for the Army or Navy, and for every expenditure incident thereto, $5,000,000."

And the House agree to the same.

Amendment numbered 68: That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Naval operating base, Hampton Roads, Va.: For the acquisition by purchase or condemnation, including all easements, riparian and other rights appurtenant thereto, and including all the rights and properties of railway, electric light, power, telephone, telegraph, water, and sewer companies, of the tract of land known as the Jamestown Exposition site, on Hampton Roads, Va., and of such lands adjacent thereto as lie north of Ninety-ninth Street and Algonquin Street, the entire property being bounded on the north and west by Hampton Roads and Willoughby Bay, on the east by Boush Creek, and on the south by Ninety-ninth and Algonquin Streets, $1,400,000; and toward the equipment of this property as a naval operating base, including piers, storehouses, oil-fuel storage, training station, recreation grounds for the fleet, aviation, and other purposes, $1,600,000; in all, $3,000,000."

And the Senate agree to the same.

Amendment numbered 86: That the House recede from its disagreement to the amendment of the Senate numbered 86, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"SEC. 4. That the service of all persons selected by draft and all enlistments under the provisions of the act entitled 'An act to authorize the President to increase temporarily the Military Establishment of the United States,' approved May 18, 1917, shall be for the period of the war, unless sooner terminated by discharge or otherwise. Whenever said war shall cease by the conclusion of peace between the United States and its enemies in the present war, the President shall so declare by a public proclamation to that effect, and within four months after the date of said proclamation or as soon thereafter as it may be practicable to transport the forces then serving without the United States to their home station, the provisions of said act, in so far as they authorize compulsory service by selective draft or otherwise, shall cease to be of force and effect."

And the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"SEC. 5. That, in addition to the reports now required by law, the Secretaries of the Treasury, War, and Navy shall each on the first Monday in December, 1917, and annually thereafter, transmit to the Congress a detailed statement of all expenditures under this act."

And the Senate agree to the same.

JOHN J. FITZGERALD,
SWAGAR SHERLEY,
Managers on the part of the House.
THOMAS S. MARTIN,
O. W. UNDERWOOD,
F. E. WARREN,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes, submit the following written statement in explanation of the effect of the action agreed upon by the conference committee and submitted in the accompanying conference report as to each of said amendments, namely:

On No. 2, relating to the emergency shipping fund: Inserts a substitute for the amendment of the House to the amendment of the Senate, printed in full elsewhere in this report.

On No. 3: Restores the appropriation of $5,000, stricken out by the Senate, for rent of quarters for the Bureau of Efficiency.

On No. 4: Restores the appropriation of $20,000, stricken out by the Senate, for additional employees and expenses of the Civil Service Commission.

On No. 5: Appropriates $136,140, as proposed by the Senate, for additional employees in the office of the Auditor for the War Department.

On No. 6: Strikes out, as proposed by the Senate, the appropriations for the mints at Philadelphia and New Orleans and the assay office at New York.

On No. 9: Strikes out the paragraph, inserted by the Senate, authorizing the Secretary of War to transfer 10 per cent of the sums under the Military Establishment from one appropriation account to another.

On No. 43: Strikes out the paragraph, inserted by the Senate, authorizing the Secretary of War to expend not exceeding $10,000,000 of the appropriations for the Military Establishment for such military purposes as he may deem proper.

On No. 51: Authorizes the use of $150,000, as proposed by the House, instead of $325,000, as proposed by the Senate, for the purchase of land for aviation purposes for the Navy.

On No. 68: Appropriates $3,000,000, as proposed by the Senate, for the naval operating base, at Hampton Roads, Va., modified so as to include within such purchase all the rights and properties of railway, electric light, power, telephone, telegraph, water, and sewer companies.

On No. 80: Restores the appropriation of $13,940, striken out by the Senate, for employees to care for the new Interior Department Building.

On No. 82: Restores the appropriations for the Bureau of Standards, stricken out by the Senate.

On No. 83: Strikes out, as proposed by the Senate, the appropriation of $1,200 to enable the Commissioner of Lighthouses to increase the compensation of draftsmen employed on marine engineering.

On No. 85: Restores the appropriation, stricken out by the Senate, of $7,500 to pay the widow of Henry T. Helgesen, late a Representative from the State of North Dakota, and $1,000 for stationery for committees and officers of the House of Representatives.

On No. 86: Inserts the paragraph, proposed by the Senate, relative to the termination of the military service of persons selected by draft or otherwise, modified so as to terminate such services within four months after the proclamation of peace, or as soon thereafter as it may be possible to transport the forces then serving without the United States to their home station.

On No. 87: Inserts the paragraph, proposed by the Senate, relative to the submission of statements of expenditures from appropriations made for the Treasury, War, and Navy Departments, modified to eliminate therefrom the part thereof pertaining to the taking of vouchers.

JOHN J. FITZGERALD,
SWAGAR SHERLEY,
Managers on the part of the House.

Mr. FITZGERALD. Mr. Speaker, this is a complete report. The emergency deficiency bill as it passed the House carried $2,827,553,781.18. As it passed the Senate it carried $3,342,404,131.22, an increase of $514,850,350.04. The Senate receded from $61,109,589.62 and the House from $453,740,760.42. So the bill as it is at present is $453,740,760.42 in excess of the bill as it passed the House. Four hundred and five million dollars of this sum is included in the appropriation for the construction of cargo-carrying ships. Sixty million dollars was added to the item of transporttaion of the Army. The combined total of these two sums more than makes up the increase of the bill over the bill as it passed the House. The total of the bill as agreed upon is $3,281,294,541.60.

Mr. Speaker, this bill in size is the most extraordinary bill Congress has ever been called upon to enact. It carries the moneys believed to be essential for the support and equipment of an army of a million men for the period in which they will be with the colors between now and the 30th of June, 1918.

In addition, it carries over $500,000,000 for the Navy. It carries legislation to enable the United States to construct, within the next 18 months, some 3,000,000 tons of cargo-carrying ships. It met with practically no opposition in either body. The unanimity of the support given to it is merely another indication of the united and determined and patriotic spirit that prevails in the two Houses of Congress to give unstinted support to the administration in this great crisis of the Nation's history.

Mr. BACHARACH. Mr. Speaker, will the gentleman yield?

Mr. FITZGERALD. Yes.

Mr. BACHARACH. I would like to ask the chairman of the Committee on Appropriations about the amendment to Senate amendment No. 51, an appropriation for Cape May aviation base.

Mr. FITZGERALD. Mr. Speaker, the Senate increased the amount that might be expended for the purchase of land for aviation stations from $150,000 to $325,000. The statement was made that the additional $175,000 was to be utilized to purchasing land at Cape May for an aviation station. The information before the managers on the part of the two Houses was such that it was not believed to be necessary that this item should be agreed to at this time. Pursuing the policy of attempting to do everything that was essential for the purposes of defense and not to make appropriations for matters that were not of the most imperative character, the Senate receded from its amendment, and the item was eliminated from the bill.

Mr. BACHARACH. I understood the Secretary of the Navy has stated that they have expended some money down there for an aviation base.

Mr. FITZGERALD. He has not expended any money, and if the matter were of such great importance that he deemed it necessary to expend it I anticipate that some more complete information would have been furnished than the meager information transmitted to the managers on the part of the House.

Mr. BACHARACH. I understood that the Assistant Secretary of the Navy or the Secretary of the Navy had requested particularly that this item be included as it was a very important item in the bill.

Mr. FITZGERALD. An urgent letter was written that did not contain very much information. The only way in which Members of Congress can determine the urgency of these items is not by the statement of the head of a department that it is urgent, but by the assignment of the reasons that make that conclusion inevitable, and as the reasons sent did not warrant that conclusion, the item was eliminated from the bill.

Mr. KELLEY of Michigan. Mr. Speaker, will the gentleman yield?

Mr. FITZGERALD. Yes.

Mr. KELLEY of Michigan. I would like to ask the gentleman from New York something about the Jamestown Exposition site. The appropriation carried is $1,400,000. Can the chairman state what part of that was for the buildings on that site?

Mr. FITZGERALD. No particular portion is for buildings. Estimates have been made of the value of all improvements, including buildings. The amendment of the Senate was agreed to with an amendment to include in the property to be acquired all of the property and rights of the railway, electric-light, power, telegraph, telephone, water, and sewer companies.

Mr. KELLEY of Michigan. I should like to inquire further whether or not the people who purchased this original Jamestown site at the sheriff's sale——

Mr. BATHRICK. Mr. Speaker, there is so much confusion that I ask for order. This is an important amendment. I think this whole thing is a graft and people ought to understand it.

The SPEAKER. The House will be in order.

Mr. KELLEY of Michigan. Whether the price paid for this old Jamestown site, including the buildings, was $250,000, and that now the Government is asked to buy it——

Mr. FITZGERALD. That is my recollection from reading some previous hearings.

Mr. KELLEY of Michigan. And that we are now asked to buy the buildings alone at $600,000?

Mr. FITZGERALD. No; not the buildings. The estimate includes all improvements. The gentleman is mistaken. In addition to the Jamestown site——

Mr. KELLEY of Michigan. There are no other buildings on the part acquired.

Mr. FITZGERALD. There is a tract of land of over 100 acres with a water frontage on the main channel.

Mr. KELLEY of Michigan. But there are no buildings upon it.

Mr. FITZGERALD. Yes; I understand there are some.

Mr. KELLEY of Michigan. Only small cottages that you could put up very cheaply.

Mr. FITZGERALD. And a hotel.

Mr. KELLEY of Michigan. The hotel was on the original site, was it not?

Mr. FITZGERALD. My recollection is that the gentleman is mistaken. There is a hotel there of considerable size.

Mr. KELLEY of Michigan. Has the gentleman seen these buildings himself?

Mr. FITZGERALD. I have not. I went through the voluminous papers containing the description of all of the properties and the offers at which they were to be sold. I am not particularly pleased that the Congress is to buy this tract of land, but the Navy Department is recruiting large numbers of men and they insist that this property is imperatively needed for training purposes and as a fleet base. I am not entirely satisfied with the matter. I endeavored, however, to have the amendment so worded that when the purchase was made everything would be purchased. An examination of the original papers disclosed that in addition to the land and buildings there were certain rights possessed by a number of public utility corporations which it was stated could be obtained by the Government if it purchased the site at a reasonable price. The provision was so amended as to include all of the rights and properties of those public utility corporations. An examination of the

map and the statements that were made disclosed that the site of the old Jamesown Exposition by itself would not be of any value whatever to the Government. The purchase of the land adjacent to it fronting on the bay makes the tract of considerable value. The statement was made that the city of Newport News had just purchased a tract of land less favorably located, but quite near to this site, for the purpose of docks, at an average price of $2,700 per acre. The average price being paid for this land without the improvements is $1,800 per acre. I am unable to state what the value of the improvements is. I could not tell if I were to look at them. Representatives of the Navy Department say that they have made careful estimates as to the value of the buildings and the improvements, and that they are easily worth the sums fixed in this item.

Mr. KELLEY of Michigan. I take it from what the gentleman says that he personally is not willing to assure the House that this is a reasonable price for this property?

Mr. FITZGERALD. I would not undertake to assure the House in that manner. I am unable to form any opinion. I went carefully through the hearings before the Committee on Naval Affairs for some years. The item was inserted by the Senate, and in order to get an agreement upon the bill the managers upon the part of the House felt compelled to acquiesce in the matter.

Mr. KELLEY of Michigan. May I ask the gentleman a question or two about the further appropriation of $1,600,000 carried in the bill? What is proposed to be done with that money? It is in the same item.

Mr. FITZGERALD. The sum of $600,000 or $700,000 is to be utilized at once for the construction of a pier to the deep water in the main channel, and the other is for dredging alongside of it and some improvements in connection with some other features of the proposed development.

Mr. KELLEY of Michigan. What use would the pier be until after the coal depots, the oil depots, and other things were constructed there?

Mr. FITZGERALD. They need it there just as quickly as they can get it in order to have access to the station from the water.

Mr. KELLEY of Michigan. Will the gentleman yield me 15 minutes on this proposition?

Mr. FITZGERALD. If the gentleman will wait, I will do so.

Mr. KELLEY of Michigan. When the gentleman is at liberty to do so.

Mr. GORDON. Will the gentleman yield?

Mr. FITZGERALD. I will.

Mr. GORDON. What is the exact amount of money carried in this report of the conferees?

Mr. FITZGERALD. Three billion two hundred and eighty-one million two hundred and ninety-four thousand five hundred and forty-one dollars and sixty cents, and the amendment for the Jamestown site is $3,000,000. Is there any other gentleman who wishes to inquire as to any other item in the bill? Mr. Speaker, I now yield to the gentleman from Massachusetts [Mr. GILLETT]. How much time does he desire?

Mr. GILLETT. I would like about 15 minutes.

Mr. LENROOT. Will the gentleman yield?

Mr. FITZGERALD. I will.

Mr. LENROOT. The gentleman will remember there was some controversy when this bill went to conference over a provision relating to the suspension of contracts for the purpose of securing labor. I understand that has gone out of the bill.

Mr. FITZGERALD. The Senate was very insistent, and as it was a tentative proposition so far as the committee was concerned, we consented it should go out. I yield 15 minutes to the gentleman from Massachusetts [Mr. GILLETT].

Mr. GILLETT. Mr. Speaker, this bill, when it came to the House, contained a Senate amendment appropriating $10,000,000 in a lump sum for the use of the Army. That was urged upon the House committee by the Secretary of War, but the House committee refused it. He again undoubtedly urged it upon the Senate committee, and the Senate committee yielded, but in conference, I am happy to say, the Senate committee yielded to the House, recognizing, perhaps, that the President had been given by Congress a lump sum of $100,000,000 which he could use for anything he pleased, and that consequently it was not necessary to have this other lump sum of $10,000,000. Now, I recognize, as everybody must, that in the crisis of this war it will be necessary for both the Army and Navy Departments to expend large sums of money which they can not anticipate, and they must have a leeway in appropriations, but we certainly have been trustful and generous already in giving $100,000,000 to use for that very purpose, and until that is exhausted it seems to me the departments ought not to press upon us for further lump sums.

Mr. LONGWORTH. Will the gentleman yield?

Mr. GILLETT. I will.

Mr. LONGWORTH. Can the gentleman state how much Congress has appropriated this year up to now for war purposes?

Mr. GILLETT. No; I can not state it offhand exactly.

Mr. LONGWORTH. Is it as much as $3,000,000,000?

Mr. GILLETT. Yes; it must be much more than that.

Mr. LONGWORTH. I mean already appropriated.

Mr. GILLETT. The gentleman means appropriated for next year?

Mr. LONGWORTH. Yes.

Mr. GILLETT. Yes; it must be more than that—very much more than that.

Mr. LONGWORTH. What in the gentleman's judgment will be necessary for next year?

Mr. GILLETT. I would not dare to guess now any better than any other Member.

Mr. LONGWORTH. More than $3,000,000,000 has been already appropriated?

Mr. GILLETT. Yes; very much more than that. So, as I say, Mr. Speaker, we have been liberal. We have given much elasticity to the departments, and I think we now ought to suggest to the different departments of the Government that the temptation which undoubtedly they will all feel when they see these enormous sums of money passing about, to ask for large lump sums to be expended for what they doubtless think are useful purposes, must be curbed.

There has already been shown a disposition on behalf of various departments not to be content with their ordinary appropriations, but to ask for some such elastic lump-sum appropriation, and I do not feel that this House ought to allow itself to be swept away—and it certainly has not so far—by the enormous size of our appropriations and by the attractive propositions which are held out by the various departments, and yield to their solicitations and give them more control than they have had in the past. Now, I recognize and can see both sides of the argument. I recognize the head of the department may often feel, and he may sometimes be justified in feeling, that if he were given a lump sum that he could expend where he pleased, and give the advanced salaries that he pleased, that he could get better results from his administration than being restricted as he is by the limitations which Congress puts upon him. I presume very often that would be true. I think every member of any appropriating committee often feels as he sits in the committee and hears the recommendations of the departments and knows that he can not really probe to the root of the matter, and that it is very much a matter of guessing and trusting to the recommendations of the department—as I say, I think every member of any appropriating committee often feels his helplessness and feels that there is a just argument on the other side. But, on the other hand, we all must remember that the responsibility of Congress and the restrictions of Congress on the power of expenditure have been recognized as one of the fundamental necessities of a free government.

The control of the purse in England for centuries has been the real contest between the Parliament and the King, and it has been the success of Parliament in preserving its control which has established free government there. And I suspect that in every constitutional nation representatives of the people can not afford to abandon and yield to the executive the control of the purse. And I thought it might be, if not interesting, at least useful, to the House, especially to the new Members for me in a few moments to briefly review what Congress has done in the last 10 years along this line and just what restrictions we have put upon the Executive.

Mr. GORDON. Will the gentleman yield?

Mr. GILLETT. Certainly.

Mr. GORDON. In connection with the observation which the gentleman has just made about England, I call the attention of the gentleman to the fact that exactly the reverse occurred in Germany, where they appropriated for the army for a period of seven years in advance, thereby demonstrating the control of the executive over the legislative department of the Government.

Mr. GILLETT. And to my mind that is another argument, as I presume it is to the gentleman, that we should not follow their example.

Mr. STAFFORD. As I recall, there was an amendment included by the Senate providing for interchangeable use to the extent of 10 per cent?

Mr. GILLETT That also was eliminated.

I will only go back 10 years and refer to a few of the important pieces of legislation which this House has enacted which have limited the Executive in control of appropriations. And

I think every student of our National Government in the last few years will admit that in every field except this one the Executive has been gaining power, and has been gaining it at the expense of the legislature. It may be progress, but there is only one line that I know of where Congress has increased its power, and that is in this line of control over the expenditures. And it has done this because there has been a constant reaching out of the Executive to increase its power over appropriations, and Congress, seeing and feeling in each case some specific grievance, has enacted legislation to curb that specific act. And so there has grown up this body of law. And that is the way that free government generally advances—by punishing some specific act. This constant struggle between the executive and legislative, which is always going on in every free government, is not discreditable to either. I do not reflect upon or criticize the Executive for having this disposition. I think if any of us were in the executive department we would see opportunities for service and would reach for more power. But, on the other hand, being in the legislative branch of the service it is our duty to look at it from our side, as Congress has year after year, and attempt to curb the executive branch. And, as I say, we have done it with much success.

In 1902 the Congress passed a law which provided—

That hereafter no act of Congress shall be construed to make an appropriation out of the Treasury of the United States unless such act shall in specific terms declare an appropriation to be made for the purpose or purposes specified in the act.

You see the Executive was interpreting the law loosely and trying to put on an interpretation which would give it more power than Congress intended, and to meet that Congress passed that law.

And, by the way, let me say here that these acts have not been partisan. They have been passed when both the House and Executive were Republican, when the House was Democratic and the Executive was Republican, and when both House and the Executive were Democratic. So it has not been a friction between the House belonging to one party and the Executive belonging to another. That has been true of some committees; for instance, the committees on expenditures. The only time that I can remember when the Expenditures Committees had any activity was when the House was Democratic and the President was Republican. In this Congress, whereas undoubtedly now the Expenditures Committees will live in innocuous desuetude and will not care to investigate the expenditures of the Executive, if this House had had a few more Republican votes probably the Expenditures Committees would have flourished, and I believe they would have done much good for economy by investigating the acts of this administration. But these acts of legislation which I referred to have been done regardless of partisan conditions.

Now, Mr. Speaker, in 1904 an act was passed limiting the looseness of expenditures, which provided this:

That on and after July 1, 1904, it shall not be lawful for the Secretary of the Navy to employ in the Navy Department at Washington, D. C., and pay out of the appropriations for new ships, any civilian expert aids, additional draftsmen, writers, copyists, and model makers, except as may herein or as may hereafter be specifically authorized.

Up to that time the Navy Department was paying out of their big appropriation for new ships a great many employees, and Congress resolved that that should not be done, and that we should determine what employees should be authorized. From that time until now all the appropriation committees have been inclined to do this. Up to that time to every department there were large lump sums authorized. But gradually the committees of Congress contracted the habit that when the department asked them for a lump sum they would say, "You send down to us a list of the employees you want to use, and we will appropriate not a lump sum but we will specifically authorize the employment of so many clerks and so many draftsmen, and so forth." And in that way in the last 10 years, while our appropriation bills have been made a great deal larger and more bulky, yet every department has found itself limited in the employment of its officials to those which Congress specifically authorized.

The SPEAKER. The time of the gentleman has expired.

Mr. GILLETT. Will the gentleman yield me 10 minutes more?

Mr. FITZGERALD. Yes; I yield to the gentleman 10 minutes.

The SPEAKER. The gentleman from Massachusetts is recognized for 10 minutes more.

Mr. GILLETT. In the year 1906 Congress made the law of 1902 still more stringent and provided that—

No act of Congress hereafter passed shall be construed to make an appropriation out of the Treasury of the United States, or to authorize the execution of a contract involving the payment of money in excess of appropriations made by law, unless such act shall in specific terms declare an appropriation to be made or that a contract may be executed.

And in 1912 they tied the provisions together still more clearly by providing that—

No specific or indefinite appropriation made hereafter in any regular annual appropriation act shall be construed to be permanent or available continuously without reference to a fiscal year unless it belongs to one of the following five classes: Rivers and harbors, lighthouses, fortifications, public buildings, and pay of the Navy and Marine Corps, last specifically named in and excepted from the operation of the provisions of the so-called "covering-in act" approved June 20, 1874, or unless it is made in terms expressly providing that it shall continue available beyond the fiscal year for which the appropriation act in which it is contained makes provision.

Then we found that we could not keep track of the appropriations unless the departments each year followed, in sending to us the estimates of what they wanted, the same lines of classification as they used before. The departments, either intentionally or accidentally, used to put in a different place requests for appropriations, so that we found it difficult to keep track of them. So Congress passed this law:

Hereafter the estimates for expenses of the Government, except those for sundry civil expenses, shall be prepared and submitted each year according to the order and arrangement of the appropriation acts for the preceding year. And any changes in such order and arrangement, and transfers of salaries from one office or bureau to another office or bureau, or the consolidation of offices or bureaus desired by the head of any executive department, may be submitted by note in the estimates. The committees of Congress in reporting general appropriation bills shall, as far as may be practicable, follow the general order and arrangement of the respective appropriation acts for the year preceding.

And then Congress went on and followed that up with more specific requirements, compelling each department to give us each year its estimates in the exact order of the preceding year, so that it was easy for us to check up and see what increases they were demanding.

In the following year, finding that that provision of law was being evaded, we said that if these estimates, when transmitted to the Treasury Department by the different heads of departments, were not in their proper order, it should be the duty of the Secretary of the Treasury himself to take those estimates and to change the order in which they were submitted and put them in the form of the preceding year.

Mr. GORDON. Mr. Speaker, will the gentleman yield there?

Mr. GILLETT. Yes.

Mr. GORDON. Is it the observation of the gentleman that the granting of authority to the different committees to make appropriations has resulted in some instances in duplicate appropriations?

Mr. GILLETT. There has often been an attempt on the part of the departments, if they could not get an appropriation from one committee, then to apply to another committee for the same appropriation. But I do not think that has often succeeded. The different committees have generally kept track of those things. But it has occasionally succeeded, although what I may term the jealousy, perhaps, of the different committees has generally tended to at least call that to the attention of the House and often to defeat it.

Mr. GORDON. I call the gentleman's attention to a fact—which, however, the gentleman's committee corrected—that the Committee on Military Affairs this year duplicated the annual appropriation bill when it recommended, as it did, a lump sum, which included the amount of the annual military appropriation which had previously been enacted. But the Congress corrected that.

Mr. GILLETT. Yes; the vote of the House corrected that.

Mr. GREENE of Vermont. Mr. Speaker, will the gentleman yield?

Mr. GILLETT. Yes.

Mr. GREENE of Vermont. Permit me to interject a word there.

Mr. GILLETT. Yes.

Mr. GREENE of Vermont. That was done, but not as a matter of inadvertence, because I recall distinctly the fact that that sum was included in the estimates, and it was known to the committee. It was thought that that sum would be needed in addition to the first lump sum appropriated, and therefore it was considered safe to include it as a general proposition, not specifically for the purpose for which it was estimated.

Mr. GORDON. It was duplicated, however.

Mr. GILLETT. Congress found the departments were falling into another habit which was making trouble, and that was that at the beginning of the year they would in obedience to the law send in their estimates, but they would not send in all that they wanted, but would keep on sending in supplemental estimates during the session. So Congress in 1906 enacted this provision to correct that practice:

Hereafter the heads of the several executive departments and all other officers authorized or required to make estimates for the public service shall include in their annual estimates furnished the Secretary of the Treasury, for inclusion in the Book of Estimates, all estimates of appropriations required for the service of the fiscal year for which they

are prepared and submitted, and special or additional estimates for that fiscal year shall only be submitted to carry out laws subsequently enacted or when deemed imperatively necessary for the public service by the department in which they shall originate, in which case such special or additional estimate shall be accompanied by a full statement of its imperative necessity and reasons for its omission in the annual estimates.

Mr. MANN. Mr. Speaker, will the gentleman yield there?

Mr. GILLETT. Yes.

Mr. MANN. Does not the gentleman think that the variety of reasons given in the deficiency estimates do credit to the human mind as a matter of imagination?

Mr. GILLETT. Yes. I think they often speak well for the ingenuity of the heads of the departments. [Laughter.] We have not been able, of course, to accomplish exactly the end that we had in view, but this legislation of Congress has very largely diminished the quantity of supplemental estimates which used to be presented.

Then we enacted, two or three years later, the provision of law with which you are familiar—that the President, when he found that there was a discrepancy between the estimates and the anticipated revenue, and that the estimated revenue would not meet the estimates of expenditures, should be required to recommend to Congress a remedy. Up to date there had been no responsibility upon the Executive:

Immediately upon the receipt of the regular annual estimates of appropriations needed for the various branches of the Government, it shall be the duty of the Secretary of the Treasury to estimate, as nearly as may be, the revenues of the Government for the ensuing fiscal year, and if the estimates for appropriations, including the estimated amount necessary to meet all continuing and permanent appropriations, shall exceed the estimated revenues, the Secretary of the Treasury shall transmit the estimates to Congress as heretofore required by law and at once transmit a detailed statement of all of said estimates to the President, to the end that he may, in giving Congress information of the state of the Union and in recommending to their consideration such measures as he may judge necessary, advise the Congress how, in his judgment, the estimated appropriations could with least injury to the public service be reduced so as to bring the appropriations within the estimated revenues, or, if such reduction be not, in his judgment, practicable without undue injury to the public service, that he may recommend to Congress such loans or new taxes as may be necessary to cover the deficiency.

Then we provided, in 1913, that no estimates for fortifications should be presented without full and specific plans:

Hereafter estimates shall not be submitted to Congress for appropriations for construction of gun and mortar batteries, modernizing older emplacements, and other construction under the Engineer Department, in connection with fortifications, until after plans and estimates of cost shall have been prepared therefor.

Then, in 1914, inasmuch as we had to admit that there might be lump-sum estimates, we enacted:

That section 6 of the sundry civil appropriation act approved August 24, 1912, is amended to read as follows:

"SEC. 6. That there shall be submitted hereafter, in the annual Book of Estimates following every estimate for a general or lump-sum appropriation, except public buildings or other works constructed under contract, a statement showing in parallel columns:

"First, the number of persons, if any, intended to be employed and the rates of compensation to each, and the amounts contemplated to be expended for each of any other objects or classes of expenditures specified or contemplated in the estimate, including a statement of estimated unit cost of any construction work proposed to be done; and

"Second, the number of persons, if any, employed and the rate of compensation paid each, and the amounts expended for each other object or class of expenditure, and the actual unit cost of any construction work done, out of the appropriation corresponding to the estimate so submitted, during the completed fiscal year next preceding the period for which the estimate is submitted."

And we also provided—

That section 7 of the general deficiency appropriation act approved August 26, 1912, is amended to read as follows:

"SEC. 7. That no part of any money contained herein or hereafter appropriated in lump sum shall be available for the payment of personal services at a rate of compensation in excess of that paid for the same or similar services during the preceding fiscal year; nor shall any person employed at a specific salary be hereafter transferred and hereafter paid from a lump-sum appropriation a rate of compensation greater than such specific salary, and the heads of departments shall cause this provision to be enforced: *Provided*, That this section shall not apply to mechanics, artisans, their helpers and assistants, laborers, or any other employees whose duties are of similar character and required in carrying on the various manufacturing or constructing operations of the Government."

Then, in 1912, Congress passed a very radical law absolutely forbidding the departments to incur any deficiencies. Up to that time the departments would use up their money, then incur deficiencies, and come to us and say, "We must have this money; we have incurred a deficiency." And Congress was obliged to appropriate for it. So we passed this law:

No executive department or other Government establishment of the United States shall expend, in any one fiscal year, any sum in excess of appropriations made by Congress for that fiscal year, or involve the Government in any contract or other obligation for the future payment of money in excess of such appropriations unless such contract or obligation is authorized by law. Nor shall any department or any officer of the Government accept voluntary service for the Government or employ personal service in excess of that authorized by law except in cases of sudden emergency involving the loss of human life or the destruction of property. All appropriations made for contingent expenses or other general purposes, except appropriations made in fulfillment of contract obligations expressly authorized by law, or for objects required or authorized by law without reference to the amounts annually appropriated therefor, shall, on or before the beginning of each fiscal year, be so apportioned by monthly or other allotments as to prevent expenditures in one portion of the year which may necessitate deficiency or additional appropriations to complete the service of the fiscal year for which said appropriations are made; and all such apportionments shall be adhered to and shall not be waived or modified except upon the happening of some extraordinary emergency or unusual circumstance which could not be anticipated at the time of making such apportionment, but this provision shall not apply to the contingent appropriations of the Senate and House of Representatives; and in case said apportionments are waived or modified, as herein provided, the same shall be waived or modified in writing by the head of such executive department or other Government establishment having control of the expenditure, and the reasons therefor shall be fully set forth in each particular case and communicated to Congress in connection with estimates for any additional appropriations required on account thereof. Any person violating any provision of this section shall be summarily removed from office and may also be punished by a fine of not less than $100 or by imprisonment for not less than one month.

The provisions of section 3679 of the Revised Statutes of the United States, as amended by section 3 of the urgent deficiency appropriation act approved February 27, 1906, known as the antideficiency act, are hereby extended and made applicable in all respects to appropriations made for and expenditures of and to all of the officers and employees of the Government of the District of Columbia.

We followed this by compelling the contingent funds to be apportioned.

Many of you will remember that we forbade the use of money for any commissions which had not been authorized by Congress. We also forbade the use of money for certain accountants that were a branch of the service which Congress had disapproved. Congress also restricted the departments by providing:

It shall be the duty of the head of each executive department and other Government establishment at Washington to submit to Congress at the beginning of each regular session a statement showing in detail what officers or employees (other than special agents, inspectors, or employees who in the discharge of their regular duties are required to constantly travel) of such executive department or other Government establishment have traveled on official business from Washington to points outside of the District of Columbia during the preceding fiscal year, giving in each case the full title of the official or employee, the destination or destinations of such travel, the business or work on account of which the same was made, and the total expense to the United States charged in each case.

We tried to prevent the different departments bidding against each other for the services of clerks by this law:

It shall not be lawful hereafter for any clerk or other employee in the classified service in any of the executive departments to be transferred from one department to another department until such clerk or other employee shall have served for a term of three years in the department from which he desires to be transferred.

I bring these facts forward because, entering as we are into a period of enormous expenditures, every one connected with the service should have clearly in mind the provisions of law. I do not offer it in any spirit of partisanship or criticism upon the heads of departments. I appreciate that every head of a department has always wanted all the money he could get for his department, and has always thought he could use it a great deal better if he was given a free hand than if Congress placed restrictions over it. But Congress has never acquiesced in that view; and unless Congress is prepared to abandon the position it has maintained for years, in these times of vast expenditure Congress ought to live up to its theories and, as far as possible, compel the departments to obey these provisions of law which year by year have been thrown around them in order to keep in this body the control of the purse.

I should not be doing my duty, I think, if I did not admit that most of these restrictions were drawn not by any Member of Congress, but by one of the most useful public servants ever connected with this House, the late James C. Courts, for many years clerk of the Committee on Appropriations. I do not know about the other committees, but I do know about our committee. When some proposition would come before us and we found that the heads of the departments were evading the distinct purpose of Congress, as they often were, and finding loopholes in the law, Mr. Courts, with his vast knowledge and ingenuity, was able to draw a provision which would cover the case. So I believe a great majority of these laws which I have read are the result of the invention, knowledge, and patient skill of Mr. Courts, and I think it is but fair that in commenting upon the powers of the House and upon the jealousy which the House has shown to hold up its prerogatives against the Executive, just due should be given to the servant of the House who, more than any other, carried out its will in this direction. [Applause.]

Mr. FITZGERALD. Mr. Speaker, how much time have I remaining?

The SPEAKER. Ten minutes.

Mr. FITZGERALD. Mr. Speaker, a number of gentlemen wish to have time yielded to them to discuss matters in the re-

port, and I ask unanimous consent that my time be extended one hour.

The SPEAKER. The gentleman asks unanimous consent that his time be extended one hour. Is there objection?

Mr. MADDEN. Reserving the right to object, I think it will take more than one hour.

Mr. MANN. One hour at a time.

Mr. MADDEN. We may not get consent for another hour.

Mr. MANN. The previous question will not be ordered.

Mr. MADDEN. We do not know.

Mr. FITZGERALD. I think we can complete it easily in an hour.

Mr. MADDEN. I do not know. I may take an hour myself to ask some questions.

Mr. FITZGERALD. There will be no disposition to shut off any legitimate inquiry or discussion of the report.

The SPEAKER. Is there objection?

Mr. MADDEN. All I want is to have the assurance of the gentleman that the previous question will not be moved until opportunity is given to ask such questions as may be thought necessary by Members or to give such time as may be reasonable to Members to discuss items in the bill.

Mr. FITZGERALD. I will state to the gentleman—probably he was temporarily absent—that Members exhausted their inquiries, and then I yielded to two or three gentlemen who wished to speak.

Mr. MADDEN. No one made any inquiries in connection with this bill, as far as I observed.

Mr. FITZGERALD. Oh, yes.

Mr. MADDEN. I was here when the bill was called up. I have been here since the House was called to order, and not five minutes were consumed in asking questions.

Mr. FITZGERALD. Nobody desired to ask any more questions.

Mr. MADDEN. The gentleman from Massachusetts desired 15 minutes and the gentleman from Michigan 10 minutes.

Mr. FITZGERALD. I yielded time until no one showed any disposition to ask any more questions.

Mr. MADDEN. There was no indication that opportunity would be given to gentlemen.

Mr. FITZGERALD. I asked if anybody desired to make any inquiry.

Mr. MADDEN. The gentleman must have asked it in a whisper, because my hearing is good.

Mr. FITZGERALD. The gentleman was otherwise engaged.

Mr. MADDEN. No; I was not.

The SPEAKER. Is there objection?

Mr. MADDEN. I am going to object unless I have an assurance from the gentleman.

Mr. FITZGERALD. What assurance does the gentleman wish?

Mr. MADDEN. Simply that the previous question will not be moved within the hour.

Mr. FITZGERALD. It will not be moved within the hour.

Mr. MADDEN. Until there is other opportunity after the hour, if it becomes necessary.

Mr. FITZGERALD. I will say to the gentleman that no legitimate requests for information or time will be cut off.

Mr. MADDEN. That is all I want.

Mr. FITZGERALD. That ought to be satisfactory.

The SPEAKER. Is there objection?

There was no objection.

Mr. FITZGERALD. I yield 10 minutes to the gentleman from Kentucky [Mr. SHERLEY].

Mr. SHERLEY. Mr. Speaker, this bill as reported to the House as the result of the conference carries $3,281,294,541.60. It is interesting in connection with the size of the bill to very roughly state what has been the appropriations up to this time for war purposes. The gentleman from Ohio [Mr. LONGWORTH] asked the gentleman from Massachusetts [Mr. GILLETT] a question along this line, and I hope in a very rough way to give that information.

This bill carries the sum I have just stated. The general deficiency bill carried, in round figures, $147,000,000. The sundry civil bill carries for distinctly war purposes $16,000,000. The Army bill carried $273,000,000. The fortification bill carried $51,000,000. The Military Academy bill carried one million three hundred and odd thousand dollars. The Naval bill carried $517,000,273, making a grand total of four billion two hundred and eighty-seven million three hundred and ninety-four thousand and nine hundred and odd dollars. That represents the total appropriations, roughly, that have been made up to this time for war purposes. Of course the House will appreciate that these sums include sums that would have been appropriated for the Army and the Navy and for military purposes irrespective of the country being at war; but, including all these purposes, the total is as I have stated.

That includes also the provision that has been made for what is commonly spoken of as the shipbuilding program. If that should be eliminated from the total it would leave in rough figures $3,782,394,000 appropriated directly for the purposes of the war.

Now, this sum is so vast that it does not carry to the mind any real picture. It is impossible for us to accurately understand the meaning of figures of this size, but they represent what is believed to be the present necessities of the Army and of the Navy. That they will have to be supplemented by sums as large in the coming year, I have no doubt, should the war continue more than a year, and we will have to grow accustomed to these tremendous figures during this great world-wide war.

Something was said by the gentleman from Massachusetts [Mr. GILLETT] and very properly said, touching the attitude of Congress as to appropriations. I agree with a great deal that he has said, and yet with a great deal of it I differ fundamentally and vitally. I think no greater mistake has been made by Congress than year after year undertaking to cure specific abuses by the passage of general laws, meant to deal with that particular abuse, yet applying to all departments without undertaking to reach down into the fundamental trouble that lies at the bottom of the situation.

We flatter ourselves that we exercise a considerable judgment about what moneys we shall vote the departments, and we undertake to detail these expenditures, and we put restrictions upon their expenditure. The result is largely that the departmental head who wants to evade the law of Congress finds some method of doing it, and the good official, the efficient official, is frequently handicapped in a discretion which he ought to have. Instead of undertaking to control their activities by these general laws, what we need is a system of bookkeeping and accounting that will show, not simply that moneys are spent for the particular purpose for which they are appropriated, but whether or not they have been economically expended. Our entire system of checking expenditures by the departments was created for one purpose and practically serves but one purpose, and that is to prevent misappropriation of funds.

But there is no method now by which you can look over the expenditures of a previous period and ascertain whether or not they have been economically expended. There is no way by which Congress can find out which is the efficient department and which is the slack and lax department. The result is that year after year we keep piling up appropriations. There comes some abuse—we find that a department has too many clerks in Washington—and we pass a law that no part of the money we appropriate shall be expended for clerk hire in Washington unless expressly authorized. The result is that there is absolutely no leeway given to the department that needs to expand temporarily or permanently here in Washington, and we have simply tied the good man in order to tie the weak.

Mr. LANGLEY. Will the gentleman yield?

Mr. SHERLEY. I will yield.

Mr. LANGLEY. Was it not the purpose of Congress in creating the committees on expenditures primarily to deal with this situation?

Mr. SHERLEY. Oh, yes; but the Committee on Expenditures working from now until doomsday could not do the work efficiently because they have not the basis upon which to work, and that is a system of bookkeeping by which you can determine what has been done. How do we undertake to find out what has happened? We summon a lot of men before the committee and put them through a cross-examination, mild or stiff, and when we find something that looks a little irregular we undertake to dig into it. But under a proper system of bookkeeping and accounting it would enable men to go into the accounts of the fiscal year and accurately determine how money has been expended, in regard to the efficiency of the expenditure, and then when you found a man who had been lax, instead of undertaking to pass a law that would tie the good along with the bad, the remedy would be to cut off his head and put an efficient man in his place. We ought not to fool ourselves with the notion that much of the method we have followed in the past has been efficient, because it has not been efficient, except that by preventing activities you prevent abuses, which is really the principle of nihilism.

Mr. STAFFORD. Will the gentleman yield?

Mr. SHERLEY. Yes.

Mr. STAFFORD. The gentleman spoke of a system of bookkeeping that could be devised which would result in the economical administration of the appropriations of Congress. I have never learned of any system of bookkeeping or accounting that would result in that, but the question I wish to ask the

gentleman is this: Is it legislatively feasible to have any committee pass on any accounting system and say whether the expenditures of the Government have been economical?

Mr. SHERLEY. I think it is easily possible to do what has been done in many municipalities and by many other governments; that is, have a system that shows expenditures according to purposes and shows efficiency of expenditures, so that by an examination of them you know whether one department has done its work well or not. For instance, a certain amount of clerical hire is provided for, and if there was some way by which you could check the amount of work that a given clerical force did, and after determining that you found out that it took more clerks to do the same amount of clerical work in the Post Office Department than it did in the Interior Department, you would know where the trouble was and what the remedy was, but the method that we pursue is a method that does not put responsibility anywhere. We need in America not to keep dividing up power, not to keep separating it, so that nobody can abuse it, but to put it with responsibility, so that when it is abused those who are responsible for the abuse can be punished, and all of reform has gone along that line. Think what has happened in the House of Representatives. We undertook to change our rules here upon the theory that the Speaker had become a great boss and that we would prevent the abuse of power by taking power from him, and we created in lieu of that a dozen or more bosses, not one of whom is in any sense responsible and no one of whom can be held accountable for any abuse. The modern system of government, a system that came into vogue and into creation after our Constitution with its checks and balances was adopted, is a system of responsibility with power. In England nobody, when matters get bad, ever undertakes to remedy the trouble by distributing power among so many that no one can exercise it, but they simply hold responsible the party and the leader that has abused the power, and the people's remedy is in cutting his head off. [Applause.]

Mr. FITZGERALD. Mr. Speaker, I yield 10 minutes to the gentleman from Michigan [Mr. KELLEY].

Mr. KELLEY of Michigan. Mr. Speaker, I want to call the attention of the House to a few matters in connection with the amendment to this bill made in the Senate involving an appropriation of $3,000,000 for the purchase and development of the so-called Jamestown Exposition grounds. Personally I am very sorry that the committee of conference agreed to this proposal. The answers of the gentleman from New York [Mr. FITZGERALD] to questions put by me a little while ago indicate, however, that the conference committee has not been convinced, and that the Committee on Appropriations in the House has not been convinced, that this is a wise or proper expenditure at this time. Primarily this appropriation is not for any expenditure connected with the immediate prosecution of the war, and I believe the House ought to protect the Committee on Appropriations against the necessity of considering all these by-propositions, so that they can devote themselves to the questions which do immediately concern the prosecution of the war. Certainly that puts upon that great committee all of the burden and all of the responsibility that they ought to be asked by the House to bear. The gentleman from New York [Mr. FITZGERALD], in answering my questions as to whether or not he had been convinced that the price agreed upon in the bill for the land was a fair price, said he knew nothing about it, or words to that effect. The testimony before the Committee on Naval Affairs shows that the original price paid by the people who own this land, under a mortgage sale—I mean now that part of the proposed purchase which contains the exposition buildings—was about $250,000. That was 10 years ago, and you gentlemen know enough about exposition buildings to know how flimsily such buildings are constructed. They have not been occupied for practically 10 years, and they are now put in this bill at a price of $600,000, when the people who own them purchased the buildings and the site for $250,000 ten years ago.

Mr. HOLLAND. Mr. Speaker, will the gentleman yield?

Mr. KELLEY of Michigan. Yes.

Mr. HOLLAND. Will the gentleman state to the House by whom that assessment of value was made?

Mr. KELLEY of Michigan. I do not care who made the assessment. If the owners of this property bought it for $250,000 10 years ago, after the Government itself had loaned a million dollars to the exposition, no part of which has ever been paid, they should not come here now, after 10 years, and ask the Government of the United States to pay $600,000 for those old buildings, which would be more useless than useful. [Applause.]

Mr. HOLLAND. Is it not a fact, however, that the Navy Department estimated the present value of the buildings at $600,000?

Mr. KELLEY of Michigan. If they did——

Mr. HOLLAND. And do not the hearings show that they did?

Mr. KELLEY of Michigan. I want to say to the gentleman that some strange things sometimes happen even in a department of the Government. I have in mind right now a coaling station recommended by the Navy Department of the Government, erected at a point on the Atlantic coast—I need not say where—at a cost of $1,500,000, which had to be abandoned before it was completed, and which is now up there utterly worthless. It was recommended by the engineers of the Government, and it is the business of committees bringing bills in here asking us to appropriate money to know of their own knowledge that the appropriation is reasonable and that the necessity exists. [Applause.] The chairman of the committee [Mr. FITZGERALD] himself has said that he has not been convinced as to the value of this property; that he has not been convinced that the price is a reasonable one, and on top of that he says that he has not been convinced that the necessity for the purchase of it exists at all, and therefore I say it should be stricken out of this bill. We should protect the Committee on Appropriations and the Treasury from attacks of this kind from another body. The Committee on Appropriations have work enough to do in connection with providing funds for this great war without going around the country looking up the value of land and old exposition buildings. [Applause.]

Mr. COX. How much land is there there?

Mr. KELLEY of Michigan. Something like 600 acres of land.

Mr. MADDEN. How many buildings are there on the land?

Mr. KELLEY of Michigan. Oh, I do not know, but just such kind and number of buildings as would ordinarily be found on exposition grounds.

Mr. MADDEN. Did the gentleman ever see the buildings?

Mr. KELLEY of Michigan. Yes; I have seen them all.

Mr. MADDEN. What would he consider they were worth per cubic foot? How many cubic feet of buildings are there there? Does anyone know?

Mr. KELLEY of Michigan. I do not.

Mr. MADDEN. There is a well-defined system of ascertaining what is the building cost according to the character of construction, per cubic foot.

Mr. KELLEY of Michigan. I want to say to the gentleman that the character of buildings is such that I do not believe they are worth anything to the Government as permanent buildings.

Mr. MADDEN. What do they expect to do with the buildings?

Mr. KELLEY of Michigan. Some of them are old buildings of a barn-like structure which might be used probably temporarily as barracks. There is the old building that was known as "machinery hall"——

Mr. MADDEN. What is it built out of?

Mr. KELLEY of Michigan. I think some are built out of brick, some stucco, and some of wood. There is an old hotel there that they have been talking about, uninhabited by anybody for 10 years.

Mr. MADDEN. Nobody has used it for 10 years?

Mr. KELLEY of Michigan. Nobody, so far as I know. There are a few houses which were put up by the several States for State headquarters, and some of them are pretty fair houses.

Mr. MADDEN. They have had nobody occupying them——

Mr. KELLEY of Michigan. I think some have been occupied during the 10 years at a nominal rental.

Mr. MADDEN. But they have not been repaired by these States since?

Mr. KELLEY of Michigan. I do not know how much money has been spent in the way of repairs by the present owners. Of course, the States lost interest after the exposition was over.

Mr. MADDEN. Who spent the money, if anyone spent any on them, since the fair?

Mr. KELLEY of Michigan. I do not know anything about that. I want to say, gentlemen, this proposition is not a new one. It has been before the Committee on Naval Affairs of Congress for 10 years at least, and has never been looked upon with favor, and the present chairman of the Committee on Naval Affairs, and I do not think I am stating anything that he would not want me to state, never believed that the price asked was a reasonable price.

Mr. LONGWORTH. Will the gentleman yield?

Mr. KELLEY of Michigan. I will.

Mr. LONGWORTH. Is this $600,000 to secure the tract of land?

Mr. KELLEY of Michigan. No; it is for the buildings.

Mr. FLOOD. Will the gentleman yield? I think the gentleman is mistaken about that. He is talking about the Jamestown

Exposition grounds. The people who own that will not get over $350,000 out of the appropriation. There are two tracts——

Mr. KELLEY of Michigan. I am only concerned about one thing, and that is what the Government is going to pay for this property and whether or not the Government gets value received.

Mr. FLOOD. It goes to buy two other tracts of land.

Mr. KELLEY of Michigan. Two-thirds of the land offered the Government under this bill is exposition ground——

Mr. FLOOD. Only one-fourth of the money goes to the exposition grounds.

Mr. KELLEY of Michigan. Most of the buildings are on the exposition grounds, except the old hotel, which, in my judgment, is worthless.

Mr. FLOOD. There are seven very valuable private residences built by the different States, which cost between $30,000 and $40,000 apiece.

Mr. KELLEY of Michigan. And what would they be useful to us for?

Mr. FLOOD. For many purposes; for offices, and so forth.

Mr. LONGWORTH. Do I understand the gentleman to say this $600,000 is for buildings alone?

Mr. KELLEY of Michigan. Yes; the buildings have been put in at $600,000. The whole price asked is $1,400,000.

Mr. LONGWORTH. And the $600,000 does not include the land at all?

Mr. KELLEY of Michigan. It does not include the land at all. Now, the total appropriation asked for is $1,400,000, which includes some more land and some cheap cottages that have been put up by people who bought the lots down there hoping, as I have understood, that sometime the Government might eventually take this over and they would get a good price for the lots which they purchased, and undoubtedly a portion of this sum will go to them.

Mr. COX. Some Member here remarked that some of this land is marshland which would have to be drained.

Mr. KELLEY of Michigan. No; there is no marsh ground. I have been all over the ground. The water in front of the exposition site is very shallow, running out for about 1,200 feet, as I recall, and one of the arguments urged in favor of the site is that when the dredging is done——

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. KELLEY of Michigan. I ask the gentleman from New York for five minutes more.

Mr. FITZGERALD. I yield the gentleman five minutes.

Mr. LONGWORTH. If the gentleman will pardon me, but I want to get this straight in my mind. Which tract of land does the gentleman refer to as having been sold for $250,000?

Mr. KELLEY of Michigan. The original Jamestown Exposition ground, including the buildings.

Mr. MEEKER. The gentleman means that the grounds and the buildings sold for $250,000, and now they want $600,000 for the buildings alone?

Mr. KELLEY of Michigan. Practically. I want to call attention to the fact that the chairman of the Committee on Appropriations in answer to my question here this morning has stated that he has not been convinced at all on the question of the price of this property and that he yielded only because of the necessity of getting an agreement in conference, but we can protect him and his committee if we do desire. Now what do we want this ground for at this time? What is the particular necessity for it now? What makes it a war measure? Nothing.

Mr. MADDEN. May I interrupt the gentleman?

Mr. KELLEY of Michigan. I have several things I want to say and I have not the time to yield at the moment. We are training for the Navy a good many extra men, and all of our training stations, Chicago, Newport, R. I., and Norfolk are crowded with men. It takes three or four months to train those boys so they can go to the ships and the moment they are trained they go to the ships and off to sea. Temporarily now, of course, every training station is crowded. The training station at Chicago is crowded. What have we done at Chicago? Bought land? No; we have done the reasonable thing, and have leased the land and put up the necessary tents and supplied other temporary equipment to train these young men for the sea.

Mr. MADDEN. Got it without leasing?

Mr. KELLEY of Michigan. For nothing. When the rush of boys now at the stations is over and the new men are trained and on the ships these various training stations will assume normal conditions again.

Now, it seems to me if the people who own these old buildings at Jamestown wanted to do something real patriotic at a time when we are raking this country over with a fine-tooth comb to find things to tax, and when we are raising this enormous sum of money to carry on this war, they would say to the Government, "Go up there and use those old exposition buildings until this temporary need goes by." [Applause.] That is what they ought to say, especially in view of the fact that this Government loaned the exposition $1,000,000 in the first place and has never received a dollar of it in return.

But it is urged that this property should be purchased for the development of a great naval base in Hampton Roads. Of course, that would take years to work out and can not be properly considered in a deficiency bill of this kind. In this connection, however, I want to call the attention of the House to the fact that this particular site is one of the most exposed sites on Hampton Roads. There is not a spot on Hampton Roads that could be reached so quickly from the ocean as this particular exposition site. At the present time there are no suitable fortifications on Cape Henry for the protection of Chesapeake Bay or this inner harbor. But that is a matter for the future. It is certain, however, that under the guise of immediate necessity the attention of the Navy Department should not at this time be diverted from building ships, from building destroyers, furnishing needed supplies, and from vigorously prosecuting this war to dredging great areas of shallow water around the vicinity of Norfolk for the purpose of sometime having a dock to which ships might be tied.

Mr. MADDEN. Will the gentleman yield?

Mr. KELLEY of Michigan. I will.

Mr. MADDEN. Is there any part of this $1,400,000 intended to pay the cost of the dredging?

Mr. KELLEY of Michigan. I suppose a part of the $1,600,000 which is carried also in the bill will be used for that purpose.

In conclusion, gentlemen of the House, let me say that if every improvement contemplated on this Jamestown site was actually consummated the American Navy would not dare at this time to spend one night in that vicinity.

Why, gentlemen, if the American Navy to-night should come in off the high seas it could not safely anchor in Hampton Roads. I want to say to you that the American Navy would not dare to spend a night in Hampton Roads. No man here will contradict what I am saying. If our ships came in from the high seas they would go up the James River or the York River and anchor, but would not anchor in the vicinity of this location. And if the time should come when it seems necessary to build a naval base down there all these things will have to be taken into account. Mr. Speaker, it seems to me that this bill ought to be sent back to conference with instructions to strike out this Jamestown Exposition amendment. [Applause.]

Mr. FITZGERALD. Mr. Speaker, I yield 10 minutes to the gentleman from Virginia [Mr. HOLLAND].

Mr. HOLLAND. Mr. Speaker, it seems that the people of Virginia, especially those living in or near the city of Norfolk, are not, in the opinion of the distinguished gentleman from Michigan [Mr. KELLEY], as patriotic as they might be. I want to say to my friend that this is the first time in the history of the Republic, so far as I know, that the people of any part of Virginia have been accused of a lack of patriotism, and this accusation, I am glad to say, is not supported by any evidence.

I purpose to discuss the facts in this case and will not make statements that I can not sustain. If I can not convince you by a statement of facts, then I do not desire to convince you at all. Neither I nor my people want the Government to purchase this property unless it is needed. And let me say that any suggestion or insinuation of graft in the proposition is entirely gratuitous, is without evidence to support it, and is absolutely untrue. The owners of this property want only its fair value, and are willing to have this determined in any proper way that you may suggest.

This amendment provides for the purchase of a naval operating base. Is the site recommended suitable, is it needed, and is the price to be paid fair?

In 1824 Mr. Southard, who was then Secretary of the Navy, declared that—

> The Chesapeake Bay and its waters formed the first object in every plan of national defense.

Since then Admiral Mahan and other great naval experts have repeatedly said—

> That the Chesapeake Bay and Hampton Roads on our Atlantic coast are clearly indicated by nature as primary bases of operation.

The great need, however, for a fleet operating base on Hampton Roads and near Chesapeake Bay was not fully realized until the beginning of the present war. It was then discovered that we had on Hampton Roads "no suitable submarine base, no convenient fleet storehouses, torpedo storehouses, or mine and net storehouses, no coal piers for berthing coal barges loaded and awaiting fleet's demands, and no place which would serve for a fleet drill ground, for shore drills, and as a mobilization

camp for marines or other troops to be transported overseas on transports convoyed by a fleet," which must of necessity be based on and dispatched from these waters. It was for this and other urgent reasons that the Secretary of the Navy, following the advice of every expert in his department, recommended the immediate acquisition, by purchase or condemnation, of the only available satisfactory site on Hampton Roads that could be equipped and developed as a fleet operating base.

It is to be regretted that the purchase of a site for the above-named purposes has been delayed until now. For years the fleet, in time of peace, has been based on Hampton Roads and Chesapeake Bay. Here is the fleet's rendezvous. The fleet's drill and practice grounds are near the Capes, only a short distance away. Here is one of the few places on the Atlantic coast sufficiently large to receive the entire fleet and all its auxiliaries. Here is the place where the fleet most frequently assembles. It was here that our flying squadron lay until it was needed in the Spanish-American War. It was here that the fleet assembled for its cruise around the world. It must of necessity be from here that our fleet must again be dispatched, if dispatched at all, in our present war. It is at Hampton Roads that the General Board and every Secretary of the Navy for the past 20 years have advocated a great increase of our naval facilities, and because, as has been so often said, it is the best place for expansion. Hampton Roads is to-day our safest base of naval operations and the best place of refuge for our ships. It is the only easily accessible and well-protected base on the coast from which we can fit out in absolute security a naval expedition. It is protected by Fortress Monroe and by Fort Storey. It is the place at which naval vessels can be most quickly supplied with coal, ammunitions, and provisions—the three great needs of the fleet. It is the place at which troops and marines from every part of the country can be most easily assembled for transport across the seas. And it is the only place recommended by the department, and which recommendation has the approval of the President, for a great naval operating base.

The property embraced in the recommendation of the Secretary contains approximately 440 acres of land above high-water mark, and 600 acres at least above low-water mark, the title to which, under the laws of Virginia, is vested in the riparian owner. And, as stated by the Secretary, on page 13 of his hearing before a subcommittee of the Senate Appropriations Committee:

> We will not only get the 400 or 500 acres of land, but we will get just as much land as we need in the only place in America where our fleet will have to rendezvous; just as much as we are willing to make, because in front of the Jamestown Exposition site the water is very shallow, and with the dredging we do we can fill in these shallow areas, so that we can get as much land as we want; and it is the only site on Hampton Roads that has the facilities for a training camp, supply station, and everything else we want able to grow as large as the Navy grows.

And this explains why Capt. McKean later stated, see page 18 of the same hearings:

> Four hundred and forty acres of high land now, and a possibility of this area being extended so that you would get 1,000 acres.

This land fronts more than 3½ miles on Hampton Roads, Willoughby Bay, and Boush Creek, is immediately opposite Fortress Monroe, is about 11 miles from the Norfolk Navy Yard, the Navy's primary repair base, and about the same distance from St. Helena training station; is about 10 miles from one of the Navy's largest marine hospitals, about 13 miles from St. Juliens naval magazine, about 16 miles from Cape Henry, and about 7 miles from the business center of the city of Norfolk, with which it is connected by two lines of electric railway. Immediately south of it are the terminals and coal piers of the Virginian Railroad and just a little farther up the river the terminals and piers of the Norfolk & Western Railway Co., and from which piers our fleet is supplied with immense quantities of coal. A little farther south of this site is the tract of land recently purchased by the city of Norfolk for public docks and terminals, to which, under contracts already made, the Norfolk-Portsmouth Belt Line is now extending its tracks, and which, when completed, will connect it with the great trunk line railroads now having termini on the Hampton Roads and Elizabeth River. It also fronts on the Norfolk-Portsmouth Channel. This channel has been pronounced by many naval boards and by ship captains of every nation in the world as one of the very best on the Atlantic coast. It is free from obstruction, free from severe storms and dangerous tides, free from damage by ice, and is accessible at all seasons of the year. It now has a depth of 35 feet, and is one of the few channels recommended by both Army and Navy experts for a depth of 40 feet—a depth not only sufficient for our present battleships but also for the largest dreadnaughts and battle cruisers now under construction. No place on the coast can be secured which will have better communication by rail and by water with all the great commercial centers of the country.

But I will not take your time to discuss the advantages of this property for the purposes for which its purchase has been recommended. As to these there can be no fair dispute.

But it is contended that this is not an emergency proposition and that an appropriation for its purchase ought not to be included in this bill. Upon the question of its urgent and immediate need for the purposes of national defense you doubtless will, and ought to be, guided by the recommendations of the Secretary of the Navy and his expert advisers. Let us then examine their testimony and find out what their recommendations have been, and not rely on the mere statements of speakers.

On page 15 of his hearing before the Committee on Appropriations of the Senate the Secretary of the Navy testified as follows:

> But the paramount thing is the station on the Chesapeake, at Hampton Roads. A great increase of the naval facilities at Hampton Roads has been advocated by every Secretary for the past 20 years and also by the General Board. It is the place for expansion.

And on page 14 of this same hearing he also declared:

> I think it is absolutely the most important of all these matters, beyond getting the men and the ships.

The Norfolk Navy Yard must be used for the primary purpose of repairing and building ships, and it should not be filled up as now with the nonessentials in the way of repair and construction facilities, and its water front should not be as now occupied by coal barges and oil-fuel tugs when needed for battleships.

We have—

Says the Secretary, on page 19 of the same hearing—

> an appropriation of $800,000 for storehouses at the Norfolk Navy Yard, which will take valuable land worth ten times as much for shops as for storehouses, and we can build these storehouses down there where there will be deep water and save that valuable space and save transportation on the stores also.

And this saving on transportation will be a big item. The coal now used by the fleet on Hampton Roads is expensively handled. It is hauled from the coal piers to a point below the yard, kept there until needed by the fleet, and then towed back some 8 or 9 miles past the same piers from which it was originally taken to the ships that want to use it. It is the same way with stores and other supplies. If the Navy owned this site it would have a place on Hampton Roads for storehouses and coal piers and could save the expense of handling its coal and supplies two or three times.

On page 22 of the same hearing the Secretary made the following replies to the following questions:

> Senator UNDERWOOD. Of course, in ordinary times it is our business to buy land as reasonably as possible, and if we can not get it at a reasonable price not to buy it. Do you regard this as a matter of great importance for the conduct of the war, independent of other questions?
>
> Secretary DANIELS. I regard it as of vital importance. There is not another navy in the world that has not a shore base for the men of the fleet.
>
> Senator UNDERWOOD. You are bound to have a shore base to operate this fleet at this time?
>
> Secretary DANIELS. It is absolutely necessary.
>
> Senator UNDERWOOD. Is there any other place you could get anything like it within these terms?
>
> Secretary DANIELS. Capt. McKean, there is no place down there at all, is there?
>
> Capt. MCKEAN. I was a member of the board that studied the thing, and I have been at Hampton Roads for years, and we have looked around for recreation grounds and for a base for the fleet, and I have never been able to find one outside of that place.
>
> Secretary DANIELS. I would like to say that Admiral Benson, who, as Chief of Operations, has charge of the fleet, urges it as perhaps the most important thing, aside from the ships and munitions.

Capt. McKean on page 22 of the same hearing made this statement:

> I had to convince the Secretary, and I have just succeeded in convincing him, that it is an absolute necessity, and I illustrated it by our fleet now under war conditions. * * * If that fleet went out for war we would have to strip the ships, and that means that we would take hundreds of thousands of dollars' worth of material off those ships, and there is not a Government-owned storehouse or a private one that is fit and available for us to store that material in. Give us this and let us have a storehouse there to put the stuff in, and, with just one handling in and out, in equipping the fleet for action, and for the preservation of that material and the handling of the material, it will pay for the whole proposition, and you will have your training station.

On page 21 of the hearing Capt. McKean also said:

> At this time and under the present conditions the importance of the immediate acquisition of this property by the Government can not be exaggerated, and this opinion is concurred in not only by the Secretary of the Navy but by the Chief of the Bureau of Navigation and naval officers in general familiar with the situation and the property concerned.

Could evidence as to the urgent need of this site be more convincing? Is further evidence needed to show that we can, by the use of this site, save enough money on transportation

charges, and in equipping the fleet for action, to pay for it? But there are still other reasons why we should own it.

Surg. Gen. Braisted, on page 35 of his hearing, testified as follows:

What I have said is, no more men for the fleet—that is agreed upon—no more men to the recruiting stations until we are ready. They saw the danger of it. Four or five weeks ago I pointed this out powerfully as I could, and that is why Admiral Palmer is presenting to you urgently a recommendation to get places like Jamestown Exposition grounds—we all know about that—also to get the increase at North Chicago.

Supposing you did pay a little more for it. We know they are the proper sites. In the case of Jamestown we have known it for years. I will tell you from my experience of years. Admiral Benson will tell you, the Secretary will tell you, everybody will tell you that the Jamestown grounds is the best place we know of on the coast for this particular purpose. I think it is the cheapest site you can get; but even if it is not, as Senator SHAFROTH said yesterday, let us pay this little amount and get it, because we need it, and we need it at this very minute.

And on the same page he gave this reason for its immediate need:

The sudden expansion of the Navy—

Said he—

has found us without a place to properly house and care for the men. We are asking you, all of us, to give us at once the Jamestown Exposition Grounds to increase our facilities and more ground at North Chicago and at San Diego to take care of these men properly in properly constructed and hygienic quarters, where they can be trained before they go to the ships that are coming.

Already the overcrowding of our training stations and barracks has resulted in the outbreak of disease, and men now enlisting in the Navy are, so I am told, being accepted "subject to call." We have no place to which we can send them. Should such a condition be permitted to prevail? What greater emergency can confront us than the health of the boys enlisting in the Navy? Can we refuse to provide proper quarters for the men when such quarters are demanded by the Medical Department of the Navy? Would not a nation that failed to take proper precautions for the health and to provide proper quarters for the comfort of its enlisted men subject itself to the severest censure?

If the Jamestown site should be purchased we can accommodate in the buildings already there more than 2,000 men at once, and within a few weeks from eight to ten thousand men. What stronger reason could be given for its immediate need?

Is the price at which the property is offered fair and reasonable?

My friend from Michigan has told you that this property sold in 1912 for $240,000. Yes; that is true, and I will not deny it. But why? My friend did not give you the reasons. He did not know the facts. Let me give them to you. There were liens on it at that time to the extent of $700,000 or $800,000, exclusive of the Government lien. These liens were held by banks, by railroads, by contractors, and by material men, and no one held a lien sufficiently large to enable him to buy the property alone. The railroads were not sufficiently interested in the property to bid on it. A large number of mechanic's lien holders and the banks also holding liens combined and bid in the property at $240,000. At the time of this sale there was a well-recognized sentiment in the community that the mechanic's lien holders and the banks would protect their interests, and there were no other bidders. There was also a depression in real estate values at that time.

Under such conditions the price obtained should not be regarded as fixing the value of the property at that time, and certainly not its present value.

Mr. BUTLER and Mr. MADDEN rose.

The SPEAKER. To whom does the gentleman from Virginia yield?

Mr. HOLLAND. I yield to the gentleman from Pennsylvania [Mr. BUTLER].

Mr. BUTLER. Let me ask my friend now whether it would be well to write into that bill the authority of the Government to condemn this property?

Mr. HOLLAND. I am willing to let its value be determined by any fair method.

Mr. BUTLER. And then the price could be ascertained by a jury later. My friend knows my fondness for him has somewhat restrained me. I have my doubt about the justice of this, and therefore if it can be put over to a court and jury to determine the real value to the Government I think it is the right thing to do.

Mr. HOLLAND. That would be entirely satisfactory.

Mr. MONTAGUE. Does not the report say "for the acquisition, by purchase or condemnation"?

Mr. BUTLER. Take out the word "purchase."

Mr. MADDEN. What I would like to ask my colleague is this. He has just stated that a number of creditors including banks bid the property in at sheriff's sale at $240,000?

Mr. HOLLAND. Only a part of it.

Mr. MADDEN. Do these people own this property to-day?

Mr. HOLLAND. A part of it they do, and a part of it they have sold.

Mr. MADDEN. Or have they transferred their holdings to somebody else, and does somebody else offer to sell the property to the Government of the United States?

Mr. HOLLAND. The property now offered includes that property and also the Pine Beach property and property sold to individuals. This particular piece of property, purchased by the lien holders is being sold, when you allow for the improvements, at $636 an acre, as the hearings disclose.

Mr. MADDEN. Mr. Speaker, will the gentleman permit a question there?

Mr. HOLLAND. Yes.

Mr. MADDEN. What is the ordinary price at which land in that neighborhood sells?

Mr. HOLLAND. I will reach that in a moment. I am glad the gentleman asked that question.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. HOLLAND. Yes.

Mr. MANN. When this property was sold for $240,000 was it sold subject to the lien?

Mr. HOLLAND. No; it was sold at public auction.

Mr. MANN. A good title was conveyed.

Mr. HOLLAND. It was sold at public auction, and a good title was conveyed. But no one was sufficiently interested to run the property up, and the lien holders bought it as cheap as they could.

Mr. MANN. Of course, if anybody thought that that was a cheap price they could have bought it by paying something more?

Mr. HOLLAND. Undoubtedly.

Mr. STERLING of Illinois. Mr. Speaker, will the gentleman permit a question there?

Mr. HOLLAND. Yes.

Mr. STERLING of Illinois. Was there a right to redeem after the sale?

Mr. HOLLAND. No, sir; there was no right to redeem. The entire sale was regarded as a method of liquidation, and the people and the community generally felt that the lien holders were going to protect their interests to the fullest extent, and hence they did not bid on the property. But it must be remembered that this Jamestown property, so considered, does not include all the property now offered to the Government.

Mr. BATHRICK. Mr. Speaker, will the gentleman yield there for a moment?

Mr. HOLLAND. Yes; but I do not wish the gentleman to take up too much of my time. I have a good deal to say yet.

Mr. BATHRICK. Did the lien holders buy it in?

Mr. HOLLAND. The lien holders bought it in.

Mr. BATHRICK. And there was no actual money paid in?

Mr. HOLLAND. The lien holders bought it in.

Mr. BATHRICK. It was advertised at that time, was it not, and nobody paid any more for it?

Mr. HOLLAND. I have answered the gentleman's question.

Mr. OLIVER of Alabama. Mr. Speaker, will the gentleman permit a question?

Mr. HOLLAND. Yes.

Mr. OLIVER of Alabama. Did all the lien holders buy it in, or only a part of the lien holders?

Mr. HOLLAND. I can not answer that.

Mr. OLIVER of Alabama. The gentleman recognizes the fact that that might be an important inquiry?

Mr. HOLLAND. I can not answer, except to say that no lien holder held a lien sufficiently large to cover the value of the property. But, as I have said before, the Jamestown property purchased at this sale is now being offered to the Government, according to the hearings, at $1,636 per acre, and, deducting the improvements, at $636 per acre.

Mr. HAMILTON of Michigan. Mr. Speaker, will the gentleman yield for a question?

Mr. HOLLAND. Yes.

Mr. HAMILTON of Michigan. How much is appropriated here for the purchase of this property?

Mr. HOLLAND. One million four hundred thousand dollars is the amount.

Mr. HAMILTON of Michigan. Exactly what does that cover? What is it proposed to purchase with that $1,400,000?

Mr. HOLLAND. It is proposed to purchase not only the old exposition grounds of 278 acres, but also to purchase two other tracts of land—one piece of 52 acres and the other piece of 110 acres—and this is all above high-water mark; also all buildings on the property.

Mr. HAMILTON of Michigan. How much land in all?

Mr. HOLLAND. Four hundred and forty acres above high-water mark and 600 acres above low-water mark.

Mr. HAMILTON of Michigan. What does this include?

Mr. HOLLAND. All the property and all the improvements.

Mr. HAMILTON of Michigan. My colleague from Michigan [Mr. KELLEY] separated the value of the buildings from the value of the land?

Mr. HOLLAND. Yes; he did. Everything is included, and the estimate of the value of the buildings was made by the officials of the Navy Department.

Mr. HAMILTON of Michigan. What did they estimate the buildings to be worth?

Mr. HOLLAND. Six hundred and forty thousand dollars, according to their estimate.

Mr. HAMILTON of Michigan. At this time?

Mr. HOLLAND. At this time, I suppose.

Mr. EMERSON. And at this place?

Mr. HOLLAND. Yes; and at this place.

Mr. FLOOD. Mr. Speaker, I suggest to my colleague that the Secretary of the Navy says these buildings cost $1,500,000.

Mr. HOLLAND. Yes; more than that amount.

Mr. MANN. Mr. Speaker, will the gentleman yield?

Mr. HOLLAND. Yes; I will.

Mr. MANN. What have these buildings been occupied for since they were purchased in 1911 or 1912?

Mr. HOLLAND. I might say that when this exposition property was sold the sale did not include certain State buildings. The following State buildings were not included: The Louisiana building, which cost $11,500; the West Virginia, which cost $21,000; the Georgia building, which cost $13,500; the Ohio building, which cost $21,500; the Missouri building, which cost $21,000; the North Dakota building, which cost $4,500; the Maryland building, which cost $36,000; the Virginia building, which cost $28,000; the Pennsylvania building, which cost $28,500; and the Massachusetts building, which cost $28,000. They have been occupied by the parties who purchased them.

Mr. MANN. The gentleman is reading those figures to me. I remember that at the close of the Chicago World's Fair Exposition many of the State buildings, each costing more than all of those combined, were torn down and thrown away.

Mr. HOLLAND. Some of these State buildings were sold to private parties at good prices, and are now being occupied by the purchasers.

Mr. MANN. What are they used for?

Mr. HOLLAND. They are being used for private residences.

Mr. MANN. What is the amount of the rental of those buildings for the year?

Mr. HOLLAND. They are not rented and I am not familiar enough with rental values to say what they would rent for.

Mr. MANN. As to the basis of $600,000 by the Navy Department—I have not examined it myself—is that $600,000 the value to the Government if we purchase them, or the value to the present owners for their occupation and use?

Mr. HOLLAND. My understanding is that the Navy Department estimates that it is the value of those buildings to the Government. You will find that the department estimates the present value of these improvements at $640,000.

Mr. FREAR. Mr. Speaker, will the gentleman permit me to interrupt him?

Mr. HOLLAND. Yes.

Mr. FREAR. In these hearings of the Committee on Naval Affairs——

The SPEAKER. The time of the gentleman from Virginia has expired.

Mr. HOLLAND. I will have to ask for additional time.

The SPEAKER. The gentleman asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. FREAR and Mr. MADDEN rose.

The SPEAKER. To whom does the gentleman yield?

Mr. HOLLAND. I will yield first to the gentleman from Wisconsin.

Mr. FREAR. In that hearing Chairman PADGETT makes this statement on page 491:

> The buildings would not amount to anything.

He says there are some few of them rotted. There were a lot of houses stuck over.

Mr. HOLLAND. Those are not the hearings to which I refer. The estimates placed on these buildings by the Navy Department a short time ago was $640,000.

Mr. HAMILTON of Michigan. Mr. Speaker, will the gentleman yield?

Mr. HOLLAND Yes.

Mr. HAMILTON of Michigan. Taxes have been paid upon this property ever since the exposition, I assume?

Mr. HOLLAND. Yes.

Mr. HAMILTON of Michigan. Can the gentleman state upon what valuation taxes have been assessed and collected?

Mr. HOLLAND. I could not. The property is owned by a number of people, and it would be difficult to secure the information.

Mr. HAMILTON of Michigan. After all, would not that be a pretty fair way to get at the valuation which is put upon that property?

Mr. HOLLAND. No; it would not; because property is assessed for taxation in my State at much less than its value, as I suppose it is in many other States.

Mr. HAMILTON of Michigan. How much less?

Mr. HOLLAND. Something like 50 per cent of its value, and frequently less.

Mr. HAMILTON of Michigan. If the gentleman could give to us the assessed valuation of the property then we might add 100 per cent to that.

Mr. HOLLAND. I could not give the gentleman the assessed valuation of the property, and it would do no good if I could. It must be remembered that the acquiring of this property is not a mere acreage proposition. It has been subdivided into lots, streets have been laid out and graded, water mains and fire plugs installed, and sewerage and electric light systems provided. The buildings and improvements on the property originally cost more than one and a half million dollars and are estimated by the Navy Department to have a present value of over $600,000, not including the light, water, and sewerage systems or the grading of streets. Some of the buildings may not, it is true, be serviceable to the Government, but many of them will be and can be used at once. The Secretary of the Navy has testified that some of the State buildings will be permanent structures, sufficient for officers' quarters for 25 years, and that other buildings on the property are in good condition, are sufficient to accommodate more than 2,000 men, and can be used at once.

Secretary Daniels, who has carefully investigated the question of price, says, on page 18 of his hearing, as follows:

> We have an option at a reasonable price on most of this, and we would have to condemn the balance, and in the condemnation we would not have to pay more than the price at which we have the options.

But it is not the land nor the improvements thereon that the Secretary believes to be of greatest value to the Navy, for on page 19 of his hearings he declares "that he considers the water front as worth more than all the land." And he is right. At one time I thought the price was too high, but upon investigation I found that the city of Norfolk recently purchased a tract of land, within about 1,000 yards of this property, for public docks and terminals, containing 55.95 acres above low-water mark and having no improvements thereon, and for which it paid $153,000, or at the rate of $2,734.58 per acre. It also purchased an adjoining tract of land, containing 145.47 acres, above low-water mark, on which there were no improvements and one-sixth of which is inland marsh, and paid therefor $238,030, or at the rate of $1,636.73 per acre. And about 50 acres of that land has since been sold to the American Chain Co. for $130,000, or at the rate of $2,600 per acre. These figures will give you some idea of the present value of land fronting on Elizabeth River and Hampton Roads. On the land purchased by the city of Norfolk, and which, as stated, is within about 1,000 yards of this property, there is now being expended by the city in the construction of docks and terminals more than $1,000,000, and which, when completed, will be connected by belt line with the eight trunk-line railroads having terminals on Elizabeth River and Hampton Roads.

Such activities in this section will make a large part of this property equally as desirable for manufacturing sites as that purchased by the American Chain Co. at the price of $2,600 per acre. If the 600 acres now offered to the Government could be sold at this price per acre, then the naked land, without considering the improvements thereon, would net the owners more than the amount charged therefor. And if the more than 100 buildings now on the property are worth over $600,000, the estimate placed thereon by the Navy Department, the Government will acquire this valuable site at a much less price per acre than the city of Norfolk recently paid for property similarly located. It is the present value of the property that we should consider—its present actual worth—and not the price at which it may have heretofore been sold. And if its present value can be measured by the prices at which other land has recently been sold in this section, then it would seem that the amount now charged for it is fair and reasonable.

As I have already stated, I was at one time under the impression that, perhaps, the price asked for this property was a little high, but I have taken occasion to do what my friend

from Michigan [Mr. KELLEY] has not done, and that is to make some investigation as to its value. My friend undertakes to tell you something about the value of property about which I fear he knows little. I would not undertake to place a value on property in any part of his district, and, however good his judgment may be, I do not believe he can correctly value property in my district. He certainly can not determine its value by the price at which it sold in 1912.

Mr. KELLEY of Michigan. Will the gentleman yield?

Mr. HOLLAND. Yes.

Mr. KELLEY of Michigan. Does not the gentleman think the committee reporting this bill ought to have some information about the value of this property?

Mr. HOLLAND. They did; and the same information which I have just given.

Mr. KELLEY of Michigan. But ought not the Committee on Appropriations to have some information?

Mr. HOLLAND. I think the Committee on Appropriations did have information.

Mr. KELLEY of Michigan. You heard what the chairman of the Committee on Appropriations said?

Mr. HOLLAND. I do not recall his statement; but the hearings disclose that this information was before them.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. HOLLAND. Yes.

Mr. MADDEN. Does the gentleman state to the House that the buildings on the grounds are now necessary for the training of sailors for the Navy?

Mr. HOLLAND. The officials say so.

Mr. MADDEN. And are there any buildings there that belong to the Government of the United States?

Mr. HOLLAND. None.

Mr. MADDEN. If they were to train men on these grounds, would they be obliged to build new buildings?

Mr. HOLLAND. Not at once. They could utilize the buildings already there.

Mr. MADDEN. If these buildings were not there?

Mr. HOLLAND. But they can utilize these buildings.

Mr. MADDEN. Where are these men now?

Mr. HOLLAND. Some of them are at St. Helena and some are waiting to be called.

Mr. MADDEN. Have they got buildings where they are now?

Mr. HOLLAND. Yes; but they are not sufficient.

Mr. MADDEN. And the gentleman's contention is that they need the additional buildings to house the men who are being trained for the Navy?

Mr. HOLLAND. Yes. The number now enlisted is larger than ever before.

The SPEAKER. The time of the gentleman from Virginia has again expired.

Mr. HOLLAND. This is a proposition in which my district is interested and almost all my time has been taken up by questions. I ask for more time.

Mr. SHERLEY. I yield to the gentleman five minutes more.

The SPEAKER. The gentleman is recognized for five minutes more.

Mr. KELLEY of Michigan. Why would it not be feasible, inasmuch as these buildings are unoccupied, to lease them to the Government?

Mr. HOLLAND. These people offered to lease the property to the Government sometime ago, and the authorities said they could not afford to make the desired improvements on the property if they should lease it, and that they did not care to lease it unless it could be improved. They would need the pier provided for in the amendment, and were unwilling to build it on leased premises.

Mr. MEEKER. I should like to hear the gentleman reply to the assertion made by the gentleman from Michigan [Mr. KELLEY] as to the location of this site that he considers unavailable.

Mr. HOLLAND. I have answered that question.

But, gentlemen of the House, as I said to you in the beginning, neither I nor my people want this Government to pay more for this property than it is worth. If you believe the price charged therefor is too high, then let it be condemned. The Government can acquire it in that way, and that is the course usually followed when the price can not be agreed upon.

The SPEAKER. The time of the gentleman from Virginia has expired.

Mr. SHERLEY. I yield to the gentleman one minute more.

Mr. HOLLAND. If you prefer to follow that course, I will promise you that you shall have a fair jury to determine its value. A strong sentiment prevails in the community in favor of its acquisition by the Government and I do not believe a jury selected for this purpose will assess its value too high. But if for any reason the jury should fix the price too high, the Government can refuse to pay the price and can decline to take the property. Or I will submit to any other fair method you may suggest to determine its value. I can not do more than this.

I am not advocating this purchase because this property is located in my district. The Government should not purchase it unless it needs it. But I am convinced that the Government should secure the only available site on Hampton Roads for a naval operating base while it has an opportunity to do so. I believe the nearness of the proposed base to Chesapeake Bay and its waters, which all of our naval experts have declared must be considered in every plan of national defense, its nearness to the Norfolk Navy Yard, the Government's primary repair base for the ships of the fleet, its nearness to other Army and Navy activities, its accessibility to the fleet at all seasons of the year, its value as a place for assembling and training troops, and its suitability for a great operating base for the Navy makes its purchase at this time especially desirable. But I do not ask its purchase for this reason. Our naval experts have advised us that they need it for the proper conduct of the war, and need it at once.

Secretary Daniels, Assistant Secretary Roosevelt, Admiral Benson, Capt. McKean, Admiral Harris, Admiral Palmer, Admiral Taylor, Paymaster Gen. McGowan, and Surg. Gen. Braisted have urged the immediate acquisition of this property.

I am willing to be guided by their recommendations and to give them what they declare the Navy urgently needs for the proper conduct of the war. They are supposed to know more about the needs of the Navy than we do, and I am unwilling to withhold from them anything which they declare is urgently needed and will contribute to their success. They are expected to make this fight, they are expected to win our victories, and I can not understand why any man is willing to place his judgment against the judgment of every naval expert in the department. [Applause.]

Mr. SHERLEY. Mr. Speaker, I yield 10 minutes to the gentleman from Ohio [Mr. BATHRICK].

Mr. BATHRICK. Mr. Speaker, the acquisition of this property will not add one ounce of strength to the battles we are about to fight in this war, and everybody that knows anything about it knows that that is true. Now, why should we not consider this matter in the right way? Why not have it referred to a committee and thoroughly gone into and considered by that committee in the way bills are usually considered? Let them come in and give this House all the facts. None are given here sufficient on which to base sound judgment.

The gentleman from Virginia [Mr. HOLLAND] is interested in this proposition, he says. I know that it is only the interest of a Representative of his district doing his duty to his constituents.

Mr. HOLLAND. Let me say to the gentleman that I have absolutely not a cent of interest in it.

Mr. BATHRICK. I did not accuse the gentleman of that. I would not, for I have the highest respect for him. But his earnestness in behalf of his district is the reason for his enthusiasm for this purchase. He is for such reason on the side of the sellers, but we can not take the sellers' judgment in regard to this proposition. We should have it properly investigated by men who have some knowledge of these matters, and not done on the floor of the House. It can be done without in any way interfering with the work of the Navy Department. If the Navy Department decides that it wants it, the property can be bought at a right price. Included in the property are many building lots that have been sold, as alleged, for certain prices. I have been in the real estate business, and, while I do not know that it is true in this case, I know of at least one instance and have knowledge of others where, scenting the possibility of a Government purchase, prices went up overnight, and fake lot sales were made in order to establish a price to give enormous profits and help to skin the Government. I do not know what the price of these lots is, but let us find out. We can not find out here to-day, and there is no knowledge upon which we can place a just estimate of the value on this property.

The gentleman from Virginia says that the people locally are all in favor of the Government buying this property. Of course they are. It is on the same principle that a community is always in favor of the Government creating or improving a harbor or putting in any great public work. It increases the value of surrounding property, and so, of course, they are in favor of it, but we can not take that as a standard by which to determine the value of this property.

Therefore I say that we should vote this amendment down. The chairman of the Committee on Naval Affairs, on the 1st of December, 1916, but a short time ago, said, referring to the

people who came before the committee to try to sell this property:

They said that if we would cancel a million or more dollars that they owed the Government and give them a million and a half that we could have this property, but upon investigation we found they had paid but $250,000 for it, so they were, indeed, very generous in their proposal to us. The buildings would not amount to anything. There are some few of them right down in there [indicating]. A lot of the houses there were stucco work.

Mr. BUTLER. Who made that statement?

Mr. BATHRICK. Chairman PADGETT.

Mr. BUTLER. The chairman of the Committee on Naval Affairs?

Mr. BATHRICK. Yes. Mr. PADGETT says that the first he heard of it was that a lobby came from Jamestown after they had bought the property for $250,000 or $240,000, and began to talk about the enormous value of it to the Government. The Navy Department never heard of it or thought of it before. The lobby came from Jamestown and insidiously, bit by bit, probably instilled into the minds of the Navy Department and some of the officers that this would be a beautiful place for them to have for recreation, for Government and training purposes. That is the way the whole thing started—through a lobby from Jamestown, and the lobby has been continuously at work, as near as I can find out, from that moment to this.

Mr. HOLLAND. Mr. Speaker, will the gentleman yield?

Mr. BATHRICK. Yes.

Mr. HOLLAND. I know the gentleman wants to state the facts correctly, and he is attempting to state the facts. Some time ago these people offered to lease this property to the Government, and they offered to sell it. It is 12 months or more ago.

Mr. BATHRICK. Yes.

Mr. HOLLAND. And the Government turned them down, and said that it did not want it at that time.

Mr. BATHRICK. Then, why in Heaven's name should they want it now?

Mr. HOLLAND. One moment. They declined to purchase it at that time, because they felt they were not getting some of the improvements to which they were entitled. Subsequently, without any intimation from the people in Norfolk, they were sent for by the Navy Department and asked to submit a price.

Mr. BATHRICK. I do not know whether they were sent for or came voluntarily. I know they have been on the job.

Mr. HOLLAND. I know they were sent for.

Mr. BATHRICK. I will take the gentleman's word for that. The fact is that this was started by a lobby who had bought this property for a low price and who wanted to sell it for a high price. I have no idea how they put this over on us in the Senate, and I have no doubt that the conference committee fought valiantly to prevent its being put into this report, but it is up to the Members of this House to protect the people of the United States, who are being bled white with taxes; and if we do not do it to-day and assert our authority and power on the floor of the House, these things will come along one after another, and they will afford other people opportunity and encouragement to proceed without let or hindrance to rob the Government in a thousand other ways. The door will be thrown wide open. Let us make an example of this case to-day and show the people of the country that we are not going to permit legislation that looks so much like graft as this does on the face of it to pass through this House any longer. [Applause.] These pieces of easy money that flow through this House on the pretense of being war measures should be stopped. Some one must serve notice that even big and useful bills must come clean if they want to get by here. [Applause.]

Mr. SHERLEY. Mr. Speaker, I yield five minutes to the gentleman from Tennessee [Mr. PADGETT].

Mr. PADGETT. Mr. Speaker, in 1912 this proposition was before the Naval Committee of the House the last time, and at that time the proposal was to sell to the Government 328 acres, which was the Jamestown part of the present proposal. The present proposal is to sell 440 acres. The additional 112 acres are what is known as Pine Beach, and that is the part that is near the deep water and gives the approach to the deep water. In 1912 the conditions in the country and in the Navy were very, very different from what they are now. At that time it was not regarded as a proposition that was overpowering in its demands that the Government should possess it. It seems to me that conditions now not only justify but call upon the Government to acquire the property. In the bill of August 29 we increased the permanent strength of the Navy from 51,500 men to 93,000 enlisted men. We have temporarily increased that to 150,000. We increased the Marine Corps from a little less than 10,000 to 17,400, and we have increased that temporarily to 30,000. We also provided in the August bill for an enormous building program. Every one understands and must appreciate that the enlarged program calls for more ships, and enlarged personnel of the Navy from 51,500 to the present authorization of 150,000, and in addition to the 150,000 a little more than 10,000 coming in from the Naval Militia and 25,000 additional from the Naval Reserve, so that with the 30,000 added in the Marine Corps we would have 210,000 men where before we had but 61,000.

Mr. KELLEY of Michigan. Mr. Speaker, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. KELLEY of Michigan. How many additional men are at the Norfolk training station now?

Mr. PADGETT. I could not tell the exact number.

Mr. KELLEY of Michigan. Ten or twelve thousand?

Mr. PADGETT. I do not know. They have quite a number there. I have not looked into it.

Mr. KELLEY of Michigan. If we are going to buy land at a cost of $1,400,000 to train 10,000 men for the seas, how much is it going to cost us to train 1,000,000 men for the Army?

Mr. PADGETT. The Army cost is going to be fabulous, but the fact that the Army cost is going to be high does not justify the argument that we should not make every preparation for the development and training of the men of the Navy. What is the situation to-day? We are enlisting men in the Navy to-day and administering to them the oath, and sending them to their homes, or allowing them to remain at their homes until we can provide places where they can be taken care of and trained. That is the condition that is actually confronting us at this moment.

Mr. BATHRICK. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. BATHRICK. Are we using a single battleship and are we liable to use a single battleship out of Yorktown Harbor in the next year in this war?

Mr. PADGETT. I do not know how much we are going to do. We have thirty-odd down there trying to develop the men on them, 1,300 men on a battleship, and on others we have 800, running from 800 to 1,300 to a ship, and as soon as we train them we distribute them on the merchant ships and on the smaller vessels and supply these places with untrained men in order that we may properly develop our sailors.

Mr. BATHRICK. They all have to be trained on a battleship.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FITZGERALD. I yield the gentleman five minutes additional time.

Mr. BUTLER. I would like to ask our chairman a question.

Mr. PADGETT. Yes.

Mr. BUTLER. Will not the chairman bear me out in this statement, that there is no one on the Committee on Naval Affairs who ever thought well of this proposition?

Mr. PADGETT. I will say to the gentleman it never addressed itself to me as an urgent——

Mr. BUTLER. Nor to the rest of us.

Mr. PADGETT (continuing). As an urgent matter when we had it up in 1912, because at that time the condition of the Navy was very different, and, to be entirely frank with the gentleman, I thought they were asking too much for it.

Mr. BUTLER. Why did not the chairman call his committee together and have us consult with him? It amazes me that the gentleman should reverse himself, because last December the chairman was opposed to it.

Mr. PADGETT. It has not been before us since 1912.

Mr. BUTLER. It appears here in print——

Mr. PADGETT. We have not considered the matter officially with a view to purchasing it since 1912.

Mr. MANN. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. MANN. Does the gentleman think it good policy for Congress to make purchases of this sort, which come within the jurisdiction of the Committee on Naval Affairs, without having the Committee on Naval Affairs consider it at all? The gentleman says it has not.

Mr. PADGETT. I think it would have been well, but I must say to the gentleman that the rules of the House do not address themselves to my business judgment. I think the matters that are regarded as deficiencies in this legislation should have been sent and distributed to the various committees that deal with them. Naval matters should have gone to the Committee on Naval Affairs and military matters to the Committee on Military Affairs and post-office matters to the Committee on Post Offices and Post Roads, and so forth.

Mr. MANN. Oh, the gentleman must know this is a Senate amendment.

Mr. PADGETT. The rules of the House carry——

Mr. MANN. This matter was not addressed to any committee of the House; it is a Senate amendment.

Mr. PADGETT. But before it became a Senate amendment it was sent down as an estimate by the department, and was in the House, under the rules, referred to the Committee on Appropriations.

Mr. MANN. Fraudulently sent as a deficiency estimate—and everybody knows it was not a deficiency estimate—and in violation of the rules of the House.

Mr. PADGETT. I do not know just who originated the estimate, but it is one that is needed.

Mr. BUTLER. Will my chairman yield to me again?

Mr. PADGETT. Yes, sir.

Mr. BUTLER. Now, the chairman will recall with great distinctness the discussion that we have had over this proposition for many years and how unfriendly has been the feeling in the committee to it. Can not the chairman make some suggestion by which this property can be acquired, if it is absolutely necessary to be acquired, at a figure that he, I, and everybody else would think it right? Why can not the chairman suggest here now to us some plan, some legislation, some method by which the Government may acquire this property if it deems it necessary, and afterwards Congress will be satisfied that the country has been dealt with fairly, and not acquire it by paying $1,400,000 plump down for it? It is too much.

Mr. PADGETT. As I stated a moment ago, 328 acres was offered in 1912 for $400,000. Now, there are 112 acres additional, making 440, and those 112 acres is the Pine Beach water-front property.

Mr. BUTLER. What is it worth?

Mr. PADGETT. I do not know.

Mr. FREAR. Will the gentleman yield right at that point?

Mr. PADGETT. I do not know values.

The SPEAKER. To whom does the gentleman yield, if to anybody?

Mr. PADGETT. I yield to the gentleman from Pennsylvania, my colleague.

Mr. BUTLER. Let me appeal to my chairman to help us out here. Do not let us have this put upon the Government unless it is necessary, and I do not know whether it is or not; but if it is necessary, in order that the Government should pay only what it is worth, can not we contrive some method to help the Navy Department and at the same time not attempt to dump it upon Congress, because we know nothing about the figures? I am not unfriendly if it is necessary, but I do not want it said hereafter that we aided and assisted in taking from the Government what we ourselves know is too much to pay.

Mr. PADGETT. I said to the gentleman, I have felt the price asked was too much.

Mr. FREAR. Will the gentleman yield in that connection?

Mr. PADGETT. In just a moment. I am frank to say I am not familiar with prices or values of water-front land. When you put in 112 acres that is water front, deep water, and add it to land that does not have a water front, I am not prepared to say what is the value of it.

Mr. FREAR. Will the gentleman yield at that point?

Mr. PADGETT. Yes.

Mr. FREAR. Here is the question that is before the House now, the question of paying over $600,000 for buildings which I understand the chairman has said are of no value—that is, the chairman who is now speaking—on the 1st of December, 1916. Let me ask if that is not correct. As I understand, the gentleman says the buildings will not amount to anything; that they are largely to stuccowork.

Mr. PADGETT. I have not regarded the buildings—that is, in the aggregate—of the kind that we would require. There are a number of the buildings that would be valuable.

The SPEAKER. The time of the gentleman has expired.

Mr. BUTLER. Mr. Speaker, I ask unanimous consent that the gentleman may have two minutes in which to answer my question.

The SPEAKER. The gentleman from Kentucky [Mr. SHERLEY] has the time.

Mr. SHERLEY. I yield one minute to the gentleman.

Mr. BUTLER. The gentleman has seen the property, but I never have. I have had my impressions from the gentlemen who compose the Committee on Naval Affairs. I never went to look at it. But the chairman knows, and we all know, that those buildings are worth but a small fraction of $600,000, and that in the estimate of $1,600,000 that amount ought in fairness to be deducted. Is not that true?

Mr. PADGETT. Personally, I do not think the buildings are worth $600,000.

Mr. FLOOD. That is not in the estimate.

Mr. BUTLER. Is it not?

Mr. FLOOD. Not at all.

Mr. KELLEY of Michigan. Six hundred thousand dollars.

Mr. FLOOD. They said it was worth that.

Mr. KELLEY of Michigan. The gentleman knows very well that it is a part of the cost.

Mr. FLOOD. I know very well it is not a part of the cost.

Mr. KELLEY of Michigan. It is a part of the cost.

Mr. FLOOD. Nothing of the kind.

The SPEAKER. The time of the gentleman from Virginia has again expired.

Mr. FITZGERALD. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has five minutes left.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent that my time be extended one hour.

The SPEAKER. The gentleman from New York asks unanimous consent that his time be extended an hour. Is there objection? [After a pause.] The Chair hears none.

Mr. FITZGERALD. Mr. Speaker, I yield 10 minutes to the gentleman from Virginia [Mr. FLOOD].

Mr. FLOOD. Mr. Speaker, I think there is a good deal of misunderstanding about the property that is to be acquired by this appropriation. There is in the House very considerable opposition, as well as prejudice, to the old Jamestown company and the acquisition of the property owned by that company. That exposition was not a great success, and some Members who voted for an appropriation for it have been prejudiced against everything connected with the Jamestown Exposition. I share that feeling to some extent myself. But this proposition is to buy property for the benefit of the Government in this war emergency—property which the Secretary of the Navy, Admiral Palmer, Capt. McKean, who was especially designated to investigate it, and the Surgeon General of the Navy say is admirably suited for this emergency and is absolutely necessary to maintain the health of the men in the Navy.

As to the property itself, there are three pieces of property to be acquired by this appropriation, and some of it was never owned by the Jamestown Exposition Co. This acquisition will embrace not only the old Jamestown property, which was bought in by the creditors, but other very valuable property. The exposition property was bought in by the creditors for $240,000 in 1912. The liens on the property were something like $800,000, and it is stated by people who are familiar with the circumstances surrounding the sale, and I can vouch for those who made these statements, that it would have brought more than $240,000 but for the fact that everyone in the community knew that the lien holders could and would bid more than anyone else, as they held liens beyond what the property was worth.

In addition to this old exposition property, which is owned by the Fidelity Land & Investment Co. and contains 278 acres, there is a property consisting of 52 acres, upon which handsome dwelling houses are standing. Seven of these houses were built by the States as the State exposition buildings, some of them costing as high as $35,000 and others between $20,000 and $30,000, and some less. But they are all good houses. Other houses have been erected upon that property. Since the exposition over $100,000 has been spent in improving that special piece of property. Then there is the most valuable piece of property in all that section of Hampton Roads, containing 110 acres, known as the Piney Beach property.

The hearings that were had by the Senate Committee on Appropriations show that the owners of the 52 acres are to receive $473,000. The owners of the Piney Beach property, without which the Secretary of the Navy says he would not care for the other two pieces, are to receive $568,000, which would leave only $359,000 for the Jamestown Exposition property held by the Land & Investment Co., for which they paid the $240,000 in 1912.

Mr. KELLEY of Michigan. In order to utilize that water front it is necessary to dredge 1,200 feet out, is it not?

Mr. FLOOD. Some dredging will be necessary.

Mr. KELLEY of Michigan. How much is it going to cost?

Mr. FLOOD. I do not know. But whatever it costs, when they dredge and take the earth up from where they dredge and put it back between these pieces of property they make 600 more acres of land that will be very valuable.

Mr. KELLEY of Michigan. Will the gentleman yield right there?

Mr. FLOOD. I can not. I want to get the proposition before the House.

I learn from this debate that this property has not been occupied. This other property is occupied. The taxes and interest during that five years would amount to ninety or one hundred

thousand dollars, making nearly as much as they are selling to the Government for, if indeed it is not fully as much. These facts do not justify the statements that have been made here to the effect that the owners of this property are unpatriotic and are trying to impose upon the Government.

Mr. MADDEN. The figures just quoted do not include the $600,000?

Mr. FLOOD. The $600,000 was not the price the Government was to pay for these buildings, but was simply an estimate of their value. The Secretary of the Navy stated that the buildings on this property cost $1,500,000, and the naval officers who went there to examine it estimated that the buildings were worth $600,000 at this time.

Mr. MADDEN. The gentleman quoted four hundred and some odd thousand dollars for the Piney Beach property and $350,000 also for some other property, making a total of over $800,000.

Mr. FLOOD. No. I quoted for the private property $473,000 and for the Piney Beach property $568,000, and that leaves about $350,000 for the Jamestown property.

Mr. MADDEN. What about the buildings?

Mr. FLOOD. That includes the buildings and everything; $568,000 for the Piney Beach property, with all the cottages and hotels, and telephone and telegraph facilities, and railroad connections, and everything else—$473,000 for everything on this 52 acres, and $350,000 for the 275 acres belonging to the old Jamestown Exposition grounds, with every kind of improvement on them.

Now, I want to say this as to the uses to which this property can be put. If anybody will take the trouble to look at the hearings he will see that on these lands there will be a training station for 8,000 men, a submarine base, an aviation operating base, coal piers, oil-fuel storage, fleet storehouses, mine and net storehouses, torpedo storehouses, medical storehouses, and for other activities absolutely essential in this emergency, and that their acquisition will be of great value to the Government at this time.

Surg. Gen. Braisted says that without this property it will be difficult to prevent measles, scarlet fever, and other diseases from breaking out in the Navy. He says this property is needed immediately for the protection of the health of the men of the Navy. He also says this location is the best place on the coast for this particular purpose and that it is the cheapest site the Government can get. Secretary Daniels classes the acquisition of this property as of paramount importance in the conduct of this war. He says it is the place for expansion. When you train a man there you take him off the station right onto the ship. This location has been recommended for a naval base not only by Secretary Daniels but by Secretaries Meyer and Bonaparte as well.

Mr. CALDWELL. Mr. Speaker, will the gentleman yield there?

Mr. FLOOD. Yes.

Mr. CALDWELL. Is there any objection to proceeding by condemnation?

Mr. FLOOD. None whatever, and this amendment provides that this land shall be condemned if the Navy Department thinks it can get it for a less price by that method. That has been provided for here.

Mr. OLIVER of Alabama. Mr. Speaker, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. OLIVER of Alabama. How much of the property under condemnation proceedings will be acquired?

Mr. FLOOD. I do not understand the gentleman.

Mr. OLIVER of Alabama. How much of this property will we be required to condemn in order to perfect the title?

Mr. FLOOD. The measure here provides that you can condemn every foot of it.

Mr. OLIVER of Alabama. That is not the question I asked. Part of it must be condemned because of the fact that some of the owners are minors. Can you tell us?

Mr. FLOOD. No. It may be that my colleague [Mr. HOLLAND] can tell.

Mr. MEEKER. Mr. Speaker, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. MEEKER. How long a time will be required in which to do this dredging?

Mr. FLOOD. I do not think that is in the hearings, and not being an expert on those questions I could not undertake to answer.

Mr. MEEKER. Does the gentleman mean to say that by this dredging there will be added 600 acres?

Mr. FLOOD. Yes; 600 acres are now under shallow water, the water not being over 2 feet deep. They will fill that area up and make dry land of it.

Mr. MEEKER. That would be a job after they get rid of the scarlet fever, to make 600 acres of land. [Laughter.]

Mr. FLOOD. They do not propose to dredge it now except to make a larger deep-water front. The Piney Beach property has already a magnificent deep-water front, and that is the property that the Secretary of the Navy is so anxious to acquire; and they want the old Jamestown property for the acreage upon which they can allow the men in the Navy to live, and not keep them penned up in the ships where they will breed disease and destroy the life and vitality and the very virtue of your Navy.

It seems to me, Mr. Speaker, that no man in this House could read the hearings on this proposition and conscientiously vote against this matter. If you want this war conducted efficiently you can not vote against this proposition. [Applause.]

The SPEAKER. The time of the gentleman from Virginia has expired.

Mr. FITZGERALD. Mr. Speaker, I yield three minutes to the gentleman from Wisconsin [Mr. LENROOT].

The SPEAKER. The gentleman from Wisconsin is recognized for three minutes.

Mr. LENROOT. Mr. Speaker, I did not expect to take any time in the discussion of this proposition, but as this debate has proceeded it does seem to me inconceivable that this House is going to adopt this conference report and permit this item with reference to the Jamestown grounds to remain in this bill.

And I want to say to that side of the House particularly that if you shall be responsible for the adoption of this report with this item in it you will begin now an era of extravagance and scandal that we have all hoped would be avoided in the conduct of this war. This proposition can not be defended—the purchase of this property—from the statements of the gentlemen themselves favoring it, under these conditions.

The gentleman from Virginia [Mr. FLOOD], who has just spoken, speaks of the necessity of this property from the standpoint of sanitation. Why is it possible, in the first place, that no other site can be found temporarily to take care of these conditions? And, in the second place, is there such a lack of patriotism on the part of the owners of these grounds that if they need to be used temporarily the Government can not lease them for the purposes desired during the existence of this war?

Mr. HOLLAND. Mr. Speaker, will the gentleman yield there?

Mr. LENROOT. I regret I can not yield. If this item remains in the bill, Mr. Speaker, we can be assured that every item of extravagance that has been sought to be incorporated in bills here in the past will sooner or later find its way into bills of this character, and it will be adopted.

I do not blame the conferees. We all understand the situation that they labored under. But I should be very much surprised if a single one of the conferees whose duty it is to uphold this conference report will not be pleased if this conference report is rejected and they be given instructions by this House to stand out against the incorporation of this proposition in the bill, because then they will have the House back of them, and the Senate conferees will be compelled to yield, as they ought to yield. [Applause.]

Mr. FITZGERALD. Mr. Speaker, I yield 10 minutes to the gentleman from Alabama [Mr. OLIVER].

The SPEAKER. The gentleman from Alabama is recognized for 10 minutes.

Mr. OLIVER of Alabama. Mr. Speaker and gentlemen of the House, I feel constrained to join with others in registering a protest against the inclusion of this large sum in the bill for the purchase of the Jamestown property. It occurs to me that certainly the proposal should be first submitted to the regular committee of this House, and I wish to say that if submitted to the Naval Affairs Committee of the House I feel confident the committee will take action thereon in less than five days.

The Naval Affairs Committee of the House are very familiar with this entire proposition, and the distinguished chairman of the committee [Mr. PADGETT] has fallen into error in stating that this matter has not been before the committee since 1912. If you will turn to the hearings of last December you will find that a number of pages were devoted to inquiring about this very matter, and following that the committee went to Jamestown and spent a day in investigating this very property, and I violate no confidence in saying to the House that, so far as I could learn, there was not a single member of the committee, after such personal visit to and inspection of the property, who felt friendly to the proposed purchase of it. Why, Capt. McKean, who has made a very thorough study and investigation of this subject, stated to the House committee in December last all matters referred to by the distinguished gentleman from Virginia [Mr. HOLLAND]. He further informed us that the depart-

ment had gone so far as to make estimates on the probable cost of the contemplated improvements there; and in response to a question as to what it would cost, he said about $10,000,000. Now, there is no question but what if you now submit this matter to the Naval Affairs Committee of the House they will be able to suggest to the Navy Department two other sites near by that can be purchased, so I am reliably informed, on an acreage basis of something like $200 or $300 per acre, and such sites are well suited for the naval purposes here proposed.

Mr. HOLLAND. Will the gentleman yield for a question?

Mr. OLIVER of Alabama. Yes.

Mr. HOLLAND. Where are the sites?

Mr. OLIVER of Alabama. One site is at Yorktown.

Mr. HOLLAND. Where is the other?

Mr. OLIVER of Alabama. Another site is nearer to Hampton Roads than that; but I do not feel authorized to state now who my informant is, but he is a Representative from Virginia.

Mr. GOOD. Will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. GOOD. The gentleman feels that in purchasing ground for the purposes for which it is anticipated this ground will be used it ought to be on or near a railroad, does he not?

Mr. OLIVER of Alabama. I think so.

Mr. GOOD. The land at Yorktown is about 7 miles from a railroad.

Mr. OLIVER of Alabama. I understand that the Chesapeake & Ohio Railroad runs within 7 miles of a very desirable site at Yorktown, and that before you could make the improvements that are proposed a branch line could and would be built to that point by the railroad.

Mr. GOOD. Two lines, one double track and one single track, go to the Jamestown Exposition grounds, I believe.

Mr. OLIVER of Alabama. The gentleman was at Yorktown a short time since, and I think he saw a very beautiful field there, and was informed that it could be purchased for not exceeding $200 per acre, and a thousand acres secured at such price. It is being used, even now, for training purposes, and my information is that so far as the construction of hospital buildings is concerned, the Navy is prepared to erect suitable buildings for such purposes within 60 or 90 days. If you purchase the Jamestown property, it will require that time to construct hospitals, such as they are now building, and such as they propose to hurriedly build on this particular ground; and if you now purchase another site, you will find they can erect those same buildings in the same short space of time. Other sites can be bought that will be convenient and well suited to a rendezvous for the fleet, and near to where the fleet will go when it comes in from the high seas, as the gentleman from Michigan [Mr. KELLEY] well said.

Mr. FLOOD. Will the gentleman yield to me for a question?

Mr. OLIVER of Alabama. Yes.

Mr. FLOOD. Does the gentleman recall what Capt. McKean said about the Yorktown site?

Mr. OLIVER of Alabama. I do.

Mr. FLOOD. He said it would be——

Mr. OLIVER of Alabama. I do not yield to the gentleman except for a question. Capt. McKean, an officer for whom I have great respect, has been very much wedded to this Jamestown proposition for some time, and if you will read the hearings of last December before the House Naval Committee you will find he discussed it at length with our committee. The chairman of that committee [Mr. PADGETT], when Capt. McKean made his statement, very clearly and forcibly indicated that he was not friendly to the proposal, and did not concur in the views entertained by Capt. McKean. Among other things, while speaking of the buildings which Capt. McKean places a large estimate on, here is what the chairman of the committee said last December:

> The buildings would not amount to anything. There are some few of them down in here [pointing]. A lot of the houses there were stuccowork.

I think every member of the committee was impressed afterwards with the correctness of the chairman's opinion on that point, in so far as their value for the needs of the Navy are concerned, and we went into many of the buildings. Buildings that are constructed, if you please, for exposition purposes are not well suited for housing the men of the Navy, and it is a great mistake for us to encourage the purchase of old exposition grounds, and when we come to place an estimate upon the value of the land to take into account the original cost of the buildings. It has been estimated here, as one of the inducements why we should buy this property, that the buildings are worth $600,000. The chairman said last December, in his opinion, they were worth nothing, and for naval needs I believe that was the conscientious conviction of every member of the Naval Affairs Committee of the House who inspected that property. Who desires to purchase an old frame hotel, built for temporary purposes only and which has been deserted for a number of years, in order to house young men of the Navy? If a fire should break out, possibly you might have some loss of life as a result of housing them in the type of building we went through, which was nothing in the world but a temporary structure. The cold weather of winter will soon come, and then you will not care to house your men in that kind of a structure. If the Army is to build cantonments before September 1 capable of furnishing proper housing for 25,000 men at each cantonment, and at some even a larger number, surely we can find a site, when we are told that there are two comparatively near to Hampton Roads, well suited for naval purposes which can be purchased at from $200 to $300 an acre, and certainly the Navy Department can construct before September 1 buildings suited for housing these young men who are coming into the Navy. It is not proposed to keep them at these training stations very long. Some of you have been at the training station at Norfolk. You would be surprised to see how readily these young men adapt themselves to naval instruction, and after spending a few weeks in training they are sent to the ships. If you build structures at some other point nearby you will get the land cheap, get buildings better suited for naval purposes, and you will save a large amount of money. [Applause.]

Mr. FITZGERALD. Mr. Speaker, I yield five minutes to the gentleman from Mississippi [Mr. SISSON].

Mr. SISSON. Mr. Speaker, it is not possible to go into the details of each piece of property involved in this matter within five minutes. I should not be willing to pay $1,400,000 for this property without the Government having an option to condemn it. I am somewhat familiar with the property in question, having been on it frequently. The reason for the immediate acquisition of the property especially is that there are a number of splendid buildings on the property which can be used by those men who wish to train the young men that will enlist. This old hotel referred to by my friend from Alabama, Mr. OLIVER, is not the old proposition that he would have you believe, but it is a proposition where immediately you can put, according to the testimony before our committee, at least 2,000 young men. If you wish to house them in the galleries in the form of sleeping porches in the summer months, you can possibly get in a great many more than that. This was a hotel built and used by the Monticello Hotel Co., of Norfolk, for exposition purposes. It is well built and in reasonable repair, and is not the mere temporary proposition that the gentleman would have you believe. Now, the Committee on Appropriations declined to permit the Navy or the Army to buy any great quantity of land and acquire title to it, but this is the exception. It was put on in the Senate, and the Navy Department represents that, irrespective of this immediate necessity, the Government will need this property. They have built a belt line from the city of Norfolk connecting with all the railroads going into Norfolk, and also with the water front, which is most valuable to the Navy.

This is not the proposition that was discussed by the Naval Affairs Committee in 1912, but it includes all the property on the water frontage that the Government says they so much need. The old Jamestown property is not the property that the Navy is so anxious to get. The Secretary of the Navy and those connected with the development of naval activities are behind this proposition and not the Jamestown Exposition proposition. They wanted one hundred and twenty-odd acres outside of the Jamestown Exposition property on which the water front is located and which they say they so much need.

This is the most accessible property, according to the testimony of all the naval experts, to the Norfolk Navy Yard. In order to enlarge the Norfolk Navy Yard Congress authorized them to buy right behind the present navy yard 50 acres of land. So that this proposition would enable them to take the men and train them for the ships as they are being built under this enormous building program that the chairman of the Naval Committee referred to. It is proposed by the Navy Department that if this is purchased they can use these buildings and this site immediately, and in the future they can develop it into a magnificent addition to the Norfolk Navy Yard, where they can train the men and have them ready at the time the ships are launched. That is what appealed to me; it is a business proposition.

If the Navy Department should decide—and you must trust somebody; you must trust the officers connected with it—I have no brief to speak for the Navy; but you have intrusted them with the defense of the country, and can not you trust them to buy this little piece of land? If they want you to pay too much for it, can not you condemn it? Have you no confidence in your Federal courts? Because the Federal court would

condemn this land under the condemnation law of the State of Virginia; and are you not willing to trust your Federal courts? You have got to trust somebody, and if you can not trust the Navy Department and you can not trust the Federal court, in God's name who can you trust? If you can not trust the Navy Department, get a new Navy Department.

A MEMBER. How are we going to do it?

Mr. SISSON. It is not the Secretary of the Navy, it is these men who would be connected with the Navy if you Republicans were in power. The Secretary of the Navy has nothing to do with these matters except to approve of what has been done by the experts that have been sent out. Mr. Daniels has been pretty saving along some lines, so much so that a great many people have complained vigorously.

Mr. BURNETT. Will the gentleman yield?

Mr. SISSON. Yes.

Mr. BURNETT. Does the Navy Department indorse the infamous, outrageous price that they want for this land, and does the gentleman think it is a fair price?

Mr. SISSON. To be perfectly frank with the gentleman, I do not know whether it is a fair price or not.

Mr. BURNETT. The gentleman never saw it?

Mr. SISSON. Yes; I have been all over it, but I do not know whether this is a fair price, because I do not know the property values down there.

Mr. HAMILTON of Michigan. Then, how do we know who never saw it?

Mr. SISSON. These men down there know what it is.

Mr. HAMILTON of Michigan. Does the gentleman know what the assessed value of the property is?

Mr. SISSON. I do not know. There are several hundred pieces of property there; some are assessed, as I understand, at 50 per cent, and that is what they offered to sell this for.

Mr. HAMILTON of Michigan. But the gentleman is telling us all about this.

Mr. SISSON. If the Government wants this property, they can condemn it if the price is too high. You have got to trust some one. [Applause.]

The SPEAKER. The time of the gentleman from Mississippi has expired.

Mr. FITZGERALD. I yield five minutes to the gentleman from Minnesota [Mr. MILLER].

Mr. MILLER of Minnesota. Mr. Chairman, one of the reasons urged against the adoption of the conference report at this time is that this subject matter more properly belongs to the Committee on Naval Affairs. At the outset, when we began to legislate and pass appropriation bills at this extra session, that argument had a lot of force with me, but very soon it was apparent that the Committee on Appropriations was in a position to act and was acting on matters connected with the war generally. So this seems to fall in the general category, and the argument rather loses its force. One of the other reasons urged against the adoption of this item in the conference report is that the price is perhaps too high. No one presumes to know what the exact price ought to be, but it is suggested that perhaps it is too high. I have taken the trouble, and it has been an interesting piece of trouble to me, to read the hearings before both the House and Senate committees upon this subject. I find on page 11 of the Senate hearings this statement, made by Capt. McKean:

> I will say that if the Navy Department ever endeavored to keep the price down on anything they have done it on this.

That indicates that the Navy Department has been making a strong and vigorous effort to get the price down to a very reasonable basis, and that statement is followed in a moment or two by one from the Secretary of the Navy, who says that when this project was first broached to him it was proposed at $2,000,000, and he said that he never would recommend it; he thought that price too high, and he stood pat on that proposition for a long time, apparently several years, until finally by a great deal of effort the price has been brought down to that which is now proposed, something like $1,400,000, which he says is fair and just. It seems to me that we ought to be guided by the judgment of some one in a matter of this kind. We have here the statement of the Secretary of the Navy, the responsible man in charge, who gives the history of the negotiations relative to it and his best judgment upon it. Then we have the statement of a captain in the Navy who was especially appointed to make a complete investigation of the subject matter, and we have his conclusions. It seems to me that we can not go far astray, even when we are guided by the principle of economy, if we follow the men qualified to speak, and whose judgment we ought to take.

Mr. MEEKER. What would the gentleman say about the estimate put at $600,000 on the buildings, which the chairman of the Naval Affairs Committee said he did not think were worth anything?

Mr. MILLER of Minnesota. Perhaps the chairman's judgment is at fault in that respect. I do not know. He says they are worth nothing and another man says they are worth $600,000.

Mr. MEEKER. Those whole exposition buildings were constructed of stucco.

Mr. MILLER of Minnesota. I do not know anything about that.

Mr. FLOOD. Some of them are of brick.

Mr. MILLER of Minnesota. We have got to be guided largely by the testimony before the committees of the House and Senate, and that is the way we legislate on pretty nearly everything, and gentlemen need not tell me that we do not, for I know we do.

Mr. KELLEY of Michigan. Mr. Speaker, will the gentleman yield?

Mr. MILLER of Minnesota. In a moment. I want to make one more statement. Nobody, however, has had the temerity, as far as my notice has gone in this debate, to say that this piece of ground is not needed and is not the best piece of ground to be found for the purposes desired. We are engaged in war, as everyone knows. It is our purpose to prosecute the war vigorously. Everyone who has inquired into the subject knows that there are a large number of young men who are recruited for the Navy who to-day have no place to go. There is no place provided for them, for their training. There are some in my town and some in your town and some in everyone's town, waiting to be assigned to a place for training. To my mind, the vicinity of Hampton Roads is the ideal spot for a large naval training station. The testimony is that these three tracts of ground are the best possible ones for the needs of the Navy. They have a value to the Navy that no one questions. That value is a great value. Even if this price is fairly stiff, though I do not admit it is from the standpoint of real estate, it is not stiff at all from the standpoint of the value of the tracts to the Navy. This sum here invested will be the best investment for the Navy, and that principle should guide us.

The SPEAKER. The time of the gentleman from Minnesota has expired.

Mr. FITZGERALD. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, it has been stated on the floor that the Secretary of the Navy and the Surgeon General of the Navy have said that it is imperative, absolutely essential, that the Government buy this site. If the Secretary of the Navy ever made such a statement and if the statement is true, then we are in a sorry condition in this country if in order to train men in the Navy we have to buy a particular piece of land at a particular place in the United States and pay the price that the owners may demand, no matter how outrageous the price may be. In behalf of the Secretary of the Navy and to protect his judgment I deny that such a statement was ever made by him. What is the situation? In the expenditure of the billions of dollars in this war we are going to be many times confronted with propositions involving graft. There are very many enterprising people throughout the United States who may be patriotic, but who will still endeavor to make something on the side out of this war, and our motto ought to be, "Billions for the war, but nothing for graft." [Applause.]

If this matter came before the House in the ordinary way, I would defer my judgment to the judgment of the committee; but it is here. It was submitted in the first place to the Committee on Appropriations, and that committee rejected it. The Senate added it as an amendment, although it is not a deficiency matter. The conferees have agreed in conference and frankly have told the House that they have no special information upon the subject, and that it was for the House to act as the House pleases. The proper committee to determine these matters is the Committee on Naval Affairs. That committee has been in continuous session for the last two or three years, most of the time when Congress was in session. There has been every opportunity for the Committee on Naval Affairs to consider this proposition. There has been opportunity at this session for the Committee on Naval Affairs to consider the proposition, and there will be plenty of opportunity between now and the end of the session for the Committee on Naval Affairs to consider the proposition. We ought not at the beginning of this war to adopt any plan which is suspicious of graft. The conference report may properly be rejected. This item may go out of the bill, and if the Navy ought to have

this site or some other site for the purpose, let the matter be brought before the proper committee of the House and the good name of the Members of the House protected against the effort of men who, whoever they may be, are seeking to sell this property to the Government to make money for themselves, not for the protection of the Government. [Applause.]

Mr. FITZGERALD. Do I understand the gentleman from Illinois [Mr. MADDEN] desires to ask some questions?

Mr. MADDEN. Mr. Speaker, I wish to ask the gentleman from New York some questions. On reading the hearings before the Committee on Appropriations in connection with the work of the Advisory Council of National Defense I find the names of committees in charge of various activities of the country and learn from the hearings that recommendations are made from time to time by subcommittees of the Council of National Defense to the Secretary of War and the Secretary of the Navy and other members of the Council of National Defense with respect to purchases of supplies and the letting of contracts of various kinds. Among the committees I find the name of William H. Childs, president of Barrett Co., 17 Battery Place, New York, who is chairman of the coal-tar by-products committee. He seems to be the only member of the committee. I am desirous of ascertaining from the chairman of the committee on appropriations if the Barrett Co. is engaged in road building as a part of their activities?

Mr. FITZGERALD. They make all sorts of coal-tar products

Mr. MADDEN. Are they engaged in road construction, engineering work?

Mr. FITZGERALD. I do not know that.

Mr. MADDEN. I have been told, whether the information is correct or not, that contracts for all the roads to be built through all the cantonments have been let to the Barrett Co., of which Mr. Childs is president and also chairman and sole member of the committee on coal-tar products in the Council of National Defense, and I understand that the business of the Barrett Co. is to manufacture coal-tar products, a commodity which is used in making up a part of ingredients in the construction of roads, and if the information which I have received is true, it seems to me that is a violation of every rule that should guide the men who happen to be for the present moment giving their time in a voluntary way and without expense to the Government of the United States in shaping the war policies of the country.

Mr. FITZGERALD. Mr. Speaker, statements were made at the end of the last week that a contract had been made with the Barrett Manufacturing Co., commonly known as the Coal-Tar Products Trust, for the building of all roads in cantonments to be provided for the Army. I called upon the Secretary of War and stated the rumors which were afloat regarding that. He immediately took the question up and has sent me a note, which I shall be glad to read, as it contains the information. The note is as follows:

WAR DEPARTMENT,
Washington, June 5, 1917.

MY DEAR MR. FITZGERALD: I spent a good deal of time yesterday with Col. Littell and his associates considering the question of cantonment construction. I find that no contracts have as yet been let for the proposed cantonments to the Barrett Manufacturing Co. Some weeks ago when the subject of road building was first under consideration, it was referred to a committee of two or three officers in the Regular Army in the Quartermaster Corps. They studied the problem and finally decided that, in view of the fact that the Barrett Co. had agencies all over the United States, it probably would be in the best condition for the rapid assembling of local forces for the construction of roads, and a tentative arrangement was made by which the Barrett Co. agreed to do whatever work it might be called upon to do of this character, on such terms as should be fixed by the advisory committee of the Council of National Defense having the matter in charge and approved by the Quartermaster General. There was no suggestion that all of these roads should be built of tarvia or other Barrett Co. products. Nor, indeed, had any of the details of the thing been worked out beyond the general offer of the Barrett Co. to hold itself in readiness to do whatever it might be asked to do, on whatever terms might be fixed. A further study, however, made it apparent that local agencies could be relied upon to a very large degree and that the Good Roads Bureau of the Department of Agriculture could also be of great assistance.

The whole matter is, therefore, open, and no such contracts as seem to be under discussion have as yet been entered into.

Cordially, yours,

NEWTON D. BAKER,
Secretary of War.

Hon. JOHN J. FITZGERALD,
House of Representatives.

Mr. MADDEN. Well, I am very glad to know the Secretary of War has taken the question up and to learn from the letter that there is no contract let yet, but it seems rather curious that Mr. Childs, president of the Barrett Co., chairman and sole member of the committee having charge of the purchase of coal-tar products in the Advisory Council of National Defense, should be in a position where he can even suggest the purchase of commodities that are made by him or his company. In the first place the Barrett Co. are not road builders. They know nothing whatever about building roads. They are engaged in selling coal tar, as a part of the covering of the surface of roads, to men who are engaged in the engineering side of road building, and why any thought should be given consideration looking to the letting of contracts to this company I presume is because Mr. Childs happens to be the chairman of the committee and the sole member of the committee, and it is the only committee of the Council of National Defense that has a single member. He happens to be the chairman of the committee and all the other members of the committee combined, and he happens to be president of this company, the Barrett Trust, which makes coal-tar products, a company which knows nothing whatever about the building of roads; and I am very glad the Secretary of War has so far reconsidered the proposal of allowing the Barrett Co. to build the roads as to say he is going to take counsel upon the subject before the contracts are let.

Mr. MANN. Mr. Speaker, I brought this matter to the attention of the House the other day and suggested then that the Secretary of War should write a letter. Now, as I understand the letter the gentleman read, it is to the effect that the Secretary of War has let no contract. Does he deny he has made an arrangement with these people?

Mr. FITZGERALD. He states——

Mr. MANN. I will say to the gentleman, in passing, the Secretary of War could not let a contract for the construction of these roads throughout the United States——

Mr. FITZGERALD. The Secretary of War says that the Barrett Co. had offered to hold themselves in readiness to do such work as they might be called upon on such terms as should be fixed by the advisory committee of the council having the matter in charge and approved by the Quartermaster General, and he stated further that he believes now that it is apparent that local agencies can be relied upon, and the Barrett Co., I think, have 40 plants, located throughout the United States.

Mr. MANN. Not road-building plants.

Mr. MADDEN. They are coal-tar plants.

Mr. FITZGERALD. They are materials plants.

Mr. MANN. As I understand, the Secretary of War, under the new arrangement, practically orders contracts to be made where contracts are made at the suggestion of the Council of National Defense, without exercising any special advisory power, which, of course, he would have the authority to exercise; and I have no criticism of the Secretary of War; but if it be true that a committee of the Council of National Defense which passes upon this matter consists of an officer of a company who got the contract, the Secretary of War will certainly have a rude awakening from the idea that he can depend upon the Council of National Defense to recommend contracts to him.

Mr. FITZGERALD. I stated to the Secretary the information that has been referred to.

Mr. MANN. I made the statement on the floor of the House, and called the gentleman's attention to it the other day.

Mr. FITZGERALD. Everybody does not read all of the gentleman's statements in the RECORD.

I stated all the facts to the Secretary. He was not familiar with the matter at all. Necessarily he would not be; but he said he would at once go over it with the advisory commission, and take the matter up.

Mr. MANN. I think we have a right to know whether, under the present arrangement, the Secretary of War is going to permit the Council of National Defense to tell him what contracts to make and make contracts in great bunches instead of scattering them about, and those contracts may be made on the recommendation of the man who has the company that gets the contracts. I do not know whether that is the fact or not, but we want to know it here.

Mr. FITZGERALD. I have given all the information I have. "Further the deponent saith not."

Mr. MADDEN. I just wish to say to the chairman of the Appropriations Committee, I hope they will continue to investigate as to whether or not contracts are being let to the men who are in charge of the subcommittees of the committees of the Council of National Defense to the exclusion of people who are engaged legitimately in that kind of business which their education qualifies them to perform? The Barrett Co. has no qualifications whatever, no facilities whatever, no experience whatever in the matter of road building.

Mr. CANNON. Mr. Speaker, I would like to have five minutes.

Mr. FITZGERALD. How much time have I, Mr. Speaker?

The SPEAKER. The gentleman has 16 minutes remaining.

Mr. FITZGERALD. I yield five minutes to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. Mr. Speaker, I have listened to the debate about the Norfolk proposal. It seems to me to come very strongly recommended, but I have no opinion about it. I apprehend, however, that if it is necessary to have it, what, if anything, remains of the $100,000,000 emergency fund could be had either for lease or purchase or improvement, in the discretion of the President. I do not care to talk further about that.

Now, I am interested about the work of the Council of National Defense, consisting, I believe, of five Cabinet officers, and also in the work of the advisory committee, headed by Mr. Willard, who, I believe, is president of the Baltimore & Ohio Railroad, and composed of quite a number of other gentlemen. I have forgotten how many were placed upon it, but they have many suborganizations, as I understand. And, if I understand, the function of this advisory board is to obtain men, who seem so far to have been obtained without compensation, that know something about matters that they investigate. This is work that has to be done under stress. Now, an Army officer—and I have great admiration for an official of the Government of the United States, whether he be in the Army or the Navy—knows just one thing, and that is that he can advertise as the law provides after he has got his plans and specifications. Then the bids come in, and then the clerks go to work and analyze and make a report. Then the lowest and best bidder gets the contract, giving a bond, and if he does not come up to the stipulations of the bond there is an action on the bond, and so on.

But this is under an emergency and war measure stress. Now, let us be fair amongst ourselves. We get requests from our constituents asking us to try to put them in touch with the War Department. And they have received information that it is necessary for them to make their application to the Council of National Defense as to their capacity to do the emergency work and receive their hearing, and then to get the recommendation if they can. There is a general idea in some parts of the country that this advisory council lets contracts. But it does not. If it performs its function it will ascertain the facts with all the diligence the emergency will allow and report them to the War Department. So far as I know or believe, they have exercised this function with celerity and dispatch.

Now, I have constituents that would like contracts. I apprehend that my colleagues may have constituents that would like contracts. It is very proper for them to try to see and for me to try to see that what is done is done in fairness. But if you are going to shut out every man from being upon the advisory council who has ever had any experience or that may be interested, directly or indirectly, in certain lines, you will have a pretty gay time in doing emergency work. [Applause.]

Mr. MADDEN. Will my colleague yield to me?

Mr. CANNON. Certainly; with great pleasure.

Mr. MADDEN. My colleague would not think it was going to embarrass the Council of National Defense to prevent any one member of the Council of National Defense letting contracts for a line of work in which he was not engaged in the company of which he was president, would he?

Mr. CANNON. As to that, I do not know this man——

Mr. MADDEN. Neither do I.

Mr. CANNON. I do not know whether he knows anything about roads or not. I do not know his capacity. Somebody said he had 40 establishments scattered all over the country—and I believe the gentleman—and that he manufactured coal tar. What you want in these contracts is not a bond. You want somebody that will do the emergency work and do it on time, of course giving bond, but has the capacity to do the work and will do it without regard to the bond. What is desired is to have the work without a lawsuit on the bond. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. FITZGERALD. Mr. Speaker, the House has been discussing the item in the bill that is referred to as the "Jamestown Exposition site." The Jamestown Exposition site appears on this map colored in blue and red. In this tract colored blue and red there are 325 acres; 275 acres in the red, and 52 in the blue. That part of the land that is marked blue is land which has been sold to private purchasers and improved to some extent by the erection of private dwellings. The land on the left side of the map, on the left of the Jamestown site, and which faces out on deep water, is known as the Pine Beach property and consists of 106 acres. It is believed that over 300 acres can be obtained by filling in, out to the bulkhead line.

The price expected to be paid for the property in red, which is now held by the Fidelity Land & Investment Co., which, I understand, is the old Jamestown Exposition Co., representing its interests, is $450,000. The price for the land in blue is $473,000, and the improvements are estimated to be worth $186,975, while for the land of the old Pine Beach property the price is $568,500, and the improvements are estimated to be worth $241,500. The Jamestown Exposition site has water front, but is not so located that access to deep water can be had without dredging and building to an extraordinary extent.

Mr. BURNETT. That is this property that is involved?

Mr. FITZGERALD. All of it is involved. As to the Pine Beach property, it is expected that piers can be built out in this direction to the channel, where there is 35 feet of water.

Now, the Navy Department presented this matter to the House Committee on Appropriations. But before I take that up I want to say that an estimate of the improvements upon the old Jamestown property by Admiral Holliday, formerly Chief of the Bureau of Yards and Docks, fixed their value at $600,000, and those improvements included not only the buildings but the sewer mains, the streets, and the water mains; and under this provision in the bill the rights and property of all railway, electric-light, power, water, sewer, cable, telegraph, and telephone companies are to be acquired within $1,400,000, as well as the properties and improvements.

Mr. BATHRICK. Mr. Speaker, will the gentleman tell us what those rights are? Does any railroad run across the property?

Mr. FITZGERALD. A railroad runs through here to the water front, and the railroads have certain riparian rights of a valuable character.

Mr. BATHRICK. Mr. Speaker, will the gentleman yield again?

Mr. FITZGERALD. I have only 10 minutes. I want to make a connected statement, and I prefer not to be interrupted.

The Navy Department submitted this matter to the Committee on Appropriations and insisted that it was imperatively required because of the present exigency. The committee believed that it was necessary to acquire some place, by purchase or rent, to train the men who are enlisted in order to bring the Navy up to its increased strength, and it ascertained that this project had a twofold character—one to provide a place where these men could be sent, housed, and trained, and the other to commence the establishment of a great naval base. But, under all the circumstances, the Committee on Appropriations did not believe it came within the category of the things that might be called imperative at this time. The Senate Committee on Naval Affairs conducted some investigations, and as the result of statements by the Secretary of the Navy and Admiral Leigh C. Palmer, Chief of the Bureau of Navigation, and Capt. Josiah S. McKean, an officer who had been detailed specially to make a study of the matter, the Senate Committee on Appropriations included this provision in the bill; and the statement is reiterated that in order to find a place to provide for the men who are being enlisted, to train them and fit them to board the ships, this place is needed. One of the reasons given for its acquisition at this time is that the improvements and the buildings upon the property make it possible to send men at once and to have what are said to be adequate facilities, including water and sewer systems.

Now, I stated at the outset that I had not been entirely convinced as to the wisdom of this matter, and perhaps undue importance has been placed upon that statement. Here is a bill, Mr. Speaker, which carries three billion three hundred and odd million dollars to equip, to subsist, and to pay, not only the men who are to be assembled into an army of a million men, but to enable the Navy Department to be put upon a proper footing and equipped for the war. Here is a place, 7 miles from Norfolk, with its navy yard, its warehouses, its coal and oil facilities, and the Navy Department insists, through its military advisers, that the place ought to be acquired at this time, immediately, in order to take men who are now being enlisted and can not be sent elsewhere for training, but that primarily it should be acquired as a great naval fleet base.

Now, there are a number of times when I think I have enough sense to use my own judgment, even if I may not be convinced that the judgment of some one else is better. I can not know everything connected with the Government of the United States. I do not know anything about the values of these lands. I am not familiar with the character of the improvements on them. I have no knowledge about this property except the information that is given to me by those responsible for putting the Navy in an efficient condition; but those who are responsible for having the Navy in an efficient and proper condition, now when we are at war, when it is necessary to have it and to keep it in an efficient condition, state that this land, this property, ought to be acquired, and acquired at once, for the purposes indicated. I can not stand idly, Mr. Speaker, with anyone to hold up a bill carrying $3,000,000,000 on account of an ultimate expenditure

of $3,000,000 for some purpose. I expect before we conclude this war that much money must necessarily be expended that perhaps will not be expended in the wisest manner possible; but those who have the best information, those who are in a position to be best informed, those who have the responsibility of the national defense, insist that this ought to be acquired, and so I hope I have enough sense to surrender any convictions I might have to support the administration in doing the things it says are essential for the public defense.

Now, some gentlemen say we ought to condemn this land and not authorize its purchase. The testimony shows that originally options were secured upon this land for $1,700,000, and by degrees the price has been scaled down until now the options that are had aggregate $1,440,000.

The department states that it believes it can get a further reduction to $1,400,000, but can not get any further reduction.

If this land is needed, it is needed now. It is needed not at the end of six or eight months, when condemnation proceedings can be had, but it is needed in order to enable the Navy Department to take the men who are being enlisted and being turned back to their homes because there is no other place where they can be sent.

The statement is made by the Navy Department that with the authorized strength of the Navy fixed at 150,000 men there will be continuously in training on shore, to take the place of men upon the ships, in the neighborhood of 20,000 men.

Under all these circumstances, in view of the fact that the departments are clamoring for the money carried in this bill, and that everybody in a responsible position in the Navy Department insists that this is essential for the public defense, that it is a matter which they have investigated and considered not through one officer but through a number of officers and through various boards, I hope that the House will not go to the extreme of rejecting this report and sending this entire bill back to conference, but will adopt the report and trust those charged with the responsibility to do what is best for the interests of the American people under all the circumstances. [Applause.]

Mr. Speaker, I move the previous question upon the adoption of the report.

The SPEAKER. The gentleman from New York moves the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The question being taken, the Speaker announced that the noes appeared to have it.

Mr. FITZGERALD. I ask for a division.

The House divided, and there were—ayes 57, noes 70.

Mr. FITZGERALD. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from New York makes the point of order that there is no quorum present. Evidently there is not. The Doorkeeper will lock the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 115, nays 184, answered "present" 4, not voting 127, as follows:

YEAS—115.

So the conference report was rejected.

The following pairs were announced:

For the session:

Mr. STEELE with Mr. BUTLER.

Until further notice:

Mr. LINTHICUM with Mr. FOSS.

Mr. CLARK of Florida with Mr. FULLER of Illinois.

Mr. STEPHENS of Nebraska with Mr. SLOAN.

Mr. DICKINSON with Mr. SELLS.

Mr. BARNHART with Mr. MORGAN.

Mr. SHOUSE with Mr. DUNN.

Mr. DEWALT with Mr. HAMILTON of New York.

Mr. BOOHER with Mr. TREADWAY.

Mr. SLAYDEN with Mr. HAYES.

Mr. DALE of New York with Mr. PAIGE.

Mr. BRUCKNER with Mr. PRATT.

Mr. RIORDAN with Mr. REAVIS.

Mr. WILSON of Texas with Mr. DYER.

Mr. WISE with Mr. FESS.

Mr. ASHBROOK with Mr. ANTHONY.

Mr. BRAND with Mr. BLAND.

Mr. BRODBECK with Mr. BRITTEN.

Mr. BRUCKNER with Mr. KREIDER.

Mr. CANTRILL with Mr. ZIHLMAN.

Mr. CARAWAY with Mr. CHANDLER of New York.

Mr. CAREW with Mr. CLARK of Pennsylvania.

Mr. CARLIN with Mr. COOPER of Ohio.
Mr. CARTER of Oklahoma with Mr. COOPER of Wisconsin.
Mr. CLAYPOOL with Mr. COSTELLO.
Mr. DIXON with Mr. CRAMTON.
Mr. DOOLING with Mr. WOODYARD.
Mr. DOREMUS with Mr. DRUKKER.
Mr. DRANE with Mr. EDMONDS.
Mr. ESTOPINAL with Mr. WALDOW.
Mr. FIELDS with Mr. FORDNEY.
Mr. FLYNN with Mr. FRANCIS.
Mr. GARD with Mr. FREEMAN.
Mr. GARNER with Mr. GARLAND.
Mr. GOODWIN of Arkansas with Mr. HULL of Iowa.
Mr. GRIFFIN with Mr. HUSTED.
Mr. HAMILL with Mr. IRELAND.
Mr. HOUSTON with Mr. KEARNS.
Mr. HOWARD with Mr. KENNEDY of Iowa.
Mr. KETTNER with Mr. KIESS of Pennsylvania.
Mr. KEY of Ohio with Mr. WINSLOW.
Mr. KITCHIN with Mr. CAMPBELL of Kansas.
Mr. LARSEN with Mr. MCCORMICK.
Mr. LEE of Georgia with Mr. MCCULLOCH.
Mr. LEVER with Mr. MCKENZIE.
Mr. LOBECK with Mr. MASON.
Mr. MCANDREWS with Mr. MONDELL.
Mr. MAHER with Mr. MOORES of Indiana.
Mr. MARTIN of Illinois with Mr. MORGAN.
Mr. MAYS with Mr. MORIN.
Mr. NICHOLLS of South Carolina with Mr. MUDD.
Mr. PARK with Mr. NELSON.
Mr. RAINEY with Mr. PARKER of New York.
Mr. SAUNDERS of Virginia with Mr. PETERS.
Mr. SHALLENBERGER with Mr. POWERS.
Mr. THOMAS F. SMITH with Mr. PRATT.
Mr. STEDMAN with Mr. ROWE.
Mr. STEPHENS of Mississippi with Mr. ROWLAND.
Mr. STERLING of Pennsylvania with Mr. WILLIAMS.
Mr. STEVENSON with Mr. SNYDER.
Mr. SULLIVAN with Mr. WALSH.
Mr. LINTHICUM with Mr. FOSS.
Mr. TALBOTT with Mr. BROWNING, commencing May 25 and ending June 5.
Mr. LITTLEPAGE with Mr. COOPER of West Virginia, commencing May 26 and ending June 3.
Mr. HULL of Tennessee with Mr. HILL, commencing May 24 until further notice.

On this vote:

Mr. COLLIER (for) with Mr. KENNEDY of Rhode Island (against).

Mr. BROWNING. Mr. Speaker, I have a general pair with my colleague, Mr. TALBOTT. I voted "aye," and I think if he were present he would vote the same way; therefore I will let the vote stand.

Mr. BUTLER. Mr. Speaker, I have a general pair with Mr. STEELE of Pennsylvania. I voted "no." I will withdraw that vote and answer "present."

The result of the vote was then announced as above recorded.

A quorum being present, the doors were opened.

Mr. FITZGERALD. Mr. Speaker, I move that the House further insist on its disagreement to all the Senate amendments except Senate amendment No. 2, further insist on its amendment to No. 2, and ask for a conference.

The SPEAKER. The gentleman from New York moves that the House further insist on its disagreement to all the Senate amendments except No. 2, and further insist upon its amendment to Senate amendment No. 2, and ask for a conference.

The motion was agreed to.

Mr. KELLEY of Michigan. Mr. Speaker, I offer the following privileged motion.

The Clerk read as follows:

Mr. KELLEY of Michigan moves that the managers on the part of the House be instructed not to agree in conference to Senate amendment No. 68.

Mr. FITZGERALD. And on that, Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the motion to instruct the conferees offered by the gentleman from Michigan.

The question was taken, and the motion was agreed to.

The SPEAKER appointed as conferees on the part of the House Mr. FITZGERALD, Mr. SHERLEY, and Mr. GILLETT.

SERVICE OF CERTAIN RETIRED OFFICERS OF THE ARMY.

Mr. DENT. Mr. Speaker, I ask unanimous consent for the present consideration of Senate joint resolution No. 70, relating to the service of certain retired officers of the Army.

The SPEAKER. The gentleman from Alabama asks unanimous consent for the present consideration of Senate joint resolution No. 70, which the Clerk will report.

The Clerk read as follows:

Joint resolution (S. J. Res. 70) relating to the service of certain retired officers of the Army.

Resolved, etc., That when retired officers of the Army, any portion of whose active service was in the Corps of Engineers, are called back into active service they shall be eligible to fill any position required by law to be filled by an officer of the Corps of Engineers.

The SPEAKER. Is there objection to the present consideration of the Senate joint resolution?

There was no objection.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. DENT, a motion to reconsider the vote whereby the Senate joint resolution was passed was laid on the table.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. FITZGERALD. Mr. Speaker, I call up the conference report on the bill H. R. 11, making appropriations for the sundry civil expenses of the Government for the fiscal year ending June 30, 1918, and for other purposes, and I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman from New York calls up the conference report on the sundry civil appropriation bill and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The Clerk read the statement.

CONFERENCE REPORT (NO. 71).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1918, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 6, 7, 8, 11, 12, 16, 18, 21, 22, 23, 28, 32, 38, 39, 48, 64, 66, 67, 75, 76, 77, 79, 88, 90, 91, 95, 97, 98, 99, 102, 104, 108, 109, 112, 120, 121, 122, 123, 124, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 139, 141, 142, 151, and 156.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 4, 9, 10, 17, 24, 25, 26, 27, 30, 31, 33, 34, 35, 36, 37, 40, 41, 42, 43, 45, 46, 47, 50, 51, 52, 53, 54, 55, 57, 58, 59, 61, 62, 63, 65, 68, 69, 70, 71, 72, 73, 78, 81, 84, 86, 87, 89, 93, 94, 96, 100, 103, 116, 117, 118, 119, 125, 137, 138, 140, 144, 145, 146, 147, 150 152, 153, 154, 155, 157, 158, and 159, and agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: Strike out all of the matter inserted by said amendment after the word "appropriated," in line 8, and in lieu of the matter thus stricken out insert the following: "*Provided*, That the foregoing buildings shall not be included among the buildings to be supplied with heat, light, and power, from the said power plant, if such inclusion shall interfere in any way with the completion of the said plant at the earliest date possible"; and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"To enable the Coast Guard to bring its present telephone system of coastal communication to a high state of efficiency, to extend such system to include all Coast Guard stations not now connected, and to include the most important light stations which have at present no means of rapid communication, including personal services and all other necessary expenses in connection therewith, $300,000."

And the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$5,856,086"; and the Senate agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"For payment to the legal representatives of Napoleon B. Giddings, deceased, in accordance with private act No. 165, Sixty-fourth Congress, approved February 8, 1917, $1,950."

And the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "and the members of his immediate family"; and the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$275,000"; and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"MILITARY PUBLICATIONS.

"In addition to any other appropriation available for this purpose, there is hereby appropriated $150,000, or so much thereof as may be necessary, to be immediately available, to be expended in printing and binding publications and manuals necessary for the organization and instruction of the land forces of the United States or such other necessary printing as the Secretary of War may prescribe: *Provided*, That the printing and binding herein authorized may be executed under contract with private concerns if in the judgment of the Secretary of War the public interest requires, notwithstanding the provisions of law requiring such printing and binding to be done in the Government Printing Office."

And the Senate agree to the same.

Amendment numbered 44: That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$732,000"; and the Senate agree to the same.

Amendment numbered 49: That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$68,500"; and the Senate agree to the same.

Amendment numbered 56: That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"For an additional amount for ice-making plant, $7,000."

And the Senate agree to the same.

Amendment numbered 60: That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"San Antonio Arsenal, San Antonio, Tex.;

"For increasing facilities for the repair of ordnance matériel, including necessary buildings, etc., $50,000;

"For a magazine, $30,000;

"For adding two stories to storehouse, $45,000;

"For a building for storing artillery vehicles and machine-gun trucks, $3,000;

"In all, $128,000."

And the Senate agree to the same.

Amendment numbered 74: That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,021,100"; and the Senate agree to the same.

Amendment numbered 80: That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$6,000,000"; and the Senate agree to the same.

Amendment numbered 82: That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"To provide for an increase of 15 per cent in the pay of park laborers, $15,000."

And the Senate agree to the same.

Amendment numbered 83: That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Aqueduct Bridge: For continuing the construction of the bridge authorized in section 1 of an act entitled 'An act to provide for the removal for what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof,' approved May 18, 1916, $400,000, one-half to be payable out of the Treasury of the United States and the other half out of the revenues of the District of Columbia."

And the Senate agree to the same.

Amendment numbered 85: That the House recede from its disagreement to the amendment of the Senate numbered 85, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$329,600"; and the Senate agree to the same.

Amendment numbered 92: That the House recede from its disagreement to the amendment of the Senate numbered 92, and agree to the same with an amendment as follows: Omit all of the matter inserted by said amendment after the word "Mines," in line 6; and the Senate agree to the same.

Amendment numbered 101: That the House recede from its disagrement to the amendment of the Senate numbered 101, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "also not exceeding $60,000 for the completion of the installation of the hydroelectric power plant authorized by the sundry civil act for the fiscal year 1917; in all, $235,000: *Provided*, That the unexpended balance of the appropriation of $150,000 for the fiscal year 1917 for the hydroelectric power plant is made available for the fiscal year 1918"; and the Senate agree to the same.

Amendment numbered 105: That the House recede from its disagrement to the amendment of the Senate numbered 105, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment amended as follows: On page 124 of the bill, in line 8, after the word "park," insert the following: ", except Hot Springs Reservation, Ark"; and the Senate agree to the same.

Amendment numbered 106: That the House recede from its disagreement to the amendment of the Senate numbered 106, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Hot Springs Reservation, Ark.: For the employment of a landscape engineer and such other expenses as may be required for the preparation of a practical and comprehensive plan, together with an accurate estimate of the cost thereof, for improving the Hot Springs Reservation, there is authorized to be expended from the revenues received from the said reservation the sum of $10,000."

And the Senate agree to the same.

Amendment numbered 107: That the House recede from its disagreement to the amendment of the Senate numbered 107, and agree to the same with an amendment as follows: Transpose the matter inserted by said amendment to follow line 18, on page 143 of the bill, amended to read as follows:

"DEPARTMENT OF AGRICULTURE.

"For contribution to the Forest Service for construction of a bridge across the Narrows over the waters between Cass Lake and Pike Bay, in the Minnesota National Forest, Minn., upon condition that the local authorities, State or county, contribute $10,000 toward the building of the same, $10,000."

And the Senate agree to the same.

Amendment numbered 110: That the House recede from its disagreement to the amendment of the Senate numbered 110, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment amended to read as follows:

"For the erection of shop buildings or factories and their appurtenances, $82,500."

And the Senate agree to the same.

Amendment numbered 111: That the House recede from its disagreement to the amendment of the Senate numbered 111, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment amended to read as follows:

"For the erection of shop buildings or factories and their appurtenances, $129,500."

And the Senate agree to the same.

Amendment numbered 113: That the House recede from its disagreement to the amendment of the Senate numbered 113, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "hire of motor-propelled or horse-drawn passenger-carrying vehicles when necessary"; and the Senate agree to the same.

Amendment numbered 114: That the House recede from its disagreement to the amendment of the Senate numbered 114, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$25,000"; and the Senate agree to the same.

Amendment numbered 115: That the House recede from its disagreement to the amendment of the Senate numbered 115, and agree to the same with an amendment as follows: In lieu

of the sum proposed insert "$600,000"; and the Senate agree to the same.

Amendment numbered 143: That the House recede from its disagreement to the amendment of the Senate numbered 143, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"To pay M. I. Howell for services rendered the special committee appointed under Senate resolution No. 543, to secure certain information concerning interned ships in the ports of the United States and elsewhere, and what efforts have been made by certain parties or interests to prevent the passage of Senate bill No. 6856, commonly known as the ship purchase bill, during the third session of the Sixty-third Congress, from February 16 to April 8, 1915, $115."

And the Senate agree to the same.

Amendment numbered 148: That the House recede from its disagreement to the amendment of the Senate numbered 148, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$5,275,000"; and the Senate agree to the same.

Amendment numbered 149: That the House recede from its disagreement to the amendment of the Senate numbered 149, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$6,024,720"; and the Senate agree to the same.

JOHN J. FITZGERALD,
SWAGER SHERLEY,
Managers on the part of the House.

LEE S. OVERMAN,
O. W. UNDERWOOD,
F. E. WARREN,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1918, and for other purposes, submit the following written statement in explanation of the effect of the action agreed upon by the conference committee and submitted in the accompanying conference report as to each of said amendments, namely:

On Nos. 1, 2, 3, 4, 5, 6, 7, 8, and 9, relating to public buildings: Appropriates $700 additional, as proposed by the Senate, for the site at Barbourville, Ky.; restores the language, stricken out by the Senate, increasing by $200,000 the limit of cost of the New York assay office; appropriates $100,000 for the post office at Paris, Tex.; appropriates $50,000 for completing the remodeling of the post office at Pittsburgh; inserts the paragraph, proposed by the Senate, to include the Pan American Building, the Civil Service Commission Building, and the Municipal Fish Market among the buildings to be supplied from the central heating, lighting, and power plant, modified to provide that such buildings shall not be included if they shall interfere with the completion of the power plant at the earliest possible date; strikes out the appropriation of $250 for additional ground for the Gettysburg, Pa., post office; strikes out the appropriation of $1,675,000 for the purchase and maintenance of the New York quarantine station; appropriates $580,660, as proposed by the House, instead of $590,000, as proposed by the Senate, for general expenses of public buildings; and appropriates $3,250,000, as proposed by the Senate, instead of $3,200,000, as proposed by the House, for the operating force of public buildings.

On Nos. 10, 11, 12, 13, and 14, relating to the Coast Guard: Provides for 44 cadets and cadet engineers, as proposed by the Senate, instead of 30, as proposed by the House; strikes out the increases, proposed by the Senate, in the items for pay and allowances and rations; and appropriates $300,000, instead of $600,000, as proposed by the Senate, to enable the Coast Guard to bring its telephone system to a high state of efficiency.

On No. 15: Appropriates $1,950, as proposed by the Senate, to carry out the provisions of private act No. 165, Sixty-fourth Congress, for payment to Napoleon B. Giddings.

On No. 16: Strikes out the paragraph, proposed by the Senate, authorizing a credit in the accounts of E. A. Wreidt, disbursing officer of the Commission on Federal Aid to Vocational Education.

On No. 17: Appropriates $185,000, as proposed by the Senate, instead of $115,000, as proposed by the House, for contingent expenses of the Independent Treasury.

On Nos. 18, 19, 20, 21, 22, and 23, relating to the suppression of counterfeiting and other crimes: Appropriates $275,000, instead of $400,000, as proposed by the Senate, and $225,000, as proposed by the House; inserts the authority, proposed by the Senate, extending the protection of the Secret Service to the members of the President's immediate family; strikes out the provisions, inserted by the Senate, enlarging the scope of the Secret Service and providing for a maximum pay of $12 per day.

On No. 24: Inserts the paragraph, proposed by the Senate, extending the time for the commencement of the George Washington Memorial Building to March 4, 1919, and reducing to $500,000 the amount to be raised before construction is commenced.

On Nos. 25 and 26: Appropriates $250,000, as proposed by the Senate, instead of $400,000, as proposed by the House, for the food investigation by the Federal Trade Commission and makes a grammatical correction in the text of the paragraph.

On No. 27: Inserts authority for the purchase of books of reference and periodicals in the appropriation for the Tariff Commission.

On No. 28, relating to the Rock Creek and Potomac Parkway: Restores the language stricken out by the Senate defining the total area of the lands to be acquired for the parkway.

On No. 29: Appropriates $150,000, instead of $300,000, as proposed by the Senate, for printing and binding military publications and manuals.

On Nos. 30 and 31, relating to the Benicia, Cal., Arsenal: Appropriates $2,000, as proposed by the Senate, for a fence around the lumber yard.

On Nos. 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, and 44, relating to the Frankford Arsenal Philadelphia: Strikes out the following appropriations proposed by the Senate: $24,000 for building for storing fire engines and hose carts, $20,000 for extension of the barracks, and $9,000 for quarters for noncommissioned officers.

Inserts the following appropriations, as proposed by the Senate: $10,000 for a high-explosive loading shop, $30,000 for a paint shop, $25,000 for a small-arms firing range, $75,000 for an artillery firing range, $135,000 for a general storehouse, $40,000 for the construction of tunnels and heating and lighting mains, $5,000 for the instrument department building, $25,000 for the artillery case shop building, and $90,000 for an artillery ammunition storehouse.

On Nos. 45, 46, 47, 48, and 49, relating to the Picatinny Arsenal, Dover, N. J.: Appropriates, as proposed by the Senate, $2,500 for storage facilities for old powder, $15,000 for a powder magazine, $8,000 for improving existing magazines, and strikes out the appropriation of $10,000 for a steam turbine and electric generator.

On No. 50: Appropriates $1,500,000, as proposed by the Senate, instead of $1,000,000, as proposed by the House, for proving-ground facilities.

On Nos. 51, 52, 53, 54, 55, 56, and 57, relating to the Rock Island Arsenal, Ill.: Appropriates, as proposed by the Senate, $750,000 additional for facilities for the manufacture of field-artillery ammunition, $165,000 for a central steam-heating plant, $15,000 for a motor-truck garage, $125,000 for a rifle and hand-grenade plant, and $7,000 additional for the ice-making plant.

On Nos. 58 and 59, relating to Sandy Hook Proving Ground: Appropriates $3,500, as proposed by the Senate, for two coal bins.

On No. 60, relating to the San Antonio, Tex., Arsenal: Appropriates $50,000 instead of $70,000, as proposed by the Senate, for facilities for the repair of ordnance material; $30,000 for a magazine; $45,000 for an addition to a storehouse; and $3,000 for a storehouse for field-artillery vehicles and machine-gun trucks; and strikes out the appropriations, proposed by the Senate, of $5,000 for road repairs and $9,000 for improving transportation facilities.

On Nos. 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, and 75, relating to the Watertown, Mass., Arsenal: Appropriates $14,500, as proposed by the Senate, instead of $9,500, as proposed by the House, for a locomotive crane; appropriates $90,000, as proposed by the Senate, instead of $60,000, as proposed by the House, for a storehouse and its equipment; appropriates $4,000, as proposed by the Senate, instead of $3,000, as proposed by the House, for a fire engine; appropriates $10,000, as proposed by the House, instead of $16,000, as proposed by the Senate, for roads and sidewalks; appropriates $12,000, as proposed by the Senate, instead of $7,000, as proposed by the House, for an oil storage plant and equipment; appropriates, as proposed by the Senate, $20,000 for a power tunnel, $35,000 for improving the smith shop, $16,000 for a building for the planning room and inspector's office, $10,000 for a fire-alarm system, $8,600 for replacing the roof of the hardening plant, $800,000 for a foundry and its equipment; and appropriates $15,000, as proposed by the House, instead of $25,000, as proposed by the Senate, for the operation of testing machines; and strikes out the appropriations of $15,000 for extension of the office building and $30,000 for officers' quarters.

On Nos. 76 and 77, relating to the Watervliet Arsenal, West Troy, N. Y.: Strikes out the appropriation of $10,000, proposed by the Senate, for repairing main roads.

On Nos. 78 and 79: Appropriates $1,000,000, as proposed by the Senate, for storage facilities at armories and arsenals, and strikes out the paragraph inserted by the Senate making the appropriations for armories and arsenals immediately available.

On No. 80: Appropriates $6,000,000, instead of $10,500,000, as proposed by the Senate, for flood control.

On Nos. 81 and 82, relating to public buildings and grounds: Appropriates $7,000, as proposed by the Senate, for a wagon shed at the propagating gardens, and appropriates $15,000 for an increase of 15 per cent in the pay of park laborers, instead of $25,000 for a 25 per cent increase, as proposed by the Senate.

On No. 83: Appropriates $400,000, as proposed by the Senate, for continuing the construction of the new Aqueduct Bridge.

On Nos. 84, 85, and 86, relating to the National Home for Disabled Volunteer Soldiers: Appropriates $62.000, as proposed by the Senate, instead of $58,000, as proposed by the House, for household expenses at the Northwestern Branch, Milwaukee, Wis.

On No. 87: Appropriates $1,030,000, as proposed by the Senate, instead of $1,070,000, as proposed by the House, for aid to State and Territorial soldiers' homes.

On No. 88: Appropriates $400,000, as proposed by the House, instead of $425,000, as proposed by the Senate, for contingent expenses of Land Office.

On No. 89, relating to the survey of public lands: Provides for 2 supervisors of surveys at $250 per month each, as proposed by the Senate, instead of 1 supervisor of surveys, at $300 per month, and 10 supervisors, at $250 per month each, as proposed by the House.

On No. 90: Strikes out the paragraph, inserted by the Senate, making the appropriations for the Geological Survey immediately available.

On Nos. 91 and 92, relating to the Bureau of Mines: Provides, as proposed by the House, that not exceeding 30 per cent of the appropriation for investigating mineral fuels and unfinished mineral products may be used for personal services in the District of Columbia, instead of 20 per cent, as proposed by the Senate; inserts the paragraph, proposed by the Senate, authorizing the detail of officers of the Public Health Service for cooperative work with the Bureau of Mines, and strikes out the paragraph, proposed by the Senate, authorizing the Bureau of Mines to use its funds in the United States or foreign countries for investigations of military value.

On Nos. 93 and 94: Strike out the language, proposed by the House, relative to the disposal of receipts from power plants of the Reclamation Service.

On No. 95: Appropriates $200,000, as proposed by the House, instead of $215,000, as proposed by the Senate, for education in Alaska.

On No. 96: Appropriates $62,500, as proposed by the Senate, instead of $50,000, as proposed by the House, for medical relief in Alaska.

On No. 97: Strikes out the paragraph, inserted by the Senate, authorizing the purchase of a passenger-carrying automobile for the use of the Alaskan Engineering Commission at Seattle, Wash.

On Nos. 98 and 99, relating to the Yellowstone National Park: Appropriates $5,500, as proposed by the House, instead of $24,800, as proposed by the Senate, for administration and protection, and restores the language, stricken out by the Senate, prohibiting the use of the revenues of the Yellowstone National Park for the payment of salaries for the protection of the park authorized to be performed by the detail of troops.

On No. 100: Inserts the paragraph, proposed by the Senate, authorizing the Secretary of the Interior to accept buildings, money, or other property useful in the development of Glacier National Park.

On No. 101: Appropriates $60,000 additional, as proposed by the Senate, for the completion of the hydroelectric power plant in the Yosemite National Park.

On No. 102: Appropriates $10,000, as proposed by the House, instead of $20,000, as proposed by the Senate, for the Mesa Verde National Park.

On No. 103: Inserts the paragraph, proposed by the Senate, authorizing the Secretary of the Interior to accept for park purposes certain lands, including Grandfather Mountain, in North Carolina.

On No. 104: Strikes out the appropriation of $5,000, proposed by the Senate, for the Lassen National Park.

On No. 105: Restores the paragraph, stricken out by the Senate, requiring the revenues of the national parks to be covered into the Treasury, modified so as to eliminate from the operation of the paragraph the Hot Springs Reservation, Ark.

On No. 106: Inserts the paragraph, proposed by the Senate, for the preparation of plans for the development of the Hot Springs Reservation, Ark., modified so as to make the cost thereof payable from the revenues of the reservation.

On No. 107: Appropriates $10,000, as proposed by the Senate, for a bridge in the Minnesota National Forest and transposes the appropriation to its proper place in the bill.

On No. 108: Strikes out the additional appropriation of $81,778.40, inserted by the Senate, for St. Elizabeths Hospital.

On No. 109: Appropriates $71,500, as proposed by the House, instead of $73,000, as proposed by the Senate, for the support of the Columbia Institution for the Deaf.

On Nos. 110, 111, and 112: Appropriates $82,500 for the erection of shop buildings at the Leavenworth (Kans.) Penitentiary and strikes out the appropriation of $202,500 for the purchase and installation of machinery and other equipment, and appropriates $129,500 for the erection of shop buildings at the Atlanta (Ga.) Penitentiary and strikes out the appropriation of $315,500 for the purchase and installation of machinery and other equipment.

On Nos. 113, 114, and 115, relating to the appropriation for the detection and prosecution of crimes by the Department of Justice: Appropriates $600,000 instead of $685,000, as proposed by the Senate, and $485,000, as proposed by the House; makes $25,000 available for personal services at the seat of government instead of $32,500, as proposed by the Senate, and $18,500, as proposed by the House; and inserts the authority, proposed by the Senate, for the hire of motor-propelled or horse-drawn passenger-carrying vehicles.

On No. 116: Appropriates $6,000, as proposed by the Senate, for the salary of the additional district judge in the State of Texas.

On Nos. 117 and 118: Appropriates $5,000 for the salary of the district judge and $3,000 for the salary of the clerk of the court for the district of Porto Rico.

On No. 119: Inserts, as proposed by the Senate, authority for the payment of the expenses of the judge of the district court of Porto Rico.

On No. 120: Strikes out the authority, inserted by the Senate, for the payment of subsistence to the chaplain at the Leavenworth (Kans.) Penitentiary.

On No. 121: Appropriates $1,104,650, as proposed by the House, instead of $1,150,000, as proposed by the Senate, for salaries of officers and crews of lighthouse tenders and light vessels.

On Nos. 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, and 136, relating to the Coast and Geodetic Survey: Strikes out the authority, inserted by the Senate, making portions of the appropriations for surveys on the Atlantic coast, surveys on the Pacific coast, and geodetic surveys immediately available; appropriates $56,000, as proposed by the Senate, instead of $45,000, as proposed by the House, for repairs of vessels; strikes out the appropriation of $708,000, proposed by the Senate, for two new vessels to replace the *Patterson* and *Gedney;* and strikes out all of the additional employees proposed by the Senate.

On Nos. 137, 138, and 139, relating to the Bureau of Fisheries: Appropriates $10,000, as proposed by the Senate, for developing aquatic sources of leather and $35,000 for repairs to steamer *Fish Hawk*, and appropriates $7,500, as proposed by the House, instead of $15,000, as proposed by the Senate, for the San Marcos, Tex., fish hatchery.

On No. 140: Describes the additional land to be purchased for the Bureau of Standards in the language proposed by the Senate, instead of in the language proposed by the House.

On No. 141: Strikes out the appropriation of $46,920, proposed by the Senate, for investigations under the act creating the Department of Labor.

On No. 142: Strikes out the increase of $305,000, proposed by the Senate, for the Naturalization Service.

On No. 143: Appropriates $115, as proposed by the Senate, for payment to M. I. Howell for services rendered a special committee of the Senate.

On No. 144: Appropriates $1,500, as proposed by the Senate, for two new boilers for the Botanic Gardens.

On Nos. 145, 146, and 147, relating to the Senate: Appropriates $55,000 for maintenance of, and $5,000 for furniture for, the Senate Office Building, and $17,500 for repairs, improvements, and equipment for Senate kitchens and restaurants.

On Nos. 148, 149, 150, and 151: Appropriates $275,000, as proposed by the Senate, instead of $250,000, as proposed by the House, for printing and binding for the War Department, and strikes out the increase of $21,000, proposed by the Senate, in

the appropriation for printing and binding for the Library of Congress.

On Nos. 152, 153, and 154, relating to the Panama Canal: Appropriates $700,000, as proposed by the Senate, instead of $600,000, as proposed by the House, for civil government, and inserts the paragraph, proposed by the Senate, authorizing the transfer of insane from the Canal Zone to St. Elizabeths Hospital.

On Nos. 155, 156, 157, and 158, relating to the fortification of the Panama Canal: Appropriates $40,000, as proposed by the Senate, for the ordnance repair shop equipment, and restores the paragraph, stricken out by the Senate, repealing the appropriation of $160,000 for a dock and $100,000 for dredging for the Ordnance Department.

On No. 159: Inserts the paragraph, proposed by the Senate, canceling an assessment of $13,252.21 of income tax on profit of sales of stock by Charles L. Freer, of Detroit, Mich.

JOHN J. FITZGERALD,
SWAGAR SHERLEY,
Managers on the part of the House.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the conference report was agreed to.

On motion of Mr. FITZGERALD, a motion to reconsider the vote whereby the conference report was agreed to was laid on the table.

ESPIONAGE.

Mr. WEBB. Mr. Speaker, I call up the conference report on the bill H. R. 291, the espionage bill, and I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman from North Carolina calls up the conference report on the bill H. R. 291—the espionage bill—and asks unanimous consent that the statement be read in lieu of the report Is there objection?

Mr. MANN. Reserving the right to object, my recollection is that the conference report was read the other day.

Mr. WEBB. It was, in its entirety.

Mr MANN. I do not object.

The SPEAKER. The Chair hears no objection, and the Clerk will read the statement.

The Clerk read the statement.

CONFERENCE REPORT (NO. 69).

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 291) to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"TITLE I.

"ESPIONAGE.

"SECTION 1. That (a) whoever, for the purpose of obtaining information respecting the national defense with intent or reason to believe that the information to be obtained is to be used to the injury of the United States, or to the advantage of any foreign nation, goes upon, enters, flies over, or otherwise obtains information concerning any vessel, aircraft, work of defense, navy yard, naval station, submarine base, coaling station, fort, battery, torpedo station, dockyard, canal, railroad, arsenal, camp, factory, mine, telegraph, telephone, wireless, or signal station, building, office, or other place connected with the national defense, owned or constructed, or in progress of construction by the United States or under the control of the United States, or of any of its officers or agents, or within the exclusive jurisdiction of the United States, or any place in which any vessel, aircraft, arms, munitions, or other materials or instruments for use in time of war are being made, prepared, repaired, or stored, under any contract or agreement with the United States, or with any person on behalf of the United States, or otherwise on behalf of the United States, or any prohibited place within the meaning of section 6 of this title; or (b) whoever for the purpose aforesaid, and with like intent or reason to believe, copies, takes, makes, or obtains, or attempts, or induces or aids another to copy, take, make, or obtain, any sketch, photograph, photographic negative, blue print, plan, map, model, instrument, appliance, document, writing, or note of anything connected with the national defense; or (c) whoever, for the purpose aforesaid, receives or obtains or agrees or attempts or induces or aids another to receive or obtain from any person, or from any source whatever, any document, writing, code book, signal book, sketch, photograph, photographic negative, blue print, plan, map, model, instrument, appliance, or note, of anything connected with the national defense, knowing or having reason to believe, at the time he receives or obtains, or agrees or attempts or induces or aids another to receive or obtain it, that it has been or will be obtained, taken, made or disposed of by any person contrary to the provisions of this title; or (d) whoever, lawfully or unlawfully having possession of, access to, control over, or being intrusted with any document, writing, code book, signal book, sketch, photograph, photographic negative, blue print, plan, map, model, instrument, appliance, or note relating to the national defense, willfully communicates or transmits or attempts to communicate or transmit the same to any person not entitled to receive it, or willfully retains the same and fails to deliver it on demand to the officer or employee of the United States entitled to receive it; or (e) whoever, being intrusted with or having lawful possession or control of any document, writing, code book, signal book, sketch, photograph, photographic negative, blue print, plan, map, model, note, or information, relating to the national defense, through gross negligence permits the same to be removed from its proper place of custody or delivered to anyone in violation of his trust, or to be lost, stolen, abstracted, or destroyed, shall be punished by a fine of not more than $10,000, or by imprisonment for not more than two years, or both.

"SEC. 2. (a) Whoever, with intent or reason to believe that it is to be used to the injury of the United States or to the advantage of a foreign nation, communicates, delivers, or transmits, or attempts to, or aids or induces another to, communicate, deliver, or transmit, to any foreign government, or to any faction or party or military or naval force within a foreign country, whether recognized or unrecognized by the United States, or to any representative, officer, agent, employee, subject, or citizen thereof, either directly or indirectly, any document, writing, code book, signal book, sketch, photograph, photographic negative, blue print, plan, map, model, note, instrument, appliance, or information relating to the national defense, shall be punished by imprisonment for not more than 20 years: *Provided*, That whoever shall violate the provisions of subsection (a) of this section in time of war shall be punished by death or by imprisonment for not more than 30 years; and (b) whoever, in time of war, with intent that the same shall be communicated to the enemy, shall collect, record, publish, or communicate, or attempt to elicit any information with respect to the movement, numbers, description, condition, or disposition of any of the armed forces, ships, aircraft, or war materials of the United States, or with respect to the plans or conduct, or supposed plans or conduct of any naval or military operations, or with respect to any works or measures undertaken for or connected with, or intended for the fortification or defense of any place, or any other information relating to the public defense, which might be useful to the enemy, shall be punished by death or by imprisonment for not more than 30 years.

"SEC. 3. Whoever, when the United States is at war, shall willfully make or convey false reports or false statements with intent to interfere with the operation or success of the military or naval forces of the United States or to promote the success of its enemies and whoever, when the United States is at war, shall willfully cause or attempt to cause insubordination, disloyalty, mutiny, or refusal of duty, in the military or naval forces of the United States, or shall willfully obstruct the recruiting or enlistment service of the United States, to the injury of the service or of the United States, shall be punished by a fine of not more than $10,000 or imprisonment for not more than 20 years, or both.

"SEC. 4. If two or more persons conspire to violate the provisions of sections 2 or 3 of this title, and one or more of such persons does any act to effect the object of the conspiracy, each of the parties to such conspiracy shall be punished as in said sections provided in the case of the doing of the act the accomplishment of which is the object of such conspiracy. Except as above provided conspiracies to commit offenses under this title shall be punished as provided by section 37 of the act to codify, revise, and amend the penal laws of the United States approved March 4, 1909.

"SEC. 5. Whoever harbors or conceals any person who he knows, or has reasonable grounds to believe or suspect, has committed, or is about to commit, an offense under this title shall be punished by a fine of not more than $10,000 or by imprisonment for not more than two years, or both.

"SEC. 6. The President in time of war or in case of national emergency may by proclamation designate any place other than those set forth in subsection (a) of section 1 hereof in which anything for the use of the Army or Navy is being prepared or constructed or stored as a prohibited place for the purposes of this title: *Provided*, That he shall determine that information with respect thereto would be prejudicial to the national defense.

"SEC. 7. Nothing contained in this title shall be deemed to limit the jurisdiction of the general courts-martial, military commissions, or naval courts-martial under sections 1342, 1343, and 1624 of the Revised Statutes as amended.

"SEC. 8. The provisions of this title shall extend to all territories, possessions, and places subject to the jurisdiction of the United States whether or not contiguous thereto, and offenses under this title when committed upon the high seas or elsewhere within the admiralty and maritime jurisdiction of the United States and outside the territorial limits thereof shall be punishable hereunder.

"SEC. 9. The act entitled 'An act to prevent the disclosure of national-defense secrets,' approved March 3, 1911, is hereby repealed.

"TITLE II.

"VESSELS IN PORTS OF THE UNITED STATES.

"SECTION 1. Whenever the President by proclamation or Executive order declares a national emergency to exist by reason of actual or threatened war, insurrection, or invasion, or disturbance or threatened disturbance of the international relations of the United States, the Secretary of the Treasury may make, subject to the approval of the President, rules and regulations governing the anchorage and movement of any vessel, foreign or domestic, in the territorial waters of the United States, may inspect such vessel at any time, place guards thereon, and, if necessary in his opinion in order to secure such vessels from damage or injury, or to prevent damage or injury to any harbor or waters of the United States, or to secure the observance of the rights and obligations of the United States, may take, by and with the consent of the President, for such purposes, full possession and control of such vessel and remove therefrom the officers and crew thereof and all other persons not specially authorized by him to go or remain on board thereof.

"Within the territory and waters of the Canal Zone the Governor of the Panama Canal, with the approval of the President, shall exercise all the powers conferred by this section on the Secretary of the Treasury.

"SEC. 2. If any owner, agent, master, officer, or person in charge, or any member of the crew of any such vessel fails to comply with any regulation or rule issued or order given by the Secretary of the Treasury or the Governor of the Panama Canal under the provisions of this title, or obstructs or interferes with the exercise of any power conferred by this title, the vessel, together with her tackle, apparel, furniture, and equipment, shall be subject to seizure and forfeiture to the United States in the same manner as merchandise is forfeited for violation of the customs revenue laws; and the person guilty of such failure, obstruction, or interference shall be fined not more than $10,000, or imprisoned not more than two years, or both.

"SEC. 3. It shall be unlawful for the owner or master or any other person in charge or command of any private vessel, foreign or domestic, or for any member of the crew or other person, within the territorial waters of the United States, willfully to cause or permit the destruction or injury of such vessel or knowingly to permit said vessel to be used as a place of resort for any person conspiring with another or preparing to commit any offense against the United States, or in violation of the treaties of the United States or of the obligations of the United States under the law of nations, or to defraud the United States, or knowingly to permit such vessels to be used in violation of the rights and obligations of the United States under the law of nations; and in case such vessel shall be so used, with the knowledge of the owner or master or other person in charge or command thereof, the vessel, together with her tackle, apparel, furniture, and equipment, shall be subject to seizure and forfeiture to the United States in the same manner as merchandise is forfeited for violation of the customs revenue laws; and whoever violates this section shall be fined not more than $10,000 or imprisoned not more than two years, or both.

"SEC. 4. The President may employ such part of the land or naval forces of the United States as he may deem necessary to carry out the purpose of this title.

"TITLE III.

"INJURING VESSELS ENGAGED IN FOREIGN COMMERCE.

"SECTION 1. Whoever shall set fire to any vessel of foreign registry, or any vessel of American registry entitled to engage in commerce with foreign nations, or to any vessel of the United States as defined in section 310 of the act of March 4, 1909, entitled 'An act to codify, revise, and amend the penal laws of the United States,' or to the cargo of the same, or shall tamper with the motive power or instrumentalities of navigation of such vessel, or shall place bombs or explosives in or upon such vessel, or shall do any other act to or upon such vessel while within the jurisdiction of the United States, or, if such vessel is of American registry, while she is on the high sea, with intent to injure or endanger the safety of the vessel or of her cargo, or of persons on board, whether the injury or danger is so intended to take place within the jurisdiction of the United States, or after the vessel shall have departed therefrom; or whoever shall attempt or conspire to do any such acts with such intent, shall be fined not more than $10,000 or imprisoned not more than 20 years, or both.

"TITLE IV.

"INTERFERENCE WITH FOREIGN COMMERCE BY VIOLENT MEANS.

"SECTION 1. Whoever, with intent to prevent, interfere with, or obstruct or attempt to prevent, interfere with, or obstruct the exportation to foreign countries of articles from the United States shall injure or destroy, by fire or explosives, such articles or the places where they may be while in such foreign commerce, shall be fined not more than $10,000, or imprisoned not more than 10 years, or both.

"TITLE V.

"ENFORCEMENT OF NEUTRALITY.

"SECTION 1. During a war in which the United States is a neutral Nation, the President, or any person thereunto authorized by him, may withhold clearance from or to any vessel, domestic or foreign, which is required by law to secure clearance before departing from port or from the jurisdiction of the United States, or, by service of formal notice upon the owner, master, or person in command or having charge of any domestic vessel not required by law to secure clearances before so departing, to forbid its departure from port or from the jurisdiction of the United States, whenever there is reasonable cause to believe that any such vessel, domestic or foreign, whether requiring clearance or not, is about to carry fuel, arms, ammunition, men, supplies, dispatches, or information to any warship, tender, or supply ship of a foreign belligerent nation in violation of the laws, treaties, or obligations of the United States under the law of nations; and it shall thereupon be unlawful for such vessel to depart.

"SEC. 2. During a war in which the United States is a neutral nation, the President, or any person thereunto authorized by him, may detain any armed vessel owned wholly or in part by American citizens, or any vessel, domestic or foreign (other than one which has entered the ports of the United States as a public vessel), which is manifestly built for warlike purposes or has been converted or adapted from a private vessel to one suitable for warlike use, until the owner or master, or person having charge of such vessel, shall furnish proof satisfactory to the President, or to the person duly authorized by him, that the vessel will not be employed by the said owners, or master, or person having charge thereof, to cruise against or commit or attempt to commit hostilities upon the subjects, citizens, or property of any foreign prince or state, or of any colony, district, or people with which the United States is at peace, and that the said vessel will not be sold or delivered to any belligerent nation, or to an agent, officer, or citizen of such nation, by them or any of them, within the jurisdiction of the United States, or, having left that jurisdiction, upon the high seas.

"SEC. 3. During a war in which the United States is a neutral nation, it shall be unlawful to send out of the jurisdiction of the United States any vessel built, armed, or equipped as a vessel of war, or converted from a private vessel into a vessel of war, with any intent or under any agreement or contract, written or oral, that such vessel shall be delivered to a belligerent nation, or to an agent, officer, or citizen of such nation, or with reasonable cause to believe that the said vessel shall or will be employed in the service of any such belligerent nation after its departure from the jurisdiction of the United States.

"SEC. 4. During a war in which the United States is a neutral nation, in addition to the facts required by sections 4197, 4198, and 4200 of the Revised Statutes to be set out in the masters' and shippers' manifests before clearance will be issued to vessels bound to foreign ports, each of which sections of the Revised Statutes is hereby declared to be and is continued in full

force and effect, every master or person having charge or command of any vessel, domestic or foreign, whether requiring clearance or not, before departure of such vessel from port shall deliver to the collector of customs for the district wherein such vessel is then located a statement duly verified by oath, that the cargo or any part of the cargo is or is not to be delivered to other vessels in port or to be transshipped on the high seas and, if it is to be so delivered or transshipped, stating the kind and quantities and the value of the total quantity of each kind of article so to be delivered or transshipped, and the name of the person, corporation, vessel, or government, to whom the delivery or transshipment is to be made; and the owners, shippers, or consignors of the cargo of such vessel shall in the same manner and under the same conditions deliver to the collector like statements under oath as to the cargo or the parts thereof laden or shipped by them, respectively.

"SEC. 5. Whenever it appears that the vessel is not entitled to clearance or whenever there is reasonable cause to believe that the additional statements under oath required in the foregoing section are false, the collector of customs for the district in which the vessel is located may, subject to review by the Secretary of Commerce, refuse clearance to any vessel, domestic or foreign, and by formal notice served upon the owners, master, or person or persons in command or charge of any domestic vessel for which clearance is not required by law, forbid the departure of the vessel from the port or from the jurisdiction of the United States; and it shall thereupon be unlawful for the vessel to depart.

"SEC. 6. Whoever, in violation of any of the provisions of this title, shall take, or attempt or conspire to take, or authorize the taking of any such vessel, out of port or from the jurisdiction of the United States, shall be fined not more than $10,000 or imprisoned not more than five years, or both; and, in addition, such vessel, her tackle, apparel, furniture, equipment, and her cargo shall be forfeited to the United States.

"SEC. 7. Whoever, being a person belonging to the armed land or naval forces of a belligerent nation or belligerent faction of any nation and being interned in the United States, in accordance with the law of nations, shall leave or attempt to leave said jurisdiction, or shall leave or attempt to leave the limits of internment in which freedom of movement has been allowed, without permission from the proper official of the United States in charge, or shall willfully overstay a leave of absence granted by such official, shall be subject to arrest by any marshal or deputy marshal of the United States, or by the military or naval authorities thereof, and shall be returned to the place of internment and there confined and safely kept for such period of time as the official of the United States in charge shall direct; and whoever, within the jurisdiction of the United States and subject thereto, shall aid or entice any interned person to escape or attempt to escape from the jurisdiction of the United States, or from the limits of internment prescribed, shall be fined not more than $1,000 or imprisoned not more than one year, or both.

"SEC. 8. Section 13 of the act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909, is hereby amended so as to read as follows:

"'SEC. 13. Whoever, within the territory or jurisdiction of the United States or of any of its possessions, knowingly begins or sets on foot or provides or prepares a means for or furnishes the money for, or who takes part in, any military or naval expedition or enterprise to be carried on from thence against the territory or dominion of any foreign prince or state, or of any colony, district, or people with whom the United States is at peace, shall be fined not more than $3,000 or imprisoned not more than three years, or both.'

"SEC. 9. That the President may employ such part of the land or naval forces of the United States as he may deem necessary to carry out the purposes of this title.

"SEC. 10. Section 15 of the act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909, is hereby amended so as to read as follows:

"'SEC. 15. It shall be lawful for the President to employ such part of the land or naval forces of the United States, or of the militia thereof, as he may deem necessary to compel any foreign vessel to depart from the United States or any of its possessions in all cases in which, by the law of nations or the treaties of the United States, it ought not to remain, and to detain or prevent any foreign vessel from so departing in all cases in which, by the law of nations or the treaties of the United States, it is not entitled to depart.'

"SEC. 11. The joint resolution approved March 4, 1915, 'to empower the President to better enforce and maintain the neutrality of the United States,' and any act or parts of acts in conflict with the provisions of this title are hereby repealed.

"TITLE VI.

"SEIZURE OF ARMS AND OTHER ARTICLES INTENDED FOR EXPORT.

"SECTION 1. Whenever an attempt is made to export or ship from or take out of the United States, any arms or munitions of war, or other articles, in violation of law, or whenever there shall be known or probable cause to believe that any such arms or munitions of war, or other articles, are being or are intended to be exported, or shipped from, or taken out of the United States, in violation of law, the several collectors, naval officers, surveyors, inspectors of customs, and marshals, and deputy marshals of the United States, and every other person duly authorized for the purpose by the President, may seize and detain any articles or munitions of war about to be exported or shipped from, or taken out of the United States, in violation of law, and the vessels or vehicles containing the same, and retain possession thereof until released or disposed of as hereinafter directed. If upon due inquiry as hereinafter provided, the property seized shall appear to have been about to be so unlawfully exported, shipped from, or taken out of the United States, the same shall be forfeited to the United States.

"SEC. 2. It shall be the duty of the person making any seizure under this title to apply, with due diligence, to the judge of the district court of the United States, or to the judge of the United States district court of the Canal Zone, or to the judge of a court of first instance in the Philippine Islands, having jurisdiction over the place within which the seizure is made, for a warrant to justfy the further detention of the property so seized, which warrant shall be granted only on oath or affirmation showing that there is known or probable cause to believe that the property seized is being or is intended to be exported or shipped from or taken out of the United States in violation of law; and if the judge refuses to issue the warrant, or application therefor is not made by the person making the seizure within a reasonable time, not exceeding 10 days after the seizure, the property shall forthwith be restored to the owner or person from whom seized. If the judge is satisfied that the seizure was justified under the provisions of this title and issues his warrant accordingly, then the property shall be detained by the person seizing it until the President, who is hereby expressly authorized so to do, orders it to be restored to the owner or claimant, or until it is discharged in due course of law on petition of the claimant, or on trial of condemnation proceedings, as hereinafter provided.

"SEC. 3. The owner or claimant of any property seized under this title may, at any time before condemnation proceedings have been instituted, as hereinafter provided, file his petition for its restoration in the district court of the United States, or the district court of the Canal Zone, or the court of first instance in the Philippine Islands, having jurisdiction over the place in which the seizure was made, whereupon the court shall advance the cause for hearing and determination with all possible dispatch, and, after causing notice to be given to the United States attorney for the district and to the person making the seizure, shall proceed to hear and decide whether the property seized shall be restored to the petitioner or forfeited to the United States.

"SEC. 4. Whenever the person making any seizure under this title applies for and obtains a warrant for the detention of the property, and (a) upon the hearing and determination of the petition of the owner or claimant restoration is denied, or (b) the owner or claimant fails to file a petition for restoration within 30 days after the seizure, the United States attorney for the district wherein it was seized, upon direction of the Attorney General, shall institute libel proceedings in the United States district court or the district court of the Canal Zone or the court of first instance of the Philippine Islands having jurisdiction over the place wherein the seizure was made, against the property for condemnation; and if, after trial and hearing of the issues involved, the property is condemned, it shall be disposed of by sale, and the proceeds thereof, less the legal costs and charges, paid into the Treasury.

"SEC. 5. The proceedings in such summary trials upon the petition of the owner or claimant of the property seized, as well as in the libel cases herein provided for, shall conform, as near as may be, to the proceedings in admiralty, except that either party may demand trial by jury of any issue of fact joined in such libel cases, and all such proceedings shall be at the suit of and in the name of the United States: *Provided*, That upon the payment of the costs and legal expenses of both the summary trials and the libel proceedings herein provided for, and the execution and delivery of a good and sufficient bond in an amount double the value of the property seized, conditioned that it will not be exported or used or employed contrary to the provisions of this title, the court, in its discretion, may direct that it be delivered to the owners thereof or to the claimants thereof.

"SEC. 6. Except in those cases in which the exportation of arms and munitions of war or other articles is forbidden by proclamation or otherwise by the President, as provided in section 1 of this title, nothing herein contained shall be construed to extend to, or interfere with any trade in such commodities, conducted with any foreign port or place wheresoever, or with any other trade which might have been lawfully carried on before the passage of this title, under the law of nations, or under the treaties or conventions entered into by the United States, or under the laws thereof.

"SEC. 7. Upon payment of the costs and legal expenses incurred in any such summary trial for possession or libel proceedings, the President is hereby authorized, in his discretion, to order the release and restoration to the owner or claimant, as the case may be, of any property seized or condemned under the provisions of this title.

"SEC. 8. The President may employ such part of the land or naval forces of the United States as he may deem necessary to carry out the purposes of this title.

"TITLE VII.

"CERTAIN EXPORTS IN TIME OF WAR UNLAWFUL.

"SECTION 1. Whenever during the present war the President shall find that the public safety shall so require, and shall make proclamation thereof, it shall be unlawful to export from or ship from or take out of the United States to any country named in such proclamation any article or articles mentioned in such proclamation, except at such time or times, and under such regulations and orders, and subject to such limitations and exceptions as the President shall prescribe, until otherwise ordered by the President or by Congress: *Provided, however*, That no preference shall be given to the ports of one State over those of another.

"SEC. 2. Any person who shall export, ship, or take out, or deliver or attempt to deliver for export, shipment, or taking out, any article in violation of this title, or of any regulation or order made hereunder, shall be fined not more than $10,000, or, if a natural person, imprisoned for not more than two years, or both; and any article so delivered or exported, shipped, or taken out, or so attempted to be delivered or exported, shipped, or taken out, shall be seized and forfeited to the United States; and any officer, director, or agent of a corporation who participates in any such violation shall be liable to like fine or imprisonment, or both.

"SEC. 3. Whenever there is reasonable cause to believe that any vessel, domestic or foreign, is about to carry out of the United States any article or articles in violation of the provisions of this title, the collector of customs for the district in which such vessel is located is hereby authorized and empowered, subject to review by the Secretary of Commerce, to refuse clearance to any such vessel, domestic or foreign, for which clearance is required by law, and by formal notice served upon the owners, master, or person or persons in command or charge of any domestic vessel for which clearance is not required by law, to forbid the departure of such vessel from the port, and it shall thereupon be unlawful for such vessel to depart. Whoever, in violation of any of the provisions of this section shall take, or attempt to take, or authorize the taking of any such vessel, out of port or from the jurisdiction of the United States, shall be fined not more than $10,000 or imprisoned not more than two years, or both; and, in addition, such vessel, her tackle, apparel, furniture, equipment, and her forbidden cargo shall be forfeited to the United States.

"TITLE VIII.

"DISTURBANCE OF FOREIGN RELATIONS.

"SECTION 1. Whoever, in relation to any dispute or controversy between a foreign government and the United States, shall willfully and knowingly make any untrue statement, either orally or in writing, under oath before any person authorized and empowered to administer oaths, which the affiant has knowledge or reason to believe will, or may be used to influence the measures or conduct of any foreign government, or of any officer or agent of any foreign government, to the injury of the United States, or with a view or intent to influence any measure of or action by the Government of the United States, or any branch thereof, to the injury of the United States, shall be fined not more than $5,000 or imprisoned not more than five years, or both.

"SEC. 2. Whoever within the jurisdiction of the United States shall falsely assume or pretend to be a diplomatic or consular, or other official of a foreign government duly accredited as such to the Government of the United States with intent to defraud such foreign government or any person, and shall take upon himself to act as such, or in such pretended character shall demand or obtain, or attempt to obtain from any person or from said foreign government, or from any officer thereof, any money, paper, document, or other thing of value, shall be fined not more than $5,000, or imprisoned not more than five years, or both.

"SEC. 3. Whoever, other than a diplomatic or consular officer or attaché, shall act in the United States as an agent of a foreign government without prior notification to the Secretary of State shall be fined not more than $5,000, or imprisoned not more than five years, or both.

"SEC. 4. The words 'foreign government,' as used in this act and in sections 156, 157, 161, 170, 171, 172, 173, and 220 of the act of March 4, 1909, entitled 'An act to codify, revise, and amend the penal laws of the United States,' shall be deemed to include any government, faction, or body of insurgents within a country with which the United States is at peace, which government, faction, or body of insurgents may or may not have been recognized by the United States as a government.

"SEC. 5. If two or more persons within the jurisdiction of the United States conspire to injure or destroy specific property situated within a foreign country and belonging to a foreign government or to any political subdivision thereof with which the United States is at peace, or any railroad, canal, bridge, or other public utility so situated, and if one or more of such persons commits an act within the jurisdiction of the United States to effect the object of the conspiracy, each of the parties to the conspiracy shall be fined not more than $5,000, or imprisoned not more than three years, or both. Any indictment or information under this section shall describe the specific property which it was the object of the conspiracy to injure or destroy.

"TITLE IX.

"PASSPORTS.

"SECTION 1. Before a passport is issued to any person by or under authority of the United States such person shall subscribe to and submit a written application duly verified by his oath before a person authorized and empowered to administer oaths, which said application shall contain a true recital of each and every matter of fact which may be required by law or by any rules authorized by law to be stated as a prerequisite to the issuance of any such passport. Clerks of United States courts, agents of the Department of State, or other Federal officials authorized, or who may be authorized, to take passport applications and administer oaths thereon, shall collect, for all services in connection therewith, a fee of $1, and no more, in lieu of all fees prescribed by any statute of the United States, whether the application is executed singly, in duplicate, or in triplicate.

"SEC. 2. Whoever shall willfully and knowingly make any false statement in an application for passport with intent to induce or secure the issuance of a passport under the authority of the United States, either for his own use or the use of another, contrary to the laws regulating the issuance of passports or the rules prescribed pursuant to such laws, or whoever shall willfully and knowingly use or attempt to use, or furnish to another for use, any passport the issue of which was secured in any way by reason of any false statement, shall be fined not more than $2,000 or imprisoned not more than five years, or both.

"SEC. 3. Whoever shall willfully and knowingly use, or attempt to use, any passport issued or designed for the use of another than himself, or whoever shall willfully and knowingly use or attempt to use any passport in violation of the conditions or restrictions therein contained, or of the rules prescribed pursuant to the laws regulating the issuance of passports, which said rules shall be printed on the passport; or whoever shall willfully and knowingly furnish, dispose of, or deliver a passport to any person, for use by another than the person for whose use it was originally issued and designed, shall be fined not more than $2,000 or imprisoned not more than five years, or both.

"SEC. 4. Whoever shall falsely make, forge, counterfeit, mutilate, or alter, or cause or procure to be falsely made, forged, counterfeited, mutilated, or altered any passport or instrument purporting to be a passport, with intent to use the same, or with intent that the same may be used by another; or whoever shall willfully and knowingly use, or attempt to use, or furnish to another for use any such false, forged, counterfeited, mutilated, or altered passport or instrument purporting to be a passport, or any passport validly issued which has become void by the occurrence of any condition therein prescribed invalidating the same, shall be fined not more than $2,000 or imprisoned not more than five years, or both.

"TITLE X.

"COUNTERFEITING GOVERNMENT SEAL.

"SECTION 1. Whoever shall fraudulently or wrongfully affix or impress the seal of any executive department, or of any bureau, commission, or office of the United States, to or upon any certificate, instrument, commission, document, or paper of any

description; or whoever, with knowledge of its fraudulent character, shall with wrongful or fraudulent intent use, buy, procure, sell, or transfer to another any such certificate, instrument, commission, document, or paper, to which or upon which said seal has been so fraudulently affixed or impressed, shall be fined not more than $5,000 or imprisoned not more than five years, or both.

"SEC. 2. Whoever shall falsely make, forge, counterfeit, mutilate, or alter, or cause or procure to be made, forged, counterfeited, mutilated, or altered, or shall willingly assist in falsely making, forging, counterfeiting, mutilating, or altering, the seal of any executive department, or any bureau, commission, or office of the United States, or whoever shall knowingly use, affix, or impress any such fraudulently made, forged, counterfeited, mutilated, or altered seal to or upon any certificate, instrument, commission, document, or paper, of any description, or whoever with wrongful or fraudulent intent shall have possession of any such falsely made, forged, counterfeited, mutilated, or altered seal, knowing the same to have been so falsely made, forged, counterfeited, mutilated, or altered, shall be fined not more than $5,000 or imprisoned not more than 10 years, or both.

"SEC. 3. Whoever shall falsely make, forge, counterfeit, alter, or tamper with any naval, military, or official pass or permit, issued by or under the authority of the United States, or with wrongful or fraudulent intent shall use or have in his possession any such pass or permit, or shall personate or falsely represent himself to be or not to be a person to whom such pass or permit has been duly issued, or shall willfully allow any other person to have or use any such pass or permit, issued for his use alone, shall be fined not more than $2,000 or imprisoned not more than five years, or both.

"TITLE XI.

"SEARCH WARRANTS.

"SECTION 1. A search warrant authorized by this title may be issued by a judge of a United States district court, or by a judge of a State or Territorial court of record, or by a United States commissioner for the district wherein the property sought is located.

"SEC. 2. A search warrant may be issued under this title upon either of the following grounds:

"1. When the property was stolen or embezzled in violation of a law of the United States; in which case it may be taken on the warrant from any house or other place in which it is concealed, or from the possession of the person by whom it was stolen or embezzled, or from any person in whose possession it may be.

"2. When the property was used as the means of committing a felony; in which case it may be taken on the warrant from any house or other place in which it is concealed, or from the possession of the person by whom it was used in the commission of the offense, or from any person in whose possession it may be.

"3. When the property, or any paper, is possessed, controlled, or used in violation of section 22 of this title; in which case it may be taken on the warrant from the person violating said section, or from any person in whose possession it may be, or from any house or other place in which it is concealed.

"SEC. 3. A search warrant can not be issued but upon probable cause, supported by affidavit, naming or describing the person and particularly describing the property and the place to be searched.

"SEC. 4. The judge or commissioner must, before issuing the warrant, examine on oath the complainant and any witness he may produce, and require their affidavits or take their depositions in writing and cause them to be subscribed by the parties making them.

"SEC. 5. The affidavits or depositions must set forth the facts tending to establish the grounds of the application or probable cause for believing that they exist.

"SEC. 6. If the judge or commissioner is thereupon satisfied of the existence of the grounds of the application or that there is probable cause to believe their existence, he must issue a search warrant, signed by him with his name of office, to a civil officer of the United States duly authorized to enforce or assist in enforcing any law thereof, or to a person so duly authorized by the President of the United States, stating the particular grounds or probable cause for its issue and the names of the persons whose affidavits have been taken in support thereof, and commanding him forthwith to search the person or place named, for the property specified, and to bring it before the judge or commissioner.

"SEC. 7. A search warrant may in all cases be served by any of the officers mentioned in its direction, but by no other person, except in aid of the officer on his requiring it, he being present and acting in its execution.

"SEC. 8. The officer may break open any outer or inner door or window of a house, or any part of a house, or anything therein, to execute the warrant, if, after notice of his authority and purpose, he is refused admittance.

"SEC. 9. He may break open any outer or inner door or window of a house, for the purpose of liberating a person who, having entered to aid him in the execution of the warrant, is detained therein, or when necessary for his own liberation.

"SEC. 10. The judge or commissioner must insert a direction in the warrant that it be served in the daytime, unless the affidavits are positive that the property is on the person or in the place to be searched, in which case he may insert a direction that it be served at any time of the day or night.

"SEC. 11. A search warrant must be executed and returned to the judge or commissioner who issued it within 10 days after its date; after the expiration of this time the warrant, unless executed, is void.

"SEC. 12. When the officer takes property under the warrant, he must give a copy of the warrant together with a receipt for the property taken (specifying it in detail) to the person from whom it was taken by him, or in whose possession it was found; or, in the absence of any person, he must leave it in the place where he found the property.

"SEC. 13. The officer must forthwith return the warrant to the judge or commissioner and deliver to him a written inventory of the property taken, made publicly or in the presence of the person from whose possession it was taken, and of the applicant for the warrant, if they are present, verified by the affidavit of the officer at the foot of the inventory and taken before the judge or commissioner at the time, to the following effect: 'I, R. S., the officer by whom this warrant was executed, do swear that the above inventory contains a true and detailed account of all the property taken by me on the warrant.'

"SEC. 14. The judge or commissioner must thereupon, if required, deliver a copy of the inventory to the person from whose possession the property was taken and to the applicant for the warrant.

"SEC. 15. If the grounds on which the warrant was issued be controverted, the judge or commissioner must proceed to take testimony in relation thereto, and the testimony of each witness must be reduced to writing and subscribed by each witness.

"SEC. 16. If it appears that the property or paper taken is not the same as that described in the warrant or that there is no probable cause for believing the existence of the grounds on which the warrant was issued, the judge or commissioner must cause it to be restored to the person from whom it was taken; but if it appears that the property or paper taken is the same as that described in the warrant and that there is probable cause for believing the existence of the grounds on which the warrant was issued, then the judge or commissioner shall order the same retained in the custody of the person seizing it or to be otherwise disposed of according to law.

"SEC. 17. The judge or commissioner must annex the affidavits, search warrants, return, inventory, and evidence, and if he has not power to inquire into the offense in respect to which the warrant was issued he must at once file the same, together with a copy of the record of his proceedings, with the clerk of the court having power to so inquire.

"SEC. 18. Whoever shall knowingly and willfully obstruct, resist, or oppose any such officer or person in serving or attempting to serve or execute any such search warrant, or shall assault, beat, or wound any such officer or person, knowing him to be an officer or person so authorized, shall be fined not more than $1,000 or imprisoned not more than two years.

"SEC. 19. Sections 125 and 126 of the Criminal Code of the United States shall apply to and embrace all persons making oath or affirmation or procuring the same under the provisions of this title, and such persons shall be subject to all the pains and penalties of said sections.

"SEC. 20. A person who maliciously and without probable cause procures a search warrant to be issued and executed shall be fined not more than $1,000 or imprisoned not more than one year.

"SEC. 21. An officer who in executing a search warrant willfully exceeds his authority, or exercises it with unnecessary severity, shall be fined not more than $1,000 or imprisoned not more than one year.

"SEC. 22. Whoever, in aid of any foreign government, shall knowingly and willfully have possession of or control over any property or papers designed or intended for use or which is used as the means of violating any penal statute, or any of the rights or obligations of the United States under any treaty or the law of nations, shall be fined not more than $1,000 or imprisoned not more than two years, or both.

"SEC. 23. Nothing contained in this title shall be held to repeal or impair any existing provisions of law regulating search and the issue of search warrants.

"TITLE XII.

"USE OF MAILS.

"SECTION 1. Every letter, writing, circular, postal card, picture, print, engraving, photograph, newspaper, pamphlet, book, or other publication, matter, or thing, of any kind, in violation of any of the provisions of this Act, is hereby declared to be nonmailable matter and shall not be conveyed in the mails or delivered from any post office or by any letter carrier: *Provided*, That nothing in this act shall be so construed as to authorize any person other than an employee of the Dead Letter Office, duly authorized thereto, or other person upon a search warrant authorized by law, to open any letter not addressed to himself.

"SEC. 2. Every letter, writing, circular, postal card, picture, print, engraving, photograph, newspaper, pamphlet, book, or other publication, matter or thing, of any kind, containing any matter advocating or urging treason, insurrection, or forcible resistance to any law of the United States, is hereby declared to be nonmailable.

"SEC. 3. Whoever shall use or attempt to use the mails or Postal Service of the United States for the transmission of any matter declared by this title to be nonmailable, shall be fined not more than $5,000 or imprisoned not more than five years, or both. Any person violating any provision of this title may be tried and punished either in the district in which the unlawful matter or publication was mailed, or to which it was carried by mail for delivery according to the direction thereon, or in which it was caused to be delivered by mail to the person to whom it was addressed.

"TITLE XIII.

"GENERAL PROVISIONS.

"SECTION 1. The term 'United States' as used in this act includes the Canal Zone and all territory and waters, continental or insular, subject to the jurisdiction of the United States.

"SEC. 2. The several courts of first instance in the Philippine Islands and the district court of the Canal Zone shall have jurisdiction of offenses under this act committed within their respective districts, and concurrent jurisdiction with the district courts of the United States of offenses under this act committed upon the high seas, and of conspiracies to commit such offenses, as defined by section 37 of the act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909, and the provisions of said section, for the purpose of this act, are hereby extended to the Philippine Islands, and to the Canal Zone. In such cases the district attorneys of the Philippine Islands and of the Canal Zone shall have the powers and perform the duties provided in this act for United States attorneys.

"SEC. 3. Offenses committed and penalties, forfeitures, or liabilities incurred prior to the taking effect hereof under any law embraced in or changed, modified, or repealed by any chapter of this act may be prosecuted and punished, and suits and proceedings for causes arising or acts done or committed prior to the taking effect hereof may be commenced and prosecuted, in the same manner and with the same effect as if this act had not been passed.

"SEC. 4. If any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder thereof but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered."

And the Senate agree to the same.

E. Y. WEBB,
C. C. CARLIN,
A. J. VOLSTEAD,
Managers on the part of the House.

LEE S. OVERMAN,
DUNCAN U. FLETCHER,
KNUTE NELSON,
Managers on the part of the Senate.

STATEMENT.

On May 4, 1917, when the House passed this bill and sent it to the Senate, the Senate was already considering a similar bill, S. 2, which had been introduced in the Senate. The Senate continued the consideration of its bill and after perfecting and agreeing to it, took up the House bill and without considering it in its detailed provisions adopted the Senate bill, as it had been perfected, as an amendment for the House bill by striking out all of the House bill after the enacting clause and substituting the Senate bill as it had been agreed upon in the Senate. It therefore became the duty of the conferees to weld these two bills into one by adopting the provisions from one or the other, with such amendments as seemed necessary to the conferees within the limits of the conference, to perfect the bill and bring its various provisions into harmony.

In the main the two bills contained similar provisions, but expressed in different language. The conferees took up the Senate amendment and made it the basis of their final agreement. Some of the sections were agreed to as written, others were amended so as to embody provisions contained in the House bill, or sections from the House bill were substituted for them, and in a few instances sections were rewritten in conference in order to harmonize the views of the two Houses.

It would be very difficult to point out in minute detail the differences between the bill as it passed the House and that agreed upon in conference, and this would serve no very useful purpose, since they can be as easily ascertained by a comparison. The material changes made in the House bill are, however, pointed out below.

ARRANGEMENT.

Chapter 2 of the Senate amendment was brought forward and made chapter 1, thereby making the order of chapters conform to the order of titles in the House bill. The conferees adopted the House plan of designating the main subdivisions of the bill as "title" instead of "chapter." The several sections under each title were consecutively numbered, beginning in each title with section 1.

TITLE I.

ESPIONAGE.

The several provisions under this title in the conferees' report do not materially change the provisions of this title as passed by the House. Section 1 sets out the places connected with the national defense to which the prohibitions of the section apply while the similar provision of the House bill designates such places in general terms.

Section 2 of the House bill made the person guilty for doing the things enumerated therein "with intent or knowledge, or reason to believe that it is to be used to the injury of the United States." Under section 2 (a) as agreed upon, this provision is made to read, "with intent or reason to believe that it is to be used to the injury of the United States or to the advantage of a foreign nation."

Section 3 is not materially changed from the provision contained in the bill as it passed the House, except by the addition thereto of the following provision: "or shall willfully obstruct the recruiting or enlistment service of the United States to the injury of the service, or of the United States."

Section 4 as heretofore agreed to in conference was entirely stricken from the amendment reported to the House by the conferees, agreeable to the instructions of the House given May 31, 1917, in recommitting the bill to conference.

Section 6 was not in the House bill but was taken from the Senate amendment. It was adopted because of the changes made in section 1, and for the further reason that section 1202 of the House bill, which gave the words "national defense" a broad meaning, was stricken out.

TITLE II.

VESSELS IN PORTS OF THE UNITED STATES.

No material change was made in any of the sections under this title from those contained in the House bill.

TITLE III.

INJURING VESSELS ENGAGED IN FOREIGN COMMERCE.

The House provisions under this title were not materially changed.

TITLE IV.

INTERFERENCE WITH FOREIGN COMMERCE BY VIOLENT MEANS.

The provisions of the House bill under this title were changed in conference by eliminating the clause limiting it to the time "when the United States is at war" and by other changes in the language used, so as to require an intent to prevent, etc., foreign commerce, by the means indicated, as the basis for the criminal charge. It also strikes out the clause which protected the places where the articles referred to were "produced or stored" and substitutes similar protection to "the places where they may be while in such foreign commerce."

TITLE V.

ENFORCEMENT OF NEUTRALITY.

No material change was made in the provisions under this title. The power given to the Secretary of the Treasury under section 505 of the House bill was transferred in conference to the Secretary of Commerce. This amendment was adopted to make the bill conform to the policy adopted heretofore.

TITLE VI.

SEIZURE OF ARMS AND OTHER ARTICLES INTENDED FOR EXPORT.

Section 1 not only authorizes the seizure of arms and munitions of war about to be exported, shipped from, or taken out of the United States, in violation of law, as provided by section 1 of the House bill, but adds "or other articles" so exported, etc.

Section 6 did not appear in the bill as it passed the House but was taken from the Senate amendment. It makes no material change in the bill and adds no new matter. It is but a legislative declaration that the provisions of this title are not to be interpreted to extend by implication to articles in commerce other than those forbidden by the President's proclamation as expressly provided for.

Other sections under this title have not been materially changed.

TITLE VII.

CERTAIN EXPORTS IN TIME OF WAR UNLAWFUL.

None of the provisions of this title were contained in the bill as it passed the House. It was taken, after some modifications and amendments, from the Senate amendment.

The provisions of this title are limited to the period of the present war, and vest in the President the power to regulate exportation, etc., whenever he shall find that the public safety shall so require. These provisions were agreed to in conference because of the present necessity that this power should be vested in some responsible head in order that we may better conserve our resources and more efficiently use both our exports and our exporting facilities to aid in the prosecution of the war, as well as to safeguard them from being used in such a way as to finally benefit the enemy.

TITLE VIII.

DISTURBANCE OF FOREIGN RELATIONS.

Section 5 was so amended as to include, in addition to property situated within a foreign country and belonging to a foreign government or a political subdivision thereof with which the United States is at peace, also "any railroad, canal, bridge, or other public utility so situated," and the provision that "such injury or destruction would constitute a crime punished by imprisonment under the laws of the United States," was stricken out. The remaining provisions under this title were not materially changed in conference.

TITLE IX.

PASSPORTS.

No material change was made in conference of the provisions of this title.

TITLE X.

COUNTERFEITING GOVERNMENT SEAL.

No material change was made in conference of the provisions of this title.

TITLE XI.

SEARCH WARRANTS.

This title was entirely rewritten in conference. The new title as presented by the conferees was based upon the New York law on this subject and follows generally the policy of that law. It has written into it many of the provisions of the title as passed by the House.

TITLE XII.

USE OF MAILS.

Section 1100 of the bill as it passed the House was rewritten into sections 1 and 2 of the bill reported by the conferees. The material addition made in section 1 to the provisions contained in section 1100 is the proviso which reads as follows:

"*Provided*, That nothing in this act shall be so construed as to authorize any person other than an employee of the Dead Letter Office, duly authorized thereto, or other person upon a search warrant authorized by law, to open any letter not addressed to himself."

Section 2 of the title as reported by the conferees, substitutes for "of a treasonable character, or of a character advocating the destruction of or injury to the Government by violence," the following: "containing any matter advocating or urging treason, insurrection, or forcible resistance to any law of the United States."

The other provisions under this title have not been materially changed.

TITLE XIII.

GENERAL PROVISIONS.

Sections 1200 and 1201 of the bill as it passed the House have not been changed. Section 1202 has been stricken out for the reason that the amendments in the several sections of the bill made this section unnecessary. Sections 3 and 4 as reported by the conferees are new sections added by the conferees.

Section 3 appeared at several different places in the Senate amendment. It was stricken out at these several places in the bill and added under this title and made applicable to the entire bill.

Section 4 was added, following the precedents in other legislation, as a declaration of the intent of Congress, to guide the courts in event the constitutionality of any of the numerous provisions contained in the bill are hereafter brought in question.

E. Y. WEBB,
C. C. CARLIN,
A. J. VOLSTEAD,
Managers on the part of the House.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and on a division (demanded by Mr. WEBB) there were—ayes 86, noes 22.

So the conference report was agreed to.

On motion of Mr. WEBB, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. BRODBECK for Friday, June 8, to attend the unveiling of the Virginia memorial on the battle field of Gettysburg, Pa.

To Mr. BLAND, at the request of Mr. WOOD of Indiana, for five days, on account of illness.

To Mr. ESTOPINAL, at the request of Mr. DUPRÉ, for three days, on account of illness.

LEAVE TO EXTEND REMARKS.

Mr. WILSON of Louisiana. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the conference report upon the sundry civil appropriation bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. CAMPBELL of Pennsylvania. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting therein a resolution adopted by the Fraternal Order of Eagles recommending the purchase of $1,000,000 worth of liberty bonds.

The SPEAKER. Is there objection?

There was no objection.

RIVER AND HARBOR APPROPRIATION BILL.

Mr. SMALL. Mr. Speaker, it was my intention to move to go into the Committee of the Whole House on the state of the Union for the consideration of the river and harbor bill (H. R. 4285), but gentlemen have indicated to me that it is too late an hour to do so. I desire to give notice that to-morrow morning after the reading of the Journal I shall make that motion.

ENROLLED JOINT RESOLUTION SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled joint resolution of the following title, when the Speaker signed the same:

H. J. Res. 94. Joint resolution authorizing the Board of Regents of the Smithsonian Institution to permit the Secretary of War to erect temporary buildings in the Smithsonian grounds.

ADJOURNMENT.

Mr. WEBB. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 56 minutes p. m.) the House adjourned until to-morrow, Friday, June 8, 1917, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication of the Secretary of State submitting an urgent estimate of deficiency in the appropriation for public printing and binding for the International Union of American Republics, to be executed by the Public Printer, for the fiscal year ending June 30, 1917 (H. Doc. No. 171); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Mattaponi River, Va., with a view to removing the bars and securing increased depth of water at the mouth (H. Doc. No. 172); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

3. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination and survey of Siuslaw River, Oreg., from Acme to the entrance (H. Doc. No. 173); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

4. A letter from the Secretary of War, transmitting copy of a letter from ex-Secretary Garrison in regard to stationing troops of the Regular Army in national parks (H. Doc. No. 174); to the Committee on Military Affairs and ordered to be printed.

5. A letter from the Secretary of the Navy, transmitting letter in regard to appropriation for emergency hospital construction (H. Doc. No. 175); to the Committee on Appropriations and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and memorials were introduced and severally referred as follows:

By Mr. DENT: A bill (H. R. 4892) authorizing the President to take possession on behalf of the United States for use as sites for permanent aviation stations for the Army and Navy and for aviation school purposes of the whole of North Island in the Harbor of San Diego, Cal., and for other purposes; to the Committee on Military Affairs.

By Mr. NEELY: A bill (H. R. 4893) amendatory of the act of May 11, 1912, granting pensions to certain enlisted men, soldiers, and officers who served in the Civil War and the War with Mexico; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4894) amendatory of the act of May 11, 1912, granting pensions to certain enlisted men, soldiers, and officers who served in the Civil War and the War with Mexico; to the Committee on Invalid Pensions.

By Mr. McFADDEN: A bill (H. R. 4895) to create a department of munitions; to the Committee on Military Affairs.

By Mr. PARK: A bill (H. R. 4896) disfranchising slackers; to the Committee on the Election of President, Vice President, and Representatives in Congress.

By Mr. HULBERT: A bill (H. R. 4897) to amend section 10 of the national-defense act approved June 3, 1916, and for other purposes; to the Committee on Military Affairs.

By the SPEAKER: Memorial of the Legislature of the Territory of Hawaii, requesting Congress to increase the salaries of certain executive and judicial offices in the Territory of Hawaii; to the Committee on the Territories.

Also, memorial of the Legislature of the Territory of Hawaii, recommending that Congress enact legislation admitting a limited number of Chinese laborers into the Territory of Hawaii, with proper restrictions; to the Committee on Immigration and Naturalization.

Also, memorial of the Legislature of the State of South Dakota, requesting Congress to authorize the Secretary of the Interior to appoint a resident commissioner in South Dakota to pass upon the qualifications of Indians making application for patents; to the Committee on Indian Affairs.

Also, memorial of the House of Delegates of Porto Rico, pledging the loyalty of the people of Porto Rico to the United States in the war with Germany; to the Committee on Foreign Affairs.

Also, memorial of the Legislature of the State of Minnesota, requesting Congress to enact an enabling law making effective the migratory bird treaty with Canada; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. BRODBECK: A bill (H. R. 4898) granting a pension to Robert A. Herbst; to the Committee on Pensions.

By Mr. BRUMBAUGH: A bill (H. R. 4899) granting a pension to Frank Watzek; to the Committee on Pensions.

By Mr. GORDON: A bill (H. R. 4900) granting a pension to Mary Gehris, widow of Jacob Diehl, late captain of Company H, Twenty-fourth Ohio Volunteer Infantry; to the Committee on Invalid Pensions.

By Mr. KRAUS: A bill (H. R. 4901) granting an increase of pension to Chauncey B. Knowlton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4902) granting an increase of pension to Austin Wright; to the Committee on Invalid Pensions.

By Mr. PETERS: A bill (H. R. 4903) granting an increase of pension to Charles E. Peabody; to the Committee on Invalid Pensions.

By Miss RANKIN: A bill (H. R. 4904) granting a pension to Elizabeth H. Du Hamel; to the Committee on Invalid Pensions.

By Mr. SANDERS of Indiana: A bill (H. R. 4905) granting an increase of pension to Cullen Bradley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4906) granting a pension to Albert G. Norman; to the Committee on Pensions.

Also, a bill (H. R. 4907) granting an increase of pension to William Burnett; to the Committee on Invalid Pensions.

By Mr. SWITZER: A bill (H. R. 4908) granting an increase of pension to John M. Tippie; to the Committee on Invalid Pensions.

By Mr. TINKHAM: A bill (H. R. 4909) for the relief of Henry Eckford Rhoades; to the Committee on Naval Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of Trades and Labor Assembly of Jacksonville, Ill., urging Congress to take such measures as may be necessary to eliminate all sources of profit in the production, transportation, and distribution of the food supply of the country; to the Committee on Agriculture.

Also (by request), memorial of National Woman's Party of Colorado, urging the passage of the Susan B. Anthony amendment as a war measure; to the Committee on the Judiciary.

Also (by request), petitions of sundry churches of Philadelphia and Hurricane Township Sunday School Association, of Elsberry, Mo., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also (by request), memorial of Independent Order B'rith Abraham of New York, pledging loyalty and support to the country; to the Committee on Military Affairs.

By Mr. CARY: Petition of the Amalgamated Lithographers of America, protesting against an increase of rates on second-class mail matter and against an increase of postage rates on view and picture cards; to the Committee on Ways and Means.

Also, petitions of A. Fracheto, Harry A. Vernon, Lorenz Fritsch, W. C. Baumann, R. F. Heind, Starkie M. Swenson, A. W. L. Drahos, W. H. Douglas, and H. A. Anderson, all of Milwaukee, Wis., urging early and favorable action on a bill now pending in Congress, known as the daylight-saving bill; to the Committee on Interstate and Foreign Commerce.

By Mr. DALE of New York: Petition of the New York Social Hygiene Society, relative to the patent on salvarsan; to the Committee on Patents.

Also, petition of Arthur Capper, of Topeka, Kans., relative to increase in postage on second-class mail matter; to the Committee on Ways and Means.

By Mr. DIXON: Petitions of sundry churches of the State of Indiana, favoring national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. ESCH: Petitions of sundry citizens of the State of Wisconsin, favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Chicago, relative to terms of peace proposed by United States and European allies; to the Committee on Foreign Affairs.

By Mr. GRAHAM of Illinois: Petition of Local Union No. 2384 of the United Mines Workers of America, Matherville, Ill., protesting against unreasonable prices on necessaries of life, especially food; to the Committee on Agriculture.

Also, petition of Women's Trade Union League of Rock Island and Moline, Ill., and vicinity, for Government control of the food question; to the Committee on Agriculture.

Also, petition of Board of Supervisors of the County of Rock Island, in the State of Illinois, urging Congress to act quickly, decisively, and fearlessly in regulating the abnormal inflation of food prices, etc.; to the Committee on Agriculture.

Also, petition of Tri-City Federation of Labor, urging Congress to immediately take such measures as may be necessary to eliminate all sources of profit in the production, transportation, and distribution of food supplies; to the Committee on Agriculture.

Also, petition of Federal Employees' Union, No. 15332, of Davenport, Iowa, and Rock Island and Moline, Ill., for a bill

giving the Government complete control of prices of foodstuffs and other necessaries; to the Committee on Agriculture.

Also, petition of Plow City Lodge, No. 169, Brotherhood of Railway Car Men of America, of Moline, Ill., that Congress immediately take such steps as may be necessary to eliminate all sources of profit in the production, transportation, and distribution of food supplies; to the Committee on Agriculture.

Also, petition of Tri-City Federation, District 36, International Association of Machinists, for a bill to punish the speculation by any person or body of persons for the purpose of cornering the market, and for other purposes, and providing a penalty therefor; to the Committee on Agriculture.

Also, petition of affiliated members of Woman's Club of Moline, Ill., urging 5-mile zone around all military camps, training camps, and Army posts, and all places where troops are stationed, such zone to be free from intoxicants and camp followers; to the Committee on Military Affairs.

Also, petition of the Woman's Club of Rock Island, Ill., urging 5-mile zone within which sale of liquor be prohibited and camp followers forbidden be established around all Army posts, military encampments, and training camps; to the Committee on Military Affairs.

Also, petition of Woman's Club of Moline, Ill., urging 5-mile zone around each military camp, training camp, and Army post, such zone to be free from all forms of alcoholic drinks and camp followers; to the Committee on Military Affairs.

By Mr. GREENE of Massachusetts: Petitions of sundry citizens and church organizations of the State of Massachusetts, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. GRIEST: Petitions of Bart Women's Christian Temperance Union and other church organizations and churches of Pennsylvania, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of F. A. Rieker Brewing Co., Wacker Bros.' Brewery, and Haefner's Brewery, all of Lancaster, Pa., and the Columbia Brewing Co., of Columbia, Pa., against national prohibition; to the Committee on the Judiciary.

By Mr. HAWLEY: Petitions of F. E. Allen and others, Marshfield; C. A. Davidson and others, Myrtle Point; and Mrs. Carrie Young and others, Woodburn, all in the State of Oregon, favoring the immediate passage of legislation for national prohibition as a war emergency measure; to the Committee on the Judiciary.

Also, petition of Ruth B. McElwain and others of Clatskanie, Oreg., attested by Rev. S. B. Johnson, pastor of the Methodist Episcopal Church of that place, favoring the immediate passage of legislation for national prohibition as a war emergency measure; to the Committee on the Judiciary.

By Mr. HULBERT: Petition of 212 citizens of New York, against any kind of prohibition; to the Committee on the Judiciary.

Also, petitions of John J. Dempsey and others, of New York, relative to freedom for Ireland; to the Committee on Foreign Affairs.

By Mr. HUTCHINSON: Memorial of New Jersey State Organization for Public Health Nursing, favoring suffrage amendment; to the Committee on the Judiciary.

Also, memorial of Typographical Union No. 628, of Somerville, N. J., against prohibition as a war measure; to the Committee on the Judiciary.

Also, petitions of 1,200 persons of Trenton and sundry citizens of vicinity of Trenton, N. J., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. KELLEY of Michigan: Petition of Rev. T. W. Hughes and 45 others, of Mason, Mich., relative to prohibition of liquor traffic; to the Committee on the Judiciary.

By Mr. KELLY of Pennsylvania: Petition of 20,000 citizens of Allegheny County and citizens of Versailles, Pa., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of members of First Presbyterian Church of Monroeville, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Petition of E. J. Horton & Co., of Providence, R. I., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of Johnson, Sheridan & Co., of Providence, R. I., protesting against Hardwick amendment; to the Committee on Banking and Currency.

By Mr. MAGEE: Memorial of union mass meeting of churches of Cortland, N. Y., against polygamy; to the Committee on the Judiciary.

By Mr. MORIN: Petition of Pennsylvania Chocolate Co., of Pittsburgh, Pa., urging support of the Hardwick amendment to the Federal reserve act; to the Committee on Banking and Currency.

By Mr. NOLAN: Petition of Heywood Bros. & Wakefield Co., of San Francisco, Cal., protesting against the proposed tax on reed and rattans; to the Committee on Ways and Means.

By Mr. O'SHAUNESSY: Petitions of Rhode Island Anti-Saloon League and Woman's Christian Temperance Union of Rhode Island, favoring national prohibition as a war measure; to the Committee on the Judiciary.

Also, petitions of sundry manufacturers of Providence, R. I., relative to graduated tax on cigars; to the Committee on Ways and Means.

By Mr. PARKER of New York: Petitions of sundry citizens and church organizations of New York, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. PETERS: Petition of George E. Grant and 46 others, of Unity, Me., urging national prohibition; to the Committee on the Judiciary.

By Mr. PRATT: Petition of First Methodist Episcopal Church of Forest Home, at Ithaca, N. Y., favoring the abolition of liquor as a war measure; to the Committee on the Judiciary.

Also, petition of the Woman's Christian Temperance Union of Prattsburg, N. Y., by Miss C. M. Van Valkenburg, president, favoring the Gronna-Randall bill for the conservation of foodstuffs used in making intoxicating liquors and opposing taxing liquors; to the Committee on the Judiciary.

Also, petition of Clarence Dillenbeck, for the Wheeler (N. Y.) Grange, favoring certain prohibition measures; to the Committee on the Judiciary.

Also, petition of an assemblage in Newark Valley, N. Y., by C. H. Gillen and Asher Evans, committee, favoring the prohibition of the manufacture and sale of intoxicating liquors; to the Committee on the Judiciary.

By Mr. RAKER: Petitions of Dr. F. K. Ainsworth and Dr. H. E. Alderson, of San Francisco, Cal., relative to abrogation of patents held by German firms for manufacture of salvarsan; to the Committee on Patents.

Also, petitions of William A. Sullivan, grand secretary State League Iroquois Clubs, of San Francisco, Cal., indorsing bills for increase in salaries of inspectors of steam vessels; to the Committee on Appropriations.

Also, petition of R. R. Rogers, of San Francisco, Cal., relative to postal situation in United States; to the Committee on Ways and Means.

Also, petition of G. A. Sutaff, of Dunsmuir, Cal., relative to tax on jewelry business; to the Committee on Ways and Means.

Also, petition of B. I. Wheeler, of Berkeley, Cal., relative to appropriation for farm advisers; to the Committee on Agriculture.

Also, petitions of R. H. Bennett, secretary, and G. Wormser, president, Northern California Wholesale Grocers' Association, against clause in House bill 4125, endangering present pure-food law; to the Committee on Agriculture.

Also, petition of E. B. Wilcox, of Marysville, Cal., against section 3 of House bill 4125, relative to name of producer on receptacles of food; to the Committee on Agriculture.

Also, petition of Loren G. Garrison, of Lookout, Cal., against tax on medicines, etc.; to the Committee on Ways and Means.

By Mr. RANDALL: Petition of 434 citizens of Trenton, N. J., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petitions of 386 citizens of Camden, 251 citizens of Bridgeton, 445 citizens of Scranton, and 410 citizens of Wilkes-Barre, Pa., favoring national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. REED: Petition of Mrs. John D. Price, Messrs. Joel Ferree Bedell, jr., Joe Henry Bonsall, W. P. Edwards, jr., Bill Gravely, and Archer H. Gravely, jr., teacher and members, respectively, of a Sunday school class of the Kanawha Presbyterian Church, of Charleston, W. Va., urging the conservation of foodstuffs used in the manufacture of liquors and the passage of all prohibition measures; to the Committee on the Judiciary.

Also, petition of Rev. E. J. Woofter, pastor, Fred D. Powell, clerk, and the members of the congregation of the Salem (W. Va.) Baptist Church, numbering 700, urging the prohibition of the manufacture and sale of intoxicating liquors during the present war and the creation of a zone around all concentration camps in which no lewd women shall be allowed; to the Committee on the Judiciary.

By Mr. ROWE: Petition of Walter Truslow, M. D., urging the abrogation of the patent on salvarsan; to the Committee on Patents.

Also, petition of Claflin, Thayer & Co., of New York City, urging an advance on second-class mail rates; to the Committee on Ways and Means.

Also, petition of the New York Job Press Feeders' Union, No. 1, protesting against any increase in second-class postage rates, or any change in the system in handling the second-class postage matter; to the Committee on Ways and Means.

Also, petition of Merchants' Association of New York, urging the enactment of measures for the administration of food control, and commending the selection of Mr. Herbert C. Hoover to organize and administer the department of food control; to the Committee on Agriculture.

Also, memorial of the National Association of State Universities, asking that the food supplies be not wasted in the manufacture of intoxicating liquors during the war; to the Committee on the Judiciary.

By Mr. ROWLAND: Petition of members of the Pine Street Presbyterian Church, of Harrisburg, and citizens of the sixth ward, Bradford, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. SANDERS of Indiana: Petitions of Asbury H. Manuel and others, of Greencastle; Clarence D. Royse and others, of Rockville; Julian D. Hogate and others, of Danville; George F. Carmack and others, of Dana; Centenary Methodist Church, of Terre Haute; and sundry citizens of fifth congressional district of Indiana, favoring national prohibition; to the Committee on the Judiciary.

By Mr. SNELL: Petition of citizens of Plattsburg, N. Y., and vicinity, for the immediate enactment of prohibition of the manufacture of alcoholic liquors as a measure of food conservation, and for the immediate prohibition of the sale of liquors for beverage purposes in order to conserve the health, wealth, labor, transport facilities, and military efficiency of the people; to the Committee on the Judiciary.

By Mr. SNYDER: Petitions of Men's Baraca Class of First Baptist Church of Ilion, N. Y., and Florence, N. Y., and sundry citizens of Oneida County, N. Y., favoring national prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of Jones Bros., of Utica, N. Y., against prohibition as a war measure; to the Committee on the Judiciary.

By Mr. SWITZER: Petitions of sundry citizens of Ironton, Ohio, and vicinity, favoring national prohibition; to the Committee on the Judiciary.

By Mr. TAGUE: Petition of Boston Automobile Dealers' Association, Boston, Mass., relative to amended bill in reference to tax on automobiles; to the Committee on Ways and Means.

By Mr. TAYLOR of Colorado: Petition of residents of Salida, Colo., favoring the immediate submission of the Federal amendment for woman suffrage; to the Committee on the Judiciary.

By Mr. TILSON: Petition of Connecticut Medical Society, urging Congress to declare void patents on salvarsan; to the Committee on Patents.

Also, petition of churches of New Haven and Baptist Church of Brenford, Conn., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. WARD: Petition of Presbyterian Christian Endeavor of Jefferson, N. Y., favoring the enactment of a law prohibiting the manufacture and use of alcoholic liquors as a war measure; to the Committee on the Judiciary.

Also, petition of Henry W. Brink, presiding officer of a meeting of members of Reformed Church of Woodstock and West Hurley, N. Y., in favor of enactment of a law to prohibit the manufacture and sale of alcoholic liquors as a war measure; to the Committee on the Judiciary.

Also, petition of Rev. W. H. McPherson and other citizens of Stone Ridge, N. Y., favoring the enactment of a law prohibiting the manufacture and sale of alcoholic liquors as a war measure; to the Committee on the Judiciary.

By Mr. WASON: Petition of 34 residents of the city of Keene, N. H., for the Nation's sake, for humanity's sake, and to conserve the Nation's resources, urging the adoption as soon as possible of some effective method to prohibit the manufacture and sale of intoxicating liquor, at least during the war; to the Committee on the Judiciary.

By Mr. YOUNG of North Dakota: Memorial of Kidder County Sunday School Convention, urging national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. ZIHLMAN: Petitions of members of Home Missionary Society of Garrett Park Methodist Episcopal Church, Social Service Commission of Diocese of Maryland, 41 persons of Damascus and Salem, Miss Maggie Addison, secretary Woman's Home Missionary Society of Methodist Episcopal Church of Ijamsville, and 15 people of Barton, all in the State of Maryland, favoring national prohibition; to the Committee on the Judiciary.

SENATE.

FRIDAY, *June 8, 1917.*

Rev. J. J. Muir, D. D., of the city of Washington, offered the following prayer:

Our Father and our God, the God of our fathers and our God, too, we humbly beseech of Thee Thy blessing that in these days of anxiety and grave responsibility we may be divinely guided, and realize all the while that the voices to which we listen are the voices of truth, of duty, of high and holy service for the country that we love. Give unto the President all necessary wisdom, so that, with his counselors, he may be guided in those ways which will be for the highest interest and welfare, not only of our land, but of the nations of the earth. So guide, we beseech of Thee, all on whom there shall come new demands of duty, whether on the "far-flung battle line" or in some places of responsibility in the home land, there may be always in evidence that only the right can prevail. And to Thee and Thy name shall be all the glory, through Christ our Lord. Amen.

The Journal of the proceedings of Tuesday, June 5, 1917, was read and approved.

SENATOR FROM OREGON.

Mr. CHAMBERLAIN. Mr. President, I present the credentials of Hon. CHARLES L. MCNARY, appointed by the governor of Oregon to succeed the late Senator Harry Lane of that State. I ask that the credentials be read.

The VICE PRESIDENT. The Secretary will read the credentials.

The Secretary read the credentials, as follows:

STATE OF OREGON.

To all to whom these presents shall come, greeting:

Know ye that, reposing special trust and confidence in the capacity, integrity, and fidelity of CHARLES L. MCNARY, a citizen of Salem, Marion County, Oreg., I, James Withycombe, governor of the State of Oregon, do, in the name and by the authority of said State, by these presents appoint and commission him, the said CHARLES L. MCNARY, United States Senator from Oregon to fill the unexpired term of the late Senator Harry Lane, of Portland, Oreg., in accordance with the provisions of chapter 48 of the General Laws of Oregon for 1915.

In testimony whereof I have caused the seal of the State to be affixed at the city of Salem, this 29th day of May, 1917.

[SEAL.] JAMES WITHYCOMBE, *Governor.*

By the governor:

BEN W. OLCOTT,
Secretary of State.

Mr. CHAMBERLAIN. Mr. President, Mr. MCNARY is present in the Chamber and ready to take the oath of office.

The VICE PRESIDENT. There being no objection to the credentials, the duly appointed Senator from Oregon will present himself at the Secretary's desk and take the oath of office.

Mr. MCNARY, escorted by Mr. CHAMBERLAIN, advanced to the Vice President's desk; and the oath prescribed by law having been administered to him, he took his seat in the Senate.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the joint resolution (S. J. Res. 70) relating to the service of certain retired officers of the Army.

The message also announced that the House had passed the bill (S. 995) to authorize the issue to States and Territories and the District of Columbia of rifles and other property for the equipment of organizations of home guards, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 291) to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage and better to enforce the criminal laws of the United States, and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1918, and for other purposes.

The message further announced that the House disagrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes; further insists upon its amendment to the amendment of the Senate numbered 2 to the bill; further insists upon its disagreement to the residue of the

amendments of the Senate; asks a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. FITZGERALD, Mr. SHERLEY, and Mr. GILLETT managers at the further conference on the part of the House.

ENROLLED BILL AND JOINT RESOLUTION SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bill and joint resolution, and they were thereupon signed by the Vice President:

H. R. 11. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1918, and for other purposes; and

H. J. Res. 94. Joint resolution authorizing the Board of Regents of the Smithsonian Institution to permit the Secretary of War to erect temporary buildings in the Smithsonian grounds.

PETITIONS AND MEMORIALS.

Mr. NELSON presented a memorial of sundry citizens of Eagle Bend, Minn., remonstrating against the enactment of legislation to change the name of oleomargarine to butterine, and to change the rate of tax on butterine, etc., which was referred to the Committee on Agriculture and Forestry.

He also presented petitions of sundry citizens of Minnesota, praying for national prohibition as a war measure, which were referred to the Committee on the Judiciary.

Mr. GALLINGER presented petitions of the congregation of the First Baptist Church of Lyme, and of sundry citizens of Sunapee, in the State of New Hampshire, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. BRADY. I present resolutions passed by the Wallace and Vicinity Trades and Labor Council, Wallace, Idaho. This council is affiliated with the American Federation of Labor and represents 18 labor organizations. The resolutions favor the retirement of superannuated employees of the Government on a reasonable allowance. I am very much in sympathy with the purpose of these resolutions and have supported and will support in the future any measure that will accomplish this purpose. I ask to have the resolutions printed in the RECORD and referred to the Committee on Education and Labor.

There being no objection, the resolutions were referred to the Committee on Education and Labor and ordered to be printed in the RECORD, as follows:

WALLACE AND VICINITY TRADES AND LABOR COUNCIL,
Wallace, Idaho, May 16, 1917.

Resolution of the Wallace and Vicinity Trades and Labor Council.

Whereas it is a matter of official record that the Government service is seriously impaired because of the large number of superannuated employees carried on the rolls; and

Whereas, in view of the great emergency with which the Government has to cope at the present time because of the state of war now existing, it is important that immediate steps be taken for promoting the highest degree of efficiency in the Government service; and

Whereas we believe that the most effective means for obtaining such results would be the enactment of an equitable retirement law; and

Whereas we believe that employees who have spent long years in the Government service have justly earned a sufficient competence to keep them in their declining years: Therefore be it

Resolved by the Wallace and Vicinity Trades and Labor Council, at a regular meeting held in Wallace, Idaho, May 9, 1917, as follows:

First. That Congress be urged to take immediate action for passing a retirement law which contains the principal features of the Wadsworth-Dale bill (S. 281) in order that justice may be done many faithful employees who have become incapacitated in the line of duty; and

Second. We believe that such action is imperative in order that the several branches of the Government service may fulfill in the most effective way possible the demands of the present emergency, to the end that measures for national defense may be successful; and be it further

Resolved, That a copy of these resolutions be forwarded to each Member of Congress from the State of Idaho; and be it further

Resolved, That all labor organizations, all organizations of Government employees, and all officials of the United States be requested to aid in securing the desired legislation.

[SEAL.] LEGISLATIVE COMMITTEE OF WALLACE AND VICINITY TRADES AND LABOR COUNCIL,
R. L. POWERS.
GEO. W. BAKER.
JAS. G. ARTHUR.

Mr. POMERENE. I present resolutions, in the nature of a petition, adopted by the faculty of the College of Liberal Arts, Miami University, Oxford, Ohio, favoring the enactment of legislation forbidding the use of grain for the manufacture of liquor for beverage purposes, which I ask to be incorporated in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Whereas our country and the world are facing the probability of a serious shortage of food; and

Whereas the students in the colleges of the State have been called upon to engage in farm or other food-producing labor for the summer; and

Whereas the colleges of the State are cooperating by enabling such students as are willing to engage in such labor to go at once without sacrificing their standing in college; and

Whereas it is our conviction that the use of grain for the manufacture of liquor for beverage purposes is a waste, and will in part nullify any action which the colleges have taken in this matter: Therefore be it

Resolved, That the faculty of the College of Arts, of Miami University, go on record as favoring the immediate enactment of legislation forbidding the use of grain for the manufacture of liquors for beverage purposes; and that we urge the governor of our State, the members of our assembly, the National and State defense committees, and our Representatives in Congress to exert their influence toward the enactment of such legislation.

Mr. POMERENE. I present a petition signed by numerous citizens of Oberlin, Ohio, bearing on the same subject, which I ask to have printed in the RECORD without the signatures.

There being no objection, the petition was ordered to be printed in the RECORD, as follows:

To the Congress of the United States:

The undersigned earnestly petition for the immediate enactment of prohibition of the manufacture of alcoholic liquors as a measure of food conservation and for the immediate prohibition of the sale of liquors for beverage purposes in order to conserve the health, wealth, labor, transport facilities, and military efficiency of the people.

M. A. DAVIS
(And others).

Mr. FLETCHER. I present a petition of sundry citizens of St. Cloud, Fla., and vicinity. It is very brief, and I ask that it be printed in the RECORD, omitting the signatures.

There being no objection, the petition was ordered to be printed in the RECORD, as follows:

To the Congress of the United States:

The undersigned earnestly petition for the immediate enactment of prohibition of the manufacture of alcoholic liquors as a measure of food conservation and for the immediate prohibition of the sale of liquors for beverage purposes in order to conserve the health, wealth, labor, transport facilities, and military efficiency of the people.

E. D. C. WING
(And others).

Mr. SHAFROTH. I present a petition signed by the State chairman of the National Woman's Party of Colorado, favoring the immediate passage of the Susan B. Anthony amendment as a war measure, which I ask may be printed in the RECORD.

There being no objection, the petition was ordered to be printed in the RECORD, as follows:

Whereas justice to women, who bear their full share of the burdens of government in war as in peace, demands the immediate passage of the Susan B. Anthony amendment as a war measure:

Resolved, That we, Colorado women, call upon Congress to pass the amendment during this session as a war measure.

Resolved also, That a copy of this resolution be sent to the Vice President, Speaker CLARK, to Senator JACOB H. GALLINGER, Senator THOMAS S. MARTIN, Representative CLAUDE KITCHIN, Representative JAMES R. MANN, and to the Colorado delegation with the request to Senator SHAFROTH and Hon. CHARLES B. TIMBERLAKE that the resolution be read into the CONGRESSIONAL RECORD.

BERTHA W. FOWLER,
State Chairman National Woman's Party, Colorado
(And 60 others).

COLORADO SPRINGS, COLO., *June 2, 1917.*

Mr. SHEPPARD presented petitions of the faculty of the University of Texas and of Stephen A. Hockworth, of Houston, Tex., praying for national prohibition as a war measure, which were referred to the Committee on the Judiciary.

Mr. SHERMAN. I present a telegram from the Peoria Mothers' Club of Illinois, which I ask to have printed in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

PEORIA, ILL., *June 5, 1917.*

UNITED STATES SENATE,
Care LAWRENCE Y. SHERMAN,
Washington, D. C.:

We, the Peoria Mothers' Club, have given our sons at your call. We are answering your universal appeal for economy in our kitchens, believing that the successful prosecution of the war is largely a question of food for us and our allies. However, we feel strongly that all of our grain not distilled for industrial, mechanical, or medicinal purposes should be conserved for food. The unnecessary and deplorable waste in our kitchen, as much as it aggregates, seems petty compared to the many thousands of bushels of grain manufactured into alcoholic beverages. We therefore earnestly protest against this waste.

Frances Mae Goss, Edith Proctor Stone, May T. Snakey, Frances Booneholland, Anne Hersey Cadmus, Bertha Heidrich Miles, Mary Lines Oakford, Olive H. Baldwin.

Mr. SHERMAN. I present an article from the Illinois State Register on the scarcity of farm labor, which I ask to have read.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

[From the Illinois State Register, June 1917.]

SCARCITY OF FARM LABOR.

Farm labor in this section of the country, according to reports, is scarcer than usual at this season of the year. No definite reason is assigned for this condition, but whatever the cause it is greatly to be regretted. Farmers have been urged by the Government to plant more acreage than ever before, and this plea has been seconded by the press. Some of the farmers have been responding liberally and perhaps the aggregate acreage is greater than it was last year. There is, however, a large acreage in localities still unplanted. A lady from Morgan County was in Springfield last week in search of competent farm workmen, and was unable to secure them. She has 1,000 acres of good farming land from which she wanted to raise a corn crop. She has been trying to obtain some one to cultivate it but without success, and hoped to obtain the necessary help in Springfield. Disappointed in this she did not know what she would do. If the woman can not obtain labor necessary to raise and harvest a corn crop it will mean a shortage of the crop of Morgan County by about 50,000 bushels. This is but a single case to illustrate the scarcity of farm labor. There are others, perhaps not many that effect a single farm, but in the aggregate there are doubtless many thousands of acres in the corn belt of Illinois that will produce little or no crop this year.

If the State or Federal Government possesses the ability to supply the demand for labor some means should be adopted to find where the labor is needed and then supply it to those farmers needing it. That is the only way for the Government to get the job and the jobless together.

It is not too late yet to plant corn. If the season is favorable, which it is likely to be, and an early frost does not interfere with the ripening of the grain, large crops can be produced by the middle of September or the 1st of October, perhaps even before the first date.

The State Register has succeeded in bringing some farm laborers and farmers together with advantages to both, but it can do but little compared with what the State or National Government can do if either shall undertake the work in earnest.

Mr. GRONNA. I have received a telegram which I ask may be read.

The Secretary read the telegram, as follows:

THOMPSON, N. DAK., *June 2, 1917.*

Hon. A. J. GRONNA,
Senate Chamber, Washington, D. C.:

Representing the Grain Dealers' Association of North Dakota, I urge you to use your best efforts to prevent Congress from passing any law to give a man or small group of men power to fix prices on grain unless they fix prices on all manufactured articles and other commodities that enter into the life of the Nation. Why make a goat of the farmer?

M. C. GAULKE.

Mr. GRONNA. I present a letter from the North Dakota Woman's Christian Temperance Union, which I ask may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NORTH DAKOTA WOMAN'S CHRISTIAN TEMPERANCE UNION,
Fargo, N. Dak., May 28, 1917.

Hon. ASLE GRONNA,
Washington, D. C.

DEAR SIR: The general officers of the North Dakota Woman's Christian Temperance Union, at a meeting held at their headquarters in Fargo, voted to write to the Congressmen and Senators from North Dakota asking them to use their influence to bring about national prohibition as a war measure and to discourage the placing of an additional tax on alcoholic liquors. We feel that the conservation of the morals as well as the grain of the Nation demands national prohibition, and that to tax the liquor business lends to it an unwarranted air of respectability.

We know our representatives at Washington are right on these questions, and will be proud to see them lead in this struggle.

Sincerely, yours,

ELIZABETH PRESTON ANDERSON,
President.
ABBIE W. H. BEST,
Vice President.
BARBARA H. WYLIE,
Corresponding Secretary.
KATE S. WILDER,
Recording Secretary.
MINETTE B. BOWE,
Treasurer.

Mr. GRONNA presented petitions of sundry citizens of Page, Dazey, Antler, Westhope, Sheldon, Bismarck, Edgeley, Granville, and Steele, all in the State of North Dakota, praying for the prohibition of the manufacture of foodstuffs into intoxicating liquor, which were referred to the Committee on Agriculture and Forestry.

Mr. JAMES. I present a resolution adopted at a meeting of the Shelby Democratic Club, of Louisville, Ky., relative to the high cost of living, which I ask to have printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

SHELBY DEMOCRATIC CLUB,
Louisville, Ky., May 10, 1917.

Whereas the statistics in the Department of Agriculture show that there is no shortage in foodstuffs in the United States; and

Whereas it has been admitted by Secretary Houston that since April 1, 1914, to March 1, 1917, there has been an increase upon all foodstuffs of from 15 to 400 per cent; and

Whereas the present high prices are traceable to speculation and the storing of vast quantities of foodstuffs by packing houses and cold-storage plants for the purpose of boosting prices; and

Whereas the present high prices have reached a point that it is impossible for the common people to live decently upon their income or earnings from labor: Now, therefore, be it

Resolved, That the Shelby Democratic Club, of Louisville, Ky., petition Congress and Senate of the United States, through their Senators and Representatives, for Federal legislation prohibiting speculation in foodstuffs, and a packing-house bill regulating packing houses and cold-storage plants, limiting the holding of fruits, vegetables, butter, eggs, dressed poultry, and fresh meats to 90 days, making a violation of said laws punishable by both fine and imprisonment in the penitentiary.

Hon. OLLIE M. JAMES,
Washington, D. C.

DEAR SIR: The above resolution was adopted at the meeting of the Shelby Democratic Club, and the secretary was instructed to send a copy to our Representatives and Senators at Washington.

Very respectfully,

J. T. SMITH, *Secretary.*

Mr. JONES of Washington. I present a resolution adopted at a large mass meeting of the citizens of Seattle, Wash., which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Whereas the Chief Executive of this Nation, on April 2 last, in urging on Congress our intervention in the prevailing European war, declared as follows:

"We shall fight for the things we have nearest our hearts—for democracy, * * * for the rights and liberties of small nations, for a universal dominion of right by such a concert of free peoples as shall bring peace and safety to all nations, and make the world itself at last free"; and

Whereas in a preceding message to the Senate of the United States, defining the peace which we are interested in achieving as the outcome of such war, our distinguished President further declared:

"No peace can or ought to last which does not recognize and accept the principle that governments derive all their powers from the consent of the governed"; and that "henceforth inviolable security of life, of worship, and of industrial and social development should be guaranteed to all peoples who have lived hitherto under the power of governments devoted to faith and purposes hostile to their own"; and

Whereas these exalted declarations apply, in our judgment, with peculiar force to the concerns of the Irish people. Theirs is one of the smaller, as it is one of the oldest, nations in Europe. They have been and still are governed without their consent. They are and have been denied any and all security of social or industrial development. They have long lived and they still live under the power of a government devoted to faith and purposes hostile to their own sentiments, purposes, and aspirations They have never ceased during centuries, even for a single generation, to maintain in open and honorable warfare their claim to nationhood and to freedom, and they are to-day struggling in their own land for the establishment of a democratic republic: Now, therefore, be it

Resolved, That we, American citizens, faithful to the principles, the Constitution, and the laws of the Republic, being assembled in public meeting in the city of Seattle on this 27th day of May, 1917, respectfully and earnestly urge upon the President and Congress of the United States that this Republic is morally and by every consideration of national gratitude and political principle obligated to insist in all international councils that the people of Ireland shall be restored to all their rights and liberties, in accordance with the splendid exposition of national rights and liberties laid down by President Wilson, and that they be relieved of the burdens, the restrictions, and the oppressions of an alien government. That we regard with disapproval any action by our Government or any of its divisions or departments which might directly or indirectly countenance the offer to the people of Ireland of any substitute whatever for complete national independence. That we protest beforehand against the conclusions of any convention called in Ireland under the auspices of the British Government, as proposed by the British premier, to determine the political or other demands of the Irish people, since any such body can only be designed to falsify those demands and to deceive the other races of the world. No convention or other body can express the will of the Irish race in Ireland as to the government of their own land unless its membership is based in representation on the entire adult population of the country, wholly irrespective of social, religious, or political division; and be it further

Resolved, That we heartily approve the joint resolution introduced in Congress by the Hon. WILLIAM E. MASON, now a Member of the House of Representatives and formerly representing the State of Illinois in the United States Senate, and that we express our sincere thanks to that distinguished statesman for the action so taken by him.

Mr. SHIELDS. I present resolutions passed by the members of the Munsey Memorial Sunday School, of Johnson City, Tenn., which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Resolutions passed by the members of the Munsey Memorial Sunday School, Johnson City, Tenn. on Sunday morning, May 20, 1917.

Whereas the people of this great Nation of ours have in a great measure come to realize that one of the greatest menaces to our fair country is the liquor traffic, which in past years has caused more misery and sorrow to ourselves and our neighbors and friends than any other cause, and is still wrecking and ruining lives and homes in many of the States of the Union; and

Whereas the people of the great State of Tennessee, having rid themselves, through the efforts of its broad-minded and liberty-loving statesmen and citizens, of the legalized sale of intoxicants, are anxious and prayerful that their example be followed by the people of every State which is bound together by the Stars and Stripes; and

Whereas they feel that such a state of things can only be brought about by laws enacted by the Senate of the United States absolutely prohibiting the manufacture and sale of intoxicants, and we realize that such bills can not be passed unless our Senators and Congressmen are themselves believers in Nation-wide prohibition and are willing to lend their time and ability toward the consummation of this great end; and

Whereas the people of Tennessee are fortunate in having Senators and Congressmen who are in the forefront of this great fight, and who have done many things which have brought us nearer the goal, and we, as citizens of this State, feel that we should express to them our appreciation for their past actions and urge upon them greater efforts in the future: Now, therefore, be it

Resolved, That we, the officers, teachers, and scholars of Munsey Memorial Sunday School, of Johnson City, Tenn., do, by unanimous vote, express to our Congressman, Hon. SAM R. SELLS, our sincere appreciation for the bill introduced by him in the Congress of the United States of America, providing for national prohibition; and

Resolved, That we also express our appreciation to our Senators, Hon. JOHN K. SHIELDS and Hon. KENNETH D. MCKELLAR, for the votes cast by them in favor of bills looking toward Nation-wide prohibition; and

Resolved, That we do urge upon them, as our representatives, to continue to exert their efforts in this cause, so that we may soon see the day when there will not be one licensed place in this country where intoxicants are made or dispensed; and

Resolved, That a copy of these resolutions be forwarded to Senator SHIELDS, Senator MCKELLAR, and Congressman SELLS, and that a copy of same be inserted in the record book of the Sunday school.

Passed May 20, 1917. Signed this 30th day of May, 1917.

MUNSEY MEMORIAL SUNDAY SCHOOL,
E. MUNSEY SLACK,
Superintendent.

Attest:

W. LEWIS SMITH, *Secretary.*

Mr. VARDAMAN. I have received from Mrs. Julius Crisler, acting State chairman, of Jackson, Miss., resolutions adopted by the Mississippi Branch of the National Woman's Party, which I am going to ask to have printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Whereas our allies England and Russia are enfranchising their women in time of war; and

Whereas American women are being called upon for service and for sacrifice in a war "for democracy, for the right of those who submit to authority to have a voice in their own government"; and

Whereas we can not consistently fight for this principle of democracy abroad until it has been established within our own borders: Therefore be it

Resolved, That we, members and friends of the Mississippi Branch of the National Woman's Party, in conference assembled at the Carroll Hotel, Vicksburg, this 1st day of June, 1917, urge the immediate passage of the Susan B. Anthony amendment, submitting the question of suffrage for women to each State at the next session of the State legislature; and be it further

Resolved, That copies of this resolution be sent to the President of the United States; to Hon. CLAUDE KITCHIN, majority leader in the House of Representatives; to Hon. E. Y. WEBB, chairman of the Judiciary Committee; to Senator JAMES K. VARDAMAN, with instructions that it be read into the record of the Senate; to Senator JOHN SHARP WILLIAMS; to Representative JAMES W. COLLIER, with instructions that it be read into the record of the House; and to Representatives EZEKIEL S. CANDLER, HUBERT D. STEPHENS, BENJAMIN G. HUMPHREYS, THOMAS U. SISSON, WILLIAM W. VENABLE, PAT HARRISON, and PERCY E. QUIN.

Mrs. JULIUS CRISLER,
Acting State Chairman.

Mr. SMITH of Maryland presented petitions of sundry citizens of Baltimore, Md., praying for the prohibition of the manufacture of foodstuffs into intoxicating liquor, which were referred to the Committee on Agriculture and Forestry.

He also presented a petition of the Home Missionary Society of Mount Vernon Place Methodist Episcopal Church, of Baltimore, Md., praying for national prohibition as a war measure, which was referred to the Committee on the Judiciary.

Mr. WEEKS presented a petition of the faculty and students of Simmons College, Boston, Mass., praying for national prohibition as a war measure, which was referred to the Committee on the Judiciary.

Mr. JONES of Washington presented petitions of sundry citizens of Eatonville, Summit View, and Walla Walla, all in the State of Washington, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Pierce County, Wash., praying for the "conscription of large incomes," which were referred to the Committee on Finance.

Mr. KNOX presented petitions of sundry citizens of Pennsylvania, praying for national prohibition as a war measure, which were referred to the Committee on the Judiciary.

Mr. PAGE presented a petition of sundry citizens of Bennington, Vt., praying for national prohibition as a war measure, which was referred to the Committee on the Judiciary.

Mr. FRELINGHUYSEN presented petitions of sundry citizens of Atlantic City and Metuchen, in the State of New Jersey, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Trenton, North Hudson, Millville, and Orange, all in the State of New Jersey, praying for the prohibition of the manufacture of foodstuffs into intoxicating liquor, which were referred to the Committee on Agriculture and Forestry.

Mr. LEWIS. Mr. President——

The VICE PRESIDENT. The Senator from Illinois.

Mr. LEWIS. I should like the attention of my honored friend, the junior Senator from Ohio [Mr. HARDING].

Mr. CUMMINS. Mr. President, a parliamentary inquiry. What is the regular order?

The VICE PRESIDENT. The presentation of petitions and memorials.

Mr. CUMMINS. Does the Senator from Illinois rise to present a petition or a memorial?

Mr. LEWIS. The Senator from Illinois rose to present a matter of public print which he can not call a petition or a memorial.

Mr. CUMMINS. I should like, Mr. President, to have the regular order pursued until the morning business has been concluded.

Mr. LEWIS. Mr. President, I can not offer opposition to the request of the Senator from Iowa. I will resume at the conclusion of the morning business, with the consent of the Senate.

NATIONAL DEFENSE.

Mr. CHAMBERLAIN. There is on the calendar Order of Business No. 13, the bill (S. 1786) to amend certain sections of the act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, and for other purposes. I ask that the bill be taken from the calendar and recommitted to the Committee on Military Affairs. I make the request at this time, as I desire to report back immediately the bill from the committee. The subject has been under consideration by the Committee on Military Affairs for some time, and the fact that some of the provisions of the bill now on the calendar are already included in the Army legislation that has been enacted has necessitated some further amendments. Therefore I ask that the bill be recommitted to the Committee on Military Affairs.

The VICE PRESIDENT. The bill will be recommitted to the Committee on Military Affairs.

Mr. CHAMBERLAIN. I desire to report back favorably with amendments the bill and ask that it take the same place on the calendar.

The VICE PRESIDENT. The bill will be placed on the calendar.

LANDS ON ROCKAWAY POINT, N. Y.

Mr. WADSWORTH. From the Committee on Military Affairs I report back favorably without amendment the bill (S. 1852) authorizing the Secretary of War to transfer to the city of New York the title of the United States to certain lands in Kings County, State of New York, and I submit a report (No. 50) thereon.

The bill was introduced by my colleague [Mr. CALDER], and accompanying it is a letter from the Secretary of War transmitting in turn a letter from the Chief of Engineers, United States Army. I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. Is there any objection?

Mr. CUMMINS. I ask that the bill be read before the request is passed upon.

The VICE PRESIDENT. The bill will be read.

The Secretary read the bill, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized to transfer to the city of New York, in partial consideration for the transfer to the United States of the city's right and title to certain lands on Rockaway Point, the title of the United States to the reservation on Plumb Island, in the town of Gravesend, in Kings County, State of New York, and containing an area of approximately 50 acres.

Mr. OVERMAN. I desire to ask the Senator from New York, Is there any reason why the bill should be passed to-day?

Mr. CALDER. The War Department has requested that it be passed. It has to do with the exchange of some property that the city owns on the site of the great Fort Rockaway, which protects New York Harbor.

Mr. OVERMAN. Is it an emergency measure?

Mr. CALDER. I think it is. The Federal Government is trying to perfect its title to the property in Rockaway, and this is part of the property involved in the transaction.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HEARINGS ON WAR-REVENUE BILL.

Mr. SMITH of Arizona. From the Committee on Printing I report back favorably with an amendment Senate resolution 74, submitted by the Senator from North Carolina [Mr. SIMMONS] on the 26th ultimo, and at the request of the chairman of the Committee on Finance I ask for its present consideration.

The Senate, by unanimous consent, proceeded to consider the resolution.

The amendment was, in line 3, before the word "copies," to strike out "2,000" and insert "1,550," so as to make the resolution read:

Resolved, That the Committee on Finance be, and is hereby, authorized to have printed for its use 1,550 copies of the hearings before said committee on the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purposes.

The amendment was agreed to.

The resolution as amended was agreed to.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. PENROSE:

A bill (S. 2401) for the relief of retired commissioned warrant officers detailed on active duty; to the Committee on Naval Affairs.

By Mr. GORE:

A bill (S. 2402) authorizing and directing the President to commandeer distilled spirits now in bond for the manufacture of munitions and military and hospital supplies, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. SHEPPARD:

A bill (S. 2403) to promote the improvement of rural education; to the Committee on Education and Labor.

By Mr. SHAFROTH:

A bill (S. 2404) to conserve food products for the Army, Navy, and people of the United States during the war with Germany by preventing the use thereof in the manufacture of intoxicating liquor, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. JONES of New Mexico:

A bill (S. 2405) for the relief of Grant County, Luna County, and the town of Silver City, N. Mex.; to the Committee on Public Lands.

By Mr. NELSON:

A bill (S. 2406) for the relief of Odin M. Hansen (with accompanying papers); to the Committee on Claims.

By Mr. JONES of Washington:

A bill (S. 2407) to provide compensation for employees of the United States separated from the service on account of injuries received while in the performance of duty, and for other purposes; to the Committee on Education and Labor.

A bill (S. 2408) granting an increase of pension to Pascal F. Rainwater (with accompanying papers);

A bill (S. 2409) granting an increase of pension to Charles S. Lavanway (with accompanying papers);

A bill (S. 2410) granting an increase of pension to James S. Foster (with accompanying papers); and

A bill (S. 2411) granting an increase of pension to Ernest Kiene (with accompanying papers); to the Committee on Pensions.

By Mr. WADSWORTH:

A bill (S. 2412) authorizing Brig. Gen. Theodore A. Bingham, United States Army, retired, to accept the decoration of the Legion of Honor of France; to the Committee on Foreign Relations.

By Mr. CHAMBERLAIN:

A bill (S. 2414) for the restoration of J. Shelley Saurman, assistant surgeon, United States Navy, retired, to the active list of the Navy (with accompanying papers); and

A bill (S. 2415) granting an honorable discharge to Douglas Spracklen; to the Committee on Naval Affairs.

A bill (S. 2416) for the relief of the legal representatives of W. H. Mills, deceased; to the Committee on Claims.

(By request) a bill (S. 2417) for the protection of the owners of mining claims and of desert-land entrymen in time of war; to the Committee on Public Lands.

By Mr. KNOX:

A bill (S. 2418) for the relief of James Russell (with accompanying paper); to the Committee on Military Affairs.

By Mr. SHIELDS:

A bill (S. 2419) granting an increase of pension to Scott Thompson; to the Committee on Pensions.

By Mr. SHEPPARD:

A joint resolution (S. J. Res. 75) authorizing a survey and examination of the Rio Grande border of the United States to determine the advisability of constructing a highway either along the entire border or certain sections thereof; to the Committee on Military Affairs.

DESECRATION OF THE FLAG.

Mr. POMERENE. I introduced a bill to prevent and punish the desecration, mutilation, or improper use of the flag of the United States of America, to apply to the entire country. At the last session of Congress a bill was passed applying to the District of Columbia. Many of the States have laws bearing upon the subject, but I am advised by at least one United States district attorney that they are not broad enough to cover all desecrations, mutilations, and misuses of the flag.

I ask that the bill be referred to the Committee on Military Affairs, and I indulge the hope that the committee will soon be able to report it favorably.

The bill (S. 2413) to prevent and punish the desecration, mutilation, or improper use of the flag of the United States of America was read twice by its title and referred to the Committee on Military Affairs.

WAR REVENUE.

Mr. GORE. I submit a series of amendments to House bill 4280, the war-revenue tax bill, and ask that they be printed in the RECORD and referred to the Committee on Finance. I desire to say that I am preparing an additional amendment which, taken in connection with these matters, will consummate the object in view.

There being no objection, the amendments were referred to the Committee on Finance and ordered to be printed and to be printed in the RECORD, as follows:

Amendment intended to be proposed by Mr. GORE to the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purposes, viz: On page 39, line 5, strike out the words "a tax of $1.10 on each proof gallon, or wine gallon when below proof," and insert in lieu thereof the following: "a tax of $5 per proof gallon, or wine gallon when below proof, on such distilled spirits which have been in bond for a less period than five years, and on such spirits which have been in bond for a longer period than five years a tax of $5 per proof gallon, or wine gallon when below proof, and an additional dollar for each additional year that such spirits have been in bond."

—

Amendment intended to be proposed by Mr. GORE to the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purposes, viz: Insert the following as a new section:

"SEC. 300½. In addition to the tax imposed on distilled spirits by existing law and under the preceding section of this act, there shall be levied, collected, and paid on the materials from which such spirits are manufactured, after the approval of this act, the following tax: On all grain, cereals, and other edible products and materials, a tax of $60 per 100 pounds, and on all molasses, sirups, or other fermentable products and materials, a tax of $5 per wine gallon; and every distiller using any such materials shall keep such records and file such returns and bonds, and the tax shall be paid at such times and in such manner, and subject to such credits as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe or require: *Provided*, That the provisions of this section shall not apply to distilled spirits withdrawn free of tax under existing law or withdrawn and used exclusively for industrial, mechanical, medicinal, and scientific purposes, under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe: *Provided further*, That such spirits shall not be withdrawn for export except upon the application of an accredited representative of a nation now at war with the Imperial German Government, in which application it shall be declared that such spirits are withdrawn for other than beverage purposes."

Amendment intended to be proposed by Mr. GORE to the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purpurposes, viz: Insert the following as a new section:

"SEC. —. That in addition to the special tax levied by existing law on retail dealers in distilled spirits, as defined therein, there shall be paid, after July 1, 1917, by retail dealers in such spirits selling or dispensing of the same for beverage purposes, a special tax of $5,000 per annum, and every such dealer, when proffering to pay such tax, shall file a declaration under oath, in such form as the Commissioner of Internal Revenue shall prescribe, which shall become a public record, and which shall declare the State, city, and lot, or other premises, in and on which the said retail business is to be conducted: *Provided*, That the lot may be changed and the tax receipt transferred under rules and regulations to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury: *Provided further*, That the revenues collected in pursuance of this section shall be paid over to the treasurers of the several States in which the same originates. The provisions of existing law with respect to the collection and payment of such special tax on retail dealers in distilled spirits and the penalties for violating the same are hereby adopted and made a part of this section in so far as applicable."

—

Amendment intended to be proposed by Mr. GORE to the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purposes, viz: Insert the following as a substitute for section 303:

"SEC. 303. That on and after the passage of this act there shall be levied and collected on all beer, lager beer, ale, porter, and other similar fermented liquor, containing one-half per cent and not more than 2½ per cent alcohol, brewed or manufactured and sold, or stored in warehouse, by whatever name such liquors may be called, in addition

to the tax now imposed by law, a tax of $1.25 for every barrel containing not more than 31 gallons; and on all such liquors containing more than 2½ per cent of alcohol, a tax of $5 for every barrel containing not more than 31 gallons; and at like rates for any other quantity or for the fractional parts of a barrel authorized and defined by law."

—

Amendment intended to be proposed by Mr. GORE to the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purposes, viz: Insert the following as a new section:

"SEC. —. That the President is authorized and directed to commandeer any or all distilled spirits in bond at the date of the approval of this act for redistillation, in so far as such redistillation may be necessary to meet the requirements of the Government in the manufacture of munitions and other military and hospital supplies, or in so far as such redistillation would dispense with the necessity of utilizing products and materials suitable for feeds and foods in the future manufacture of distilled spirits for the purposes herein enumerated. The President shall determine and pay a just compensation for the distilled spirits so commandeered, and if the price so determined be not satisfactory to the person entitled to receive the same, such person shall be paid the amount prescribed by the President, and shall be entitled to sue the United States to recover such further sum as, added to the amount so paid, will be just compensation for such spirits, in the manner provided by section 24, paragraph 20, and section 145 of the Judicial Code."

AMENDMENTS TO THE PENDING BILL.

Mr. GORE. I submit an amendment to the bill S. 2356, the unfinished business, which I ask to have read.

The amendment was read and ordered to lie on the table and to be printed, as follows:

SEC. —. Hereafter it shall be unlawful for any common carrier, or any other person or corporation, to ship, receive for shipment, transport, deliver, or receive in interstate commerce or in commerce among the several States distilled spirits except when such spirits shall have been withdrawn from bond free of tax under existing law, or shall have been withdrawn for scientific, mechanical, industrial, and medicinal purposes under rules and regulations to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Any corporation violating the provisions of this section shall, upon conviction thereof, be liable to a fine of not less than $1,000 and not more than $5,000, and any natural person and the officer or agent of any corporation violating the provisions of this section shall, upon conviction thereof, be liable, for the first offense, to a fine of not less than $25 and not more than $250, and, for a second or subsequent offense, shall be liable, in addition to such fine, to imprisonment for a period of not less than one month and not more than one year: *Provided*, That the words "interstate commerce" as used in this section shall be construed to include trade or commerce between any State and another State, or between any State and the District of Columbia, or between the District of Columbia and any State.

Mr. NORRIS submitted an amendment intended to be proposed by him to the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes, which was ordered to lie on the table and to be printed.

WAR REVENUE.

Mr. WEEKS submitted an amendment intended to be proposed by him to the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

WITHDRAWAL OF PAPERS.

On motion of Mr. NELSON, it was

Ordered, That the papers accompanying the bill (S. 2180) to approve mutual cessions of territory by the States of Minnesota and Wisconsin, Sixty-fifth Congress, be withdrawn from the files of the Senate, no adverse report having been made thereon.

STATUE OF SEQUOYAH.

Mr. OWEN submitted the following concurrent resolution (S. Con. Res. 4), which was read and referred to the Committee on the Library:

Resolved by the Senate (the House of Representatives concurring), That the statue of Sequoyah, presented by the State of Oklahoma to be placed in Statuary Hall, is accepted in the name of the United States, and that the thanks of Congress be tendered to the State for the contribution of the statue of one of its most eminent citizens, illustrious for his distinguished civic services.

2. That a copy of these resolutions, suitably engrossed and duly authenticated, be transmitted to the governor of Oklahoma.

"WAR MESSAGE AND FACTS BEHIND IT."

Mr. FLETCHER. I submit a resolution to print a pamphlet entitled "War Message and Facts Behind It," published by the Committee on Public Information. It is a very important document, and gives not only the war message of the President of April 2, but the facts behind the statement of the war message. It has been carefully prepared and edited, and I think it ought to have wide distribution. An estimate of the cost of the printing accompanies the resolution. Therefore it is in order, and I ask unanimous consent for its present consideration. Within the limit of $500 we can have 45,000 copies of the pamphlet printed.

The VICE PRESIDENT. The resolution will be read.

The Secretary read the resolution (S. Res. 81), as follows:

Resolved, That the pamphlet entitled "War Message and Facts Behind It," published by the Committee on Public Information, be printed as a Senate document, and that 45,000 additional copies be printed for the use of the Senate document room.

Mr. GALLINGER. Is that a report from a committee?

Mr. FLETCHER. It is not a report. I am simply submitting a resolution.

Mr. GALLINGER. But it has not been referred to a committee.

Mr. FLETCHER. No; it has not.

Mr. GALLINGER. I trust the Senator will allow the resolution to go to a committee, and it can then be reported.

Mr. FLETCHER. If the Senator desires that course to be taken, he has the right to object to the consideration of the resolution, and it would go to a committee. I think it is an important matter to have this pamphlet distributed as early as possible.

Mr. GALLINGER. I think the resolution had better take the usual course.

Mr. FLETCHER. Very well. I ask that the resolution be referred to the Committee on Printing.

The VICE PRESIDENT. The resolution will be referred to the Committee on Printing.

SAMUEL M. HERBER.

Mr. CUMMINS submitted the following resolution (S. Res. 80), which was referred to the Committee on Patents:

Whereas it is alleged that in denying to Samuel M. Herber a patent for a certain process in the production of gasoline a great injustice has been inflicted upon him and the persons associated with him; and

Whereas it is further alleged that the decision is palpably contrary to the law, and that notwithstanding the ruling so made Congress ought to give relief to the said Herber: It is therefore

Resolved, That the Committee on Patents make full inquiry into the subject and report to the Senate as soon as practicable its findings thereon.

COL. THEODORE ROOSEVELT.

Mr. STONE. Mr. President, on May 17 last, while the Senate had under consideration the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to what is known as the conscription or selective draft bill, I addressed the Senate on the conference report, and in the course of that address submitted some observations relating to Col. Theodore Roosevelt. It will be remembered that in the bill there was a provision intended to authorize this distinguished gentleman to raise a division of volunteers for service in the war in which we are now engaged. At that time and in that connection I made a remark which appears on page 11 of the document I now send to the desk, being a reprint of the speech I made on the occasion referred to. I desire to have the part I have marked printed in the RECORD without reading. Those particular remarks referred to the generally made and, I think, generally accepted statement that the regiment which Col. Roosevelt commanded was rescued by a negro regiment from a perilous situation into which he had led them.

I have recently received a letter from William H. H. Llewellyn, speaker of the House of Representatives of the State of New Mexico, relating to this matter. Mr. Llewellyn was a captain in Col. Roosevelt's regiment. He has written me a letter protesting that the statement made by me was not founded upon fact. It is a well-couched letter, in gentlemanly terms, and accompanied by an affidavit made by Mr. Llewellyn, setting forth certain facts, or what he states to be facts, covering the matter to which I had alluded. I feel obliged to ask the Senate for permission to have inserted in the RECORD this letter and affidavit of Mr. Llewellyn, as he asks me to correct the statement I made. At the same time, Mr. President, I am going to ask to have inserted several pages written by Mrs. Annie Riley Hale, covering the same subject matter, and some little additional matter, throwing light on the general subject, and which appears in one of her books.

I have marked in this book of Mrs. Hale's the part I desire to have inserted, to follow the affidavit of Mr. Llewellyn. I also wish to have inserted, following the excerpt from Mrs. Hale's volume, a letter addressed to her on August 29, 1912, by Charles D. Hilles, then chairman of the Republican national committee, and a communication to her of August 16, 1912, from George Eustis, and a further communication to her from the National Savings & Trust Co., of Washington, D. C., duly signed by one of its officers.

I should like to have all this matter go into the RECORD in the order named.

These letters from Mr. Hilles and others are to the effect that the Republican national committee circulated this volume of Mrs. Hale's, and thereby certified it to be the judgment of that committee that the statements therein were accurate.

I ask leave to have this matter printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

[Extract from Senator STONE'S speech.]

Roosevelt is practically without military training. It is true that for a short time he did command a regiment in the Spanish-American War of 1898—a regiment of very brave men and willing fighters—and I do not deny that he led them courageously into battle, but he did not command them with judgment. As everyone knows, he got his men into a bad hole, where they were in imminent danger of being decimated and cut to pieces, and no doubt they would have been cut to pieces except for a negro regiment, under trained officers of the Regular Army, who came to the rescue and sheltered and saved him and them. By his own course in the only crisis of his brief and unimportant military career he demonstrated such a lack of poise and sound judgment as to make plain his unfitness to command even a regiment.

—

THIRD STATE LEGISLATURE,
Las Cruces, N. Mex., May 31, 1917.

Hon. WILLIAM J. STONE,
United States Senate, Washington, D. C.

MY DEAR SIR: The CONGRESSIONAL RECORD of the 17th instant contains your remarks concerning Col. Roosevelt, and, after reading same carefully, I have concluded to intrude upon your valuable time and call your attention to an erroneous statement which you made at that time. It was, in substance, that the colored troops had saved Roosevelt and his command during the progress of the Cuban campaign. This statement has been denied so often that one would think it was generally known to be false. Such men as Gen. Joseph Wheeler stamped it as being untrue. I presume your attention has never been called to the truth regarding this matter, and therefore you have inadvertently repeated what is not only false but a statement which has not even a slender thread to hang upon. Now, my dear Senator, if you could kindly have this matter corrected I would appreciate it very much. I do not write in a spirit of anger or criticism, but just desire to call your attention to the truth.

Very respectfully,

WILLIAM H. H. LLEWELLYN.

—

STATE OF NEW MEXICO,
County of Dona Ana, ss:

Personally appeared before me, the undersigned authority, William H. H. Llewellyn, who, being duly sworn, upon his oath deposes and says: That during the Spanish War of 1898 he was a captain and commanded Troop G, in the First United States Volunteer Cavalry, Col. Leonard Wood's regiment, afterwards commanded by Col. Theodore Roosevelt, and known as "Roosevelt's Rough Riders." Affiant further states that he was with said regiment during the entire Cuban campaign and commanded and participated with his troop in all of the fighting; that the statement that Roosevelt's regiment was rescued or saved from destruction or gotten out of a desperate situation by the colored troops is untrue and has no foundation in fact; that this is generally alleged to have occurred at the Battle of Las Guasimas. This battle was fought by a brigade composed of the Tenth Regular Cavalry (colored), the First Regular Cavalry, and Roosevelt's regiment, and was planned and carried out by Gen. Wheeler. The First Regular Cavalry was on the extreme right, the Tenth Cavalry in the center, and Roosevelt's regiment on the left, each regiment advancing from the seashore in separate columns to the west, where they attacked the Spanish entrenchments. A deep, wooded ravine separated the Tenth Cavalry from Roosevelt's regiment, and all three regiments encountered the Spaniards at practically the same time, as had been planned. Roosevelt's regiment did not come in contact with the Tenth Regular Cavalry during the fight, and neither at Las Guasimas nor at any other place was his regiment saved or extricated from a desperate situation by the Tenth Cavalry or any other regiment. Las Guasimas will be remembered as the battle in which Capt. Capron, Hamilton Fish, and Marcus D. Russell, of Roosevelt's regiment, were among the killed.

Affiant further says, and again repeats, that the statements made to the effect that Col. Roosevelt's regiment was saved from destruction or rescued by the colored troops or any other troops is wholly untrue.

And affiant further says that Col. Roosevelt did not get his regiment into a position where it was necessary for anyone to save him or the men under his command. Further affiant saith not.

WILLIAM H. H. LLEWELLYN.

[Extracts from Rooseveltian Fact and Fable, pp. 13 to 22.]

After some drilling and parading on American soil, by way of getting the spectacular brigade well into the public eye, we find the gallant Rough Riders "drawing first blood" in Cuba, at the ill-considered and prematurely fought Battle of Las Guasimas. As has been so often recounted, the Rough Riders under Wood and Roosevelt ran into an ambush on this occasion—Spaniards hidden in an old cemetery between the creek and the road—from which they were narrowly rescued by the timely arrival of the negro troops, this last having furnished the text for much reproachful oratory since the Brownsville affair.

As it was, 68 brave fellows went down before the unseen fire, 16 of them to rise no more. Among the slain was the gallant Capt. Allyn Capron, who had done more than anyone else to increase the efficiency of the Rough Rider Brigade. Reliable military historians relate that Gen. Wheeler, who commanded the Cavalry, had weakly yielded to the importunities of "the ardent young Roosevelt and others" in giving the order for this attack or "reconnoissance," thereby violating his own order from the superior officer to wait for Gen. Lawton with the Infantry.

And that "rough old Gen. Lawton," coming up and seeing the blunder, "said some unpleasant things," bluntly charging the blood of Capt. Capron and the slain troopers upon this unauthorized haste.

Roosevelt received his first baptism of fire and blood at Las Guasimas, and having accomplished his purpose of securing for the "Rough Riders" the credit of having "started things in Cuba," it is not to be supposed he allowed the casualties of war to disturb his complacent reflections. There was more "glory" ahead. Panegyrist Riis says:

"All the way up it (the Rough Rider Regiment) had been the vanguard. * * * Ten days of marching and fighting in the bush culminated in the storming of the San Juan Hills, with Col. Roosevelt in full command, Col. Wood having been deservedly promoted after Las Guasimas."

The piece de resistance of all the Rough Rider exploits—as it exists in the popular fancy—was the assault on the Spanish entrenchments on top of San Juan Hill. This has been "sung in song and story" until it ranks in the annals of military glory with Pickett's charge up the Gettysburg Heights. It is a thankless task to show that, as a Rough Rider achievement, it more properly finds a place among Baron Munchausen's Tales, or in some standard work on mythology, yet such is the merciless showing of the facts. Let us first note the heroic fable. The New York Sun of date July 4, 1898, published the following vivid account of the San Juan charge:

"When they came to the open, smooth hillside there was no protection. Bullets were raining down at them, and shot and shell from the batteries were sweeping everything.

"There was a moment's hesitation, and then came the order: 'Forward, charge!' Col. Roosevelt led, waving his sword. Out into the open the men went and up the hill. Death to every man seemed certain. The crackle of the Mauser rifles was continuous. Out of the brush came the riders. Up, up they went, with the colored troops alongside of them, not a man flinching, and forming as they ran. Roosevelt was a hundred feet in the lead. Up, up they went, in the face of death, men dropping from the ranks at every step. The Rough Riders acted like veterans. It was an inspiring sight and an awful one. * * * The more Spaniards were killed, the more seemed to take their places. The rain of shells and bullets doubled. Men dropped faster and faster, but others took their places. * * * Roosevelt sat erect on his horse [all authorities now agree there was not a horse in the fight], holding his sword, and shouting for his men to follow him. Finally his horse was shot from under him, but he landed on his feet and continued calling for his men to advance. * * *

"He charged up the hill afoot. It seemed an age to the men who were watching, and to the Rough Riders the hill must have seemed miles high. But they were undaunted. They went on, firing as fast as their guns would work. At last the top of the hill was reached. The Spaniards in the trenches could still have annihilated the Americans, but the Yankee daring dazed them. They wavered for an instance, and then turned and ran.

"The position was won and the blockhouse captured. In the rush more than half of the Rough Riders were wounded * * *."

This vivid, glowing picture, with Roosevelt on horseback as the central figure, was copied in the press throughout the country, and the Russian military painter, Vereschagin, was inveigled into committing the salient details to canvas. Riis declares with ecstatic fervor that "it will live forever in the American mind" and cause a thrill in the American heart, unequaled by any other vibration before or since.

It really seems nothing short of sacrilege to mar this heroic picture in any of its inspiring details. Yet the clear, cold light of history, unmindful of the pangs of the hero worshippers, has been steadily turned on this glowing battle scene, with the cruel result (to the worshippers) of completely eliminating the central heroic figure—horse and all!

The first to turn on the disillusioning stream was Senator Alger, in his "Spanish-American War," published in 1901.

On page 164 of Alger's History we read: "A part of the cavalry division which first attacked Kettle Hill did not advance on San Juan Ridge at the time of the assault by Kent's infantry division. The First Volunteer Cavalry, under Col. Roosevelt, as well as parts of the Regular regiments which captured Kettle Hill, did not join the infantry in its charge on San Juan blockhouse and that portion of San Juan Ridge to the left of Santiago Road, commonly known as San Juan Hill."

The "Kettle Hill" here referred to was a low, steep knoll, surmounted by a farmhouse and some huge iron caldrons—whence its name—to the right of San Juan Ridge, whereon were the main Spanish intrenchments, and separated from them by an open, grass-covered glade a third of a mile wide. "Kettle Hill" therefore presented the first obstacle to the American advance and was held by a skirmish line of Spaniards, who quickly gave way before the attacking force, consisting (according to Alger, p. 157) of "one squadron of the First Cavalry, the Ninth Cavalry (colored), and the First Volunteer Cavalry (under Col. Roosevelt), who all charged together over the crest."

And here, according to the best authorities, the gallant Rough Riders rested on their laurels. Having easily dislodged the Spaniards from this unimportant and slightly defended hillock, they calmly watched their comrades, the infantry division led by Hawkins and Kent, storm and capture the main Spanish position on top of the San Juan Hill.

Historian Alger, who was Secretary of War Alger when this history was in the making, very cleverly makes Historian Roosevelt himself corroborate his account of the disposition of the troops in this battle by citing an isolated paragraph from the "Rough Riders," pages 134–136: "No sooner were we on the crest of Kettle Hill than the Spaniards from their line in our front, where they were strongly intrenched, opened fire upon us with their rifles and two pieces of artillery. * * * On the top of the hill was a huge iron kettle, probably used for sugar refining. Several of our men took shelter behind this. We had a splendid view of the charge on San Juan blockhouse to our left and a third of a mile to the front, where the infantry of Kent, led by Hawkins, were climbing the Hill." * * *

The average reader will wonder how he missed this tell-tale paragraph in Col. Roosevelt's book, which somehow or other conveys such an impression of Rough Rider valor and omnipresent activity that one forgets all other participants in the war and agrees with Mr. Dooley that the book should have been named "Alone in Cuba." Surely Historian Alger has made a mistake. We turn to the indicated page incredulously. No; there it is as quoted, securely sandwiched between Rough Rider acts fore and aft in the rapidly moving picture—paeans to right of it; paeans to left of it. Yet obscured as it is by the more important business (in the mind of the author) of glorifying the Rough Riders and completely lost, as it has been in all the shouting evoked by the publication of the myth, here is the statement in plain black and white from their gallant commander himself, that instead of leading the charge on the San Juan blockhouse the dashing troopers (including their commander) viewed it from behind the sugar kettle, a third of a mile away!

We never could have believed it upon any other authority, though other authorities are not lacking. The military reports of Gen. J. Ford Kent, of Capts. A. C. Markley, Henry Wygant, and Charles Dodge, of the Twenty-fourth Infantry, all of whom took part in the San Juan Hill charge, make no mention of Col. Roosevelt or the Rough Riders. Capt. Herbert H. Sargent's book on the Santiago campaign and Gen. Shafter's (commanding general) report in 1898 establish the fact that Las Guasimas was a Cavalry fight, but that the victory at San Juan was due primarily to the Infantry.

Moreover, the Cavalry division was only one-sixth of the strength of the corps actively engaged before Santiago on this July 1, and the Rough Riders made up but one-fifth or less of the Cavalry. So that the whole Rough Rider organization counted not more than one-thirtieth in the fight, and their commander, directing only about 500 men out of 16,000, could not have had any great influence upon the result.

Commenting on Roosevelt's statement that at a certain stage of the battle he "found himself at the front in command of fragments of all six regiments of the Cavalry division," John W. Bennett asks: "What had become of Wheeler, Sumner, and Wood, not to speak of the other brigade and regimental officers, many of whom, down to lieutenant colonel, must have outranked Roosevelt? Did they all think themselves in command of all six regiments? Participants in a battle rarely get the true historic perspective or properly gauge their own or the part borne by others in the fight. Disinterested civilians, like Bonsal, say the Infantry took the hill and the Cavalry came afterwards. This seems to be the fact."

It long ago became apparent to the country that there was not enough glory in that Spanish-American imbroglio to "go around."

Barring the Sampson-Schley controversy and the Dewey parade, most of the participants—even including Richmond Pearson Hobson—have tacitly agreed that it served its highest mission in furnishing a convenient stage setting for the Rough Rider star actor, and to let it go at that. By the time the Fifth Army Corps were mustered out on Long Island in the summer of 1898, Theodore Roosevelt, commander of 500 men in an army of 16,000, loomed bigger than every living soldier in the Republic.

Such things are incredible and inexplicable to the understanding of the ordinary individual, but it is all clear as day in the mind of the press agent.

The New York Sun of June 28, 1908, under an editorial caption, "Once more the old fiction," calls attention to the recurring persistence of this San Juan Hill fable every time a Rough Rider dies (or gets himself arrested for disorderly conduct), citing a case in point—an obituary sketch of Lieut. Col. Augur, of the Twenty-fourth Infantry, who died at Fort Thomas, Ky., on June 25—and concludes by severely holding Roosevelt responsible for the wide circulation of the misleading picture and calls on him to "either suppress the picture or courageously change the mendacious title."

In view of its present attitude, it must make the Sun mighty mad to remember—or does the Sun remember?—that this "mendacious" picture of the Rough Riders' charge appeared in large type on its own front page on the morning of July 4, 1898. Ten short years make a wonderful difference in the point of view sometimes, but the Sun may take comfort in the thought that it is not the first or only great dispenser of truth who has been too hasty in enlightening the world.

Moreover, as appears from Mr. Roosevelt's own account of the San Juan battle, he did not claim to have led the charge on the blockhouse but distinctly states that he "viewed" it from the crest of "Kettle Hill," and as probably for one person who read the book a thousand read the newspaper story, perhaps the Sun's responsibility for the wide circulation of the mendacious account is greater than Mr. Roosevelt's.

True, the book (The Rough Riders) did not appear until 1900, after Mr. Roosevelt had been safely elected governor of New York—"on this war record," according to Leupp—and was on his unconscious way to the White House. True, also, that there is nowhere any mention of Roosevelt's having "courageously" denied this "mendacious" newspaper account during the gubernatorial campaign, which was "made on it," soothing his conscience, no doubt, with the mental reservation that he had at least told the truth in his book. As further experience of the Roosevelt conscience reveals occasions wherein it was appeased on much slenderer grounds, there is no special reason for carping in this instance.

After all, why should the Sun or any other ill-natured stickler for accuracy be raising a rumpus now about the facts in this bit of Spanish-American history, when Mr. Roosevelt has been enjoying the substantial benefits of the popular fiction for 10 years?

Certainly it is not with any thought of undoing what has been done, or of depriving Mr. Roosevelt of the fruit of his toil. It is only interesting as a striking instance of the curious and ingenious fashion in which fable has donned the garb of truth to serve the needs of Roosevelt, and as throwing considerable light on Rooseveltian methods early in his career.

In 1902, Mr. Roosevelt being President, Vereschagin, the famous Russian painter of war scenes, came to Washington, and taking up his abode at Fort Myer began his now celebrated painting of the San Juan Hill charge. By whose order or upon whose initiative this was done no one now living in Washington appears to have any knowledge. There are residents who "remember that an effort was made to induce the Government to buy the picture," but by whom this effort was made no one will undertake to affirm. Certain old newspaper correspondents of Washington remember vaguely seeing the painting "while it was on exhibition at the White House," but the White House ushers are all afflicted with confusing recollections. "It may have been there, or it may not," is the baffling reply to all queries. Inquiry of William Loeb, jr., as to "when this picture was at the White House" elicited the illuminating response that he "has no idea where the picture is now, nor whether any copies of it are extant in Washington." Diligent search in various quarters has failed to discover any "copies" of the painting in Washington.

From a Fort Myer employee the writer learned that the picture was sent to New York after Vereschagin's death in 1904, and sold for $10,000. This Fort Myer employee, who was on the spot when the painting was being executed, further vouchsafed the information that the work was done mostly "under cover," the artist not inviting public inspection; that he (the Fort Myer attaché) had seen it only once, and was struck with the equestrian figure of the President in the center; that the President came several times to Fort Myer during the progress of the painting and was in consultation with the artist.

Perhaps by this time the President had forgotten the details of the battle which he had put into his "Rough Rider" annals; perhaps familiarity with the sight of that horseback figure in the thick of the fray had convinced him of its truth; perhaps, like Riis, he had learned to "love the picture," and, as we have learned by this time, the President is notoriously "short of memory." The artist Vereschagin might have unfolded a tale to set all doubts at rest, but he did not tarry long in this country after finishing this masterpiece, and thereafter very prudently got himself drowned on board a Russian battleship at the siege of Port Arthur, thereby escaping likely membership in the "Ananias Club."

This San Juan Hill picture, in what it represents, and taken in connection with Historian Leupp's statement that it secured the governorship of New York, is a conspicuous and fitting illustration of the sort of foundation on which was reared this fair structure of Rooseveltian greatness and fame.

—

REPUBLICAN NATIONAL COMMITTEE,
New York City, August 29, 1912.

Mrs. A. R. HALE,
6 West Sixty-sixth Street, New York City.

DEAR MRS. HALE: In accord with the request of Mr. George Eustis, of Washington, I inclose 45 slips for the sending out of 4,500 copies of Rooseveltian Facts and Fables. These slips are addressed to the State chairmen of 45 States, and 100 copies of the book are to be sent in each package.

Thanking you for your kind attention, I am,
Sincerely, yours, CHARLES D. HILLES.
(Inclosures.)

—

NEW YORK, *August 16, 1912.*

DEAR MRS. HALE: I inclose my check for $500 in part payment for 5,000 copies of your book as agreed between us, leaving $750 to be paid on delivery of the book.

Yours, sincerely, GEORGE EUSTIS.

—

WASHINGTON, D. C., *September 25, 1912.*

Mrs. A. R. HALE,
6 West Sixty-sixth Street, New York City, N. Y.

DEAR MADAM: In accordance with instructions received from Mr. George P. Eustis we inclose herewith check to your order for $1,000.

Very truly, yours.

NATIONAL SAVINGS & TRUST CO.,
By P. A. GALLEHER.

OWNERSHIP OF FREIGHT CARS.

Mr. SMITH of Georgia. I have a few lines, which have been printed in a morning newspaper, which I send to the desk and ask to have read. They contain, as I think, information that is very interesting and valuable.

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

NATION TO OWN FREIGHT CARS.

NEW YORK, *June 7.*

Supplementing present governmental control of the railroads, the National Council of Defense has completed plans to buy 100,000 freight cars, to be actually owned by the Government and operated on all railroads of the country. The cost of this Government-owned equipment will be $150,000,000.

It was learned to-day practically every car builder in the country has been summoned to Washington to attend conferences where the problem of facilitating the building of these cars was discussed.

The council, it is stated, has been informed by railway authorities that nationalization of the roads will prove ineffective unless more equipment is provided.

U. S. HOSPITAL SHIP "SOLACE."

Mr. CALDER. Mr. President, I ask unanimous consent to insert in the RECORD the report of the committee appointed by the Secretary of the Navy to investigate the charges made by the sailors in the measles ward on the U. S. hospital ship *Solace*, which I recently read in the Senate. This request is made so that the report of these gentlemen may be given the widest possible publicity. At the time that the round robin was read I made it clear that I had no personal knowledge of the conditions, but was calling it to the attention of the Senate with the hope that the matter might be thoroughly investigated and those guilty punished if the charges were true, and if untrue the fact be made known to the country.

I am glad that I presented the round robin to the Senate, and am equally pleased that so eminent a committee as Dr. Welch, of Johns Hopkins Hospital, of Baltimore; Dr. Flexner, of the Rockefeller Foundation; and Mr. Nathan Straus, a distinguished merchant of New York City, was selected to investigate the matter. Their report indicates that at the time of their examination many of the conditions complained of did not exist. The committee states that, in their judgment, the men making the charges considerably exaggerated them.

It is to be regretted that the committee were unable to personally interview all of the men who signed the round robin. Before they left Washington I offered to give the names to the junior Senator from Virginia [Mr. SWANSON], acting chairman of the Committee on Naval Affairs, if he would guarantee that the men would suffer no injury. He was unable to give me this assurance, but subsequently the members of the committee wired my hotel requesting the names. This telegram, however, was not received until they had returned to Washington.

I am pleased with the statement contained in the report of the committee, particularly as it refers to Admiral Braisted, of the Medical Corps of the Navy, and to Dr. Blackwood, in charge of the *Solace*, both of whom are eminent officers. Unquestionably the men complaining of their treatment were prompted to do so by the fact that the *Solace*, the only hospital ship in the Navy, was required to provide for over 100 sailors sick with contagious diseases when the ship was equipped to take care of only 30; and in the measles ward, from which the round robin emanated, where there were accommodations for but 10 sick men, there were over 40 patients at the time complained of.

The whole trouble comes from the fact that the Navy Department in establishing a base for over 25,000 men did not have hospital accommodations for 10,000.

It has been a matter of common knowledge that the department, through a policy of indecision, has permitted the service to get into such a condition that, with the immense expansion, it has required superhuman efforts on the part of the officers to keep the Navy in any sort of an efficient condition.

Mr. President, I want to make it clear here and now that my object in bringing this matter to the attention of the Senate was simply to establish the truth or falsity of the charges made by these 30 sailors aboard the *Solace*, not to injure or criticize unduly the Navy Department or the commander of this vessel. And I am very happy to learn that the commander of the *Solace* deserves no adverse criticism, but rather praise and commendation for handling so remarkably well the conditions, which were no fault of his own.

I realize, too, in these troublous times, that while our people should know of every failing which is detrimental to the best interests of the country—and that, incidentally, is why I opposed the proposal recently to censor the press—we should not unduly exercise or excite the people by accusations which are not well founded. I do believe, however, that the department should have fortified against an occurrence such as the one described, and I do most sincerely hope that prompt provision will be made to take care in the future of such an emergency.

The account of the report is as follows:

The Navy Department authorizes the following:

"The committee appointed by Secretary of the Navy Daniels to investigate the complaints of conditions aboard the hospital ship *Solace* made in a 'round robin' signed by 30 enlisted men, which was presented in the Senate by Senator CALDER, reports that some of the charges are untrue and others grossly exaggerated; that while the ship was overcrowded at the time of the complaints, there was no lack of care or medical attendance; that the patients suffering with different infectious diseases were carefully segregated; that the regulations in regard to sanitation were observed; and that the entire ship, including blankets, dishes etc., was sterilized after every trip to the hospital.

CONCLUSION AS TO "ROUND ROBIN."

"It concludes that 'the round robin was composed by one person, who wove into it complaints from various sources,' and that most of it 'rests on gossip and hearsay.'

"The committee reports that there was 'no lack of kindness and intelligent care' on the part of Dr. Blackwood, the medical director in command of the *Solace*, or his assistants; that 'they were dealing with an unprecedented emergency, and in handling it they acquitted themselves admirably.' It concludes that Surg. Gen. Braisted, Dr. Blackwood, and Dr. Pickerel, medical director in charge of the naval hospital, and their assistants are 'all entitled to the highest praise for their devoted and untiring efforts and for the success which they achieved under extremely difficult conditions.'

SPENT A DAY ON "SOLACE."

"The committee, composed of Dr. William H. Welch, director of the School of Public Health, Johns Hopkins University; Dr. Abraham Flexner, secretary of the General Education Board and author of Medical Education in the United States and Europe; and Mr. Nathan Straus, the philanthropist, went to the fleet, where every opportunity for observation was afforded them, and spent an entire day on the *Solace*, cross-questioning the members of the staff and the patients and examining into conditions on the hospital ship. They visited one of the largest naval hospitals training station, and navy yard, inspected the facilities and sanitary conditions, and individually interviewed all measles patients, sick or convalescent, who had at any time been aboard the *Solace*. They also made a careful inspection of two battleships.

INTERVIEWED AT LEAST 100 PATIENTS.

"Altogether," the reporter states, "we had interviews with upward of 100 patients who were aboard the *Solace* or had been aboard the *Solace*, either at the time of the round robin, shortly before, or shortly after. We did not know the names of the persons who signed the round robin. In the course of the inquiry we identified three of the signers, among them the person who undoubtedly composed the round robin and procured the signatures to it.

"Patients and convalescents were questioned in the absence of officers and attendants. We assured them their names would not be mentioned, and we encouraged them to speak freely for the good of the service. It is our judgment that the men spoke without reserve. Indeed, throughout our inquiry, both on the hospital ship *Solace* and at the naval hospital, we observed that the men felt entirely free to talk of conditions under which they were living. There was no evidence whatsoever of fear or constraint.

CAPACITY OF HOSPITAL SHIP.

"The *Solace* is the only hospital ship in the Navy at the present time," the report goes on to say. "Its normal capacity is 228 beds, of which 30 on the upper deck are set apart for communicable diseases. These 30 beds or bunks are arranged in three separate wards which do not communicate with one another, one ward having 8 beds, one 10, and one 12. Connected with each ward is a lavatory with a basin with running water, and two of the three wards have separate compartments for washing dishes and other vessels. As the measles ward has no such compartment, the dishes used in it are washed on the outside in large pans.

"The three wards just described are well ventilated and serve their purposes excellently under normal conditions. The main part of the hospital—that is, the medical and surgical wards and the operating rooms—are on the deck below, and are models of their kind. The staff of the *Solace* consists of the medical inspector who is in command, assisted by an executive surgeon, an operating surgeon, an internist and specialist in genito-urinary diseases, a specialist in diseases of the eye, ear, nose, and throat, a laboratory chief, a dentist, a pharmacist and assistants, and, finally, the so-called apprentices, who are male nurses.

INCREASE IN PERSONNEL.

"Following the declaration of war there was an enormous and very rapid increase of the personnel of the Navy," the investigators point out. "Recruits from various parts of the country poured into the training camps, and thence into the fleet—at Norfolk as many as 700 or more a day. Soon a fleet population of 25,000 was gathered there. The new recruits were especially susceptible to the common infectious diseases. It happened that measles, mumps, and to some extent scarlet fever and cerebrospinal meningitis were more common and more widely distributed in the country at large than is usual at this time of year. The recruits passed through the training stations far more rapidly than in normal times, and under these conditions it was inevitable that there should be a large increase in the number of common infections. The existing facilities were therefore subjected to a tremendous strain.

THE "SOLACE" CROWDED.

"The war vessels had at once to transfer their infectious cases to the *Solace*," the report states. "The *Solace*, equipped to handle comfortably 30 infectious cases, had to handle at times more than three times that number. The pressure was most severe between the 18th and 21st of May, the dates covered by the round robin. On May 18 there were 72 infectious cases on board. Eight more were added on the 19th, 14 more on the 20th, and 7 on the 21st—101 in all—over three times the normal capacity of the hospital ship. It was impossible for the *Solace* to avoid congestion by more frequently transferring patients to the naval hospital. In the first place, the naval hospital was itself overtaxed, and the bungalows and the tents, which now enable the hospital to accommodate a largely increased number of patients, had not then been sufficiently provided. Again, on account of its operating facilities and its facilities for taking care of noncontagious medical patients it was important that the *Solace* stay by the fleet, avoiding as long as possible the loss of the time required for the trip to the hospital and back. It may be added that within the last few days an ambulance transport previously arranged for has been provided for the purpose of carrying patients from the *Solace* to the naval hospital.

STAFF WAS INCREASED.

"'Immediately upon the increase of the number of patients to be handled the staff of the *Solace* was increased to 70. Cots and Army stretchers were as rapidly as possible provided and tents were erected on deck. At no time was there the slightest relaxation in the enforcement of strict sanitary precautions, with a view to preventing the spread of infections. That the precautions taken were effective is evident from the fact that both on board the *Solace* and at the naval hospital cross infections have proved to be extremely rare.'

"The committee takes up seriatim the seven charges contained in the round robin and answers each separately, the charges and their conclusions being as follows:

THE CHARGES ANSWERED.

"'1. When we were sent from our ships, lying at different points in the fleet base, we were compelled to carry our own baggage, with fevers ranging from 100 to 103 degrees.

"'We find that patients are brought in a launch from the various ships in the fleet to the *Solace*, those who are very ill lying on stretchers, others occupying seats in the launch. Three officers of the *Solace* stand at the head of the gangway to receive the patients. Those who are able to carry their own bags up the gangway do so; those who are unable leave them to be removed subsequently by others. Occasionally they help one another. We were unable to find anyone, except the author of the round robin, who stated that patients "were compelled to carry their own baggage." Of the other two signers of the round robin, who, as has been said above, were identified, one stated that he "knew of no general complaints about carrying bags," that he himself "was able to carry his own bag." Another stated that he hardly felt sick at any time. The charge, therefore, of inhuman or unfeeling treatment in this respect is, in our judgment, absolutely untrue.

"'2. Drinking water, very scarce. I had three glasses while on board (C. K. E.), and some men had only one glass apiece. I might add that there was no ice water and the water was very warm.

"'Under ordinary conditions on board the *Solace* water is kept in a water cooler in each ward. This water has been cooled, but, except in very warm weather, does not contain ice. During the prevailing cool weather this spring the use of ice has not been considered necessary. For some unexplained reason the cooler in the measles ward was not in use during the period to which the round robin refers; instead, water was brought up by the apprentice from time to time in pitchers or drawn by the patients from the faucet in the lavatory. Most of the persons interviewed stated that they got all the water they wanted, and that in their judgment no one needed to go without water. On the other hand, it is evident that the apprentice was so busy waiting on forty-odd persons that he was at times not able to serve water promptly. A patient who lay in a bunk close to the one occupied by the author of the round robin and at the same time stated he "had plenty of water and whenever he wanted it." Another referring to the same subject stated that he "could get a drink within 5 or 10 minutes after asking for it," and that he "did not always have to wait." Sometimes he "did not have to wait at all." Several patients stated that sometimes "the water was warm." In our judgment the charge in reference to the drinking water is grossly exaggerated, and the implication of lack of care is entirely undeserved.

"'3. The dishes used by men sick with measles were washed in lavatory, where vessels were standing around with germs of scarlet fever and mumps, which said germs were thrown in same receptacle used by men with measles; the dishes, forks, and knives were wiped with toilet paper.

WASHING OF DISHES.

"'Two of the three wards have small apartments for washing dishes and other utensils. The measles ward has no such apartment. Orders require that the dishes used in this ward be washed in large pans outside on the deck. It appears that occasionally some dishes were, contrary to orders, washed in the wash basin, but it was, in our opinion, exceptional, and did not take place frequently enough to interfere with men who desired to use the basin for its proper purpose. In any case, the only dishes or vessels thus washed were dishes and vessels which had been used by men suffering with measles. The charge that "vessels were standing around with germs of scarlet fever and mumps" in the measles compartment is impossible and absolutely absurd.

"'4. All food was served to the men on one large platter, the motto of which was "Help yourself or go without."

FEEDING OF PATIENTS.

"'Men in bunks are served on trays. For those who are up and about food is brought on large platters, each platter containing a separate article of food. In our opinion the method adopted in feeding

patients is the only one practicable, and is, indeed, entirely correct. We were unable to find a single patient, except the author of the round robin, who complained that he was unable to get food enough. The two other signers of the round robin, to whom we have already alluded, both reported that they themselves got food, but that they had "heard" that there were others who failed to do so. The neighbor of the author of the round robin stated that food was brought to him regularly and abundantly. Many others declared that they had never heard any complaints on this subject. The general trend of the testimony, and our own inspection, indicates that there is an abundance of food of excellent quality.

"'5. Men who were sick were compelled to sleep on the deck with blankets (two). Many of these men had high fevers.

SLEEPING ARRANGEMENTS.

"'At the time of the greatest congestion, to which the round robin refers, patients slept (1) in bunks, (2) on cots, (3) upon Army litters placed between the bunks. These litters rest on legs about 3½ inches high. Persons unaccustomed to the appearance of these litters might be deceived into thinking that those lying in them were lying on blankets on the deck. We found a few patients who stated that on the night of their arrival on the *Solace*, litters and cots having given out, they slept between blankets on the deck. As a matter of fact, under the circumstances no special harm could have resulted, but we are persuaded that the charge applies to so few persons as to be practically negligible.

"'A patient who entered the measles ward on May 17, and is still there, stated that he had "never known or heard of anyone who slept on deck," showing how very unusual this must have been. Another patient stated, in reference to the "litters," "to look at them you would think they were on deck." This, indeed, seems to us the explanation of this charge.

"'6. Blankets used by men with measles, mumps, and scarlet fever were piled up in one stack, and at night they were issued to the first ones who came for them. These blankets were not sterilized, and there were many risks taken by men of transferring disease to one another.

"'This is much the most serious charge made—perhaps the only really serious one. We shall, therefore, discuss it very fully.

"'In order to accommodate the overflow, four carefully separated tents were set up in the open-deck space. One of these tents is used for mumps, another for measles, and another for scarlet fever. Most of these patients are up and about during the day, but those convalescent from different diseases are carefully kept apart. When these convalescents arise in the early morning they fold their blankets and place them at the foot of the cot; later, apprentices and convalescents collect and pile the blankets separately. The author of the round robin stated that he himself "saw blankets indiscriminately heaped in a single pile." On inquiry it developed that the only occasion when he was out of the ward and on deck was on Sunday morning, May 20, about noon. He had, he said, left the ward for the purpose of hearing the music, and had lain down on a cot in the measles tent on deck, where he remained an hour. At this time, according to his testimony, he saw apprentices and convalescents carrying blankets from the foot of the cots, and making a single pile of them. As against this statement we have the otherwise unanimous statement of officers and scores of patients, who state that all those patients who were able to be up and about, arose at 7 o'clock in the morning, folded their blankets and had breakfast; and that the blankets were taken from the cots and piled up, at the latest, before 8 or 9 o'clock in the morning. Moreover, the author of the round robin pointed out to us the place where he lay on deck, from which place it was, as a matter of fact, impossible to see what he claims to have seen, even if it were going on. The charge that blankets were not sterilized is absurd. Every time the *Solace* discharges its patients to the hospital, the entire ship is sterilized, including blankets, dishes, etc. If the charge we are discussing were true there would have been cross infection among the patients on the *Solace* and in the hospital. In this respect, however, the record of the *Solace* and the hospital seems to have been extremely good. The failure to develop cross infections is, therefore, in itself a complete answer to the charge.

"'7. Sick men unable to wash themselves went without for length of trip on U. S. S. *Solace* to the hospital at Norfolk.

WASHING CHARGE ANSWERED.

"'We found two persons—the author of the round robin and one of the signers—who said they did not wash during the period of three to five days when they were on board the *Solace*, their explanation being that the washbasin in the measles ward contained dishes. With the exception of these two persons, we found no one who claimed that he was unable to wash, either for this or any other reason. The other signer of the round robin, with whom we spoke, testified that he washed every day, though he said he could not always get in the wash room when he wanted because there were so many other boys.

"'Still another said: "The basin was all right for washing almost any time," and further, that he "had never heard any complaints about washing." In our opinion the two persons who stated that they were unable to wash properly found the lavatory occupied when they went to it for that purpose, and simply failed to repeat the attempt at another time.

"'Attention should also be directed to the fact that the 30 persons who signed the round robin do not apparently all claim to have knowledge of all the charges.

"'The round robin was composed by one person, who wove into it complaints from various sources. The signers evidently did not mean individually to indorse or stand for the whole of it. It is clear to us that most of it rests on gossip and hearsay.

SHIP DOCTORS COMMENDED.

"In conclusion, we may state that the persons sick on the *Solace* and at the hospital are not afraid and do not hesitate to complain. The general testimony is to the effect that they received what they wanted, needed, and asked for. Every one of the signers of the round robin stated that 'the apprentice in the measles ward simply could not do any better than he did.' There was, in our judgment, no lack of kindness and intelligent care on the part of Dr. Blackwood and his assistants. They were dealing throughout the month of May with an unprecedented emergency, and in handling it they acquitted themselves admirably.

"In our judgment, Surg. Gen. Braisted, of the Navy, Dr. Blackwood, the medical inspector in command of the *Solace*, and his staff, as well as Dr. Pickerel, medical director, in charge of the naval hospital, and his assistants, are all entitled to the highest praise for their devoted and untiring efforts and for the success which they achieved under extremely difficult conditions."

ADDRESS OF SECRETARY OF THE INTERIOR LANE.

Mr. JONES of New Mexico. Mr. President, on June 4, a very notable address was delivered by Hon. Franklin K. Lane, Secretary of the Interior, before the Home Club of the Interior Department, Washington, D. C. The subject of the address was "Why do we fight Germany?" I believe that this is an address which every citizen of the United States should read, or should have the opportunity of reading. I therefore ask that it be printed in the RECORD.

The VICE PRESIDENT. Is there objection? The Chair hears none.

The address is as follows:

WHY DO WE FIGHT GERMANY?

[Address by Franklin K. Lane, Secretary of the Interior, on June 4, 1917, before the Home Club of the Interior Department, Washington, D. C.]

"To-morrow is registration day. It is the duty of all, their legal as well as their patriotic duty, to register if within the class called. There are some who have not clearly seen the reason for that call. To these I would speak a word.

"Why are we fighting Germany? The brief answer is that ours is a war of self-defense. We did not wish to fight Germany. She made the attack upon us; not on our shores, but on our ships, our lives, our rights, our future. For two years and more we held to a neutrality that made us apologists for things which outraged man's common sense of fair play and humanity. At each new offense—the invasion of Belgium, the killing of civilian Belgians, the attacks on Scarborough and other defenseless towns, the laying of mines in neutral waters, the fencing off of the seas—and on and on through the months we said: 'This is war—archaic, uncivilized war, but war! All rules have been thrown away; all nobility; man has come down to the primitive brute. And while we can not justify we will not intervene. It is not our war.'

"Then why are we in? Because we could not keep out. The invasion of Belgium, which opened the war, led to the invasion of the United States by slow, steady, logical steps. Our sympathies evolved into a conviction of self-interest. Our love of fair play ripened into alarm at our own peril.

"We talked in the language and in the spirit of good faith and sincerity, as honest men should talk, until we discovered that our talk was construed as cowardice. And Mexico was called upon to cow us. We talked as men would talk who cared alone for peace and the advancement of their own material interests, until we discovered that we were thought to be a nation of mere money makers, devoid of all character—until, indeed, we were told that we could not walk the highways of the world without permission of a Prussian soldier, that our ships might not sail without wearing a striped uniform of humiliation upon a narrow path of national subservience. We talked as men talk who hope for honest agreement, not for war, until we found that the treaty torn to pieces at Liege was but the symbol of a policy that made agreements worthless against a purpose that knew no word but success.

"And so we came into this war for ourselves. It is a war to save America—to preserve self-respect, to justify our right to live as we have lived, not as some one else wishes us to live. In the name of freedom we challenge with ships and men, money, and an undaunted spirit, that word "Verboten" which Germany has written upon the sea and upon the land. For America is not the name of so much territory. It is a living spirit, born in travail, grown in the rough school of bitter experiences, a living spirit which has purpose and pride and conscience—knows why it wishes to live and to what end, knows how it comes to be respected of the world, and hopes to retain that respect by living on with the light of Lincoln's love of man as its old and new testament. It is more precious that this America should live than that we Americans should live. And this America as we now see has been challenged from the first of this war by the strong arm of a power that has no sympathy with our purpose, and will not hesitate to destroy us if the law that we respect, the rights that are to us sacred, or the spirit that we have, stand across her set will to make this world bow before her policies, backed by her organized and scientific military system. The world of Christ—a neglected but not a rejected Christ—has come again face to face with the world of Mahomet, who willed to win by force.

"With this background of history and in this sense, then, we fight Germany—

"Because of Belgium—invaded, outraged, enslaved, impoverished Belgium. We can not forget Liege, Louvain, and Cardinal Mercier. Translated into terms of American history these names stand for Bunker Hill, Lexington, and Patrick Henry.

"Because of France—invaded, desecrated France, a million of whose heroic sons have died to save the land of Lafayette.

Glorious golden France, the preserver of the arts, the land of noble spirit. The first land to follow our lead into republican liberty.

"Because of England—from whom came the laws, traditions, standards of life, and inherent love of liberty which we call Anglo-Saxon civilization. We defeated her once upon the land and once upon the sea. But Australia, New Zealand, Africa, and Canada are free because of what we did. And they are with us in the fight for the freedom of the seas.

"Because of Russia—New Russia. She must not be overwhelmed now. Not now, surely, when she is just born into freedom. Her peasants must have their chance; they must go to school to Washington, to Jefferson, and to Lincoln, until they know their way about in this new, strange world, of government by the popular will.

"Because of other peoples, with their rising hope that the world may be freed from government by the soldier.

"We are fighting Germany because she sought to terrorize us and then to fool us. We could not believe that Germany would do what she said she would do upon the seas.

"We still hear the piteous cries of children coming up out of the sea where the *Lusitania* went down. And Germany has never asked forgiveness of the world.

"We saw the *Sussex* sunk, crowded with the sons and daughters of neutral nations.

"We saw ship after ship sent to the bottom—ships of mercy bound out of America for the Belgian starving; ships carrying the Red Cross and laden with the wounded of all nations; ships carrying food and clothing to friendly, harmless, terrorized peoples; ships flying the Stars and Stripes—sent to the bottom hundreds of miles from shore, manned by American seamen, murdered against all law, without warning.

"We believed Germany's promise that she would respect the neutral flag and the rights of neutrals, and we held our anger and outrage in check. But now we see that she was holding us off with fair promises until she could build her huge fleet of submarines. For when spring came she blew her promise into the air, just as at the beginning she had torn up that 'scrap of paper.' Then we saw clearly that there was but one law for Germany—her will to rule.

"We are fighting Germany because she violated our confidence. Paid German spies filled our cities. Officials of her Government, received as the geusts of this Nation, lived with us to bribe and terrorize, defying our law and the law of nations.

"We are fighting Germany because while we were yet her friends—the only great power that still held hands off—she sent the Zimmermann note, calling to her aid Mexico, our southern neighbor, and hoping to lure Japan, our western neighbor, into war against this Nation of peace.

"The nation that would do these things proclaims the gospel that government has no conscience. And this doctrine can not live, or else democracy must die. For the nations of the world must keep faith. There can be no living for us in a world where the state has no conscience, no reverence for the things of the spirit, no respect for international law, no mercy for those who fall before its force. What an unordered world! Anarchy! The anarchy of rival wolf packs!

"We are fighting Germany because in this war feudalism is making its last stand against on-coming democracy. We see it now. This is a war against an old spirit, an ancient, outworn spirit. It is a war against feudalism—the right of the castle on the hill to rule the village below. It is a war for democracy—the right of all to be their own masters. Let Germany be feudal if she will, but she must not spread her system over a world that has outgrown it. Feudalism plus science, thirteenth century plus twentieth—this is the religion of the mistaken Germany that has linked itself with the Turk, that has, too, adopted the method of Mahomet. 'The state has no conscience.' 'The state can do no wrong.' With the spirit of the fanatic she believes this gospel and that it is her duty to spread it by force. With poison gas that makes living a hell, with submarines that sneak through the seas to slyly murder noncombatants, with dirigibles that bombard men and women while they sleep, with a perfected system of terrorization that the modern world first heard of when German troops entered China, German feudalism is making war upon mankind. Let this old spirit of evil have its way and no man will live in America without paying toll to it in manhood and in money. This spirit might demand Canada from a defeated, navyless England, and then our dream of peace on the north would be at an end. We would live, as France has lived for 40 years, in haunting terror.

"America speaks for the world in fighting Germany. Mark on a map those countries which are Germany's allies and you will mark but four, running from the Baltic through Austria and Bulgaria to Turkey. All the other nations the whole globe around are in arms against her or are unable to move. There is deep meaning in this. We fight with the world for an honest world in which nations keep their word, for a world in which nations do not live by swagger or by threat, for a world in which men think of the ways in which they can conquer the common cruelties of nature instead of inventing more horrible cruelties to inflict upon the spirit and body of man, for a world in which the ambition or the philosophy of a few shall not make miserable all mankind, for a world in which the man is held more precious than the machine, the system, or the state."

ARTICLE BY ROBERT G. SKERRETT.

Mr. SHIELDS. Mr. President, I present an article which appeared in the Saturday Evening Post of May 12, 1917, by Robert G. Skerrett, on the subject of the fixation of atmospheric nitrogen. It contains a great deal of valuable information to the country in the present emergency with regard to the supplying of nitrogen both for war purposes, in the manufacture of munitions, and also to act in commerce as a fertilizer. I desire that the article may be printed in the RECORD without reading. I present it at this time because I think it is opportune; and, in view of certain facts, I brought it forward intending at the same time to submit a resolution asking for information from the Secretary of War as to why the nitrate plant provided for by the Congress of the United States had not been located, or at least for some information as to the progress the War Department is making in locating that plant. It is very closely connected with that subject matter and would go well with the resolution. I find that I have not the resolution with me in the Senate this morning, and I shall offer it on some other occasion.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

A BILLION A YEAR FROM THE AIR.

[By Robert G. Skerrett.]

A billion a year from the air! No, it is not a blue-sky mining scheme, but a thoroughly practicable proposition and a national economic necessity. In short, the purpose is to imprison free nitrogen. And this brings us to the $20,000,000 appropriated by Congress last year for the establishment of a plant or plants for the fixation of atmospheric nitrogen—the product to serve our farm lands in times of peace and, during periods of hostilities, to aid us in the manufacture of munitions for national defense.

The public has heard a good deal during the past 18 months about the chemistry of warfare, and, to those that have heeded what has been said and written, it must be plain how large a part nitric acid plays in the preparation of explosives and military propellants for all sorts of ordnance. Most of the nitric acid used in this country is obtained by treating sodium nitrate, commonly called Chile saltpeter, which comes to us from an arid, barren region in Chile lying between the Pacific Coast and the foothills of the Andes.

According to the geologists this plateau section of South America originally lay below sea level and was gradually lifted above the surface of the Pacific Ocean. In this way an inland body of water was formed in the course of ages, and thus were pent up enormous quantities of marine vegetation. In time the salt water evaporated, the vegetation decayed, and nitrifying bacteria stored in the residuum increasing amounts of nitrogen drawn from the atmosphere. Because of this undisturbed process, continuing for eons, strata of nitrate-bearing earths are found containing as much as 95 per cent of sodium nitrate.

NITROGEN PLENTIFUL BUT SLIPPERY.

The importance of these deposits has been more and more emphasized during the last half century; and as far back as 1867 we imported 14,715 tons, then valued at something over half a million dollars. Up to the outbreak of the present war, Germany easily led the world in her purchases of Chilean saltpeter, but by the end of 1915 our shipments from those nitrate beds increased until our imports totaled substantialy 535,800 tons—representing a money equivalent of $20,400,000 in round figures. These data are interesting, because they bring out the fact that sodium nitrate to this amount is needful to meet the requirements of our industrial life to-day.

It is true that we get on an average $15,900,000 worth of saltpeter annually from Chile, during the decade just before hostilities, so that the difference of late is plainly due to our increased output of munitions. Prior to that time, fully half of the yearly consumption of sodium nitrate was diverted to agricultural purposes and other essential peace-time uses.

Unquestionably there is enough saltpeter left in Chile to meet even present demands for decades to come, taking the lowest estimate of the resources; but the crucial question is: Can we count upon this source of supply when at war ourselves?

It has long been known that there were nitrate deposits in California, and until of late it was hoped that they might be developed. Investigation, however, by the United States Geological Survey has disclosed the fact that they are neither rich nor of such a character as to warrant working them commercially. Therefore, unless we can keep the trade lanes open to Chile, we must find means within our continental boundaries to provide us with nitrogen, in some fixed forms, that will enable us to do all that we are doing now with this elemental essential so indispensable to our national activities in many vital directions. Hence the Government's intention to draw upon the inexhaustible resources of our enveloping atmosphere.

We can not wait upon nature's age-long processes. We must imitate her through agencies that will achieve in days what she has accomplished in the course of centuries, and in order to understand at the start how this is possible, let us consider what the air about us has to offer in the way of nitrogen. To be precise, the atmosphere we breathe contains nitrogen to the extent of 78 per cent of its volume—the difference being principally oxygen. There rests upon every square mile of the earth's surface 20,000,000 tons of atmospheric nitrogen; and under normal conditions this would meet the annual

consumption for a period of quite half a century! The problem then is to capture and next to imprison in some substance this nomadic element. But before explaining how this is done, it would be well to have a fuller realization of nitrogen's function in the economics of human existence and general welfare in the way of national security.

Two great tasks stand out in the forefront of the struggle in Europe: The feeding of the people and the feeding of the guns. Ultimate success for either belligerent faction depends fundamentally upon these vital performances. People can not live without food and the guns can not be fired without powder. When the supply of either fails on one side or the other the fighting must come to a stop. But the people must be fed at all times, whether in war or in peace; and the cost of living always is determined by the bounty of the crops.

Foods are of many kinds, and so are explosives varied; but, analyze them as one will, there is ever present a percentage of a certain chemical element—that is, nitrogen. True, there are other constituents, possibly in greater proportions, and it may be asked, Why single out nitrogen for special mention? Simply because in Nature's workshop—the soil—and in man's munition factories as well, nitrogen is the one indispensable material that is the scarcest of those that are needed. The others are just as essential, but they can be had far more easily and abundantly. Indeed, they are commonly available in amounts sufficient to overbalance the nitrogen at hand.

Accordingly the supply of nitrogen is usually the first to give out, and when that happens production comes to a standstill, either in the soil or in the factory. In round terms, the fertility of the earth is broadly reckoned by the measure of its contained nitrogen. This is not theory but an established fact. For instance, land holding three-tenths of 1 per cent of nitrogen will prove very fruitful and, other things being equal, will produce anywhere from 30 to 40 bushels of wheat to the acre. A soil with two-tenths of 1 per cent of nitrogen will probably be good for about 25 bushels of wheat to the acre. If it contains but one-tenth of 1 per cent of nitrogen, the yield will be in the neighborhood of 15 bushels; but if this plant food be as low as one-twentieth of 1 per cent, the earth will be too poor to grow a profitable harvest.

But this element of life and growth is also an element of death and destruction; for all explosives, without exception, are nitrogenous compounds. Every pound of powder that has been fired on the battle fields of Europe was made through the agency of nitric acid; and nitrogen is one constituent of this corrosive liquid. A pound of smokeless powder requires 1½ pounds of nitric acid for its production, and that acid, when made from Chile saltpeter, requires 2½ pounds of Nature's sodium nitrate. Plainly, then, nitric acid is indispensable in the manufacture of the propellants for projectiles as well as for the bursting charges of shells, and without these explosives a nation can not fight.

HOW NITRATES FEED MEN AND GUNS.

Prior to the war Germany drew upon Chile yearly for something like 900,000 tons of sodium nitrate, and there is good reason to believe that fully 500,000 tons of this were utilized in the preparation of fertilizers for domestic use. German ships transported most of the saltpeter from the Chilean beds, and her enemies knew the economic significance of that traffic. One of the first acts of the entente allies was therefore to try to stop these shipments, not only to silence in this way the Teuton guns but to bring the peoples of the central powers to the point of desperate hunger. How nearly her foes have achieved this, in the case of Germany particularly, is becoming more evident as the weeks go on.

To make the situation clearer, so far as Germany's food problem is concerned, a few facts should be mentioned. The soils of Germany are by nature no better than those of the surrounding countries. Thirty years ago, by rotation of crops and by very careful cultivation, the Teuton farmers were able to garner from 18 to 20 bushels of wheat to the acre and only 15 bushels of rye. But immediately preceding the present conflict, thanks to the use of nitrogenous fertilizers, the cultivated acres of the fatherland were producing from 30 to 32 bushels of wheat to the acre and 25 bushels of rye. Three decades back, without recourse to this plant food, the oat fields produced 30 bushels to the acre, and in 1913 nitrogen fertilization brought up the crops to 61 bushels an acre.

The potato in Germany, just as it is here, is a fundamental element in the national diet. In the early eighties 130 bushels of potatoes to the acre was considered a prime yield, but by 1914 Chile saltpeter had made it possible to count upon an output of 210 bushels per acre. Germany did this while the seas were open to her; and because the same course was not followed by farmers in Russia, Austro-Hungary, France, and Italy, these countries, with similar if not better soils, did not improve upon their crops of 30 or 40 years ago. On the other hand, Great Britain, Belgium, and Holland, profiting by Germany's example, were able to increase the abundance of their acres anywhere from 50 to 100 per cent.

Prior to August of 1914 Germany was producing, by reason of her stimulated fields, 90 per cent of her normal food requirements, and she found it necessary to get from abroad only the modest difference of 10 per cent. However, in order to achieve this she imported 70 per cent of her nitrogen, which was capable of inducing many times its own weight in the form of food from the soil. That is to say, 1 pound of nitrogen, properly applied, increases the harvest of wheat, rye, barley, or oats by about 20 pounds of grain and 40 pounds of straw. In the case of potatoes, 1 pound of nitrogen will better the normal yield of these tubers by 85 pounds. By cutting off the external supply of nitrate of soda, Germany's enemies were bent upon robbing her larder of substantially 4,000,000 tons of grain or 17,000,000 tons of potatoes—thus reducing her self-sufficiency from a normal 90 per cent to about 65 per cent.

The real situation is made more evident if we bear in mind that the population of the German Empire in Europe was, in 1890, 49,475,000, and by the latest figures it has grown to 66,715,000, representing an increase in 27 years of 35 per cent. With her foreign food supply cut off and the fruitfulness of her soil greatly affected by a scarcity of nitrogenous fertilizers, sustenance for the 66,715,000 people was potentially cut down to what it was three decades back! These figures show Germany woefully handicapped immediately after the outbreak of war; but we shall see presently just how her engineers and technicists have striven to neutralize this disadvantage. Therein lies the lesson for us, for it is our purpose to profit by the present state of the art of fixing atmospheric nitrogen.

THE SHORTAGE.

As has already been said, 1 pound of explosives requires in its manufacture 1½ pounds of nitric acid. It is authoritatively asserted that Germany had on hand, when she declared war, a supply of explosives and a store of nitrates from which to make powder sufficient for one year of hostilities. This was deemed the utmost length of the struggle. It was not more than a few weeks after the conflict began ere the Kaiser's military authorities awakened to the seriousness of the situation so far as munitions were concerned; and within a short span of months native chemists and engineers were doing their utmost to devise ways to increase the supply of nitrogen.

At that time the nation was producing about one-third of its normal requirements of nitrogen as a by-product from the coking of coal in recovery ovens. Inasmuch as discussion has been frequent regarding the capacity of by-product coke ovens here to furnish an adequate amount of nitrogen, it should be of interest to note what part they actually played in meeting Germany's wartime needs. A ton of coal yields in the recovery oven about 5 pounds of nitrogen, 1,500 pounds of coke, 60 pounds of tar, 17 pounds of light oil and 4,000 cubic feet of gas. To run ovens merely for the sake of obtaining nitrogen is obviously out of the question, because the other products must find useful employment or markets. Under normal conditions Germany's iron works consumed 50 per cent of her coke, but this industry fell off as the war continued, until the output dropped to only two-thirds of regular capacity. At the same time private consumption of coke decreased, notwithstanding the fact that the Government required public-service corporations and the like to use coke instead of coal for fuel. As a net result, coke production, with its by-products, diminished to 82 per cent of the normal. Thus, instead of adding to the nation's supply of nitrogen obtained in this way, Germany's coke ovens actually failed to produce their accustomed output.

This revelation is of deep interest to us. Up to 1915 the majority of the coke plants in the United States were equipped with the old-fashioned beehive ovens, and all the gas, the tar, and the ammonia—the latter rich in nitrogen—were wasted. To put us on equality with Germany prior to the war it would be necessary to substitute modern recovery ovens with condensation plants. To some extent this has been done in order to promote an American dyestuff industry. As matters stand now there are certainly not enough of these up-to-date coke ovens in service here to supply us with nitrogen in the form of ammonia to meet more than a quarter of our ordinary requirements, and from this source in the future it is debatable whether more than 50 per cent of our needs could be met. Therefore we shall probably have to do much as Germany has done.

The performances of the German commerce raider *Moewe* is fair evidence of the difficulties that would confront us if we had to depend upon Chile for the major part of our nitrates. Two or three vessels of this sort loose in either the south Atlantic or the south Pacific could utterly demoralize shipping bound to us with saltpeter. It was undoubtedly to prevent the entente allies from obtaining nitrate supplies that Armiral von Spee lurked with his squadron off the coast of South America, and his two memorable battles with the British showed how desperately determined he was to hold his station along the trade routes to Europe.

THREE PROCESSES.

When the Germans captured Antwerp they found there 250,000 tons of nitrate, which proved a windfall to them indeed. This sufficed to tide them over the critical period in which they were rushing to completion their plants for the fixation of atmospheric nitrogen. We probably have less than 250,000 tons in this country to-day, while Germany, when she took Antwerp, had in reserve 600,000 tons, and was able in the months following to import through neutral countries 200,000 tons more. But, even so, within a year from the outbreak of war her entire resources of 1,050,000 tons of nitrates were used up.

How, then, was Germany able to utilize atmospheric nitrogen in order to make up her deficiencies? Her engineers and experts centered their efforts upon three fixation processes. These separate methods are known as the arc process, which burns air in an electric flame to form nitric acid in the end; the Haber process, by which compressed heated nitrogen and hydrogen gases are brought in contact with sponge platinum, which plays the part of a catalyzer, thus producing ammonia; and the cyanamide process, which fixes nitrogen or imprisons it in a compound of fused lime and coke. The total production of all three in Germany, in 1914, was substantially 100,000 tons, but the exigencies of warfare compelled a tremendous difference in output. To-day the arc process, so it is said, is not used at all in Germany, but the Haber process is now producing 500,000 tons yearly, while the cyanamide process yields 600,000 tons in the same period. The by-product coke ovens are supplying 400,000 tons annually. That is to say, the Germans have at their disposal a total of 1,500,000 tons of fixed nitrogen.

Such has been the answer of Germany's engineers to the nation's call for indispensable nitrogen. But great as the result appears, the achievement is seemingly decidedly short of her needs. For while the present production of air nitrogen slightly exceeds the former imports of Chile saltpeter, yet it must be borne in mind that the military demands consume perhaps two-thirds of the supply, and agriculture receives only a moderate fraction of its needful plant food. No wonder that crop yields are greatly reduced and that a shortage of food confronts the empire.

While the arc process is not employed in Germany, where cheap electricity can not be furnished by abundant water power, still the method is of interest because it flourishes profitably in Norway and Sweden, and also owing to the fact that it represents the pioneer effort to achieve the fixation of atmospheric nitrogen by simulating nature's thunderstorms. The electric discharges of the air are duplicated in principle by the man-made arc, and in this way the associated molecules of oxygen and nitrogen in the air are brought together chemically. Prior to this action the molecules of oxygen and the molecules of nitrogen are neighbors, much as a mixture of different size shot. The intense heat of the electric arc inflames the two gases and from the union thus effected is born nitric oxide, a colorless gas.

As the temperature of the nitric oxide falls the gas combines readily with free oxygen and the result is a brown gas, technically termed nitrogen peroxide. Then follows the corrosive climax when the nitrogen peroxide is transformed into weak nitric acid. This is done by leading the gas into granite towers filled with fragmented quartz, and as the gas rises through this broken material it is met by falling water, imitating nature's rain. The water absorbs the gas and the fluid is thus converted into dilute nitric acid. Concentration is subsequently effected by evaporation.

The history of the arc process, which dates back commercially less than 15 years, is full of many ingenious efforts to overcome difficulties and to reduce the cost of production, but at best only partial success has been attained. This is evidenced by the fact that of the total heat developed by the electric arc not more than 33 per cent is utilized throughout the entire process. In Norway, where a horsepower year costs but $1.96 for electric energy at the lowest figure and ranges from that up to substantially $3, it is practicable to employ the electric arc in the fixation of atmospheric nitrogen, and in both Norway and Sweden

the Birkeland-Eyde process has been widely and profitably adopted. But even so, only 3 per cent of the heat of the arc is actually utilized in bringing about in the furnace the chemical combination between the molecules of oxygen and of nitrogen, and of the rest of that heat it has been possible to put but 30 per cent to useful work; this represents the equivalent of a current wastage of 67 per cent.

COMPARATIVE RESULTS.

Besides the Birkeland-Eyde process, perfected by Scandinavians, there is the Schoenherr system, developed by Dr. Otto Schoenherr, of Germany, and both of these methods have been utilized commercially in Norway; and, finally, there is a third arc process, which was invented by the Pauling brothers, of Austria. Judged by their respective outputs of nitric acid per hour for a given consumption of current, the Schoenherr process leads, with 75 grams of acid per kilowatt-hour; then follows the Birkeland-Eyde system, with 70 grams; and next the Pauling method, with 60 grams. The latter, however, has one characteristic feature which is distinctive; that is, the effective way in which it makes it possible to obtain stronger nitric acid from the concentrators.

To Americans, the Pauling brothers' invention is of interest because it has been tried out here within the past two years at an experimental plant in the South. Electric energy was furnished by the falling waters of a river, and the cost of that power was comparatively moderate, but a great deal higher than the price of such current in Norway, the country where the arc process flourishes. After some months, activities at this plant ceased and, under existing conditions, it is doubtful whether the factory could be called a national asset.

To-day, in the United States, it is not possible to obtain energy from a hydroelectric plant at a price anywhere near the Scandinavian figures. What may be done in the future is purely speculative and will depend upon the economical development of our vast, potential water-power sites. It has been estimated by experts of the Department of Commerce that these are capable of producing economically quite 25,000,000 horsepower, with greater possibilities if means of impounding the waters be adopted. At the present time probably not more than 6,500,000 horsepower, developed by hydroelectric plants, is in use. At Niagara Falls, for instance, the cost of a horsepower generated throughout one year ranges from $12 to $20, and a fair average price is in the neighborhood of $17, at least on the American side of the river. Plainly, current at such a price can not be employed profitably in the fixation of atmospheric nitrogen by means of the arc process. This brings us to the two remaining systems whereby the electric current is helping Germany to solve her nitrogen problem.

THE CYANAMIDE PROCESS.

The Haber method need not be dwelt upon because it is controlled by the Badische Anilin-und Soda-Fabrik and is not at our disposal. But the cyanamide process, now operating so effectively in Germany, is available to us. An American concern is actually producing 64,000 tons yearly of cyanamide on the Canadian side of Niagara Falls. They established themselves in Ontario simply because they could not get electric current at a satisfactory figure on the New York side of the Falls. In 1915 imports from Ontario of calcium cyanamide and lime nitrogen amounted to 33,936 tons, while during 1916 the imports of the same materials reached a total of 60,379 tons, showing our increasing dependence upon these nitrogenous products both for fertilizer and as a source of ammonia for nitric acid.

The cyanamide process can rightly claim a very marked economic advantage over the arc process, because of its much lower consumption of electric energy. To put this in the words of one of the Government's foremost experts, Dr. Thomas H. Norton:

"At present one kilowatt-hour yields 17 grams of nitrogen in the form of nitric acid by the union of atmospheric nitrogen and oxygen under the most favorable technical conditions; it yields 70 grams in the form of calcium cyanamide from nitrogen, coal, and lime."

That is to say, the cyanamide process is more than 400 per cent cheaper than its earlier rivals of the electric arc. But this is not the whole story. Normally nitric acid is the form of fixed nitrogen for which there is the least commercial demand, and in that form it is difficult, if not dangerous, to transport to any considerable distance from the point of production. Ammonia and cyanamide, on the other hand, supply the majority of the requirements either of manufacture or of agriculture; and a distinctive characteristic of calcium cyanamide is the ease and comparative cheapness with which it can be converted at the places of consumption into either ammonia or nitric acid, as occasion demands.

Now, let us sketch briefly the manner in which calcium cyanamide was discovered, and then outline its present method of manufacture. It is a matter of common knowledge that calcium carbide is the product of lime and coal fused in the electric furnace. It is from calcium carbide, when saturated with water, that we get acetylene gas. The Boer War curtailed gold and silver mining in South Africa, and in doing so cut down the demand for cyanides, previously used there in large quantities in the extraction of precious metals from low-grade ores. In an effort to find a cheaper basic material from which to manufacture cyanide Prof. Adolph Frank and Dr. N. Caro, two Germans, discovered that calcium carbide would answer the purpose admirably.

They promptly realized that their ultimate product was not cyanide, however, but a substance which they appropriately termed calcium cyanamide—a new material; and it was not long after that ere it was learned that calcium cyanamide, rich in nitrogen, made an excellent plant food. Then began the development of an industry bent principally upon the fixation of atmospheric nitrogen in this form for the purpose of providing an artificial fertilizer. At the same time, additional investigations disclosed how readily calcium cyanamide could be transformed into nitric acid or into the intermediate product, ammonia. By heating calcium cyanamide with steam ammonia is given off, and the ammonia, when oxidized by a platinum catalyzer, is converted into nitric acid.

At Niagara Falls, where a company producing cyanamide is located, coal and lime are placed in an electric furnace, and by means of that high heat these raw materials are fused and thus converted into calcium carbide at a comparatively moderate expenditure of current. The calcium carbide, when cooled sufficiently, is ground up, and in that form presents a greater exposed surface for the absorption of nitrogen. Contact with nitrogen is not, however, effected by drawing upon the unmodified atmosphere. It is necessary to have pure or undiluted nitrogen for the fixation process. In order to separate the nitrogen from the oxygen, as they are associated in the air, powerful compressors are employed to liquefy the air. Inasmuch as the oxygen is heavier than the nitrogen, the latter, like steam, rises and passes off from the fluid, and by means of fractional distillation the two gases are separated.

LIME NITROGEN.

With a supply of pure nitrogen in a gaseous form, obtained in this fashion, the next thing is to bring the pulverized carbide and the nitrogen together. This is done by associating them in electric ovens, not furnaces; and when the heat is at the right height the pulverized carbide absorbs the nitrogen greedily and holds it. The stuff that comes from the ovens is in the shape of black hard cakes, and these, when analyzed, show 22 per cent of nitrogen. In the trade this is called lime nitrogen, and to prepare it for agricultural purposes this material is ground fine, partly hydrated to insure the decomposition of the 1 per cent of unnitrified carbide, and then oiled to render it dustless. When so treated the cyanamide is packed in sacks and is ready to be mixed as an ingredient in artificial fertilizers.

In substance this is what the German calcium cyanamide plants were doing before the outbreak of the war to help along the farmers, and since then those original plants and others that have been created are producing 600,000 tons of the fixed air nitrogen, now serving to provide powder and explosives in the first place and fertilizer for the farm lands when possible. The experience of Germany in peace and in war is of profound significance to America. Our principal source of nitrogen is, as Germany's was, Chilean saltpeter. As has been said, during the past 12 months we imported from Chile in the neighborhood of a million and a half short tons of niter, and certainly 60 per cent of this has been used for the manufacture of explosives, much of which has been shipped abroad. That leaves 600,000 tons to meet normal domestic consumption. If our traffic with South America be interfered with by a foe, we could not look confidently to Chile to supply us with sodium nitrate.

To-day nearly 20 per cent of the saltpeter imported is diverted to agriculture, and we can not afford to deny our fields this modest allowance of necessary plant food. Indeed, we have commonly neglected to give our acres anything like the measure of fertilizers that we should, and we are therefore far behind the more progressive of the countries of western Europe in this particular. To just what extent we lag is indicated by the following table, which is a fair statement of the case up to the present war, although the figures officially cover the period from 1903 to 1912:

Average yield per acre.

Country.	Wheat.	Oats.	Barley.	Potatoes.
	Bushels.	*Bushels.*	*Bushels.*	*Bushels.*
United States	14.1	29.6	25.3	91.2
Germany	30.1	51.9	36.3	194.4
Great Britain	31.7	44.3	34.7	202.8

How much fixed nitrogen we shall need to meet existing conditions it is not easy to determine, but it can not be denied that there must be a constant production of it to keep the fighting forces equal to their work and to enable the farmer to get what he should from his acres. It is a known fact that even the far-seeing Germans found themselves away off in their original estimates of the nitric acid, etc., that they would want, and it is equally certain that the war on several occasions came practically to a standstill on both sides because of lack of munitions. In order to prevent this, and also to obviate interfering with our chemical industries by commandeering the by-products of our coke ovens, Congress appropriated $20,000,000 for a Government air-nitrogen plant. But this is only a beginning; it could not supply the equivalent of more than one-third of the amount of nitrogen which we have been obtaining of late years annually from Chile in the form of saltpeter.

German farmers heretofore have found it to their advantage to use artificial fertilizers, because for every dollar spent in plant food of this sort they have secured $2 more of grain above the yield obtainable without this stimulant to growth. This explains in large part why both the German and the British husbandmen have uniformly surpassed our native farmers in making their acres fruitful. Why, then, does not the American farmer do likewise? Simply because his imported fertilizers cost him much more than they do his foreign competitors, and only native farmers who are experienced in the use of fertilizers, who know what kind to buy and how to use them to best advantage can make a profit at the present prices of these plant foods. On crops that yield higher acreage returns than cereals—for instance, cotton, which brings from $20 to $60 an acre instead of the $10 to $25 obtained with cereals—the case is somewhat different. One hundred per cent profit from the fertilizer investment is a rule on cotton, and even 200 per cent is common with the more skillful farmers, even at present prices.

PROFITS DUE TO FERTILIZERS.

Plainly, then, this question of an abundance of nitrogen garnered from the air by electrical processes is one of the utmost economic importance, and has a wider and more far-reaching significance than the mere provision against a military emergency. Our fertilizer bill runs annually now at substantially $175,000,000, and this is applied in the following proportions: More than one-third to cotton; a third to truck crops, tobacco, fruit, and sugar cane; while nearly a third goes on cereal crops, principally in the Atlantic Coast States.

Under normal conditions Germany, with an area less than that of the State of Texas, uses about a third more nitrogen than we do. If we used nitrogen at the same rate as the German husbandmen we should consume, instead of $88,000,000 worth of this plant food, seven times as much annually, or more than $600,000,000 worth. But before we can do this economically the price of fixed nitrogen must be reduced to somewhere in the neighborhood of 60 per cent of the present cost. This can be done by recourse to the process on which Germany depends most; that is, the calcium cyanamide method. If we applied nitrogen upon the German scale to our soil, equivalent to about 10,000,000 tons of Chilean saltpeter yearly, the value of our crops would be increased easily $1,000,000,000, leaving a net profit, on a basis of 60 per cent of the present cost for this fertilizer, of $700,000,000.

Austro-Hungary, Canada, France, Germany, Great Britain, Italy, Japan, Norway, Sweden, and Switzerland all have their own factories for the fixation of atmospheric nitrogen, and why should not we? It is simply a matter of utilizing intelligently our available water-power resources. Next, it is essential that factories for this purpose be located where we have within easy reach plenty of lime, coal, and phosphate rock, for phosphate is likewise necessary to the soil. We have just such ideal combinations of physical advantages in several parts of the United States, and the present international crisis and the high cost of living make it evident that we can not afford much longer to postpone the establishment of numerous factories of this sort and

thus make ourselves absolutely independent of Chile's deposits of nitrate of soda. Surely it is worth our while in this way to draw nearly $1,000,000,000 worth of value annually from the air. We can do it and we should do it.

BUREAU OF WAR-RISK INSURANCE.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 2133) to amend an act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, and for other purposes, which were, on page 1, to strike out lines 8 to 13, inclusive, and lines 1 to 5, inclusive, on page 2; on page 2, line 20, after "shippers," to strike out the comma; and on page 5, line 6, after "eyes," to insert "or any two thereof."

Mr. SIMMONS. The amendments made by the House are minor ones, and to which there is no objection. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

PUNISHMENT OF ESPIONAGE—CONFERENCE REPORT.

The VICE PRESIDENT. Morning business is closed.

Mr. OVERMAN. Mr. President, I had expected to call up for consideration the conference report on what is known as the espionage bill, but certain Senators have asked that the matter go over to-day. I therefore give notice that I shall ask the Senate to proceed with the consideration of the conference report at the close of the morning business to-morrow.

AMENDMENT OF INTERSTATE COMMERCE ACT.

Mr. NEWLANDS. I move that the Senate proceed to the consideration of Senate bill 2356, being the unfinished business.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

PARTISANSHIP AND PATRIOTISM IN CONDUCT OF WAR.

Mr. LEWIS. Mr. President, I rise to submit an observation to the Senate and to ask the attention of the eminent Senator from Ohio, the junior Senator from that State [Mr. HARDING]. I am moved to this by a paper just now placed in my hands—the Ohio papers, of Columbus, Ohio, of May 31.

Mr. President, a few days ago the eminent junior Senator from Ohio moralized with very interesting effect upon what he thought, or what he charged to be, a partisan attitude that I had taken in a speech made by me at Manchester, N. H. This speech was made in a contest known as an election for Representative in Congress for that district. The able Senator at that time seemed very much disturbed because, as he contended, my speech indicated an element of partisanship, or, to use the words of the Senator, "that at a time when we are teaching the world democracy, we might pause to teach our democracy a little less partisanship."

I did not know then to what purpose my eminent friend arose; I did not know what particularly was his purpose, whether it was to visit upon me deserved castigation or present himself as a model of conduct. I could not tell, as his effort came to a termination so quickly. I was left uninformed; it may be to my great advantage, sir, that it came to sudden halt; but in view of the theory advanced by the able Senator, and his attitude of heart exposed of how we should avoid anything that partook of partisanship at this particularly patriotic hour, I desire to call the eminent Senator's attention to his speech made in the city of Columbus, Ohio, and his utterances on Memorial Day. I tender these from his friendly organ, the Ohio State Journal. I ask the Senate to note the occasion and the expressions. I first refer the distinguished Senator to the luncheon tendered him by the ladies—of course, we who know him can readily understand that wherever he would be, there could not be failure of tribute from the ladies, and at that luncheon——

Mr. HARDING. Mr. President——

The VICE PRESIDENT. Does the Senator from Illinois yield to the Senator from Ohio?

Mr. LEWIS. I will yield to the Senator just as soon as I make an expression.

Mr. HARDING. Merely in the interest of accuracy of statement, I want the Senator to understand that there was no such thing.

Mr. LEWIS. Does the Senator mean to say when he says "there was no such thing," that there were no ladies or no luncheon? [Laughter.]

Mr. HARDING. That there was no luncheon.

Mr. LEWIS. Mr. President, the technical distinction of the Senator I may have to adopt. It appears that it was a reception tendered him, and I regret that the conditions were such at the reception that there was no form of refreshment that could be termed luncheon. I am led to the conclusion that there was another kind, which we might term delicately "beverage." I refer now to what I wish to allude to, the Ohio State Journal headline:

Liberty bond idea is hit by HARDING—Senator brands campaign "hysterical and unseemly"—Gives views on suffrage—Scouts sentiment that United States is fighting German rulers and not the people.

The article proceeds, quoting the Senator, saying:

Senator WARREN G. HARDING, at a reception yesterday afternoon at the Hotel Deshler, given in his honor by women of the Just Government League of Columbus and primarily designed to draw from him his opinion on State and National woman suffrage, took occasion to dwell critically on some phases of the war situation.

The liberty bond compaign he terms "hysterical and unseemly" and calculated to give America's enemies the impression that only by such intensive measures could she raise the sinews of war.

He scouted the popular sentiment that the United States is fighting the head of the German Empire, not the people, and spoke of the "fascinating devotion of German citizens to their Government."

Mr. President, this was on Memorial Day. The eminent Senator had gone forth at the request of his people, I assume, in view of the statements in the paper which has just been handed to me—to appeal to his people to return again to that reverential hour when they could pay tribute to those sacrificing souls who in patriotism had poured out their blood for this Nation. Yet when the eminent Senator is called to a gathering in his honor by the ladies where he might express himself upon the all-pervading question of suffrage, he finds it agreeable to convert the occasion into a criticism of the methods of the Democratic Secretary of the Treasury, who at that time, let it be remembered, was just from the West and going toward the East on a policy of campaign inaugurated with the object of stimulating the purchase of these bonds. These bonds, it will be recalled, were securities tendered to our country in turn for the money of the citizens that we might have this money for defraying the expenses of our national defense, to pay for supplies, and to sustain our soldiers.

Notwithstanding this was the patriotic object of the visit of the Secretary of the Treasury, the learned and eminent Senator from Ohio, the leader of the Republican Party in Ohio, who has long since characterized the town of Marion, whence he comes, with his eminence, and now the State with his reputation—the distinguished Senator from Marion, the distinguished and eminent representative of the Republican Party here in the Senate, finds it agreeable to convert the Memorial Day occasion into an opportunity where he may condemn, in his official position the methods adopted by the officials of his Government for the sale of these bonds for the needs of his country. There upon that solemn occasion and before the world he characterizes the efforts of the women of the land, before whom he was then being honored, to sell these bonds as "unseemly," and the effort on the part of the Secretary of the Treasury as "hysterical," and places his seal of condemnation upon these efforts and thus denounces them as unworthy.

Mr. President, it must be very clear to the eminent Senator that had this been a Republican Secretary of the Treasury no such condemnation would have come from his lips. It was only the method of the Democratic Secretary of the Treasury that could be so characterized by the Senator with satisfaction to himself. Surely it must appear to the eminent Senator that when he characterizes these methods as being unworthy, this condemnation is calculated to paralyze the results, to defeat the purposes, to make impossible the realization. It could only cause the people of his own State to deplore the methods adopted to sell the bonds and, far from rewarding these efforts with success, it would impel all to withdraw their patronage.

Therefore, sir, upon Memorial Day my eminent friend, who was so sensitive and tender in respect to the speech I made at Manchester in an election contest, characterizing it as having too much of partisanship, finds it agreeable on Memorial Day, at a luncheon by sacrificing women, to tender his renowned presence and his official voice in condemnation of the Democratic Secretary of the Treasury, and to place his barrier against the advance of the sale of these bonds; and no doubt, by these influences of voice and position, did much to bring about that which I read now from the Columbus, Ohio, Evening Dispatch, headed:

Columbus is more than million shy in its bond sale—Five million dollars is goal set with only 15 more days left—HARDING is criticized—"Better to have hysteria now than following failure of loan," says Kelley.

Then the article says:

Columbus is almost a million and a half dollars behind in its quota of subscriptions to the liberty-bond loan. But 15 days remain in which to raise the full amount, $5,000,000.

Secretary J. A. Kelley, of the local liberty-bond committee, announced on Thursday that total subscriptions to the loan amount to only $3,843,500 to date. * * *

"The showing is most unsatisfactory to the committee," said Mr. Kelley, and renewed efforts must be put forth. * * *

The loan committee was surprised and not a little displeased with the utterance of Senator WARREN G. HARDING, characterizing the liberty-bond campaign as "hysteria."

"A statement of this kind coming from a United States Senator, of all persons, at a time like this, is, to say the least, in bad grace," said Secretary Kelley Thursday.

"Senator HARDING evidently does not realize what a tremendous task it is to raise $2,000,000,000. If he holds thorough organization and wide publicity to be 'hysteria,' we are tempted to think that he has not had much experience in selling bonds. * * *

"If he thinks the campaign is hysterical, it is better to have hysteria now than to have it brought about by failure of the bond issue on the 15th of June."

Mr. President, the eminent Senator from Ohio had his heart greatly moved, his nature greatly disturbed, and his sense of standards very much destroyed because I had made a speech in Manchester, in an ordinary political contest, because, as he contended, it was tinged with too much partisanship; unconscious, as he must have been, that as he was to follow me at Manchester, whatever good I might do, or whatever harm, would naturally be wholly neutralized by the effect of his oration which was to follow me in one of his usually unparalleled and perfect performances upon such occasions. [Laughter.] But I do submit to the eminent Senator whether he feels that upon the solemn occasion of Memorial Day, when an assemblage of Democrats and Republicans must have honored him, when the great patriotic soul of Ohio must have contributed its tribute to his presence, he should have chosen such occasion for making an assault upon the methods adopted by the Democratic Secretary of the Treasury to sell these bonds, and thus, as is certified by one of his own fellow citizens, so discourage the sale by characterizing the methods as hysterical and unseemly?

What other method would the eminent Senator substitute? What other method did the eminent Senator offer? What particular policy would he now suggest to take its place, and what benefit would the eminent Senator say could come from a speech delivered on Memorial Day, addressed specifically, acutely, and adroitly from such an eminent source against the Democratic Secretary of the Treasury for that he was a Democrat seeking to make a success of the affairs of his Government?

May I remind my eminent friend, so sensitive over partisanship, that utterances less in their effect than these given vent by him, from persons of lesser position, are to-day being answered for by processes citing them toward the jails on the ground of seditious speech or sentiments disloyal?

Mr. President, I know the Senator is in nowise seditious. I know he is in nowise disloyal; and while he could not forego upon this occasion the deft political allusion that we, the Democratic administration, had refused to let Theodore Roosevelt take a volunteer troop to Europe, and by that in his utterances in Ohio upon that day appeal to our political adversaries known as the Progressives, that they may feel kindly toward him in espousing their great leader, or to that other element known as the volunteers who might have been inclined to the volunteer system—while sir, my eminent friend could not decline to insert that delicate scimitar thrust, so adroitly delivered and so accurately placed, in the heart of the Democracy on that particular occasion, from which no doubt it bled almost to its death [laughter]—I am sure he will recognize that it was not essential in order to accomplish this purpose that he should have likewise placed his barriers of obstruction against the sale of bonds and put such a discouragement upon the people of his own State that they were compelled to complain of the partisan attitude of my eminent friend upon a matter that should have called for his most abounding patriotism and spontaneous cooperation.

Mr. President, it may be, sir, that much of that we might excuse and find it a mere ebullition of speech or burst of temperament or the yielding to the magnetism of the situation by my eminent friend. He was surrounded by this bevy of beauty and those tantalizing influences of beauteous women. This is ever disconcerting. He may by this have been upset and delirious. The lesson we can draw from that is that hereafter his personal pulchritude and manly beauty should avoid those surroundings that no doubt often threaten him and often tempt him to disaster. [Laughter.] But I must say to the eminent Senator that if this were all and this effect that he produced unintentional, as he is a loyal citizen, a patriotic Senator, and an able statesman—all of this I am glad to certify, notwithstanding the eminent Senator felt that it was his duty to sit in false judgment upon me and tender here in the Senate his criticism of some utterance of mine—I do not complain. I recognize that the eminent statesman of Marion shall hereafter be known as the Mentor from Marion. Yet sir, I must say to the eminent Senator that as harmful as were these utterances against his country's efforts, all made upon this sacred day, Memorial Day, when we would have imagined that every impulse would have been to solace wounds, to draw together the spirit of patriotism, to mollify past hatreds, and in every wise to harmonize discordances, I ask my eminent friend if he does not think another utterance of his upon that occasion was more calculated to do injury far beyond his measure?

He is reported in both papers to have said that he scouts the charge or the assertion by the President of the United States that we are fighting the Kaiser and not the German people. The eminent Senator tells the Ohio people that it is the German people we are fighting, not the Kaiser. In Ohio, Mr. President, where there is such a large population of German people, and to whom we have sent out the message through our President that our warfare is against the Kaiser, against the despotic military tyranny of Prussia, and not against the German people, hoping that we might have the German people of Ohio, the German people of Illinois, the German people of all the West, of all America, recognize that it was not against them that we were fighting—for as against them we had no issue, for as against them we have no offense, seeking to bring them toward us, have them cooperate with us, feel kindly to our motives, join us in our undertakings—does not the Senator from Ohio feel that upon Memorial Day, upon an occasion where I know it was to his heart's original purpose to summon all his fellow citizens in one great cause to the support of his country; that it was rather a regrettable bit of partisanship that he indulged in innuendo merely that he might strike at the Democratic President, who was the author of the expression, and from which source it went to this country, sealed by his official voice?

The Senator fell into a deplorable undertaking when he invited the German people in Ohio—the German people in the West—to assume that the President of the United States was really fighting them; that America was fighting them; that it was not true that it was only fighting the Kaiser. Did he not unconsciously invite all the Germans then to awake to a new conviction which was that we had leveled war against them? That it was not their Kaiser that we were fighting, but it was the German people that we were fighting. That it was the German people's duty to resent it and to strike back. Will not my eminent friend feel that merely because he sought to condemn an utterance of the President of the United States, either to show its fallacy or disclose some impropriety, he summoned the German people to awake to the fact that it was his certificate, his testimony, as a United States Senator, that the United States was fighting the German people? Did not the Senator summon these German people by his potent voice to retaliate, to resent, and where they had been heretofore composed in the feeling that we had regarded them friendly and still were their friends, not fighting them, my eminent friend, the distinguished leader of the Republican Party from Ohio, that he might achieve his object at that time of a sly, alert, and hidden thrust at the President of the United States, led these German people of Ohio to the first conclusion they ever had that our war was against the German people—the German people of Germany, the German people of America, the people of Germany, the people of German descent everywhere? That these it was we had struck against. Does not the Senator feel that he brought all the other German people in the United States who are relatives of the German people of Germany to feel that the war was against them, and that therefore their duty was to fight the United States? And in what way could they resent our fight more quickly than to refuse to subscribe for these bonds with their money, which my eminent friend, to gratify a partisan sensation that suddenly stole upon him, said was being sold or attempted to be sold through methods he characterized as unseemly and hysterical? Contemplate the result he has brought already upon his own State, upon his own country.

Surely my friend must recognize that when he compares the speech I made at Manchester in an election contest, which so wounded him because of a tinge of partisanship, with this utterance which he made on Memorial Day in Columbus, or when he measures the great effect that must have followed his utterances from the great eminence he occupies and the influence he exerts, and then makes comparison to that which I have said, surely his bosom reflects the expression of young Hamlet to his impeached mother:

Look here, upon this picture, and on this.

I say to my able friend, for whom we all have great respect, that hereafter whenever the spirit moves him to administer to me a dose of patriotic physic I trust that he will pause and reflect upon the Scriptural injunction:

Physician, heal thyself.

Mr. HARDING. Mr. President, the Senator from Illinois does me such vast credit and courtesy that, I think, perhaps it would be prudent on my part to allow the RECORD to stand

without making any retort. If he had really desired to illumine the RECORD and place in its columns a bit of wholesome American patriotism, I commend to him the memorial address which I delivered in the capital city of Ohio on that day, copies of which are readily available.

Out on the Sandusky plains, Mr. President, from whence I come, we are committed to a policy which makes it impossible for me to reply in detail regarding the interview with the delegation of ladies, because we are committed to the practice of never saying anything about an interview with ladies, collectively or individually, and I can neither boast nor reveal. I dislike to discuss a rather vagrant remark relating to the bond issue, which remark became a public utterance, though it was not so intended; but, since it has been brought to the floor of the Senate, I have no hesitancy whatever in reaffirming it in my official capacity.

I have believed the liberty-bond campaign hysterical and unseemly. I have not wished to hinder it. I have only wished that I might make the conditions which would have made this seemingly hysterical campaign unnecessary, and I am hesitant to say on the floor of the Senate why it is so.

Mr. President, in normal times I am a partisan. In times like these I am hesitant to express my partisan impressions. If I were of a mind to do so, I could stand upon this floor to-day with criticisms well founded and substantiated by facts which would prove a sensation to the hundred millions of Americans who are on the anxious seat to-day; and, since the question has been raised and some justification seems necessary, I say to you that America, with an ability to buy seventeen billions of bonds on any day, is reluctant to buy because of its lack of confidence in the present administration. If some one could stand here and give requisite assurance to the United States of America concerning the plans for financing this war, in the way of taxation, there would not be five days of delay in providing for an oversubscription of the liberty-bond issue.

I have not meant to be ugly in my reference to the hysteria. There is very eminent authority for the use of that word over a little unseemly excitement. It is only about three years since the distinguished Executive of this country, noting the anxiety of the American people about some preparedness for defense, when the world was aflame with war, pronounced the desire for American preparedness "hysteria." It would have been well if we had taken the situation more seriously then.

But I am more particularly interested in the later criticism of the Senator from Illinois. * * * In a patriotic address, breathing the devotion to country which I feel, as does every other Member of this body, with a prayer for reconsecration of American citizenship, I did say this, and I choose to repeat it here: That it is not up to the United States to force democracy onto the world; that it were better that by our own proof that democracy can defend itself we make the ideal example which shall enlist the devotion of the world to the cause of democracy. That is the substance of my thought.

Mr. President and Senators, now that the question has arisen, I beg to detain the Senate for a moment on that particular subject. It is only a few days since the distinguished Senator from Illinois, official apologist on this floor at needed times for the administration, made the statement in this body that it was very unfortunate that the President did not have his manuscript with him at the time of making a very notable speech. In that speech the President said that we were not in war because of any particular grievance of our own. In another speech the President has said, and beautifully said, that we want to make the world safe for democracy. I subscribe to that sentiment, Senators; but I want to say to you men who are responsible for government in these trying times that you can not justify this war and you can not unify the American people in the defense of the American Nation except on the justifiable ground of defending and preserving American national rights. If I were in any place other than the Senate Chamber of the United States, where one might speak with a little more freedom than the courtesies of this body require to be observed, I would say that much of the sentiment uttered concerning our part in the war is balderdash.

I delight in the collateral issues involved. I believe in democracy just as much as any man on this floor. I can find my heart thrilled with the thought of this great Nation taking its part in the maintenance of human liberties and the safety of the liberty of the world, and I am not a little impressed by the part of this great Republic in making sure the guaranties of the best civilization the world has ever known. But nations called upon to fight must have a more defensible reason than even these ideals; and the one defensible reason for the United States of America, back of which every Senator can array himself and back of which every American citizen can and will array himself, no matter whence he comes, is the defense of American national rights, the safety of American lives, the maintenance of American honor, and our freedom to participate in the commerce of the seas. You can go to the people with that declaration and find an unfailing response in every American heart.

I have heard talk about the dethronement of the houses of Hohenzollern and Hapsburg until I have wearied of it, not because I have any sympathy with either house. I could welcome the establishment of democracy in Germany as readily as any man on this floor; but I call your attention, Senators, to the fact that there is no likelihood of its establishment there; and if it be treason to say it I repeat it now—I can not wish for anything more loyal from the citizenship of the United States of America than a devotion to the Stars and Stripes, like the German citizen shows to the Fatherland; and there is not an ounce of pro-German sympathy in my body. I should like American devotion similar to that which the people of Germany show to the Government of that country; and I say it now, and I will repeat it again and again, it is not any business of the American people what class of government any nation on earth may have so long as that government respects the requirements of international law and the tenets of civilization. I think it ill becomes the United States of America to measure a man's patriotic devotion in accordance with his determination that the houses of Hohenzollern and Hapsburg shall be destroyed.

Mr. President, I yield to no man on this floor in a devotion and a willingness to serve these United States of America. I wish I might do my part to establish a little more popular confidence in the Government in trying times like these. I will not revert to the question raised in the discussion on the placing in the RECORD of the speech of the Senator from Illinois, in New Hampshire. I performed that simple duty here, because I felt that it was unfair to say to any American citizen that his party preference must be put aside now if he chooses between the Kaiser and the President of the United States.

Why, Mr. President, if it were a question of patriotism rising above partisanship in New Hampshire, in a district which has been Republican, with one exception, since the organization of the party, it would have been the seemly thing for the party now in power to have omitted any nomination whatever and joined the party which is dominant in that district in sending a Republican to the lower House of Congress, whom the administration could have relied upon to support it in these trying times; but, of course, it is not the usual thing that those of us who are in political contests should stop to consider the proprieties in the beginning of the contest. We preserve parties for the days which are to come.

I know all about this whole proposition of standing by the President. I am frank about it. As long ago as 1900, I think, when those of our party were seeking to reelect to the Presidency that lovable and kindly leader from my own State, the late William McKinley, it was a very ordinary thing for us and a very helpful thing to cry, "Stand by the President." That is a very well-established practice on both sides of the political fence, always adjusted according to the party which is in power.

I remember in 1914, when I was a candidate for election to the Senate, a very distinguished American came to my State, representing the party then in power, and he said in my own city, which delighted me very much, "HARDING is a very decent chap personally, but you can not afford to send him to Washington in trying times like these; you want somebody who is going to stand by the President." Well, the voters of my State did not agree with him, and I came to Washington, and while I was standing by the President with my recorded votes in this body, the Hon. William Jennings Bryan, who issued that advice to the people of Ohio, was resigning because the administration would not conduct its affairs with Imperial Germany according to his notion of things; and thus it goes.

I do not want to bring the partisan question up, but I do want to renew, Mr. President, this serious and solemn statement at this time, that there are those in this Chamber who are day after day putting aside their partisan prejudices because they have the information, which might be expressed in calls for investigation, which would disturb the confidence of the American people of this day in the conduct of the war.

Mr. REED. Mr. President——

The PRESIDING OFFICER (Mr. HUSTING in the chair). Does the Senator from Ohio yield to the Senator from Missouri?

Mr. HARDING. Certainly; I yield.

Mr. REED. Mr. President, I regard a statement of that kind as much more damaging than any possible fact could be if laid bare in the Senate and to the country. The assertion that there is some condition so bad that if it were known it would startle

the American people is worse than a charge of a specific fact. I challenge the Senator to give us the facts.

Mr. LEWIS. Does not the Senator from Missouri feel that the Senator from Ohio should now, if he has any facts which if divulged could create a sensation or which if wrong should be corrected—do not the Senator from Missouri and the Senator from Ohio feel that this is the time now to give them, that the wrong, if any, should be corrected and that it might not longer be permitted?

Mr. HARDING. Mr. President, I could answer both the distinguished Senators if we only had the record of a secret session of this body some two weeks ago in which they were the most notable participants in the debate, but I will not be drawn into such a statement. It is not an extraordinary thing that in this country, emerging from the rutted course of peace into involvement in a great war, there should be conditions creating the greatest anxiety. I am not even pretending to say, Mr. President, that it is the fault of a party, because I am conscious of the fact that the party to which I belong was responsible only five years ago, and I will not be led by the promptings of interruptions and heckling in this body to make a sensational statement inclined to disturb American tranquillity. I much rather contribute to the popular confidence in this hour of need.

When I made reference to the hysteria on the bond question, I was not seeking to deter the sale of the liberty bonds, which I hope and expect to see successfully disposed of. There is not any question about that. If it were not unseemly, I would go into the details, but, Mr. President, I am unable to reach a conclusion that one who criticizes the reluctance or the tardiness or the hesitancy to subscribe to such an enormous bond issue is in any way expressing disloyalty or lack of devotion to our common country. Perhaps we are contributing more to that lack of confidence by employing the time of the Senate with this unseemly talk.

I have allowed myself to trespass on the time of the Senate, Mr. President, far beyond my expectation. I will only say in conclusion that by my ballots, officially recorded on this floor, and by my utterances on Memorial Day or on the stump or on the rostrum or elsewhere, I will measure my devotion to this country and support of the present administration with any man on either side of the Chamber, and I will be very glad to do so.

Mr. President, in the good humor of the moment I have enjoyed the sallies on the question of partisanship, and I have not sought to make a personal criticism in reply. I do say, however, that it is vastly more important that the Members of this body do the things which shall clinch anew the confidence of the American people in their Government and in its ability to undertake to carry to a successful end the mighty task that we have assumed.

I tell you, Mr. President, the American people have not yet come to realize one-half the seriousness and solemnity of the great task upon which we have entered, and I wish the Senate might turn from this unseemly discussion, in which I am an offender as well as others, and commit ourselves to doing those things which will, on the one hand, awaken the country and recommit it to the cause and at the same time contribute the material and practical means to bring about our successful participation in the war and bring it to a fortunate conclusion.

Mr. LEWIS. Mr. President, I very clearly recognize from the speech made by the able Senator from Ohio that many of the utterances which I introduced in a lighter spirit, certainly with no venom, were the birth of opportunity of oratory and occasion, and possibly not of deliberation; yet, Mr. President, I desire in a word—and I shall say but a few words at this time—to direct the attention of the eminent Senator from Ohio to this thought, of how we can bring America to the realization of this great conflict.

Mr. President, there is no man in this body more profoundly impressed with the truth that this Nation has not waked to the consciousness that we are at war than am I. I have just returned from the great Central West, the throbbing heart of which is my home, Chicago. That city is more representative, I presume to say, of all the nationalities engaged in this conflict than any other locality in the United States; but, sir, might I not submit to the Senator, how shall we invite our countrymen into union and accord in this controversy unless they shall behold eminent examples, such as the distinguished Senator and his colleagues offering them, sir, the spectacle of a united support and refraining from captious criticism even for the mere satisfaction of oratorical display or partisan advantage. I am a victim to the allurements of speech; I have no doubt we all are; but the hour is one depicted by the Senator to a degree further than he measured. It is now the time when men should restrain the inclination that doubtless the impulse leads them to, that they either serve partisan profit or the gratification of personal pride, and cease uttering expressions that are so inclined in their effect as were those of the eminent Senator, to work the very result that I am sure he could not have intended, yet is apparent.

Now, sir, says the Senator, this country is surrounded with situations and conditions, one of which, says he, if disclosed, would produce a great sensation. The eminent junior Senator from Missouri [Mr. REED] invites by interrogation the consideration of the distinguished Senator to the fact that the very observation itself creates sensation. I rejoin, and I ask the eminent Senator from Ohio, Does he not realize that on tomorrow this same vice that seems to possess him, by which here he would likewise give utterance to cabalistic sentences, Delphic oracular, and undefined accusation, and unexplained equally demoralizing and distracting as those of which I complained this morning as made by him in Ohio—does he not, I ask, realize that on the morrow the public press of this country, sending from the eminent Republican leader, prospective nominee for the Presidency, an eminent gentleman who was once presented for that high office, chairman of the great Republican national convention, that he asserted in his eminent place that there were circumstances surrounding this Government which, if unfolded, would create such a sensation as to stir this body and our countrymen into fury or dismay, and that because of the apprehension of some of these things its confidence has been so shaken that mankind will not pause to consider their patriotic duty in connection with the purchase of liberty bonds, so weakening are the influences of these real and imaginary revelations? The eminent Senator must recognize on the morrow that 100,000 intelligent citizens of this land, each construing for himself what must be meant by the assertion, will carry within their hearts the belief that some great impending slander, either to party or scandal to country, is imminent, and that it is at any time likely to explode like a present lava-sealed volcano.

Mr. HARDING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Illinois yield to the Senator from Ohio?

Mr. LEWIS. Gladly.

Mr. HARDING. I insist that the Senator from Illinois shall not place in my remarks any implication of scandal.

Mr. LEWIS. Mr. President, if the Senator did not mean that, I am gratified, of course, myself to accept his denial; but he will realize that if Senators could have drawn from his observation that such was the lurking meaning of his accusation, how will the millions that will only read it, not having an opportunity to have heard it and observed the situation, construe it? Therefore, Mr. President, I then invite the able Senator's consideration to the effect of this utterance, so undefined and so unexplained. Mark it; ponder upon it.

I now go to the final conclusion of the eminent Senator's reply. I say to the Senator that it may be, aye, sir, so far as I am concerned it is sufficient cause for war that the imperial and military dynasty of Prussia killed my fellow countrymen without reason, murdered innocent American citizens upon the high seas, shattered their property, sent the spars of their sinking ships floating upon every vagrant water of the world, and then struck the flag of our Nation down in mourning for the death of the innocents before the world. To me that is enough, and the fact that the President of the United States finds it agreeable before the earth to add to this cause other reasons for this war can not move me from the unanimity of soul, from the determination of action to fight it, fight it from first to last by every method to command, by every agency and undertaking that can be called to its service, and here at home to summon every sinew in America. But, sir, how can we fight this war to a successful end except by a united people? First, sir, there must be the united people at home. In our country there are to-day the representatives of all the nations who are our allies. If the eminent Senator from Ohio will reflect, he will realize that if his viewpoint, as expressed by him, could be adopted and asserted officially and proclaimed as the doctrine of the United States now, the predicament of the soldiers of America would be perilous. If it should go forth, as the eminent Senator would have it, that we are not to make war for the freedom and democracy of France, what could we hope from France when our soldiers land on her soil? If France shall be brought to recognize that our soldiers are not to aid her in her cause, but are on her soil for the sole and selfish object of America's profit alone, what would be the fate of our noble boys in France? What hand in France would be extended to them? What heart in France would be offered to them? What cooperation in France could they obtain?

What shall be said, sir, of Italy, if it shall be given out that we are not to cooperate to obtain freedom and justice along the divid-

ing line of the irridenta country, where our soldiers must make their conflict? They would be received in Italy by a people who would recognize them as coming to maintain their selfish conflict, and not the conflict of democracy or the conflict of liberty for the world or for our allies. They would be rejected or neglected. They would be to Italy as intruders. We would be charged then, first, with bad faith; second, with a violation of our obligations. Then, sir, what attitude would our soldiers stand in in Europe? Unwelcome and resented, miles from their homes, thousands of miles from their hearthstones, far from mothers and friends, without a hand to be lifted for them, without a voice of favor, because we had deserted the cause of those for whom it had been supposed we had planted our flag there and swam there to maintain its creed and promise—justice and liberty. Surely the Senator must realize that, however satisfactory to him and to me, let it be said, the cause he would ascribe it is too late for that to be asserted now only as the only purpose of America against imperialism and military conquest.

There is Russia. Shall it be said at this time that we are not to give such aid to the emancipation of shattered Russia? Shall we give no assurance of effort to implant liberty in Russia? Shall we inform Russia by any course of action here that we have deserted her and abandoned our pledge of democracy to oppressed men? Sir, at that announcement Russia under any government would seek quick peace with Germany upon the theory that she had been deserted by her greatest democratic ally—America—and had nothing further to hope for. What, then would be our inheritance? Why, sir, merely to gratify the cry and theory of my eminent friend we would have hurled upon the troops of our allies millions of soldiers—certainly hundreds and hundreds of thousands—who were before held in check by the cooperation of Russia. All this would follow from the loss of her faith in us as cooperating in the cause of democracy for her, for her liberty, for her justice——

Mr. HARDING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Illinois yield to the Senator from Ohio?

Mr. LEWIS. Certainly.

Mr. HARDING. Will the Senator allow me to illumine his remarks with a couple of questions at this point?

Mr. LEWIS. Yes.

Mr. HARDING. Reading from the inaugural address of the President on March 5 last I take this paragraph:

> That the community of interest and of power upon which peace must henceforth depend imposes upon each nation the duty of seeing to it that all influences proceeding from its own citizens meant to encourage or assist revolution in other States should be sternly and effectually suppressed and prevented.

And then, from the CONGRESSIONAL RECORD of the Sixty-third Congress, I choose to make this quotation from the same eminent authority, from an address delivered in the city of Indianapolis:

> Now, there is one thing I have got a great enthusiasm about—I might also say a reckless enthusiasm—and that is human liberty. The governor has just now spoken about watchful waiting in Mexico. I want to say a word about Mexico, or not so much about Mexico as about our attitude toward Mexico. I hold it as a fundamental principle, and so do you, that every people has the right to determine its own form of government; and until this recent revolution in Mexico, until the end of the Diaz reign, 80 per cent of the people of Mexico never had a "look in" in determining who should be their governor or what their government should be. Now, I am for the 80 per cent. It is none of my business, and it is none of your business, how long they take in determining it. It is none of my business and it is none of yours how they go about the business. The country is theirs. The Government is theirs. The liberty, if they can get it, and God speed them in getting it, is theirs. And so far as my influence goes while I am President nobody shall interfere with them.

Mr. LEWIS. Mr. President, how aptly confirming my views is that speech quoted of the President. How grateful I must be to the eminent Senator for so valuable a contribution at such a timely moment, just as I was proclaiming the theory of this country to aid these oppressed lands in obtaining democracy. The eminent Senator reads the speech of the President in which he refers to 80 per cent of the people of Mexico as never having had a chance or, as he called it, "a look in." The people had been so oppressed and such forms of tyranny had been set upon them, their homes denied them, their lands confiscated, their natural privileges wrested from them, liberty refused them that the President's assertion then, as had been all his efforts, was to establish in Mexico a form of self-government, a democracy; but when it was established it was to be left to them as to the manner and method of its conduct. The eminent Senator fails to distinguish between establishing a government of democracy on the one hand and the governing of it after it is established on the other.

No one in this body disputes at all that the right of a government to govern itself in its own internal affairs is supreme. The eminent Senator must make clear to himself the distinction between a country like ours aiding another land to democracy and interfering with its form of government after it has obtained self-government. Sir, if the eminent Senator be accurate in the standard he lays down, that no government should aid another in obtaining free government, then the interposition of France in behalf of America in 1775 was an intrusion and America's sacrifice in behalf of freedom for Cuba was an insolence; and, sir, the eminent Senator from Kentucky [Mr. JAMES] brings to my mind, by suggestion, that these splendid services to which I have just alluded were rendered under President McKinley.

The eminent Senator from Ohio has alluded to his friend, the eminent statesman, President McKinley. I had the honor to serve in public duty at the time he was President, and around me are gentlemen, now Senators, who were then with me Members of the other House. How well I recall how our eminent opponents rightfully condemned us—the Democrats—and indeed at the ballot box pilloried us wherever there was a suggestion of opposition merely for partisan welfare. "Stand by the President," was the cry; "do not interfere with the man whose hand is on the throttle." This was everywhere and at all times; and yet in the end, if the Senator from Ohio will but reflect on his last utterance, he will realize that we have through him told the world that there are eminent men here in this body—this the great cooperating agency of the President—who do not give their adhesion to the policy of the aid of America to these countries struggling for liberty, and do not approve the President's slogan of democracy for oppressed mankind. We will let them understand that there is not that cooperation with the President in his splendid design. We will by that utterance cause them to feel that, when the war is over and we are victorious, we will gather ourselves unto ourselves selfishly and alone and desert them, without regard to their cooperation with us in producing the victory, all because the eminent leaders of one of the great parties on this floor is opposed to this Government going further than its profit or its selfish objects for its own welfare would permit. For that reason I regard the position of my eminent friend as dangerous, if it should ever obtain, and destructive to the splendid result to which we are moving, if the President of the United States were ever to adopt it.

Sir, the President of the United States has laid down the doctrine that in this conflict, apart from the grievances from which we have suffered, we shall go forward to the liberties of the oppressed nations who are involved in the struggle. In the language of Holy Scriptures, our position is "Our hands lie to the plow; we shall not look back."

Mr. President, there is Ireland. Shall we leave the impression upon that great body of Irish citizens in the United States, who in every conflict of America have tendered their children to death for the cause of their American home, that we are to desert them, that we are not to lend our aid to secure for them the liberty for which they cry, the self-government for which they have lived and died? It is impossible to betray or desert them. Shall we say to Poland, whose children in thousands and thousands are with us in America, that likewise we shall be deaf to their cry and turn a dead heart and ear to their wail for liberty and free government for Poland? Surely, sir, we could not. How could we be so base? The eminent Senator, learned scholar and able man as he is, must recognize that in millions the children of these lands are here with us in America. Their sons are our sons. If ever we desert the theory with which we started in this conflict, they in America will drop away from us. We would lose their sympathy and forfeit their support of the United States. Here in America the native born of native-born Americans would be alone—severed from one-third of all our population—our home citizenship would be surrounded with hurts and hatreds of millions of our adopted citizens. These millions now fight at home and abroad for us because they have been made our allies in this conflict of liberty and democracy.

Mr. President, I have nothing further, except to intimate to my eminent friend that I am sure he would realize that now such a creed as his could never be advanced to the safety of America. The Pole, the Italian, the Irishman, the Slav, the German people, let us believe, all who are Americans, are with us. The sons of the North, the gallant soldier of the South, all are with us—all for us, and in this conflict we can say to the world, "There they are; behold them in their loyalty, in their greatness;" and, paraphrasing Sir Philip of Faulconbridge in King John, we can exclaim:

> Now, these, our children, all to the mother, are come home again. Come the three corners of the world in arms, and we shall shock them.
> Nought shall make us rue. If America to itself, do rest but true.

Mr. HARDING. Mr. President, I have no desire to continue the discussion, and I have no wish to spoil the pleasing eloquence of the Senator from Illinois, but if the Senate will bear with me I want to add one sentence at the close.

If our part in the war has been so beautifully and ideally inspired, it occurs to me that we might well have entered on behalf of democracy when the territory of France was invaded in 1914. We might well have given our voice to the liberty of the world when Serbia was invaded in the same year. We might even have given utterance to the nobility of American soul and the loftiness of our intent when Belgium was violated without cause and without notice.

Mr. REED. Mr. President, two reasons impel me to take the floor for a moment.

First, when the distinguished Senator from Ohio [Mr. HARDING] occupied the attention of the Senate, he, in substance and effect, made this statement:

I could, if I would, recite facts that would startle the 100,000,000 American people.

He subsequently repeated substantially the same assertion, whereupon I challenged the Senator to make a specific statement of the matter referred to in his charge. That constitutes my first reason for rising. The Senator did not make the specific statement.

My second reason is that the Senator's excuse for not making the specific statement was couched essentially in this language:

If I had the remarks of the Senator from Illinois and the Senator from Missouri made in executive session, I could startle the country.

The two statements, taken together, amount to a declaration to the country that in the executive sessions of the Senate the Senator from Illinois [Mr. LEWIS] and the Senator from Missouri, my poor self, made charges against the Government which furnished the foundation for the Senator's charge just made, and that if he could but disclose the matter to which we thus gave origin he could startle the country.

Mr. President, I hold that it is not only the privilege but it is the duty of every Member of Congress, though he be as great as the Senator from Ohio or as humble as myself, always to speak in this forum his honest judgment and vote as his conscience and judgment may dictate. I have claimed the right to exercise and express my judgment and to criticize any measure proposed. That right I concede to others. But the advancement of arguments against a pending bill is a very different thing from an assault upon the motives of the author. And now, since I have taken the floor, there has been handed to me the exact language employed by the Senator from Ohio, in the form of a transcript of his remarks, and I want at this time to put them into the RECORD again, because I do not want to misquote the Senator. I now quote:

I do not want to bring the partisan question up, but I do want to renew, Mr. President, this serious and solemn statement at this time, that there are those in this Chamber who are day after day putting aside their partisan prejudices because they have the information, which might be expressed in calls for investigation, which would disturb the confidence of the American people of this day in the conduct of the war.

Mr. President, the Senator can not shift the responsibility of that statement to any utterance made by the Senator from Illinois or by myself in executive session. I affirm it to be the fact that neither the Senator from Illinois nor myself in executive session in any manner or degree charged that there was misconduct in the conduct of the war, or charged that there was anything in the conduct of the war calling for investigation. No such charge was made, and every Senator now here who was then present will bear witness to the truth of that which I say. Manifestly, the attempt to shift the responsibility occurred to the Senator after he had been challenged to make good his statement. He did make the statement that I have read, and he did twice reiterate it; and it amounts to nothing more or less than the assertion that there is some matter connected with the conduct of this war of so unholy or so infamous a nature that its disclosure would startle the 100,000,000 loyal citizens of this Republic.

Mr. HARDING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Ohio?

Mr. REED. I demand here and now either that the Senator from Ohio—to whom I am about to yield for an interruption—shall state those facts, or that he shall retract his statement.

Mr. HARDING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri now yield to the Senator from Ohio?

Mr. REED. I now yield for the purpose indicated.

Mr. HARDING. I am not so greatly concerned by the demand of the Senator from Missouri as I am for a becoming understanding of my statement.

I do not understand, Mr. President—and I want the Senator from Missouri to note this statement—that a condition of unpreparedness, for example, involves anything unholy, and I will not allow the Senator from Missouri or the Senator from Illinois, on neither of whom have I sought to place the responsibility, to so construe my statement. I only alluded to their criticisms in secret session as an indication of the lack of satisfaction, if you please, as to the trend of developing events in these difficult times.

I have in mind, so far as I am myself concerned, matters relating to the unpreparedness of this country for the part we have assumed, and I do not construe that to be anything dishonorable nor anything of a scandalous nature. If I had had that in mind, I should not have even made the allusion. I do repeat the previous statement, that I have too much regard for the present state of public mind to be drawn into a statement of specific details.

Mr. REED. Mr. President, I am glad to find that the Senator from Ohio is modifying his remarks, because I am not concerned here to-day in any advantage to be gained in a verbal fencing match. This is too serious a matter. It was started by the Senator from Illinois undoubtedly with the desire to inject a little satirical humor into a situation created by the Senator from Ohio, and it was carried through by the Senator from Illinois very much in that spirit, although he said some matter of quite serious substance.

What I want to eternally stamp out now is the insinuation that may to-morrow constitute the headlines of many newspapers, that there is some hidden and mysterious iniquity connected with the conduct of the war so infamous and vile that its exposure would startle the American people. Now the Senator tells us that what he referred to in fact was our state of unpreparedness. If that is all the Senator had in mind, I question whether he can state our condition of unpreparedness more vigorously than it has been announced a thousand times by a thousand mouths and ten thousand times by as many pens.

There is nothing in our condition of unpreparedness that will startle the American people more than they have already been startled. There is nothing new in that; and so I beg the gentlemen of the press, when they send the Senator's charge to the country, to say that the distinguished Senator from Ohio meant nothing more than that "we are not as well prepared as we ought to be." If the statement goes forth in that form it will do no harm.

But I can not understand the utterance to have been made in that light. The statement now is that what the Senator meant was that we were not sufficiently prepared. If that fact were emphasized to the American people the tendency would be to make them buy more bonds and buy still more bonds in order that we might become prepared. That, indeed, has been the cry the Secretary of the Treasury has been setting up as he goes over the country, and if he is subject to any criticism it has seemed to me it has been because he has, perhaps, rather overdrawn the case. But the Senator's statement, now, I want to read in full, because I now have it. I think, as I read it, that it will be clear that instead of the Senator's meaning to refer to our state of unpreparedness, he meant something entirely different; or if he did not, he was singularly unfortunate in his method of expression.

I read:

We are committed to the practice of never saying anything about an interview with ladies, collectively or individually, and I can neither boast nor reveal. I dislike to discuss a rather vagrant remark relating to the bond issue, which remark became a public utterance, though it was not so intended; but since it has been brought to the floor of the Senate I have no hesitancy whatever in reaffirming it in my official capacity.

I have believed the liberty-bond campaign hysterical and unseemly. I have not wished to hinder it. I have only wished that I might make the conditions which would have made this seemingly hysterical campaign unnecessary, and I am hesitant to say on the floor of the Senate why it is so.

Of course, if the Senator had succeeded in his ambition he would have been in a position to have made "the conditions which would have made this seemingly hysterical campaign unnecessary," and I have no doubt the country would have been safe, the world at peace, the war over, and democracy triumphant around the earth.

But I read on, in order to give you the context:

Mr. President, in normal times I am a partisan. In times like these I am hesitant to express my partisan impressions. If I were of a mind to do so, I could stand upon this floor to-day with criticisms well founded and substantiated by facts which would prove a sensation to the hundred millions of Americans who are on the anxious seat to-day; and since the question has been raised, and some justification seems necessary, I say to you that America, with an ability to buy seventeen billions of bonds on any day, is reluctant to buy because of its lack of confidence in the present administration. If some one could stand here and give requisite assurance to the United States of America concerning the plans for financing this war in the way of

taxation, there would not be five days of delay in providing for an over-subscription of the liberty-bond issue.

I have not meant to be ugly in my reference to the hysteria. There is very eminent authority for the use of that word over a little unseemly excitement—

And so forth.

Mr. President, the plain purport of that language is that if the people knew what was going on, if there was an investigation to bring the facts before the people, the confidence of the American people would be utterly shocked, and that to-day, even without such disclosure, the people have so little confidence in the administration that while they can pay out easily $17,000,000,000 to buy that many bonds in five days, they hesitate about buying two billions. And now the whole statement, since the Senator has expounded its meaning, dwindles down to this, "that we are not as well prepared as we ought to be," and that if that fact were known it would scare the people of the United States into not buying any bonds! Such is the conclusion the Senator draws. Whereas the more the people were frightened over a state of unpreparedness the more bonds they would buy. But now that the Senator has withdrawn the real sting of his remark, I have no further interest in it.

The Senator also states that he did not undertake to quote the Senator from Illinois or myself as authority for his startling charges. That question is therefore satisfactorily disposed of.

I only want to refer to one further remark. He said, in substance:

I could wish that the devotion of the American people to their Government were as great as that of the German people to their Fatherland.

By which the Senator must have meant that the people of the United States do not love this Government of freedom as well as the people of Germany love their Government of autocracy; that we do not so much esteem our liberty as they do love their chains; that this great country, over the destiny of which the Senator was ambitious to preside as Chief Executive, is composed of people so base that they do not love the blood-stained banner of America as well as the German loves the scepter of his master. That is the charge the Senator brings against the American people.

Mr. HARDING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Ohio?

Mr. REED. I do.

Mr. HARDING. Since the remarks of the Senator from Missouri are directed to me in the main, I hope he will do me the credit and justice to omit any statement of my ambition to serve this country in any more distinguished capacity than that which I now occupy, because I should like it said, since this question has been raised, that I think too well of my country to wish one of such incapacity in so exalted a position.

Mr. REED. Mr. President, the humility of the Senator doth most become him. [Laughter.]

I want to say just a word about the patriotism of the American people. It does not require encomium or eulogy, and yet I think it proper to say just this much—that in the population of 104,000,000 people there is probably not as much disloyalty as there is in a single ward of a single European city. There is not in the United States of America to-day any disloyalty among her native-born people save as you may find it manifested by the occasional individual who belongs in fact to the criminal class. For just as you will in the best of communities find here and there a degenerate wretch who makes war on society by theft or murder so you will discover a very few among many millions whose criminal instincts manifest themselves by acts of disloyalty. In both cases the culprits belong distinctly to the criminal class. Neither have we in this country among our foreign-born population any considerable element of disloyalty. I undertake to make the statement that in all the history of the world there never has been furnished such a picture of loyalty as when more than 10,000,000 men stepped forward on the day before yesterday and wrote their names upon a list which cowards would have regarded as a death list, but which these brave Americans looked upon as a roll of honor. Without hesitation, without disturbance, without murmur, from Atlantic to Pacific, from Canada to Mexico, the response was universal. Men bore away their registration cards and exhibited them with pride to their families and to their friends.

Patriotism—is it lacking here? I objected to the draft because I thought the draft was unnecessary; yet I say now the response to the draft without complaint is perhaps a higher evidence of patriotic love of country than would have been a general answer to a volunteer call. I now declare that our men would have come without any mandate of the law. Coming as they have, so willingly, so generously, I do not propose to sit silent when their love of country is compared unfavorably with that of the unfortunate subjects of despots, many of whom entered the army to escape the prison or the scaffold. I do not propose to hear without protest the patriotism of my countrymen impugned, while the love of the German and Austrian for Kaiser and Emperor is exalted. I tell you, sirs, that when once the iron arms of those imperial rulers have grown a bit more enfeebled, when the people of the central powers shall have suffered a little more, when hunger shall gnaw at their vitals and courage shall be born of despair, revolution will show its fearful countenance and the torch of treason will blaze in the hands of a maddened populace. But if fortune should go against us, if our allies should be swept back and their lines broken, if their ships should be sunk upon the sea, if the worst should come to the worst, if Germany, a thousand times stronger than she is, were to stand upon our shores, with her mailed millions, I tell the Senator from Ohio that the people of this country, though starving, would yet stand in the trenches and die for this land of freedom. I tell the Senator from Ohio there would be such an exhibition of love of country and of devotion to flag as the world had never seen. I tell him that above the Stars and Stripes there would look down the shades of Washington, of Jackson, of Lincoln, of all our immortal dead, and that around the standard would be grouped a people willing to fight and die for human liberty. A people who do not answer to a master's lash and who prefer death to a master's chains. When any man says on the floor of the United States Senate that the American people would do well to take a lesson in patriotism from the serfs who are driven to the battle line by their Teutonic masters, I say he slanders the country he represents.

AMENDMENT OF INTERSTATE-COMMERCE ACT.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

Mr. NEWLANDS. Mr. President, I ask that the report on the pending bill, together with the bill, without reading, be printed in the RECORD in the ordinary type.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The bill and the report referred to are as follows:

"A bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

"*Be it enacted, etc.*, That on and after the approval of this act any person or persons who shall, during the war with Germany, knowingly and willfully, by physical force, threats, or intimidation, obstruct or retard, or aid in obstructing or retarding, the orderly conduct or movement in the United States of interstate or foreign commerce, or the orderly make-up or movement or disposition of any train, or the movement or disposition of any locomotive, car, or other vehicle on any railroad in the United States engaged in interstate or foreign commerce shall be deemed guilty of a misdemeanor, and for every such offense shall be punishable by a fine of not exceeding $100, or by imprisonment for not exceeding six months, or by both such fine and imprisonment; and the President of the United States is hereby authorized, whenever in his judgment the public interest requires, to employ the armed forces of the United States to prevent any such obstruction or retardation of the passage of the mail, or of the orderly conduct or movement of interstate or foreign commerce in any part of the United States, or of any train, locomotive, car, or other vehicle upon any railroad in the United States engaged in interstate or foreign commerce.

"SEC. 2. That during the continuance of the war in which the United States is now engaged the President is authorized, whenever in his judgment such action is necessary to the public security and defense, to direct that certain kinds of traffic or particular shipments, as may be determined by him, shall have preference or priority in transportation by any common carriers by railroad or water, under such arrangements, rules, and regulations as he may prescribe. He may give these directions at and for such times as he may determine, and may modify, change, suspend, or annul them, and for any such purpose he is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose. Officials of the United States, when so designated, shall receive no compensation for their services rendered hereunder. Persons not in the employ of the United States so designated shall receive such compensation as the President may fix. Suitable offices may be rented and all necessary expenses, including compensation of persons so designated, shall be paid as directed by the President out of funds which may have been or may be provided to meet expenditures for the national security and defense. All such common carriers are hereby directed and required to establish

forthwith, and to maintain continuously in the city of Washington, during the period of the war, an agency by a committee of railroad officers or otherwise fully empowered by such carriers to receive on behalf of all the carriers notice and service of such orders and directions, and to arrange for the prompt compliance therewith by such carriers. And it shall be the duty of any and all the officers, agents, or employees of such carriers by railroad or water to obey strictly and conform promptly to such orders, and failure knowingly and willfully to comply therewith, or to do or perform whatever is necessary to the prompt execution of such order, shall render such officers, agents, or employees guilty of a misdemeanor, and any such officer, agent, or employee shall, upon conviction, be fined not more than $5,000, or imprisoned not more than one year, or both, in the discretion of the court. The President is hereby authorized, whenever in his judgment it becomes necessary in order to expedite transportation and to do justice between carriers, to enter into agreements with two or more carriers looking to a proper division of earnings for a time to be specified and upon kinds of traffic to be prescribed. For the transportation of persons or property in carrying out the orders and directions of the President the lawfully established tariffs shall apply unless otherwise fixed by law; for the transportation of troops in carrying out the orders and directions of the President reasonable rates shall be fixed by the Interstate Commerce Commission; and if the transportation be for the Government of the United States, it shall be paid for currently or monthly by the Secretary of the Treasury out of any funds not otherwise appropriated: *Provided*, That if by reason of giving preference or priority in transportation under an order or direction authorized hereunder, or by reason of disarrangement of traffic caused by giving such preference or priority, any carrier shall suffer injury or damage, the Interstate Commerce Commission shall, upon application by the carrier and upon notice to the Attorney General of the United States, and after due hearing, determine the amount thereof, which amount shall be paid by the Secretary of the Treasury out of any funds in his hands not otherwise appropriated: *Provided further*, That no application for any such damage or injury shall be presented to the commission after six months from the expiration of the order of preference or priority. In making such determination the commission shall have due regard for the terms of any acts of land grant or contract existing between any such carrier and the United States, and for the purpose of any such inquiry and determination the Interstate Commerce Commission is hereby vested with all the powers which it now has or may be authorized by law to exercise in investigating and ascertaining the justness and reasonableness of rates or charges. Any such findings of the commission shall be subject to review on the merits by a bill in equity, filed either by the Government or by the carrier in a court of competent jurisdiction, with right of appeal as in other equity cases. The final order or decree shall be certfied by the court to the Interstate Commerce Commission, which shall enter the same as its own order. Any carrier complying with any such order or direction herein authorized shall be exempt from any and all provisions in existing law imposing civil or criminal pains, penalties, obligations, or liabilities upon carriers on account of any such action."

[S. Rept. No. 48, 65th Cong., 1st sess.]

Mr. NEWLANDS, from the Committee on Interstate Commerce, submitted the following report:

"The Committee on Interstate Commerce, to which was referred the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes, having considered the same, report thereon with recommendation that it pass.

"The bill as reported consists of two sections, one forbidding the obstruction or retardation of the orderly movement of trains in interstate transportation, and the other giving the President power, whenever necessary for the public safety and defense, to direct that certain kinds of traffic or particular shipments shall have preference or priority in transportation under such rules as he may prescribe.

"It compels also the common carriers to maintain continuously at Washington an agency by a committee of railroad officers to receive, on behalf of the carriers, notice and service of the orders of the President, and compelling the carriers, under penalties, to obey such orders.

"Provision is also made for the fixing of reasonable rates by the Interstate Commerce Commission for the transportation of troops.

"The bill also provides for the determination by the Interstate Commerce Commission of any injury or damage caused by the preferential orders made by the President.

"The provisions regarding the priorities in transportation have been drawn upon the earnest suggestion of the President contained in a letter to the chairman of the Committee on Interstate Commerce.

"The necessity for such legislation is most clearly shown by Mr. Daniel Willard, chairman of the committee on transportation of the advisory commission of the Council of National Defense, in a letter to the chairman of your committee, which letter, together with the speech of Mr. Howard Elliott, and the article by Mr. W. M. Acworth, entitled 'English railways under war conditions,' in the Outlook of May 16, 1917, to which Mr. Willard refers, is made a part of this report."

"ADVISORY COMMISSION OF THE
"COUNCIL OF NATIONAL DEFENSE,
"*Washington.*

"Hon. FRANCIS G. NEWLANDS,
"*United States Senate, Washington, D. C.*

"MY DEAR SIR: Referring to our brief discussion the other day concerning the necessity for a priority commission to deal with transportation matters:

"I am not certain that I made the situation entirely clear, and for that reason I am writing this letter. While the railroads of the country, as shown by their monthly reports to the Interstate Commerce Commission, are handling a greater volume of business than was ever handled at any previous time, they are not able to handle all of the business offered. This is due to the abnormal conditions growing out of the European war and other matters related thereto; and inasmuch as there is more business to be handled than the railroads are able to handle, it becomes necessary in the public interest to decide what particular character of shipments shall be given priority of movement. This, I repeat, is necessary in the public interest; it is not at all necessary from the standpoint of the railroads.

"As you may perhaps know, there was held in this city on April 11 a conference of railroad executive officers, at which practically all of the important systems in the United States were represented, either directly or by proxy, and as a result of that conference an agreement was entered into by all of the carriers which resulted in the appointment of a committee of five railroad presidents, to which committee was given full authority over all transportation questions on all of the railroads in the United States, and the entire railroad mileage—approximately 262,000 miles—is to all intents and purposes at the present time being operated as a single system, directed by the executive committee sitting in this city.

"The situation so created is not unlike the one in England with regard to the railroads, except that in England at the beginning of the war the Government appointed a committee made up of railway officers to control the operation of the railroads and at the same time guaranteed that, during the continuation of the arrangement, the stockholders of the properties involved should receive the same rate of dividend that they had received for a certain specified length of time in the past. I do not recall now the exact period of time.

"In this country, in response to a request made by the Council of National Defense, the railroads voluntarily selected a committee for the purpose of accomplishing the same result as was brought about in England, but in this country it must be remembered that the action, although requested by the Government, was taken voluntarily by the railroads and without any guarantee whatever concerning future income.

"One of the most important functions of the executive committee sitting here in Washington is to procure prompt and adequate transportation of those commodities essential to the welfare and defense of the Nation, and although they have no authority under the law to give preferential treatment to shipments of one kind over another, it is so clearly in the public interest that certain matters should be given priority of movement that the committee has so far not hesitated to take action when it seemed necessary or desirable to do so. For instance, it has seemed desirable, if not necessary, that coal should be kept moving in such quantities as to provide not only for the requirements of the railroads, but also for the public-utility power plants, and for the various industries, particularly those engaged in making munitions for our allies, and providing material necessary for the construction of ships. It has also seemed desirable, if not necessary, that seeds, fertilizers, and agricultural implements needed during the planting season just closed should be moved promptly and in sufficient quantity, and I think generally all of the commodities above referred to have been moved as needed. As a result of this, however, certain other commodities have not been moved as promptly as desired, but so far, those shippers whose freight has not been moved for the reason above mentioned, have accepted the situation with very little protest after the facts were explained to them. As time goes on, however, and industrial activity becomes even

greater than it is at present, the amount of freight offered will be greater than it is at present, and there ought to be provided by law a small commission—I should say not less than three men or more than five—to consider and pass upon questions concerning priority of transportation.

"As chairman of the committee on transportation of the advisory commission, I brought this matter to the attention of the Council of National Defense a month or six weeks ago and endeavored to show the necessity for such a commission. I urged the formation of the committee at that time and I urge it now, because I think it is essential in the public interest. I may perhaps be permitted to repeat what I have already said, that it is not a matter in which the railroads are particularly interested. It is, however, a matter of vital interest to the public.

"I am taking the liberty of attaching hereto, for your information, thinking that you might not have seen it, copy of an address delivered by Mr. Howard Elliott a short time since before the Editorial Conference of Business Papers in this city. Mr. Elliott, as you may perhaps know, is a member of the committee of railroad executives sitting here in Washington. I am also inclosing a copy of the Outlook of May 16 which contains a paper by Mr. Acworth, of England, in which he explains rather clearly, I think, the English situation concerning the railroads. I believe you will find both of the papers above referred to interesting and enlightening, as they bear directly upon the particular subject in mind.

"If there is any further information that I can give you concerning this matter, I shall be glad to do so.

"Very truly, yours,

"D. WILLARD."

SPEECH OF HON. HOWARD ELLIOTT, MEMBER OF THE EXECUTIVE COMMITTEE OF THE COUNCIL OF NATIONAL DEFENSE.

(Before the Editorial Conference of Business Papers of the United States of America, at the New Willard Hotel, May 25, 1917.)

"Gentlemen, your chairman desires me to give you a very brief biography of myself. It was only yesterday morning that I was asked to take Mr. Harrison's place here.

"I have been in the transportation business 37 years on the 5th of next July—23 years with the Chicago, Burlington & Quincy Railroad, 10 years as president of the Northern Pacific Railroad, and practically 4 years as president of the New York, New Haven & Hartford Railroad, which position I laid down a short time ago, after trying to pilot that company through rather a stormy period, and I still retain an advisory connection with the company and am helping them to get out of their wilderness, and hope that they will.

"I have also been asked to serve, and am serving, as a member of what is known as the Railroad War Board, and I rather welcome this opportunity to meet a conference of this character and to tell you something of what we, in the transportation world, are trying to do.

"I notice that your program contains the words, which I presume are your platform, 'To promote more effective use of the business energies of the country by a closer cooperation of the business press with the Government.'

"That is a very good platform indeed. We in the railroad world would like to have you go further and to have the cooperation of the business press with the railroads of the United States, because without help from all kinds of people and all kinds of institutions it is going to be difficult to furnish that quantity of transportation during the war period that is essential for the winning of the war.

"COUNCIL OF NATIONAL DEFENSE ASKS RAILROADS TO ORGANIZE THEIR BUSINESS.

"This committee, of which I was one, grew into being in the following way: Some time early in April Secretary Lane introduced and had passed in the Council of National Defense a resolution as follows:

"*Resolved*, That Commissioner Willard be requested to call upon the railroads to so organize their business as to lead to the greatest expedition in the movement of freight.

"As a result of that resolution by the council the chief railway executives of the United States met in Washington on April 11, and we had a prolonged discussion of the situation. Every man knows his own difficulties, although he may at times magnify them. We of the railroads sometimes think our friends who patronize us magnify them too much. [Laughter.] But we realize, perhaps more than our patrons do, that the 250,000 miles of railroad in the United States, trying to serve a population of 100,000,000 people, had approached the point, even in a time of profound peace, when the amount of transportation that we could manufacture with our plant was not adequate at all times to the demands of the people. The causes for that we need not discuss here. They have been discussed pro and con for the last 25 years. It is the fact that interests us and that interests gentlemen like yourselves who are representing many kinds of business, and that is of vital interest to the Nation and to our friends the allies.

"Realizing that it was difficult for the railroads to carry the peak load at all times and to be in readiness to serve and to meet every demand, we were glad to have this call to come to Washington and confer and see what we could do.

"ACTION TAKEN BY RAILROADS.

"After conference and deliberation and after a very inspiring address from Secretary Lane, we passed this resolution, which is our platform:

"*Resolved*, That the railroads of the United States, acting through their chief executive officers here and now assembled, and stirred by a high sense of their opportunity to be of the greatest service to their country in the present national crisis, do hereby pledge themselves, with the Government of the United States, with the governments of the several States, and one with another, that during the present war they will coordinate their operations in a continental railway system, merging during such period all their merely individual and competitive activities in the effort to produce a maximum of national transportation efficiency. To this end they hereby agree to create an organization which shall have general authority to formulate in detail and from time to time a policy of operation of all or any of the railways, which policy, when and as announced by such temporary organizations, shall be accepted and earnestly made effective by the several managements of the individual railroad companies here represented.

"That platform has been subscribed to by practically all of the railroads of the United States, and in most cases indorsed and approved by the boards of directors. It is a patriotic move on the part of the railroads, their owners, their officers, and their employees, to do the very best they can with the plant at their disposal.

"In order to give effect to that platform a committee of some 27 was appointed, and from the committee of 27 a committee of 5, covered by this statement:

"That the railways agree to the direction of the executive committee of five in all matters to which its authority extends, as expressed in and that the general secretary of the American Railway Association be the resolution heretofore adopted, and to which we hereby subscribe, instructed to secure the execution by signature of all American railways.

"CREATION OF SUBORDINATE COMMITTEES TO COOPERATE WITH WAR DEPARTMENT.

"In addition to creating the main committee of five, consisting of Mr. Harrison, as chairman; Mr. Holden, of the Chicago, Burlington & Quincy; Mr. Kruttschnitt, of the Southern Pacific; Mr. Rea, of the Pennsylvania; and myself; subordinate committees reporting to us were created coexistent with the military departments of the Government, as follows: The Northeastern Department with headquarters at Boston, the Southeastern Department, the Central Department with headquarters at Chicago, the Southern Department with headquarters in Louisiana, the Western Department with headquarters at San Francisco, and the Eastern Department with headquarters in New York, so that there would be a piece of machinery to deal with each departmental commander of the Government. In addition to that there were special subcommittees appointed to take up the following general subjects:

"A commission on car service, composed of seven of the most experienced car men in the United States; a committee on military equipment standards, composed of the most experienced expert mechanical men in the country; a committee on military transportation accounting, composed of the most experienced accounting men we have; a committee on military passenger tariffs, composed of the most experienced passenger men; a committee on military freight tariffs, composed of the most experienced men familiar with the freight business; and, more recently, a committee on express, made up of the vice presidents of the various express companies.

"Then we arranged to appoint general agents at all of the military headquarters, permanently attached there, with no other duties than to work with the military officers, and also general agents at mobilizing points. There are some 56 points in all, with 112 men.

"WASHINGTON OFFICE.

"The Washington organization, with headquarters here, has in it 16 experienced railway officers, including the 5 executives, who are the head committee, and 11 others who are permanently here, 69 general employees, and 18 inspectors who travel about the country and bring in information.

"In addition to that, in order to do the very best we could to get close to the local situation at every place, and to meet, as fast as we could, the difficulties of each given situation under this commission on car service, which is the most important of the committees, some 23 subcommittees were formed at places all over the United States—Chicago, New York, Atlanta, San Francisco, Seattle, Memphis, New Orleans, and everywhere—so there would be a piece of machinery in each State and several in some of the States that could cooperate closely with the ship-

ping and traveling public as well as with the military authorities.

"Each one of these committees has as chairman an experienced officer of a railroad, and on his committee are representatives of all of the railroads at the point in question.

"MACHINERY NOW AT WORK.

"All of this machinery is now at work and is being rapidly coordinated, so that as little lost motion as possible is had after six weeks of work. It is a very expensive piece of machinery.

"COST TO THE RAILROADS.

"Our estimates are that, not counting the salaries of the officers, who are devoting a very large amount of their time to this national work and carrying on, as well as they may, their regular activities as railroad officers, that the American railways are going to contribute, dividing the expense pro rata, about $500,000 a year to this special work. And we are glad to do it. We are not stating that to ask for commendation, but merely to show you the extent to which we are trying to go in helping our Government and our allies in this very terrible crisis.

"Now, no doubt, you would like to know what we are really trying to do and how we give effect to the platform which I have read to you.

"RELATIONS WITH COUNCIL OF NATIONAL DEFENSE.

"We have a relation to the Council of National Defense because we received our appointment at the instance of Secretary Lane, and we work with the council in the closest possible way. In fact, I believe we are designated a cooperative committee. It is our hope and our belief that we can work in the closest possible way, because on our committee sits Mr. Willard, of the advisory council, who is a member of our committee ex officio, but without vote, who brings to us suggestions from the Council of National Defense and takes from us suggestions to them. We are working very closely together.

"RELATIONS WITH INTERSTATE COMMERCE COMMISSION.

"Then, we are trying to have, and I think we are succeeding in having, very close and satisfactory relations with the Interstate Commerce Commission, that great body that directs so many of the activities of the American railways, because on our board sits Mr. Edgar E. Clark, a member of the commission, without a vote, but whose counsel and whose experience are of tremendous value to us in our deliberations. Our ambition is to so coordinate and arrange this enormous piece of machinery, this 250,000 miles of railroad, so that we can make it of the highest service to the Nation at this time, which is a time so serious and so critical and which, my observation leads me to believe, is more serious and more critical than people realize who have not had the privilege of spending a few weeks in Washington, the city upon which the eyes of the world very properly now turn.

"ACTION OF RAILROADS VOLUNTARY.

"While we are doing all those things, and trying to make this great piece of machinery as effective as we can, I want to call your attention to the fact that our mandate and our commission has come to us through a voluntary act of the owners of these 250,000 miles of railroad, through their boards of directors, representing the owners, and that we are trustees for these enormous interests, and in trying to do our full duty to the Nation we must pay due regard also to the trust imposed upon us to handle these 250,000 miles of railroad with some regard to the interest of the million and a half security owners, and possibly 2,000,000 employees who, with their families, represent nearly one-sixth of the population of the United States. And we believe because of the cooperative spirit displayed by everyone with whom we have come in contact, that as we work along, one step after another, we can obtain a greater efficiency out of these railroads than has been obtained before; that we can do the things that the Government wants us to do; that we can do the things that the allies want us to do; and we can do the things that business wants us to do and still safeguard the general health of this great piece of machinery which must go on forever, after the war is over, to serve the public.

"FIRST ACTION OF COMMITTEE.

"One of the first things we did was to put out what we called our efficiency circular. I will not burden you with the details of it because you no doubt have seen it, but it was an earnest appeal to officers, to men, to the public, and to those who use the railroads, to help and cooperate in every way possible to make a greater use of the existing American railway plant. As I have just said, this plant is inadequate in some directions for reasons that need not here be discussed, and it is essential to make every car, every engine, every track, every freight house, and every appliance do a little more work, if we can possibly arrange it, and to do that we must have the highest cooperation between the railroad owner, the railway employee, and the railroad users.

"This circular was put out to try to stimulate that idea.

"WEEKLY REPORT TO COUNCIL OF NATIONAL DEFENSE.

"Then we make a report once a week to the National Council of Defense to show them what we have been doing or trying to do, so that they may be advised and may make suggestions to us. Our report of May 18 covers some 18 subjects, only a small part of the numerous subjects that our committee has considered, and we have been practically in continuous session here in Washington since April 23, trying to go home to our places of residence and to our railroad headquarters on Saturdays and Sundays to keep in touch with the detail of the properties that employ us.

"MOVEMENT OF COAL.

"But we have taken up many subjects. One of the first and most important was to try to help move a greater quantity of fuel, which must be moved if the manifold activities of the United States are to go on and we are to make the things that we need and that the allies need; and, as a corollary, to bring down the greatest quantity of iron ore from the upper lake ports, so that the factories can make the steel and iron. A great deal of work has been done upon that, and we are beginning to see the fruits of it.

"COMMITTEE OF RAILROAD EXPERTS TO RUSSIA.

"We have modified the so-called car-service rules, and we think there is a more fluid movement of such equipment as exists. We, at the suggestion of the council, obtained and turned over to the Government five trained railroad officers, who were commissioned to go to Russia to see what they could do to help the Trans-Siberian Railroad to move the freight piled up at Vladivostok toward the Russian front.

"NINE REGIMENTS OF RAILROAD MEN RAISED FOR FRANCE.

"We also at the request of the council, and partly at the request of the French delegation, are arranging to obtain about nine regiments of trained railway officers and trained railway employees to help the English and French people carry on their railroad activities principally in France, where, as you know, the man power is strained to the limit. We brought about, through Mr. Peabody, of Chicago, an experienced coal owner and dealer, and with the cooperation of our committee and of the lake carriers and the ore carriers, a pooling of coal, so that when it comes to the lower lake ports there will be a minimum amount of delay in putting the coal into the boats, releasing the cars promptly, and getting the boats forward promptly.

"I will not burden you with all of these details, but will just mention a few to show what we have tried to do. We have had numerous interviews—interviews with the French delegation, interviews with the English delegation, and interviews with Mr. Hoover—to try to get a better method of coordinating the movement of food products, and I want to say that all of those things are coming along.

"As is often the case with large movements, it seems at times as if the movement was very slow, but we really feel that we have made progress and that our work is beginning to tell. I know the spirit is there to make it tell.

"We have been called upon—and have gladly responded—by Members of the House and Members of the Senate, both individually and by committees, to tell them something of the situation and of the problems with which we are dealing and the difficulties that we meet in trying to solve our particular problem, which is really the problem of the whole country, because unless we can get this maximum efficiency out of the railroads you can readily see it will delay bringing to a conclusion the preparation for this war.

"MEETING WITH STATE RAILROAD COMMISSIONERS.

"There is another thing we have done which is of importance. We have had a meeting with a group of State railroad commissioners, and have explained our position to them and our desire to work in a cooperative spirit with them.

"CAR-SERVICE COMMITTEE.

"I can not emphasize too much the importance of this so-called car-service commission, because that is the working arm of our committee. You represent business, and you know from the daily press about the so-called car shortage; you know about the congestion, and so forth, and through the car-service commission we are trying to remove some of these defects. That commission makes a report to us once a week. They sit six days in the week and many evenings; they meet countless people with complaints, and they try to handle them as best they can. Their report for one week, for example, consists of 12 pages of closely written typewritten matter, on some 23 subjects. In addition they have had numerous interviews with our committee, so that we can try to work things out together.

"CAR SHORTAGE.

"Now, then, this so-called car shortage perhaps is a misnomer. It is not a misnomer in the sense that the interests that you represent, when they sometimes wish to ship something and there is no car in which to ship it, but it is a misnomer in that the failure to have the car there is due not so much to the nonexistence of a great number of cars as to the fact that the railroad system is somewhat overtaxed as a whole because of lack of terminals, lack of sidings, lack of modern appliances on some of the railroads, and lack of modern appliances by shippers and receivers of freight in some places, so that the maximum use of the car is not obtained. Those appliances are being added to more or less by the railroads all the time. They have not been added to to the extent to which they should have been in the last 5 or 10 years. Those of us who have been in the railroad business a long time have preached for years that the country, for its own interests, ought to permit us to spend at least a billion dollars a year in new additions to our plant. The company has not permitted us to spend a billion dollars, and our plant is not all that it should be. But with respect to the so-called car shortage, on May 1 there was, according to the record, a so-called shortage of 150,000 cars. In round numbers there are two and a half million cars in the United States. If, by a little better loading by the shipper, a little better unloading by the shipper, a little better movement by the railroad, and a little more alert work by every man in the railroads, from the president down to the water boy, each car was used a little better, it would not take very long to get that 150,000 cars out of the 2,500,000 cars. It is about three-quarters of 1 per cent.

"NEW EQUIPMENT LAST 18 MONTHS.

"The railroads, in spite of their difficulties about finance, have done a good deal in the last 18 months to try to add to their cars and engines. For example, there have been placed in service since November 1, 1916, 989 engines and 44,063 cars. There are now under order as of April 1, 2,209 engines and 104,917 cars. Those engines and those cars we hope will be received between now and the 1st of January. If so, since the 1st of November last and by the 1st of January next there will have been introduced 148,980 cars into the service, with an average capacity of over 50 tons, and 3,188 engines, with an average tractive power of 54,000 pounds, which is very much above the average of the engines of the United States. But in spite of all this, I feel, and our committee feels, and I think we must admit, that if the war goes on, as we fear it will, the total amount of transportation that can be manufactured under the existing conditions, when men are called to the colors or sent to France, or have to go into other forms of work, thus depleting somewhat the railroad service, will not be sufficient.

"SHORTAGE OF TRANSPORTATION.

"I am afraid there may be a shortage of transportation. If that time comes, then it is going to be necessary, in the interests of the Nation and in the interest of the allies, to use such transportation as there is for the essential things, as one of your speakers called it a few minutes ago, and it is going to be necessary for the public and for you, who represent the public, to be willing to give up the nonessentials.

"PREFERENTIAL MOVEMENTS.

"In other words, it is going to be a great deal more important for this country to move food, fuel, and iron and the essentials of life and manufacturing than it is to move what might be called the luxuries, the things that we can get along without in this terrible world crisis. We hope that we are going to be able to move it all, but I think it is only fair to point out to a body of gentlemen like this the facts and to ask your cordial support, and when the time comes when we must pick and choose that we have your cordial support in any effort we may make to move the essentials before the nonessentials.

"NECESSITY FOR PRIORITY COMMITTEE.

"That matter is so important that the Executive and the Congress have taken it up, and they have caused to be introduced in Congress, not at our suggestion, but of their own volition, because they see the difficulty, a bill which will empower some agency of the Government, under the direction of the President, to say what shall be given up and what must move. That bill has been favorably reported by the Senate, and I presume is now on its passage. It is essential to the welfare of the people and for the preservation of this great American railway system that some such measure be enacted because we have courageously started out to do these things that we have been asked to do by the council, and yet in doing them we must of necessity run across some Federal laws and some State laws, and sooner or later we will have to stop in our efforts to get this maximum efficiency unless as a war measure the Federal power says 'You must do this and you must do that' without being subjected to countless damage suits.

"REVISION OF PASSENGER SCHEDULES.

"As one step in that direction we have asked the so-called group chairmen to call their committees together at their various headquarters throughout the United States to go over most carefully the passenger schedules of the country. There is a duplication of passenger schedules in certain places. There is very luxurious passenger service in some places, and we would like to keep it up, but the country can get along without some of that if it becomes necessary. We are suggesting that there be some changes made in the passenger schedules, not with the idea of saving money, not with the idea of failing to serve the public, but simply to save man power, fuel, and motive power, all of which should be applied to the transportation of essentials.

"RAILROADS NATIONALIZED AS WAR MEASURE.

"You gentlemen are all business men, representing great business. I am going to ask you to—and I know you want to—help in any way you can. I am very glad I have tried to give you this brief outline of what we are trying to do, and it occurs to me that as you go back to your respective homes and write in your respective papers you can perhaps give the public a clearer idea of this great movement to nationalize the railroads of the country as a war measure; you can arouse the public to a realization of the difficulties that confront the Nation and that confront those of us in the railroad service who are trying to serve the Nation, and you can emphasize the importance of the highest speed in every kind of preparation, and particularly in this transportation matter. We have the same difficulties that other manufacturers have, because we are only manufacturers of transportation. That difficulty is to get all of our employees aroused to the seriousness of the situation. I think the railway employees are as patriotic as any in the country, but they are far removed from the scene of trouble, and they do not yet, as a whole, perhaps realize that every man, woman, and child in the United States must do the maximum amount of work to win this war.

"Gentlemen, you can help in that, because you touch many kinds of labor through your different papers, and you can encourage that idea; and you can also encourage the idea that if the railroads are to have their maximum efficiency they must have the help of every man outside of the railroads in handling equipment, and so forth, as well as the help of the men inside the railroads. You can help also, if it becomes necessary to bring about reductions in service, by the selection of the essential business as against the nonessential, to explain that that condition must be met with patience and with fortitude, and that if we are in this war to win, as we are, everyone must contribute something by getting along, perhaps, on a different basis of life from that to which he has been accustomed in the past 10 luxurious years.

"COOPERATION NEEDED.

"You can also help to increase the spirit of cooperation between the railroads and the State and national commissions and municipal governments, as a war measure, to relieve the railroads from the strict regulation that cripples their efficiency. Those will come up from time to time. They are being discussed here now before the Interstate Commerce Commission, with governors and others. I refer to measures which were thought to be wise when they were passed, but which, unconsciously, have had the effect of slowing down the operation of the railroads. If we have to pick and choose as to transportation, you can help by pointing out that unnecessary work, as a war measure, had better wait so that we can do the necessary work in order to win this war. I think there is a very large spirit of cooperation which has been made evident to our committee from many sources. We have had what I would term almost splendid cooperation from some, but that must be continued and it must increase if we are to accomplish what the country wants and what you want.

"Mr. Creel spoke about publicity. Most of the modern railway managers realize the importance of that, and their affairs during the past few years have been open books. Most of us have what we call a publicity agent; and we realize so much the importance of this at this time that we have called a meeting of all the publicity men in Washington to try to do the very things and sense the situation as explained by Mr. Creel, so that we can cooperate with the press throughout the country and with the agencies that are trying to win this war and to give the actual facts to the public, because we know or believe that when the public really understands the facts, when it gets down under its skin, then it probably will see the thing as it is and will start in and help.

"I firmly believe, in fact no one can have any other feeling, that we will win this war, and I think we will all agree that we will win it sooner and end this awful struggle that is almost ruining civilization sooner if everyone will realize the magnitude of the task and will turn in and mobilize and coordinate at once the marvelous man power, the money power, the business organization, the press, the manifold industries of this wonderful United States, and apply that mobilized power for the sole and only purpose of supporting our allies and maintaining the highest ideals of humanity and civilization. That is what we of the American railways are trying to do through the platform we adopted, and through the committee which has been appointed and charged with this very high duty. Thousands of officers and men in the railway service are working hard and unselfishly on these problems and giving the best that is in them to their solution. If you gentlemen will, as I know you will, spread abroad the doctrine of highest cooperation, as expressed by your last two speakers, there will be countless thousands of business men in every walk of life who will continue to do the work they have started out to do, and new recruits will be obtained who will turn in and help the Nation without any thought of self. This war may drag on longer than any of us think, and it will no doubt affect the lives of every one of us, of our children, and of our grandchildren.

"Mr. Chairman, I thank you very much for the privilege of addressing you."

—

ENGLISH RAILWAYS UNDER WAR CONDITIONS.

[By W. M. Acworth, special correspondence in the Outlook of May 16, 1917.]

["To the visitor in England at the outbreak of the war the sudden and efficient taking of the railways under control by the Government was astonishing—that is, if he knew anything about it. To most visitors it occurred unnoticed, unknown, so smoothly did this almost socialistic operation work. In fact, Englishmen themselves knew nothing, or almost nothing, of it at the time. In the following account of what the British Government did and is doing with the railways there is suggestion for the United States.

"Our correspondent, Mr. Acworth, appeared for many years in railway investigations before parliamentary committees, and also before the Railway Commission; has given evidence to the House of Commons in England on American railway law and practice, and in America before a Senate committee and the Hadley Commission on English railway cars and practice. He was a member of the Royal Commission on Accidents to Railway Servants in 1899, and of the Commission on Irish Railways, 1906; also of Government committees on Light Railways, 1894, and on Accounts and Statistics, 1906; member of the Royal Commission of Inquiry into Railways and Transportation in Canada, which has just made its report; designated commissioner to inquire into railway matters in Rhodesia. He was a delegate of the British Government to the International Railway Congress at Washington in 1905, and at Berne in 1910. He is the author of The Railways of England, The Railways and the Trader, Elements of Railway Economics, and of many articles on railway matters in the London Times, the Quarterly, the Edinburgh Review, the Nineteenth Century, the Economist, and other journals and newspapers; is a director of the Underground Co. of London, which controls the bulk of the transportation facilities, electric railways, street railways, and omnibuses in and around London.—The Editors.]

"England is an island, but only 20 miles of sea separate it from the Continent of Europe. In the year 1870 war broke out at a few days' notice between France and Prussia, and within six weeks the Germans were in front of Paris. England took alarm. It was not possible that a great army could invade England. Our fleet could take care of that. But it was possible that a few score thousand men might evade the fleet and effect a landing in England; and one provision against this possibility was at once made. An act of Parliament passed in 1871 gave the Government power to take over by royal proclamation all or any of the railways of the United Kingdom in time of war.

"Some 40 years later, when the constant shaking of the Prussian mailed fist and the constant rattling of the Prussian saber were alarming all Europe, matters were carried further. A committee of some 12 general managers of the principal railways was formed (the English general manager corresponds to the American president), and detailed schemes of railway mobilization were drawn up.

"The general manager of a railway of which I am a director, which, though small, is not unimportant, as it runs through one of the great training grounds of the British Army, told me that he received the original scheme some four years before the war. It was a sealed packet, and he was instructed to place it unopened in his safe. In the course of the next year or two he received several supplements, to be placed beside the original. Finally in 1912 he received a complete new scheme, and was told to destroy all the former papers unopened.

"On August 4, 1914, England declared war on Germany. The same day the railways were taken over by the Government and the mobilization scheme came into operation. The general manager opened his packet and read his instructions. Within a week he dispatched 90 military trains. Each train ran to its fixed schedule. Each train was made up of the precise equipment assigned to it. And each carried precisely the troops which the scheme had laid down for it.

"Within some 10 days of the declaration of war the whole of the first line British Army, about 120,000 men, was landed in France. The main point of embarkation was the port of Southampton, which was closed to all except military traffic. Eighty trains each day, coming from all parts of the British Isles and bringing many thousands of men who had already crossed the sea from Ireland, converged upon Southampton. They were scheduled to arrive at intervals of 12 minutes during the 16 hours from dawn till dark. A special instruction provided that if any train was as much as 12 minutes late it was to be regarded as having missed its turn. It was to be sidetracked at any convenient spot and the transport was to leave without waiting for it. The instruction was not necessary. No single train during the whole embarkation period failed to fall into and keep its appointed place in the procession.

"The railways have been taken over by the Government, but the management has been left undisturbed in the hands of the old men. There is nothing by which a shipper or a passenger can recognize that any change has taken place. Each general manager with his own old staff manages his railway as before. But there is for the first time an authority behind him. The informal committee of general managers that existed before the war was at the outset given full powers as the railway executive committee. And it exercises supreme control. Its nominal chairman is a cabinet minister. But the deputy chairman, the real head of the organization, is one of the general managers. The executive committee is in almost constant session, and its task is to insure that all the railways of the country work together as one harmonious whole.

"The task is not light. Not only have troops had to be moved to the ports by the million, guns by tens of thousands, and military stores in millions of tons, but when every factory in the country is impressed into military works the amount of traffic back and forth within the country itself is enormous. Steel is cast in one place and made into shell in another; the fuses come from a third district, and the explosives from a fourth; the boxes and baskets to hold the shells have to be brought from a fifth; the filling is done in a sixth place, before finally the finished shell can be delivered at the port of shipment. And similarly with all the other necessaries of the armies and the fleets.

"And this is not all. Railways, like any other business concern, as they grow up develop an organization to meet the requirements of their normal business. And the requirements in England nowadays are wholly abnormal. Imagine a camp of twenty or thirty thousand men, with all their multifarious needs in food and supplies, plumped down alongside of a petty way station, whose accommodation was meant to suffice for a score of passengers a day and three or four freight cars. Imagine half a dozen important ports taken up wholly by naval needs and the whole of their normal traffic diverted to an adjoining port, or, it may be, to a port on the opposite coast of the island. Again, traffic has been thrown upon the roads that they never handled before. The collieries before the war imported pit props by the millions of feet from the Baltic through ports close at hand. That traffic has been stopped, and pit props have to be carried long distances by rail from remote parts of Great Britain.

"Nor are these the only difficulties against which the railways have to contend. With more traffic than ever to handle, there are fewer men to handle it. One man out of every five—and they not the least active and efficient—has gone to fight. Shops that should be building new engines and overhauling old ones are given up to making shells or building airplanes or motor lorries. Steel that should be rolled into new rails has been commandeered for ship plates and guns and shells. But somehow the railways have pulled through. The employees who are left, feeling that their services are essential to the State, have worked their best and hardest with conspicuous loyalty. Women as porters, carriage cleaners, ticket collectors, and in various other capacities are lending a willing hand. Military traffic, of course, comes first. And if freight is delayed and passenger trains are overcrowded and behind time nobody

grumbles. And, indeed, there is not much excuse for grumbling. So far freight rates have been left unaltered, but passenger fares have practically been doubled. Before the war the normal fare was 2 cents a mile. But there were so many concessions from the normal fare in the shape of commuters' tickets, workmen's tickets, week-end tickets, excursion tickets, etc., that it was estimated that the average passenger did not pay more than 12 mills per mile. Early in the war all cheap fares except commuters' and workmen's tickets were cut off, and a few months ago the ordinary fares were increased 50 per cent. So the ordinary passenger now pays 3 cents. The increase was put on quite as much to reduce travel as to obtain revenue. Gradually the passenger service has been very greatly reduced; the express trains stop at more stations and take longer on their journey. Dining cars and sleepers have been almost entirely cut off.

"Under the act of Parliament of 1871 the compensation to be paid by the Government to the proprietors of a railway taken over was to be fixed by arbitration in default of agreement. But when all the railways were taken over for an indefinite time it was felt that this would not be fair to the hundreds of thousands of stock and bond holders. Accordingly, an agreement was at once made that all Government traffic should be carried free and no account rendered; that the Government should take all receipts from ordinary traffic, pay all operating expenses, and guarantee to the proprietors of the railway the same net revenue as they had earned in 1913, the last complete year before the war. And, subject to minor adjustments, this agreement has been adhered to ever since. If, after the working expenses and the guaranteed net revenues of all the railways have been met, there is a surplus, the Government takes it. If there is a deficit, the Government finds the money to meet it. The actual result has varied at different periods. Three separate all-round increases of $1.25 a week in the wages of the employees, the last of which has only just taken effect, have added largely to operating expenses. But, as a whole, the arrangement has been satisfactory to the parties. The shareholders as a body feel that they have been fairly treated, for though, doubtless, in some companies they would have done much better had they been paid by results, in others, where old pleasure traffic was killed and no new traffic took its place, they would have done much worse. And the Government, whose vast military traffic is carried for nothing, has probably paid less than it would have done had each soldier and each ton of stores been charged for according to the regular military tariff.

"I have laid stress on the fact that the railway officials manage their own lines exactly as before. But naturally the relation between the war office and the railways is close and constant. And from the director general of military transport at headquarters, through the colonel in charge at the divisional command, down to the subaltern transport officer at the local entraining station, there is a whole hierarchy of military officers whose business it is to interpret the military needs to the railway officials and the railway possibilities to the military authorities. The point is that it is for the soldiers to say what they want done, for the railway officials to decide how to do it, or, it may be, to explain why it can not be done and to suggest a revision or modification of the order. On the whole, the system works excellently. An irate colonel who was so dissatisfied with the accommodation provided for his favorite charger that he was left expostulating on the platform alongside his horse while the train and the regiment went on without him was a fortunately rare exception.

"Of course, Great Britain, with 12 per cent of its total population under arms, and with almost as many more engaged in the manufacture of military supplies, is in the war deeper than the United States is ever likely to be. But if the experience of the United Kingdom has any lessons for the people of the United States they would seem to be twofold: (1) Even if the Government should think fit to take over the railways it should leave the management and operation wholly in the hands of the old staff; and (2) if it does take them over, or if, without taking them over, it so far interferes with the normal traffic as to upset the customary balance between income and expenditure, it should at once come to a fair agreement with the proprietors, securing the result that they receive the normal return of income from their property, and not wait for subsequent discussion and possible litigation, with heated charges of blackmail on the one hand and confiscation on the other."

Mr. NEWLANDS. I also ask that there be inserted in the RECORD the legislation creating the Council of National Defense contained in the military appropriation bill for the year ending June 30, 1917, and also the plan of organization of the Council of National Defense, with its various committees.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

"SEC. 2. That a Council of National Defense is hereby established, for the coordination of industries and resources for the national security and welfare, to consist of the Secretary of War, the Secretary of the Navy, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of Labor.

"That the Council of National Defense shall nominate to the President, and the President shall appoint, an advisory commission, consisting of not more than seven persons, each of whom shall have special knowledge of some industry, public utility, or the development of some natural resource, or be otherwise specially qualified in the opinion of the council, for the performance of the duties hereinafter provided. The members of the advisory commission shall serve without compensation, but shall be allowed actual expenses of travel and subsistence when attending meetings of the commission or engaged in investigations pertaining to its activities. The advisory commission shall hold such meetings as shall be called by the council or be provided by the rules and regulations adopted by the council for the conduct of its work.

"That it shall be the duty of the Council of National Defense to supervise and direct investigations and make recommendations to the President and the heads of executive departments as to the location of railroads with reference to the frontier of the United States so as to render possible expeditious concentration of troops and supplies to points of defense; the coordination of military, industrial, and commercial purposes in the location of extensive highways and branch lines of railroad; the utilization of waterways; the mobilization of military and naval resources for defense; the increase of domestic production of articles and materials essential to the support of armies and of the people during the interruption of foreign commerce; the development of seagoing transportation; data as to amounts, location, method and means of production, and availability of military supplies; the giving of information to producers and manufacturers as to the class of supplies needed by the military and other services of the Government, the requirements relating thereto, and the creation of relations which will render possible in time of need the immediate concentration and utilization of the resources of the Nation.

"That the Council of National Defense shall adopt rules and regulations for the conduct of its work, which rules and regulations shall be subject to the approval of the President, and shall provide for the work of the advisory commission to the end that the special knowledge of such commission may be developed by suitable investigation, research, and inquiry and made available in conference and report for the use of the council; and the council may organize subordinate bodies for its assistance in special investigations, either by the employment of experts or by the creation of committees of specially qualified persons to serve without compensation, but to direct the investigations of experts so employed.

"That the sum of $200,000, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be immediately available for experimental work and investigations undertaken by the council, by the advisory commission, or subordinate bodies, for the employment of a director, expert and clerical expenses and supplies, and for the necessary expenses of members of the advisory commission or subordinate bodies going to and attending meetings of the commission or subordinate bodies. Reports shall be submitted by all subordinate bodies and by the advisory commission to the council, and from time to time the council shall report to the President or to the heads of executive departments upon special inquiries or subjects appropriate thereto, and an annual report to the Congress shall be submitted through the President, including as full a statement of the activities of the council and the agencies subordinate to it as is consistent with the public interest, including an itemized account of the expenditures made by the council or authorized by it, in as full detail as the public interest will permit: *Provided, however*, That when deemed proper the President may authorize, in amounts stipulated by him, unvouchered expenditures and report the gross sums so authorized not itemized."

COUNCIL OF NATIONAL DEFENSE.

Secretary of War Newton D. Baker, chairman.
Secretary of Navy Josephus Daniels.
Secretary of the Interior Franklin K. Lane.
Secretary of Agriculture David F. Houston.

Secretary of Commerce William C. Redfield.
Secretary of Labor William B. Wilson.

ADVISORY COMMISSION OF COUNCIL OF NATIONAL DEFENSE.

Daniel Willard (chairman), transportation and communication.

Howard E. Coffin, munitions and manufacturing, including standardization and industrial relations.

Julius Rosenwald, supplies, including clothing, etc.

Bernard M. Baruch, raw materials, minerals, and metals.

Dr. Hollis Godfrey, engineering and education.

Samuel Gompers, labor, including conservation of health and welfare of workers.

Dr. Franklin Martin, medicine and surgery, including general sanitation.

Walter S. Gifford, director of council and advisory commission.

Grosvenor B. Clarkson, secretary of council and advisory commission.

SUBORDINATE COMMITTEES OF COUNCIL OF NATIONAL DEFENSE.

Aircraft production board: Howard E. Coffin, chairman; Brig. Gen. George O. Squier, Chief Signal Officer, United States Army; Rear Admiral David W. Taylor, Bureau of Construction; S. D. Waldron, ex-vice president of the Packard Motor Car Co.; E. A. Deeds, ex-general manager of the National Cash Register Co. and later with the Dayton Engineering Co.; R. L. Montgomery, senior member of Montgomery, Clothier & Tyler.

Committee on coal production: F. S. Peabody, president Peabody Coal Co., Chicago, chairman; E. J. Berwind, president Berwind-White Coal Mining Co., New York; W. W. Keefer, president Pittsburgh Terminal Railroad & Coal Co., Pittsburgh; Van. H. Manning, Director United States Bureau of Mines, Washington; C. M. Moderwell, president United Coal Mining Co., Chicago; E. L. Pierce, vice president Semet Solvey Co., Syracuse; Erskine Ramsey, vice president Pratt Consolidated Coal Co., Birmingham; George Otis Smith, Director United States Geological Survey, Washington; James J. Storrow (Lee Higginson & Co.), chairman Massachusetts Committee on Public Safety, Boston; H. N. Taylor, vice president Central Coal & Coke Co., Kansas City; S. D. Warriner, president Lehigh Valley Coal & Navigation Co., Philadelphia; J. F. Wellborn, president Colorado Fuel & Iron Co., Denver; Daniel B. Wentz, president Stonega Coal & Coke Co., Philadelphia; George W. Reed, secretary.

Commercial economy board: A. W. Shaw, president A. W. Shaw Co., chairman; W. D. Simmons, Simmons Hardware Co.; E. F. Gay, Harvard University; George Rublee, member of Eight-Hour Commission; Henry S. Dennison, president Dennison Manufacturing Co.; Dr. Hollis Godfrey, member ex officio.

Committee on shipping: Chairman Denman of the Federal Shipping Board, chairman; P. A. S. Franklin, president International Mercantile Marine; H. H. Raymond, president Coastwise Shipping Association; Eugene T. Chamberlain, commissioner, Bureau of Navigation, Department of Commerce; D. T. Warden, of the Standard Oil Co.; L. H. Shearman, vice president W. R. Grace & Co.; E. M. Bull, vice president A. H. Bull & Co.; Frank C. Munson, president Munson Steamship Lines; Crawford H. Ellis, vice president United Fruit Co., New Orleans.

Committee on women's defense work: Dr. Anna Howard Shaw, chairman; Mrs. Philip N. Moore, of St. Louis, president of the National Council of Women; Mrs. Josiah E. Cowles, of California, president of the General Federation of Women's Clubs; Miss Maude Wetmore, of Rhode Island, chairman of the National League for Woman's Service; Mrs. Carrie Chapman Catt, of New York, president of the National American Woman Suffrage Association; Mrs. Antoinette Funk, of Illinois; Mrs. Stanley McCormick, of Boston; Mrs. Joseph R. Lamar, of Atlanta, Ga., president of the National Society of Colonial Dames; Miss Ida M. Tarbell, of New York, publicist and writer; Miss Agnes Nestor, of Chicago, president Glove Workers' Union, member executive committee Women's Trade-Union League.

Interdepartmental advisory committee: War Department, William M. Ingraham; Navy Department, Capt. Volney O. Chase; Interior Department, Lathrop Brown; Department of Agriculture, Dr. B. T. Galloway; Department of Commerce, Dr. S. W. Stratton; Department of Labor, Louis F. Post; State Department, Leland Harrison; Treasury Department, James L. Wilmeth; Department of Justice, William C. Fitts; Post Office Department, J. W. Johnston.

General munitions board: Frank A. Scott, chairman. From the Army—Gen. Thomas Cruse, Quartermaster Department; Col. F. G. Hodgson, Quartermaster Department; Col. H. Fisher, Medical Corps; Col. S. E. Blunt, Ordnance Department; Maj. P. E. Pierce, General Staff; Maj. Charles Wallace, Signal Corps; Maj. William Kelley, Engineer Corps. From the Navy—Rear Admiral H. H. Rousseau, Bureau of Navy Yards and Docks; Rear Admiral W. S. Capps, Bureau of Construction and Repair; Rear Admiral A. W. Zane, Bureau of Steam Engineering; Commander R. H. Leigh, Bureau of Steam Engineering; Commander T. A. Kearney, Bureau of Ordnance; Dr. R. C. Holcomb, Medicine and Surgery; Paymaster J. H. Hancock, Bureau of Supplies and Accounts; Lieut. Col. W. B. Lemly, Marine Corps; Mr. L. McH. Howe, office of the Assistant Secretary of the Navy. Raw materials—Bernard M. Baruch, L. L. Summers. Manufacture—Howard E. Coffin. Supplies—Julius Rosenwald, Charles Eisenman. Medicine—Dr. Franklin Martin, Dr. F. F. Simpson. National research council—Dr. George E. Hale, Dr. R. A. Millikan. Chester C. Bolton, secretary.

Subcommittee on Army vehicles: Mr. Butterworth, chairman, Deere & Co.; G. W. Mixter, secretary; A. N. Thielaus, Studebaker Corporation; R. V. Board, Kentucky Wagon Co.; E. E. Parsonage, National Implement & Vehicle Association.

Subcommittee on armored cars: Col. Rice, United States Army; Col. Baker, United States Army; F. A. Scott; Karl Zimmerschied.

Subcommittee on emergency construction and contracts: W. A. Starrett, chairman, Starrett & Van Vleet; C. M. Lundoff, Crowell, Lundoff, Little Co.; M. C. Tuttle, Aberthaw Construction Co.; Maj. William Kelley; F. L. Olmstead, landscape architect; J. B. Talmadge, secretary.

Subcommittee on optical glass: Dr. R. A. Millikan; Dr. S. W. Stratton; A. L. Day; Maj. Wallace.

Subcommittee on storage facilities: M. L. Cook, chairman; Charles Day, Day & Zimmerman; H. P. Kendell, Plympton Press; R. N. Bissell, National Fire Underwriters Association.

Subcommittee on machine guns: B. W. M. Hanson, chairman, Pratt & Whitney; Bascom Little, Crowell, Lundoff, Little Co.

Subcommittee on priority: Gen. J. B. Aleshire, chairman.

Subcooperative committee—defense committee of American Institute of Accountants: E. S. Suffern, chairman, Loomis, Suffern & Fernald, New York City; W. S. Davies, Davies & Neald, New York City; Charles S. Ludlam, Hoskins & Sells, New York City; Arthur W. Teele, Patterson, Teele & Dennis, New York City; Henry A. Niles, Niles & Niles, New York City; R. N. Montgomery, Lybrand Ross Bros. & Montgomery, New York City; J. E. Sterritt, Price Waterhouse & Co., New York City; A. P. Richardson, secretary, secretary American Institute of Accountants, New York City.

MUNITIONS STANDARDS BOARD.

Frank A. Scott, Warner & Swasey Co., Cleveland, Ohio, chairman; Samuel M. Vauclain, president Baldwin Locomotive Works, Philadelphia, Pa.; W. H. Van Dervoort, president Root & Van Dervoort Engineering Co. and Moline Automobile Co., East Moline, Ill.; Francis C. Pratt, General Electric Co., Schenectady, N. Y.; John E. Otterson, vice president Winchester Repeating Arms Co., New Haven, Conn.; E. A. Deeds, Dayton, Ohio.

Subcommittee on gauges, dies, etc.: F. C. Pratt, chairman.

Subcommittee on Army and Navy artillery: S. M. Vauclain, chairman; J. B. King, Midvale Steel Co.; H. W. Van Dervoort; Benedict Crowell, secretary Crowell, Lundoff, Little Co.

Subcommittee on fuses and detonators: E. A. Deeds, chairman; Mr. Talbott, Dayton Metal Products Co.

Subcommittee on small arms and munitions: J. E. Otterson, chairman, Winchester Arms Co.; H. S. Kimball; C. H. Schlachs.

Subcommittee on optical instruments: F. A. Scott, chairman.

Subcommittee on Army and Navy projectiles; H. W. Van Dervoort, chairman; W. P. Barba; Commander Kearney; Col. W. B. Dunn; Mr. Howe.

COMMITTEES OF AND COOPERATING WITH ADVISORY COMMISSION—COMMITTEES OF AND COOPERATING WITH MR. WILLARD.

Cooperative committee on telegraphs and telephones: Theodore N. Vail, American Telephone & Telegraph Co., chairman; N. C. Kingsbury, American Telephone & Telegraph Co.; Newcomb Carlton, Western Union Telegraph Co.; Charles P. Brush, Postal Telegraph Co.; F. B. McKinnon, United States Independent Telephone Association.

COOPERATIVE COMMITTEE ON RAILROAD TRANSPORTATION.

Special committee on national defense of American Railway Association (executive committee): Fairfax Harrison, president Southern Railway, chairman; Daniel Willard, president Baltimore & Ohio Railroad, member ex officio; Samuel Rea, president Pennsylvania Railroad; Julius Kruttschnitt, chairman executive committee Southern Pacific Co.; Hale Holden, president Chicago, Burlington & Quincy Railroad; Howard Elliott, president New York, New Haven & Hartford Railroad; Edgar E. Clark, Interstate Commerce Commission, member ex officio; George Hodges, assistant to general chairman; J. E. Fairbanks, secretary.

Northeastern department: J. H. Hustis, receiver Boston & Maine Railroad, chairman; H. M. Biscoe, vice president Boston & Albany Railroad; Howard Elliott, president New York, New Haven & Hartford Railroad; Morris McDonald, president Maine Central Railroad; E. J. Pearson, president New York, New Haven & Hartford Railroad.

Eastern department: L. F. Loree, president Delaware & Hudson Co., chairman; W. G. Besler, president and general manager Central Railroad of New Jersey; Samuel Rea, president Pennsylvania Railroad; A. H. Smith, president New York Central Lines; A. W. Thompson, vice president Baltimore & Ohio Railroad; W. W. Atterbury, vice president Pennsylvania Railroad.

Southeastern department: W. J. Harahan, president Seaboard Air Line Railway, chairman; J. R. Kenly, president Atlantic Coast Line Railroad; R. V. Taylor, vice president and general manager Mobile & Ohio Railway; W. A. Winburn, president Central of Georgia Railway; E. H. Coapman, vice president Southern Railway System.

Central department: R. H. Aishton, president Chicago & North Western Railway, chairman; E. E. Calvin, president Union Pacific Railroad; Hale Holden, president Chicago, Burlington & Quincy Railroad; C. H. Markham, president Illinois Central Railroad; G. L. Peck, fourth vice president Pennsylvania lines west of Pittsburgh; G. T. Slade, first vice president Northern Pacific Railway; E. D. Sewell, vice president Chicago, Milwaukee & St. Paul Railway.

Southern department: W. B. Scott, president Southern Pacific Co., Texas-Louisiana lines; B. F. Bush, receiver Missouri Pacific Railway; Julius Kruttschnitt, chairman executive committee Southern Pacific Co.; C. E. Schaff, receiver Missouri, Kansas & Texas Railway; T. M. Schumacher, president El Paso & Southwestern Railroad.

Western department: William Sproule, president Southern Pacific Co., Pacific system; J. D. Farrell, president Oregon-Washington Railroad & Navigation Co.; R. S. Lovett, chairman executive committee Union Pacific system; E. P. Ripley, president Atchison, Topeka & Santa Fe Railway.

COOPERATIVE COMMITTEE ON ELECTRIC RAILROAD TRANSPORTATION.

Committee on national defense of American Electric Railway Association: Gen. George H. Harries, president of Omaha Electric Light & Power Co., Omaha, Nebr., chairman; Frank R. Ford, vice chairman, Ford, Bacon & Davis, 115 Broadway, New York (in charge of general matters); L. S. Storrs, president the Connecticut Co., New Haven, Conn., assigned to the Northeastern Military Department; B. I. Budd, president Metropolitan West Side Elevated Railway Co., Chicago, Ill., assigned to the Central Military Department; C. Loomis Allen, president Allen & Peck (Inc.), Syracuse, N. Y., assigned to the Eastern Military Department; P. H. Gadsden, president Charleston Consolidated Railway & Lighting Department, Charleston, S. C., assigned to the Southeastern Military Department; L. C. Bradley, district manager Stone & Webster, Houston, Tex., assigned to the Southern Military Department; W. R. Alberger, vice president and general manager San Francisco-Oakland Terminal Railways, San Francisco, Cal., assigned to the Western Military Department.

Cooperative committee on cars: S. M. Vauclain, vice president Baldwin Locomotive Works, chairman; E. F. Carry, president Haskell & Barker Car Co.; Charles S. Gawthrop, vice president American Car & Foundry Co.; Clive Runnels, vice president, the Pullman Co.; R. L. Gordon, assistant to president Standard Steel Car Co.; A. S. Reeder, vice president Pressed Steel Car Co.

Cooperative committee on locomotives: S. M. Vauclain, vice president Baldwin Locomotive Works, chairman; Andrew Fletcher, president American Locomotive Co.; H. P. Ayres, vice president H. K. Porter Locomotive Co.; Joel Coffin, chairman Lima Locomotive Corporation.

COMMITTEES OF AND COOPERATING WITH MR. COFFIN.

Cooperative committee on public utilities: John W. Lieb, vice president New York Edison Co., chairman; Alexander Dow, president Detroit Edison Co.; C. L. Edgar, president Boston Illuminating Co.; J. B. McCall, president Philadelphia Electric Co.; Herbert A. Wagner, president National Electric Light Association and president Consolidated Gas Co., of Baltimore.

Cooperative committee on automotive transport: Karl W. Zimmerschied, chairman; Charles Clifton, representing National Automobile Chamber of Commerce; C. W. Stiger, representing motor and accessory manufacturers; H. L. Horning, representing tractor interests; Henry R. Sutphen, representing watercraft interests; Frank H. Russell, representing Aviation Engine Association of America; Coker F. Clarkson, secretary and general manager of Society of Automobile Engineers.

Cooperative committee from national industrial conference board: L. A. Osborne, chairman, vice president Westinghouse Electric & Manufacturing Co., Buffalo, N. Y.; W. H. Barr, president Lumen Bearing Co., Buffalo, N. Y.; W. H. Van Dervoort, president Root & Van Dervoort Engineering Co., East Moline, Ill.; C. A. Crocker, president Crocker-McElwain Co., Holyoke, Mass.; E. A. Smith, president Pelzer Manufacturing Co., Greenville, S. C.

COMMITTEES OF AND COOPERATING WITH MR. ROSENWALD.

Committee on supplies: Julius Rosenwald, chairman; Stanley King, secretary and director of W. H. McElwain Co.; Charles Eisenman, retired; H. M. Kelso, Sears, Roebuck & Co.; T. W. Cloney, Quaker Oats Co.; E. O. Heyl, Libby, McNeil & Libby.

Cooperative committee on cotton goods: Lincoln Grant, Wellington-Sears Co., New York, chairman; Harry L. Bailey, Wellington-Sears Co., New York; A. F. Bemis, president National Association Cotton Manufacturers; Fuller E. Calloway, La Grange, Ga.; Elisha Cronkhite, Smith, Hogg & Co., New York; E. F. Greene, Pacific Mills, Boston, Mass.; Eustis L. Hopkins, Bliss, Fabyan & Co., New York; William D. Judson, 78 Leonard Street, New York; J. Harper Poor, Amory, Browne & Co., New York; W. H. Prankard, Amoskeag Manufacturing Co., Boston, Mass.; John E. Rousmaniere, J. Spencer Turner & Co., New York; Spencer Turner, Turner-Halsey Co., New York; Ridley Watts, Watts, Stebbins & Co., New York.

Cooperative committee on woolen manufactures: John P. Wood, William Wood & Co., Philadelphia, chairman; Spaulding Bartlett, S. Slater & Sons, Webster, Mass.; Robert T. Francis, Ponteesue Woolen Manufacturing Co., New York; George C. Hetzel, C. C. Hetzel Co., Chester, Pa.; Winthrop L. Marvin, National Association Wool Manufacturers, Boston, Mass.; Moses L. Shuttleworth, American Woolen Co., New York; Nathaniel Stevens, M. T. Stevens & Sons, North Andover, Mass.; Charles H. Wilson, J. & E. H. Wilson, Pittsfield, Mass.

Cooperative committee on shoe and leather industries: J. F. McElwain, W. H. McElwain Co., Boston, Mass., chairman; John A. Bush, Brown Shoe Co., St. Louis, Mo.; W. G. Garrett, Central Leather Co., Boston, Mass.; Charles P. Hall, American Hide & Leather Co., Boston, Mass.; George F. Johnson, Endicott-Johnson Co., Binghamton, N. Y.; John Kent, M. A. Packard Shoe Co., Brockton, Mass.; H. Frederick Lesh, Kistler-Lesh Co., Boston, Mass.; August Vogel, Pfister-Vogel Leather Co., Milwaukee, Wis.

Cooperative committee on knit goods: Lincoln Cromwell, William Iselin & Co., New York, chairman; Frank H. Burgher, 32 Thomas Street, New York; J. S. Carr, jr., president Durham Hosiery Mills, Durham, N. C.; Andrew Frey, vice president Onieta Knitting Mill, Utica, N. Y.; Leo M. Flesh, Atlas Underwear Co., Piqua, Ohio; E. I. Goodrich, Clift-Goodrich Co., New York; Frederick S. Haight, 61 Worth Street, New York; Henry Pope, Paramount Knitting Mills, Chicago, Ill.; Rufus W. Scott, William F. Taubel, New York.

COMMITTEES OF AND COOPERATING WITH MR. BARUCH.

Cooperative committee on alcohol: Horatio S. Rubens, director United States Industrial Alcohol Co., 27 William Street, New York City, chairman; Julius Kessler, president Distillers' Securities Corporation, 40 Exchange Place, New York City; Carman N. Smith, secretary Michigan Chemical Co., Bay City, Mich.

Cooperative committee on aluminum: Arthur V. Davis, president Aluminum Co. of America, Pittsburgh, Pa., chairman; E. E. Allyne, president Aluminum Castings Co., Cleveland, Ohio; Joseph A. Janney, jr., Morris Building, Philadelphia, Pa. (partner in Janney, Steinmetz & Co.).

Cooperative committee on asbestos, magnesia, and roofing: Thomas F. Manville, president H. W. Johns-Manville Co., New York City, chairman; Philip Allen, Bird & Son.

Cooperative committee on brass: Charles F. Brooker, president American Brass Co., Ansonia, Conn., chairman; E. O. Goss, assistant treasurer Scovill Manufacturing Co., Waterbury, Conn.; Barton Haselton, secretary, treasurer, and general manager Rome Brass Co., Rome, N. Y.; Lewis H. Jones, president Detroit Copper & Brass Co., Detroit, Mich.; F. J. Kingsbury, president Bridgeport Brass Co., Bridgeport, Conn.

Cooperative committee on cement: John E. Morron, president Atlas Portland Cement Co., New York City, chairman; B. F. Affleck, president Universal Portland Cement Co., Chicago, Ill.; George T. Camerson, president Santa Cruz Portland Cement Co., San Francisco, Cal.; Richard Hardy, president Dixie Portland Cement Co., Chattanooga, Tenn.; Col. E. M. Young, vice president Lehigh Portland Cement Co., Allentown, Pa.; R. J. Wig, Bureau of Standards.

Cooperative committee on chemicals: William H. Nichols, General Chemical Co., 25 Broad Street, New York City, chairman.

Subcommittee on acids: H. R. Grasselli, Grasselli Chemical Co., Cleveland, Ohio; Henry Howard, Merriman Chemical Co., Boston.

Subcommittee on alkalies: J. D. Pennock, Solvay Process Co., Syracuse, N. Y.

Subcommittee on fertilizers: Horace Bowker, No. 2 Rector Street, New York City; Charles E. MacDowell, president Armour Fertilizer Co., Chicago.

Subcommittee on miscellaneous chemicals: Edward Mallinckrodt, jr., 2600 North Second Street, St. Louis.

Subcommittee on coal-tar by-products: William H. Childs, president Barrett Co., 17 Battery Place, New York City, chairman.

Subcommittee on sulphur: Henry Whiton, president Union Sulphur Co., chairman.

Cooperative committee on copper: J. D. Ryan, president Anaconda Copper Co., 42 Broadway, New York City, chairman; R. L. Agassiz, president Calumet & Hecla Mining Co., 12 Ashburton Place, Boston, Mass.; W. A. Clark, president United Verde Copper Co., 20 Exchange Place, New York City; Murry M. Guggenheim Sons, 120 Broadway, New York City (Guggenheim Sons); James McClean, vice president Phelps-Dodge Co., 98 John Street, New York City; Charles McNeill, president Utah Copper Co., 25 Broadway, New York City; Stephen Birch, vice president Kennicott Mines Co., 120 Broadway, New York City.

Cooperative committee on lead: Clinton H. Crane, president St. Joseph Lead Co., 61 Broadway, New York City, chairman; Fred Bradley; Ed. W. P. Brush, American Smelting & Refining Co., 120 Broadway, New York City; E. J. Cornish, vice president National Lead Co., 111 Broadway, New York City; Harry L. Day; F. Y. Robertson, vice president and general manager United States Metals Refining Co., 120 Broadway, New York City.

Cooperative committee on lumber: R. H. Dowman, president National Lumber Manufacturers' Association, New Orleans, La., Munsey Building, Washington, D. C., chairman; E. T. Allen, manager Western Forestry and Conservation Association, Portland, Oreg.; D. O. Anderson, lumber manufacturer, Marion, S. C.; W. Q. Brown, lumber and paper manufacturer, Berlin, N. H.; W. E. Delaney, president Kentucky Lumber Co., Lexington, Ky.; Henry S. Graves, Chief Forester United States Forest Service, Washington, D. C.; J. F. Gregory, logger and lumber manufacturer, Tacoma, Wash.; Charles S. Keith, president Southern Pine Association, Kansas City, Mo.; George B. Lewis, lumber manufacturer, Holyoke, Mass.; G. S. Long, manager Weyerhaeuser Timber Co., Tacoma, Wash.; W. M. Ritter, president W. M. Ritter Lumber Co., Welch, W. Va.; E. A. Selfridge, president Northwestern Redwood Co. and president Redwood Manufacturers' Association, San Francisco; W. H. Sullivan, manager Great Southern Lumber Co.; C. H. Worcester, president C. H. Worcester Lumber Co., Chicago, Ill.

Cooperative committee on mica: L. W. Kingsley, president Eugene Munsell & Co., 68 Church Street, New York, chairman; W. Vance Brown, Asheville Mica Co., Biltmore, N. C.; F. L. Watson, president Watson Bros., Boston, Mass.

Cooperative committee on nickel: Ambrose Monell, president International Nickel Co., 43 Exchange Place, New York City, chairman.

Committee on steel and steel products: Elbert H. Gary, American Iron and Steel Institute, 71 Broadway, New York, chairman; James H. Burden, Troy, N. Y.; E. A. S. Clarke, president Lackawanna Steel Co., 2 Rector Street, New York; Alva C. Dinkey, vice president Midvale Steel Co., Philadelphia, Pa.; James Farrell, 71 Broadway, New York; Willis L. King; Charles M. Schwab, chairman of board Bethlehem Steel Co., 111 Broadway, New York; John A. Topping, chairman Republic Iron & Steel Co., 17 Battery Place, New York.

Subcommittee on alloys: E. A. S. Clark, president Lackawanna Steel Co., New York; James A. Farrell, 71 Broadway, New York, chairman United States Steel Corporation; E. G. Grace, president Bethlehem Steel Co., South Bethlehem, Pa.; A. A. Fowler, Rogers, Brown & Co., New York; E. J. Lavino, E. J. Lavino Co., New York.

Subcommittee on sheet steel: W. S. Horner, Oliver Building, Pittsburgh, Pa., chairman; Walter Cromwell, Pittsburgh, Pa.; Charles Hadley, Allen Wood Iron & Steel Co., Philadelphia, Pa.

Subcommittee on pig tin: John Hughes, chairman, assistant to President United States Steel Corporation, 71 Broadway, New York; E. R. Crawford; Edwin Groves.

Subcommittee on steel distribution: J. A. Farrel, chairman, president United States Steel Co., 71 Broadway, New York; E. A. S. Clark, president Lackawanna Steel Co., New York; John A. Topping, president Republic Iron & Steel Co.

Subcommittee on scrap iron: Eli Joseph, chairman; Joseph, Joseph & Bros., New York City; Samuel Deutsch; Vernon Phillips, Perry, Buxton, Doane & Co., Philadelphia, Pa.; Joseph Michaels.

Subcommittee on pig iron, iron ore, and lake transportation: H. G. Dalton, chairman, Pickands-Mathers Co., Cleveland, Ohio; F. Billings, Todd Stambaugh Co., Cleveland, Ohio; H. Colby, Pittsburgh Steamship Co., United States Steel Co., Cleveland, Ohio; C. D. Dyer, W. P. Snyder & Co., Pittsburgh, Pa.; Leonard Peckitt, Philadelphia, Pa.; F. B. Richards, M. A. Hanna Co., Cleveland Ohio; W. P. Sheppard, Rogers Brown Co., Buffalo, N. Y.; J. H. Woodward, Woodward Iron Co., Birmingham, Ala.; A. H. Woodward, Woodward Iron Co., Birmingham, Ala.

Subcommittee on ferro-manganese: Arthur A. Fowler, resident partner, Rogers Brown Co., New York, N. Y.

Cooperative committee on oil: A. C. Bedford, chairman, president Standard Oil Co., 26 Broadway, New York City; G. S. Davison, president Gulf Refining Co., Frick Building, Pittsburgh, Pa.; E. K. Doheny, president Mexican Petroleum Co., Los Angeles, Cal.; E. C. Lufkin, president Texas Co., Whitehall Building, New York City; John H. Markham, jr., Daniels Building, Tulsa, Okla.; H. F. Sinclair, president Sinclair Refining Co., Equitable Building, New York City; J. W. Van Dyke, president Atlantic Refining Co., 3144 Passyunk Avenue, Philadelphia, Pa.; William Muir, president National Petroleum Association, Titusville, Pa.; H. G. James, president Western Refiners' Association, Kansas City, Mo.; Joseph F. Guffy, president Natural Gas Association of America, Pittsburgh, Pa.

Cooperative committee on rubber: H. Stuart Hotchkiss, chairman, president General Rubber Co., 1790 Broadway, New York; Frederic C. Hood, Hood Rubber Co., Watertown, Mass.; Arthur Marks, Bureau of Construction and Repair, Navy Department, Washington, D. C.

Cooperative committee on wool: Jacob F. Brown, Brown & Adams, 269 Sumner Street, Boston, Mass.; H. E. Campbell, Flagstaff, Ariz.; Joseph R. Grundy, William H. Grundy, Bristol, Pa.; F. J. Hagenbarth, president National Association Wool Growers, Salt Lake City, Utah; Sigmund Silberman, S. Silberman Sons, Chicago, Ill.; James M. Wilson, McKinley, Wyo.

Cooperative committee on zinc: Edgar Palmer, chairman, president New Jersey Zinc Corporation, 55 Wall Street, New York; Charles W. Baker, president American Zinc, Lead & Smelting Co., 120 Broadway, New York; A. P. Cobb, vice president New Jersey Zinc Corporation, 55 Wall Street, New York; Sidney J. Jennings, vice president United States Smelting, Refining & Mining Co., 120 Broadway, New York; Cornelius F. Kelley, vice president Anaconda Copper Co., 42 Broadway, New York; N. Bruce MacKelvie, president Butte & Superior Copper Co., 25 Broad Street, New York; Thomas F. Noon, president Illinois Zinc Co., Peru, Ill.; Charles T. Orr, president Bertha A. Mining Co., Webb City, Mo.

COMMITTEES OF AND COOPERATING WITH DR. GODFREY.

Committee on engineering and education: Hollis Godfrey, chairman; Henry E. Crampton, vice chairman; Charles A. Stone, Stone & Webster, Boston, Mass.; Gano Dunn, J. G. White Corporation; Samuel M. Evans, vice president Eagle Picher Lead Co.; Frederick W. Webster, Stone & Webster, Boston, Mass.; Van Rensselaer Lansingh; H. A. Gardner, Institute of Industrial Research.

Subcommittee on general engineering: Hollis Godfrey, chairman; Henry E. Crampton, vice chairman; Gano Dunn, J. G. White Corporation; John E. Greiner, member of board of directors American Society of Civil Engineers; J. V. Davies, member of board of directors American Society of Civil Engineers; H. W. Buck, president American Institute of Electrical Engineers; Prof. C. A. Adams, chairman standards committee of American Institute of Electrical Engineers; Dr. Ira N. Hollis, president American Society of Mechanical Engineers; Calvin W. Rice, secretary American Society of Mechanical Engineers; Philip N. Moore, president American Institute of Mining Engineers; Bradley Stoughton, secretary American Institute of Mining Engineers; Gen. Black.

Subcommittee on production engineering: Hollis Godfrey, chairman; Henry E. Crampton, vice chairman; B. H. Bristow Draper, Draper Corporation, Hopedale, Mass., secretary; Ronald T. Lyman, treasurer Boston Manufacturing Co., Waltham, Mass., treasurer Waltham Bleacher, Waltham, Mass., treasurer Whittenton Manufacturing Co., Taunton, Mass., treasurer Salmon Falls Manufacturing Co., Salmon Falls, N. H.; Edwin Farnham Greene, treasurer Pacific Mills, with mills and bleacheries at Lawrence, Mass., mills at Dover, N. H., mills at Columbia, S. C., president Lockwood, Greene & Co., mill engineers; A. F. Bemis, president Bemis Bros. Bag. Co., mills in St. Louis,

Mississippi, Tennessee, Indiana, finishing plants in a dozen large cities of the United States and Canada; Stewart W. Cramer, southern representative Whitin Machine Works, president of Loray Mills, Gastonia, N. C., president Mays Mills, Mayworth, N. C., president of the Cramer Humidifier System; John N. Law, president Saxon Mills, Spartanburg, S. C., president Chesnee Mills, Chesnee, S. C.; George H. Lanier, president or general manager West Point Manufacturing Co., Lanett Cotton Mills, Lanett Bleachery & Dye Works, Riverdale Cotton Mills, all at West Point, Ga.

Subcommittee on universities and colleges: Hollis Godfrey, chairman; Henry E. Crampton, vice chairman; Frederick C. Ferry, dean Williams College, secretary; Edwin A. Aldermann, president University of Virginia; Guy Potter Benton, president University of Vermont; Kenyon L. Butterfield, president Massachusetts Agricultural College; Augustus S. Downing, assistant commissioner for higher education, University of the State of New York; Wilson Farrand, head master Newark Academy; Frank J. Goodnow, president Johns Hopkins University; Edward K. Graham, president University of North Carolina; Charles S. Howe, president Case School of Applied Science; Harry Pratt Judson, president University of Chicago; A. Lawrence Lowell, president Harvard University; Frank L. McVey, president State University of North Dakota; Alexander Meiklejohn, president Amherst College; Joseph A. Mulry, president Fordham University; John S. Nollen, president Lake Forest College; Raymond A. Pearson, president Iowa State College of Agriculture and Mechanic Arts, Ames Iowa; Winthrop E. Stone, president Purdue University; Henry Suzzallo, president University of Washington; William O. Thompson, president Ohio State University; Robert E. Vinson, president University of Texas.

Subcommittee on secondary and normal schools: Hollis Godfrey, chairman; Henry E. Crampton, vice chairman; Thomas Walter Butcher, Kansas State Normal School; Calvin Noyes Kendall, commissioner of education, Trenton, N. J.; Frank Thompson, assistant superintendent of schools, Boston, Mass.; Charles A. Prosser, director William Hood Dunwoodie Industrial Institute, Minneapolis, Minn.; Arthur David Dean, supervising officer of vocational education of the New York State Military Training Commission, New York; Robert Judson Aley, president University of Maine; Wilson Farrand, head master Newark Academy; John C. Garber, city superintendent of schools, Philadelphia, Pa.; J. H. Phillips, city superintendent of schools, Birmingham, Ala.; C. E. Chadsey, city superintendent of schools, Detroit, Mich.; J. D. Shoop, city superintendent of schools, Chicago, Ill.; R. J. Condon, city superintendent of schools, Cincinnati, Ohio; J. Y. Joyner, State superintendent of schools, Raleigh, N. C.; P. C. Cary, State superintendent of schools, Madison, Wis.; Payson Smith, State superintendent of schools, Boston, Mass.

COMMITTEES OF, AND COOPERATING WITH, MR. GOMPERS.

Committee on labor: Samuel Gompers, president American Federation of Labor, Washington, D. C., chairman; William B. Wilson, Secretary Department of Labor, Washington, D. C.; V. Everit Macy, president of the National Civic Federation, New York City; James Lord, president mining department, American Federation of Labor, Washington; Elisha Lee, general manager Pennsylvania Railroad Co., Philadelphia, Pa.; Warren S. Stone, grand chief, Brotherhood of Locomotive Engineers, Cleveland, Ohio; C. E. Michael, National Association of Manufacturers (president Virginia Bridge & Iron Co.), Roanoke, Va.; Frank Morrison, secretary American Federation of Labor, Washington, D. C.; Leo K. Frankel, third vice president Metropolitan Life Insurance Co., New York City; James O'Connel, president Metal Trades Department, American Federation of Labor, Washington, D. C.; Louis B. Schran, chairman labor committee, United States Brewers' Association, Brooklyn, N. Y.; Ralph M. Easley, assistant to Samuel Gompers as chairman of committee, New York City; James W. Sullivan, assistant to Samuel Gompers as member of Advisory Commission, Washington, D. C.; Miss Gertrude Beeks, secretary of committee, New York City.

Subcommittee on mediation and conciliation: V. Everit Macy, president the National Civic Federation, New York City, chairman; Benjamin Ide Wheeler, president University of California, Berkeley, Cal.; H. B. F. MacFarland, publicist, Washington, D. C.; Harry Pratt Judson, president University of Chicago, Chicago, Ill.; Edgar A. Bancroft, attorney, Chicago, Ill.; Theodore Marburg, publicist, Baltimore, Md.; John B. McPherson, secretary New England Civic Federation, Boston, Mass.; W. Z. Ripley, professor of political economy, Harvard University, Newton Center, Mass.; Robert Bass, Peterboro, N. H.; John H. Finley, New York State Commissioner of Education, Albany, N. Y.; Jeremiah W. Jenks, Alexander Hamilton Institute, 13 Astor Place, New York City; William J. Schieffelin, chairman joint board of sanitary control, 170 William Street, New York; Ralph M. Easley, chairman executive council National Civic Federation, New York City; Rabbi Stephen S. Wise, Fifty-seventh Street and Seventh Avenue, New York City; Harden L. Crawford, 25 Broad Street, New York City; J. C. Walber, secretary bureau of information of Eastern Railroad, 5714 Grand Central, New York City; J. G. Schmidlapp, Cincinnati, Ohio; Myron T. Herrick, former ambassador to France, Cleveland, Ohio; Clinton Rogers Woodruff, secretary National Municipal League, Philadelphia, Pa.; Col. J. L. Spangler, Bellefonte, Pa.; Henry DeBardeleben, president Alabama Coal & Iron Co., Birmingham, Ala.; Joseph D. Grant, Burlingame, Cal.; William H. Crocker, president Crocker National Bank, San Francisco, Cal.; Harris Weinstock, president Weinstock, Nichols Co., San Francisco, Cal.; Isaac Ullman, president New Haven Chamber of Commerce, New Haven, Conn.; H. G. Haskell, E. I. du Pont de Nemours Powder Co., Wilmington, Del.; Charles P. Neill, manager bureau of information, Southeastern Railways, room 616, Woodward Building, Washington, D. C.; Hale Holden, president Chicago, Burlington & Quincy Railroad Co., 547 West Jackson Boulevard, Chicago, Ill.; J. W. Higgins, secretary Western Presidents' Convention, Chicago, Ill.; Charles G. Dawes, president Central Trust Co. of Illinois, Chicago, Ill.; B. A. Eckhart, president B. A. Eckhart Milling Co., Chicago, Ill.; H. M. Byllesby (substitute for G. H. Harries), 208 La Salle Street, Chicago, Ill.; Edward Hamlin, president Metropolitan Coal Co., Boston, Mass.; W. T. Barbour, Detroit, Mich.; August Belmont, August Belmont & Co., 43 Exchange Place, New York City; Nicholas F. Brady, president New York Edison Co., New York City; John D. Rockefeller, jr., 26 Broadway, New York City; E. H. Outerbridge, president New York Chamber of Commerce, 53 Liberty Street, New York City; Emerson McMillan, president American Light & Traction Co., 120 Broadway, New York City; P. E. Crowley, vice president New York Central lines, New York City; A. Parker Nevin, general counsel National Association of Manufacturers, 30 Church Street, New York City; James A. Hatch, Johnson & Higgins, 49 Wall Street, New York City; Andrew C. Imbrie, treasurer United States Finishing Co., 320 Broadway, New York City; D. Q. Braum, Tide Water Oil Co., New York City; Daniel Guggenheim, New York City; E. T. Stotesbury, Drexel & Co., Philadelphia, Pa.; William H. Johnson, president Machinists, American Federation of Labor Building, Washington, D. C.; L. E. Sheppard, vice president Order of Railway Conductors, 101 B Street SE., Washington, D. C.; John R. Alpine, general president United Association of Plumbers and Steamfitters, Chicago, Ill.; Oscar Nelson, post-office clerk, Chicago, Ill.; G. C. Van Dornes, general vice president Blacksmiths' Union, Chicago, Ill.; F. G. Purtill, vice chairman Brotherhood Locomotive Firemen and Engineers, DuQuoin, Ill.; Paul Bennett, president Powder Workers, Coalmont, Ind.; J. E. McClory, president Structural Iron Workers, American Central Life Building, Indianapolis, Ind.; J. P. McCreery, vice president Railway Carmen, Paducah, Ky.; Williams Diamond, Mine Workers, Cumberland, Md.; W. D. Mahon, president Amalgamated Association of Street Electric Railway Employees, 104 East High Street, Detroit, Mich.; Henry B. Perham, president Railroad Telegraphers, St. Louis, Mo.; Collis Lovely, vice president Boot and Shoe Workers, 5129 Minerva Avenue, St. Louis, Mo.; D. D'Alessandro, president Hod Carriers, 62 State Street, Albany, N. Y.; J. J. Freel, president Stereotypers' Union, 1839 Eighty-fifth Street, Brooklyn, N. Y.; S. E. Heberling, president Switchmen's Union, 326 Brisbane Building, Buffalo, N. Y.; Thomas U. Curtis, Tunnel and Subway Constructors, New York City; Stephen C. Hogan, general president Marble Workers, New York City; Thomas A. Rickert, president United Garment Workers, Bible House, New York City; Joseph F. Valentine, president International Molders' Union, Cincinnati, Ohio; William P. Clarke, president Flint Glass Workers, Toledo, Ohio.

Subcommittee on wages and hours: Frank Morrison, secretary American Federation of Labor, Washington, D. C., chairman; John R. Alpine, general president United Association of Plumbers and Steamfitters, Chicago, Ill.; Frank C. Armstrong, president Ray Hercules Copper Co., New York City; C. L. Baine, secretary-treasurer Boot and Shoe Workers' Union, Boston, Mass.; Albert Farwell Bemis, president National Association of Cotton Manufacturers, Boston, Mass.; M. E. Bryan, general president International United Brotherhood of Leather Workers on Horse Goods, Kansas City, Mo.; W. S. Carter, president Brotherhood of Locomotive Firemen and Enginemen, Peoria, Ill.; Harry Cohn, chairman Cloak, Suit, and Skirt Manufacturers' Association, New York City; William K. Field, president Pittsburgh Coal Co., Pittsburgh, Pa.; Felix Frankfurter, Harvard University, Cambridge, Mass.; John Golden, general president United Textile Workers of America, New York City; Daniel Guggenheim, president American Smelting &

Refining Co., New York City; Hale Holden, president Chicago, Burlington & Quincy Railroad Co., Chicago, Ill.; William L. Hutcheson, president United Brotherhood of Carpenters and Joiners, Indianapolis, Ind.; William H. Johnston, president International Association of Machinists, Washington, D. C.; Frank J. McNulty, president International Brotherhood of Electrical Workers, Springfield, Ill.; T. V. O'Connor, president International Longshoremen's Association, Buffalo, N. Y.; George Pope, president National Association of Manufacturers, Hartford, Conn.; Thomas A. Rickert, president United Garment Workers of America, New York; Joseph F. Valentine, president International Molders' Union of North America, Cincinnati, Ohio; A. O. Wharton, president railway employees' department, American Federation of Labor, Washington, D. C.; and John Williams, president Amalgamated Association of Iron, Steel, and Tin Workers, Pittsburgh, Pa.

Subcommittee on women in industry: Mrs. Borden Harriman chairman; Miss Mary Anderson, international executive board of Boot and Shoe Workers, Chicago, Ill.; Mrs. Frederick Bagley, Washington, D. C., and New York; Miss Kate Barnard, Oklahoma City, Okla.; Miss Gertrude Barnum, Riverside, Ill.; Miss Ella R. Bloor, New York City; Miss Sophonisba Breckenridge, University of Chicago, Chicago, Ill.; Miss Elizabeth Christman, secretary of Glove Workers, Chicago, Ill.; Mrs. Sara A. Conboy, Textile Workers, New York City; Miss Mary Conroy, Bookbinders, Baltimore, Md.; Miss Margaret Daly, Garment Workers, New York City; Miss Anna Fitzgerald, Chicago, Ill.; Miss Josephine Goldmark, publication section National Consumers' League, New York City; Miss Margaret Haley, Teachers' Federation, Chicago, Ill.; Dr. Alice Hamilton, Department of Labor, Chicago, Ill.; Miss Mary Haney, United Garment Workers, New York City; Miss Nell Hannan, Retail Clerks, Bellaire, Ohio; Dr. Caroline Hedges; Mrs. Josephine P. January, Ferguson, Mo.; Miss Agnes Johnson, Boot and Shoe, Chicago, Ill.; Miss Julia Lathrop, Children's Bureau, Department of Labor, Washington, D. C.; Miss Mary J. Macauley, Telegraphers, Lockport, N. Y.; Mrs. V. Everitt Macy, New York City; Miss Elizabeth Maloney, Restaurant Employees, Chicago, Ill.; Miss Mary McDowell, University of Chicago Settlement, Chicago, Ill.; Miss Mary McEnery, Bindery Women, Chicago, Ill.; Miss Gertrude N. McNally, Bureau of Engraving, Washington, D. C.; Mrs. Mary Moran, Laundry Workers, Boston, Mass.; Mrs. Henry Moskowitz, New York City; Miss Agnes Nestor, Glove Workers, Chicago, Ill.; Miss Marie L. Obenauer, Washington, D. C.; Prof. Piexotto, University of California, Berkeley, Cal.; Miss Edith Reider, International Harvester Co., Chicago, Ill.; Miss Melinda Scott, New York City; Mrs. Mary Scully, Textile Workers, New York City; Miss Emma Steghagen, Boot and Shoe, Chicago, Ill.; Mrs. Willard D. Straight, New York City; Miss Florance C. Thorne, assistant editor American Federationist, Washington, D. C.; Miss Olive Sullivan, Office Employees, Chicago, Ill.; Mrs. Lydia Trowbridge, High School Teachers' Federation, Chicago, Ill.; Mrs. Millie Trumble, Oregon Industrial Commission, Portland, Oreg.; Mrs. George Vanderbilt, head Car Industries, Washington, D. C.; and Miss Emilia Weiss, Cigarmakers, Detroit, Mich.

Subcommittee on welfare work: L. A. Coolidge, chairman Welfare Department, National Civic Federation; treasurer United Shoe Machinery Co., Boston, Mass., chairman.

Subcommittee on information and statistics: Dr. Frederick L. Hoffman, statistician, Prudential Insurance Co., Newark, N. J., chairman.

Subcommittee on press: Grant Hamilton, legislative agent, American Federation of Labor, Washington, D. C., chairman.

Subcommittee on publicity: Dr. E. T. Devine, director, New York School of Philanthropy, New York City, chairman.

Subcommittee on cost of living and domestic economy: S. Thruston Ballard, Ballard & Ballard, Louisville, Ky., chairman.

COMMITTEES OF AND COOPERATING WITH DR. MARTIN.

General medical board: Dr. Franklin H. Martin, chairman; Dr. Frank F. Simpson, vice chairman; Dr. Frederic A. Besley, professor of surgery, Northwestern University, secretary; Surg. Gen. William C. Gorgas, United States Army; Surg. Gen. William C. Braisted, United States Navy; Surg. Gen. Rupert Blue, United States Public Health Service, president American Medical Association; Col. Jefferson R. Kean, director of military relief, American Red Cross; Dr. William H. Welch, professor of pathology, Johns Hopkins University, Baltimore; Dr. William J. Mayo, Rochester, Minn.; Dr. Victor C. Vaughan, dean of University of Michigan, Ann Arbor, Mich.; Dr. Herman M Biggs, State commissioner of health, New York City; Dr. George Brewer, professor of surgery, University of New York, New York City; Dr. John Young Brown, professor of surgery, University of St. Louis, St. Louis; Dr. George W. Crile, professor of surgery, Western Reserve University, Cleveland; Dr. Edward P. Davis, professor of obstetrics, Jefferson Medical College, Philadelphia; Dr. M. T. Finney, professor of clinical surgery, Johns Hopkins University, Baltimore; Dr. Simon Flexner, director, Rockefeller Institute for Medical Research, New York; Dr. Joseph M. Flint, professor of surgery, Yale University, New Haven, Conn.; Dr. Thomas W. Huntington, professor of surgery, University of California, San Francisco, Cal.; Dr. Theodore Janeway, professor of medicine, Johns Hopkins University; Dr. Edward C. Kirk, dean of dental department, University of Pennsylvania, Philadelphia; Dr. Charles E. Kahlke, professor of surgery, Hahnemann Medical College, Chicago; Dr. W. H. G. Logan, president-elect, National Dental Association; Dr. Stuart McGuire, professor of surgery, University of Virginia, Richmond, Va.; Dr. Edward Martin, professor of surgery, University of Pennsylvania, Philadelphia; Dr. Charles H. Mayo, president-elect, American Medical Association, Rochester, Minn.; Dr. Charles H. Peck, professor of surgery, Columbia University, New York City; Mr. Earl Phelps, sanitary engineer, Washington, D. C.; Dr. Hubert A. Royster, secretary of Southern Surgical Association, Raleigh, N. C.; Dr. Sterling Ruffin, Washington, D. C.; Dr. George H. Simmons, editor Journal of American Medical Association, Chicago; Dr. Winford Smith, superintendent Johns Hopkins Hospital, Baltimore, Md.; Dr. Richard P. Strong, professor of tropical medicine, Harvard University, Boston; Dr. William B. VanLennep, professor of surgery, Hahnemann Medical College, Chicago; Dr. George Walker, Johns Hopkins University, Baltimore, Md.; Dr. W. C. Woodward, health officer of the District of Columbia, Washington, D. C.

COOPERATIVE COMMITTEES OF MANUFACTURERS.

Class 1—Pharmaceutical supplies: Chairman, Willard Ohiger, care Frederick Sterns Co., Detroit, Mich.; secretary, Frank C. Ryan, Park Davis Co., Detroit, Mich.; Charles J. Lynn, care Eli Lilly & Co., Indianapolis, Ind.; A. G. Rosengarten, care Powers, Weightman & Rosengarten, Philadelphia, Pa.; S. Norvell, 91 Fulton Street, New York.

Class 2—Surgical dressing: Chairman, Dr. H. C. Lovis, 61 Maiden Lane, New York; secretary, Henry P. Kendall, Lewis Manufacturing Co., Walpole, Mass.; F. R. Jones, Johnson & Johnson, New Brunswick, N. J.; G. T. Bauer, Bauer & Black, Chicago, Ill.; E. T. Sawtelle, Van Horn & Sawtelle, New York City; F. R. Davis, Wilford Hall Laboratories, Port Chester, N. Y.; Dr. L. L. Watters, Hospital Supply Co., New York City.

Class 3—Surgical instruments: Chairman, Charles J. Pilling, Twenty-third and Arch Streets, Philadelphia, Pa.; secretary, Alfred Littauer, Dewitt & Herz, 25 West Fifteenth Street, New York; Julius A. Pfarre, 107 Park Row, New York; John H. Douglass, 83 Pulaski Street, Brooklyn, N. Y.; Edward J. Sovatkin, 133 Flood Street, Brooklyn, N. Y.

Class 4—Dental instruments: Chairman, Frank H. Taylor, S. S. White Dental Manufacturing Co., Philadelphia, Pa.; secretary, G. L. Grier, L. D. Caulk Co., Milford, Del.; J. R. Sheppard, Dentists' Supply Co., New York; H. A. Slaight, Cleveland Dental Manufacturing Co., Cleveland, Ohio; E. E. Smith, 2332 Race Street, Philadelphia, Pa.; S. Rubin, Union Dental Instrument Manufacturing Co., Philadelphia, Pa.; C. O. Rother, Buffalo Dental Manufacturing Co.

Survey committee: H. A. Sleight, vice president Cleveland Dental Manufacturing Co., Cleveland, Ohio; H. D. Buttman, Consolidated Dental Manufacturing Co., New York City; W. L. Smith, L. S. Smith & Sons Co., Keenan Building, Pittsburgh, Pa.

Class 5—Laboratory supplies: Chairman, Arthur H. Thomas, A. H. Thomas Co., West Washington Square, Philadelphia, Pa.; secretary, W. Shewell Hoos, Kimball Glass Co., Vineland, N. J.; O. P. Amend, Eimer Amend Co., 205 Third Avenue, New York; H. N. Ott, Spencer Lens Co., Buffalo, N. Y.; L. M. Fuller, Bausch & Lomb Optical Co., Rochester, N. Y.; Wilmot V. Castle, Wilmont Castle Co., Rochester, N. Y.

Classes 6 and 9—Executive committee: Chairman, Leon L. Watters, Hospital Supply Co., New York; secretary, A. F. Brand, Kny-Scheerer Corporation, New York.

Class 6—Subcommittee on sterilizers: Leon L. Watters, chairman, Hospital Supply Co., New York; A. F. Brand, secretary, secretary Kny-Scheerer Co., New York; W. B. Underwood, Wilmot Castle Co., Rochester, N. Y.; J. E. Hall, American Sterilizer Co., Erie, Pa.

Class 7—Subcommittee on furniture: Leon L. Watters, chairman, Hospital Supply Co., New York; A. F. Brand, secretary, Kny-Scheerer Co., New York; G. Scanlan, Scanlan Morris Co., Madison, Wis.; Richard Kny, Kny-Scheerer Co., New York.

Class 8—Subcommittee on thermometers: I. Mayer, Taylor Bros., Watertown, N. Y.; A. Faitchney, Randall-Faitchney Co., Boston, Mass.; M. W. Bacton, Bacton-Dickinson Co., Rutherford,

N. J.; P. L. Brand, C. I. Taghabue Manufacturing Co., Brooklyn, N. Y., secretary.

Class 9—Subcommittee on beds and bedding: W. A. Manchee, Newark Spring Mattress Co., Newark, N. J.; John Troutstine, Greenpoint Metallic Bed Co., Brooklyn; F. A. Groffm Mesereau Metallic Bed Co.; Z. G. Simmons, Simmons Co., Kenosha, Wis.

Committee on standardization of medical and surgical supplies and equipment: Dr. Frank F. Simpson, chairman; Dr. T. W. Richards, United States Navy, secretary; Dr. G. W. Crile, Cleveland, Ohio; Dr. Harvey Cushing, Boston, Mass.; Lieut. Col. Carl R. Darnall, Washington, D. C.; Dr. Charles L. Gibson, New York City; Dr. Richard H. H. Harts, Philadelphia, Pa.; Col. Jefferson R. Keen, Washington, D. C.; Dr. Joseph A. Murphy, Washington, D. C.; Dr. Henry S. Plummer, Rochester, Minn.; Gen. W. C. Rucker, Washington, D. C.

Mr. HOLLIS. Mr. President, now that the real transportation bill has been taken up, I desire to call the attention of the Senate to the fact that the pending amendment is an amendment which was tendered by me last Monday, seeking to amend the first section of the bill. I now desire to explain the amendment and to discuss some of the terms of the bill.

The bill is primarily intended to give to the administration the power to direct what freight shall be shipped in different parts of the country. As has been stated by a member of the Council of National Defense, the bill is intended to give the Government a right to ship essentials at the expense of nonessentials; and I am sure that the Senate will wish to give the administration proper authority toward that end, for it is a fact, no matter how much we may differ as to the details that have been discussed here to-day, that we are in the midst of a very serious war, one that will tax the resources of the country both in men and in money to prosecute successfully.

The bill in section 2 deals with what is called the priority of shipments on railroads. It deals with the priority of shipments on all railroads and upon all common carriers by sea and by land. There is, however, added to the general plan for priorities of shipment section 1, which makes it a criminal offense, punishable by fine or imprisonment, for any person by physical force, threat, or intimidation to obstruct or retard interstate commerce. My amendment is designed to prevent that language from having the full effect that it would have if it were allowed to stand as it is. I will read my amendment, which is to be added at the end of section 1:

Provided, That nothing in this section shall be construed to repeal, modify, or affect either section 6 or section 20 of an act entitled "An act to supplement existing laws against unlawful restraints and monopolies and for other purposes," approved October 15, 1914.

The bill as drawn, as I have said, makes it a criminal offense to retard interstate commerce by physical force, threat, or intimidation. I have no doubt the bill was intended to mean that obstruction of interstate commerce by threat of physical force or intimidation, or through physical force, should be punished; but as it now reads any threat to create a strike on any railroad engaged in interstate commerce or anything that might be construed as an intimidation, anything in the way of refusal to trade or of boycott, or even persuasion, not of the most peaceable kind, might come within section 1 of the act. That was not intended, and it ought not to be done.

When the Sherman antitrust act was passed, it was aimed at monopolies, at combinations of capital. It was not intended to apply to organizations of laboring men to promote their welfare; but some courts saw fit to apply it in that way, and it has been so applied; therefore, when the Clayton Act was before the Senate in 1914, amendments were added to the antitrust laws providing that labor organizations and their members might pursue their legitimate objects so long as they pursued them by legitimate means; that is, not by the use of physical force.

It was further provided in section 20 of the Clayton Act that injunctions should not be issued against strikes unless they were necessary to prevent irreparable injury; and the method of making that proof clear to the court is clearly defined in the act.

Section 20 of the act also provided that there should be no injunctions against strikes by peaceable means; that there should be no injunctions against peaceful assemblage, persuasion, boycotting, refusing to patronize, and so forth. Then the section wound up with these words:

Nor shall any of the acts specified in this paragraph be construed or held to be violations of any law of the United States.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Idaho?

Mr. HOLLIS. I yield to the Senator.

Mr. BORAH. If I understand the proposed measure which we are now considering, it relates only to a time of war.

Mr. HOLLIS. That is true.

Mr. BORAH. Does not the Senator think there is some necessity for a different provision in time of war than what there would be in time of peace with reference to the subject matter which he is now discussing?

Mr. HOLLIS. I think there may well be a distinction; but unless it is intended to incorporate a provision against strikes in the bill, and unless the matter was fully considered and members of labor organizations had an opportunity to be heard, I think it ought not to be put into the bill in this form, so that there should be doubt as to what we intended to do and as to the construction that may be put upon it by the court. I understand it is not the intention to prohibit strikes, and I want language in section 1 which will not prohibit strikes by anyone.

Mr. BORAH. Mr. President——

Mr. HOLLIS. If the Senator will pardon me a moment, I desire to say that if any Senator will call the attention of the Senate to any necessity that exists during war time to give more power to prevent strikes, then we can handle the matter man fashion, and every one will have a fair chance.

Mr. BORAH. Do I understand that it was not the intention of the committee to say what the committee has said?

That on and after the approval of this act any person or persons who shall, during the war with Germany, knowingly and willfully, by physical force, threats, or intimidation, obstruct or retard or aid in obstructing or retarding, the orderly conduct or movement in the United States of interstate or foreign commerce—

I seems to me that section 1 would be practically worthless unless it means precisely what it says; in other words, we could not afford to have interstate and foreign commerce interfered with by force or threats or intimidation, regardless of who might use the force or threats or intimidation.

Mr. HOLLIS. My understanding from the committee is that section 1 was intended to apply to those outside the employ of the railroads, to interference from the outside, and not to apply to strikes legally conducted. I do not know that that expressed the thought of all the members of the committee; I did not talk to all of them; but I talked to the members of the subcommittee who drafted this bill.

Mr. TOWNSEND. Mr. President——

Mr. HOLLIS. I yield to the Senator from Michigan.

Mr. TOWNSEND. That was not my understanding, Mr. President, as a member of the committee. I was not a member of the subcommittee, but I do not recall that any such thought was suggested by the subcommittee which made this report possible.

My understanding of this bill was, as stated by the Senator from Idaho [Mr. BORAH], namely, a provision which would enable the Government to keep the railroads in operation against any force or intimidation or threats of force or intimidation if those threats were sufficient to tie up the commerce of the country. That is my understanding of it.

Mr. BORAH. Mr. President, if the bill does not mean that, then, of course, in my judgment, the first section might just as well be eliminated.

Mr. NEWLANDS. Mr. President——

Mr. HOLLIS. I yield to the Senator from Nevada.

Mr. NEWLANDS. I will state, Mr. President, on behalf of the committee, that the understanding of the committee was that at this extraordinary session the question of strike legislation, which was a prominent question at the last session and the preceding session, should not be brought up.

As to the language of section 1, so far as my individual views are concerned, I wish to say that I believe in carrying through at some time the strike legislation which was recommended by the Committee on Interstate Commerce at the last session, and that individually I should like to press it to the front at this session, but that was not the view of the committee.

Section 1 of this bill was shaped in order to prevent the tying up or the hindrance of trains moving in interstate commerce, either by physical force or by threats or intimidations. It was not intended, however, by the committee that it should affect the right of peaceful strike, the practicability and wisdom of such legislation being left to the future. Hence, when the amendment was suggested by the Senator from New Hampshire [Mr. HOLLIS] that the word "threats" should be limited to threats of physical force, and that the word "intimidation" should be limited to intimidation by physical force, it was pointed out that every purpose of the friends of organized labor was met by sections 6 and 20 of the Clayton Act, with which the Senate is familiar, and which are unaffected by section 1. The Senator from New Hampshire has expressed his willingness to be content if a provision is inserted in this section that nothing contained in it shall affect the operation of sections 6 and 20 of the Clayton Act. So the subcommittee, consisting of the Sena-

tor from Iowa [Mr. CUMMINS] and myself, assented to that amendment as clearly carrying out the intentions of the committee that nothing in this bill should affect the powers of cooperation, of organization, and of peaceful strike guaranteed by sections 6 and 20 of the Clayton Act.

Now, with reference to the limitation to the period of the war, I see no reason why section 1 should not permanently apply. I believe that the law should be so shaped as to absolutely prevent any stoppage of the circulation in the arteries of commerce; but it is the view of the committee that our legislation should be operative simply during the war. The purpose of the committee was to insure speed of legislation, to avoid contests and delays that were unnecessary, and to create the powers of speeding the traffic of this country during the war. Those were the main purposes of this bill.

I wish to state, Mr. President, most emphatically that I favor in the future making section 1 permanent legislation, and I favor in the future legislation that will give to the railway brotherhoods a fair tribunal, in which labor disputes can be adjusted, and in the same piece of legislation absolutely staying during the period of investigation and award, and for a reasonable time thereafter, the power of strikes. But I yielded to the sentiment of the committee—the majority of the committee, at least—which was not in favor of opening up these controversies at this time, when the brotherhoods of the country are showing the utmost loyalty and when their leaders are united with the great Council of National Defense in making the prosecution of the war as thorough, as rapid, and as efficient as possible.

Mr. BORAH. Mr. President, if I may ask a question of the Senator, I have no doubt the brotherhoods are showing the utmost loyalty and will cooperate with the Government and with the railroads; I can not imagine who is not showing the utmost loyalty or to whom this law would apply at all. If it is to be assumed that it would apply to anyone, it would apply to one class of citizens just as much as to another. Why assume, in view of the fact that the brotherhoods are displaying their loyalty, a condition of affairs in which they might not display their loyalty and in which they might desire to strike and to interfere with interstate commerce? How does the brotherhood get into this at all? Here is a war measure, an emergency measure, providing against interfering with commerce by anybody under any circumstances. Why do you single out the brotherhood, or anybody else, and say that perhaps they may want to interfere?

Mr. HOLLIS. There is exactly the trouble, Mr. President.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Iowa?

Mr. HOLLIS. If the Senator will pardon me, I will yield in a moment.

Out of the many millions of wage earners in the country the railroad brotherhoods, if this language stands, are singled out as the only ones to be made criminals in case they do go out on strike. That is a most excellent reason why they should not be covered by this provision.

Mr. BORAH. The brotherhoods will not be the only ones, because anyone else might interfere, if they so desired, by force or threats or intimidation with interstate commerce.

Mr. HOLLIS. But they can not do it by strike, and the brotherhoods can not do it in any way except by strike.

Mr. BORAH. There is no reference here to strikes——

Mr. HOLLIS. That is the trouble.

Mr. BORAH. Nor to brotherhoods nor to anybody else. It is a general reference against threats, against intimidation, against physical force. It applies to John Jones as well as to John Smith, one of whom may be a member of a brotherhood and the other not.

Mr. HOLLIS. Mr. President, the Senator is entirely mistaken in that.

Mr. CUMMINS. Mr. President——

Mr. HOLLIS. I yield to the Senator from Iowa and will answer the Senator from Idaho later.

Mr. CUMMINS. Mr. President, it seems to me that the argument is assuming something which, from my standpoint, has not been established. It is very difficult to give the sentiment of a committee upon a matter which has not been directly voted upon in the committee, and I think that every member of the committee must necessarily speak for himself rather than for the committee as a whole. From that point of view, I may be permitted to say, if the Senator from New Hampshire will allow me, that I did not believe that section 1 ought to be in the bill at all. It has no relation whatever to the subject matter which was brought to the attention of the chairman of the committee by the President and which was thought of sufficient importance to require immediate legislation, but when section 1 found its way into the bill, there arose the inquiry naturally, Does it prohibit a peaceful strike? It seems to be assumed here that we must have the amendment offered by the Senator from New Hampshire—and I am entirely in sympathy with that amendment, I will say in passing—in order to relieve railway men of the prohibition against a peaceful strike. I do not so agree. Without the amendment of the Senator from New Hampshire, railway men will have the right to strike; that is, to leave peacefully in concert the employment in which they have been engaged.

Mr. BORAH. I do not disagree with the Senator at all about that.

Mr. CUMMINS. That is the position I have taken all the while, that the statement by union men that at a certain time they will leave a certain employ is neither a threat nor is it intimidation. The "threat" that is provided against here is the threat against a man who proposes himself to engage in the operation of a railway or a carrier doing interstate commerce, and that is equally true of the word "intimidation." It was my opinion, therefore—and I think it was the opinion of a majority of the committee—that in prohibiting physical force and threats and intimidation so far as either might obstruct interstate commerce, they were not prohibiting nor making criminal the action of union men in peacefully quitting employment; but when the question came before the Senate, the Senator from New Hampshire, with a very proper motive in mind, sought to guard against the possibility of this prohibition being construed to be a command against a peaceful strike, and when that suggestion was made there was one way in which to quiet that fear, as it seemed to me, and that was to preserve to the union men the rights and privileges which have been assured to them in the Clayton Act.

Section 20 of the Clayton Act does not give a union man the right to interfere by either physical force or threat or intimidation so as to obstruct commerce among the States; and the amendment offered by the Senator from New Hampshire is simply an illustration of a thing we do every day here, and that is, to "make assurance double sure" by removing all doubt with regard to the operation of the act we are about to pass. I hope the amendment will be adopted, although I do not think it is at all necessary to secure the result the Senator from New Hampshire has in mind.

Mr. BORAH. I should like to ask the Senator from New Hampshire a question.

Mr. HOLLIS. I am making by proxy a much better speech than I could have made myself; but I should like to try my hand if I can get an opportunity.

Mr. BORAH. Very well; I will not interrupt the Senator.

Mr. HOLLIS. The discussion we have already had has gone far enough to show that this ought to be made exceedingly clear, because here is a new enactment giving to the courts the right to send a man to jail if he does something that is defined in the act and in language which may be taken by some courts to cover a peaceful strike. I am certain that if the act is left as it is there will be found railroad attorneys who will seek to obtain indictments against men for such action. I talked to a railroad attorney within the last week, a very prominent one, who said to me, "I suppose you understand if your amendment is adopted it will leave open to the railroad men the right to boycott and refuse to patronize and to use moral suasion just as is allowed under the Clayton Act?" I replied, "Yes; that is exactly the intention, and that is the way it ought to be." I am certain that the railroad attorneys hope that, if this amendment is not adopted, they will be able to hale before a criminal court the head of any brotherhood who says that he will advise the men to leave on strike if the requests or the terms of the union are not met.

Therefore I think it should be very carefully guarded, and it is the intention of the committee to guard it, and they do not intend it to mean any more than it will mean after this amendment is adopted, if it is adopted.

I say that it is not right at this time to single out the railroad brotherhoods, who under great provocation have behaved remarkably well all this past winter and spring, and pass a criminal law that will apply to them, and them alone, because they are the only ones who can strike on a railroad. If anyone else attempts to interfere with the railroad it is interference from outside, and this act will apply to them. Now, if it is the intention of the Senator——

Mr. BORAH. Mr. President——

Mr. HOLLIS. I yield to the Senator from Idaho.

Mr. BORAH. I want to ask the Senator a question, because it may be that if I understand thoroughly what is intended

here and what will be covered I shall not feel about it as I now do.

Suppose that the brotherhoods—as they have been mentioned here—should go upon a peaceful strike, should quit, as I think they have a right to do and you can not under our Constitution prevent them from doing. But suppose that after having quit the service of the company they indulge in threats, intimidations, and the use of physical force toward those who may be called in by others to operate the roads. Would they be permitted to do that under this proposed measure?

Mr. HOLLIS. Uunder the amendment? I think not. I do not think they would be permitted to make any threats of physical force under the Clayton Act.

Mr. BORAH. Then, as I understand, if they should indulge in a peaceful strike and leave their work it is the Senator's opinion that this inhibition against threats, intimidation, and physical force would apply to them the same as anybody else?

Mr. HOLLIS. Not at all. I did not state that. I said that before they leave, the threat that they would leave would come under the terms of this section as it stands now.

Mr. BORAH. Yes; but I think the Senator misunderstood me. Suppose they have left. Suppose the strike——

Mr. HOLLIS. I am not talking about their having left. I am talking about before they leave. That is what I want to cover now. After they have left, a very different situation arises.

Mr. BORAH. Exactly. That is what I thought; the Senator misunderstood me. After they have left, they would not be permitted to indulge in threats, physical force or intimidation, any more than any other citizen?

Mr. HOLLIS. No; I say not; but they would not want to. There would not be any point in it, of course.

Mr. BORAH. I think myself they would not want to.

Mr. HOLLIS. I think there would be no point in it.

Mr. CUMMINS. Mr. President, section 20 of the Clayton Act does not permit them to indulge in threats, or intimidation, or physical force.

Mr. BORAH. I think that is correct, as I remember the section, although I think the Senator from Iowa and I disagreed as to the meaning of section 6 in the past.

Mr. HOLLIS. Mr. President, the objection I have to raising this question of strike legislation at this time is that it has nothing whatever to do with this priority-in-transportation bill. The administration did not ask for it. I do not know who drew the section, but I might suspect. It ought not to be here. If it is allowed to remain in its present form, it will imperil the passage of the bill, because, as I view it, no friend of organized labor could vote for this bill unless section 1 is amended. I am very anxious to vote for the bill and to have it become effective as soon as possible; and I shall try to express, in what I have to say, the views of those who are friendly to the bill, and explain why I want to vote for it.

In the first place, there is at present quite a satisfactory condition existing in railroad transportation so far as priorities are concerned. There is a committee on railroad transportation attached to the Council of National Defense. It is a committee of railroad presidents and other railroad officials here in Washington cooperating with the administration in a very patriotic and efficient way to bring about the transportation of essentials at the expense of nonessentials; but there is discrimination. Every time they do it, and say to a road that wants to carry furniture or automobiles, "You must carry coal or iron; you must carry steel, so that we may build ships," they are violating the terms of the interstate-commerce act, which says there shall be no discrimination. Everyone is entitled to have an equal opportunity with every other one to have his goods carried on a railroad. Moreover, we are violating the terms of the State laws and some municipal laws to the same effect; and the railroads themselves now ask for protection so that what they are doing will be legal, and so that they can not be sued or perhaps prosecuted under the terms of the interstate-commerce act for what they are doing very patriotically and very loyally.

It is provided in this bill that if railroads are required to ship certain goods or certain classes of goods instead of others that may be less remunerative, they shall be entitled to compensation from the Government for them. Now, that did not appeal to me at first. We can not be too flabby about the way we conduct this war. We have got to require things of many people that we do not pay for; and I thought that the railroads, if they were required to do things in the national defense that were less profitable to them than others, did not come under the fifth amendment of the Constitution, which provides that no private property shall be taken for public use without just compensation.

I should like to refer to the case of an embargo. Assume that the President should put an embargo on grain. That would have a tendency to reduce the price of grain. The farmers might well complain and say, "Instead of selling our grain at $3, by the action of the Government we have got to sell it at $2, and therefore the Government ought to give us just compensation for that." But all of us know that we could not allow compensation for an interference with the right to export goods. The country would not stand it, and it is not intended that we should. Placing an embargo is not taking the property of the farmers. It is making what they have less valuable, but it is a speculative damage that can not be compensated for in courts of law or other tribunals.

Then I took the case of the transportation of troops. Now, no one would claim that a railroad should be obliged to transport troops without receiving adequate compensation for it. That is because what the railroad produces and sells is transportation. When we take the railroads' transportation—that is, when we take from them facilities for which they are entitled to charge—we are taking away their property; we are taking away the only thing from which they can get a revenue. Therefore I have come to the conclusion that it is entirely proper, in case we direct a railroad to carry freight that is unremunerative when freight that is in the remunerative class is offered, that we should pay them whatever loss and damage they fairly suffer from that operation.

It is also provided in the bill that in certain cases the administration may require a division of earnings between railroads. That is to cover a case like this: Some railroads are so constituted that they can not carry loaded cars with as good effect as some other railroad in the vicinity, but the first railroad may be adequately equipped to return empty cars. Now, the return of empty cars is not profitable. The carrying of loaded cars is profitable. In a situation of that kind, where one railroad is discriminated against in favor of another, the administration, through whomsoever the administration acts, is to be given authority to order an equitable division of the earnings.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER (Mr. KIRBY in the chair). Does the Senator from New Hampshire yield to the Senator from Connecticut?

Mr. HOLLIS. I yield.

Mr. BRANDEGEE. I have just come on the floor, and I do not know whether or not the Senator has referred to the point concerning which I am about to inquire. I notice, however, on pages 4 and 5 of the bill, that provision is made for compensating the railroads for any damage they may sustain in the carrying out of any preferential orders issued by the President. I do not know whether or not the Senator has been concerned in the preparation of this bill, but, at any rate, he may be able to answer my question.

If it is right to compensate the railroads for damage sustained by carrying out an order issued practically in contravention of the natural law of trade or commerce, why should not provision be made for compensating other citizens of the country? For instance, if a man has a contract to erect a large building, and his lumber and his building materials are en route, and he is under a contract with a penalty attached for overtime after the date of delivery, and the President of the United States steps in and orders other commodities to be transported over that road, which results in great delay and expense to this private citizen, it seems to me that if the railroad is to be compensated for loss in obeying the President's orders, the private citizen ought to have some remedy. I wondered if the Senator had considered that feature.

Mr. HOLLIS. I have considered it, and somewhat carefully. There are two branches to it. The first is whether we have a constitutional duty to perform in regard to it, and the second is as to the expediency. Now, I take it that we are not obliged to allow compensation for taking away a privilege of that kind, because the Constitution did not mean, in taking private property, that it should cover cases of taking away a privilege to transport. I think we are not required by the Constitution to do it.

Mr. BRANDEGEE. Mr. President, I did not mean to suggest the constitutional feature at all.

Mr. HOLLIS. That is the first part of it. The second part of it is whether we should do it as a matter of justice and discretion.

Mr. BRANDEGEE. I did not ask that, even; but I say, Why prefer the railroads and compensate them and not compensate the private citizen?

Mr. HOLLIS. I explained before the Senator came in that the reason why we should compensate the railroads is because the only thing the railroads have to sell is transportation, just

transportation; and when we take away the right to earn a fair and just amount for transporting freight and passengers, we have taken away their only means of getting an income, and we are actually taking away their property.

Now, coming to the discretion of it, the speculative damages that might result to a private citizen because he could not fulfill the contract are so remote that they could not be ascertained by a court. It is recognized by all the authorities that speculative damages of that kind can not be recovered from a private citizen; and I feel myself that we would be getting into such a wide field that it would not be good policy for the Government to try to follow it to that extent.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Nebraska?

Mr. HOLLIS. I yield.

Mr. NORRIS. I should like to ask the Senator, on that point, this question:

Suppose, by order of the President, a railroad should be required to transport troops and munitions of war for a certain length of time and afterwards they were able to show that if they had been permitted to carry coal instead of troops they would have made more money. Would that be a case where they would be allowed to come in and show damages and obtain them?

Mr. HOLLIS. I understand not. Where goods are taken for a direct governmental use, such as the transportation of troops, there is to be an amount fixed by the Interstate Commerce Commission, and that is compensation in full. The bill does not apply to cases of that sort. Damages are to be given only to a railroad that is ordered to take one class of freight instead of another class of freight. It does not extend to the transportation of troops.

Mr. NORRIS. Suppose, then, that the railroads were ordered to carry wheat, and they could show that they would have made more money if they had been allowed to carry coal, and they were equipped to carry coal. Could they get damages in that case?

Mr. HOLLIS. Yes; the bill expressly covers a case of that kind.

Mr. NORRIS. Does not the bill in the first place provide that they could get pay for carrying wheat at the regular rate?

Mr. HOLLIS. Yes.

Mr. NORRIS. Then, it is an indirect method, is it not, of increasing the rate of the railroad over what other railroads could get for the transportation of that particular commodity?

Mr. HOLLIS. Yes; it is; and I feel that it should not be done unless there is a real public exigency. That is what I was going on to explain—what the public exigency is and how far I feel we ought to go in making discriminations of this sort for which we have to pay in cash. Senators may well differ on that point.

I should like now to give some illustrations.

Mr. NORRIS. While I am on my feet, may I ask the Senator a question in regard to section 1, as to his construction of it?

Mr. HOLLIS. With pleasure.

Mr. NORRIS. It is a little bit different from the particular question I have asked the Senator.

On page 2 of the bill, beginning after the word "imprisonment," in line 5, is this language:

> And the President of the United States is hereby authorized, whenever in his judgment the public interest requires, to employ the armed forces of the United States to prevent any such obstruction or retardation of the passage of the mail—

And so forth.

Now, up to the point where I commenced to read, there is no doubt but that the law applies only during the war with Germany. I wanted to ask the Senator whether that part of section 1, commencing where I commenced to read, likewise applies only to the war with Germany, or will it be permanent law if enacted as it stands now?

Mr. HOLLIS. I think there is no doubt that that is limited to the duration of the war for this reason: The part the Senator has read refers to "such obstruction or retardation." That refers back to the retardation and obstruction defined in the preceding paragraph, which is retardation and obstruction during the course of the war; so I think it would clearly cover only the war.

Mr. NORRIS. But the Senator will note also that section 1, up to the place where I commenced to read, makes criminal certain things during the war and provides for a criminal penalty, and then it starts out and gives certain authority to the President, but it has no relation whatever to the real purpose and object of the section up to that point—that is, the criminal part of it. It seemed to me that there was a serious question, at least, whether the latter part of section 1 would not be permanent law if it were enacted in its present form.

Mr. HOLLIS. I am quite clear it is otherwise. Of course, that could be very easily fixed by inserting the proper words at that point.

Mr. NORRIS. It was not the intention of the committee to make it permanent law, was it?

Mr. HOLLIS. So they informed me.

Mr. NORRIS. I understood that the Senator had been prominent in drawing the bill.

Mr. HOLLIS. No; I was not. I had nothing to do with drawing the bill. I talked with them, however, and I understood them in that way.

Mr. NORRIS. Then I was mistaken.

Mr. JONES of Washington. Mr. President, in connection with the other phase of the bill which the Senator was discussing, I should like to ask him a question or two before he proceeds. I am going to refer to a particular situation which has been brought to my attention.

In one section of my State we raise a great deal of perishable fruit which must be disposed of very quickly. The officials of the railroads have already advised our people that the probabilities are that they will not be permitted to furnish transportation facilities for taking care of this perishable fruit. I think myself that that is a very injudicious thing to do at this time. I think special efforts should be made to take care of particular situations like that in particular localities. Nevertheless, that is what they have done.

If the cars of the Northern Pacific Railway, for instance, that ordinarily would be used in transporting the berries and things like that of our section, are diverted to some other transportation purpose that would bring them in less return than the transportation of these fruits, would the railroad be entitled, under the terms of this bill, to recover the difference?

Mr. HOLLIS. It is so stated in the bill; yes.

Mr. JONES of Washington. And yet the man who loses his crop absolutely by reason of not getting any facilities for transporting and taking care of it would have no claim of any kind against the Government?

Mr. HOLLIS. That is my understanding.

Mr. JONES of Washington. I want to ask the Senator further with reference to the particular language of section 2. The language of section 2 is:

> That during the continuance of the war in which the United States is now engaged the President is authorized, whenever in his judgment such action is necessary to the public security and defense—

To do certain things. Now, in the Senator's opinion, what do those terms signify? In other words, what I want to ask is this: Could not the President say under that language that the refrigerator cars of the Northern Pacific that have been ordinarily used in the transportation of fruits should be taken from that and used in the transportation of beef into the city of Chicago, for instance, for consumption there? Does not the Senator think that that could be done?

Mr. HOLLIS. Yes; I so understand it, and I think it is absolutely necessary. We are engaged in the war, and it is the first duty of the administration and the Congress to see that we win the war, of course, doing as little injury to private persons as is compatible with winning the war. Now, it is well known that the transportation facilities of this country are not adequate to do the business that the country is trying to do at this time. We have not cars enough, we have not locomotives enough, we have not tracks enough, we have not ships enough. Some one has got to be given the authority to discriminate, because they can not all be treated alike. They can not all get their work done. There will be certain industries in my own State that will be complaining bitterly because they are discriminated against. There will be others in the Senator's State. There will be some, no matter what is done, that will think they have not been fairly treated. It is a war measure. I should not be in favor of permitting it at any other time except in war; but I realize, as the Senator does, that the people must be fed, they must be clothed, they must be warmed, we must feed our allies, we must furnish transportation to our troops, we must build ships, we must get in munitions of war; and we have got to subordinate private comfort and luxury and convenience and even profits to winning the war. That is the excuse for the bill, as I understand it.

Mr. JONES of Washington. I think I agree fully with the suggestions of the Senator; but I remember that when the espionage bill was up, and the embargo proposition was before the Senate, it had in it, my recollection is, language something like this: "Whenever the President deems it to the interest of the national defense or public welfare," he may do certain things. Those words "public welfare" were stricken out be-

cause it was urged that under that the President would have authority to impose embargoes in the interest of some section or some industry, or something of that sort; that by cutting them out we were limiting his right to impose these embargoes to some definite proposition for the defense of the country; and so it struck me that possibly there was some significance or some meaning of that kind in the language here, "the public security," not "public welfare" but "public security and defense." Therefore I wanted to get the views of the Senator with reference to that.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER (Mr. KING in the chair). Does the Senator from New Hampshire yield to the Senator from Iowa?

Mr. HOLLIS. I yield to the Senator from Iowa.

Mr. CUMMINS. I want to say that as a member of the committee that proposed this bill I do not quite agree with the Senator from New Hampshire in all the responses he made to the Senator from Washington. However, that may come later; but I want the Senator from Washington and every other Senator who is here to remember that this is a mere alternative. We must either give the President this power or some equivalent power, or take possession of the railroads. One or the other of those two things must be done if the war is to be carried on successfully; and I think it was with the view of the committee that it was better to give the President the power that is here proposed than to attempt to take possession of the vast railway property of the United States and attempt to organize it for operation.

I hope that Senators, as they come to review the proposed legislation, will have those alternatives in mind.

Mr. JONES of Washington. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Washington?

Mr. HOLLIS. I do.

Mr. JONES of Washington. I do not want the Senator from New Hampshire or the Senator from Iowa to think from my questions that I am opposed to this bill or to the purposes of it. I am simply asking questions to get at the real meaning and intention of the committee. Personally, I am inclined to think that it is really essential that we should vest these powers in the President, however much we may regret to have to do so, in the conditions; and I am not disposed to delay the consideration of the bill at all. I am willing to vote upon it now, believing that the committee have given it the most careful consideration, and that they simply deem this absolutely necessary on account of the condition in which we are now placed. But I did want to get at the meaning of these terms, and I wondered whether there was any peculiar meaning to be attached to the words "public security and defense."

Mr. HOLLIS. I am not a member of the committee, and I am not qualified to express their views.

Mr. JONES of Washington. I thought the Senator was. Everybody was asking him about the different terms here, and I just assumed that the Senator was a member of the committee.

Mr. HOLLIS. I am trying to show what a good bill it is, and that it is too bad to embarrass the chances of its passage by putting on section 1, unless it is amended, because I can not vote for it unless it is.

The essentials that the railroads and the administration want to carry are largely coal for the use of the Army and the Navy, coal to be used in the manufacture of ships and munitions of war, ore as a base for ships and munitions, grain for the United States and for the allies, and iron, steel, and copper for munitions. Those are the fields they are now covering. They are distributing the cars of the country, ordering one railroad to deliver so many hundred cars to another railroad because those cars, in their judgment, are needed more on the other road than on the road that has possession of them. I will put in the RECORD, without reading, an order that is given by the Council of National Defense with reference to the use of cars.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The matter referred to is as follows:

[General Order No. C. S. 3.]

THE AMERICAN RAILWAY ASSOCIATION,
SPECIAL COMMITTEE ON NATIONAL DEFENSE,
Washington, D. C., June 1, 1917.

To all railroads:

The executive committee of the Special Committee on National Defense, after continued and earnest consideration of the lake coal and ore problem, and after taking advice from all parties interested, in order to insure a sufficient supply of cars to meet the demand of the shipments of lake coal and ore has decided that hopper or self-clearing cars of certain ownerships should be confined to that service.

To accomplish this purpose and in accordance with this policy you are hereby directed that all hopper or so-called self-clearing cars belonging to the railroads named below, which roads make deliveries of coal at lake ports, must, until further notice, when released from original load, be immediately returned empty by the most direct route to the home road:

Baltimore & Ohio Railroad; Bessemer & Lake Erie Railroad; Cincinnati, Hamilton & Dayton Railway; Erie Railroad; Hocking Valley Railway; New York Central Railroad; Pennsylvania Lines (Pennsylvania system cars); Toledo & Ohio Central Railway; Wheeling & Lake Erie Railway.

Emergency rule 1 of General Order CS–1, dated April 26, 1917, is hereby modified as and in accordance with the above.

THE COMMISSION ON CAR SERVICE.

Mr. HOLLIS. Of course munitions are the most important thing the country is trying to supply, and the railroads wish to order coal from certain parts of the country to certain munition plants. Cars must be assigned to special districts for steel and for coal. New England must get its coal; the great Northwest must get its coal, and there must be food for France. The domestic dealers are beginning to object, and they will soon be objecting much more than they have so far; and the railroads must have not only the physical power to make these preferences but they must be given the legal authority, so that they will not be liable to prosecution for what they have done.

Of course the railroads would prefer to carry the nonessentials, because automobiles and higher class goods, so called, pay better freight rates than coal and iron and the lower class goods; but it should be noted that section 2 applies not only to interstate commerce but applies to all carriers by rail and by water. I can not see how section 2 will be constitutional unless this is done as a war measure; and that leads me to consider whether we have a right to order all carriers by rail and by water, whether engaged in interstate commerce or not, to yield to priority of shipment. I wish to put into the RECORD at this time, in a very brief form, the provisions of the Constitution which I think do give authority to Congress to pass this law.

If there were no provisions in the Constitution, I should believe that Congress had a right to pass the laws as defense measures, under the general power of the Nation to secure its self-preservation; but in the very preamble of the Constitution it is provided that the objects for which the Constitution is adopted are—

To form a more perfect Union, establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity.

Then, in Article I, section 8, the very first power given to Congress to pass laws is the power to collect taxes, to pay the debts of the Government, and provide for the common defense and general welfare.

I wish to read into the RECORD at this point the provisions in the Constitution regarding the powers of Congress under which we are authorized to conduct war:

Article I, section 8, clause 11: Congress may institute war by declaring it against an enemy. The President alone can not do so. Also, Congress may make laws concerning captures on land as well as on water.

Article I, section 8, clause 12: Congress may raise and support armies and provide and maintain a navy.

Article I, section 8, clause 14: Congress may make laws for the government of land and naval forces.

Article I, section 8, clause 15: Congress may provide for calling forth the militia to execute the laws of the Union, suppress insurrection, and repel invasion.

Article I, section 8, clause 16: And may provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States.

And then at the very end of section 8, Article I, it is provided that Congress may—

make all laws which shall be necessary and proper for carrying into execution the foregoing powers and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

The war clause has not been frequently construed by our Supreme Court. There is no case that comes much nearer than the old case of McCulloch *v.* State of Maryland (4 Wheaton, 413), and in that opinion the principle is laid down—and it has never been successfully controverted—as follows:

If the end be legitimate and within the scope of the Constitution, all means which are appropriate and plainly adapted to this end and which are not prohibited by the Constitution are lawful.

And in the Legal Tender cases, Hepburn *v.* Griswold (8 Wallace, 603); Knox *v.* Lee, and Parker *v.* Davis (12 Wallace, 457), the same idea is expounded more at length, for the Legal Tender cases were passed as a war measure.

In conclusion, the railroad officials are performing patriotic services. The facilities of the railroads are at present inadequate to perform all the business of the country. There must be discrimination against some classes of traffic, and the discrimination should be applied in order to help the Government win the war. The railroads are in need of compensation for all the damages which they may suffer in this regard, for the railroads are now inadequately equipped for doing the business of the country because of the lack of sufficient revenue. I

myself should prefer to give them compensation for losses suffered because of priorities in shipment, rather than to give them a general increase of freight rates, because in the first instance they have, in my opinion, a clear right to it; while under an advance in rates they may not have a clear right.

I think practically all of the railroad officials who are now doing the country the service of allotting transportation facilities in the best way opposed the election of President Wilson. I think, almost without exception, these men are Republicans, but they are backing the administration at this time loyally and patriotically. They come to Congress and ask that the administration be given the authority to perform the acts which are now actually being performed; and I can see no excuse for those who are Democrats and who advocated the election of President Wilson opposing giving him the authority that is necessary to conduct this war successfully, and particularly to give him the authority that he needs in transportation matters. Therefore, because I believe the second section of the bill is most valuable and that it should become law, I sincerely hope the first section will be so amended that those who share my views may be able to vote for the entire bill.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Hampshire.

Mr. SMITH of Michigan. Does not the Senator think we ought to have a quorum present?

Mr. NEWLANDS. I do not think it is necessary.

The PRESIDING OFFICER. The absence of a quorum is suggested——

Mr. ROBINSON. Mr. President, the Senator from Michigan has not suggested the absence of a quorum, if the Chair will pardon me.

The PRESIDING OFFICER. The Chair misunderstood the Senator from Michigan.

Mr. ROBINSON. The Senator from Michigan merely made the inquiry.

Mr. SMITH of Michigan. If there is no disposition to have a quorum present, I shall not insist upon it.

Mr. NEWLANDS. I ask for a vote, Mr. President.

Mr. BRANDEGEE. Mr. President, I believe it was last Saturday that the Senator from New Hampshire offered his amendment providing substantially that nothing in the bill should be construed to alter or in any wise modify or repeal sections 6 and 20 of the so-called Clayton Act. In order to be informed about the matter, I asked at that time that sections 6 and 20 of the Clayton Act be printed in the RECORD, which was done.

I am unable to perceive the necessity for the Senator's amendment, because, as I read the bill and sections 6 and 20 of the Clayton Act, there can be, in my opinion, no incompatibility between the two sections of the Clayton Act and the provisions of this bill. I think it is a perfectly irrelevant amendment. I think it is equally as irrelevant as though the amendment provided that nothing in this bill should be construed to repeal the Sherman antitrust law. However, I have no objection to its adoption if it will serve to soothe or allay the apprehension that may exist in the mind of anybody about it. When I made my inquiry last Saturday, as I said at the time, I did not do so because I was opposed to the amendment, but because I did not understand the necessity for it.

Mr. BORAH. Mr. President, after examining this amendment and section 6 and section 20 of the Clayton Act, I have arrived at the same conclusion as that expressed by the Senator from Iowa [Mr. CUMMINS] and also by the Senator from Connecticut [Mr. BRANDEGEE] that the amendment does not really affect the situation, if I may say so, one way or the other. It may be that some attorney might contend for a construction such as the Senator from New Hampshire [Mr. HOLLIS] has suggested; but I do not see how any construction could be placed upon the proposed bill which would in anywise conflict with section 6 or section 20 of the Clayton Act. Section 6 of that act reads:

SEC. 6. That the labor of a human being is not a commodity or article of commerce. Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor, agricultural, or horticultural organizations instituted for the purposes of mutual help and not having capital stock or conducted for profit, or to forbid or restrain individual members of such organizations from lawfully carrying out the legitimate objects thereof; nor shall such organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade under the antitrust laws.

Section 20 of the Clayton Act reads as follows:

SEC. 20. That no restraining order or injunction shall be granted by any court of the United States, or a judge or the judges thereof, in any case between an employer and employees, or between employers and employees, or between employees, or between persons employed and persons seeking employment, involving or growing out of a dispute concerning terms or conditions of employment, unless necessary to prevent irreparable injury to property or to a property right of the party making the application, for which injury there is no adequate remedy at law, and such property or property right must be described with particularity in the application, which must be in writing and sworn to by the applicant or by his agent or attorney.

The remainder of the section I will not read, but will ask to have it inserted in the RECORD, without taking the time of the Senate to read it.

The PRESIDING OFFICER. Without objection, it is so ordered.

The remainder of section 20 of the Clayton Act is as follows:

And no such restraining order or injunction shall prohibit any person or persons, whether singly or in concert, from terminating any relation of employment or from ceasing to perform any work or labor, or from recommending, advising, or persuading others by peaceful means so to do; or from attending at any place where any such person or persons may lawfully be, for the purpose of peacefully obtaining or communicating information, or from peacefully persuading any person to work or to abstain from working; or from ceasing to patronize or to employ any party in such dispute or from recommending, advising, or persuading others by peaceful and lawful means so to do; or from paying or giving to or withholding from any person engaged in such dispute any strike benefits or other moneys or things of value; or from peaceably assembling in a lawful manner and for lawful purposes, or from doing any act or thing which might lawfully be done in the absence of such dispute by any party thereto; nor shall any of the acts specified in this paragraph be considered or held to be violations of any law of the United States.

Mr. BORAH. The provision of this bill which is supposed to conflict with that provision of the law is as follows:

That on and after the approval of this act any person or persons who shall, during the war with Germany, knowingly and willfully, by physical force, threats, or intimidation, obstruct or retard, or aid in obstructing or retarding, the orderly conduct or movement in the United States of interstate or foreign commerce, or the orderly make-up or movement or disposition of any train, or the movement or disposition of any locomotive, car, or other vehicle on any railroad in the United States engaged in interstate or foreign commerce shall be deemed guilty of a misdemeanor—

And so forth.

I do not see, Mr. President, any conflict between the proposed measure and the Clayton Act. I do not think this amendment if adopted will change the bill in any respect so far as its being or not being in conflict with the Clayton Act. I shall not, therefore, detain the Senate in discussing what seems to me a wholly immaterial amendment.

The VICE PRESIDENT. The pending question is on the amendment of the Senator from New Hampshire.

The amendment was agreed to.

Mr. CUMMINS. Mr. President, I now offer the amendment which I presented some days ago, and which concerns the last five lines of the bill. I should be glad to have the amendment stated if it is at the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 5, line 20, after the word "direction," it is proposed to insert the words "for preference or priority," and on the same page, line 22, to strike out the words "on account of any such action" and insert the words "by reason of giving preference or priority in compliance with such order or direction."

Mr. CUMMINS. Mr. President, just a word of explanation. I am somewhat responsible for the language of the bill as it is drawn, but upon suggestion and reflection I have reached the conclusion that it might be a little clearer. It was thought by some Senators that the bill as it is might result in exempting from civil or criminal pains, penalties, obligations, or liabilities in cases other than those in which the carrier gave preference or priority. I do not think that such a construction would be put upon the language, but in order to put it beyond any controversy, it being the intention of the committee that the exemption should be confined to the consequences of giving the priority or preference as directed by the President, I have offered the amendment which has just been read. It simply means that if a common carrier, in obedience to a direction of the President or the tribunal that he appoints as his representative, shall give preference or priority to certain shipments or certain kinds of transportation, the carrier shall not be held liable to the law because it obeys the order of the President and does give priority or preference to such shipments or transportation. The obvious justice or equity of the provision needs no suggestion on my part.

The VICE PRESIDENT. The question is on the amendment of the Senator from Iowa.

Mr. SMITH of Georgia. Mr. President, I have just come into the Chamber from the Finance Committee, and I should like to hear the amendment stated.

The VICE PRESIDENT. The Secretary will again state the amendment.

The Secretary again stated the amendment.

The VICE PRESIDENT. The question is on the amendment of the Senator from Iowa.

The amendment was agreed to.

Mr. SMITH of Georgia. Mr. President, I grant that there is a condition which, perhaps, requires some legislation, but I do not grant that there is a condition that justifies practical despotism in the United States. I think we go the length under our Constitution when we make one man Commander in Chief of the Army and Navy. I am utterly opposed to legislation which adds to the unrestricted power of one man. We may be satisfied with it now because we have such confidence in the man who fills the place. I might be willing for one particular man to have all these powers, but to give the powers of practical despotism to one man becomes dangerous for future time. The precedent will be followed hereafter, and each time it is followed the probabilities are that an enlargement of the disregard of public rights will be the consequence. If I had my way I would amend the Constitution of the United States and put the command of the Army and Navy in the hands of a military board, and not allow one man to rule even the Army and the Navy. I believe it would be better for the country as a permanent proposition. I am not opposing this measure from the standpoint of opposition to the present President exercising the power, although I do not think he or anybody else has the knowledge needed for all the power that it is proposed to lodge in him. Now, let us see what this bill does.

Mr. CUMMINS. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Iowa?

Mr. SMITH of Georgia. I do.

Mr. CUMMINS. I did not clearly understand the Senator from Georgia. May I ask if he would favor the bill if it were amended so that it would terminate at the close of the present administration?

Mr. SMITH of Georgia. I suppose, of course, that it contains that provision. I would not favor giving any one man this power.

Mr. CUMMINS. I thought the Senator from Georgia just said that he would have no objection to giving the present Chief Executive the power provided for in the bill; and, if he is of that opinion, if I could have any influence with the Senator from Nevada I would be very glad to support an amendment to that effect, because I feel sure that the war will have been concluded before the present administration shall come to an end.

* * * * * * * *

Mr. SMITH of Georgia. The language which I used upon that subject must be taken in connection with the remainder of the language which I used. I preceded that statement with the further statement that, whenever we give to any President these extreme powers, even though we limit them to the existing President, they become a precedent for future legislation and are dangerous, and for that reason I am opposed to giving unlimited powers to any one man under any circumstances, however much I might be willing for the present President to exercise them. That was the language which I used as substantially as I can repeat it. I would be opposed to passing this bill if it specifically stated that no one should exercise the powers conferred but the present President. I am opposed to giving such powers to any President.

Now, Mr. President, I wish to call attention to these powers, as I construe them. Let us see how far we are going. And this is not the stopping place; it is just one of the guide posts along the road that we have begun to travel, to point the way to other acts of a similar character, and perhaps even more extreme in character. I may be in the minority; it may be that I have a foolish view of the subject; but, as I have it, I at least will feel better if I frankly express my views and vote against the measure. Now, let us see what this bill does. It provides that—

> The President is hereby authorized, whenever in his judgment it becomes necessary, in order to expedite transportation and do justice between carriers—

Not when public transportation requires it; not when the Army of the Nation needs to be moved; not when supplies need to be moved, but—

> whenever in his judgment it becomes necessary in order to expedite transportation and to do justice between carriers.

Mr. CUMMINS. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Iowa?

Mr. SMITH of Georgia. I do.

Mr. CUMMINS. The Senator has not read the condition upon which the chief power is to be exercised.

Mr. SMITH of Georgia. I am going right on through the bill now and endeavor to analyze its effect.

Mr. CUMMINS. The Senator has quoted from the latter part of the bill and has taken up a very incidental and inconsequential power and omitted the real power, which I admit is very great and very important.

Mr. SMITH of Georgia. Well, I turn back to section 2 and read as follows:

Well, I turn back to section 2 and read as follows:

> SEC. 2. That during the continuance of the war in which the United States is now engaged the President is authorized, whenever in his judgment such action is necessary to the public security and defense, to direct that certain kinds of traffic or particular shipments, as may be determined by him, shall have preference or priority in transportation—

That priority of transportation is not to be given to Government supplies; it is not to be given to soldiers; it is not to be given to materials to be used for governmental purposes; it is just as broad as the problems of transportation. It makes the President a despot in ruling upon questions of transportation. He is to determine what—

> shall have preference or priority in transportation by any common carriers by railroad or water, under such arrangements, rules, and regulations as he may prescribe. He may give these directions at and for such times as he may determine, and may modify, change, suspend, or annul them, and for any such purpose he is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose.

He can name any person or persons that he sees fit, who shall take charge of the problem, issue rules and regulations, and dominate the transportation of the country. We do not have to confirm his appointees; we have nothing to do with their number or their character, although we are the legislative body representing the people.

Mr. NEWLANDS. Mr. President, may I ask the Senator a question?

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Nevada?

Mr. SMITH of Georgia. Yes.

Mr. NEWLANDS. Does the Senator object to the exercise of the power of declaring or ordering a preference or priority in transportation, or is his objection to the agency by which the power is to be exercised?

Mr. SMITH of Georgia. Mr. President, for the present I am objecting to this bill as it is offered to us, and I am seeking to point out how shocking it is to any sense, if we have any left, of personal rights.

Mr. KING. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMITH of Georgia. I do.

Mr. KING. The Senator from Iowa [Mr. CUMMINS] said a few moments ago that we were confronted with the alternative of having the Government take charge of the railroad and transportation companies of the United States or vesting in the President or some other agency the power to control transportation in the interest of the public and for the national safety. Does not the Senator from Georgia think that that statement made by the Senator from Iowa is a fair statement of the situation, and does not the Senator from Georgia feel that it would be infinitely better to vest some agency—the President, the Interstate Commerce Commission, or some legitimate board—with these powers to aid in transportation, in securing proper rates, in facilitating the transportation of troops, in securing priorities than for the Government to assume control of the great transportation companies of the country?

Mr. SMITH of Georgia. I do not believe there is any necessity or excuse for the Government assuming control of the railroads. That part of the question I answer in that way. I believe I can be of more service, and certainly it will be more satisfactory to myself, if I proceed with the criticism of the provisions of this bill as it is written. Now let us come to the provision which I have just read, namely:

> He may give these directions at and for such times as he may determine, and may modify, change, suspend, or annul them, and for any such purpose he is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose.

Now, what do we do if this bill becomes a law? We authorize the President to name persons, not subject to confirmation by the Senate, with no limitation as to their character or qualifications; we delegate to him, and then authorize him to delegate to some one else—to one or more persons—the privilege of saying what commodities shall be carried; first, how they shall be carried, and to make such rules and regulations as these persons may see fit, superseding law, and dominating the transportation of the country.

Mr. REED. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Missouri?

Mr. SMITH of Georgia. Yes, sir.

Mr. REED. I do not want to interrupt the Senator's chain of thought, and I will not propound the inquiry I am going to, if it will.

Mr. SMITH of Georgia. Well, I can not say that I have much of a chain of thought. I left the Committee on Finance when I heard the bill had reached the stage where, if I was going to make any criticism, I would have to make it at once.

Mr. REED. Let me make this suggestion to the Senator, for I should like to elicit his views.

It is proposed that the President may exercise these powers either in person or through others. It is generally understood that there is now organized some kind of committee, consisting of four or five railroad presidents, who are assuming to direct the commerce of the country. Is it not natural that this power, if it is employed by the President, should be exercised through that committee which has already been called into being?

Mr. SMITH of Georgia. I really do not know.

Mr. REED. Is not that the very natural conclusion?

Mr. SMITH of Georgia. If he calls this power into existence, and is now encouraging it, to perform the duty without legal authority, it would be natural to suppose, if the legal authority should be given, that he would continue the same agency.

Mr. HOLLIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from New Hampshire?

Mr. SMITH of Georgia. I do.

Mr. HOLLIS. I had many doubts about the bill when it was first introduced; and I went to see the railroad committee to find out what they were doing and what the need of the bill was, and to get their ideas. They told me that they thought it would be very undesirable to have a railroad official given the power, because that would give rise to a feeling that other railroads might not get a fair chance; and they expressed the hope that it would be some official of the Government, and not a railroad official. That is all I know about it. That does not determine it, but that is their idea.

Mr. REED. Will the Senator let me ask, then, for the sake of the record, whom he means by "the railroad committee"?

Mr. HOLLIS. As I explained in my remarks this afternoon, the Council of National Defense has a committee on railroad transportation, and they deal with a railroad committee appointed and given authority by all the railroads of the country. The committee of the council deals with the committee that represents the railroads. I really do not know the name of that committee.

Mr. REED. Does the Senator know the personnel of the committee?

Mr. HOLLIS. I am perfectly willing to state that the men I talked to were Mr. Howard Elliott, who was formerly the president of the New York, New Haven & Hartford Railroad; President Rea, of the Pennsylvania Railroad; and Mr. Shafer, who has charge of the distribution of cars. Those are the three men to whom I talked.

Mr. NEWLANDS. Mr. President, I will state to the Senator, if he will permit me, that Mr. Willard, of the Baltimore & Ohio Railroad, is a member of the advisory commission appointed by the Council of National Defense, and that in connection with him in the department of transportation——

Mr. CUMMINS. Mr. President, will the Senator from Nevada speak a little louder? I should like to hear what he says.

Mr. NEWLANDS. I was stating that Daniel Willard, president of the Baltimore & Ohio Railroad, was a member of the advisory commission appointed by the Council of National Defense, and that——

Mr. CUMMINS. Daniel Willard is a member of the Council of National Defense.

Mr. SMITH of Georgia. He is chairman of the advisory board.

Mr. NEWLANDS. Let me state what the form of the organization is. The Council of National Defense, appointed under the statute——

Mr. SMITH of Georgia. Mr. President, without yielding the floor, if it suits the Chair, I will sit down for a while.

The VICE PRESIDENT. Anything suits the Chair.

Mr. NEWLANDS. The Council of National Defense, appointed pursuant to the statute passed by Congress, consists of the Secretary of War, the Secretary of the Navy, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of Labor. The council, therefore, consists entirely of Cabinet officials. The act of Congress, however, also provides for an advisory commission of the Council of National Defense, and Daniel Willard has been appointed by the Council of National Defense chairman of the committee on transportation and communication of the advisory commission.

In connection with this, and pursuant to the request of the Council of National Defense, the railroads have appointed an executive committee consisting of five railway presidents, and the Council of National Defense has requested them to be in permanent session here, so that the council can be in easy communication with all the railroads of the country. That committee of railroad officials consists of Fairfax Harrison, president of the Southern Railway, who is the chairman of it; Samuel Rea, president of the Pennsylvania Railroad; Julius Kruttschnitt, chairman of the executive committee of the Southern Pacific Railroad Co.; Hale Holden, president of the Chicago, Burlington & Quincy Railroad; Howard Elliott, president of the New York, New Haven & Hartford Railroad; Edward E. Clark, Interstate Commerce Commissioner, member ex officio; and Mr. Willard is also a member ex officio. Now, as I understand, that executive committee is here cooperating with the Council of National Defense and adopting their suggestions now with reference to priorities in transportation which are essential for the national defense.

Mr. REED. Will the Senator kindly enlighten me on another matter? He stated that Mr. Willard, of the Baltimore & Ohio, was the chairman of the committee on transportation?

Mr. NEWLANDS. Yes.

Mr. REED. He is a member of the Advisory Council of Defense, is he not?

Mr. NEWLANDS. Yes.

Mr. REED. He is chairman of the committee on transportation?

Mr. NEWLANDS. Yes.

Mr. REED. Who constitute the membership of the committee on transportation?

Mr. NEWLANDS. Let me see. I think I have it here.

Mr. SMITH of Georgia. While we are waiting I want to protest against the proposition that any of these men are members of the Council of National Defense. They are not.

Mr. NEWLANDS. None of them are.

Mr. SMITH of Georgia. They are members of advisory committees never designated by legislation.

Mr. NEWLANDS. They do not assume to be.

Mr. SMITH of Georgia. I just want it understood that they are not members of the Council of National Defense. They were named by legislative enactment.

Mr. REED. If it takes the Senator long——

Mr. NEWLANDS. There are so many committees that I am having difficulty in finding it.

Mr. REED. I hope the Senator will put that all in the RECORD.

Mr. NEWLANDS. I have put it all in the RECORD.

Mr. REED. The Senator has already done so?

Mr. NEWLANDS. All these committees and subcommittees; yes. The Senator will observe that there is a most elaborate organization.

Mr. REED. When was that done?

Mr. NEWLANDS. To-day.

Mr. REED. Ah, I was unfortunately kept out of the Chamber.

Mr. BRANDEGEE. Mr. President, the Senator from Georgia does not object to the Council of National Defense trying to get some information, does he?

Mr. SMITH of Georgia. Certainly not; but I wanted to draw the distinction between the various and various and various committees and the Council of National Defense.

Mr. NEWLANDS. Yes; but the Senator will recollect that the advisory commission is also provided for by the statute which we have passed; so it is acting under the authority of Congress so far as concerns advisory matters.

Mr. REED. Mr. President, this has led far from the point to which I was trying to get the attention of the Senator from Georgia, but has all been illuminating. As a matter of fact, it is now shown that the Council of National Defense has selected an advisory commission, and that a member of that advisory commission is Mr. Willard, of the Baltimore & Ohio; and Mr. Willard, of the Baltimore & Ohio, is the chairman of a committee on transportation the membership of which has not been disclosed yet in this colloquy, but the Senator from Nevada is looking through his memoranda to find the names. Up to this time we do not even know who that committee is. That committee has asked four or five railway presidents to meet in the city of Washington, and from this point to designate what freight shall in shipment have precedence over other freights. Thus, the case as now developed is that this commission of railway presidents, acting in the manner indicated, are assuming to grant precedence for one class of freight over another, and for one class of shippers over another. Now, it is proposed by the present bill to vest in the President of the United States the authority, either himself or through any person whom he may name, to give precedence to one class of freight over another, or to one shipper over another. Is it not entirely likely, so far as we can read the future, that that

power will be vested under the law where it has already been vested without authority of law?

Mr. SMITH of Georgia. Mr. President, that question being asked me, I should say that it would not be an unreasonable supposition to believe that if a committee had been selected with the approval of the President to do this work without legal authority, when the legal authority was given, the same committee would be continued with legal authority.

Mr. ROBINSON. Mr. President, will the Senator from Georgia yield to me to make a brief statement in part answer to the inquiry of the Senator from Missouri?

Mr. SMITH of Georgia. Yes; without yielding the floor, because I wish to hold the floor.

Mr. ROBINSON. Certainly. I do not wish the floor, Mr. President, except for the purpose of answering the inquiry of the Senator from Missouri.

On page 3 of the bill, commencing at line 10, is found this language:

All such common carriers are hereby directed and required to establish forthwith, and to maintain continuously in the city of Washington, during the period of the war, an agency by a committee of railroad officers or otherwise fully empowered by such carriers to receive on behalf of all the carriers notice and service of such orders and directions, and to arrange for the prompt compliance therewith by such carriers—

And so forth.

I will state to the Senator from Missouri that my understanding of the matter is that the committee to which reference has already been made, of which Mr. Daniel Willard is a member and I think the acting chairman, is the committee which is given a quasi-legal status under the language which I have just read. This committee, if I am correctly informed, do not desire to be the person or persons through whom the President shall make the orders. They do not desire to become officers upon the part of the Government. They desire and intend to retain their status primarily as officers of the railway companies from whom they receive their compensation. But I call the attention of the Senator from Missouri and the Senator from Georgia to the fact that under the conditions that are now existing it is absolutely necessary that somebody, some authority in the United States, shall grant priorities of shipment.

The railroads have found themselves unable to transport all of the property tendered to them for transportation; and just as surely as you live and this war continues, that condition is going to grow more and more acute. It is the purpose of this bill to provide a governmental authority which shall protect the public, in so far as that can be done, from the evils of discrimination which will inevitably result and grow out of the congested condition of traffic already existing and rapidly growing worse.

The purpose of this bill is to give the Government some control over the matter. In the first place, whenever the national security and defense are imperiled, it will enable the President of the United States, who is the Commander in Chief of the Army and Navy of the United States, to say that before you shall ship automobiles you shall carry cannon and rifles and soldiers. Is there a Senator of the United States who wants to deprive the public authority of that power? He has his opportunity to do so by voting against this bill. It is absolutely necessary that there be vested somewhere an authority to provide for priorities; otherwise, unjust discriminations will result.

Mr. SMITH of Georgia. Mr. President, will the Senator allow me to ask him a question, as he is on the committee?

Mr. ROBINSON. Certainly.

Mr. SMITH of Georgia. Why did you not in this bill, then, limit it to cannon and troops and governmental things?

Mr. ROBINSON. For the simple reason that it is necessary to transport a great many things besides the articles I have mentioned, and the Senator from Georgia knows it. Mr. President, the conditions will never be the same in any two cases. It may be necessary in one instance to transport food, in another to transport soldiers, in another to transport horses. There must be some power somewhere to provide what the priority shall be, and I would rather that the Chief Executive of this Nation, representing all the people of the Nation, should have a voice in it than leave that great power solely to the railroads themselves, without organizations for the purpose.

Mr. NEWLANDS. Mr. President, if the Senator from Georgia will permit me——

Mr. SMITH of Georgia. I yield, provided I do not lose the floor.

The VICE PRESIDENT. The Senator seems to have the floor by right of discovery, so it is all right.

Mr. NEWLANDS. I should like to make the suggestion that if it is necessary to establish priorities in the transportation of cannon and munitions of war and troops that are used in the national defense, it will also be necessary to establish priorities in the transportation of the steel that is to go into our ships; and if it is necessary to establish priorities in transportation with reference to the steel that is to go into the ships, it may be necessary to establish priorities of transportation in the iron, the basic iron, the pig iron, out of which the steel is made, or the coke with which the steel is made. There are numerous things that are used in the various phases of production that ultimately enter into and form a part of the things that are used for the national defense. As the Senator from Arkansas has already said, that applies to the food that supplies the troops, to the cannon, to the muskets and powder, and other munitions of war, and also to all the elements of production that form a part of these munitions of war when completed. I can understand, for instance, how in the making of wooden ships, if we should determine upon that, it may be absolutely necessary to give priority to the transportation of lumber from one section of the country to the other, and yet that lumber itself is not a munition of war.

Mr. SMITH of Georgia. Mr. President, before the Senator takes his seat I should like to ask him if he would accept an amendment limiting this bill to the prompt movement of the military and naval forces of the United States, and all supplies therefor, and material necessary to be used in the manufacture of arms, munitions, and equipment therefor, limiting it to the subjects that have been discussed so eloquently by the Senator from Arkansas?

Mr. NEWLANDS. I think that would be a limitation that would seriously affect the efficiency of this bill.

Mr. REED. Mr. President, I desire to finish my question. I want to ask the Senator from Georgia now whether in his opinion this bill, if it is enacted, will not place in the hands of the committee on transportation that may be appointed by the President, whether they be railroad presidents or other individuals, absolute power to control the shipment of substantially all materials in the United States, and deprive of all opportunity to recover any compensation the citizen who may be wronged or injured by a refusal to accept or transport his freight?

Mr. SMITH of Georgia. I am not sure about the question of depriving them of the right to recover compensation. It would undoubtedly create despotic power in the control of shipments, whether that be exercised by the President or by some one named by the President. If that power is used with benevolence, we will have a benevolent despotism. If it is used otherwise, it might constitute an oppressive despotism. What I am protesting against is such despotic powers being vested anywhere; and before I get through I hope to show that the emergency can be met without giving any such powers.

Mr. NEWLANDS. Mr. President——

The VICE PRESIDENT. Does the Senator yield further?

Mr. NEWLANDS. Will the Senator permit me to correct a misapprehension under which the Senator from Missouri, in his questions, seems to rest?

Mr. SMITH of Georgia. Certainly.

Mr. NEWLANDS. That is that the power of fixing these priorities will be in the hands of this railroad committee. On the contrary, this railroad committee is, under this statute, to be appointed simply to receive the orders of the President, not to originate them.

Mr. REED. The Senator is in error in regard to my position. I stated my proposition to be the railroad committee or other persons upon whom the President might confer the authority; and, of course, it must be conceded that he could confer it upon the committee, because the language of the act is——

Mr. NEWLANDS. I think the Senator is under a misapprehension. This committee of railway officials is here simply to receive the directions of the Government; not to exercise its judgment in any particular, but to receive these directions any carry them out.

Mr. SMITH of Georgia. Does the Senator from Missouri desire to ask me a question?

Mr. REED. I just want to conclude this, and I beg the Senator's pardon for having interrupted him.

Mr. SMITH of Georgia. The Senator need not beg my pardon. I hope he will discuss this bill elaborately himself before it is voted on.

Mr. REED. The language is:

He may give these directions at and for such times as he may determine, and may modify, change, suspend, or annul them, and for any such purpose he is hereby authorized to issue orders direct, or through

such person or persons as he may designate for the purpose. Officials of the United States, when so designated, shall receive no compensation for their services rendered hereunder. Persons not in the employ of the United States so designated shall receive such compensation as the President may fix.

Now, of course, under that language——

Mr. NEWLANDS. Will the Senator read that part with reference to the executive committee, commencing at line 12?

Mr. REED. On the same page?

Mr. NEWLANDS. Yes; the committee of railroad officers.

Mr. REED. Yes; I will read it all, with the permission of the Senator from Georgia.

Mr. NEWLANDS. Commencing with line 10.

Mr. REED (reading)—

Suitable offices may be rented and all necessary expenses, including compensation of persons so designated, shall be paid as directed by the President out of funds which may have been or may be provided to meet expenditures for the national security and defense. All such common carriers are hereby directed and required to establish forthwith, and to maintain continuously in the city of Washington, during the period of the war, an agency by a committee of railroad officers or otherwise fully empowered by such carriers to receive on behalf of all the carriers notice and service of such orders and directions, and to arrange for the prompt compliance therewith by such carriers.

Now, Mr. President, plainly under that whole language, taken together, the President can appoint any person he sees fit to carry out these orders. It is, however, made the duty of the railroad company to put somebody here upon whom notice can be served. The President, under this bill, of course must sign the rules, orders, or regulations; but we all know that those rules, orders, and regulations will not be prepared by the President, but will be prepared by these boards, and undoubtedly in my judgment will be written by the railroad presidents who are now conducting this business.

Mr. SMITH of Georgia. Mr. President, I am now going to take up section 2 again, and call attention to what is in it. I think its importance is ample excuse for all the time that anyone may wish to give to its consideration.

Now, let us see. It starts with the proposition that the President is authorized. Further, he is authorized to do it himself or through such person or persons as he may designate. Therefore the President, or such person or persons as he may designate or authorize to do so, may direct that certain kinds of traffic or particular shipments shall have preference or priority of transportation by common carriers by railroad or water, under such arrangements, rules, and regulations as the President or persons whom he has designated may prescribe.

Mr. President, it is conceded that the transportation situation is one which makes it impossible for the railroads to move all the traffic of the country as it is tendered to them. Therefore, we are giving to the President, or such committee or commission as he may appoint, the unrestricted authority to discriminate between shippers. I suggested an amendment to the chairman of the committee.

Mr. NEWLANDS. Mr. President, will the Senator let me correct another misapprehension?

Mr. SMITH of Georgia. Yes.

Mr. NEWLANDS. There is no discrimination whatever between shippers under this bill. There is simply a priority as to classes of freight. No preference is to be exercised as to any individual shipper, but it is simply with reference to the class of freight.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Connecticut?

Mr. SMITH of Georgia. Yes.

Mr. BRANDEGEE. The act itself, in distinct terms, in line 18, applies to "particular shipments" as well as to classes of freight.

Mr. SMITH of Georgia. Yes.

Mr. NEWLANDS. Yes, that is true; but that is without reference to the shipper.

Mr. SMITH of Georgia. It not only applies to "kinds of traffic," but "particular shipments" of kinds of traffic, as the Senator from Connecticut suggests.

Mr. BRANDEGEE. Of course the shipments are of some concern to the shipper.

Mr. SMITH of Georgia. It absolutely puts in the hands of this board despotic power over the movement of transportation and the privilege of producers in this country, whether on the farm or in the factory, to have their products go to market.

Mr. POMERENE. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Ohio?

Mr. SMITH of Georgia. I do.

Mr. POMERENE. With all due respect, is not the Senator stating that proposition too broadly? The President is only authorized to do this when, in his judgment, such action is necessary to the public security and defense.

Mr. SMITH of Georgia. Oh, I have read that language before. I have mentioned that language before. He begins acting when he thinks the public safety or the public defense requires it, and he asks for this bill because he wants to act.

Mr. REED. He has already acted.

Mr. SMITH of Georgia. There already has been action, as the Senator from Missouri says, and this is to legalize it. It is now legally to take the place of that which has heretofore been illegal.

Mr. CUMMINS. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Iowa?

Mr. SMITH of Georgia. I do.

Mr. CUMMINS. Will the Senator from Georgia state the instances in which he has already acted? I should like some information upon that subject. I should like to know what shipments have been given preference, and why they were given preference, in order that we may judge of the necessity of some such law as this.

Mr. SMITH of Georgia. I can not give the action in detail. I heard from the chairman of the committee that there was a committee of railroad men who already were indicating to the railroads what they should ship. I heard also from the chairman of the advisory commission, the president of the Baltimore & Ohio Railroad, that this was now being done. In detail, I can not give it to you.

Mr. CUMMINS. I should like to know. I think that if the Senator from Georgia could give to the Senate the instances he has in mind conclusive proof of the necessity of a law of this sort would be furnished.

Mr. REED. If the Senator will pardon me, the statement was made here by a number of Senators on the floor a few days ago of the instances to which they referred. One of them related to the shipments of cement, I believe, that had been held up. I will not undertake to give exact instances, but I think a number were given here on the floor of the Senate, and the RECORD will disclose them.

Mr. SMITH of Georgia. I wish to say, Mr. President and Senators, that it may be some legislation is necessary; it may be that we should prescribe some classes of freight which should be moved in preference to others; it may be that we should work out some line of selection under certain circumstances; but what I protest against is the unlimited power given individuals, without reference to war supplies and without reference to anything except their arbitrary and despotic judgments. There is no rule prescribed; there is no limitation of discretion prescribed. I know the members of the Committee on Interstate Commerce, and I appeal to them to put some rule of limitation upon the discretion of any board that undertakes to discriminate both as to traffic and as to shipments. I would not hesitate a moment to say that discrimination should be given in favor of moving war supplies—not a moment. If that were the standard, and it were limited to that, the bill would have my support.

Mr. CUMMINS. The limitation in this bill is found in the words "public security and defense." It is the only limitation that can possibly be put on this power. It would be no more possible to prescribe a general rule for the movement of freight under these abnormal conditions than it would be to prescribe a rule for the movement of a battleship or the movement of an army. The Senator from Georgia is asking for a criterion or a standard that can not possibly be supplied. If we are not willing to trust some one in the exercise of this power—and I grant that it is a great power—then the necessity, which is perfectly obvious now to everyone who observes the situation, must go unprovided for. It can not be limited by a rule or by a standard such as we could invoke in normal times.

Mr. POMERENE. Mr. President, if I may give a concrete instance, carrying out the idea expressed by the Senator from Iowa, about a week ago some manufacturers of paving brick and other building brick came to me from Ohio. They had a conference with the committee to which reference has been made. The order had gone out to prefer the shipment of steel and coal rather than of brick; but it turned out that this company was under contract to furnish large supplies of brick for the purpose of building a steel mill in Youngstown, and in that instance the brick was just as much of a war supply and for the purpose of carrying out the policy of the Government as was the steel itself after the mill had been erected.

Mr. SMITH of Georgia. Mr. President, it is true, as I construe this language, that the President must first find that public security and defense require direction at his hands, and the creation of this board. Then, beyond that the discre-

tion of the board settles the question. The discretion of the board, unknown to us, makes discriminations as to the kind of traffic and particular shipments. I repeat that I suggested to the chairman of the committee that it be limited to the prompt movement of the military and naval supplies of the United States and supplies and materials necessary to be used in the manufacture of arms, munitions, and equipment, and, thereafter, military supplies.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Connecticut?

Mr. SMITH of Georgia. I do.

Mr. BRANDEGEE. In that connection, what would the Senator from Georgia say about all food products that were necessary to supply our allies—foreign shipments of food products?

Mr. SMITH of Georgia. I think a discrimination could be made as to food supplies for military purposes.

Mr. BRANDEGEE. No. Supposing it is not for military purposes? Supposing it is to support the lives of our allies?

Mr. SMITH of Georgia. I think they ought to take their chances with our own people in the movement of food.

Mr. BRANDEGEE. Does the Senator mean that there ought to be no way in cooperation with our allies of distributing a surplus food supply——

Mr. SMITH of Georgia. I did not say that.

Mr. BRANDEGEE. Other than by bidding in the open market or by trusting to luck as to transportation?

Mr. SMITH of Georgia. I do not think you would have to trust to luck as to transportation. I do not think there is any substantial difficulty about moving the food supplies to the coast. I do not think there has been any, and I do not think there will be any greater pressure in the future to move them.

Mr. BRANDEGEE. But my idea was—if I am not interrupting the Senator disagreeably——

Mr. SMITH of Georgia. No.

Mr. BRANDEGEE. That if the Commander in Chief of the Army and the Navy, for instance, has information that a month hence it will be necessary to transport so many hundred thousand tons of wheat to the interior of France, for instance, unless the Commander in Chief has authority to direct that certain railroad systems shall devote themselves to bringing that wheat from the places where it is stored, and long in advance perhaps of the time it may be actually needed upon the ground, is not that a matter that is just as definitely determinative of military operations as either munitions or arms might be?

Mr. SMITH of Georgia. I do not think so. It falls under a class after them, substantially. I think supplies for the troops themselves should stand on a higher plane than supplies for noncombatants——

Mr. BRANDEGEE. That might well be, of course.

Mr. SMITH of Georgia. And on quite a different plane.

Mr. BRANDEGEE. Quite so; but I am taking it now upon the ground that it is necessary for supplies for combatants themselves. "An army travels on its belly," as Napoleon said.

Mr. SMITH of Georgia. I think food for the Army has been standing exactly on the same plane as the munitions for the Army. I think they stand upon the same plane. I misunderstood the Senator from Connecticut. I thought he was referring to feeding the entire noncombatant population.

Mr. BRANDEGEE. I was taking both cases, for instance, because the noncombatants of to-day are going to be drawn in and become combatants to-morrow. Irrespective of that, however—perhaps it is not easy to take a particular instance—but as it lies in my mind the transportation of all sorts of products may be necessary for the winning of this war; and transportation of those products at a particular time, and that certain routes must give themselves exclusively to that transportation at the very psychological moment, may become a military necessity.

Now, I ask the Senator—with just as deep regret, and with as much aversion to absolute power as he can possibly have—as a military matter, how is this thing to be done except in a despotic manner? The Army itself is run in a despotic manner by the Commander in Chief. The legislative branch of the Government can do nothing but impeach the President. It can not impeach him for a blunder. If we find an error in judgment, if we have a great defeat of our Army, the power is there in the President to direct the Army, What is the Senator going to do about it? The conduct of war is arbitrary and despotic.

Mr. SMITH of Georgia. This situation is not one which requires any comparable power to-day to what is in this bill. That is my first reply. We have practically no troops abroad; we have ample facilities for moving the grain and the foodstuffs; and those facilities will continue. There is not such a pressure upon transportation that they can not be moved, and the bill does not limit it to military supplies. If the bill were limited to military supplies, it would occupy a very different attitude. The amendment which I suggested to the Senator from Nevada would have covered food supplies for the Army. They would be treated as military supplies; but the purpose is to go far beyond that; it is to control the whole problem of transportation.

Mr. CUMMINS. Mr. President, I want to correct one misapprehension—I think it is a misapprehension—which the Senator from Georgia evidently harbors. He said a few moments ago that if the President found that the public security and defense required the appointment of a board, thereafter the board could take complete possession of the transportation system and order preference or priority without regard to the public security or defense. I am sure the Senator is in error about that. The board, or a single person—because the President can select such representative as he desires to exercise this power for him—the board would have to find that the priorities or preferences ordered by it were required and were essential to the public security and defense.

While I am on my feet I want to ask the Senator from Georgia whether he has considered the experience of Great Britain and France and Germany with regard to this subject? I am just as much opposed to the extension of power over general industrial matters and private enterprises as he can possibly be.

Mr. SMITH of Georgia. I feel sure of that.

Mr. CUMMINS. And I have no doubt that will appear a little later, when other bills are before the Senate; but, as the Senator will remember, the transportation of a country is a public function; it is not a private function. We have attempted for years to regulate this function. The very moment war broke out in Great Britain that country found it necessary to take possession of all its railway facilities. France found it necessary to take possession of all the private railway facilities of that country. Germany has long operated its entire system as a public matter. Now, is the Senator from Georgia at all sure this great public duty of transportation could be efficiently performed during these abnormal times without the hand of the Government upon it, so that it will give always to the public security and defense its first consideration?

Mr. SMITH of Georgia. Answering the Senator, if it becomes necessary for the Government to control in these respects, I believe it to be the duty of Congress to indicate in the legislation that it passes the plan of that control and to provide for a tribunal that will exercise judicially that control under certain limitations and rules legislatively prescribed. That would be a vastly different thing from giving the power to one man to fix the rules and to name, unrestrained, the officers who will carry them into execution. The one would be the legislative development of a plan under proper restrictions, with officers legislatively created to carry out the legislative plan; the other would be a legislative delegation of the power to an individual to do as he pleases.

Mr. KELLOGG. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Minnesota?

Mr. SMITH of Georgia. Yes.

Mr. KELLOGG. As a member of the committee I have given some thought to that question. Will the Senator please tell us concretely what regulations, limitations, and rules he would specify in the protection of this power proposed to be granted? It is very easy to say "rules and regulations and specifications," and so forth; but I should like to have the Senator state what rules and what limitations he would place upon the granting of the power?

Mr. SMITH of Georgia. Mr. President, the bill itself provides for rules and regulations. Those responsible for the bill must have had rules and regulations in their minds which would control and cover the subject, to be written by the President. If there are rules and regulations which properly can be prescribed by the President governing the selection and settling of problems of determination in a measure, surely a committee of the Senate ought to be able to work them out, and those rules and regulations ought to exist before the legislation is passed.

Then, Mr. President, I insist that the character of the men who are to perform this duty shall be legislatively determined. In the one case it is government by legislation and by the representatives of the people, providing a tribunal to pass under legislatively fixed rules, while in the other it is despotism. That is the difference.

Mr. President, I suggested one limitation to the committee, and it goes just as far as our present condition requires. The Senator from Iowa referred to the condition of Germany and that of England and that of France. Our condition can scarcely

be compared to theirs. England, France, and Italy are engaged in war with Austria and Germany, lying right alongside of them, with 15,000,000 more population than Germany and Austria. They are not simply fighting for democracy; they have special grievances; they occupy a very different position from the United States, 3,000 miles away; and to take the position that we are to give the same despotic power, or require it here, I think utterly fails to keep in mind the entire difference between the situation in France, where millions of German and English and French soldiers are fighting, and our condition here. We do not require the withdrawal from the individual citizen of his rights here that may be required there. I object to our aping the policies that they have put into effect in their emergencies when no such situation confronts us. We are being asked, 3,000 miles away from the seat of war, to subject our citizens to all the interference with their individual rights and their ordinary business opportunities—yes; to interfere more with their rights—than France or England find necessary in the midst of the battle plains. Why, if we keep this up, if we continue this line of abandonment of private rights, we will have to go to Prussia to have a chance to live in a democracy. I am not willing, in the name of democracy, to give up every democratic right that the individual has.

Now let me go on and call attention to the provisions of this bill, and I appeal to the members of the committee to modify it.

Officials of the United States, when so designated—

The President creates the offices—

shall receive no compensation for their services rendered hereunder. Persons not in the employ of the United States so designated shall receive such compensation as the President may fix.

The President is to pick them as he pleases; pay them as he pleases.

Suitable offices may be rented, and all necessary expenses, including compensation of persons so designated, shall be paid as directed by the President out of funds which may have been or may be provided to meet expenditures for the national security and defense.

Why, Senators, can we not determine what kind of tribunal we wish to pass on these questions, and can we not prescribe the rules and regulations, and can we not set a standard?

I would say without hesitation that they might give preference to the prompt movement of the military and naval forces of the United States, and all supplies therefor, and all materials necessary to be used in the manufacture of arms, munitions, and equipment, and all foodstuffs necessary for the Army of the United States, or necessary to be shipped abroad for the armies of our allies. I would be perfectly willing to create some kind of tribunal to regulate and control all those matters, but I should like to have Congress prescribe some rules of selection and name the organization and pass upon the occupants of the offices when they come. I would not vote to confirm to a position like this a gentleman like Mr. Bernard Baruch.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Connecticut?

Mr. SMITH of Georgia. I do.

Mr. BRANDEGEE. Does the Senator understand from the language of the bill at the bottom of page 2, to wit:

And for any such purpose he—

That is, the President—

is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose—

That that gives these persons that he designates the same authority that we are intending to give the President?

Mr. SMITH of Georgia. Practically.

Mr. BRANDEGEE. I did not understand it so from the reading of the bill.

Mr. SMITH of Georgia. Just let me read the whole of that paragraph:

He may give these directions at and for such times as he may determine, and may modify, change, suspend, or annul them, and for any such purpose—

What is that? To give directions, to modify them, to change them, and to suspend them or to annul them—

for any such purpose he is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose.

Mr. BRANDEGEE. Yes; he is authorized to do it. "He is hereby authorized to issue orders direct, or through such person"—not by such person—"through such person or persons as he may designate."

Mr. SMITH of Georgia. They act for him. Unquestionably it means——

Mr. BRANDEGEE. That is what I am trying to bring out—an inquiry as to whether these acts and orders are not, in contemplation of law, exclusively the orders of the President and of nobody else, possibly issued through persons whom he may designate? The inquiry was suggested to me by a remark that I think the Senator made, that this not only clothed the President with this authority, but we delegated it to the President, and the President was authorized to delegate it to the persons he designated. Does the Senator really think that that is the fair legal construction of the language?

Mr. SMITH of Georgia. I do. I think that is the legal construction of it, and I have not any doubt about the fact that that will be its practical operation.

Mr. BRANDEGEE. I think very likely the task is so enormous that the President could not thoroughly investigate the propriety or wisdom of each particular order he issued. But, after all, I suppose, in contemplation of law, under the terms of this bill, the order would be the order of the President, who was clothed with the power by Congress, issued through one of these designated gentlemen.

Mr. SMITH of Georgia. I think we have more time to prepare the plan of distribution and just as much familiarity with the subject as the President. If it really means, as the Senator suggests, that the President works out the mode of distribution and the mode of selection——

Mr. BRANDEGEE. No; I do not claim that.

Mr. SMITH of Georgia (continuing). Or if he mentally does anything about it——

Mr. BRANDEGEE. I had supposed that whatever organization he might decide upon—perhaps several agents or persons designated in different parts of the country and in different industries—after they had studied the circumstances surrounding that subject, they would make a recommendation to the President, and it would be his order that would put into operation the powers conferred by this bill. He might not know much about it.

Mr. SMITH of Georgia. It expressly does not require him to sign the order. It says "to issue orders direct, or through such person or persons," and so forth.

Mr. BRANDEGEE. Well, I suppose it would be such an order as a general would issue through his adjutant general. It would be the act of the general, issued by the adjutant general.

Mr. SMITH of Georgia. The Senator must realize, and the President must realize, and in construing this everybody must realize, that it is utterly impossible for one man, even if he has nothing else to do, to handle this entire subject and handle it intelligently. If it means that the President is to do it all himself, it means he is supposed to do what he could not do intelligently if he had nothing else to do.

Mr. REED. Mr. President, if the Senator will permit me——

Mr. SMITH of Georgia. Certainly.

Mr. REED. The question in dispute, as I understand it, is whether, under the language of the bill, the President must himself issue these orders, or whether the bill is so constructed that the President, having created a board or created an agency, that board or agency can then proceed to issue orders in the name of the President. The Senator from Connecticut appears to be of the opinion that the language does no more than to confer upon the President the power to personally make the orders.

I call the attention of the Senator from Georgia and the Senator from Connecticut to the language of the bill, and as a preliminary I state that if it was intended simply to confer upon the President power to make orders without giving him any power to delegate his power, then all that was necessary to have put into the bill was the language that "the President is authorized, whenever in his judgment such action is necessary to the public security and defense, to direct that certain kinds of traffic or particular shipments, as may be determined by him, shall have preference or priority in transportation." That language would have conveyed a complete power. It would have given the President all the power that the Senator from Connecticut appears to think the President has under this bill. And if it had been desired to give him the further power to create agents merely to enforce his orders, the further language would have been "and shall have power to create agents to enforce his orders."

But that is not the language of the bill. Following the language which I read is this:

He may give these directions at and for such times as he may determine, and may modify, change, suspend, or annul them, and for any such purpose he is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose.

Now, the Senator from Connecticut is, to my certain knowledge, a splendid lawyer, for I have the pleasure of serving with him on the Judiciary Committee; and I submit to the Senator from Connecticut whether, if he were preparing a bill and intended to confer upon the President the power to issue orders as to priority of classes of freight and intended to give the

President the power to appoint agents to carry out his orders, he would not simply say: "The President shall have the power and authority to make classifications and give priorities and to appoint agents to carry out his directions"? Surely he would not employ this very peculiar language:

He may give these directions at and for such times as he may determine and may modify, change, suspend, or annul them, and for any such purpose he is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Connecticut?

Mr. SMITH of Georgia. Yes, sir.

Mr. REED. It seems to me that language implies some purpose other than or different than would have been deduced from the mere plain statement of authority.

Mr. SMITH of Georgia. The whole context of the bill carries that conclusion. A little farther on you find that the railroads are to have their officers here ready to receive orders. If the President really makes the orders, this other person would simply be a messenger to carry them over to the office of the railroad organization. Evidently it does not mean that.

Mr. BRANDEGEE. Mr. President, of course I do not claim to be qualified to say what it does mean. I did not draw the language. I am trying to find out what a court would probably construe the language to mean. The committee evidently had some clear idea as to whether they were creating a sole authority in the President or giving the President, if it is possible to do so, the right to create subauthorities and clothe them with all the authority conferred upon him. Of course I do not know exactly what was in the minds of the members of the committee; but, as I read section 2, the whole section is modified by and contingent upon the language "whenever in his judgment," in line 16.

It seems to me to be inconsistent with that language to say that because later on in the bill, down in lines 24 and 25, it provides that he—the President—may issue orders direct or through such person as he designates the power is thereby conferred by this bill upon persons to be designated in the future by the President to issue orders which, under the clear language of the bill, can only be issued by the President when in his judgment the public safety requires it. I take it the Senator would not claim that any one of these persons designated by the President may issue an order when in the judgment of another person the public safety or interest may require it.

Mr. SMITH of Georgia. I really think the practical effect of this provision is that the President issues his rules and begins his work and appoints this board, and they do the balance of it. I think that is practically what it amounts to, and the unrestricted control of transportation will pass to men named by the President—men not really Government officials.

EXECUTIVE SESSION.

Mr. MARTIN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened.

RECESS.

Mr. MARTIN. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 5 o'clock and 7 minutes p. m.) the Senate took a recess until to-morrow, Saturday, June 9, 1917, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate June 8, 1917.

PUBLIC HEALTH SERVICE.

Dr. Harry Evans Trimble to be assistant surgeon in the Public Health Service, to take effect from date of oath.

APPOINTMENTS IN THE ARMY.

GENERAL OFFICERS.

Brig. Gen. John F. Morrison to be major general from May 15, 1917, to fill an original vacancy.

Brig. Gen. Charles G. Morton to be major general from May 15, 1917, to fill an original vacancy.

Brig. Gen. William L. Sibert to be major general from May 15, 1917, to fill an original vacancy.

Col. Edwin F. Glenn, Eighteenth Infantry, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. Augustus P. Blocksom, Third Cavalry, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. John Biddle, Corps of Engineers, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. George T. Bartlett, Coast Artillery Corps, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. Henry C. Hodges, jr., First Infantry, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. Joseph T. Dickman, Second Cavalry, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. Adelbert Cronkhite, Coast Artillery Corps, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. Henry T. Allen, Cavalry, unassigned, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. William H. Sage, Twelfth Infantry, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. Chase W. Kennedy, General Staff Corps (Infantry), to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. Omar Bundy, Adjutant General (Infantry), to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. Harry C. Hale, Fifteenth Infantry, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. Richard M. Blatchford, Infantry, detached officers' list, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. Samuel D. Sturgis, Field Artillery, unassigned, to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. David C. Shanks, Inspector General (Infantry), to be brigadier general from May 15, 1917, to fill an original vacancy.

Col. William M. Wright, Adjutant General (Infantry), to be brigadier general from May 15, 1917, vice Brig. Gen. Thomas F. Davis, retired from active service May 8, 1917.

Col. Robert L. Bullard, Twenty-sixth Infantry, to be brigadier general, vice Brig. Gen. John F. Morrison, to be appointed major general.

Col. Peyton C. March, Eighth Field Artillery, to be brigadier general, vice Brig. Gen. Charles G. Morton, to be appointed major general.

VETERINARY CORPS.

Veterinarian Clarence Loveberry, Quartermaster Corps, to be assistant veterinarian from June 3, 1916, to fill an original vacancy.

PROMOTIONS IN THE ARMY.

QUARTERMASTER CORPS.

Maj. Herbert M. Lord, Quartermaster Corps, to be lieutenant colonel from March 4, 1913, vice Lieut. Col. Beecher B. Ray, whose recess commission expired by constitutional limitation March 3, 1913.

Maj. Robert S. Smith, Quartermaster Corps, to be lieutenant colonel from March 27, 1914, subject to examination required by law, vice Lieut. Col. George F. Downey, promoted.

Maj. William G. Gambrill, Quartermaster Corps, to be lieutenant colonel from July 1, 1916, to fill an original vacancy.

PROMOTIONS IN THE NAVY.

Capt. Hugh Rodman to be a rear admiral in the Navy from the 23d day of May, 1917.

The following-named commanders to be captains in the Navy from the 23d day of May, 1917:

Harley H. Christy,
Noble E. Irwin,
Waldo Evans,
Thomas J. Senn,
Charles F. Preston, and
Richard H. Leigh.

The following-named lieutenant commanders to be commanders in the Navy from the 23d day of May, 1917:

Chauncey Shackford,
Ralph E. Pope,
Zachariah H. Madison,
Charles P. Snyder,
Joseph R. Defrees,
Willis G. Mitchell,
John J. Hyland,
Samuel W. Bryant,
Edward S. Jackson,
Sinclair Gannon,
John D. Wainwright,
George W. Steele, jr.,
Stafford H. R. Doyle, and
William N. Jeffers.

Lieut. Commander Harry E. Yarnell to be a commander in the Navy from the 29th day of August, 1916.

The following-named lieutenants to be lieutenant commanders in the Navy from the 23d day of May, 1917:

Theodore G. Ellyson,

Hugh Brown,
Wilhelm L. Friedell,
Burton H. Green,
Isaac F. Dortch,
John J. London,
Gordon W. Haines,
Ross S. Culp,
John W. Wilcox, jr.
Laurence N. McNair,
Edward L. McSheehy,
William Baggaley,
Benjamin Dutton, jr.,
Halford R. Greenlee,
Vaughn K. Coman,
Reed M. Fawell,
Henry A. Orr,
Alexander S. Wadsworth, jr.,
James S. Woods,
Lloyd W. Townsend,
John M. Smeallie,
John E. Pond,
William P. Gaddis,
Kenneth Whiting, and
George B. Wright.

The following-named lieutenants (junior grade) to be lieutenants in the Navy from the 5th day of June, 1917:

Theodore S. Wilkinson, jr.,
William W. Smith,
David I. Hedrick,
Olaf M. Hustvedt,
Harold T. Smith,
Cummings L. Lothrop, jr.,
Preston B. Haines,
Gerard Bradford,
Mark L. Hersey, jr.,
Frank T. Leighton,
Alva D. Bernhard,
Chester S. Roberts,
Benjamin V. McCandlish,
Daniel A. McElduff,
Arthur S. Dysart,
Hugh P. LeClair,
James D. Maloney,
Alan G. Kirk,
Levi B. Bye,
Granville B. Hoey,
Tracy L. McCauley,
Francis W. Scanland,
Joel W. Bunkley,
Max B. DeMott,
Ernest J. Blankenship,
John J. Saxer,
Leo L. Lindley,
Harold C. Train,
Richard M. Elliott, jr.,
Lee P. Johnson,
Monroe Kelly,
Marion C. Robertson,
Edward C. Raguet,
Charles C. Davis,
George K. Stoddard,
Williams C. Wickham,
Freeland A. Daubin,
Roland M. Comfort,
Radford Moses,
Thomas E. Van Metre,
Comfort B. Platt,
Sherman S. Kennedy,
Richard W. Wuest,
Chauncey A. Lucas,
Charles H. Morrison,
Paul H. Rice,
Robert G. Coman,
Holbrook Gibson,
Charles E. Reordan,
Howard H. J. Benson,
Hugo W. Koehler,
George N. Reeves, jr.,
Ralph E. Sampson,
Joseph M. Deem,
Robert H. Bennett,
James B. Glennon,
Vance E. Chapline,
Deupree J. Friedell,
Frank A. Braisted,
George B. Keester,
John Borland,
Oscar C. Greene,
Raleigh C. Williams,
Thalbert N. Alford,
Henry G. Cooper, jr.,
Eugene M. Woodson,
James S. Spore,
Wilbur J. Carver,
Charles H. Maddox,
George A. Trever,
Edgar A. Logan,
Mark C. Bowman,
Percy T. Wright,
Frank S. Carter,
Harold A. Waddington,
Percy W. Northcroft,
David H. Stuart,
Ernest L. Gunther,
Augustine W. Rieger,
James B. Rutter,
Alger H. Dresel,
Frank Slingluff, jr.,
Clifford E. Van Hook,
Solomon Endel,
Robert P. Guyler, jr.,
Ralph G. Haxton,
Joseph A. Murphy,
Lawrence Townsend, jr.,
Lucius C. Dunn,
Charles M. Elder,
James M. Doyle,
Rush S. Fay,
Henry T. Settle,
Ewart G. Haas, and
Joseph E. Austin.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 6th day of June, 1917:

Noel Davis,
Charles B. C. Carey,
Carleton F. Bryant,
William J. Larson,
Alfred P. H. Tawresey,
John H. Buchanan,
Herman A. Spanagel,
Joseph R. Redman,
Frank L. Lowe,
Franklin G. Percival,
Theo D. Westfall,
Theodore D. Ruddock, jr.,
Andrew H. Addoms,
Albert G. Berry, jr.,
James D. Black,
George B. Wilson,
William H. Porter, jr.,
William K. Harrill,
Greene W. Dugger, jr.,
John M. Creighton,
George F. Neiley,
Russell E. Perry,
Herbert J. Ray,
Charles E. Rosendahl,
John G. Moyer,
Robert W. Hayler,
Bert F. Clark,
Archibald N. Offley,
Wiliam A. Corn,
John B. W. Waller,
Robert L. Vaughan,
Homer L. Ingram,
Thomas J. Doyle, jr.,
Alexander R. Early,
Charles F. Martin,
Vincent A. Clarke, jr.,
Kemp C. Christian,
Philip W. Yeatman,
Samuel G. Moore,
William J. Hart, jr.,
John L. Vaiden,
Swift Ricne,
George Marvell,
Benjamin H. Page,
Frank F. Cunneen,
Raymond A. Deming,
Benjamin S. Kilmaster,

Raymond S. Hatch,
James E. Boak,
William A. Heard,
Charles H. Mecum,
George T. Howe,
Rudolph F. Hans,
Simson C. Stengel,
Wilder DuP. Baker,
Julius M. Moss,
Robert S. Wyman,
Lewis H. McDonald,
Horace H. Jalbert,
George S. Arvin,
Foster C. Bumpus,
William C. Burgy,
Frank P. Thomas,
Ralph O. Davis,
Sifrein F. Maury,
Martin Griffin,
William F. Roehl,
Donald F. Washburn,
Stuart D. Truesdell,
Frederick D. Powers,
Thomas C. Latimore, jr.,
Robert W. Cary,
Karl R. Shears,
Lloyd J. Wiltse,
Paul W. Fletcher,
Lawrence J. K. Blades,
Henry W. Hoyt,
Robert C. Starkey,
Joseph C. Arnold,
Robert P. Luker,
Clarence J. McReavey,
Oliver O. Kessing,
Wallis Gearing,
William K. Beard,
John H. Brown, jr., and
Ralph G. Pennoyer.

The following-named lieutenants (junior grade) to be lieutenants in the Navy from the 5th day of June, 1917:

Claude S. Gillette,
Benjamin F. Tilley, jr., and
Creed H. Boucher.

First Lieut. Elisha Theall, United States Marine Corps, retired, to be a colonel on the active list of the Marine Corps, an additional number in grade, to rank next after Albert S. McLemore, from the 31st day of May, 1917.

The following-named warrant officers and clerks for assistant paymasters in the United States Marine Corps to be second lieutenants in the Marine Corps, for temporary service, from the 1st day of June, 1917:

Leon L. Dye (clerk for assistant paymaster),
Lee W. Wright (clerk for assistant paymaster),
Reuben B. Price (clerk for assistant paymaster),
George P. Doane (clerk for assistant paymaster),
John W. Mueller (quartermaster clerk),
John F. McVey (quartermaster clerk),
John T. Baugh (quartermaster clerk),
Harold H. Rethman (quartermaster clerk),
Walter J. Green (clerk for assistant paymaster),
James E. Reich (clerk for assistant paymaster),
Carl S. Schmidt (clerk for assistant paymaster),
John F. Burnes (marine gunner),
Charles Ubel (quartermaster clerk),
Charles C. St. Clair (quartermaster clerk),
John Waller (quartermaster clerk),
Harry Halladay (quartermaster clerk),
Eugene L. Pelletier (quartermaster clerk),
Otto Salzman (quartermaster clerk),
Harry V. Shurtleff (quartermaster clerk),
Fred G. Patchen (quartermaster clerk),
William F. Beattie (quartermaster clerk),
Francis E. Pierce (marine gunner),
Harry W. Gamble (quartermaster clerk),
Leslie G. Melville (quartermaster clerk),
Edwin P. McCaulley (quartermaster clerk),
Robert F. Slingluff (marine gunner),
Roscoe Arnett (marine gunner),
Francis C. Cushing (quartermaster clerk),
Charles L. Eickmann (marine gunner),
Thomas Quigley (marine gunner),
Patrick W. Guilfoyle (marine gunner),
Frank Z. Beckner (marine gunner),
Nathan E. Landon (marine gunner),

Lieut. Col. Francis J. Koester.
Lieut. Col. John D. L. Hartman.
Lieut. Col. Robert L. Howze.
Lieut. Col. Guy H. Preston.
Lieut. Col. Edward Anderson.
Lieut. Col. George E. Stockle.
Lieut. Col. William T. Littebrant.
Lieut. Col. Michael M. McNamee.
Lieut. Col. Ralph Harrison.
Lieut. Col. Charles D. Rhodes.

FIELD ARTILLERY ARM.

To be colonels.

Lieut. Col. George G. Gatley.
Lieut. Col. LeRoy S. Lyon.
Lieut. Col. Tiemann N. Horn.
Lieut. Col. Charles P. Summerall.
Lieut. Col. William M. Cruikshank.
Lieut. Col. Otho W. B. Farr.
Lieut. Col. Dwight E. Aultman.
Lieut. Col. Adrian S. Fleming.
Lieut. Col. Brooke Payne.
Lieut. Col. William S. Guingard.
Lieut. Col. Albert J. Bowley.
Lieut. Col. Harry G. Bishop.
Lieut. Col. Willard D. Newbill.
Lieut. Col. Manus McCloskey.

COAST ARTILLERY CORPS.

To be colonels.

Lieut. Col. Clint C. Hearn.
Lieut. Col. William C. Davis.
Lieut. Col. Frank G. Mauldin.
Lieut. Col. Daniel W. Ketcham.
Lieut. Col. Thomas B. Lamoreux.
Lieut. Col. Andrew Hero, jr.
Lieut. Col. Frank E. Harris.
Lieut. Col. George Blakely.
Lieut. Col. Frank W. Coe.
Lieut. Col. William R. Smith.

INFANTRY ARM.

To be colonels.

Lieut. Col. Richard C. Croxton.
Lieut. Col. Edward N. Jones, jr.
Lieut. Col. Arthur Johnson.
Lieut. Col. Charles H. Martin.
Lieut. Col. William Weigel.
Lieut. Col. Thomas G. Hanson.
Lieut. Col. Herman Hall.
Lieut. Col. Marcus D. Cronin.
Lieut. Col. Charles S. Farnsworth.
Lieut. Col. Charles Gerhardt.
Lieut. Col. James T. Dean.
Lieut. Col. Ulysses G. McAlexander.
Lieut. Col. William K. Jones.
Lieut. Col. Edmund Wittenmyer.
Lieut. Col. Michael J. Lenihan.
Lieut. Col. Mark L. Hersey.
Lieut. Col. Frank H. Albright.
Lieut. Col. Frederic D. Evans.
Lieut. Col. Earl C. Carnahan.

Lieut. Col. Edson A. Lewis.
Lieut. Col. Charles E. Tayman.
Lieut. Col. James W. McAndrew.
Lieut. Col. Edward R. Chrisman.
Lieut. Col. Peter C. Harris.
Lieut. Col. Munroe McFarland.
Lieut. Col. William T. Wilder.
Lieut. Col. William R. Sample.
Lieut. Col. William R. Dashiel.
Lieut. Col. Eli A. Helmick.
Lieut. Col. William C. Bennett.
Lieut. Col. Frederic H. Sargent.
Lieut. Col. Wilson Chase.

HOUSE OF REPRESENTATIVES.

FRIDAY, *June 8, 1917.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou Great Spirit, Father-Soul, imminent in all the works of Thy hands, ever acting in and through the hearts of Thy children, make us susceptible to the holy influence that we may grow day by day intellectually, morally, spiritually, and leave behind us a record worthy of the precious gifts Thou hast bestowed upon us. Through Him who taught us the way and the truth and the life. Amen.

The Journal of the proceedings of yesterday was read and approved.

RIVER AND HARBOR BILL.

Mr. SMALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 4285, the river and harbor appropriation bill.

The question was taken, and the Speaker announced the ayes seemed to have it.

Mr. MANN. Mr. Speaker, I ask for a division.

The SPEAKER. The gentleman from Illinois demands a division.

The House divided; and there were—ayes 52, noes 44.

Mr. MANN. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. Evidently there is not. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas, 189, nays 119, answered "present" 5, not voting 117, as follows:

YEAS—189.

Adamson	Estopinal	Lee, Ga.	Sears

So the motion was agreed to.

The Clerk announced the following pairs:

For the session:

Mr. STEELE with Mr. BUTLER.

On this vote:

Mr. DICKINSON (for) with Mr. PAIGE (against).

Mr. MORIN (for) with Mr. KREIDER (against).

Mr. SCOTT of Pennsylvania (for) with Mr. KIESS of Pennsylvania (against).

Mr. VARE (for) with Mr. ROGERS (against).

Mr. DIXON (for) with Mr. TREADWAY (against).

Mr. GARLAND (for) with Mr. CLARK of Florida (against).

Mr. COSTELLO (for) with Mr. SCULLY (against).

Mr. HEATON (for) with Mr. DUNN (against).

Mr. ROWLAND (for) with Mr. HAMILTON of New York (against).

Until further notice:

Mr. WATSON of Virginia with Mr. MCCULLOCH.

Mr. LOBECK with Mr. GRAHAM of Pennsylvania.

Mr. EAGLE with Mr. GEORGE W. FAIRCHILD.

Mr. DALE of New York with Mr. ANTHONY.

Mr. LUNN with Mr. KAHN.

Mr. POU with Mr. MILLER of Minnesota.

Mr. SAUNDERS of Virginia with Mr. MCKENZIE.

Mr. MCANDREWS with Mr. HAYES.

Mr. BLANTON with Mr. BLAND.

Mr. KEY of Ohio with Mr. FULLER of Massachusetts.

Mr. GARNER with Mr. FORDNEY.

Mr. NEELY with Mr. KENNEDY of Iowa.

Mr. WELLING with Mr. PETERS.

Mr. SULLIVAN with Mr. NICHOLS of Michigan.

Mr. OLNEY with Mr. KEARNS.

Mr. MAHER with Mr. HULL of Iowa.

Mr. ASHBROOK with Mr. COOPER of Ohio.

Mr. BELL with Mr. FESS.

Mr. FIELDS with Mr. BOWERS.

Mr. HUDDLESTON with Mr. DYER.

Mr. THOMAS F. SMITH with Mr. POWERS.

Mr. OVERMYER with Mr. ROWE.

Mr. BRODBECK with Mr. DAVIS.

Mr. GANDY with Mr. FOCHT.
Mr. HARRISON of Virginia with Mr. FOSS.
Mr. BRUMBAUGH with Mr. DRUKKER.
Mr. MAYS with Mr. PRATT.
Mr. RAGSDALE with Mr. WALDOW.
Mr. BRUCKNER with Mr. SIEGEL.
Mr. CAREW with Mr. SNYDER.
Mr. FLYNN with Mr. SWIFT.
Mr. HAMILL with Mr. FREEMAN.
Mr. LEA of California with Mr. EDMONDS.
Mr. EAGAN with Mr. BRITTEN.
Mr. DEWALT with Mr. FRANCIS.
Mr. MARTIN of Illinois with Mr. HUSTED.
Mr. CHARLES B. SMITH with Mr. IRELAND.
Mr. DOOLING with Mr. SMITH of Michigan.
Mr. TALBOTT with Mr. BROWNING.
Mr. TAGUE with Mr. KENNEDY of Rhode Island.
Mr. STEPHENS of Nebraska with Mr. SLOAN.
Mr. BARNHART with Mr. MORGAN.
Mr. HULL of Tennessee with Mr. HILL.
Mr. LITTLEPAGE with Mr. COOPER of West Virginia.

Mr. BROWNING. Mr. Speaker, I am recorded as "present." I have a general pair with the gentleman from Maryland [Mr. TALBOTT]. If he were present, he would vote "aye," and I wish to change my vote and vote "aye."

The name of Mr. BROWNING was called, and he voted "Aye."

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present, and the Doorkeeper will unlock the doors.

RIVERS AND HARBORS.

Mr. SMALL. Mr. Speaker, pending going into the Committee of the Whole House on the state of the Union——

Mr. MANN. We have just voted to go into the Committee of the Whole. All the Chair can do——

Mr. SMALL. Pending that——

Mr. MANN. "Pending that" is too late.

The SPEAKER. It is not pending.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 4285, with Mr. HARRISON of Mississippi in the chair.

The CHAIRMAN. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 4285) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

EXTENSION OF REMARKS.

Mr. MASON. Mr. Chairman, will the gentleman from North Carolina yield to me for a moment? I want to ask unanimous consent to extend my remarks in the RECORD on the food question.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

RIVERS AND HARBORS.

Mr. SMALL. Mr. Chairman, the majority of the Committee on Rivers and Harbors have directed me to report this bill with entire confidence in its merits, in its necessity, and as an emergency bill which ought to be enacted at this session of Congress.

Mr. MADDEN. I would like to hear the gentleman state what the emergency is, because I would be interested in that.

Mr. SMALL. Mr. Chairman, if the gentleman from Illinois and other gentlemen will do me the honor to listen to me for a brief time, and if I shall be able to express with clearness the thought and convictions which I have regarding this bill, it is my hope that any man who is open-minded and who is genuinely in favor of increasing our facilities for transportation will be convinced. [Applause.]

Mr. MADDEN. I would like to have the gentleman give us some information as to what he means as to these emergency measures.

Mr. SMALL. I will endeavor to discuss that question.

There is necessity for this bill at this session, because since 1910 Congress has passed annual rivers and harbors bills. Each of these bills has been predicated upon the necessity of appropriations for the ensuing fiscal year, just as with other annual appropriation bills. The House passed a river and harbor bill at the last session, but, as is well known, it failed of passage in the Senate, along with the sundry civil, the military appropriation bill, and other measures. So that if the river and harbor bill shall not pass at this session there will be no provision for maintenance or the continuation of improvements for the fiscal year ending June 30, 1918. And if there shall be the lapse of a year great financial and economic loss will ensue to the country.

Mr. STAFFORD. Will the gentleman yield?

The CHAIRMAN. Will the gentleman from North Carolina yield to the gentleman from Wisconsin?

Mr. SMALL. Certainly.

Mr. STAFFORD. I understood from the report of the minority that there were some $31,000,000 or more available.

Mr. SMALL. If the gentleman will wait I will discuss that fully.

Mr. STAFFORD. I would like to ask this question, whether he claims there will be no money available at the end of the forthcoming fiscal year for utilization of the projects that have already been authorized?

Mr. SMALL. I will not say there will be no money——

Mr. STAFFORD. Will there not be millions available?

Mr. SMALL. There will not be. Every appropriation made in this bill is made for purposes which are not covered by the available balances on hand. I will ask gentlemen, if they will kindly do so, to wait until I present the general features of the bill, although I will be very glad in the meantime, if gentlemen think it proper, to submit to an interruption.

If there should be a lapse of a year, there will be great loss ensuing to the country. There will be deterioration of channels. There will be loss in the laying up of tugboats, of dredge boats, snag boats, and other vessels; the discharge of trained crews; the disorganization of other trained forces in the different engineering districts connected with permanent river and harbor works. Many improvements which have heretofore been adopted, other than channels, such as jetties, dikes, retaining walls, piers, breakwaters, and revetment work, will disintegrate and decay unless they are kept in repair. It will cost less to make those repairs promptly than if postponed. The passage of this bill at this session is distinctly in the interest of economy.

I do not hesitate to say that at the beginning of this session it was my opinion that we should pass a river and harbor bill similar to the bill which passed at the last session of Congress, subject only to such modifications as might have been made necessary by the lapse of time or by war emergencies. But it seemed to be the opinion of the House upon both sides that this bill should be confined to such items as could be considered emergencies, so that the River and Harbor Committee at its first meeting, after full discussion, directed the chairman to confer with the Secretary of War and ask him to make specific recommendations within those limitations. And it is not improper to state that the Secretary called upon the Chief of Engineers and directed him to make specific recommendations covering, first, the necessary maintenance items; second, such items for the further improvement of projects as have been heretofore adopted where great loss would ensue if there was a lapse of a river and harbor bill, or were connected with national defense; and, third, such new projects as might be necessary as war emergencies or connected directly or indirectly with the successful prosecution of the war.

Mr. MADDEN. Will the gentleman allow me to interrupt him there?

Mr. SMALL. Yes.

Mr. MADDEN. I would like to have the gentleman enumerate the war-emergency matters he refers to. That would be interesting to the House. I would like to have him state the particular projects.

Mr. SMALL. I will do so in good time. In order that the House may know how this bill has been curtailed, I may refer the House to the fact that in the last bill there were 82 new projects, while in this bill there are only 33, a reduction of 49 new projects from the last bill. I may further add that in this bill there are five new projects which are all a part of New York Harbor and might fairly be considered as one comprehensive project. I refer to the upper bay, opposite Anchorage Grounds, Craven Shoal, channel between Staten Island and Hoffman and Swinburne Islands, Hudson River Channel, and East River and Hell Gate. If these be considered as one, the number of new projects in this bill will be reduced to 29.

In answer to the gentleman from Chicago [Mr. MADDEN], I might say that among the new projects which were not in the last bill are certain improvements earnestly recommended by the Secretary of the Navy and concurred in by the Secretary of War.

Mr. MADDEN. Will the gentleman allow me to interrupt him?

Mr. SMALL. Yes.

Mr. MADDEN. I understood the gentleman to say that there were some new projects in this bill considered as matters of emergency. Now, I want to have the statement made direct as to what these new projects are that are considered as emergency matters.

Mr. SMALL. I will answer the gentleman cheerfully.

Mr. HARDY. Might I be allowed to suggest, evidently the gentleman from North Carolina is coming right along the line that the gentleman asks. Why not let him go along and state it?

Mr. MADDEN. I think I may be able to ask my question without the gentleman from Texas directing me how to do it.

Mr. HARDY. That is true; but why should not the gentleman allow the gentleman from North Carolina to go right along and make his statement?

Mr. MADDEN. The gentleman from North Carolina is 21 years of age and he can look out for himself.

Mr. HARDY. I was just appealing to the gentleman from Illinois to let him proceed in his own way.

Mr. SMALL. I will cheerfully furnish the information. In the naval appropriation bill approved August 29, 1916, there was a provision directing the Secretary of the Navy and the Secretary of War to consider and report to Congress any improvements of harbors or other waterways which were necessary for the successful operation of the fleet for national defense. That report was made on March 29, 1917, and is contained in House Document No. 140, Sixty-fifth Congress, first session, and they recommend 40 feet, for instance, from the lower bay in New York to the navy yard, and also 40 feet through Hell Gate, leading into Long Island Sound. That is a very expensive and a very important improvement, earnestly insisted upon by the Navy Department and included in the bill.

Mr. HULBERT. Mr. Chairman, will the gentleman permit me to suggest this, that a reference to that lower-bay item will be found in the committee's report, on pages 16 to 21 inclusive.

Mr. SMALL. Yes; the gentleman is correct.

The Navy Department also earnestly recommended an increase of depth from 35 feet to 40 feet to the Norfolk Navy Yard. That is in the bill. They also recommended an increase of the depth to 35 feet to the Mare Island Navy Yard by dredging the channel through San Pablo Bay and through Mare Island Straits. They also recommended a deepening of the channel in San Diego Harbor, Cal., so as to remove an obstruction known as Middle Shoals. Those, with some minor recommendations, are all included in the present bill.

Now, as I said, there were at least 49 new projects in the last bill which are not in the present bill. There are also several new projects in this bill, not contained in the last bill, and also increased appropriations for several items carried in both bills, which involve a total increase of $2,489,000. Every appropriation in this bill constitutes an emergency, either for commerce or of national defense, and for the satisfaction of Members who may have been dubious I wish to state that there is no item of appropriation in this bill, either for maintenance or improvement, which was not specifically recommended by the Secretary of war.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Certainly.

Mr. LENROOT. I notice in the majority report a quotation is made from the letter of transmittal by the Secretary of War as to what his directions were to the Chief of Engineers in the preparation of these recommendations. As to the new projects I find this language:

> And that he shall include such new projects as are intimately associated with the question of national defense in a military way.

Now, I want to ask the gentleman if there are any items in this bill in the way of new projects that are not intimately associated with the question of national defense in a military way?

Mr. SMALL. Some of the items are more intimately associated than others; most of them are associated directly with national defense. Others are indirectly connected with national defense in that the improvements are necessary for the more effective movement of commodities which are essential in the prosecution of the war.

Mr. LENROOT. Yes.

Mr. SMALL. And I would like to ask the gentleman whether he is in favor of abandoning improvements of the waterways of the country for the benefit of commerce?

Mr. LENROOT. I am speaking now of new projects. My inquiry was directed only to the question of new projects. Now, I would like to have an answer from the gentleman as to whether or not they have followed the recommendations of the Secretary of War, that new projects shall be confined strictly to such as are intimately associated with the question of national defense in a military way? If they have not, they have not the recommendation of the Secretary of War as to such new projects as do not come within that category.

Mr. SMALL. All new projects as above stated are associated either in a stretegic way or for the movement of products necessary in the prosecution of the war. I will further satisfy the gentleman that this bill has the approval of the Secretary of War. There will be no question about that after I get through.

Now, coming to this bill in some detail, the bill carries a total of $26,893,000, made up as follows:

For continuing and completing improvements, $10,142,400; for continuing improvements and maintenance, $4,742,100; for maintenance alone, $5,002,500; for new projects, carrying initial appropriations of $6,719,000; surveys, and so forth, $200,000; for Waterway Commission, $100,000; for the expenses connected with the purchase and condemnation of the Chesapeake and Delaware waterway, $5,000; making a total of $26,893,000.

The new projects in the bill involve a total cost of $37,978,573. In addition, the committee intend to offer amendments during the consideration of the bill for the adoption of a new project for Portland Harbor, Me., costing $300,000, and also for increasing the depth from East River through Hell Gate to Long Island Sound to 40 feet at an additional cost of approximately $2,180,000. The Canadian Government, through the British embassy, has requested our Government to make this improvement at the harbor of Portland, Me., for the accommodation of large ships carrying supplies abroad during the winter season when the Canadian ports are closed by ice. The increased depth through Hell Gate was urged by the Navy Department. The committee agreed to these amendments after the bill had been reported. The initial appropriations on all the new projects carried in this bill constitute about 17 per cent of the total cost, so that if this proportion of appropriations is carried forward in succeeding bills, they should be completed, on an average, in five and a half or six years. Many of them will be completed at an earlier date.

The surveys in this bill show a diminution from previous bills. This bill provides for only 76 new surveys. In the 1915 bill there were 215 surveys authorized. In the 1916 bill there were 128 surveys authorized. Many gentlemen have been of the opinion that every survey means a favorable report, but a tabulation for the six years ending June 30, 1915, shows that of the surveys previously authorized only 33 per cent, or one-third, had been favorably reported.

Mr. LENROOT. Will the gentleman yield for one question on that subject?

Mr. SMALL. Certainly.

Mr. LENROOT. In view of the statement the gentleman has just made, that only one-third of the surveys are favorably reported on, does the gentleman think that now, when we are in such dire need of every officer that the Government has, we ought to require the Army engineers to be expending time and effort upon making surveys, of which, as he says, not more than one-third will ever receive favorable action?

Mr. SMALL. That involves primarily the question whether in time of war we should abandon the improvement of our rivers and harbors, and whether we should adopt authorizations for examinations and surveys of additional improvements. These surveys are demanded by various sections of the country. They believe they have merit, which can only be determined by a survey. I understand the gentleman to be willing that we should have no river and harbor bill at this session, and that we should abandon our rivers and harbors during this period of war.

Mr. LENROOT. No; I am in favor of maintaining our harbors and such projects as are now in process of construction, and as ought to proceed in order to avoid great loss if they are abandoned.

Mr. SMALL. Is the gentleman familiar with the minority report which has been filed on this bill? If he has it before him, will he kindly look at the first paragraph in the minority report, from which I read this language:

> In these days of national crisis only necessary expenditures should be made for river and harbor work, and these should be based upon the important commercial, military, and naval needs of the Government.

Does the gentleman agree with that?

Mr. LENROOT. Exactly. That is exactly what I say.

Mr. SMALL. This bill provides for only the important commercial, military, and naval needs of the Government, and if the gentleman will listen, he will be convinced. There is evidently

little difference between the gentleman from Wisconsin and the majority of the committee which framed this bill. I am satisfied further that the bill will secure his entire approval.

Mr. HULBERT. Mr. Chairman, will the gentleman permit an interruption for the purpose of propounding a question to the gentleman from Wisconsin?

Mr. SMALL. Certainly.

Mr. HULBERT. I should like to ask the gentleman from Wisconsin if he is in favor of such new projects as are intimately associated with the question of national defense in a military way?

Mr. LENROOT. I am, if that is the fact; yes.

Mr. HULBERT. Is the gentleman in favor, for instance, of such a new project as will admit of the capital ships of the Navy securing admission to our navy yards at all stages of the tide, which they are not able to do now in any navy yard in the United States?

Mr. LENROOT. I certainly am, if the Navy Department recommends that it is necessary.

Mr. HULBERT. I will say to the gentleman that such a recommendation accompanies the report in this case.

Mr. LENROOT. Then I am in favor of that particular proposition.

Mr. HULBERT. Thank you.

Mr. SMALL. And the gentleman will be in favor of the whole bill. [Applause.]

In this bill what is known as the grouping system is amplified. Gentlemen who have studied the bill will observe that there are a large number of items of maintenance and some items of improvement, which are grouped together. This is not a new method in a river and harbor bill. The grouping system dates back as far as the time when Mr. Burton was chairman of the committee, in the early days of his service, and this bill only increases or amplifies the plan. This is criticized in the minority report, and I would like to explain briefly to the committee the reasons for amplifying it. It makes for more economical administration in the expenditure of the appropriations.

To illustrate, there are in this bill a number of groups containing three, four, five, six, seven, and eight projects, carrying a gross sum for maintenance. Out of a group of eight it may be that estimates have been made for only two or three, and yet in the expenditure of the gross appropriation during the fiscal year it may become necessary to expend a part of the sum on one or more of the projects for which no estimate was submitted because some deterioration not anticipated had occurred, due to storm or flood. The grouping plan permits this to be done; otherwise there would be a delay of a year or more, awaiting another river and harbor bill.

Some gentlemen have asked what limitation there was upon the engineers in the expenditure of this money. In answer I may say that the engineers are limited in the expenditure of the gross appropriation for maintenance to those items for which estimates have been made, unless in the meantime some necessity of expenditure for maintenance upon the items for which estimates have not been made shall have occurred.

So that this grouping system makes, as I said, for better and more economical administration.

I wish to say further that it does not lie in the mouths of some gentlemen who filed the minority report to criticize this grouping system because they have in the past advocated a lump-sum appropriation for the maintenance of all the improvements in the country to be allotted and expended under the sole discretion of the Secreary of War and the Chief of Engineers. This occupies a wise middle ground, can be administered fairly, is in the public interest, and makes for a wise and economical administration.

This bill carries a provision for a waterways commission composed primarily of the heads of several departments of the Government in which they are directed to study water in its correlated uses, reaching conclusions and reporting the same to Congress. This commission has no legislative function. Their only province is to submit to Congress the results of their study and deliberation.

The President is exceedingly insistent that this or some similar provision be included in this bill, and, I think, I may with entire propriety give at least one reason for his attitude; that is, he says that the river and harbor bill has been under criticism. Some citizens and newspapers and some Members of this House have undertaken to state that it is a pork-barrel bill, that it is formulated for the benefit of selfish interests, and that unmeritorious items are included in it, and the President is of the opinion that a full and complete investigation of the matter, an independent, impartial investigation, with the advice and aid of all necessary experts, would go far, when such reports should be submitted to the country, in removing these prejudices from the public mind. A majority of the committee hope that the provisions of this commission will meet with the approval of the House.

Mr. ROBBINS. Will the gentleman allow me to ask him a question?

Mr. SMALL. Yes.

Mr. ROBBINS. Under the act of 1892 the engineers of the Government were constituted a commission for this purpose. Is it proposed to abolish them and create this commission, which carries an appropriation of $100,000, in lieu of the other commission, which cost the Government nothing?

Mr. SMALL. The gentleman from Pennsylvania is mistaken. The gentleman evidently refers to the provision in the river and harbor act of 1902 creating the Board of Engineers for Rivers and Harbors. This board reviews the reports of district engineers and special boards.

Mr. ROBBINS. Is it not a fact that in the river and harbor bill a project is not considered unless it has passed the first engineer commission and been approved by the Chief of Engineers? I have had some experience in those matters, and that is the difficulty I always met with.

Mr. SMALL. I think I understand the gentleman. It is sometimes the case that an item in the river and harbor bill specifically requires a special board of engineers to consider it, and that board of engineers examines and makes report in lieu of a single engineer, ordinarily the district engineer. All reports of examinations and surveys by district engineers or special boards of engineers are referred to the Board of Engineers for Rivers and Harbors for review, and they have the power to modify or reject such prior report. The gentleman evidently refers to the Board of Engineers for Rivers and Harbors.

Mr. McLAUGHLIN of Michigan. Will the gentleman yield?

Mr. SMALL. Yes.

Mr. McLAUGHLIN of Michigan. Did not the gentleman from Pennsylvania mean to ask whether or not any project is approved by your committee and appropriation recommended for it if it has not passed through the regular course of the district engineer, the division engineer, the Board of Engineers for Rivers and Harbors, and the Chief of Engineers and has the approval all along the line? Does the gentleman say that the committee recommends no project or improvement which has not passed through that line and received the final approval of the Chief of Engineers?

Mr. SMALL. The gentleman is entirely correct.

Mr. McLAUGHLIN of Michigan. Is the gentleman from North Carolina correct in his answer which he made? The river and harbor bill which passed the House last year provided for an improvement of a river in Arkansas, where the improvement was approved by the local engineer and disapproved by every superior officer, including the Chief of Engineers; and still the Committee on Rivers and Harbors accepted the report of the local engineer and carried the appropriation for the improvement.

Mr. SMALL. Does the gentleman remember the name of the river?

Mr. McLAUGHLIN of Michigan. No; but it was not the river where they could not find the water.

Mr. SMALL. I think I can correct the gentleman and also answer him. The gentleman evidently refers to the Arkansas River. The report there was to the effect that the project be modified to the extent of an annual appropriation of $35,000 to continue for a period of five years, at the end of which time another and final report was to be made as to whether the river was worthy of further appropriations by the Federal Government. That report had the approval of the Board of Engineers for Rivers and Harbors and also the Chief of Engineers. During the day, in order that the gentleman may have the information, I will hand him a copy of that report.

Mr. McLAUGHLIN of Michigan. I want to say that I am in favor of river and harbor improvement, and I am directly interested, representing that kind of a district, and that is why I wish to have these unworthy projects eliminated. That is why I have criticized some of the work of the committee. I hope that I may be accorded the privilege of criticizing it again when occasion offers, but not in any sense in opposition as is evidenced sometimes on this floor to all river and harbor improvement. I wish real improvements made and worthy projects taken care of, and only those.

Mr. SMALL. I thank the gentleman from Michigan for his criticism and for his statement. I want to say now to the House, speaking for the chairman of this committee as long as he shall be chairman, and as I believe for the entire body of the committee, that we will welcome criticism. We will welcome publicity. We will not knowingly bring into this House any un-

worthy projects and we will not bring here for consideration any project which has not had the final approval of the Chief of Engineers. It is our purpose to convince the House and convince the country that a river and harbor bill properly formulated is as necessary for the welfare of the American people and of the Government of the United States as is any other annual appropriation presented to the House.

I hope now if any gentleman has any criticism of this bill he will take occasion during its consideration to express that criticism, only asking that he shall confine himself to facts; that he shall make no erroneous statement; and that he shall deal fairly with it and be intellectually honest in his criticism. I regret to state that has not always been the case with critics of river and harbor bills.

Mr. RAGSDALE. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Yes.

Mr. RAGSDALE. Has the gentleman had occasion to have any dealings with any of the new commissions that have been recently created?

Mr. SMALL. I would rather the gentleman would be specific.

Mr. RAGSDALE. I merely ask the gentleman, if he has; was it before or after the transactions with them that he recommended section 16 for a new commission in this bill?

Mr. SMALL. Mr. Chairman, that reminds me that I intended to say with reference to this commission that gentlemen well know there has been a very insistent propaganda by intelligent, and some of them eminent, gentlemen in and out of Congress for some years for the kind of an investigation which this section 16 provides, and there are many patriotic citizens who believe in river and harbor improvements who have thought that the creation of such a commission would tend to clarify the public mind as to river and harbor improvements and remove an unfounded prejudice.

Mr. RAGSDALE. Is the gentleman himself in favor of this commission?

Mr. SMALL. Oh, I do not think the gentleman ought to have asked the question, but I am always frank, or try to be. I would not have originally proposed a commission in this form, and before I get through, when I come to discuss some remedy for the lack of commerce upon some of our interior rivers, I am going to make a suggestion which I think will answer the gentleman; but, under all of the circumstances, I am in favor of this provision in this bill. Who is there in this House who has not been constrained to yield his judgment upon matters? There is not an intelligent, independent man who can say that a session of Congress has passed when he did not at one time, or many times, feel under compulsion to yield his judgment to the judgment of others in items of appropriation as well as in items of general legislation. I would rather not yield further unless the gentleman has something further to say.

Mr. RAGSDALE. I was going to ask the gentleman this: As I understand it, this section is subject to the point of order, is it not?

Mr. SMALL. I do not think so.

Mr. SLAYDEN. Mr. Chairman, will the gentleman yield.

Mr. SMALL. Yes.

Mr. SLAYDEN. If I understood the gentleman correctly, a few minutes ago he said that no bill would be brought in here by the committee as now constituted that did not have finally the approval of the Chief of Engineers. Is not that really transferring to the Chief of Engineers authority to write any piece of legislation pertaining to rivers and harbors, so far as the attitude of the committee is concerned?

Mr. SMALL. I do not think so. We must have engineers to pass upon the technical features. We must have some impartial and independent authority outside of Congress to examine a proposed improvement, to look into its commercial importance, to make a detailed survey, to make estimates of cost, and to report whether in his or their opinion the amount which the improvement will cost is consistent with the benefits which will accrue; but, after all, it is up to Congress as to whether any improvements favorably reported by the Chief of Engineers shall be adopted by the Congress.

Mr. SLAYDEN. It is conceivable that the majority of Congress may differ from the Chief of Engineers as to the propriety or necessity for a particular work, and the gentleman's statement amounts to a declaration that he shall have the power of veto upon any project of that kind, so far as the reports from the committee are concerned.

Mr. SMALL. That is a matter which has been discussed very often, and the gentleman has sympathizers with his view among some Members of Congress, but I think that we have now a very wise condition in the examination of projects before they shall be favorably considered by Congress.

Mr. SLAYDEN. That is true, as to the technical features. The gentleman understands that I do not represent a district that touches the coast, or that has a river of any importance in it, but I do not like the idea of surrendering the control of legislation to an executive officer.

Mr. SMALL. I am in sympathy with the general proposition, but I should like to say that when Congress authorizes a preliminary examination and a survey of any project the Chief of Engineer directs the district engineer to make the first investigation, unless by reason of its importance a special board of engineers is appointed. The district engineer will make a report favorable or unfavorable, and then it goes to the division engineer of the district, and he studies it and passes upon it, and from the division engineer it goes to the Board of Engineers for Rivers and Harbors, consisting of seven distinguished engineers, a majority of whom shall not be below the rank of colonel. They examine it carefully and make their report, and finally it goes to the Chief of Engineers, where it is carefully studied in his office, and it is believed by students of river and harbor improvements that these checks and balances, so to speak, these repeated investigations by able, impartial, and trained engineers constitute a sure safeguard against the favorable reporting to Congress of unworthy and unmeritorious projects.

Mr. ROBBINS. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Yes.

Mr. ROBBINS. I think I did not make myself clear to the gentleman a few moments ago. The act of 1902 provides, with reference to river and harbor improvements, as follows, and I see the gentleman's bill carries a commission with an expenditure of $100,000 to sustain it. I want to know whether the commission is intended to supersede this one; and if so, why?

There shall be organized in the office of the Chief Engineer of the United States Army by detail a board of five engineering officers, whose duty shall be fixed by the Chief of Engineers, and they shall report upon examinations and surveys provided by Congress and all projects with reference to river and harbor improvements heretofore or hereafter provided for.

Mr. SMALL. Mr. Chairman, if the gentleman will pardon me, the act which he cites created the Board of Engineers for Rivers and Harbors, to which I have heretofore referred.

Mr. ROBBINS. Why is not this satisfactory, and why should we have a new board?

Mr. SMALL. As already explained, that board constitutes a court of review, and it is in existence to-day, and to it are referred all reports of examinations and surveys ordered by Congress which have first been made by the district engineer, reexamined by the division engineer, and then referred to this Board of Engineers for Rivers and Harbors.

Mr. ROBBINS. Have they approved this bill?

Mr. SMALL. They have. There is not an item in this bill that has not had the approval of the Board of Engineers for Rivers and Harbors.

Mr. ROBBINS. That is what I wanted to know.

Mr. SMALL. Some reference is made in the minority report to what are called the large balances of appropriations on hand. The minority report refers to those balances and submits the query, Why have a river and harbor bill at this session of Congress with those balances on hand for expenditure by the Chief of Engineers under the approval of the Secretary of War? It is true the Board of Engineers estimates that on July 1, 1917, there will be on hand an available balance of nineteen million eight hundred and thirty-eight thousand and some odd dollars. I thought I understood the situation, but I submitted to the Chief of Engineers an inquiry asking for an explanation of this matter, and I would like to read the reply of the Chief of Engineers, which is very brief. It is as follows:

MAY 26, 1917.

1. In response to your letter of May 25, requesting a statement of the reasons why the existence of the available balances for river and harbor works on March 1, 1917, to which attention is called in the minority report on the river and harbor bill, does not affect the necessity for the additional appropriations proposed in the bill, I have to state that the main and sufficient reason is that these balances all contemplate different work from that proposed with the funds carried in the bill. The details of the operations, both for the funds now available and for those carried in the bill for the fiscal year 1918, are set forth in the annual report for 1916, in connection with each work, under the heading "Proposed operation." It is impracticable, of course, to discuss these operations in detail in this letter in the short time that is available.

2. In many cases there have been appropriations requested for projects where prior appropriations have been practically exhausted. It is impossible in general to meet the needs of one work by use of funds pertaining to another improvement as there is no authority of law for such transfer. You will recall that in the preparation of the bill the items for continuing improvement were limited to those projects where the urgency of the work appeared to be sufficient to require continuation of operations even under existing circumstances. A considerable portion of the aggregate carried by the pending bill is for

new projects, and for these, of course, no money is now available. These new projects were selected with reference to the present emergency.

Very respectfully, W. M. BLACK.
Brig. Gen., Chief of Engineers.

Mr. SWITZER. Will the gentleman yield?

Mr. SMALL. I will.

Mr. SWITZER. I would ask the chairman if this presents any new situation. Is it not the condition at the end of every fiscal year at the time we prepare every river and harbor bill that there is an unexpended balance?

Mr. SMALL. The gentleman is absolutely correct.

Mr. SWITZER. So it is no new condition?

Mr. SMALL. It has always existed at the time when the House was considering the annual river and harbor bill.

Mr. STAFFORD. Will the gentleman yield?

Mr. SMALL. I will.

Mr. STAFFORD. I was much interested in the letter of the Chief of Engineers saying that additional appropriations carried in this bill would be for different work. I did not assume that they would utilize the appropriations of this bill for the same work and go over it twice, and I would like to inquire, however, as the report from the Chief of Engineers states that $19,838,432.37 of past appropriations will be unexpended and not contracted for on July 1, 1917, whether that amount would not be available for contract work during the fiscal year for which the gentleman is now asking the House to appropriate?

Mr. SMALL. The available balances may be expended on the projects only for which they were originally appropriated.

Mr. STAFFORD. I grant you the money could not be utilized for new projects that have not heretofore been authorized.

Mr. SMALL. Nor for the continued improvement of other projects which have been heretofore adopted.

Mr. STAFFORD. Except as to those items or projects to which the money related, but there would be $19,000,000 available for some projects for which money has been heretofore appropriated for the work for the next fiscal year.

Mr. SMALL. I am glad to have the question of the gentleman. These balances which it is estimated will be available on July 1, 1917, can only be expended on the projects for which the appropriations were originally made. But the expenditure of these several available balances has been delayed for several substantial reasons. Many appropriations are made conditioned upon local cooperation or the performance or happening of some subsequent event, which has not occurred or been performed. Let me give the gentleman an illustration of projects of that kind. Here is the Bronx River, N. Y., for which it is estimated there will be a balance on hand July 1 of $315,000. That awaits the transfer of land for right of way. Take Jamaica Bay, N. Y., for which it is estimated there will be $490,000 available. That awaits a condition imposed on the city of New York to dredge an inland basin which has not yet been completed. Flushing Bay, N. Y., it is estimated will have a balance of $80,300. That is to be expended upon the granting of a right of way.

Mr. HULBERT. Will the gentleman yield?

Mr. SMALL. In a moment.

Mr. HULBERT. I wanted to ask if the gentleman could not cite Jamica Bay, which is one of the more important——

Mr. SMALL. I just stated it.

Mr. HULBERT. Which would more accuratedy illustrate the point raised by the gentleman from Wisconsin.

Mr. SMALL. I just stated that.

Mr. STAFFORD. The chairman of the committee just referred to that before the gentleman rose.

Mr. HULBERT. I was interrupted at the moment by an interrogatory.

Mr. SMALL. Take Tennessee River, Chattanooga to Browns Island, for which it is estimated there will be available $514,000. That was conditioned on certain local cooperation, which has not been entirely complied with. In like manner I could recite every project for which there is an available balance and point out some sufficient reason why the appropriation had not been wholly or partially expended. And then, again, many of these available balances as of July 1 are for projects not appropriated for in this bill. I may mention the removal of the Coenties Reef in New York Harbor, $150,000, which has been heretofore appropriated for and is awaiting cooperation from the city of New York, and for the further reason that they have not been able to expend it. Take the upper Hudson River, $860,000, and not included in this bill; Arthur Kill or Staten Island Sound, $429,000; St. Marys River, at the falls, $316,373; San Joaquin River, $140,000; the mouth of the Columbia River, Oreg., $189,000, and so forth. So that this available balance as of July 1 attaches to projects for which the money can not be expended for various reasons or for projects for which there are no appropriations in this bill.

Then I would like to call the attention of the gentleman to the annual report of the Chief of Engineers, the last annual report for the fiscal year ending June 30, 1916, where he will find in the discussion of every item, under the paragraph headed "Proposed operations," a statement of how it is proposed to expend the available balance on hand and how it is proposed to expend the amount for which an estimate is made and for which an appropriation is asked. So all that gentlemen have to do, if they can find any item here where there is an available balance, is to go to the report of the Chief of Engineers and they will ascertain, either because some condition of local cooperation has not been complied with, or some other reason stated, that the expenditure of the available balance has not been made. But the balance is available when it can be lawfully expended.

I hope gentlemen who have any doubt as to the necessity for this bill because of these alleged available balances will seek the facts in the annual report of the Chief of Engineers, when they will be abundantly satisfied.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SMALL. Mr. Chairman, may I ask for further time? There are some other matters which I wish to discuss.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for how long?

Mr. SMALL. Thirty minutes.

The CHAIRMAN. Is there objection?

Mr. HULBERT. Reserving the right to object, I would like to ask if it is intended to get to a general agreement with regard to general debate?

Mr. SMALL. We will do that later. But in the meantime gentlemen who wish to discuss the bill will not be denied the opportunity.

Mr. FREAR. Reserving the right to object, which I do not intend to do, I understand we are likely to discuss the bill under general debate all the afternoon. That is the understanding of some who have left the Hall.

Mr. SMALL. There have been several requests for time on my side, and the gentleman from Ohio [Mr. SWITZER] has several requests.

Mr. FREAR. I state that so that we may understand.

Mr. STAFFORD. Do we understand from the chairman of the committee that the bill will not be considered under the five-minute rule to-day?

Mr. SMALL. Directly I will ask the committee to rise and agree upon time. I do not know myself exactly the time which will be demanded.

Mr. STAFFORD. It is now a quarter to 2 o'clock. The gentleman asks for an extension of half an hour, and that will bring the time to a quarter after 2. There are gentlemen who will consume two or three hours. Why can not we have an understanding in the committee, without its having a binding effect, that the bill will not be considered under the five-minute rule to-day?

Mr. SMALL. We will try to have an agreement.

Mr. FREAR. After the gentleman has consumed an hour and a half, is he going to provide for a limitation of time?

Mr. SMALL. As I said a moment ago to the gentleman from New York, I will say to the gentleman from Wisconsin, so far as I am concerned no man who wishes to discuss the bill will be denied the privilege.

Mr. FREAR. Then why deny the privilege?

Mr. SMALL. The gentleman knows that the custom is here, when we are trying to ascertain the time, to try to find out how many wish to speak and how long they wish to speak.

Mr. GALLAGHER. Mr. Chairman, reserving the right to object, I would like to ask the chairman this question: Will there be a disposition on the part of any member of the committee to attempt to shut off the minority in this general debate?

Mr. SMALL. Not on my part.

Mr. GALLAGHER. The Chairman will have had an hour and a half, and why can not we have an hour and a half?

Mr. MANN. You will have that.

Mr. GALLAGHER. He says he is going back into the House.

Mr. SMALL. The gentleman is anticipating a difficulty that will not occur.

The CHAIRMAN. The Chair will state to the gentleman from Illinois [Mr. GALLAGHER] that he desires to and will recognize each gentleman for equal time on each side.

Mr. HEFLIN. Mr. Chairman, is it not the purpose to drift along awhile and hear the Members who feel like discussing the bill, and then agree on time?

Mr. SMALL. I will say that the gentleman from Ohio [Mr. SWITZER], who will control the time on the other side, is not disposed to deny anyone.

Mr. GALLAGHER. Why will the gentleman from Ohio control the time?

Mr. SMALL. Because the gentleman from Iowa [Mr. KENNEDY], the minority ranking Member, is ill.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina [Mr. SMALL]? [After a pause.] The Chair hears none. The gentleman is recognized for 30 minutes more.

Mr. SMALL. I have not yet discussed a few features of this bill, which I am exceedingly anxious to present.

There is a minority report on this bill, signed by six or seven members of the committee. In that minority report certain items of appropriation in this bill are criticized. I may summarize them. They are the Chesapeake and Delaware waterway; the Ohio River; the upper Mississippi River; the lower Missouri River; the Tennessee River; the Cumberland River; the Los Angeles Harbor, Cal.; Richmond Harbor, Cal.; the waterway from the Mississippi River to the Sabine River, La.; the Congaree River, S. C.; and the item for the removal of the water hyacinth.

I want to ask the gentlemen of the minority who submitted this report to make good their contention that any one of these projects are unworthy and ought not to be included in this bill. And I only ask them to state facts, official facts, and indulge in no erroneous conclusions and to be fair about the matter and let us have it out before the House here as to whether or not any one of these items included within this bill is unworthy. I challenge the gentlemen of the minority who have offered this report to do so, and I hope to have an opportunity of listening to them.

I will not take up the time of the House now except to say that all these appropriations are worthy, that they are a commercial necessity, that they stand as an integral part of the transportation system of our country and ought to have the approval of every Member of this House who believes in adding to our instrumentalities of transportation waterways and water carriers. [Applause.]

Mr. SNELL. Mr. Chairman, will the gentleman yield there?

Mr. SMALL. Yes.

Mr. SNELL. As I understand, then, we are taking up projects that have a commercial urgency as well as those having emergency defense features?

Mr. SMALL. Yes; emergency commercial projects.

Mr. SNELL. I understood the Chief of Engineers did not recommend what he considered commercial projects.

Mr. SMALL. The bill contains appropriations for projects which are regarded as commercial emergencies. I would not attempt to mislead the House by saying that every item in this bill is directly essential for national defense.

Mr. SNELL. I understood from the Chief of Engineers that that is what he recommended.

Mr. SMALL. If the gentleman will bide his time, I will satisfy him that this bill has the approval of the Secretary of War, and if he has any doubt with respect to any project in this bill as to its emergency character, as a necessity for commerce or defense, I hope he will point it out.

Mr. SNELL. Well, then, I would like to ask the gentleman about the removal of the water hyacinth, whether that is a war emergency?

Mr. SMALL. That is like the poor; it is always with us. It has been for years in the river and harbor bill, and always will continue to be as long as the water hyacinth grows.

Mr. SNELL. It is said here that eight or nine million dollars has been expended on it.

Mr. SMALL. The first appropriation was made in 1889. The total amount appropriated up to date is $414,330. The water hyacinth is a vegetable growth, not attached to the soil, and it impedes the navigation of streams, so that a steamer can not navigate through it; and in order to remove it, so that navigation can continue, we have carried one or two of these appropriations for years for the removal of the water hyacinth. I was reading not long ago a very lucid explanation by another chairman of this committee, no less than the distinguished gentleman from Ohio, Mr. Burton, who thoroughly explained the necessity of this appropriation. It has been in every bill here for many years.

Mr. HULBERT. Mr. Chairman, will the gentleman from North Carolina permit me to propound a question to my colleague from New York?

Mr. SMALL. Certainly.

Mr. HULBERT. The gentleman, of course, realizes the necessity up in our State of appropriating money for the purpose of removing eel grass, as we call it, from the State Barge Canal?

Mr. SNELL. Yes; but I never knew of the Federal Government appropriating money for it.

Mr. HULBERT. I ask the gentleman if he does not know that up in our State we appropriate money for the removal of eel grass from the State Barge Canal?

Mr. SNELL. I never knew of the Federal Government appropriating anything for it.

Mr. HULBERT. Well, if the Federal Government was maintaining the State Barge Canal as it maintains rivers in the States where the water hyacinth grows, then the Federal Government would appropriate money for the removal of the eel grass.

Mr. SMALL. Let me ask the gentleman from New York a question. Is he in favor of this bill?

Mr. SNELL. I am not sure whether I am or not. But I am in favor of river and harbor improvements as a general proposition.

Mr. SMALL. Now, some gentlemen have said that we should not pass the river and harbor bill during the period of war. The committee has taken the position that we should continue river and harbor improvements both for commercial purposes and for national defense in this period of war. If the gentleman will turn to the majority report, on page 8, they will find there a letter from the Chief of Engineers, containing a memorandum of activities of the belligerent governments during this period of war.

He will find that in France, in England, in Russia, in Canada, while this war has been proceeding, all these countries have been continuing the improvement of their waterways and canals. Even in stricken France, as you will find stated on page 8 of the report—

> The piercing of the headings of the great Rhone Tunnel was finally celebrated on May 17, 1916, by the presence of the French Minister of Public Works, just at the time the battle of Verdun was at its height.

The letter from Col. H. C. Newcomer, Acting Chief of Engineers, is as follows:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, April 20, 1917.

Hon. JOHN H. SMALL,
Chairman Committee on Rivers and Harbors,
House of Representatives.

MY DEAR MR. SMALL: 1. In reply to your letter of the 12th instant, making inquiry as to available data bearing upon the activities of any of the belligerent Governments in prosecuting waterway improvements during the present war, I have the honor to inclose herewith a memorandum which shows some of the activities.

2. The items referred to are all of major importance, and naturally can not be taken as a measure of the entire amount of work which has been done and upon which no special reports are now available. Other large and expensive projects may have been carried on at the same time. These are merely the ones concerning which comments have been noticed.

Very truly, yours,

H. C. NEWCOMER,
Colonel, Corps of Engineers,
Acting Chief of Engineers, United States Army.

—

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, April 20, 1917.

[Memorandum in regard to the activities of belligerent Governments in prosecuting waterway improvements during the progress of the present war.]

GERMANY.

Even now (November, 1916), in the midst of the greatest war the world has ever known, with her resources and energies presumably taxed in defense of national existence, Germany yet finds her waterways so important that she is spending millions of dollars in extending and developing the system. Her canals have proved invaluable in war and indispensable for commercial growth in peace. A number of her cities date their development from the year that navigable canals gave them connection with the sea, and the same is true for great agricultural districts in the hinterland. The history of the commercial growth of these cities and districts is most convincing in this regard. It is evident that, with her magnificent system of government owned and operated railroads, she would have no use for canals if the stock argument as to the uselessness of canals where fair railroad rates can be assured had any force. (Appendix A, State Water Problems Conference of California, November, 1916.)

In April, 1915, the new waterway from the Oder to the Vistula was opened, and in December, 1916, the great Rhine-Hanover Canal was completed, at a cost of more than $60,000,000.

Since the war began Berlin has taken up and prosecuted work on a harbor in the western part of the city, the estimated cost of which is $9,350,000. In view of the fact that she has already spent $8,000,000 on a harbor in the eastern part of the city, it is worthy of note that, although not on a large navigable river, she is investing over $17,000,000 in harbor facilities, mainly to accommodate traffic on canals. (Engineering News, Jan. 20, 1916.)

Leipzig-Berlin Canal: Despite the war work has been in progress on the Leipzig-Berlin Canal. * * * The cost of constructing this canal is estimated at $15,000,000.

FRANCE.

Marseille-Rhone River Canal—Tunnel: The piercing of the headings of this great tunnel was officially celebrated on May 7, 1916, by the presence of the French minister of public works just at the time when the Battle of Verdun was at its height. This canal pierces the high

hills lying to the north of Marseille, and requires a tunnel through rock 72 feet in width, 40 feet high, with a draft for vessels of 10 feet throughout. It is the largest tunnel ever attempted in the world, and $15,000,000 was allotted for its completion. It is about six times the size of an ordinary double-track railway tunnel. Though the war is causing delay, it is hoped the entire canal works will be completed by 1919. (Scientific American, May 9, 1914, and Engineer, Jan. 12, 1917.)

ENGLAND.

Liverpool: The construction of the new 130-foot river-entrance lock has been in progress (1915). The tonnage dredged from the Mersey Bar, Queens Channel, and Crosby Channel during the year ending June 30, 1915, was 14,619,140, and during the year ending June 30, 1916, 17,209,280 tons (about 13,760,000 cubic yards) of material were removed.

Dredgers have also been engaged during the year in dredging operations in the Manchester Ship Canal.

The Dingle training bank on June 30, 1916, was roughly completed for a length of 3,200 feet, and now extends a total length of 4,890 feet. (Engineer, Jan. 7, 1916, and Jan. 5, 1917.)

Tees River: The Tees Conservancy Commission dredged and removed during 1915, 706,902 cubic yards of material from River Tees at a cost of $110,000.

It is estimated that the dredging to be undertaken during 1916 will involve an expenditure of $102,000. (Engineer, London, Mar. 3, 1916, p. 193.)

Port of London: During the year ending March 1, 1915, 835,144 cubic yards of material were dredged from the docks and 2,698,837 cubic yards from the river. The expenditure on capital works during the year was $4,702,424. (Engineer, Jan. 7, 1916.)

RUSSSIA.

Great Russian waterway plans: Aside from extensive railway building, Russia plans a colossal scheme for improving her internal waterway communications. It is to unite in their upper courses by a system of canals—deep enough for large shipping—the West Dvina, flowing into the Baltic Sea, with the Dneiper, flowing into the Black Sea, and the North Dvina-Dneiper into the White Sea. These canals will link together Odessa, Warsaw, Riga, Petrograd, and Archangel, and Moscow, Nijni-Novgorod, Rostov-on-Don, and Astrakhan with the rivers Don and Volga. (Chicago Commerce, Sept. 8, 1916.)

CANADA.

Estimate to complete Victoria Harbor works: In the estimate submitted by the finance minister of the Dominion Government at Ottawa, $1,000,000 was voted to Victoria for the purpose of completing harbor works by the special harbor and river committee. Toronto, St. John, and Quebec secured equal amounts of $1,000,000, Port Arthur and Fort William secured $750,000 each. * * * The main estimates provide for an expenditure of $203,472,765, as compared with $271,015,545 voted last year. (Commerce Reports, Feb. 26, 1917.)

Montreal: At various points along the St. Lawrence ship channel, work that had been begun in 1914 was continued during 1915. Two million dollars was expended by the Harbor Commission of Montreal on general harbor improvements. (Canada—Commerce Reports (1916) Quebec Province, p. 10.)

Halifax, Nova Scotia: The Department of Railways and Canals of Canada completed in 1915 the first unit of a system of six reinforced-concrete piers, the total cost of which will be about $1,125,000. (Engineering News, June 24, 1915.)

Toronto, Canada: An extensive harbor-front development is in progress at Toronto involving an expenditure of about $11,000,000, which amount will be borne jointly by the Dominion Government, the city of Toronto, and the Toronto Harbor Commission. About $1,500,000 was spent in 1914, and probably as much in 1915. (Engineer and Contractor, May 26, 1915.)

Victoria, British Columbia: Harbor developments on an extensive scale are now well under way under the supervision of the Department of Public Works of Canada. The first units in the work are a 2,500-foot breakwater and two large docks in the outer harbor.

The breakwater is expected to shelter a 90-acre area, and will consist of a rubble-mound foundation extending into water 60 feet in depth, surmounted by a superstructure of granite blocks on sea side, protecting a concrete superstructure built on the center line. About 4,400 linear feet of dock front will be formed of concrete cribs, each 80 by 35 feet in plan and 39 feet high, surmounted by a concrete superstructure. This concrete work will rest upon a rubble foundation. (Engineering Record, Aug. 7, 1915.)

Welland Canal: Since November 5, 1914, construction operations have proceeded on a large scale. Excellent progress has been made on all sections of the work under way. These sections comprise practically all the important engineering features of the $50,000,000 enterprise.

These sections involve expenditures as follows:

Section 1. Under way, $3,500,000.

Section 2. Under way and involves 6,500,000 cubic yards of earth excavation, over half of which was removed at end of 1916. Lock construction is also in progress.

Section 3 includes twin locks at three locations and one single lock.

Lock excavation is practically all in solid rock, of which 750,000 cubic yards were removed during 1915. Other excavations included 1,700,000 cubic yards of earth. A total of 30,000 cubic yards of concrete has been done. (November, 1915.)

At Port Weller, on Lake Erie, a total of 3,250,000 cubic yards of material has been removed.

Section 5 is now under way (November, 1915). Over 2,500,000 cubic yards of dry material have been removed. This section involves an expenditure of $1,950,000.

Canada has set apart for expenditures on rivers and harbors during 1916 an amount equal to $2.10 per capita of her population. (National Rivers and Harbors Congress.)

Canada spent during the five years prior to March 31, 1914, an average of $3,965,248 on canals alone, or a total of $19,826,242.

For the two years ending March 31, 1916, she spent an average of $7,610,497 on canals alone, or a total of $15,220,995. To March 31, 1916, Canada has spent on her canals alone a total of $158,112,633.51. (Secretary Rivers and Harbors Congress.)

Mr. HULBERT. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Certainly.

Mr. HULBERT. May I emphasize the fact at this point that while we are loaning billions of dollars to the allies, who are themselves putting their money into the improvement of their interior waterways, particularly of England and France, the minority here would deny to ourselves the expenditure of our money in order to keep up our own inland waterways and the rivers and harbors of our country.

Mr. SMALL. The gentleman has expressed the situation very clearly. There will be found on pages 10, 11, 12, 13, and part of 14 of the report extracts from the Commerce Reports, containing letters of United States consuls reciting other activities of these belligerent Governments in waterway improvements during this time of war. I have here, just given to me this morning from the Department of Commerce, the following statement:

A special report from American Consul General William Coffin, at Budapest, Hungary, was sent to the State Department containing a translation of an article which appeared in the Pester Lloyd of March 21, 1917, written by Eugene von Kavassay, counselor of the Royal Hungarian Ministry of Agriculture, in which it is stated that the Bavarian Parliament voted $155,701,000 for the carrying out of the Danube-Rhine Canal project. This project provides for a canal capable of carrying a 1,200-ton barge, which was submitted to it on January 30, 1917, and this has been followed by a discussion of the question of building a canal connecting the Danube with the Oder.

Bavaria has an area of 29,286 square miles, and its population in 1905 was 6,512,824.

So that gentlemen who contend that we should abandon our interior waterways because we are in a state of war are not, in the opinion of others who are well informed, conserving the best interests of the country.

Mr. HARDY. Will the gentleman yield for a question?

Mr. SMALL. Yes.

Mr. HARDY. Is it not a fact that all those European countries have used their waterways largely for the transportation especially of the cruder class of materials, while in this country, through the charges of pork barrel and other means, the railroads have monopolized the transportation, and of course do not want any water transportation or waterways?

Mr. SMALL. To a large extent that is true.

Mr. FREAR. Will the gentleman yield?

Mr. SMALL. Yes.

Mr. FREAR. I have endeavored to refrain from asking questions; but right in line with that, is it not equally true that the Government of the United States has spent over $150,000,000 in the improvement of one river, the greatest in the world, the Mississippi, and that there is not as much commerce on that river to-day as there is in very small harbors on the Lakes and the coast?

Mr. SMALL. I will come to the Mississippi River in a moment.

Mr. FREAR. That is the answer, which could be elaborated.

Mr. MEEKER. If the gentleman is coming to the Mississippi River I will not take his time.

Mr. SMALL. I will come to that in a little while.

Now, I wish to discuss a phase of this matter in which I hope to make some slight contribution to the subject. Other gentlemen, in the minority report and upon other occasions in this House, have criticized appropriations for certain interior waterways because they said they had not developed sufficient waterborne commerce to justify the appropriation. I admit that fact. I admit, for instance, that there is not sufficient commerce on the upper Mississippi River. I admit that there ought to be more commerce on the lower Missouri, from Kansas City to the mouth. But I ask this question: Ought we to abandon these interior waterways or ought be to adopt a constructive policy which will build up water traffic upon them? [Applause.]

Gentlemen have criticized the upper Mississippi, and I might take that as an example. I talked the other day with a distinguished gentleman who lives in a State contiguous to the upper Mississippi. I commit no breach of confidence when I say he was a former Member of this House. I asked him his opinion about the further improvement of the upper Mississippi and the development of commerce thereon, and he prepared a memorandum, which I am going to ask the Clerk to read from the desk.

The Clerk read as follows:

During this year and the next few years, unless some relief, immediate and effective, is had in the movement of its traffic, there will be great dislocation of traffic in that section of our country tributary to the upper Mississippi River above St. Louis, and even much suffering among the people of that region. The States tributary to the upper Mississippi River constitute one of the largest producing and consuming sections of our country. As a rough estimate, those States should produce this year, if crops be as good as they now promise, nearly 2,000,000,000 bushels of all grains capable of making foodstuffs. A large portion of this must be moved in the shape of raw material or manufactured goods as soon as possible, to feed the people of this country and of the warring nations with which this country is allied. This section is more than 1,000 miles from the seaboard in any direction, so that the haul is long and the opportunities for congestion great in the car movement, and especially at the junctions and tidewater terminals. On the 1st day of May, 1917, there was a net car shortage of 145,449 cars, being a slight increase over April, and the largest reported since the car shortage began last September. If the

same proportion of shortage shall continue this year as existed last year from May until November, the shortage in November, 1917, will be more than 400,000 cars. With the increased movement of freight for the Government and its allies, and a crop production which promises exceedingly well at this time, this car shortage will become increasingly troublesome, and even dangerous, during the busy months of the fall and early winter of this and following years.

The Council of National Defense, with its great ability and its tremendous exercise of power over railroad movement and traffic, whether authorized by law or not, can do much and will do much to ease this situation. The latest estimate was given by Mr. Fairfax Harrison, president of the Southern Railway Co. and chairman of the committee of railroad executives, who said, in an interview in the New York Times of Sunday, May 27 last, that it is to be hoped the various measures of reform and the cooperation of the Nation's railroads under the Council of National Defense may increase the car supply by 30 per cent, or an equivalent of 779,000 cars. But this will not at all solve the problem for the present or following years, because the vast increase of the Government's public business on account of the war in the movement of troops and supplies, and the great increase of crops and industrial traffic will utilize this whole increase of equipment ready for use. Under ordinary conditions, such as last year, there would be a shortage which can only be made good by additional facilities, such as the use of the rivers. The tremendous increase of business for the present and future years will more than require whatever the railroads can furnish.

During the late winter months the elevators at Minneapolis had in storage more than 25,000,000 bushels of wheat ready for shipment and no cars could be had. Many of the country millers of the spring-wheat territory had unusually large stocks of wheat and flour ready to be shipped, and the people of the large consuming sections were desperate in demanding these foodstuffs, even at the high prices of flour in the market places, but they could not be, and were not, distributed. During the last month of May, on one day, in Duluth, more than 2,700 carloads of flour were packed there which could not be moved to its eastern destination because of a congestion somewhere along the line, notwithstanding the clamor of the people for a reduction of the cost of bread. During this period the great terminals and warehouses at New Orleans were not congested and could adequately care for a greatly increased traffic. The export traffic could be cared for at New Orleans better than at New York, because its general traffic is much less and its terminal facilities are proportionately greater, while the domestic traffic to the northeastern points could move, either by rail or by water, on a shorter time and at less expense under present conditions, and the time of transportation from the northern fields to New Orleans by river could be less than from those same fields to eastern destinations under present conditions.

A somewhat similar situation consists as to coal. The twin cities of Minneapolis and St Paul annually use nearly 4,000,000 tons of coal, and nearly as much more is distributed through them to the surrounding productive country. Practically all of this comes up the Lakes, iron ore being shipped from Minnesota to the lower lake ports and coal being brought back as a return cargo. When the navigation season opened this year there was less than 5 per cent of this aggregate of coal needed for the year on the docks of the upper lake ports to supply this section—very much less than for many years past at this season. Navigation on the Lakes is at least a month late now, and there have been delays and congestion in delivering coal to the Lake ports from the eastern mines, still further delaying the transportation of the vast tonnage which will be necessary to enable those people to live. Some of the large coal users of that section are realizing those facts. One of the largest railroads, having its headquarters in the twin cities, is now sending its cars to the Central Illinois mines, 700 miles away, and taking an output from one group of mines of at least 2,000 tons a day to supply its future needs. This would seem to be a great waste upon the car supply of this section and of the country, when those mines are very close to the Mississippi River, which has a clear channel ready for business from there to the destination.

A large iron-producing concern in St. Louis has contracts with the Government for the production of iron, and uses a considerable supply of Minnesota iron ore brought by the Lakes to Chicago and thence to St. Louis by rail at a rate of $2.24 per long ton. If a connection could be established so that the iron ore from the Minnesota ranges could reach the navigable portion of the Mississippi River at the Twin Cities and thence barged to St. Louis and the rail rates from the mines to the river were proportioned to similar rates on that traffic elsewhere, the cost of transportation of such ore should be considerably less than the rail rate now paid from Chicago to St. Louis, and the cost of lake transportation could be saved. Such an arrangement would furnish the iron manufacturers of the lower Mississippi Valley with an adequate supply of Minnesota ore and at the same time furnish the people of the upper Mississippi River the return cargoes of cheap coal, and, more than that, at this time, it would conserve the car supply of the country, which could be put to other uses and help mightily to solve the problem of congestion and car shortage at critical times. In the same way the supply of foodstuffs from the upper river, now congested and needed for export and domestic use, could relieve the congestion of the railroads by using the river, and return cargoes of cotton, sugar, rice, coffee, and such products from New Orleans could relieve the situation of supply and high cost of those States tributary to the upper river.

The Central West has complained that it was not receiving fair consideration in the purchase of Governmental supplies, and at the same time our military experts were advising that production of military and naval supplies should be, as far as possible, in the interior to secure absolute protection.

Not many years ago a flourishing industry in Dubuque, Iowa—the Dubuque Iron Works—produced satisfactory war vessels of the smaller type for the Navy, and the people there were proud of them. Undoubtedly at this time the Government would be glad to encourage such industries in the Mississippi Valley if the people cared to undertake them.

Mr. JAMES. What market would there be in St. Louis for ore from upper Michigan and Minnesota?

Mr. SMALL. Oh, they have quite a large blast-furnace plant in St. Louis for the manufacture of pig iron.

Mr. JAMES. Most of the iron ore comes this way.

Mr. SMALL. Most of it; but it is a fact that they have considerable demand for iron ore in St. Louis.

Mr. STAFFORD. Will the gentleman from North Carolina kindly inform the House who is the author of that most remarkable letter which has just been read from the desk?

Mr. SMALL. Hon. Frederick C. Stevens, of Minnesota, a former Member of the House.

Mr. MOORE of Pennsylvania. A man of very high standing in the House when he was here.

Mr. SMALL. I know of no man better informed as to water-traffic conditions in that section of the country, or in fact in the whole country, than the gentleman from Minnesota, Mr. Stevens.

Mr. FREAR. Is the gentleman aware of any commerce at all in the nature of grain, coal, or any of those articles which have been mentioned by the gentleman who has been quoted here—who is a very able man—which have been shipped through the Mississippi River, and when they have made use of that water transportation?

Mr. SMALL. I am coming to that in a moment. I understand the gentleman wants to strike out any appropriation in this bill for the improvement of the upper Mississippi. I understand the attitude of the gentleman.

Mr. FREAR. Does the gentleman really think that? Has the gentleman any reason to believe it from any statement I have made on the floor?

Mr. SMALL. I do not understand what the gentleman means in the minority report, which I understand he wrote, in criticizing the appropriation for the upper Mississippi unless he wants to strike it out.

Mr. FREAR. The gentleman does me an unwarranted honor in saying that I wrote the report, but I believe in every case there ought to be a sufficient fund for keeping open channel work and have always stated so.

Mr. SMALL. This appropriation only covers the necessary amount to provide for an open channel as estimated by the engineers. I think I understand the attitude of the gentleman; he is opposed to appropriations of money for the continued improvement of the upper Mississippi. I have further evidence to submit as emphasizing the importance of continuing the improvement of the upper Mississippi River. Mr. W. P. Trickett, general manager of the Minneapolis Traffic Association, was recently in this city attending a hearing before the Interstate Commerce Commission, when I sought from him an opinion about this river. He addressed to me the following letter:

WASHINGTON, D. C., *May 27, 1917.*

Hon. J. H. SMALL, *M. C.,*
Chairman Rivers and Harbors Committee,
Washington, D. C.

MY DEAR SIR: Referring to our telephone conversation of yesterday, I am surprised to learn that even a limited opposition exists in Congress against the proposed appropriation for improvement of the upper Mississippi River, and hasten to assure you that Minneapolis and St. Paul, comprising the Twin City market, are deeply interested in the project, and were interested in it long before the present car shortage and general transportation inefficiency began. As proof thereof, the city of Minneapolis need only point to its extensive development of a municipal dock, having a lineal frontage of 1,600 feet. The foundation and sea wall of this facility is completed, and bonds have recently been issued for the temporary housing thereof for immediate use in the handling of river traffic this year.

Our permanent dockage facilities, comprising suitable room for all classes of package freight, will later be provided, as will the most modern mechanical devices for economic loading and unloading of boats. Minneapolis will also install modern elevator facilities for the transfer of bulk grain from cars to barges; that of coal and other heavy bulk freight from boats to cars, our community being determined to spare no necessary expense in this important undertaking.

By a municipal franchise to one of our trunk lines of railroad provision is definitely made for a rail connection between this dock and all industries, tram tracks, etc., throughout the city, thereby insuring expeditious and economic terminal service on all traffic. This rail connection will be provided just as soon as the city completes its plans for permanent dockage facilities along the lines above set forth.

The Minneapolis market, as well as the entire Northwest, will be benefited by the rehabilitation of river transportation, and all branches of our trade and commerce anxiously await the development. The so-called high dam between St. Paul and Minneapolis is complete, except for the swinging of the gates, the Government engineers assuring us that but little further time will be necessary to place the locks in full operation.

Should Congess now fail to make adequate appropriation to carry on the important work along the river between St. Louis and Minneapolis these tremendous expenditures would go for naught, and the upper Mississippi Valley would be deprived of the use of this valuable transportation highway, except under the adverse conditions now prevailing.

Manifestly, therefore, it is the duty of our Government to carry out this river work, for never was there a time when the river as a transportation highway was as necessary as it now is to the upper Mississippi Valley and the Northwest.

This river can be made to do for the Twin City market, particularly the grain market of Minneapolis, what the Great Lakes have done for Duluth. Grain and the products thereof can be so handled from Minneapolis to tidewater at no greater freight cost than usually obtains from Duluth to Buffalo, where it is from 400 to 500 miles from tidewater, and other branches of domestic trade will also be benefited.

Clearly shown in the inclosed statement of facts which I shall introduce Monday before the Interstate Commerce Commission in the case involving the proposed horizontal increase of 15 per cent in all freight rates, are the rate and transportation difficulties under which our market labors to-day. Of course, I could not in this proceeding use the Mississippi River as even a potential factor of rate making, but it is nevertheless a fact that when the proper transportation facilities are placed in operation upon this river between its head and the Gulf of Mexico the benefits to the entire Mississippi Valley will be innumer-

able. And you will also kindly bear in mind the fact that upon cessation of present hostilities, and the restoration of coast-to-coast traffic through the Panama Canal, no transportation instrumentality will do as much to conserve the manufactories of the Mississippi Valley versus those of the Atlantic Seaboard, as will the Mississippi River if properly developed and employed. These central manufacturing cities had before outbreak of the war a touch of these all-water rates' influence upon the all-rail rates across this continent, and realized for a time at least, just how impossible it was to move traffic all rail in competition with the coast cities having all-water facilities and rates. So I say again, that the value of the Mississippi River as a transportation highway is incalculable, and my deepest regret is that I can not absent myself from the proceeding now before the Federal commission long enough to go further into this matter personally with you and your committee.

I thank you, however, for affording me opportunity to make even this hurried and limited statement.

Yours, very truly,

W. P. TRICKETT,
General Manager Minneapolis Traffic Association.

Speaking of commerce on the upper Mississippi, there was for the calendar year 1915, 1,255,000 tons, valued at $52,000,000. What I freely admit is that the commerce ought to be more and that it ought to be more diversified. The point I make is that instead of gentlemen standing here as Representatives who ought to be interested in the development of water traffic, pursuing a destructive course and crying "Pork barrel!" and endeavoring by improper methods to influence public opinion against river and harbor appropriation bills, they ought to be engaged in some constructive activity in order to develop our water-borne commerce. [Applause.] How are we to do it? I would like to discuss a remedy, and it is applicable not only to the Mississippi River but to every other river.

In order to have water commerce there are three essentials. We must have the traffic, we must have the water carriers, and in addition to that there must be certain facilities for transportation of this traffic. We have the commerce. I admit the difficulty in securing sufficient water carriers, but that difficulty may at least be in a part overcome. In addition we must have adequate water terminals. Every city, every landing station upon these interior waterways and upon which water carriers ply, ought to have some sort of water terminal consistent with the water commerce carried, and they should be properly equipped. They should have an adequate area, ample warehouses; they should have equipment for transferring the freight from the water carrier to the warehouse or to the railroad cars, and vice versa; and every one of these terminals should be owned by the public, preferably by the municipalities. It is a matter of fact that upon some of our rivers it costs more to move freight from the water carrier to the consignee and in some instances into the warehouse than it does to move it 100 miles by water. We can only have the water terminals at the instance of public and civic enterprise on the part of the section on whom it is incumbent to construct them, and they must exist if we are to maintain water traffic. Every one of these terminals should have physical connection by rail with the railroads which serve the community.

There is another necessary condition: There must be a system of prorating between the water carrier and the railroads, just as exists between the railroads themselves. You can go to any railroad station in the United States, giving the agent a little time to secure information, and he will give you through rates and a through bill of lading from the local station to any other railroad point in the United States.

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

Mr. SMALL. Mr. Chairman, I dislike to ask for additional time, but I will ask for 15 minutes more.

Mr. MOORE of Pennsylvania. I ask unanimous consent that the gentleman's time be extended 15 minutes.

Mr. MADDEN. Reserving the right to object, and I am not going to object, I understood the gentleman from North Carolina was going to move to close debate after he got through.

Mr. SMALL. Oh, no.

Mr. MADDEN. If there is any disposition to do that——

Mr. SMALL. I have no such disposition.

Mr. GALLAGHER. It is understood that we are going to have debate.

Mr. SMALL. I hope there will be all reasonable debate on the bill.

Mr. MADDEN. Does the gentleman mean general debate or under the five-minute rule?

Mr. SMALL. General debate; I hope it may be confined to the bill, but I can not control that matter.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. SMALL. Mr. Chairman, having admitted that this commerce does not exist to the extent to which it should exist on some of the interior rivers that we have improved or are engaged in improving, it is incumbent on this Congress, as upon every other enterprising citizen in the country, to do his share in establishing commerce upon them. On the 1st of May we had a shortage of 145,000 cars.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. SMALL. Certainly.

Mr. COOPER of Wisconsin. Is it not a fact that more than one railroad has been built in the United States that has proved a financial failure because there has not been business enough to pay dividends upon its stock?

Mr. SMALL. That is true.

Mr. COOPER of Wisconsin. But that does not go to the condemnation of all railroads.

Mr. SMALL. Certainly not. Here is a statement made yesterday by Mr. Daniel Willard, chairman of the advisory commission of the Council of National Defense, in regard to organizing the recently appointed committee on water transportation. He said that, while the railroads are carrying more traffic than ever before, after they had carried up to their limit, or 100 per cent efficiency, there would still be 15, 25, or 30 per cent or more of the traffic offered that the railroads could not carry.

How is that traffic to be carried?

Mr. MOORE of Pennsylvania. Is it not true that James J. Hill made that same statement in 1907 to the National River and Harbor Congress, and that there has been no great railroad development in this country since?

Mr. SMALL. That is true as to the attitude of the late James J. Hill.

Mr. MADDEN. Admitting the truth, as I assume the gentleman from North Carolina does, will the gentleman state to the House that there has been no great increase in the water-borne traffic on the rivers of the United States?

Mr. SMALL. There has been.

Mr. MADDEN. On rivers?

Mr. SMALL. Oh, yes.

Mr. MADDEN. Will the gentleman indicate one?

Mr. SMALL. There has been a very substantial increase in commerce.

Mr. MADDEN. On what river?

Mr. SMALL. Oh, upon the whole the increase in commerce has been very gratifying. I admit that the increase has been mostly upon the rivers along the Atlantic seaboard and on the Pacific coast. The growth has not been so great upon those rivers in the Mississippi Valley; but admitting that it has not grown at all in the Mississippi Valley, I am asking, Shall we abandon those rivers and not continue to improve them, or shall we continue their improvement and adopt such methods as will create commerce upon them?

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Yes.

Mr. COOPER of Wisconsin. Can the gentleman name in the Mississippi Valley one river of any prominence the improvement of which has been thoroughly completed?

Mr. SMALL. I can not.

Mr. COOPER of Wisconsin. If a railroad were constructed and not thoroughly completed, about how much increase in business would there be upon that road, when a portion of the trackage was not laid?

Mr. SMALL. And it had no terminals?

Mr. COOPER of Wisconsin. And it had no terminals.

Mr. SMALL. The question answers itself.

Mr. PLATT. Is it not a fact that the Interstate Commerce Commission kills business upon the rivers by keeping the railroad rates too low? [Laughter.]

Mr. SMALL. Oh, the gentleman has introduced another question which I shall not undertake to present to the committee.

Mr. MOORE of Pennsylvania. And does the gentleman recall that several years ago, and every year when a river and harbor bill has been before the House, the very distinguished and eloquent gentlemen from the vicinity of Chicago have advocated connecting up the Great Lakes with the Mississippi River and urged its development to a 14-foot depth?

Mr. MADDEN. Yes; and I will say to the gentleman, and also to the gentleman from North Carolina, that the State of Illinois out of its own treasury is doing the very same thing that the gentleman from Illinois, referred to by the gentleman from Pennsylvania, suggested.

Mr. SMALL. The thought I have been endeavoring to express is that at this time, even in this stress of war, we ought to continue the improvement of our rivers and harbors. I have stated that this was a meritorious bill; that its passage was necessary in the interests of the country; and I challenge any gentleman who thinks that he can successfully assail any item in this bill to do so in his own good time, either in general debate or when we

are considering the bill under the five-minute rule. Let him make good. [Applause.] And that challenge is to the minority of the committee as well as to any other gentleman.

Mr. COOPER of Wisconsin. Will the gentleman permit an interruption?

Mr. SMALL. Yes.

Mr. COOPER of Wisconsin. The gentleman has just expressed his opinion that these improvements ought to be carried through to completion. Of course, he read in the papers very recently—about 10 days ago—of the completion by France, in the midst of this war, of a very expensive river improvement—the canalization, and so forth, of streams from the Rhone to the Saone?

Mr. SMALL. Yes; and in part by tunneling a mountain.

Mr. COOPER of Wisconsin. Tunneling a mountain, and at the expense of millions of dollars.

Mr. HULBERT. With our money. [Laughter.]

Mr. SMALL. Carried on during this war.

I do wish to present this additional thought before concluding: I spoke of some of the conditions which must be met if we are to develop commerce upon our interior waterways, but, to my mind, there is one other condition. There must be some constituted authority in the Federal Government—some bureau, some board—whose duty shall be exclusively to supervise waterway transportation. I may illustrate: I said a while ago that in the Mississippi Valley there had not been an adequate increase in water-borne commerce.

By the way, I should have excepted the Missouri River. The citizens of Kansas City have exhibited great enterprise. They have built there a municipal water terminal that comes very near fulfilling all the requirements, at a cost of $75,000. They have put their money in a boat line, and are now maintaining that boat line between Kansas City and the mouth of the river, and are establishing a very substantial and healthy commerce. But I repeat that the waterway transportation requires some Federal body for its supervision. We have a Corps of Engineers, and I take it that no one familiar with their capacity and their training would for a moment entertain the thought of dispensing with their services. We need their technical knowledge in all the respects in which it pertains to the examination and improvement of waterways. But we need some central body, who should endeavor to supervise interstate commerce upon our waterways, and I am glad to report that we have just on yesterday made a beginning on that line.

The last military appropriation bill authorized the creation of the Council of National Defense. The provision directed the council to consider and study and report among other things the utilization of waterways. It authorized them to appoint subordinate committees. Under that authority some months ago the Council of National Defense appointed a committee on railway transportation, of which Mr. Fairfax Harrison is chairman. And just on yesterday there was organized in Washington a committee upon waterway transportation, composed of gentlemen who are students of the subject, who have given evidence of their desire to be of public service, and who are going to undertake as an arm of the Council of National Defense in cooperation with the committee on railway transportation to develop waterway transportation and to restore it where it belongs upon these waterways which we have improved.

Mr. HARDY. The gentleman is nearly answering the question I wanted to ask. Would not the Shipping Board created by a former Congress have a tendency to provide the information that this special commission is appointed for?

Mr. SMALL. We created the Shipping Board but failed to confer jurisdiction over transportation on interior waterways.

Mr. HARDY. One thing further. Of course, if an additional commission for railway transportation is valuable, a similar commission would be valuable to help in waterway transportation?

Mr. SMALL. Certainly.

Mr. ALEXANDER. The act withdraws from the Shipping Board jurisdiction over our inland waterways, except the Great Lakes. It does not withdraw jurisdiction over our coastwise traffic, so that to say they have no jurisdiction of domestic water transportation is a little too broad.

Mr. HARDY. Just one further question in that connection. My impression is that the reason they did not take over jurisdiction of the inland water transportation was that the Interstate Commerce Commission had jurisdiction of that transportation.

Mr. FERRIS. Has the gentleman had any information on section 5?

Mr. SMALL. Is that the section in reference to reservoirs at the head of the Mississippi for developing water power?

Mr. FERRIS. Yes. Is the gentleman going to insist on that remaining in the bill?

Mr. SMALL. I will say that is a matter we can take up when we come to it in the bill. That was an amendment offered by the Senate Committee on Commerce to the House bill at the last session. Since this bill was reported by the committee the Chief of Engineers has informed the chairman that if it is to remain in the bill he is not content with the phraseology. He wishes some amendment in order to more effectually protect the Government.

Mr. FERRIS. I may say to the gentleman that I have a letter from the Secretary of War objecting to that section, and substituting another section. If I may be entirely frank with the gentleman, I doubt the advisability of having the bill deal with so intricate a question and one of such far-reaching import as the water-power question at all. The gentleman from Georgia [Mr. ADAMSON] and his committee and also my own committee, as the gentleman knows, have spent four or five years in trying to get some legislation on this subject, and now when it is sought to have an amendment go onto the bill, coming from a committee without jurisdiction, and which is objected to by the department, it seems to me the chairman ought not to insist that it should remain in the bill.

Mr. SMALL. As I said, the language is the same as that proposed by the Senate committee, and after the committee reported it the information came to us that the War Department desired to re-form it.

Mr. ADAMSON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from North Carolina yield to the gentleman from Georgia?

Mr. SMALL. Yes.

Mr. ADAMSON. Inasmuch as the gentleman from Oklahoma [Mr. FERRIS] has referred to the subject and raised the point, I hope the gentleman from North Carolina will permit an interruption.

Mr. SMALL. Yes; I shall, but I hope the gentleman will be brief.

Mr. ADAMSON. I do not use much time in the House, and I hope in this instance the gentleman will spare me a little time. If everybody had worked as hard as I have done and talked as little as I have done we would have been home a month ago, with our work finished. [Laughter.] The gentleman from North Carolina and I have always been good friends. I have dealt fairly with him and he has dealth fairly with me, and, although I have not anything in this bill, yet I hope I may have something in the next bill. [Laughter.] The gentleman has a bill on water power (H. R. 4504) referred to his committee. With that subject two committees of this House—the Committee on the Public Lands and the Committee on Interstate and Foreign Commerce—have had to do for years. I discovered to-day that the gentleman has a part of that item in this bill. I respectfully submit that the gentleman ought to allow the committees that have dealt with that subject heretofore to retain jurisdiction. That is all I have to say.

Mr. SMALL. I would like to say to the gentleman that there has been no agreement to refer the water-power bill to the gentleman's committee, but I will be glad to confer with the gentleman after this bill has been passed. Nobody on the committee has his heart set upon this provision. The committee will pass upon it when it reaches the item, when the bill is under consideration under the five-minute rule for amendment.

Mr. HUMPHREYS. Mr. Chairman, will the gentleman from North Carolina yield?

Mr. SMALL. Yes.

Mr. HUMPHREYS. I notice there are some items in this bill providing for surveys for flood-control matters. I will state to the gentleman that there is another committee, as he is aware, that has jurisdiction over those matters. The River and Harbor Committee has not heretofore exercised any jurisdiction in such matters, as a rule, although the Senate in the past year or two has attempted to put such amendments on the bill.

Now, I want to state this, if the gentleman will indulge me: There are quite a number of applications for surveys with a view to the control of the floods on various streams throughout the country. Those requests and bills have been referred to the Committee on Flood Control, and it is the expectation of that committee, after proper hearing, to make such report to the House as in its judgment ought to be made on the various projects. I was wondering why it was that the Committee on Rivers and Harbors selected three projects for flood control and left out all the others, although they are of equal merit.

Mr. SMALL. I will say to the gentleman that there was no desire to intrench on the jurisdiction of the Flood Control Com-

mittee, and if there is any item of survey affecting flood control exclusively it can be discussed when the bill is read. I recall saying distinctly to several gentlemen who came before the committee, asking that surveys might be included, that they were so apparently within the jurisdiction of the Flood Control Committee that we could not consider them. If there are any items in the bill that are clearly within the jurisdiction of the Committee on Flood Control, it is due to an oversight.

Mr. HUMPHREYS. If the gentleman will indulge me for a moment, I will be called upon, when the items are reached in the bill, to object to their remaining in the bill, because others, as I have been advised, have been excluded from the bill because possibly of my objection, and I do not want to make fish of one and flesh of the others. For instance, as to the Youghiogheny River, the committee ordered that survey with a view to devising plans for flood protection. The question of navigation is not mentioned in that paragraph at all except in the last line, which provides that the amount that the Government is to contribute shall be based upon the value of toll navigation.

Then the item for the Savannah River near Augusta, Ga., seems to have a double purpose—in the interest of navigation and for flood protection. I think there would be no objection to striking out "and flood protection."

Mr. SMALL. I hope the gentleman will wait until we reach those items. I have asked for extensions of time so often that I do not want to ask for further extensions.

Mr. HUMPHREYS. Then there is one in Arkansas, with a view to withholding the floods of the Mississippi River. All of those items are clearly matters that ought to be referred to the Committee on Flood Control, and I hope that when they are reached in the bill the gentleman will make no objection to their going out.

Mr. SMALL. The committee has no disposition to interfere with the Committee on Flood Control, but I will say to the gentleman that every one of these items was in the bill which passed the House last session without any objection from the gentleman from Mississippi. Is not that the fact?

Mr. HUMPHREYS. Will the gentleman yield for a moment?

Mr. SMALL. Yes; but I am anxious to conclude.

Mr. HUMPHREYS. The flood-control bill then was simply a flood-control bill. Now it is the law of the land. After the river and harbor bill passed at the last session, and after the matters were included in the bill at the last session, I took occasion to state on the floor that because the flood-control bill had not yet become a law, and inasmuch as this was the only vehicle by which that legislation could be written on the books, I would not object.

The CHAIRMAN. The time of the gentleman from North Carolina has again expired.

Mr. SMALL. May I have five minutes more? Then I will conclude.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. SMALL. The gentleman will note that I tried to be liberal in yielding, and I ask not to be interrupted again, so that I can get through in these five minutes.

There is only one further statement I wish to present. I said that this bill has the approval of the Secretary of War. We believe that this approval is not necessary to establish the merits of the bill, because the bill on its merits is worthy of the favorable consideration of the House and ought to be passed. But on the day it was reported, on May 9, the Secretary of War wrote to the chairman of the committee this letter:

WAR DEPARTMENT,
Washington, May 9, 1917.

Hon. JOHN H. SMALL,
Chairman Committee on Rivers and Harbors,
House of Representatives.

MY DEAR MR. SMALL: In response to your oral inquiry, and referring to the recommendation that I recently submitted for your consideration concerning the advisability of a river and harbor bill, I have the honor to state that the general subject of the character of river and harbor legislation that should be undertaken at this time was first presented to the President and he expressed his approval of the policy that I proposed to him as a proper one to observe.

This contemplates such work as is required to enable our waterways to continue to play their necessary part in the transportation service of the country, and also to serve urgent military needs. It calls for the appropriation of sufficient sums to provide for necessary work of maintenance in channels already improved, for the more urgent work of continuing improvement of projects already begun, and the adoption of such new projects as are considered necessary under present conditions for military or naval purposes or as part of the program of national defense and preparedness.

The bill that has been prepared along these lines by your committee in conference with the Chief of Engineers and his representatives has my approval.

Very truly, yours,

NEWTON D. BAKER
Secretary of War.

I have this additional letter from the Secretary of War, dated May 31, 1917:

WAR DEPARTMENT,
Washington, May 31, 1917.

Hon. JOHN H. SMALL,
House of Representatives.

MY DEAR MR. SMALL: I have talked with the President personally about the river and harbor bill introduced by you and now under consideration in the House. The bill was drawn upon the plan of taking care of existing projects, the suspension of which would entail substantial loss to the Government, and adding only such new projects as were directly necessary by reason of the war status of the country's affairs. The President authorizes me to say to you that the bill has his approval, as it has already had that of the War Department and the Chief of Engineers.

Cordially, yours,

NEWTON D. BAKER,
Secretary of War.

I have postponed until the conclusion of my remarks the reading of these letters from the Secretary of War. I have desired to discuss this bill upon its merits and not to rely entirely upon the recommendation of the Secretary of War or upon the approval of the President. It was my purpose, as best I might, to endeavor to present to the House the reasons which constituted the merits of this bill and which made its adoption at this session a public necessity. But certainly if it is a worthy bill and entitled to the support of the House, then the recommendation of the Secretary of War and the approval of the President constitute an additional argument which assuredly does not weaken, but makes the bill stronger. [Applause.]

Mr. FREAR. Mr. Chairman, the gentleman from North Carolina [Mr. SMALL] has advised us that the President and Secretary of War favor this bill. The answer given by the gentleman from Illinois [Mr. MANN], in response a moment ago, is the only answer necessary to the statement that either the Secretary of War or the President of the United States approves this bill. I would not want to believe that the President of the United States, if familiar with the contents of this bill, would express his approval of it, or, with the understanding of the minority of the committee as to the character of this bill, that the Secretary of War would approve it.

Mr. JAMES. Will the gentleman yield?

Mr. FREAR. I would like to make my statement first.

Mr. JAMES. Just one question right on this subject.

Mr. FREAR. Yes. I yield to the gentleman from Michigan.

Mr. JAMES. We heard the gentleman from Oklahoma [Mr. FERRIS] state that he had a letter from the Secretary of War objecting to section 5 of this bill.

Mr. FREAR. Yes; he so stated.

Mr. JAMES. That shows that very evidently the Secretary of War has not read the bill.

Mr. FREAR. I concede the gentleman's position. It is probable the Secretary of War never read the bill. I now desire to go on with my statement, in order to present some matters which have led the minority members of the committee to oppose the bill.

It will accomplish nothing to pretend to misunderstand or to misstate the position of those who are opposed to this bill or to put words that are not true into the mouths of Members on this floor. This House is honest and fair in its judgment in such matters and not easily misled. I did not expect to take time of the House in general debate. I confess I may have taken more time in the past than I ought in the disclosure of the terms of recent river and harbor bills; but at the outset let me remind you that while the bill of 1914, appropriating $53,000,000, passed this House over vigorous opposition, and we could not get a roll call upon it, that the bill eventually was defeated in the Senate and a substitute bill appropriating $20,000,000 was passed, a saving to taxpayers of $33,000,000 in that one bill. Let me further remind you that the bill that followed in 1915 appropriated nearly $40,000,000, and when I opposed it in the House you laughed again at the presumption. Yet it was also defeated in the Senate and a $25,000,000 substitute was passed. Let me again remind you, gentlemen—and I do not assume any credit for myself—that over $47,000,000 was saved to taxpayers by the modifications secured in these two bills. Those who were opposed to these bills, whether in the House or Senate, gave their reasons upon which their judgment was based.

The next bill, that of 1916, last year, went through the House; but 133 votes were cast against it. Some gentlemen on the floor made jocular remarks as to my own opposition to that bill, because I was charged with standing practically alone, but we

had 133 votes against it when the votes were counted. It passed the Senate by one or two votes only, and a substitute bill in 1916 was only defeated in the Senate by one vote.

Then, the last river and harbor bill, early in 1917, was passed by this House with 132 votes against it, but was defeated in the Senate. That is the third bill, this time carrying $38,000,000, that was defeated in four years. Five members of the United States Senate committee signed the minority report against the 1917 bill. Yet the gentleman who is at the head of the river and harbor lobby sent a statement to the press of the country that the 1917 bill was the best bill that had passed the House in years. That bill was defeated in the Senate, together with a bill which passed the House at the same time for $38,000,000 for the construction of public buildings. Over $100,000,000 has been saved to the Government and to taxpayers by the defeat of these four bills and no legitimate public interest has been injured. You ask, Why oppose these bills? Call them pork-barrel bills if you want to.

The hardest names come from those who in the past have supported such measures.

Mr. SEARS. Will the gentleman yield?

Mr. FREAR. I can not now. I will do so later. How many of your projects would be passed into law if they stood by themselves, if separate votes could be had? By combining the membership of this House with 400 items contained in this bill, judiciously distributed all over the country, the bill is calculated to carry itself. Gentlemen from New York are interested in the New York propositions, of course, and the bill as a whole is secondary. Gentlemen from Pennsylvania are more especially interested in the Pennsylvania propositions, and so it goes throughout the country. Members from the Atlantic to the Pacific are interested in the projects which affect their own States or districts.

Mr. HULBERT. Will the gentleman yield for a question?

Mr. FREAR. No; I can not at this time. I will later.

Mr. HULBERT. I want to say to the gentleman——

Mr. FREAR. The gentleman from New York will have his own time. I want to make my statement first.

The CHAIRMAN. The gentleman from Wisconsin declines to yield.

Mr. FREAR. The reason these measures are called pork-barrel bills is because they are omnibus bills, made up of propositions from practically every State, like the public-buildings bill. One hundred million dollars has been saved by the defeat of four bills in the Senate. We did not defeat them here.

Mr. HULBERT. You could not defeat them here.

Mr. FREAR. No; you are right; we could not defeat them here.

Mr. HULBERT. You could not have defeated them in the Senate, if they had come to a vote.

Mr. FREAR. The 1916 bill came within one vote of defeat in the Senate and the 1917 bill was not brought to a vote.

The committee presents a nonpartisan minority report. The gentlemen who signed the minority report constitute a majority of the Republicans on the committee. Two of the oldest Democratic members also join in that report. We are not interested because of any question of partisanship. Surely the gentlemen who signed the minority report were not misled. They are familiar with practically every project in the bill. Their judgment ought to be good, and they say to you the bill ought to be defeated, and give reasons for that opinion.

I care not whether the President or the Secretary of War recommends this bill. They must have been misled by their advisers if so. Our Democratic friends in caucus decided not to try to pass a river and harbor bill this session. I refer to that because the gentleman from North Carolina who preceded me referred to it. Why did you do it then? Why did you refuse to permit a river and harbor bill to be made a part of the program? If that was not a proper procedure then, why is it proper now? If unnecessary then, it is wasteful now. The minority report says that on the 1st day of March last there were $31,000,000 balances of appropriations that had not been contracted for which then remained in the hands of the Army engineers. In addition to that amount there was over $1,000,000 balance left from the fund known as the last lump-sum appropriation, or a total of $32,000,000 that can now be applied to all needed river and harbor improvements. Now, we may assume that the engineers knew on the 1st day of March, 1917, or shortly thereafter, the action of the House leaders and the attitude taken by the majority party in opposition to passing such a bill. The engineers have known the situation from the start, and if they have wasted or exhausted these funds it is their fault and they should be held responsible. They knew that the people of this country are now being taxed as never before in the history of the country, and the people have to pay these bills. Therefore we may assume the balances are practically intact. Every proposition that is a preparedness proposition will stand on its own feet. If it is a new project, bring it in to the House and it will be passed unquestionably if meritorious—no one will oppose it. But when under the guise of preparedness we seek to cloak such a proposition as the Congaree River or the Chesapeake and Delaware $12,000,000 bankrupt canal, I tell you gentlemen it requires a wide stretch of the imagintaion.

There are features in this bill which are worse than any bill that has preceded it, in my judgment. The grouping system, which the gentleman from North Carolina who preceded me commended so highly, means simply this: Heretofore we have been able, in taking up river and harbor bills, to say here, for instance, is a proposition on which there is no commerce and upon which the Government has been spending thousands or millions of dollars possibly. Under former bills that project could be exposed. Now it is covered up. Hereafter, under the grouping system, everything is immune from attack or exposure unless a new project. No matter how worthless the project, this bill groups good, bad, and indifferent projects. It has been said that we must appropriate money lavishly for rivers because other countries now at war have made waterway improvements. Out of $900,000,000, in round numbers, we have expended on waterways in this country, I believe it can be demonstrated over one-half has been wasted. On one little part of the Mississippi River, from the Ohio River to the Missouri, on which we have spent over $18,000,000 for a length of 200 miles, we have expended more money than has been spent on the entire River Rhine, where they have over 40,000,000 tons annually, while the Mississippi, with a greater depth of water, has less than one-half of 1 per cent of that tonnage on the 200-mile stretch. Why? Because we do not control railroad rates and Germany does. They force the commerce on the rivers, while we continue pouring money into the stream without any definite object in view. About one hundred and fifty millions of taxpayers' money in the Mississippi River from St. Paul to New Orleans, and we have lost 95 per cent of the former commerce while spending this enormous amount.

That reminds me, when I am referring to the commerce on the upper Mississippi that the gentleman from North Carolina mentioned, one of the oldest and best captains on the river, Capt. Day, told me that with $180,000 every year he could keep the maintenance of channels in a better condition than they are to-day, and we are asked to appropriate $1,200,000 for the upper Mississippi in this economy measure before us.

There is some small commerce on the upper Mississippi River, and I am not going to distract your attention with individual projects, except to answer the statement of the gentleman from North Carolina that there is over a million tons of commerce on the upper Mississippi River. Two-thirds of all the great value attached to that commerce was for ferriage items, while possibly nine-tenths, or nearly that amount of tonnage, was for brush, stone, sand, and gravel, much of it used for Government work, and all carried on an average of 26 miles only. This stretch of the river is 700 miles long, but the average haul is 26 miles, and two-thirds of the value is for goods carried across the river.

Out of $32,705,000 of 1913 commerce, $6,540,900 was for teams carried across the river, 1½ miles; $5,218,000 was for other live stock ferried across; and, to cap the climax, 6,034 tons of automobiles, 3 miles across the river, $9,545,950. Think of it, over two-thirds in these three items of ferriage. The engineers' report shows 1,974,000 tons out of a total of 2,145,000 tons was for brush, sand and gravel, logs, and ferriage. Most of the brush, rock, and sand was for river work. What do you think of the commerce after expending about $28,000,000 for this part of the river, during which time commerce decreased over 90 per cent? The facts are all set out on page 2437, report for 1914, and the commerce of the Missouri River and other rivers show equally miserable results. The gentleman from Texas [Mr. HARDY], speaking about the commerce on the rivers a few minutes ago, stated that no commerce practically existed on the rivers down there.

Mr. HARDY. Or anywhere else.

Mr. FREAR. That is true, after hundreds of millions of dollars expenditure. Practically no commerce on the Cumberland, upon which the Government has spent $6,000,000; practically no commerce on the Tennessee, where it has spent $11,000,000; practically no commerce on the Mississippi, where it has spent about $150,000,000; practically a small commerce on the Ohio, where it has spent about $60,000,000; an insignificant commerce on the lower Missouri, where it has spent over $15,000,000. I add a few other rivers that speak for themselves.

	Appropriated.	1915 actual commerce.
		Tons.
Upper Missouri	$3,234,083	487
Big Sandy, W. Va	1,655,295	1,039
Cumberland River, Tenn	6,466,767	16,354
Red River, Ark., below Fulton	2,874,687	14,275
Trinity, Tex	2,492,287	1,571
Brazos, Tex	1,990,000	
Arkansas, Ark	3,823,336	12,143
Ouachita, Ark	4,212,869	14,899
Muscle Shoals Canal, Ala	4,632,975	7,982
Hennepin Canal, Ill	7,657,803	7,656

And with such a record the gentleman from North Carolina says we are opposed to waterways because this bill is loaded down with many millions in such projects. No one on the committee is opposed to waterway improvement, but we are opposed to pulling the wool over the eyes of the American people and saying $5,000,000 for the Ohio, $1,550,000 for the Mississippi, $1,000,000 for the Missouri, $1,000,000 for the Cumberland and Tennessee, and other extravagant expenditures, in this bill are required and necessary at this time.

Mr. HARDY. Will the gentleman yield?

Mr. FREAR. Yes. I yield to the gentleman from Texas.

Mr. HARDY. The gentleman is not opposed to water transportation?

Mr. FREAR. No, sir; not by any means. I would favor keeping open channels in all the inland rivers and stop extravagant lock-and-dam projects. Who is my authority for that? The best authority you have anywhere in the United States, Col. Townsend, chairman of the Mississippi River Commission, and he recommends the upper Mississippi, the Missouri, the Arkansas, the Cumberland, and the Tennessee, and 50 other river projects, recommended by Army engineers, all be abandoned except for open-channel work.

Mr. HARDY. Why does the gentleman wish to hold to that if there is no transportation?

Mr. FREAR. We should keep the channels open for those who care to use them, but they will not be used except for a little local commerce until we control the railway rates.

Mr. HARDY. Is not that just the question?

Mr. FREAR. The gentleman is right about it. We have discussed the same question before. We have spent over $150,000,000 on the Mississippi River, the finest river in the world. We have seen its commerce diminish 95 per cent or thereabouts during that time, and to-day it is practically without commerce except that which comes through New Orleans and through the Passes. All the padded fictitious commerce statistics have been exposed, and we will not get commerce if we spend ten times what we have wasted on the Mississippi, because freight is going to seek the railroads until we control the minimum railroad freight rates. With these facts before us, and this wasteful bill again offered, the majority of Republicans on the committee and two able members of the Democratic majority who have joined in the report, say that at this time we ought not to pass this bill. We do not say that a project for preparedness should not be allowed, but we want preparedness and not pork. When these items are brought up under the five-minute rule it may be well to find what items have been placed in the bill under the head of preparedness.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. FREAR. Yes. I yield to the gentleman from Missouri.

Mr. MEEKER. Has the gentleman a suggestion as to what amount of this legislation should go through as a war measure?

Mr. FREAR. I will refer to that later. There are over 400 items in this bill, and this bill is supposed to be an economy bill. The bill carries practically $27,000,000. The last bill, defeated in the Senate, carried $38,000,000. This bill is called an economy bill. Let us see if it is what it pretends to be. Six million dollars in the last bill was for the lower Mississippi River. Now, that item of $6,000,000 is carried by the sundry civil bill for flood control, so that is provided elsewhere and taken out of this bill. The last bill of $38,000,000 carried $1,300,000 for the Chesapeake & Delaware Canal. There is $5,000 in this bill for condemnation proceedings for that canal. The liability is incurred, but that amount is taken out. That should also be subtracted. The Government has put between nine and ten million dollars in at the mouth of the Columbia River, and the $38,000,000 bill carried for that project $1,000,000, or $975,000 more than this bill for a legitimate waterway project. That money is withdrawn from a legitimate waterway. Down in the district of the gentleman from North Carolina [Mr. SMALL] is the Norfolk & Beaufort Canal, which is cut to $100,000 from $1,000,000 contained in the last bill. There you have $36,000,000, adding these four items which were contained in the last bill, but have been otherwise provided, or are reduced in this bill. The last bill was $38,000,000, and with these four items deducted there is little to choose from between the bill defeated in the Senate last session and the pending bill. There is a difference of only about $2,000,0000 between this and the other bill. Are we saving anything? No. You have got practically the same propositions in this bill as in the last excepting the new projects. There are thirty-odd new projects. The gentleman from Missouri [Mr. MEEKER] asked how many of these new projects are for preparedness. I am not sure that there is one, so far as I can make out from the reports, but I shall not make that as a positive statement. Those matters can be discussed when items are reached, and it would be an absurdity for me to say what the War Department will consider war necessity, but I will say this that there is not a possibility of fastening preparedness on one-quarter of these new projects, so far as I can understand. I doubt if the actual number will reach more than 3 or 4 out of between 30 and 40 contained in the bill. And of the 400 remaining old projects they are not remotely connected with the preparedness measures.

Mr. LENROOT. Was there not a special board that recommended some five projects?

Mr. FREAR. Yes.

Mr. LENROOT. Are they all included in this bill?

Mr. FREAR. The gentleman is right about that; and let me say that he is referring now, I take it, to Document No. 140 of the Sixty-fourth Congress. I did not care to go into this until later on. There are one or two projects around the city of New York and New York Harbor that, possibly, may be included in this proposition. There is also Boston, Philadelphia, Norfolk, San Diego, and Mare Island. There are, possibly, six projects in this bill. Of course, New York has two or three projects there, but there is a question in regard to the New York project, which we can discuss under the five-minute rule, as to whether they come under preparedness needs. The question is, Do you wish to put millions of dollars into other projects at this time for possible future commercial needs?

Mr. SWITZER. Are not all of these projects the General Board recommended in the bill, except one?

Mr. FREAR. Which one has the gentleman in mind?

Mr. SWITZER. I think Puget Sound is the only one.

Mr. FREAR. The gentleman may be correct; but let us see what the bill provides: Take Boston. How much is it to receive? The new project in the bill obligates the Government for several hundred thousand dollars. How much has this committee given to it out of the $27,000,000, in round numbers, contained in the bill? Not one dollar. The committee simply put that project in the bill without giving it a dollar. It is part of the $40,000,000 assumed in this bill for new projects. What about the Mobile Harbor new project? How much was given by the committee? Not one dollar. We have put the Government under $1,000,000 obligation for the new Mobile project, all part of the $40,000,000 assumed for new projects, and not one dollar appears in this bill. Is not that correct? These are not preparedness items, but are among the 34 or 35 new projects.

Mr. MEEKER. Mr. Chairman, I do not believe the gentleman quite got my question a moment ago. Can the gentleman give the committee an estimate as to how much this bill should carry to do the work that is absolutely necessary in this war period?

Mr. FREAR. That, of course, would reach the judgment of different men in a different way and I would not attempt to state it, but I would say this to the gentleman from Missouri: If the Secretary of War would say that any particular project, mentioning it, is needed for war purposes, and that it will take so much money, and if he will ask for appropriations for these five or six projects recommended or for additional projects instead of for over 400 projects that appear in this bill; if he will take a dozen or a half dozen projects and say that those are the ones needed to be improved for war purposes, I venture to say that not a gentleman upon either side of the aisle will oppose his recommendation.

Mr. KETTNER. In reading the minority report, I took it for granted that the minority indorsed everything with the exception of those items that they mention in their report.

Mr. FREAR. Oh, no, no. There are in this bill $5,000,000 for the Ohio River. We have spent about $60,000,000 in round numbers on the Ohio River, and the commerce has grown smaller and smaller. That is an item which is not a war measure and it has a balance on hand of over $3,000,000.

Mr. KETTNER. That item is mentioned in the minority report.

Mr. FREAR. And there is $1,200,000 for the upper Mississippi and $350,000 for the Mississippi from the mouth of the Missouri down to the Ohio. Practical river men say that $200,000 would do the maintenance work—that is, keeping the channel open. During the 5-minute rule, if called upon, I shall refer to the testimony of the Army engineer who came before us, Col. Newcomer, in which he said that some of the dredges on the Mississippi River are used only two months in a year under the present system of extravagant appropriations. What I mean to say is this: We are appropriating and expending large amounts of money on these projects not needed at this time for commerce or war purposes. Take the Missouri River $1,000,000 item, and what is it for? The Missouri River expenditures are largely for land reclamation. Ninety-five per cent of the expenditures I have shown in the past is for revetment and diking. That is not for dredging the river, and as I have said, we get less than 40,000 tons annually of actual commerce outside of sand carried one mile or thereabouts. That is not for commerce or war needs. Why put that $1,000,000 in the bill? I am trying to answer the gentleman's statement as I go along with these items. There is nothing in the war or commerce situation that warrants putting $600,000 contained in this bill in the lower Cumberland River. We have stricken out the amount of $400,000 we put in the last bill on the upper Cumberland.

Now we have $600,000 for continuing improvements on the Cumberland, and I think the tonnage is something like 16,000 annually on the average after taking out the forest products and sand and gravel. Who says that is for war purposes? Take the Tennessee River, $400,000, contained in this bill. Is it for war or commerce? Where does the commerce come? If you study these commerce reports, you will find Army engineers add in freight cars on the Tennessee River, freight carried down or across the river that is never opened. The cars are sealed, but the freight is counted as river commerce. That is put in to make up tonnage on the Tennessee River. Are any of these items for war? If not, let us use the balances now in the hands of Army engineers to maintain channels. Now, these large items would make a large difference in this bill. Let me say in passing I did not expect to speak but a few moments on this bill or undertake to take part in the general discussion, but when Congressman TREADWAY left last night, and he had to leave, he suggested that something should be said in explaining the position of the minority of this committee. The gentleman who is the ranking Republican minority member [Mr. KENNEDY], who presented this report, is sick, as you know, and he is away two weeks on leave of absence. At this time I am only attempting to put before the committee the general character of this bill. I can not take it up by items until we get under the five-minute rule, and I do not know that I shall attempt to do so then, but I am now trying to show the general status of this bill and why it ought not to pass this House.

Mr. KETTNER. Will the gentleman yield?

Mr. FREAR. I will yield for a question.

Mr. KETTNER. The point I am trying to make is this: The minority report is signed by seven members.

Mr. FREAR. Yes, sir.

Mr. KETTNER. This is the first time the committee has ever held hearings. Why did not the minority report bring in a concrete report that they recommended to the House on which we could vote?

Mr. FREAR. The minority in its report says this bill is so bad it ought not to pass, and that $32,000,000 balances can care for river and harbor work. I should prefer, individually, to offer something constructive. I have suggested a strong commission of experts, as contained in the bill introduced, and not the commission that has been afforded here. What is that commission contained in this bill?

Every man on the floor of the House knows the Cabinet officers will give no more attention to the matter than the Secretary of War or the President of the United States has given to this bill. What else? Who are the other members of this proposed commission? Army engineers who have recommended every one of these 400 projects contained in this bill and hundreds of others, no matter how bad and vicious they are. I am perfectly willing, as I stated, to vote and stand for any proposition the Secretary of War says is for preparedness and necessary for war purposes, but I am not willing to vote for all these projects contained in the bill, some of which are wasteful, and over 400 of which are not war or preparedness items. The gentleman from California says, Why not bring in a constructive program here? The proposition of the minority was this, that there were $32,000,000 on hand on the 1st day of March uncontracted for, some of which could be applied to any project, and therefore it was not necessary to appropriate a single dollar at this time.

Mr. KETTNER. Will the gentleman yield for a moment there?

Mr. GALLAGHER. Will the gentleman yield?

Mr. FREAR. I yield first to my colleague, Mr. GALLAGHER.

Mr. GALLAGHER. Is there anything in the report of the majority that points out any constructive legislation

Mr. FREAR. No. It is the same old bill, and let me say this, and also in response to the question asked by the gentleman from California: There has not been a single proposition offered on the floor of this House to strike out items that has succeeded, and I have offered at least 50 amendments to different bills to strike out what I deemed wasteful items, although the gentleman from California never voted for a single one of those amendments, as far as I remember. Is not that true? We can not strike a project out of this bill? We can not strike anything out of any river and harbor bill? It stands here like a barrel. If we knock out a stave then the barrel falls. That is the result of omnibus-bill legislation. The bill must be defeated entire before any substitute need be offered. That is the only way.

Mr. KETTNER. I know the gentleman does not wish to make any misstatement.

Mr. FREAR. I would not do so willingly.

Mr. KETTNER. I voted with the gentleman in the committee——

Mr. FREAR. I am speaking about on the floor of the House.

Mr. KETTNER. I have stood with him, and I made a motion or seconded it asking to have full stenographic hearings——

Mr. FREAR. I can not yield further.

Mr. KETTNER. Just a moment, if the gentleman will indulge me. The chairman of the committee mentioned a good many projects where money could not be expended. San Diego is one. There are $220,000 available and has been available for a year——

Mr. FREAR. I can not give way for an argument on the San Diego project.

Mr. KETTNER. I am trying to explain——

Mr. FREAR. The gentleman will have time on the floor of the House to show if I have made an incorrect statement. I hold in my hand a balance sheet of engineers showing 19 out of every 20 projects have balances in the hands of engineers that can be used for these various projects.

Mr. KETTNER. Will the gentleman yield?

Mr. FREAR. I can not give way now, because this is the time in which I must make this statement, not for myself alone as much as for those who signed the minority report. The gentleman speaks about San Diego. I have not discussed his proposition. That is the difficulty with this method of legislation. Gentlemen from New York are interested in the New York project, gentlemen from Pennsylvania are interested in the Pennsylvania project; in California, in the Los Angeles proposition or the San Diego project, and here the minority is interested in what? In trying to save the people of this country from a whole lot of wasteful projects which are in the bill and trying to save unnecessary taxation which follows such extravagance.

Mr. HULBERT. Will the gentleman yield?

Mr. FREAR. For a question.

Mr. HULBERT. Does not the gentleman believe that it is his patriotic duty to be as much interested in the New York proposition, which is the New York Harbor, as it is mine?

Mr. FREAR. That is all right. I will say this: If I could only read from the reports——

Mr. HULBERT. The gentleman yielded.

Mr. FREAR. The gentleman has asked his question. I refuse to yield further. I will answer, however, in the language of the engineer who came before the committee. In reply to the gentleman from New York, who was insistent at all times to get his own project through, the 40-foot channel, the engineer said—I am quoting from Col. Newcomer, who answered, on page 5 of the hearings:

> Thirty-five feet is ample for all commercial needs; but the Navy wants the greater depth, and, primarily, that should be provided for from some other fund than the river and harbor fund.

This is in reference to the New York project.

Later on he says—and I will refer to it, although I was not going through it—this is the gentleman who represents the War Department. We could not get the Secretary of War, we could not get the Chief of Engineers to come before us. Who did come? Col. Newcomer, of the Army engineers. He came before us, and here is what he says——

Mr. HULBERT. Will the gentleman yield to me?

Mr. FREAR. I submit, Mr. Chairman, that I have said a number of times that I will not yield.

Mr. HULBERT. I wanted to know the page the gentleman is reading from. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. HULBERT. If the gentleman is reading from a report, are not the members of the committee privileged to know what page the gentleman is reading from?

The CHAIRMAN. The gentleman from Wisconsin has the floor.

Mr. STAFFORD. I make the point of order, that is not a parliamentary inquiry.

The CHAIRMAN. The Chair will state that the gentleman must get recognition from the Chair before interrupting.

Mr. FREAR. Now, I am reading from page 118 of the hearings what Col. Newcomer said on page 118 in reply to the gentleman from New York in regard to his 40-foot project:

It seems to me that 35 feet at Hell Gate is really adequate, for this reason: The depth of 35 feet, with 5 feet of tide, gives you practically 40 feet. The draft of our heaviest battleship contemplated is about 33 feet. It seems to me that 35 feet will answer.

And then he goes on and makes the same statement later on. That is his opinion of the New York item which is considered one of the war items in this bill.

The anxiety of some Members is to get what they can. That is very natural, each gentleman is looking after the item in which he is particularly interested, and I do not blame him.

But, representing the minority, I am saying briefly that this bill is not called for at this time. There is not a single reason that can be advanced to justify this bill or any bill of like character, calling for practically the same amount as the last bill, excepting four projects, two of which are provided elsewhere. It is practically the same as the last bill in amount and character. The gentleman from North Carolina who preceded me said there were a number of surveys in the bill, about 75 in number, I believe. He did not tell this committee that over 100 authorizations that have not yet been surveyed were testified to by the Army engineer in hearings before the committee. The purpose is to take these Army engineers, who ought to be sent to the front to aid in the European war and be engaged in the work of protecting their country, to have them spend their time surveying muddy creeks around this country, many of which have been surveyed time and time again. A hundred authorizations for surveys yet to be acted upon is his testimony. Why, then, put 75 more surveys in the bill? Yet, strangest of all, when the engineer's testimony is read, it will be noted that the colonel insisted that it was a proper proposition, and the surveys ought to remain there. In other words, muddy creeks and other waterways are more important than the war in Europe.

Now, gentlemen, I want to read something to you which impressed me very much the other day, because I am proud to be a Member of this House, and I think more of the standing of this House individually and collectively than can any outsider. I understand the pressure that comes from constituencies demanding that Members support some particular project, and for that reason I resented this article; and yet I want to ask what defense can be made to this statement which appeared in the Washington Star the other day? It is the first editorial, under date of May 27. There are some old Members of the House who are present who have given character to it in the past, strong men who have made their impress on Congress and upon the country. Let us ask ourselves what answer shall be made to this editorial when it says:

THE HOUSE.

Some persons are denouncing the House. Others are pitying it. Poor old House! Once so powerful. Now so impotent. Once the cynosure of all eyes when important legislation was in the making. Now the object of mild curiosity. Real interest is awakened only when the Senate has business in hand. Nobody expects the House to do more than cut out something in the rough for the Senate or a conference committee to put into finished shape. And so on.

In politics we must always allow for exaggerations. There are exaggerations in this sort of talk about the House. It is not nearly so poorly off as its critics describe. On occasions, when it rouses and gets into its stride, it is still a husky and forceful body.

And yet it must be admitted that in the matter of popular interest the House has of late years been losing to the Senate. The Senate has been oftener in the picture. It has been doing some notable things. Some very stirring episodes have been staged in its Chamber. Some filibusters, with far-reaching effects, have been conducted there. All the successful fights on "pork" have been waged there. In many things the Senate has shown high quality for courage, ability, and general legislative resources.

The House is itself responsible for whatever loss of prestige it has sustained. In curtailing the powers and importance of the Speaker, reducing him to the proportions of a presiding officer only, and in limiting debate too often and too radically, thereby giving countenance to the charge from the outside that Members wasted time with their tongues, it inflicted injury upon itself.

The wonder is that the House does not resume its old form. There never was a czar in the Speaker's chair. Randall and Reed and Crisp and Cannon knew how to handle a gavel and promote business, but none was a tyrant in office. Under all of them excellent legislative results were obtained and wide interest in House proceedings maintained. There was some denunciation but no pitying of that body in the public comment. The Speaker should again be the second officer in influence under the Government, and have full scope for the exercise of talents associable with his place.

This very paper, the Star, never opened its columns either editorially or in a news way to a single criticism of any river and harbor bill, to my recollection, although it commends the Senate for its opposition and successful defeat of some of the river and harbor legislation in the past. And yet we can not question but what that is the estimate of many critics, an estimate of the House, which has as able Members to-day as I believe it has averaged in the past. Such criticisms come, in my judgment, because we do not do business in a businesslike manner. "Why," says the gentleman from North Carolina [Mr. SMALL], "do we not offer somthing constructive?" I offered a bill to establish a waterway commission. It would be useless to expect any permanent relief, I am afraid, however, unless we can have a budget system. What kind of a commission? Of Cabinet officers and Army engineers who will report these waterway items as they have in the past? No. Of experts to be chosen by the President, no matter from what party, men familiar with our waterways alone? Oh, no. Men who know and have studied the whole waterway question abroad as well as in this country, men who can make our waterways valuable. That is what I proposed. An expert waterway commission of high standing. That is the only businesslike way in which a man who runs a business would undertake to conduct his business. He would want to get the best experts and not use hit-and-miss politicial methods. Men press their projects hard and often go over the committee if they can not get their projects in the bill. Then they are expected to stand for the bill no matter what it contains.

Mr. REED. Mr. Chairman, may I ask the gentleman a question for information?

Mr. FREAR. Yes.

Mr. REED. I think what the gentleman says is entirely true about there being very little commerce nowadays on the rivers that he mentioned as needing legislation. I ask, Would the country be benefited by legislation that would increase freight rates and drive the commerce to the rivers?

Mr. FREAR. No; I would not say that. I do not think in the long run that the rates would be increased. I take it that where we have the greatest rivers we know of in the world, including the Mississippi, with a 9-foot channel from St. Louis down, they should be taken care of. Competition ought to make low rates, if legitimate. There should be a fleet of ships traversing that river to-day, whereas when we were invited down to Freeport, Tex., to look at a project there, what happened? The chairman of the committee wrote to St. Louis to try and get some boat to take us down. We thought, of course, we would find a boat to take us down a river on which we had expended $150,000,000; but what word did we get? Not a single boat makes the trip except an Army engineer's boat. Barnhart started a boat line, but he had only one or two barges; that is all.

You gentlemen know from your own experience that the Mississippi River, and the Ohio River, and the Cumberland and the Tennessee Rivers, and all those other rivers, have lost in their commerce. The commerce on the Mississippi River has decreased 95 per cent since we began spending $150,000,000 that has gone into it. Is it not time for us to ask what is the reason for this serious situation? Is it time to point a finger of scorn at Members who are trying to bring out these facts and show up present conditions? Is it not time to call a halt on extravagance and appropriate money only for war projects?

I was going to take up the inland waterway, the Chesapeake & Delaware Canal, that has been spoken of in very eulogistic terms, but I notice the gentleman from Pennsylvania [Mr. MOORE] is not here, and I will only mention it briefly. It is a 13-mile canal. What is asked for there? All the way from $8,000,000 to $12,000,000 by condemnation proceedings. What for? I think it was the distinguished gentleman from Illinois [Mr. MADDEN], who made the statement that it was intended to take the seasickness out of the sea. [Laughter.] Surely it is not for war purposes. A 12-foot canal costing probably $12,000,000, that is in the bill.

Mr. FOCHT. Mr. Chairman, will the gentleman yield?

Mr. FREAR. Yes. I yield to the gentleman from Pennsylvania.

Mr. FOCHT. Do I understand the idea to be conveyed is that all of these projects are to be condemned?

Mr. FREAR. Oh, no.

Mr. FOCHT. Some of them are meritorious, but are we to understand that the criticism which comes from the public and

the necessity for an adverse vote on the part of many of us is because this great American legislative body has degenerated, so far as this bill is concerned, into a little insignificant State legislature, where they logroll for every fellow to get his piece of pork? Is that it?

Mr. FREAR. Yes; I am afraid so. I wish I could state things as concisely and clearly as my friend from Pennsylvania. He has correctly stated the situation as I view it.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Missouri?

Mr. FREAR. Yes; certainly.

Mr. MEEKER. Does the gentleman believe that the present commerce which is now moving on these waters—does he think that it can be maintained without the expenditure of the money provided for here?

Mr. FREAR. Unquestionably, by keeping open the channels. The channel work is one of the smallest parts of the expenditure that is contained in this bill. Some of these appropriations, or many of them, contain a double item of maintenance and improvement, which are linked together; but, of course, the maintenance is usually a comparatively small item in keeping up a project. The improvement is for projects sometimes costing many millions that they are hoping some time to complete.

Mr. MEEKER. Does the gentleman believe that the Nation can look with any hope of relief to the railroads to relieve this congestion of freight traffic that we now have and will have?

Mr. FREAR. Standing alone?

Mr. MEEKER. Yes.

Mr. FREAR. No. Nor will the rivers of this country ever relieve the congestion. And why? Because there is not a single boat on the Mississippi River to replace that commerce which once existed. Boats can not successfully compete for the freight traffic. Results have proven this to be the case.

Where is anyone to get the transportation facilities? The Streckfus Line subsists only on its passenger business. There is no particular freight carried on that line, or it is very insignificant in amount. I have been on that line and I have talked with the captains of the boats, and I live on that river, and I am interested in it, and I do not want to see it closed up. I want to see commerce on the river, not from dumping money into it aimlessly but by taking up the whole question and acting intelligently.

Mr. MEEKER. I have another question I would like to ask.

Mr. FREAR. Very well.

Mr. MEEKER. Of course, the gentleman is aware of the fact that the city of St. Louis has just now taken over the entire river front from the railroads there and is preparing now new docks for the river?

Mr. FREAR. I understand the city of St. Louis has taken it over from a corporation and that it now belongs to the public.

Mr. MEEKER. In the last campaign in the city, by an overwhelming majority, that movement was indorsed at the election. Here is the next question: If we can not look to the railways for relief in this transportation congestion, which has been increasing constantly during the last half dozen years in the Mississippi Valley, where are we to look if we do not look to the rivers that we have, instead of to new rivers for opening up trade?

Mr. FREAR. Only by intelligent study and management by a competent board. As the distinguished gentleman from Ohio, Mr. Burton, once said, we can better afford to take the money that we now expend on these waterways and buy the freight and burn it and thus save the money that we are spending on the rivers. We have lost 95 per cent while we have spent $150,000,000 on the Mississippi River—my river, in which we are both interested.

Mr. MEEKER. Oh, we are talking about feeding people, not about burning stuff.

Mr. FREAR. We have a half century's experience before us. There are no boats on that river. You have got to guarantee to people that they will have a profit before they will undertake to build boats. Barnhart is the only one who has made the experiment, and he has made a failure, so far as I know, through no fault of his. He could not get freight. I agree with the gentleman from Missouri that the Mississippi River ought to have hundreds of boats on it, both the upper and lower Mississippi, just as it had 40 years ago, but we are doing nothing to get those boats nor to secure actual river commerce.

Mr. SWITZER. Mr. Chairman, will the gentleman yield?

Mr. FREAR. Yes; I yield to the gentleman from Ohio.

Mr. SWITZER. Does the gentleman say that Senator Burton made a statement like that applying to all rivers?

Mr. FREAR. Oh, no. The Ohio River formerly carried 13,000,000 tons and now it carries only about 4,000,000 tons, so far as we can ascertain from the Engineer's reports.

Mr. SWITZER. The gentleman does not want to make a misleading statement. The 13,000,000 tons statement was gone into by a special board of river and harbor engineers, acquainted with improvements of rivers and harbors. They made a special report, and in that report the amount of commerce was shown to be only 9,000,000 tons. And yet the gentleman continues to refer to it as a 13,000,000-ton commerce. There is about as much commerce on the Ohio River to-day as there ever was.

Mr. FREAR. Now, Mr. Chairman——

The CHAIRMAN. The gentleman from Wisconsin declines to yield.

Mr. FREAR. I want to yield to every gentleman. Of course, you can readily understand where the gentleman from Ohio [Mr. SWITZER] is interested, and properly so. That is natural. But as shown by this last report there is a commerce of about 4,000,000 tons, carried how far? Twenty-six miles on the Ohio River, and we have put about $60,000,000 into it already.

Mr. SWITZER. Will the gentleman yield for a question?

Mr. FREAR. Yes; briefly.

Mr. SWITZER. In order to be fair about it, what was spoken of as 13,000,000 tons of commerce included the ferries.

Mr. FREAR. Yes.

Mr. SWITZER. And if you include ferries it is 9,000,000 tons now.

Mr. FREAR. Yes. I presume that is approximately so.

Mr. SWITZER. But the gentleman is unfair——

Mr. FREAR. No.

Mr. SWITZER. He includes ferries one year and excludes them another year, in order to make an unfavorable comparison.

Mr. FREAR. I did not do that intentionally. The Army engineers formerly included in their report all the ferriage across the river at Cincinnati. They put that in their report of freight statistics.

Mr. SWITZER. The gentleman is in error about that. The engineers never put it in. The statement of 13,000,000 tons was a statement gotten out by people on the Ohio River. They made that error, and the engineers sifted it out.

Mr. FREAR. They never sifted it out until the river and harbor bill of 1914 was brought in on this floor and we showed up the kind of statistics that had been given to the American public under authority of Army engineers, and not until then did they make an effort to find out what the commerce really was. And of the commerce which is there 95 per cent of it is coal, averaging possibly $3 a ton. That is a good deal in amount, but we have put $60,000,000 in there, and we are going to spend a great deal more.

Mr. SWITZER. Why does the gentleman say the commerce there is just coal? Would it not be proper to say in reply that a good deal of the commerce from the gentleman's State is just iron ore?

Mr. FREAR. Yes.

Mr. SWITZER. The gentleman believes that is legitimate commerce?

Mr. FREAR. Yes.

Mr. SWITZER. Is not a ton of railroad iron worth a great deal more than a ton of iron ore?

Mr. FREAR. That is carried about 26 miles on the Ohio River, and commerce at the Lake ports is carried about 700 miles. The little village of Ashland, in my home State, with over 5,000,000 tons of annual commerce, carries more actual tonnage than the Ohio River, a large part of which is sand and gravel hauled less than 20 miles. I think that will be made plain by an examination of the statistics. Not only that, but the Superior-Duluth Harbor, which the Army engineers refused to recognize in this bill, has approximately 40,000,000 tons a year, and is the second harbor in the United States. I believe that in my own State we did not get one one-hundredth part of what you have got here in this bill for the Ohio River—$5,000,000. And yet the engineers have about $3,000,000 balance on hand for the Ohio, according to the statement which I hold here.

Mr. MEEKER. Will the gentleman yield?

Mr. FREAR. Yes.

Mr. MEEKER. I have been out of the Hall for a moment. Do I understand that the gentleman takes the position that none of the expenditures in the bill are necessary at this time?

Mr. FREAR. Oh, no. I would not want to be understood that way.

Mr. MEEKER. Then if the gentleman does not, can he point out to the committee those items which he does consider essential at this time?

Mr. FREAR. I would ask the House to send the bill back to the committee and say that you will not accept a bill which contains all these wasteful items. Let them strike out the Congaree River and many others of like character. I do not want to mention them. That $100,000 was put in after the committee had practically ceased its labors. After we have spent over $600,000 on the Congaree River, we have secured about 4,000 tons of commerce on it. In 1914 there were three steamboats on the river and in 1915 two steamboats and last year we got down to one old stern-wheeler, but the committee has just added $100,000 for that river in a new project in this bill.

Mr. RAGSDALE. Will the gentleman yield?

Mr. SWITZER. Does the gentleman contend that there is need for an appropriation this year for Ashland and Fond du Lac?

Mr. RAGSDALE. Will the gentleman yield?

Mr. FREAR. I yield to the gentleman from South Carolina.

Mr. RAGSDALE. The gentleman has referred to the Congaree River especially.

Mr. FREAR. I did not want to do so particularly.

Mr. RAGSDALE. Then, if the gentleman did not want to, I will not ask him to make any further statement.

Mr. FREAR. The question was asked me as to particular projects. I do not care to mention them at this time, because if they are mentioned it simply calls out the Members who are interested in these rivers. I do not blame them at all for that, because the rivers are in their States.

Mr. RAGSDALE. I can only say this to the gentleman, which he probably has not studied about: That the coastwise trade has been depleted of the vessels that formerly came to Georgetown, S. C., and other ports, which has made it impossible to deliver the freight that formerly was taken into the interior. The conditions which now exist are not because of a lack of freight, but because of a lack of facilities to transport it, as the gentleman will find out if he will kindly look into the facts.

Mr. FREAR. I am familiar with the facts, and I will tell the gentleman this: That if he will look at the statistics of the Congaree River for 1914, 1915, and 1916, as I now remember them, they total about 12,000 tons of actual commerce, which shows that they average about 4,000 tons a year. That is practically the same tonnage that the river has now. That is, of course, taking out the logs and timber products which float. So that the average is about the same all the time.

Mr. RAGSDALE. The gentleman knows that a large part of the falling off in freight there is due to the wharfage conditions at Columbia——

Mr. FREAR. Yes.

Mr. RAGSDALE. Which, if relieved, will absolutely give a volume of freight that will justify these expenditures.

Mr. FREAR. Oh, $600,000 have already been spent there. It is admitted in the hearings, and, of course, it is a fact, that there is no wharf at Columbia. Yet this boat has been going up there all these years, and $600,000 has been spent by the Government, while no wharf was ever built at Columbia. A wharf will not do the business, nor will $100,000 contained in this bill. The Wateree River does not offer any commercial reports, yet we spent over $200,000 on that. Your State—South Carolina—is no worse, I was going to say, than my State and lots of others.

Mr. RAGSDALE. With all due deference to the gentleman, I do not think he is quite fair to my State, to say that it is no worse than his.

Mr. FREAR. Then I will admit with pleasure that in many respects it is quite as good.

Mr. REED. I have seen the statement made that the Government could take the money that is expended for interest on the investment, and the pay of the lock tenders and the engineers, and the cost of maintenance of the improvement, and ship all of the tonnage as freight by rail, and then have money in the Treasury left. Is that true?

Mr. FREAR. I would not want to vouch for some other man's statement. But the gentleman would be surprised to find, of the $900,000,000 that has been expended for improvements, how little we can show in results. Over one-half has been wasted, I believe, according to the reports. Yet we are criticized because we suggest that this bill ought to be corrected, and there is only one way to correct it—you can not drive anything out of the bill; you will not be able to drive a single project out of it—the only way to correct it is to defeat the bill and put through an appropriation for immediate necessities. I would vote for any project that was for immediate preparedness that would meet with the approval of the Secretary of War. The Secretary of War does not know what is in this bill, as the gentleman from Illinois well says. He has not read it over, and if he did he could not understand it, because it takes study. It has been studied by the majority as well as by the minority members of this committee, and when we think we know it well there is much more to learn.

Mr. HELM. Will the gentleman yield?

Mr. FREAR. For a question.

Mr. HELM. How do all of these unmeritorious propositions get by the board of Army engineers?

Mr. FREAR. If the gentleman will explain how the $4,000,000 got into the Kentucky River in this bill over in his own district, which has no commerce on it, I would be glad to answer the question.

Mr. HELM. I am asking purely for information.

Mr. FREAR. I appreciate the gentleman is asking for an honest purpose, but that involves a proposition I would prefer not to discuss at length.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. FREAR. Mr. Chairman, I ask unanimous consent for 15 minutes more.

The CHAIRMAN. The gentleman from Wisconsin asks that his time be extended 15 minutes. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object, how much time has the gentleman occupied?

The CHAIRMAN. One hour.

Mr. FREAR. I have been asked a good many questions, and here is an important question, and the gentleman who preceded me had an hour and 50 minutes.

Mr. MOORE of Pennsylvania. I will not object to the gentleman's extension.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FREAR. Now, let me read the gentleman something which will explain this far better than I can, because this comes in a statement after the last river and harbor bill was held up in the Senate. Col. Townsend, president of the Mississippi River Commission, who is an able man, although we can not agree with all of his projects, Col. Townsend said that the Missouri River $20,000,000 new project ought to be stopped. He and Col. Deakyne so recommended. There is a 500,000 acre reclamation project on the Lower Missouri River, and Col. Black, who had only been on the Missouri River once in his life, according to the statement by Senator HUSTING in the Senate—Col. Black, now Gen. Black, overruled the others. Why?

Mr. BORLAND. Gen. Black did not do that alone; he was assisted by several other officers. The board consisted of seven other men. It was their judgment against one man.

Mr. FREAR. They overruled Col. Townsend and Col. Deakyne. As I say, Gen. Black was on the upper Missouri River but once. The same situation occurred on the Mississippi River. The dam at Keokuk was required to let out its waters and orders were given to let out 2½ feet, so the Army engineers could go up. The water was let through the dams. And yet we have spent $28,000,000 on the upper river—for what?

Mr. HELM. Will the gentleman yield for a further question?

Mr. FREAR. Yes.

Mr. HELM. During the time I have been a Member of the House days have been spent in the same kind of opposition coming up annually, and how is it that year after year, year in and year out, these unmeritorious propositions are O. K.'d and vouched for by this board of Army engineers. Further, is it the same board; and, further, if it is a commission, how can you expect to get better results from a commission than you can from a board of Army engineers, who are always supposed to be men of the highest honor?

Mr. FREAR. The Army engineers are as honest and as high-class men as you can find. But from the very day that they are sent to West Point, from the very day they received their appointment, they were under political influence and have been surrounded by political influence. After they become engineers they are surrounded by great pressure. The whole delegation, consisting of 11 different Members—2 Senators and 9 Congressmen—in the case of the Cumberland River, went to these engineers and got them to change their report. Political pressure is brought to bear. You could not bring it to bear on the Interstate Commerce Commission, and until you substitute some such method you will not get very far in dealing with the waterways situation.

Now, the gentleman from North Carolina [Mr. SMALL] stated that I was not in favor of waterway improvement. Of course those things do not mislead the House at all. Any man who seeks to be fair will never gain anything by taking such a position. I desire to say that I believe we ought as soon as possible to take advantage of the wonderful facilities that we have in this country for waterways and waterway transportation. Of course we can not expect to substitute the old stage coach back again for the locomotive, and we can not substitute the river and canal for railroad traffic. Ninety-five per cent of the traffic has been lost, but we can doubtless regain it to a great extent if the problem is met intelligently and as an economic proposition.

Harbors are utilized, and it is right that liberal appropriations should be made. These are things that we all want and ought to support with reasonable appropriations. Everyone is in favor of that, but when we get a bill like this, with 400 projects containing local improvements, of no particular waterway value and of no war value, it becomes a different thing. By the way, the Army engineers can take money that goes into the group system provided for in this bill from one project and put it into another, and we are helpless. Gentlemen complain about lump-sum appropriations, but you are asked to lump the appropriations here in a group. It is impossible to find out how much money goes to this project or to that project, because the Army engineers are enabled under this group system to make any appropriation and apply it to any project.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. FREAR. Yes.

Mr. MEEKER. Are we to be left in this position in the House this year now in this emergency, that neither from the minority nor the majority, nor from the War Department is this Congress to be told how much of this money should be appropriated for these urgent needs during the war?

Mr. FREAR. Mr. Chairman, the gentleman would not expect me to say how much money is to be appropriated. The gentleman knows that I would not assume to say what is the correct amount, nor would any other member of the minority. I say this to the gentleman, and I say this to the House, and I speak, I believe, the sentiment of every one of the seven members who have signed the minority report. If the Secretary of War will send word to us, not that this bill is right—we have seen that it is not and we know that it is not—but if he will say certain items ought to be cared for and additional money is necessary, we will grant it. I insist the engineers have a balance of $32,000,000 on hand. If any more is necessary, the House will vote for it, but not for a bill like this that we have looked over and know is not right, either from a war or commercial viewpoint. In the Senate they passed, in 1914, a $20,000,000 substitute. The bill called for $53,000,000. The next time the Senate passed a $25,000,000 substitute, yet our bill that passed the House was for $38,000,000. That substitute amount was placed in the hands of the Army engineers. People say, "Why do you trust the Army engineers who have failed in the past to satisfy in regard to these other projects?" You can not do anything else. You have got to do so in the final analysis, or you must have a different system.

Mr. MEEKER. If the gentleman will yield to an observation instead of a question——

Mr. FREAR. Yes.

Mr. MEEKER. It does seem to me that if this group of men in the minority have squared themselves away to fight this bill with all their might, they at least should come here with a substitute that we men can follow. [Applause.]

Mr. FREAR. We have never done that in the history of the House or the Senate. The House has waited until the bill was discussed, and then has had offered a substitute and that has been passed. That has always been the history of legislation. I had not expected to talk here to-day, as I stated. The gentlemen who were fighting it vigorously are not here—the men who expected to talk. I do not believe it would be proper to suggest my own views on this particular question of a substitute, because I can not speak for the minority members as to that.

Mr. O'SHAUNESSY. Mr. Chairman, will the gentleman yield?

Mr. FREAR. Yes.

Mr. O'SHAUNESSY. I want to say to the gentleman that I have listened to him with a very great deal of interest. Is the Board of Army Engineers condemned for the first time to-day? In saying that I will say that I have never heard them condemned before. I have always heard them cited as a justification for the river and harbor bills. It is news to me that they have been subject to political influence.

Mr. FREAR. Of course the gentleman opens up a proposition in saying that they have been condemned here for the first time. The Army engineers stood for the old Trinity River project and the old Brazos River project, and I can go over a number of projects of like character and show them to you. They stood for the old Kentucky River project on which we spent $4,000,000. They stood for the Big Sandy project and for the Hennepin Canal in Illinois where we spent over $7,000,000 and have no real commerce. They stood for all of these things. The gentleman says, "Are they condemned for the first time?" I am simply stating the fact as shown by the Army engineers' report.

Mr. O'SHAUNESSY. Then your statement is simply an indictment of the system under which we suffer and an indictment of our West Point Military Academy.

Mr. FREAR. Oh, no. Does the gentleman believe that these projects I have cited ought to have been carried on?

Mr. O'SHAUNESSY. I am absolutely against them, but I am trying to figure out how a man whom we send to West Point, whom the public educates, will stand for this kind of business. I am trying to get down to the nub of the thing.

Mr. FREAR. I thought I had explained it. We know this, that they have indorsed these projects. We know this, that they are very high-class men but they have indorsed projects good, bad, and indifferent, as shown by the reports.

Mr. HELM. Could you get a project in without the indorsement of the Army engineers?

Mr. FREAR. Oh, no. They must approve under the practice.

Mr. HELM. Except by amendment upon the floor?

Mr. FREAR. Except by action on the floor.

Mr. HELM. So that the entire fault goes back to the Army engineers?

Mr. FREAR. No, it goes back to the system.

Mr. HELM. An absolute prerequisite to an item in every one of these river and harbor appropriation bills is the O. K. of the Army engineers.

Mr. FREAR. That is what you have now. What I say is this: We must get rid of the system, and take men who are experts, as on the Interstate Commerce Commission, who are not governed by influences brought to bear constantly on the Army engineers, and I am not criticising them, for they are high-class men.

Mr. O'SHAUNESSY. What induced my statement was this: I have heard it said not only in this Chamber, but outside of the Chamber, that these are men in the Army, that they have positions for life, and that they are not subject to political influence, and that we can rely upon their statements, and in whose statement can we rely, in Heaven's name, if we can not rely upon theirs?

Mr. FREAR. That is, in my judgment, for men who understand the business end of this question. These gentlemen know nothing about commercial needs, as evidenced by dozens of projects to which I have directed attention in the past.

Mr. O'SHAUNESSY. Then we ought to send them to a commercial school.

Mr. FREAR. Perhaps the gentleman is right about that. The facts speak for themselves.

Mr. GALLAGHER. Is there not a commission provided for in this bill to take that work from the engineers?

Mr. FREAR. Yes; and probably to change the system, but I am afraid of the system proposed in the bill, because that will get back to the Army engineers.

Mr. GALLAGHER. But provided the President is behind this.

Mr. FREAR. I understand the President is behind this bill, but he does not know what is in the bill, I warrant.

Mr. O'SHAUNESSY. How many engineers will be diverted from war work and sent to this work under this bill?

Mr. FREAR. I could not say, but there are between 60 and 70 engineers, largely engaged in river and harbor work, as I understand.

Mr. HELM. That being their sole and exclusive duty?

Mr. FREAR. I would not say that. That is my recollection of the number engaged. Of course some one may be able to correct that as to the exact number.

Mr. HELM. That have no other duty?

Mr. HULBERT. Of course the gentleman knows we passed a bill yesterday permitting the bringing back into service men of the Retired Engineer Corps. Does the gentleman know that a number of the men employed in the Engineer Corps have already been transferred to the railroad regiments and men have been brought back out of the reserve corps to take their places?

Mr. FREAR. I know this, that a thousand engineers have been sent to France and we are going to send several thousand more, and we need to send every man we can spare instead of having them survey creeks and mud holes here. We all know that, and we do not need to have that impressed upon us. I concede this, that it is necessary on important projects, we will

say the New York Harbor project, if it is a deep-water project; if it is not deep enough, it ought to have what we call a new project—that is, it ought to be deepened. I will concede that in ordinary propositions, but as to these rivers and these canals——

Mr. HULBERT. Does the gentleman concede the items in this bill for New York Harbor are intimately connected with the military necessities of the country?

Mr. FREAR. Oh, no; I will not concede that, because I will take the report of the General Board on that and——

The CHAIRMAN. The time of the gentleman has expired.

Mr. FREAR. May I have five minutes more in order to close my remarks?

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. FREAR. Now, gentlemen, I have talked in a rather desultory way. I have tried to accept all questions. I expected the gentleman from Massachusetts [Mr. TREADWAY] to be here and to take the burden of it. However, I am very glad to do what I can to explain the minority report. It is necessary, possibly, to show some items in the bill specifically when we reach them, but there is no disposition to hold up the bill as it has been held up in the past. The people over in the Senate will do what they consider ought to be done. They have done so in the past. The Senate has defeated these various bills, so it shows the effort was not entirely wasted in disclosing here what the facts are. Now, on this bill my suggestion is this: There are many projects. We have $31,000,000 of money, balances on river and harbor projects, that can be used. One million dollars of that can be used anywhere the Army engineers decide to put it, because it is part of the balance; we have that in the hearing of the lump-sum appropriation. If more money is needed for any specific project, the Secretary of War may ask for it and he will get it from Congress. It is not necessary to pass a bill of this character of four hundred odd items, a bill that presents a grouping system that has never been attempted before, in which 30 items are sometimes grouped. How will you reach an indefensible item in a group? There is no way under the heavens. You have to accept it, and they can put the money anywhere they want. There are 400 items in this bill, counting these projects, to which this money can be diverted, where the money goes in groups. I think the survey proposition at this time is wrong. Now, gentlemen, there can be no question about the motives of men. I am not criticizing the motives of men who have been defending their propositions in the past.

I believe the people of this country who are paying the bills, who paid $900,000,000, largely wasted, that has gone into these waterways, are entitled to a showing. What are you giving them? That is the question, and you can not say, "Oh, this theory is right and gentlemen who oppose it are opposed to rivers and harbors." The people want to know, and they are entitled to see, what the results are. If they can make waterways useful in other countries, why not in this country? If they can get benefits out of the Rhine River, why can not we get benefits from the Mississippi, from the Missouri, or any of these other rivers? That is the question. I would like to see every project that is important taken care of that is for preparedness. I do not want to see the people of this country taxed for propositions like some of those that are contained in the bill. Some of those for maintenance ought to be abandoned, in my judgment; but, as I said, under this system of balances 90 per cent—yes, 95 per cent—I assume have balances left to their credit which can be used if necessary.

Mr. HELM. Will the gentleman yield?

Mr. FREAR. Well, I desire to conclude.

Mr. HELM. Just for one question. Is the gentleman in a position to inform the committee whether there is any disposition on the part of the railroads to buy river boats and take them out of commission in order to secure the traffic by railroad instead of by water?

Mr. FREAR. No; I do not think there is any such disposition, because there is no commerce competition to-day by river boats with the railroads. The commerce is too insignificant.

I know, as the gentleman from Missouri [Mr. BORLAND] once said, and I presume it is true, railroads watch and check over shipments. According to the Commissioner of Commerce report, in 1910, however, practically all of our coastwise trade to-day is carried by boats that are owned by railroads. Our inland waterway traffic is so small that I do not think it has ever attracted the attention of the railroads.

Mr. HELM. Have any of these boats formerly plying on these rivers been owned by the railroads?

Mr. FREAR. I have no data on that, but I have heard it so stated.

Mr. BORLAND. The car shortage has brought about a situation where the railroads are refusing to exchange cars for river traffic, except the Baltimore & Ohio east of St. Louis. It does not parallel the Missouri River, but all the railroads that parallel the Missouri River are refusing to use their empties.

Mr. FREAR. I append a brief statement of projects contained in the bill that are not for war purposes, so far as can be ascertained, and I thank the House for its attention:

[See Doc. 140, 65th Cong., 1st sess.]

New projects in river and harbor bill not requested for preparedness and calling for over $50,000 each.

Lake Champlain Canal	$300,000
Schuylkill River	300,000
Lewes Pier	68,000
Chesapeake & Delaware Canal	Unlimited.
Baltimore Harbor, Md	250,000
Norfolk, Va	900,000
Land, Norfolk & Beaufort	75,000
Congaree, S. C	100,000
Savannah, Ga	500,000
Hillsboro, Fla	300,000
Mobile Harbor	110,000
Mementeau Canal, La	230,000
Freeport Harbor, Tex	150,000
Transfer lock at Ouichita	398,000
Harbor Beach, Mich	100,000
Richmond, Cal	100,000
Grays Harbor, Wash	85,000
Lake Washington, Wash	200,000
Total	4,166,000

"Continuing improvements," sometimes coupled with "Maintenance," of $50,000 or over. Balances available, part of $32,000,000 fund. Not included in preparedness items so far as noted.

Waterway, Rehoboth Bay	$50,000
Norfolk & Beaufort Canal (see other list)	100,000
Charleston Harbor	70,000
Miami, Fla	160,000
Alabama and Coosa Rivers	50,000
Pascagoula Harbor	113,000
Gulfport	80,000
Passes of Mississippi	1,825,000
Mermenteau tributaries	50,000
Sabine Pass and Port Arthur Canal	300,000
Port Aransas	100,000
Cumberland	632,000
Tennessee	401,000
Ohio	5,000,000
Indiana Harbor	395,000
Mississippi River from Missouri River to Minneapolis	1,200,000
Mississippi River, Ohio to Missouri Rivers	350,000
Improvement Leech and Mississippi Rivers	50,000
Missouri (lower) River	1,000,000
San Diego	154,000
Los Angeles	50,000
Oakland	92,000
Humboldt	190,500
San Pablo Bay	330,000
Coos Bay	70,000
Cascades, etc	70,000
Willamette Falls	80,000
Columbia	310,000
Total	13,272,000

Approximately 400 smaller items, together with those in the preparedness program are not included in the foregoing, but are included in the bill under discussion.

EXTENSION OF REMARKS.

Mr. STEPHENS of Nebraska. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by printing a speech delivered by the Hon. David H. Mercer at Fullerton, Nebr., on Saturday, May 12, 1917.

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

RIVERS AND HARBORS.

Mr. HULBERT. Mr. Chairman and gentlemen of the committee, it shall be my purpose to detain the House only so long as its Members appear to be disposed to listen to me, but I shall speak upon a subject which should be both interesting and instructive to every patriotic American, if in my humble and feeble way I am able to appeal to your more intelligent sensibilities.

I want to refer specifically in the time which has been allotted to me to New York Harbor, which harbor I propose to show to you has not received appropriations in the past commensurate with its importance from a commercial standpoint to the Nation, and yet I do not intend to urge the consideration at this time of any project in that harbor that is not intimately connected with the question of national defense.

New York Harbor consists of the upper bay, 4 miles long and 4 miles wide, connected with the lower bay by the Narrows, about a mile in width, which separates Brooklyn at Fort Hamilton from Staten Island at Fort Wadsworth. The lower bay is

a triangular expanse, extending 12 miles inland, and with one side about 6 miles long, open to the sea, from which it is separated by a broad bar, crossed by five channels, only two of which have been improved by the Federal Government. Main-Ship-Bayside-Gedney Channel originally had a depth of 23.7 feet across the outer bar at mean low water, with the same depth across the shoals between the bar and deep water in the harbor proper. It is interesting to note in this connection that these natural channels served the purposes of commerce without the need of Federal aid for nearly 100 years after the establishment of this Government.

In 1884 Congress authorized the initial improvement, extended in 1886, for a channel 1,000 feet wide and 30 feet deep from the Narrows to the sea, which was completed in 1891 at a cost of $1,518,024, and the expense of maintenance since has been a little more than half of that sum.

Now, mark you, after all those years, during which time the natural resources of New York Harbor were sufficient to accommodate its commercial needs, within eight years after the completion of the first channel which the Federal Government was called upon to improve the commerce of New York Harbor had grown to such an extent that it became necessary to construct larger ships, of greater draft, and hence the necessity of providing an even more commodious channel became apparent.

Ambrose Channel, now the main channel into New York Harbor, formerly known as the East Channel, which is the shorter of the two and the more direct, had a natural depth of 16 feet at mean low water. The river and harbor act of 1899 provided for the construction of a channel 2,000 feet wide and 40 feet deep at mean low water, which was completed in 1914 at a cost of $1,500,000 less than the estimate, or a saving equal to the amount which had been expended on the channel authorized in 1884. [Applause.]

The first needed improvement of New York Harbor to which I desire to address myself might properly be termed the Ambrose Channel extension, through the Narrows to the mouth of the Hudson River. Passing up the bay beyond West Bank Light we approach Swinburne and Hoffman Islands, just off Staten Island, and opposite Coney Island, with which you are all familiar.

Hoffman Island is mainly an artificial island of about 11½ acres, and part of the quarantine station now being taken over from the State of New York by the Federal Government, and is used as a receiving station for persons suspected of having contagious diseases, or who have been exposed thereto, before their entrance into the United States at that port; Swinburne Island has an area of about 2 acres, and is also a part of the quarantine station, used for the detention of actual sufferers from contagious diseases. Neither of these islands can be approached from the main channel, which is to the east, on account of the shoal water, and the depths in the channel to the north, used as the approach, are insufficient for vessels of the size adopted for quarantine work. A channel to accommodate vessels of 15 feet draft, or 16 feet at mean low water, and 200 feet width is necessary. The deepening of the channel between these islands and Staten Island to 16 feet is also included and urged most earnestly. It will be of great value, not only to the port of New York but to South Amboy, Perth Amboy, and the various towns of south New Jersey bordering on lower New York Bay. At least 500,000 tons of coal are transported per annum from the Amboys, through the Narrows, to New York and Long Island Sound ports, and with this channel dredged to a depth of 16 feet it would mean that the ordinary harbor coal barges now used between the Amboys and New York and which are brought through the Kills separating Staten Island and New Jersey in large flotillas, would be dispatched to New York through this shortened route, thereby relieving the congestion in the Kills, which at times has reached such a stage that great damage has resulted; in fact, there are a great many damage suits now pending in the Federal courts caused by the congested operations in the Kills.

Just north of Hoffman Island, adjoining the west line of the Ambrose Channel, approaching the Narrows, there is a barrier known as Craven Shoal, the minimum depth over which is 19.6 feet. Sailing vessels and tows of barges are prohibited by law from using the Ambrose Channel, but in order to avoid striking the buoys marking Craven Shoal these vessels are forced to turn into the channel at this point, and in so doing nullify the purpose of the law passed for their specific exclusion.

Proceeding through the Narrows into the upper bay the anchorage areas provided are to be noted, and I call your attention in connection with this phase of the improvement to this map on my right.

First is the "Quarantine Anchorage" and "Temporary Quarantine Anchorage," abreast of Rosebank, Staten Island; then "General Anchorage," abreast of Stapleton, Staten Island; next is "Man-of-War Anchorage," abreast of Tompkinsville, to the north of which is the deep water approach to the Kill von Kull; and beyond that another general anchorage extending northward to the channel of approach to the Pennsylvania Railroad Terminal (freight) at Greenville, and beyond this another general anchorage extends to Bedloes Island, within which area is located the anchorage for explosives for all New York Harbor, and wherein the now famous "Black Tom" explosion took place last summer.

Another general anchorage has been established opposite the Brooklyn shore, similar to the corresponding anchorages along the Staten Island and New Jersey shores, all of which have the sanction of the Federal Government, having been established by the Department of Commerce.

If you will follow me, as I indicate upon this chart, you will observe that the encroachments upon the main channel make the navigation of war vessels steaming to the navy yard and trans-Atlantic liners operated within the narrow confines too close for comfort.

Several of these anchorages, and especially that set apart for men-of-war, occupy the best part of the 40-foot channel, and leave along their easterly boundary a comparatively narrow strip of water to which deep-draft vessels are restricted when the anchorages are occupied full out to their easterly limits, so that between the Narrows and the mouth of the Hudson River we have the following varying widths with 40-foot depth:

At Tompkinsville, 450 feet; opposite Robbins Reef, 370 feet; 1½ miles farther north, 1,200 feet; abreast of Statue of Liberty, 1,750 feet.

To give a specific instance of the need of this proposed improvement, I might mention the experience with a ship anchored on the westerly side of the channel near Robbins Reef, which swung across the channel under a strong west wind at slack tide, her own length and the length of her chain being sufficient to bring her stern far across the easterly 40-foot contour, and other like experiences have been reported.

Moreover, since the larger steamers engaged in the trans-Atlantic service have been taken off during the war, necessitating a greater number of smaller steamers to carry the greatly increased commerce of the port of New York, the lack of proper docking facilities due to the failure of Congress to provide sufficient depth of water in the approaches, a greater number of vessels have been compelled to utilize the anchorage grounds and for longer periods. But this need was recognized as far back as 1908, when the matter was brought to the attention of the Secretary of War and by him referred to the Secretary of Commerce, but nothing appears to have come of that. On her first trip out of New York Harbor on June 1, 1910, the *Mauretania* took the bottom so as to interfere with her steering and choked her condenser tubes with mud, and out of a conference which followed there was evolved a plan to widen the channel to 2,000 feet and deepen it to 40 feet.

This bill carries an appropriation of $90,000 to continue the maintenance of the Ambrose Channel and adopting the new projects approved by the Chief of Engineers, United States Army, for the improvement of the channels between Staten Island and Hoffman and Swinburne Islands; the removal of Craven Shoal and the widening and deepening of the channel off the anchorage grounds, the total cost of which is estimated to be $1,120,000.

Continuing on up the Hudson River—where I had the privilege and the pleasure of escorting 11 members of the Committee on Rivers and Harbors as the guests of the Chamber of Commerce of the State of New York last August, upon which trip, by the way, I am sorry the gentleman from Wisconsin [Mr. FREAR] did not accompany us, although we pressed him hard to do so, as he would thereby have gained a more intimate knowledge than apparently he has of conditions in New York Harbor had he been with us on that occasion. I want to call your attention, as I called the attention of the committee upon that visit, especially to the conditions on the east side of the Hudson River between Thirty-second Street and Sixty-first Street.

The section which we deal with in this bill under the title of "Hudson River Channel" extends from a line connecting Ellis Island with the Battery, a distance of 16 miles to the northern limits of the city of New York, about 2½ miles above the mouth of the Harlem which flows in a southerly direction between the Boroughs of Manhattan and The Bronx, joining the East River at Hell Gate—about Ninety-first Street—and thus making Manhattan an island.

The width of the river within these limits varies from 2,725 to 5,400 feet. Originally the widths at various points were much greater, but they have been reduced as a result of water-front improvements and successive advances of the pierhead lines to permit the lengthening of piers in keeping pace with the continuing increase in the size of trans-Atlantic steamships.

The first improvement of the Hudson River at New York was not authorized until March 3, 1875, in which act of Congress there was a provision intending to provide for a channel 25 feet deep at mean low water at a cost of $101,000, of which there was expended $25,000, when the improvement was totally abandoned in 1877.

From that time until 1913 there were no further appropriations by the Federal Government upon the main channel of New York Harbor. But although the Federal Government had abandoned a 101 *thousand* dollar project to improve this great tributary of the most wonderful harbor of America within 25 years, the State of New York had authorized a 101 *million* dollar project for the improvement of the State Barge Canal, in order that New York City might maintain her commercial supremacy, and completed that improvement at an additional expenditure of $60,000,000.

Meanwhile the States of New York and New Jersey, the city of New York, and the abutting municipalities upon the New Jersey side of the river, and private interests as well, expended $105,000,000 in making water-front improvements upon this channel before the Federal Government could be brought to a realization of the necessity of its cooperation. A channel having a mean low-water depth of 40 feet and over and a minimum width of 1,000 feet extends throughout the lower section of the channel, bordering upon which there are three extensive shoal areas, one on the New Jersey shore extending from Ellis Island to Castle Point, Hoboken, and the second on the same shore extending from Weehawken to above the northern limits of the city of New York, and the third on the New York shore from West Nineteenth Street to Thirty-second Street. All of those shoals are now under improvement, in pursuance of the act of March 4, 1913, at a total cost of $1,570,000, of which $1,025,000 has already been appropriated, and the further sum of $210,500 is carried in this bill.

Now, let me call your attention to the commerce of this channel upon which the Federal Government in all its existence has not yet expended $1,500,000.

Gentlemen have talked here about rivers on which $6,000,000 has been expended, and other rivers on which $12,000,000 has been expended, and one upon which over $150,000,000 has been expended, and they have spoken of the lack of return that the Government received on its investment. On this river the Government to-day has not expended more than $1,500,000. Let me give you some figures in regard to the commerce of that river:

In 1913 it was 64,517,302 short tons, having a value of $2,958,075,917. In 1914 it had increased to a value of $4,559,185,809. In 1915 it had increased to a value of $6,410,144,119, and I am reliably informed that in 1916 it exceeded $7,000,000,000. Or, in other words, the commerce on that stream exceeds in value the amount of the enormous bond issue authorized by this Congress in order to carry on the war in Europe. [Applause.]

Now, between West Forty-fourth and Fifty-sixth Streets, on the New York side of the river, the city of New York has undertaken the construction of one pier 1,000 feet long, and proposes to construct two additional long piers at this site practically in continuation of the work now in progress. In order that these piers may be available upon completion for the use of the large trans-Atlantic steamers it is necessary that the shoal along this water front from Thirty-second Street to Sixty-first Street should be removed to a depth of 40 feet at mean low water.

Between the Battery and Canal Street the channel is too narrow for safe navigation by trans-Atlantic vessels, especially in view of the enormous traffic in that section by vessels traveling in all directions, of which I have a splendid view from my office window in New York City, and can therefore understand and appreciate those conditions of congestion. The Army engineers have made a survey, pursuant to the provision which I had inserted in the river and harbor bill which became a law in July of last year, and recommend improvement at an estimated cost of $1,320,000, to inaugurate which an appropriation of $620,000 is carried in this bill.

Let me say that the importance of this appropriation is twofold. First of all, from the Battery north to Canal Street there is a shoal in the center of the river which divides the channel and leaves the channel with the least depth on the west entirely too contracted to accommodate any of the large commercial ships, or any of the warships which when in New York Harbor anchor in the upper Hudson. The result is that all vessels of that character are compelled to go north and south through the same channel, and it is with great difficulty that navigation at that point is safely carried on and collisions avoided. Moreover, the piers to which I have referred, which will be located from Forty-fourth Street to Fifty-sixth Street, will be the piers from which substantial shipments of the supplies that you are going to send to the other side for the use of our troops will be made, and it is essential to get this work started in order that we will be able to accommodate these vessels at that point and to ship to the other side the supplies which will be needed for their maintenance and support.

Mr. MADDEN. Will the gentleman yield?

Mr. HULBERT. I will yield for a question.

Mr. MADDEN. How long does the gentleman think it will take to complete that work so that ships can come alongside the dock that he refers to?

Mr. HULBERT. It will take three years to complete the entire work, but it is intended by the department to begin immediately at the point where the first pier is completed, and it will not take long to dredge out that approach. Probably it will not take any longer to get that entrance to the pier completed than it will to get the Army over on the other side.

Mr. MADDEN. Then, it is the gentleman's idea that the war will last at least three years, and that it will be that long before they can begin to utilize the dock facilities that he speaks of?

Mr. HULBERT. Not at all. I do not know how long the war is going to last, but when it began I thought it was going to last three years, and it has lasted that long, although some people thought it would be ended in six months, but the improvement will be available as the work progresses.

Continuing up the Hudson we approach the Harlem River, which may not be well known to many of you, but its commercial importance will be readily appreciated when you are apprised of the fact that according to the last annual report of the engineers the Harlem River bore a commerce—and I hope gentlemen will follow these figures, because the Harlem River is less thought of and less talked about than the Hudson and the East River—the Harlem River in 1915 bore a commerce of 15,000,000 tons, having a value of $1,538,506,583. In other words, it was equal in tonnage and four times the value of the entire foreign and domestic commerce of the port of Baltimore, and nearly seven times the tonnage and four times the value of the foreign and domestic commerce of the port of Savannah, Ga.

Mr. MILLER of Minnesota. Will the gentleman yield for an inquiry?

Mr. HULBERT. Yes.

Mr. MILLER of Minnesota. Will the gentleman inform the committee what is the gross tonnage, foreign and domestic, of the whole of New York Harbor?

Mr. HULBERT. I can not give it for the whole harbor without taking time to add it up. The tonnage on the East River is 73,000,000 tons, having a value of more than $4,000,000,000. The tonnage on the Hudson River is 69,000,000 tons, having a value of nearly $7,000,000,000. The tonnage on the Harlem is 15,000,000 tons, having a value of $1,500,000,000. So that the total tonnage upon these three streams—and, by the way, that does not take in all of New York Harbor, because, of course, the gentleman knows that New York Harbor has a water frontage of 771 miles—but I think I am safe in saying that the value of the total tonnage of New York Harbor is twice as great as our $7,000,000,000 bond authorization to carry on the war in Europe. [Applause.]

Mr. MILLER of Minnesota. Is it possible that in all these tonnages the gentleman has just given—for instance, East River and the Harlem River—some of the tonnage is duplicated?

Mr. HULBERT. Oh, yes; it is quite likely that there are duplications, but the river is there in each case to carry the commerce.

Mr. STAFFORD. Can the gentleman inform the committee whether any of the tonnage he refers to, so far as the Harlem River is concerned, consists of ferriage on railroad scows?

Mr. HULBERT. Yes; to a considerable extent on the Harlem River. But I may say to the gentleman that I do not think the commerce on the Harlem River now is one-half what it is going to be when the State barge canal is opened up, because you have two barge canal terminals in Brooklyn, three in Long Island, and two in The Bronx. The conditions in the Hudson River below Spuyten Duyvil are very congested, and, in my judgment, a large percentage of the commerce that will be brought down from the Great Lakes through the Erie Canal and the Hudson River will have to find a natural outlet through the Harlem River, and instead of being 15,000,000 tons it will be 50,000,000 tons a year. Now, the question which agitates my mind is how you expect to be able, after New York has expended over

$160,000,000 to bring commerce from the Great Lakes down to the foremost American seaport, deflecting its shipment from Montreal, how you are going to be able to take care of that enormous commerce in the Harlem River, which you are developing to-day under a project began in 1878?

Mr. DUPRÉ. Will the gentleman yield?

Mr. HULBERT. Yes.

Mr. DUPRÉ. When will the barge canal be completed and ready?

Mr. HULBERT. I can not state. Gen. Wotherspoon made the statement last fall that he expected it would be in full operation this year. It is operating now more than half of its entire course, and the chief difficulty in putting it in complete and full operation is the failure of this House to adopt the project which has been before it for the last four years.

Mr. DUPRÉ. You mean the Narrow of Lake Champlain?

Mr. HULBERT. Yes. That improvement, which is finally provided for in this bill, will facilitate the movement of barges to and from the canal to Lake Champlain, and the Port Henry improvement provided for in this bill will make accessible for shipment by water the output of the iron ore from the mines at that point, of which there are now shipped more than a million tons annually.

Mr. PARKER of New Jersey. Will the gentleman yield?

Mr. HULBERT. Yes.

Mr. PARKER of New Jersey. I can not understand about the commerce of the Harlem River. Is it not mainly car floats?

Mr. HULBERT. Car floats and barges. But does the gentleman know that the Johnson Iron Works are located on the Harlem River and that it is one of the largest shippers of war materials in New York?

Mr. PARKER of New Jersey. Shipped by deep-sea-going vessels?

Mr. HULBERT. No; not on 12 feet of water. It is done by barges drawn by towboats.

I wish to put in the RECORD a detailed statement of commercial statistics affecting the Harlem River for 1915:

Vessels employed in trade in 1915.

Class.	Number of vessels.		Total number.		Tonnage of vessels.		Draft (feet).		Passengers carried.
	American.	Foreign.	Arrivals.	Departures.	Least.	Greatest.	Least.	Greatest.	
Registered:									
Steamers	39	.....	11,053	11,053	33	3,000	5	17	454,199

Yet this great waterway is now being improved under a project adopted June 18, 1878. It was modified in 1879, again in 1886 and 1893, and enlarged by act of March 4, 1913, and as modified and enlarged provides for a continuous channel 400 feet wide and only 15 feet deep at mean low water from the East River to the Hudson, except at Washington bridge and through Dychmans Meadows, where the channel will be about 50 feet less in width. It also provides for straightening the channel at a point known as Johnson's Iron Works, where the present channel describes a U bend, but that matter is being held up until the State of New York acquires and transfers the necessary title to the Federal Government for the right of way.

But the existing project, with its modifications and enlargement, now about 61 per cent completed, and toward which no further appropriation is made in this bill, will at once be proven to be wholly inadequate to meet the commercial necessities of the State Barge Canal when put into full operation, and I have therefore contented myself with an authorization in this bill of a survey to determine the immediate and future need of improvement to relieve especially the great congestion which will result because of the need to use this stream to accommodate the commerce of two barge-canal terminals in Brooklyn, three in Queens, and two in The Bronx.

In this connection it is to be noted that all vessels passing from the Harlem River to those terminals and return are now compelled to pass through Hell Gate, whose perils can be avoided, the congestion relieved, and the distance shortened

by the improvement of the Harlem or Bronx Kills, separating the north end of Randalls Island from the mainland.

Col. Mansfield on July 28, 1902—15 years ago—submitted his report upon a preliminary examination of the Harlem Kills, and recommended a 300-foot channel, 18 feet deep, at a cost of $1,900,000, or a 20-foot channel, at a cost of $2,514,600, which was approved by the Board of Engineers and the Chief of Engineers, and submitted to Congress by Secretary Root on December 14, 1903, but no action was ever taken in the matter. And that was before the construction of the State Barge Canal was begun by the State of New York, although the necessity for the improvement seems to have been predicated upon the theory that it had been authorized, and the people of the State of New York have made good.

In this bill we are not asking for anything by way of an appropriation for the Harlem River or The Bronx Kills, but in the bill which became a law on July 27, 1916, there was carried a provision for the resurvey of the latter, and in this bill we are asking that the Harlem River be resurveyed so that the conditions of 1878 may be brought down to 1917, and when this House convenes in December of this year we will be in a position to present a plan to give to the people of the State of New York and the city of New York an improvement of that river which will be commensurate with the amount they have expended in putting through the State Barge Canal system, a waterway which has a total length of 550 miles.

And now, last, but the most important of all, we come to the consideration of the improvement of the East River and Hell Gate.

The original project for the improvement of this strait, which is 16 miles long, connecting the upper bay at the Battery with Long Island Sound at Throggs Neck, contemplated a through channel with a minimum depth of 26 feet.

It was adopted in 1868, within three years after the close of the Civil War, and in the foremost harbor of America you have been carrying on an improvement to give that harbor up-to-date commercial conveniences under a project that is nearly 50 years old! In 1888, 20 years after the project was adopted, the maximum draft of freight carriers that would ordinarily use the channel exceeded the proposed depth of the channel itself; and now most of the vessels engaged in the coastwise commerce have a draft of from 26 to 30 feet, and they can not safely navigate the river except at high tide, and it would be dangerous to attempt to take those vessels through Hell Gate at high tide, and the masters of those ships do not undertake to do so. The neglect of this great waterway, continued appropriation for which under the old project was abandoned in 1912 "as economically inadvisable," and no further expenditure has been made for the improvement of the East River for the past five years, except the Government's proportion of the cost of the deepening of the channel at Coenties Reef, which is only $73,678.04, as against $123,221.96 contributed by the city of New York.

In 1913 the further improvement of the East River and Hell Gate to secure a through 35-foot channel was recommended by Gen. Black, and the provision for its adoption was inserted in two rivers and harbors bills which passed the House but failed in the Senate, and the failure to adopt that project has a greater significance at this time from the standpoint of preparedness and national defense. Of course the fact that the freight tonnage transported increased from 46,000,000 in 1914, having a value of a billion and a half, to 74,000,000 in 1915, having a value of over $4,000,000,000, may be of some consideration! And in addition to that there were transported upon that river in 1915 more than 25,000,000 people, substantially one-quarter of the population of the whole United States. While the Federal Government had up to April 30, 1913, expended only $5,344,741 upon the improvement of this river under a plan adopted in 1868, the city of New York and local interests had invested $40,000,000, and they are ready to expend double that sum just as soon as Congress has determined to adopt and carry out the recommended policy of the War Department for the further improvement of that river.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. HULBERT. Yes.

Mr. MADDEN. The expenditures made by the local interests, of course, were made on their docks on the abutting property, which they owned, facing the river.

Mr. HULBERT. Not altogether. A considerable amount of that money was spent in the dredging of the river itself when we were unable to get congressional action to authorize that work.

Mr. MADDEN. Does not the gentleman know in all cases where docks are owned by private individuals they are obliged to keep the channel dredged along the face of the dock to accommodate their own ships?

Mr. HULBERT. No. They are obliged to dredge in the slips between the pierhead line and the bulkhead line, and they can not dredge outside of the bulkhead line without express permission from the Secretary of War.

Mr. MADDEN. Does the gentleman know how much of the $40,000,000 was expended to improve private property and the amount expended by the city of New York as a public expenditure?

Mr. HULBERT. I can not give those figures.

Mr. MADDEN. It might be interesting to know which was which.

Mr HULBERT. Whatever amount was expended by private enterprise upon the construction of docks on that river was spent for the accommodation of the commerce and the benefit of the whole country.

This bill adopts the report submitted in House Document No. 188, Sixty-third Congress, first session, for a 35-foot channel with suitable approaches to piers at an estimated cost of $13,400,000 and an initial appropriation of $1,250,000. But, already appreciating the fact that this project recommended in 1913 is now inadequate to the extent of providing a channel of sufficient depth from the upper bay to the navy yard, it provides "That a depth of 40 feet is authorized across Diamond Reef," which improvement will provide a channel all the way up to Hell Gate with a minimum depth of 40 feet, and with only 26 feet at Hell Gate, the channel continuing from thence to Long Island Sound will have a least depth of 40 feet. It is conceded that a depth of 40 feet at Hell Gate must be ultimately obtained.

Mr. Chairman, the master navy yard of the Nation is located on the East River, and the superdreadnaughts and the colliers, having a draft of from 31 to 33 feet, are thus able to reach the navy yard, and at high tide, only by way of Sandy Hook and the Narrows, which might be blockaded at any time, just as Hobson undertook to bottle up Santiago Harbor in 1898.

The East River has a practicable channel with a minimum depth of 40 feet now throughout its entire length except at two points, namely, at Diamond Reef, immediately off the Battery, just here where I am pointing on the map [indicating], and which is in direct line with the steering course to the navy yard, which now makes it necessary for any battleship coming in to steer a course which would describe substantially the letter S, the shoal that I speak of, known as the Diamond Reef, being at the place where I have drawn the pointer [indicating]. Here is Governors Island, and this is the Brooklyn shore. That is Buttermilk Channel, and this is the Battery, Manhattan, and that line you see is the steering line, which points over to the tower of the Hotel Margaret, in Brooklyn, by which vessels find a course into the Brooklyn Navy Yard; and in order to bring in a capital ship to the navy yard now it is necessary that they come in at the height of the tide, and they have to steer a course which is equivalent to the letter S in order to get up to that point without going on that reef. The injury to a vessel by striking that reef would result in greater damage than the cost of its removal.

Mr. MADDEN. Is it the plan to cut off that angle?

Mr. HULBERT. The plan is to deepen the channel at that point, where there is now at the outside of the reef 26 feet and inside the reef 19 feet. It is to cut it down to 40 feet outside and 35 feet inside.

Mr. MADDEN. Up above is what I am talking about, where that right angle comes at the point of the river—is it to cut right across there?

Mr. HULBERT. No; they can pass through there. Here is the navy yard [indicating]. The only thing needed to be done is to remove this reef [indicating Diamond Reef] so vessels coming across from Governors Island can go straight up the channel. Later on, in my judgment and in the judgment of officers of the Navy, and especially those who have navigated vessels out of this channel, it will be necessary to dredge out Buttermilk Channel, which affords a more direct route to the navy yard. The channel north of Governors Island is more important now, because it not only serves the convenience of the Navy, but takes care of the commerce that passes at that point.

Mr. PARKER of New Jersey. Will the gentleman yield for a question for information?

Mr. HULBERT. Yes.

Mr. PARKER of New Jersey. Is Diamond Reef of recent formation?

Mr. HULBERT. No; it is a rock formation.

Mr. PARKER of New Jersey. And if taken away it is likely to stay away?

Mr. HULBERT. Yes. I might add that the total cost of maintenance of the present East River Channel has been about $100.

Mr. PARKER of New Jersey. It is not very wide, is it?

Mr. HULBERT. I should say it is——

Mr. PARKER of New Jersey. I do not mean in length from New York. The width that has to be cut through.

Mr. HULBERT. I should say the channel is 1,000 feet wide and this reef obstructs about half of the channel.

Mr. PARKER of New Jersey. What is the depth of Buttermilk Channel at the present time?

Mr. HULBERT. About 30 feet.

Mr. PARKER of New Jersey. Is it easily deepened?

Mr. HULBERT. Yes; it has a mud surface probably covering a rocky bottom.

Mr. PARKER of New Jersey. The gentleman stated it was about 40 feet through the East River. Does the gentleman mean all the way through Hell Gate or up to Hell Gate?

Mr. HULBERT. I said 40 feet now through the East River, except at Diamond Reef and Hell Gate. I had not reached Hell Gate yet, but if the gentleman will have a little patience I shall take him there in a moment. [Laughter.]

Mr. TILSON. Mr. Chairman, before the gentleman gets to Hell Gate will he answer this question? To what extent has the building of this new railroad across Wards Island relieved commerce and the shipping in the channels of these rivers?

Mr. HULBERT. I do not know that the results as yet indicate what relief, if any, is going to be afforded.

Mr. TILSON. I understood it was the plan of this Hell Gate Bridge to bring over cars here to Long Island, and then at about the southern shore of Long Island to make a short ferriage across instead of having to use the East River.

Mr. HULBERT. That is probably the purpose the Pennsylvania Railroad Co. had, and in a moment I will show the gentleman where the commerce of the city of New York by the improvement of Hell Gate will far offset that by providing additional dock facilities which are most urgent at this time.

Mr. TILSON. It is too much crowded, the shipping front is much congested, and anything to relieve the congestion of East River will be a great thing.

Mr. GILLETT. If Buttermilk Channel is dredged, would the commerce going through there go straight up the East River——

Mr. HULBERT. All that used that channel would, of course.

Mr. GILLETT. I simply inferred from what the gentleman has just said that that would be naturally the straight course.

Mr. HULBERT. The Buttermilk Channel is the straight course for vessels intending to go to the navy yard. But it is narrower than the Battery Channel and will have to be dredged out.

Mr. PLATT. Which should be dredged out first, Buttermilk Channel or the East River?

Mr. HULBERT. I think the reef should be done first, now.

Mr. PLATT. Will the gentleman point out the relations of these rivers——

Mr. HULBERT. Let me say further, in answer to the gentleman, if we attempt to dredge Buttermilk Channel at this time I am afraid we will have to tie up the traffic passing through there now and send it over through Governors Island; but if we undertake to remove Diamond Reef it will not interfere with the commerce of Buttermilk Channel and will not interfere so much with the commerce between Governors Island and the Battery.

Mr. PARKER of New Jersey. Why could not Buttermilk Channel be dredged by pump dredges that do not interfere with commerce much?

Mr. HULBERT. I do not know whether it could or not. That involves the question of the disposal of the material taken out.

The gentleman has asked where Coenties Reef is. I will see if I can point it out here. It is right at this point [indicating]. There is a tunnel which has recently been constructed by the city of New York under the river at that point.

Mr. PARKER of New Jersey. Just above the Brooklyn Bridge?

Mr. HULBERT. No, below. And in that connection I wish to remark that when this matter of authorizing the deepening of the channel at that point was up in the House in 1914, I think it was, it was suggested then that it was necessary to make an exception in the passage of the resolution under consideration and authorize the deepening of the river at that particular point to 40 feet, but as the engineers at that time had only recommended the prosecution of the general depth through the river to 35 feet Congress authorized the city of New York to carry the depth the additional 5 feet—that is, to 40 feet—at the expense of the city of New York. It is pretty nearly finished. Now, we are coming along with a proposition to make a 40-foot channel the whole length of the East River.

As I have said, the removal of the Diamond Reef to a depth of 40 feet will give a channel of the least depth of 40 feet all the way from a point where the Hudson River enters into New York Bay, up the East River, past the navy yard, up the West Channel, past Blackwells Island, which is here, and continues here [indicating] until you get to Hell Gate, which begins at this point—about Ninety-first Street—and there is the Harlem River [indicating] flowing down from the Hudson River and emptying into the East River at Hell Gate.

Now, it will be observed that there is a projection on the Long Island shore into the East River at Hell Gate, known as Astoria, the existence of which is largely responsible for the current difficulties at that place. The depth of water approaching Hell Gate runs from 53 feet up to 68 feet, 83 feet, 111 feet, 119 feet, 122 feet, and then graduates down until it reaches 26 feet, which is the depth provided for in the project of 1868, and which is the depth that was secured at that point by Gen. Newton when he blasted out Hell Gate in 1885.

It is also to be noted that at this point in the river there is a bend. The battle cruisers under construction now, I believe, will have a length of 850 feet. Navigating officers of the Navy tell me they will be unable even with the 40-foot channel to negotiate that bend in the river unless the projection at Astoria and the point of Wards Island, known as Negro Point, are taken off. That would straighten out the river in that section. And from there north until you get to Throggs Neck, which is the entrance to Long Island Sound, we have varying depths from 60 feet to 160 feet. Now, we simply submit the proposition to you as a reasonable one that if the Government proposes to improve the channel off the Battery to a depth of 40 feet in order to provide a ready means of ingress to and egress from the navy yard for the capital ships of the Navy, with a waterway which is 40 feet in minimum depth for at least 15 of its 16 miles of length, we ought to at the same time authorize a provision in this bill for the deepening of the channel to 40 feet at Hell Gate, because by the deepening of the channel at that point you thereby provide a double entrance to and a double exit from the Brooklyn Navy Yard, so that the battleships can come in by way of Long Island Sound just as well as through Sandy Hook, so that, as the speaker has repeatedly pointed out, such an improvement would convert the East River into a marine trench equal to, if not greater than, the Kiel Canal in strategic importance.

Mr. PARKER of New Jersey. I want to ask how great a distance there is at Hell Gate where it is less than 35 feet deep? Can we take a battleship through now?

Mr. HULBERT. Oh, no.

Mr. PARKER of New Jersey. It goes down to 30 feet and near that?

Mr. HULBERT. It goes down to 26 feet.

Mr. PARKER of New Jersey. How long would it take to make that 35 feet deep?

Mr. HULBERT. Three years, I suppose.

Mr. PARKER of New Jersey. And how much would it cost?

Mr. HULBERT. It would cost about $2,500,000.

Mr. PARKER of New Jersey. And to get it 40 feet deep, how much would it cost? It ought to be that deep, you know.

Mr. HULBERT. To get it 40 feet deep, I suppose it would cost—the chairman gave the figures, and I think he said about $2,000,000 or $3,000,000 more. That, of course, is an estimate.

Mr. PARKER of New Jersey. And take more time?

Mr. HULBERT. Yes.

Mr. MADDEN. And it would cost much more to take out the material under water.

Mr. HULBERT. Of course. This is what I want to say: This House, in the last river and harbor bill which passed and became a law, provided for a 35-foot depth over Diamond Reef, and appropriated $200,000 for that purpose, and authorized a continuing contract for $500,000 more in order to prosecute that work.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from New York yield to his colleague?

Mr. HULBERT. I hope the gentleman will pardon me just a moment. Now, the engineers have not proceeded with that improvement, because in the meantime the Navy Department informed the War Department that they needed a depth of 40 feet instead of a depth of 35 feet at Diamond Reef, in order to get the capital ships of the Navy in and out of the Brooklyn Navy Yard. The War Department stated that the reason why they did not go on with the 35-foot authorization was because they could save a good deal of money if they could let a con-

tract for a 40-foot depth instead of a contract first for a 35-foot depth and then a second contract for 40 feet; in other words, to do it under one contract instead of under two. My contention is that if that is true in regard to the prosecution of the work at Diamond Reef, then it is much more true with regard to the prosecution of the work at Hell Gate, because the velocity of the current and the narrowness of the channel and the congestion of commerce at Hell Gate make the work there so much more difficult and will hamper to such an extent the commerce of New York Harbor that it is better to let the work out under one contract and get it over and done with as soon as possible.

Mr. LAGUARDIA. Now will the gentleman yield?

Mr. HULBERT. Yes.

Mr. LAGUARDIA. Is there any provision in this bill for the improvement of Hell Gate?

Mr. HULBERT. There is a provision in this bill for a 35-foot channel through Hell Gate; and upon the recommendation of the Secretary of the Navy and the recommendation of the Secretary of War the Committee on Rivers and Harbors has since this bill was reported unanimously authorized an amendment to this bill to include a 40-foot channel through Hell Gate.

Mr. MADDEN. I would like to ask the gentleman from New York if he knows whether all the property on both sides of this channel is owned by private persons?

Mr. HULBERT. It is not.

Mr. MADDEN. Whom is it owned by?

Mr. HULBERT. About 50 per cent of it is owned by the city of New York.

Mr. MADDEN. How much is owned by private individuals?

Mr. HULBERT. All this down here [indicating] is owned by the city of New York. I think one pier is now in process of being transferred to the city.

Mr. MADDEN. The gentleman does not furnish the answer to the question that I really propounded. What I would like to know is, What is the distance of the dock frontage when the improvement is made, or now, that is owned by private individuals?

Mr. HULBERT. Does the gentleman mean the dock frontage fronting upon the portion of the river to be improved?

Mr. MADDEN. Yes; or on any portion of the river.

Mr. HULBERT. The city of New York owns 67.8 per cent of the water frontage of the Borough of Manhattan on the Harlem, Hudson, and East Rivers, and 30 per cent of the total constructed water frontage in all of the five boroughs. Moreover, it is the policy of the department of docks and ferries to gradually acquire the private interests of the water front, with the result that private holdings are being reduced, and if the Federal Government will indicate to us what its policy will be in future I have no doubt the city of New York will take proper proceedings to acquire the water frontage privately owned as the occasion may require the necessity for its development.

Mr. MADDEN. The question arises, Of what advantage will it be, in respect to the increase in the price of the dockage owned by private individuals, to improve this channel as suggested?

Mr. HULBERT. Well, for a through channel it will not make any difference. But I am coming to a point where it will make a difference.

Mr. MADDEN. Are these people expected to make some contribution to the cost that is going to add materially to the value of their holdings?

Mr. HULBERT. I do not know of any improvements that we get through in New York that we do not contribute to the cost.

Mr. MADDEN. I am not talking about the city of New York. I am talking about individuals.

Mr. HULBERT. Individuals will not be called upon to contribute to the cost.

Mr. MADDEN. So that if an expenditure of money out of the Treasury of the United States is made, and it increases the value of property owned by private individuals three or four times what it is worth now, there will be no contribution on their part to the improvement?

Mr. HULBERT. This improvement is for a through channel at this point, and primarily it is intended for the purpose of making it possible for the ships of the Navy to get in and out, freely, of the Brooklyn Navy Yard.

Mr. MADDEN. Aside from that, that would hardly be a good reason for spending so much money as this. There is, I presume, or there is thought to be, a large amount of commercial business transacted on the river between the point to be improved and the docks at which this business lands, and which is owned by private individuals, where they are permitted to make any charge they think proper to any ship that may land.

Mr. HULBERT. The gentleman is mistaken.

The gentleman does not mean to convey the impression that these docks are going to be benefited immediately by that particular improvement? You are providing now for a 40-foot channel through the East River, and there is not a deep-draft vessel that will go through that channel which can get up to those docks.

Mr. MADDEN. I understood the gentleman to say in the course of his remarks that this would add materially to the tonnage that would go through this channel; that some time since—I do not know how many years ago—the total tonnage was valued at $1,500,000,000.

Mr. HULBERT. In 1914.

Mr. MADDEN. And that now the tonnage is valued at $4,000,000,000.

Mr. HULBERT. In 1915.

Mr. MADDEN. There must be some commercial transactions along there if the value of the tonnage amounts to that much money.

Mr. HULBERT. That is traffic of a national character, which benefits the gentleman's city and every other section of the country as much as it benefits mine.

Mr. MADDEN. Then this channel ought not to be credited with the tonnage that the gentleman talks about, because it is not unloaded on the channel.

Mr. HULBERT. The channel has to be there, or they would not be able to get this tonnage through.

Mr. MADDEN. They come through the North River with most of the tonnage that goes across the Atlantic Ocean.

Mr. HULBERT. The East River accommodates both trans-Atlantic and coastwise trade.

Mr. LONERGAN. Will the gentleman yield?

Mr. HULBERT. I yield to the gentleman.

Mr. LONERGAN. As a matter of fact, the improvement which the gentleman so ably advocates is looked upon by the authorities and the War and Navy Departments as a national necessity, is it not?

Mr. HULBERT. Yes, and by the press of the country, recognized as such all over the United States.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. HULBERT. How much time have I remaining, Mr. Chairman?

The CHAIRMAN. The gentleman has five minutes.

Mr. HULBERT. I will try to complete what I have to say.

It has been stated by a well-recognized naval authority that eight first-class warships of a foreign power could stand off Sandy Hook and maintain a successful blockade of New York Harbor under existing conditions, but that if the Hell Gate obstructions were removed, for less than the cost of a single battleship, thus giving our fleet access to Long Island Sound, which has been pronounced by competent authority to be the greatest naval rendezvous in the world, it would require eight times as many enemy vessels, or 64 warships, to maintain an effective blockade of New York Harbor.

Mr. LAGUARDIA. That is an answer to the gentleman from Illinois.

Mr. HULBERT. Therefore it is proposed by the insertion of seven words, "and through East River and Hell Gate," to authorize a channel with a minimum depth of 40 feet throughout the entire length of the river.

This has been presented to the President of the United States as Commander in Chief of its military and naval forces, and was referred to and is approved and recommended by the Secretaries of War and Navy as a war-emergency measure of the first magnitude. And I want to say, for the benefit of the gentlemen who have doubted his knowledge concerning these matters, that when I have talked with the President upon this subject, it has been like carrying coals to Newcastle to tell him anything about it, because he has shown the most complete familiarity with the situation.

The improvement of the East River and Hell Gate has a commercial significance that is scarcely understood except by those intimately acquainted with the situation.

Mr. MOORE of Pennsylvania. Does the gentleman intend——

Mr. HULBERT. I can not yield in the time remaining.

The county of The Bronx, which is one of the five boroughs constituting the city of New York, has its greatest water-frontage upon the East River and Long Island Sound. From a suburb 35 years ago with a population of less than 50,000, it has proven to be the fastest growing community in the greater city, and has now attained the dignity of a separate political subdivision, with a population of over 700,000, surpassed only by Manhattan, Brooklyn, Chicago, Philadelphia, Boston, and St.

Louis, and if the Borough of The Bronx were an independent city it would be the sixth in numerical standing in population.

It has an extensive and valuable yet undeveloped water frontage, for while that frontage has sufficient depth to afford ample docking facilities with but little dredging, at slight expense, to accommodate the largest ships, it is handicapped alone by the fact that they could not secure access through Hell Gate, and could only reach their piers by skirting the south shore of Long Island to Montauk Point, and thence up Long Island Sound, a distance from Sandy Hook of 253 miles. And should such a vessel, after having discharged a cargo, be required to proceed to any dock on the East River below Hell Gate, or on the Hudson River, a distance of not more than 15 miles in any event, it would be necessary for that vessel to retrace her course 253 miles to Sandy Hook and thence up New York Bay.

A failure to recognize and rectify these deplorable conditions has undoubtedly seriously retarded the growth of the community whose development has been even so phenomenal as that of The Bronx.

Gentlemen may not be acquainted with the fact that now there are stored up in these freight yards in New York City, both in The Bronx, on Long Island, and over on the Jersey side, a tremendous number of freight cars loaded with merchandise, which have been awaiting for weeks the opportunity to be moved to the piers and their contents discharged and loaded upon waiting vessels, but it has not been possible, because, through the lack of docking facilities in New York Harbor, incoming ships have been at anchor for from one week to two weeks off the Statue of Liberty awaiting pier space at which to load this waiting traffic.

Upon the case presented it is submitted that the Nation is entitled to have Congress appropriate all that has been asked for in this bill.

From the inauguration of Washington to that of Wilson the Federal Government has expended about $20,000,000 upon the improvement of New York Harbor, which is less than 3 per cent of the total amount expended upon all other rivers and harbors improvements during that period.

In 1915 the total customs receipts for the whole United States were $209,786,672.21, of which amount $148,536,425.81, or 71.23 per cent, was collected at the port of New York.

In 1915 our national exports were valued at $2,431,004,047, of which amount $1,785,101,131, or 74.33 per cent, was sent out through the port of New York.

Two-thirds of the water-borne commerce of the city of New York is accommodated upon 7½ per cent of the total water frontage of the Borough of Manhattan.

Nothing could make more apparent the absolute and most urgent need of Federal cooperation for the establishment of additional terminal facilities to relieve the greatly congested conditions which perhaps more than any other one thing is responsible for the car shortage, and therefore contributes to the high cost of transportation and the high cost of living, which is a burden upon your constituents as well as upon mine.

In 1915 the total internal-revenue receipts for the whole United States were $415,681,023.86, of which amount $76,271,908.24, or 18.3 per cent, was collected in the State of New York, where we have less than 10 per cent of the population of the United States.

In 1915 the total corporation income tax receipts for the whole United States were $39,144,531.71, of which amount $10,221,206.65, or 26.8 per cent, was collected in the State of New York.

In 1915 the total individual income tax receipts for the whole United States were $41,046,162.09, of which amount $17,417,537.60, or 42.43 per cent, was paid by less than 10 per cent of the total population of the United States and collected in the State of New York.

This Congress staggered not the Nation but the world when on April 14, 1917, it authorized a bond issue of $7,000,000,000 to carry on the war with the German Empire, but a commerce was carried on the Hudson River during the year 1916 equal to that amount, and the commerce carried upon the East River during the year 1916 was more than one-half of that amount, and the commerce carried upon the Harlem River during the same period was approximately one-third of that amount.

I shall not continue upon the course followed by my committee last August and take you through the Kill von Kull and Staten Island Sound, having a commerce of $542,432,503, which are ably looked after by my colleagues on the committee, the gentlemen from New Jersey, Mr. SCULLY and Mr. DRUKKER; nor across the bay to Coney Island Channel and Jamaica Bay, having a commerce of more than $5,000,000; nor through Bay Ridge and Red Hook Channels, having a commerce of $408,459,300, to the Bush Terminal; nor to Newton Creek, an arm of the East River, opposite Thirty-fourth Street, and having a commerce of $150,000,000; nor to Flushing Bay and any of the other tributaries of the East River, for none of which are we asking any appropriation in this bill. We have only presented those which are urgent, crying necessities.

Will you heed the appeal made for them and enable us, as the President has declared our supreme duty to be, to continue to build up our commerce through unabated activity, or will you strangle our hopes and throttle our necessities in the hour of our greatest trial, when the burden of furnishing men and money and all of the sinews of war is placed upon the people of the Empire State? [Applause.]

The CHAIRMAN. The time of the gentleman from New York has expired.

EXTENSION OF REMARKS.

Mr. FREAR. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. SMITH of Idaho. Mr. Chairman, I make the same request.

The CHAIRMAN. The gentleman from Idaho asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

RIVERS AND HARBORS.

Mr. EMERSON. Mr. Chairman, I am very much opposed to the passage of a river and harbor bill at this session of Congress.

In the first place, we are engaged in war and shall need every cent possible to pay the expenses of this war. We as a Nation should economize, and this Congress must economize in the expenditure of the people's money.

This bill can not be justified on the grounds of military necessity, because there is now over $30,000,000 available for the maintenance and improvement of certain projects.

If the Navy Department requested Congress to appropriate a certain sum, however much, to improve a certain harbor or river, claiming it was necessary, Congress would do so at once. If this bill is enacted at this session there is no probability that any of the work to be done could be completed in time to be of use in this war.

This extra session was called to enact national defense legislation, as I am informed. This bill can not be placed in that class.

There are other reasons why this bill should not be passed; take the Army officers who are used as engineers, they will be needed to officer the Army now being organized.

We should not call upon the people of this country to practice economy and not do it ourselves.

Other reasons exist why this bill should not be enacted; it is a very bad time to make contracts; labor is going to be taken away and used in the organization of the Army.

Boats will be used in transporting war materials, and soldiers, and will be otherwise used in the national defense. There are millions available now that can be diverted for such purposes as are necessary in this crisis.

Let this country devote its time exclusively to the proper management of this war, conserving the national resources, and protecting our rights upon the sea.

The trouble is we do not appreciate the serious situation that confronts this country.

At this time the central powers seem to be holding their own against France and Great Britain, and with Russia out of this war the United States faces a great responsibility and may not only have to finance the war but fight it.

We may be engaged in a struggle for our national existence. I hope peace may come soon but I fear we are going to have to spend billions of dollars and place millions of men under arms.

Anyway, we should prepare for the worst and begin to economize in the expenditure of public money, and one of the ways of doing it is to defeat this bill.

I shall stand by economy in all expenditures of public money, especially now we are engaged in war.

We must practice economy here if we expect the country to stand behind us. We are placing great burdens upon the people now in the form of taxation, we are conscripting men, we are taxing every thing almost that is in sight, so let us show our patriotism by practicing economy here in Congress.

The people of this country will demand it.

Mr. SMALL. Can we have one more speech to-night?

Mr. MADDEN. Well, it is Friday night and we all have a lot of office work to do before we go home, and I hope the gentleman will move to rise.

Mr. SMALL. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HARRISON of Mississippi, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 4285) making appropriations for work on rivers and harbors and had come to no resolution thereon.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 11. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1918, and for other purposes.

ENROLLED JOINT RESOLUTION PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following joint resolution:

H. J. Res. 94. Joint resolution authorizing the Board of Regents of the Smithsonian Institution to permit the Secretary of War to erect temporary buildings in the Smithsonian Grounds.

LEAVE OF ABSENCE.

Mr. STEVENSON, by unanimous consent, was given leave of absence indefinitely, on account of important business.

LEAVE TO EXTEND REMARKS.

Mr. HOLLAND. Mr. Speaker, on yesterday I asked leave to revise and extend my remarks in the RECORD on the emergency deficiency bill. I find no mention of it in the RECORD. I renew that request.

The SPEAKER. The gentleman from Virginia asks unanimous consent to revise and extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. SMALL. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 a. m. to-morrow. Is there objection?

Mr. MADDEN. I object.

ADJOURNMENT.

Mr. SMALL. Mr. Speaker, I move that the House do now adjourn.

The *motion* was agreed to; accordingly (at 5 o'clock and 15 minutes p. m.) the House adjourned until to-morrow, Saturday, June 9, 1917, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of channel to the Back Bay of Biloxi, Miss. (H. Doc. No. 176); to the Committee on Rivers and Harbors and ordered to be printed.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Les Cheneaux Channels, Mich. (H. Doc. No. 177); to the Committee on Rivers and Harbors and ordered to be printed.

MOTIONS TO DISCHARGE COMMITTEES.

Under clause 4 of Rule XXVII, motions to discharge committees were filed as follows:

By Mr. HULBERT: To discharge the Committee on Rivers and Harbors from the further consideration of the bill (H. R. 109) to appropriate $600,000 for the improvement of the North or Hudson River, N. Y., with a view to securing an increase in depth to 40 feet and suitable widths in the North or Hudson River Channel from deep water in the upper bay as far north as Spuyten Duyvil.

Also, to discharge the Committee on Rivers and Harbors from the further consideration of the bill (H. R. 2003) for the improvement of the East River, N. Y., including Hell Gate, Diamond Reef, and Buttermilk Channels, that will best provide adequate facilities for operations of the fleet for defense of New York Harbor.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SMITH of Idaho: A bill (H. R. 4910) to authorize the establishment of town sites on the Fort Hall Reservation, Idaho; to the Committee on Indian Affairs.

By Mr. THOMAS F. SMITH: A bill (H. R. 4911) to prevent the concealing, secreting, destroying, or negligently allowing to spoil food or foodstuffs in the United States during the time of war; to the Committee on Agriculture.

By Mr. CLARK of Florida: A bill (H. R. 4912) to authorize the construction of a building for the use of the Treasury Department; to the Committee on Public Buildings and Grounds.

By Mr. EVANS: A bill (H. R. 4913) to provide for stock-watering privileges on certain unallotted lands on the Flathead Indian Reservation, Mont.; to the Committee on the Public Lands.

By Mr. FERRIS: A bill (H. R. 4914) providing for the counting of service in the Army or Navy of the United States as equivalent to residence and cultivation upon homestead entries, and, in the event of the soldier's death in such service, providing for the issuance of patent for such land to his widow or minor children; to the Committee on the Public Lands.

By Mr. WALTON: A bill (H. R. 4915) for the relief of Grant County, Luna County, and the town of Silver City, N. Mex.; to the Committee on the Public Lands.

By Mr. EVANS: A bill (H. R. 4916) for the relief of the Indians on Fort Peck Reservation in Montana; to the Committee on Indian Affairs.

By Mr. CARY: Resolution (H. Res. 96) asking the President for certain information if not incompatible with the public interest; to the Committee on the Judiciary.

By Mr. KITCHIN: Resolution (H. Res. 97) authorizing the Clerk of the House to pay to Joseph S. McCoy the sum of $125 for services rendered the Ways and Means Committee; to the Committee on Accounts.

By Mr. SWEET: Resolution (H. Res. 98) relative to the aims, purposes, and policies in the conduct of the war between the United States and the Imperial Government of Germany; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. COOPER of Wisconsin: A bill (H. R. 4917) granting an increase of pension to John M. Brown; to the Committee on Invalid Pensions.

By Mr. DILL: A bill (H. R. 4918) granting an increase of pension to George Cole; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4919) granting a pension to Peter G. Hobbs; to the Committee on Invalid Pensions.

By Mr. FOSTER: A bill (H. R. 4920) granting an increase of pension to John Luke; to the Committee on Invalid Pensions.

By Mr. GANDY: A bill (H. R. 4921) granting an increase of pension to Daniel Maloy; to the Committee on Invalid Pensions.

By Mr. GILLETT: A bill (H. R. 4922) for the relief of the widow of Edward Kelly; to the Committee on Military Affairs.

By Mr. KEHOE: A bill (H. R. 4923) to relieve the estate of Thomas H. Hall, deceased, late postmaster at Panacea, Fla., and the bondsmen of said Thomas H. Hall, of the payment of money alleged to have been misappropriated by a clerk in said office; to the Committee on Claims.

By Mr. KRAUS: A bill (H. R. 4924) granting an increase of pension to Franklin J. Sparks; to the Committee on Invalid Pensions.

By Mr. LITTLEPAGE: A bill (H. R. 4925) granting an increase of pension to Andrew J. Jones; to the Committee on Invalid Pensions.

By Mr. MARTIN of Illinois: A bill (H. R. 4926) granting an increase of pension to George W. Bean; to the Committee on Pensions.

By Mr. NEELY: A bill (H. R. 4927) for the relief of Thomas W. Wade; to the Committee on Military Affairs.

Also, a bill (H. R. 4928) granting an increase of pension to Margaret R. Kinney; to the Committee on Invalid Pensions.

By Mr. POLK: A bill (H. R. 4929) granting an increase of pension to Thomas R. Henthorn; to the Committee on Invalid Pensions.

By Mr. RAMSEYER: A bill (H. R. 4930) granting a pension to Mary F. Church; to the Committee on Invalid Pensions.

By Mr. SANFORD: A bill (H. R. 4931) granting an increase of pension to Henry Garvey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4932) granting a pension to Rosella MaGee; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4933) granting a pension to Elizabeth Hogan; to the Committee on Pensions.

Also, a bill (H. R. 4934) granting a pension to William E. Martin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4935) for the relief of Tennis W. Wade; to the Committee on Military Affairs.

Also, a bill (H. R. 4936) for the relief of Anthony Schnell; to the Committee on Claims.

Also, a bill (H. R. 4937) for the relief of Henry C. Romaine; to the Committee on Military Affairs.

Also, a bill (H. R. 4938) for the relief of Charles H. Palmer; to the Committee on Military Affairs.

Also, a bill (H. R. 4939) for the relief of Martin W. Joralemon, alias Martin Whitbeck; to the Committee on Military Affairs.

Also, a bill (H. R. 4940) for the relief of John J. Dooley; to the Committee on Military Affairs.

Also, a bill (H. R. 4941) for the relief of Michael H. Feeley; to the Committee on Claims.

Also, a bill (H. R. 4942) for the relief of James Birney, alias James Brady; to the Committee on Military Affairs.

By Mr. STRONG: A bill (H. R. 4943) granting an increase of pension to Ananias Wonders; to the Committee on Invalid Pensions.

By Mr. YOUNG of North Dakota: A bill (H. R. 4944) for the relief of G. A. Lieber; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Declaration of Washington Chamber of Commerce, favoring whatever food control is essential to meet the exigencies created by the war; to the Committee on Agriculture.

Also (by request), declaration of the New York yearly meetings of the Religious Society of Friends, commending Congress for exempting from military service the members of the society; to the Committee on Military Affairs.

Also, petition of citizens of Atlanta, Tex., favoring prohibition as war measure; to the Committee on the Judiciary.

By Mr. BATHRICK: Petition of citizens of Kenmore, Ohio, favoring measures to prohibit food speculation; to the Committee on Agriculture.

Also, petitions of the Puritan Association, Congregational Churches of Ohio, citizens of Peninsula, sundry citizens of Ravenna, and citizens of Seville, all in the State of Ohio, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. COOPER of Wisconsin: Petition of students at the State Normal School, Milwaukee, Wis., asking that Congress do not increase rates of postage on second-class mail matter; to the Committee on Ways and Means.

Also, petition of residents of Milton Junction, Wis., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of students of the State Normal School, Milwaukee, Wis., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of residents of Racine, Wis., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of residents of Salem, Wis., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of C. P. Lurvey and other residents of Dousman, Wis., urging the enactment of legislation to prevent the converting of cereals and other food products into intoxicants during the war; to the Committee on the Judiciary.

By Mr. DALE of New York: Memorial of the Brooklyn Federation of Jewish Charities, asking exemption from Federal taxation of religious, educational, and philanthropic bequests; to the Committee on Ways and Means.

Also, petition of the Society of the Friends of Russian Freedom, indorsing Mr. GOODWIN's resolution of greeting to the people of Russia; to the Committee on Foreign Affairs.

Also, petition of Utica (N. Y.) Typographical Union, No. 62, opposed to the increase in postage rates on second-class matter; to the Committee on Ways and Means.

Also, petition of sundry citizens of New York, against any kind of prohibition; to the Committee on the Judiciary.

By Mr. DOWELL: Petition of citizens of Attica, Iowa, favoring prohibition as a war measure; to the Committee on Ways and Means.

By Mr. FOSTER: Petition of citizens of Noble, Ill., against manufacture of alcoholic liquors; to the Committee on the Judiciary.

Also, petition of citizens of Rose Hill, Ill., against the Hardwick amendment to Federal reserve act; to the Committee on Banking and Currency.

By Mr. FULLER of Illinois: Petition of 191 citizens of Durand, Ill., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of committee of New York citizens, relative to exempting from Federal taxation educational, religious, and philanthropic bequests; to the Committee on Ways and Means.

Also, petition of the National Retail Hardware Association, against Hardwick amendment to Federal reserve act; to the Committee on Banking and Currency.

Also, petition of Hon. Arthur Capper, governor of Kansas, against increase of second-class postage rates; to the Committee on Ways and Means.

By Mr. GALLIVAN: Petition of Jordan Marsh Co., Boston, Mass., relative to changes suggested for the war-revenue bill; to the Committee on Ways and Means.

By Mr. GANDY: Petition of numerous citizens of Drayer, S. Dak., favoring the prohibition of the liquor business as a war measure; to the Committee on the Judiciary.

By Mr. GOULD: Petitions of E. G. Soper, district superintendent of schools, Ontario County; Rev. Edward Jarvis, pastor Methodist Episcopal Church, Manchester; Wall Street Methodist Episcopal Church, Auburn; residents of Chapin; men of Williamson and ladies of Williamson Methodist Episcopal Church, Williamson; residents of Fleming, Cayuga County; residents of Waterloo; residents of Gorham and Stanley; Lakemont Christian Church, Lakemont; Seneca County Sunday School Association, Seneca Falls; residents of Red Creek; residents of Canandaigua; residents of Union Springs; residents of Allens Hill; residents of Potter; Richard Eccles Co., Auburn; various farmers of Ontario County; Scoon Bible Class, North Presbyterian Church, Geneva; Bowen Manufacturing Co., Auburn; Lyons Civic Club, Lyons; Board of Education, Newark; farmers of Moravia and vicinity, Moravia; Lakeview Grange No. 1261, Ovid; Keuka College Baptist Church, Keuka Park; residents of Naples; and Yates County Sunday School Association, Penn Yan, all in the State of New York, favoring national prohibition during the period of the war; to the Committee on the Judiciary.

Also, petitions of the Presbyterian Church, King Ferry; Eureka Grange, No. 46, Lyons; Second Presbyterian Church, Genoa; First Methodist Episcopal Church, Weedsport; Wolcott Baptist Church, Wolcott; Presbyterian Church, Lyons; Wesleyan Methodist Society, Canandaigua; Methodist Episcopal Church, Wolcott; the Reformed Church, Interlaken; residents of Bellona; Congregational Church, West Bloomfield; Methodist Episcopal Church, North Rose; Hallagan-Thompson Co., Newark, all in the State of New York, and the Anti-Saloon League of America, Washington, D. C., favoring national prohibition during the period of the war; to the Committee on the Judiciary.

Also, petitions of Methodist Church, Geneva; residents of Interlaken; farmers of Seneca County; president Hobart College, Geneva; Bethel Home, Keuka Park; Presbyterian Church, Sennett; residents of North Rose; residents of Savannah; Presbyterian Sunday School, Newark; First Baptist Church, Fleming; Woman's Home Missionary Society of Methodist Episcopal Church, representing 1,400 women of Wayne, Ontario, Seneca, and Yates Counties; Woman's Christian Temperance Union, Geneva; Manchester Grange, Manchester; Woman's Christian Temperance Union, Lyons; Lakemont Grange, No. 1089, Yates County; residents of Lakeside; Cayuga County Medical Society, Auburn; Baptist, Presbyterian, and Methodist Episcopal Churches of Waterloo; and residents of North Huron, Resort, all in the State of New York, favoring national prohibition during the period of the war; to the Committee on the Judiciary.

Also, petitions of Independent Brewing Co., Auburn; Patent Cereals Co., Geneva; and various residents of Ontario County and of Auburn, all in the State of New York, protesting against the enactment of national prohibition during the period of the war; to the Committee on the Judiciary.

By Mr. GRIFFIN: Petition of committee of New York citizens, asking exemption from Federal taxation of religious, educational, and philanthropic bequests; to the Committee on Ways and Means.

Also, petition of the Merchants' Association of New York, urging that Senate bill 2133, to amend an act entitled "An act to authorize the establishment of a bureau of war-risk insurance

in the Treasury Department," approved September 2, 1914, and for other purposes," be amended so as to provide for the enlargement of the advisory board of the Bureau of War-Risk Insurance by the addition of two members representing the shipping and export interests; to the Committee on the Merchant Marine and Fisheries.

Also, petition of Gov. Arthur Capper, of Kansas, protesting against the increase of rates of postage on second-class matter; to the Committee on Ways and Means.

Also, memorials of Technical Press Chapel, New York, signed by James J. Mummery, John R. Knowles, Frederick Edgar, and S. Messede, opposing an increase in rates on second-class mail matter; to the Committee on Ways and Means.

Also, petition of New York Social Hygiene Society, praying that the patents on salvarsan be declared void; to the Committee on Patents.

Also, petition of Heinighe & Smith, stained-glass makers, New York, favoring the passage of House bill 4630, to promote the marketing and distribution of foods; to the Committee on Agriculture.

By Mr. HADLEY: Petitions of citizens of Custer, Sumas, Stanwood, and Bellingham, Wash., and vicinity, favoring national prohibition; to the Committee on the Judiciary.

By Mr. HAYES: Petition of citizens of Campbell, Cal., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. HELM: Petition of Christian and Methodist Episcopal Churches of Berea, Ky., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. JOHNSON of Washington: Memorials of congregation of Le Sourd Methodist Episcopal Church, Tacoma, and citizens of Eatonville and Camas, Wash., favoring national prohibition; the the Committee on the Judiciary.

By Mr. KEATING: Petition of Woman's Christian Temperance Union, Cheraw, Colo., for national prohibition; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Petition of Harry J. Gordon, of Providence, R. I., favoring daylight-saving plan; to the Committee on Interstate and Foreign Commerce.

Also, petitions of citizens of Narragansett, R. I., favoring Federal suffrage amendment; to the Committee on the Judiciary.

Also, petition of Women's Universalist Missionary Association of Rhode Island, favoring prohibition during the period of war; to the Committee on the Judiciary.

By Mr. KIESS of Pennsylvania: Evidence in support of House bill 4363, for the relief of Mary Fessler; to the Committee on Invalid Pensions.

Also, memorial of citizens of Galeton, Pa., favoring woman suffrage; to the Committee on the Judiciary.

Also, petitions of Williamsport and Renova, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. LENROOT. Petition of sundry citizens of Minocqua and Winchester, Wis., favoring the prohibition of the liquor business as a war measure, and opposing war tax on same; to the Committee on the Judiciary.

Also, petition of First Baptist Church of Superior, Wis., favoring prohibition as a war measure; to the Committee on the judiciary.

By Mr. LUNDEEN: Petition of the Young People's Society of the Salem Swedish Mission Church, Minneapolis, Minn., Simon Johnson, secretary, in favor of national prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of the Christian Endeavor Society of the Grace Presbyterian Church, E. H. Adams, secretary, Minneapolis, Minn., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, letter of the Sheffield-King Milling Co., of Minneapolis, Minn., favoring food-control legislation as proposed in House bill 4630; to the Committee on Agriculture.

By Mr. MAPES: Petition of 76 citizens of Grand Haven, Mich., for the immediate enactment of prohibition of the manufacture of alcoholic liquors as a measure of food conservation and for the immediate prohibition of the sale of liquors for beverage purposes in order to conserve the health, wealth, labor, transport facilities, and military efficiency of the people; to the Committee on the Judiciary.

By Mr. MORIN: Petition of Philadelphia Branch Woman's Foreign Missionary Society of Methodist Episcopal Church, Miss Emma A. Fowler, of Pittsburgh, Pa., associate secretary, urging the passage of a law to prohibit the manufacture and sale of alcoholic liquors during the war; to the Committee on the Judiciary.

By Mr. MOTT: Petitions of sundry church organizations of New York, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. NOLAN: Petition of Insurance Federation of California, Insurance Brokers' Exchange of San Francisco, and California State Association of Local Insurance Agents, of San Francisco, Cal., protesting against the proposed tax on insurance brokers, agents, partnerships, or corporations; to the Committee on Ways and Means.

By Mr. RAMSEYER: Petition of citizens of Deep River, Iowa, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. ROGERS: Petition of the Sunday School of the Orthodox Congregational Church of Littleton Common, Mass., favoring national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. ROWE: Memorial of Park Spope Young People's Society of Christian Endeavor of Brooklyn, N. Y., favoring national prohibition; to the Committee on the Judiciary.

Also, memorial of Neighborhood Workers' Association of New York, favoring passage of the food-control bill; to the Committee on Agriculture.

Also, petition of members of St. Savior's Church of Brooklyn, N. Y., relative to independence for Ireland; to the Committee on Foreign Affairs.

Also, petition of George E. Lovett, of New York, favoring passage of House resolution 73, relative to treatment of our shipping and mails by England; to the Committee on Foreign Affairs.

Also, petition of Harry A. Mayers, of Brooklyn, N. Y., against increase in second-class postage; to the Committee on Ways and Means.

Also, petition of Hirsh & Schofield, of New York, against any kind of prohibition; to the Committee on the Judiciary.

By Mr. SANDERS of New York: Petitions of Methodist Episcopal Church and congregation of Lyndonville, members of the First Presbyterian Church of Medina, and sundry citizens of Gainesville, all in the State of New York, favoring national prohibition; to the Committee on the Judiciary.

By Mr. SANFORD: Petitions of sundry residents of Cohoes, N. Y., for enactment of law prohibiting manufacture of alcoholic liquors as a measure of food conservation; to the Committee on the Judiciary.

Also, petition of Methodist Episcopal Church of Green Island, N. Y., favoring the prohibition of liquor business as a war measure; to the Committee on the Judiciary.

Also, petition of Methodist Episcopal Church of Slingerlands, N. Y., favoring the prohibition of liquor business as a war measure; to the Committee on the Judiciary.

By Mr. SHOUSE: Petitions of citizens of Bushton, Chase, Belpre, and Castleton, Kans., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. SYNDER: Petitions of Baracca Class of the Liberty Street Methodist Episcopal Church of Rome and sundry citizens of Vernon, N. Y., favoring national prohibition; to the Committee on the Judiciary.

By Mr. SNOOK: Petition of C. F. and Mary Blair, Liberty Center, N. Y., favoring national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. STEENERSON: Memorial of Marion E. Schaller, chairman committee on legislation et al., and St. Paul (Minn.) Chapter, Navy League of the United States, commending Senators and Representatives in Congress from Minnesota who have supported legislation tending to render our Navy more powerful and efficient in our present emergency, etc.; to the Committee on Naval Affairs.

By Mr. TAYLOR of Colorado: Petition of citizens of Mesa County, Colo., urging the enactment of a law prohibiting the manufacture and sale of liquors as a war measure; to the Committee on the Judiciary.

By Mr. TILSON: Petition of people of New Haven and vicinity, favoring measure to prevent speculation in food products; to the Committee on Agriculture.

Also, petition of First Italian Baptist Church of New Haven, Conn., urging prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of German Baptist Church of Meriden, Conn., urging prohibition as a war measure; to the Committee on the Judiciary.

By Mr. TIMBERLAKE: Petition of First Methodist Episcopal Church of Atwood, Colo., urging prohibition as a war measure; to the Committee on the Judiciary.

Also, memorial of National Woman's Party of Colorado and 60 others, favoring woman suffrage amendment; to the Committee on the Judiciary.

Also, memorial of Woman's Christian Temperance Union of Otis, Colo., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. TINKHAM: Petition of citizens of Forest Hills, Mass., and vicinity, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of the State of Massachusetts, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. VESTAL: Petitions of citizens of Adams County, citizens of Monroe, and sundry other citizens of Indiana, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. WARD: Petition signed by Mrs. Helen A. Palmer, president, and Carrie E. Johnston, secretary, representing 50 members of the Woman's Christian Temperance Union of Plattekill, N. Y., urging conservation of food products used in making intoxicating beverages, and passage of all war prohibition measures; to the Committee on the Judiciary.

SENATE.

SATURDAY, *June 9, 1917.*

(Legislative day of Friday, June 8, 1917.)

The Senate reassembled at 12 o'clock m., on the expiration of the recess.

USE OF RIFLES.

Mr. CHAMBERLAIN. Mr. President, there is a Senate bill on the desk, with certain amendments of the House, which I desire to have laid before the Senate.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 995) to authorize the issue to States and Territories and the District of Columbia of rifles and other property for the equipment of organizations of home guards, which were, on page 1, line 3, after "war," to insert "during this existing emergency"; on page 1, line 5, after "Territories," to insert "and the District of Columbia"; on page 1, line 8, after "Columbia," to insert "and such other home guards as may be organized under the direction of the governors of the several States and Territories and the Commissioners of the District of Columbia or other State troops or militia"; and, on page 2, line 7, after "purposes," to insert "*Provided*, That all home guards, State troops and militia receiving arms and equipments as herein provided shall have the use, in the discretion of the Secretary of War and under such regulations as he may prescribe, of rifle ranges owned or controlled by the United States of America."

Mr. CHAMBERLAIN. I move that the Senate concur in the amendments of the House.

Mr. NEWLANDS. Is this a conference report?

Mr. CHAMBERLAIN. No; it is the action of the House of Representatives on a bill which has passed the Senate, authorizing the Secretary of War, in his discretion and under regulations which may be prescribed by him, to furnish certain home guards equipments on occasion. The House has made a few immaterial amendments to the bill. The bill was originally introduced by the Senator from Massachusetts [Mr. LODGE]. I think the amendments are immaterial, and I should like to have them concurred in.

Mr. SMOOT. Mr. President, as to all of the amendments, except the last one, which was stated, we could follow them, knowing generally the contents of the bill; but I should like to have the Secretary read the last paragraph of the bill containing the last proposed amendment which was adopted by the House, so that we may see precisely what effect it has.

Mr. NEWLANDS. Mr. President, I must object to the consideration of this measure if it is to take any time in discussion.

Mr. SMOOT. I will say to the Senator from Nevada that I do not think it will take any time. All I want to know is what effect the last amendment which was made by the House to the Senate bill has upon the part of the bill to which it refers.

Mr. NEWLANDS. If the matter takes time for discussion, I reserve the right to object.

Mr. CHAMBERLAIN. I shall not ask that it be considered if there is any discussion of the matter at all.

The VICE PRESIDENT. It could have been disposed of by this time had there been no objection. The Secretary will read as requested.

The Secretary read as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized, in his discretion, to issue from time to time to the several States and Territories for the equipment of such home guards having the character of State police or constabulary as may be organized by the several States and Territories and District of Columbia, such rifles and ammunition therefor, cartridge belts, haversacks, canteens, in limited amounts as available supplies will permit, provided that the property so issued shall remain the property of the United States and shall be receipted for by the governors of the several States and Territories and Commissioners of the District of Columbia and accounted for by them under such regulations and upon furnishing such bonds or security as the Secretary of War may prescribe, and that any property so issued shall be returned to the United States on demand when no longer needed for the purposes for which issued, or if, in the judgment of the Secretary of War, an exigency requires the use of the property for Federal purposes: *Provided*, That all home guards, State troops, and militia receiving arms and equipments as herein provided shall have the use, in the discretion of the Secretary of War and under such regulations as he may prescribe, of rifle ranges owned or controlled by the United States of America.

Mr. SMOOT. That is satisfactory, Mr. President.

The VICE PRESIDENT. The question is on concurring in the amendments of the House of Representatives.

The amendments were concurred in.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT. The Chair lays before the Senate a concurrent resolution of the Legislature of the Territory of Hawaii, which will be incorporated in the RECORD and referred to the Committee on Appropriations.

The concurrent resolution is as follows:

SECRETARY OF HAWAII,
EXECUTIVE BUILDING,
Honolulu, May 23, 1917.

The honorable PRESIDENT OF THE SENATE,
Washington, D. C.

SIR: I have the honor to transmit herewith certified copy of house concurrent resolution No. 30, which was adopted by the Legislature of the Territory of Hawaii, regular session of 1917.

Yours, very truly,

C. P. IAUKEA,
Secretary of Hawaii.

Concurrent resolution.

Whereas the increased cost of living not only warrants but in some cases practically requires an increase in the compensation of many of the officers and employees of the Territory of Hawaii, the need for which has been recognized by the legislature of the Territory for the year 1917 with regard to many of the officers and employees drawing their compensation from the Territorial funds; and

Whereas certain of the officers of the Territory receive their compensation from the Federal Government, and their salaries can only be fixed by the Congress of the United States, no adjustment of whose salaries has been made since the year 1910, by the act approved May 27, 1910: Therefore be it

Resolved by the House of Representatives of the Legislature of the Territory of Hawaii (the Senate concurring), That the Congress of the United States be, and it is hereby, respectfully requested by appropriate legislation to increase the compensation of the governor, the secretary of the Territory, the chief justice and associate justices of the supreme court of the Territory, the judges of the circuit courts, and the secretary to the governor; and be it further

Resolved, That copies of this resolution be transmitted by the secretary of the Territory to the President of the Senate and to the Speaker of the House of Representatives of the Congress of the United States, and to the Delegate to the Congress from Hawaii.

—

THE HOUSE OF REPRESENTATIVES
OF THE TERRITORY OF HAWAII,
Honolulu, Hawaii, May 2, 1917.

We hereby certify that the foregoing resolution was finally adopted in the House of Representatives of the Territory of Hawaii on May 2, A. D. 1917.

H. L. HOLSTEIN,
Speaker House of Representatives.
EDWARD WOODWARD,
Clerk House of Representatives.

—

THE SENATE OF THE TERRITORY OF HAWAII,
Honolulu, Hawaii, May 2, 1917.

We hereby certify that the foregoing resolution was finally adopted in the Senate of the Territory of Hawaii on May 2, A. D. 1917.

CHAS. T. CHILLINGWORTH,
President of the Senate.
O. P. SOARES,
Clerk of the Senate.

The VICE PRESIDENT. The Chair presents a concurrent resolution of the Legislature of the Territory of Hawaii, which will be incorporated in the RECORD and referred to the Committee on Pacific Islands and Porto Rico.

The concurrent resolution is as follows:

THE NINTH LEGISLATURE OF THE TERRITORY OF HAWAII,
HOUSE OF REPRESENTATIVES,
Honolulu, Hawaii, May 2, 1917.

The honorable PRESIDENT OF THE SENATE,
Washington, D. C.

SIR: I have the honor to forward you herewith certified copy of house concurrent resolution 13, which was adopted by the Legislature of the Territory of Hawaii.

Very respectfully,

EDWARD WOODWARD,
Clerk House of Representatives.

Concurrent resolution.

Whereas large areas of land, both public and private, adapted to the growth of rice and other products, are now lying idle and unimproved, owing to the shortage of labor adaptable to the cultivation of such idle lands; and

Whereas the improvement and cultivation of such lands would add largely to the food product of the Territory, and likewise to the taxable valuation of the lands of the Territory; and

Whereas the lands thus remaining idle and unimproved would become cultivated and productive in the event a limited number of Chinese laborers were admitted into the Territory of Hawaii for the purpose of doing agricultural labor; and

Whereas conditions in the Territory of Hawaii are so different from those on the mainland that objections urged on the mainland to the admission of Chinese laborers do not apply within the Territory of Hawaii; and

Whereas the admission of a limited number of Chinese laborers into the Territory of Hawaii would not bring such laborers in contact with skilled labor either here or on the mainland: Now, therefore, be it

Resolved by the House of Representatives of the Territory of Hawaii, regular session of 1917 (the Senate concurring), That the Congress of the United States, provided it does not interfere with existing treaties or agreements with foreign countries, is hereby requested and respectfully petitioned to pass legislation by which a limited number of Chinese laborers may be admitted into the Territory of Hawaii, with proper restriction preventing such laborers from proceeding to the mainland of the United States; and be it further

Resolved, That a copy of this resolution be forwarded to the President of the United States, the President of the Senate of the United States, the Speaker of the House of Representatives of the United States, and the Delegate to Congress from Hawaii.

THE HOUSE OF REPRESENTATIVES
OF THE TERRITORY OF HAWAII,
Honolulu, Hawaii, May 2, 1917.

We hereby certify that the foregoing resolution was finally adopted in the House of Representatives of the Territory of Hawaii on May 2, A. D. 1917.

H. L. HOLSTEIN,
Speaker House of Representatives.
EDWARD WOODWARD,
Clerk House of Representatives.

THE SENATE OF THE TERRITORY OF HAWAII,
Honolulu, Hawaii, May 1, 1917.

We hereby certify that the foregoing resolution was finally adopted in the Senate of the Territory of Hawaii on May 1, A. D. 1917.

CHAS. T. CHILLINGWORTH,
President of the Senate.
O. P. SOARES,
Clerk of the Senate.

The VICE PRESIDENT presented a petition of sundry citizens of Salem, Mass., praying for the exemption of bequests, legacies, devises, and gifts to educational, philanthropic, and religious institutions maintained exclusively for public purposes, etc., from taxation, which was referred to the Committee on Finance.

He also presented a petition of sundry citizens of Union Star, Mo., praying for national prohibition as a war measure, which was referred to the Committee on the Judiciary.

He also presented petitions of the Iowa State Sunday School Association and the Drexel Biddle Adult Bible Classes of the District of Columbia, praying for the prohibition of the manufacture of foodstuffs into intoxicating liquor, which were referred to the Committee on Agriculture and Forestry.

He also presented a petition of the Washington (D. C.) Chamber of Commerce, praying for Government control of food, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of the New York Yearly Meetings of the Religious Society of Friends, expressing appreciation of their exemption from military service, their recognition of the responsibility to see that no improper use is made of such exemption, and offering their services for any constructive work which they may be able to perform, which was ordered to lie on the table.

Mr. MYERS presented a petition of Silver Bow Trades and Labor Council of Butte, Mont., praying for the raising of revenue for the war expenses by increased income taxes, etc., which was referred to the Committee on Finance.

He also presented petitions of sundry citizens of Montana, praying for national prohibition as a war measure, which were referred to the Committee on the Judiciary.

Mr. PAGE presented a petition of the Brotherhood of the North Congregational Church of St. Johnsbury, Vt., praying for the prohibition of the manufacture of foodstuffs into intoxicating liquor, which was referred to the Committee on Agriculture and Forestry.

Mr. THOMPSON presented petitions of sundry citizens of Kiowa, Kansas City, Coats, Fall River, Burdett, Caldwell, and Great Bend, all in the State of Kansas, praying for the prohibition of the manufacture of foodstuffs into intoxicating liquor, which were referred to the Committee on Agriculture and Forestry.

WAR REVENUE.

Mr. SHIELDS submitted an amendment intended to be proposed by him to the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

"CONSTITUTIONAL SOURCES OF THE LAWS OF WAR."

Mr. FLETCHER. Mr. President, I ask permission to have referred to the Committee on Printing an article entitled "Constitutional sources of the laws of war," which seems to be a very careful study by Horace L. B. Atkisson, of the District bar.

The VICE PRESIDENT. Without objection, that action will be taken.

AMENDMENT OF INTERSTATE COMMERCE ACT.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

Mr. NEWLANDS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gore	Norris	Smith, Md.
Bankhead	Gronna	Overman	Smith, Mich.
Beckham	James	Owen	Smith, S. C.
Brady	Johnson, Cal.	Page	Smoot
Brandegee	Jones, N. Mex.	Penrose	Sterling
Broussard	Jones, Wash	Poindexter	Stone
Calder	Kellogg	Pomerene	Thomas
Chamberlain	Kenyon	Ransdell	Thompson
Culberson	King	Reed	Townsend
Cummins	Kirby	Robinson	Trammell
Curtis	Knox	Saulsbury	Underwood
Dillingham	McKellar	Shafroth	Vardaman
Fletcher	McNary	Sheppard	Wadsworth
France	Martin	Sherman	Walsh
Frelinghuysen	Nelson	Shields	Watson
Gallinger	New	Smith, Ariz.	Williams
Gerry	Newlands	Smith, Ga.	

Mr. FRELINGHUYSEN. I desire to announce that my colleague [Mr. HUGHES] is detained from the Senate on account of illness. I ask that this announcement may stand for the day.

Mr. THOMPSON. I wish to announce that the Senator from California [Mr. PHELAN] and the Senator from Rhode Island [Mr. GERRY] are detained on official business.

The PRESIDING OFFICER (Mr. WALSH in the chair). Sixty-seven Senators have answered to the roll call. A quorum is present.

Mr. NEWLANDS. Mr. President, as to the bill regarding priorities in transportation, I hoped yesterday that the reading of the report and the full supplementary matter accompanying it would so convince the Senate of the wisdom and desirability of this bill that, without much discussion, it would pass. Therefore I abstained from the usual opening statement regarding the bill. I find, however, that differences have arisen as to section 1 regarding the labor question, and as to section 2 regarding the imposition of great and important duties upon an already overburdened President. So I have concluded to make as brief a statement as possible of the origin, aims, and purposes of this bill, and I shall ask that I be allowed to proceed without interruption. At the end of my remarks I will be glad to respond to any questions which may be asked.

Mr. SMITH of Georgia. Mr. President, will the Senator yield to me for a moment?

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Georgia?

Mr. NEWLANDS. Yes.

Mr. SMITH of Georgia. At the time of the recess last evening I had the floor in the midst of a discussion of this bill. I realize the justice of the request of the Senator from Nevada, and I do not insist upon my right to the floor; but I ask for myself that the continuation of my remarks when I obtain the floor shall be considered a part of my speech of yesterday, and not be treated as two speeches.

Mr. NEWLANDS. There is no objection to that.

Mr. SMITH of Georgia. I understand the chairman of the committee agrees that that course shall be pursued.

The PRESIDING OFFICER. Without objection, that course will be taken. It is so ordered.

Mr. REED. Mr. President——

Mr. NEWLANDS. I understand the Senator from Missouri desires to rise to a question of personal privilege, which he says will take only a short time, and I yield temporarily.

Mr. STONE. Mr. President, let us have a little order in the Chamber.

PERSONAL EXPLANATION.

Mr. REED. Mr. President, I hope that the representative of the Washington *Post* is in the gallery, because I am going to ask him to correct in to-morrow morning's issue a misstatement made in this morning's issue of that paper.

Mr. President, on yesterday a discussion occurred between the Senator from Illinois [Mr. LEWIS], the Senator from Ohio [Mr. HARDING], and myself. I have not the slightest desire to reopen

that discussion, but during its course the Senator from Ohio seemed to refer for his authority for certain statements he had made to alleged statements made by the Senator from Illinois and myself in an executive session of the Senate. In replying to the Senator from Ohio I took occasion expressly to state that no such statements had ever been made by the Senator from Illinois or myself in executive session. Thereupon the Senator from Ohio very plainly stated that he had not meant so to charge. Accordingly, so far as the incident was concerned, it was closed on the floor of the Senate with a complete understanding that nothing that the Senator from Ohio had said was to be understood as based upon the remarks of the Senator from Illinois or myself made in executive session.

Notwithstanding that very clear understanding had here on the floor of the Senate, all of which will be disclosed by the printed record, the Washington Post article contains this language:

Replying to Senator REED'S challenge to give the facts Senator HARDING said:
"I could, if I had the record of a recent secret session, in which there were the most notable speakers."

That is immediately followed by this statement in the paper, not in quotations, and therefore I undertake to say the publisher did not intend to inscribe the statement to Senator HARDING:

In that session both Senators REED and LEWIS assailed the practices and conduct of the Council of National Defense.

Then follows a further quotation, or alleged quotation, from the Senator from Ohio, as follows:

I'll not be drawn into the matter further, but it is not a secret to say that conditions were disclosed creating the greatest anxiety. I'll not be led by heckling to make a sensational statement inclined to disturb the American tranquillity.

Mr. President, I have nothing to say with reference to the quotations from the Senator from Ohio; but the statement made in this article that a secret session of the Senate "both Senators REED and LEWIS assailed the practices and conduct of the Council of National Defense" is absolutely false. On yesterday, in the open Senate, I declared a somewhat similar assertion to be absolutely false. The declaration was made in the presence of the gentlemen of the press gallery, and during the course of the remarks they were requested to state fairly to the country the fact that the Senator from Ohio had reduced his charge to a statement that he meant no more than that the country was not adequately prepared for war, and that he had withdrawn any statement charging that disclosures in executive session by the Senator from Illinois or myself constituted the foundation for his charge as originally made. Notwithstanding those statements this article appears in the Washington Post of this morning.

I have no interest in the matter from the personal standpoint, but I have an interest in the truth being stated to the country as to what transpires upon the floor of the Senate. I was one of the Senators who opposed a press censorship. I hope I shall not have occasion to regret my action.

AMENDMENT OF INTERSTATE-COMMERCE ACT.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

THE COUNCIL OF NATIONAL DEFENSE AND ADVISORY COMMISSION.

Mr. NEWLANDS. Mr. President, the Senate will recall its action with reference to the creation of a Council of National Defense and the creation of an advisory commission of the council. That council and that commission were authorized by an almost unanimous vote of the Senate.

The Council of National Defense consists of six Cabinet members, headed by the Secretary of War. The advisory commission of the Council of National Defense consists of—

Daniel Willard (chairman), transportation and communication.

Howard E. Coffin, munitions and manufacturing, including standardization and industrial relations.

Julius Rosenwald, supplies, including, clothing, and so forth.

Bernard M. Baruch, raw materials, minerals, and metals.

Dr. Hollis Godfrey, engineering and education.

Samuel Gompers, labor, including conservation of health and welfare of workers.

Dr. Franklin Martin, medicine and surgery, including general sanitation.

Walter S. Gifford, director of council and advisory commission.

Grosvenor B. Clarkson, secretary of council and advisory commission.

The Council of National Defense has a number of subordinate committees appointed by that council, such as the aircraft production board, the committee on coal production, the committee on shipping, and others, composed of men skilled and experienced in these various industries. The advisory commission of the Council of National Defense also has a number of subordinate committees appointed by that commission, and the entire organization of the Council of National Defense and the advisory commission, together with the subordinate committees, embracing, I should estimate, the names of at least a thousand men prominently identified with the activities and industries of the country, is presented in the CONGRESSIONAL RECORD of yesterday, beginning on page 3592. It gives in the utmost detail the organization and membership of the various committees. The aim evidently has been to organize all the various industries of the country through the men most experienced in them, in order that the Council of National Defense, and through that council the President, may have the benefit of the information of men who know, and their cooperation in securing the highest efficiency of the Government in this great crisis.

One of the subordinate committees of the advisory commission is a railway executive committee, organized at the suggestion of the Council of National Defense—a voluntary organization, appointed by the corporations controlling over 250,000 miles of the railroads of the country—consisting of five men, with Mr. Willard, the chairman of the committee on transportation of the advisory commission, and Mr. Clark, a member of the Interstate Commerce Commission, added as ex officio members, these five men being the presidents of five great railway systems of the country, sitting in continuous session in Washington, fully authorized to act for all the railroads of the country and in cooperation with the Council of National Defense and with the President of the United States in securing the highest coordination and efficiency of the various railroad systems in this war. That committee has been brought into existence by the Council of National Defense and it is composed of men who stand highest in railway organization and railway operation, men who are not at all, as far as I understand, connected with any of the scandals that have in the past characterized railroad control and which have brought many railroad managements under severe public animadversion.

That subcommittee, Mr. President, is headed by Fairfax Harrison, president of the Southern Railway system, and included in its membership are Hale Holden, president of an important railway system; Howard Elliott, president of the New York, New Haven & Hartford Railroad; Samuel Rea, president of the Pennsylvania Railroad; and Julius Kruttschnitt, chairman of the executive committee of the Southern Pacific Co.

The Council of National Defense has been in almost continuous session for many months. The advisory commission has been in almost continuous session. The subordinate committees have been holding frequent meetings and have been making their recommendations to the advisory commission. But one report has been made as yet of the entire operations of the Council of National Defense, and that has been made, as the law provides, to the President. It is by law made the duty of the President to make a report yearly to Congress. I think it would have been better, perhaps, if the law had provided that the President from time to time should make reports, so that Congress could at all times act in cooperation and collaboration with this council; and I think that if full information had been given to Congress from time to time in detail of the operations of the Council of National Defense as well as of the advisory commission much misapprehension would have been saved. I attach no blame to anyone. It is competent at any time for Congress, by resolution, to make the inquiry, and we all know that the men who are responsible in the Council of National Defense and the advisory commission have been so full of affairs constantly pressing upon them that it would be hard to expect of them any volunteer action that would increase their duties and perhaps divert their attention from their duties.

EMERGENCY TRANSPORTATION AT HOME AND ABROAD.

Therefore, as the result of the misapprehensions which have been shown on the floor of the Senate since my return from the West with reference to the action of the Council of National Defense and the advisory commission, I have taken pains to inquire into the organization and its operations, and I have spread out the facts in detail upon the RECORD. I hope the entire organization of these two commissions, and something of the nature of the work intrusted to them, will receive the attention of Senators.

In addition to this, I have requested Mr. Willard, the chairman of the committee on transportation—a man thoroughly experienced in transportation, a man of unexceptionable record,

who has raised himself gradually from the position of a track-worker upon the railroad through the positions of brakeman and engineer and traffic manager, and so forth, up to the position of president of one of the greatest transportation systems of the country—to send me a letter stating the necessity for this legislation; and I asked him to accompany his letter with a notable speech delivered before the editorial conference by Mr. Howard Elliott, who also stands high in the railroad world, setting out the nature of the organization of the railroads and the work which they were endeavoring to accomplish. I invite the attention of Senators to this letter and to this speech, which appear in the report of the committee, as well as in the RECORD of June 8.

I have also caused to be inserted in the RECORD and in the report of the committee an article in the Outlook written by Mr. Acworth, an Englishman of high authority in railway matters, who has been frequently authorized by the House of Commons to act as an expert in such matters, who has been connected with the management of one of the great railway systems of England, who has appeared before congressional committees in this country as an expert in transportation, and from whose wide information and vast experience the Senate Committee on Interstate Commerce has received great benefit.

This article shows the process of evolution of the transportation control of England; how in 1871, when Germany was engaged in its war with France, and when England feared that the war might spread beyond the existing limits, by act of Parliament the Government was authorized at any time to take over the entire railway system of Great Britain; and how, acting under that authority of over 40 years ago, when the present conflict was impending, under an order of the Government and under plans which had been in the pigeonholes of the Government for years, the entire railway system of the country was taken over in a moment and the operation of the roads put under the management of the Government.

You will observe by this article that the Government of England at the start very wisely saved all controversy and all confusion by practically intrusting the management to a board of managers consisting of the presidents of the different railway systems, so that the entire staff of the railway systems was left intact without disturbance in any form; and the Government also, in order to avoid controversies with the owners of the properties and to do entire justice, guaranteed to the security holders, the bond and stock holders of those railroads, a net income equal to that of the year 1912, thus doing away with all anxiety of the security holders regarding the returns made to them. The result has been that the Government of England has been conducting the entire transportation system of that country through the experienced agency of the existing officials without disturbance, without controversies with security holders, and in such a way as to enable the Government to move all its freight practically free of charge, and at the same time to establish priorities in transportation that would enable the Government to be fully served, even to the neglect of private interests, in order to meet the emergency of war.

THE EVOLUTION OF THE PRIORITIES BILL.

Mr. President, the question of transportation, of course, became a most important question with the Council of National Defense and the advisory commission. As the result of their counsels the President of the United States addressed a communication to the chairmen of the Interstate Commerce Committees of the House and the Senate, respectively, calling their attention to this question and making certain suggestions, following, I presume, the advice of the Council of National Defense and probably that of the advisory commission. Thereupon a joint subcommittee was immediately selected, consisting of Mr. ADAMSON and Mr. ESCH, chairman and the leading minority member of the House committee, and the chairman of the Senate Committee on Interstate Commerce and the leading minority member—the Senator from Iowa [Mr. CUMMINS].

We considered the question of legislation and shaped a measure which was introduced on the same day, both in the other House and in the Senate. The Senate measure went to the Committee on Interstate Commerce, and there was considered and many suggestions made. Finally it was concluded to refer the bill back to the Senator from Iowa and myself for reframing, with a view to the suggestions which had been made. We met, carefully framed the measure, and then introduced it as a new measure, which was reported by the committee without dissent and is the bill now pending before you.

This measure contains two sections—one relating to obstruction or retarding of trains operating in interstate commerce, the other relating to priorities and preferences in transportation.

THE LABOR QUESTION.

The labor question came up before the Senate committee in connection with this question of the blocking or retarding of trains. Of course we all know that in the past railway strikes have resulted in the retardation and obstruction of trains moving in interstate commerce; but they are not the only possible cause of such obstruction or retardation. We can readily understand that in the case of war the obstruction and retardation can come, and probably will come, from an entirely different source. This section, therefore, was not with a view to meeting the strike situation or as a part of legislation on strikes, but simply to provide against any possible obstruction in the arteries of the Nation, an obstruction which would paralyze its activities at a time when it is necessary that the Government and the Nation should exercise without obstruction every possible function.

We concluded, therefore, in the Interstate Commerce Committee that we would not take up the labor question. That question was discussed at the last session, and was discussed at the session before.

In the session preceding the last, you will all recall that the discussion took place and the action was taken when the presidential election was approaching, and that Congress acted only upon a part of the program called for by the President—a balanced program, in my judgment—which, while yielding to humane consideration regarding the eight-hour law, proposed to provide security for the railway systems as well as the public by providing a tribunal that would settle disputes between capital and labor and would stay strikes whilst the process of investigation and determination was going on. Congress acted upon only one phase of that legislation. Some of us, myself included, sought at the last session to bring that matter up and to have the supplementary legislation enacted. I myself was very earnest upon the matter. I am opposed to any legislation that will stay the power of these great organizations to tie up the railway systems of the country, even by a peaceful strike, unless and until we provide a tribunal—a fair tribunal—which will settle the differences and disputes between capital and labor; and unless we secure such a tribunal—and with reference to the form and character of that tribunal we have not yet been able to agree—I am opposed to any legislation that will stay the power of a strike. When that is secured, I am for legislation which, whilst favoring organizations of laboring men employed on railroads, and collective bargaining, will prevent a resort to force in order to accomplish what they desire; and we all know that in the ultimate a strike means force, and that the only thing that compels the yielding of employers is the possibility of force. We are contending as between nations that reason should be substituted for force in the settlement of international disputes, and it is, of course, the highest wisdom that in domestic matters we should insist that all disputes which are likely to affect society at large, shall be settled by tribunals organized for that purpose, that the force of society shall be put behind those tribunals, and that we shall not permit any force save that of the Government itself to be applied in the redressing of wrongs.

Therefore whilst I remain firm in my view that it is the duty of Congress at an early date to substitute reason for force in these disputes, to create tribunals for the settlement of these disputes, and then to stay and prevent concerted action intended to paralyze the public functions of these great public utilities. I realize that with these great and important questions relating to the war pressing upon us it is impracticable to take up that question; that to do so might now produce disputes and dissensions, and particularly dissatisfaction among the laboring people of the country, who with reason view with solicitude and apprehension proposed legislation that is aimed at the control of their collective organizations in any form or shape. We now have their loyal support in this great movement. They are cooperating in this Council of National Defense.

Much as Mr. Gompers may have been criticized in the past for what might be regarded as extremity and indiscretion of action, certainly no one in this day can withhold praise for the vigorous and patriotic action which he has taken with reference to the prosecution of this war. He is a member of the advisory commission, placed at the head of an important committee by the Council of Defense, actively cooperating with the great men of the country—great men in industrial organization—in aiding the council and the President in the efficient prosecution of this war. Associated with him on this committee are the chiefs of the railway brotherhoods, men of courage, capacity, and determination, men who in other lines of activity would by reason of these qualities have reached distinction. They are cooperat-

ing with the advisory commission in the great work of organizing the industrial forces of the country for the national defense, and it may be wise therefore to postpone temporarily the great social question as to the method of settling industrial disputes, concerning which we differ, and apply ourselves with unanimity, zeal, and energy to making our country effective in the great war which will either save and secure democracy or enthrone autocracy. So that I think it quite unlikely that we will proceed to any labor legislation at this time.

It was not the intention of the committee that section 1 should be aimed at the power of strike. It was our opinion that it did not affect at all section 6 and section 20 of the Clayton Act, which guaranteed and secured the right of organization and the right of peaceful strike; but when the bill came upon the floor the Senator from New Hampshire [Mr. HOLLIS] took a different view, and presented certain amendments, which I think weakened the section; and finally, after a statement to him that that section did not affect section 6 and section 20 of the Clayton Act, he suggested that he would be content if a provision were put in that the legislation contemplated did not affect sections 6 and 20 of the Clayton Act. Knowing the sentiment of the Interstate Commerce Committee, I assented to that change, whereupon the proposed change was objected to by certain Members of the Senate, and I found that, instead of avoiding a controversy by the concession made to the Senator from New Hampshire, we had drifted into a new controversy.

There are Members upon this floor who think as I do, that we should take action upon this labor question at some time—we ought to have done so in the past, and we ought to do so as soon as practicable in the future—by creating a tribunal for the settlement of these disputes, but they are unwilling to put anything in the bill itself that seems to be a concession to the idea that no legislation shall be enacted with reference to the control of strikes. I beg those Senators to consider the situation, and I will ask them not to open up a controversy upon this subject. Our purpose simply is to protect the trains moving in interstate commerce, to keep the arteries of commerce open.

This bill makes it a misdemeanor for any one, by physical force or threats or intimidation, to obstruct or retard the operation of trains in interstate commerce. It is not intended to affect the previous legislation of Congress relating to injunctions and strikes, and I see no reason, therefore, why we should not put in this section, if it will quiet the mind of labor, a declaration to that effect, simply declaring in the section what is now the law and what will be the law even if this section is passed.

I will state, also, in reply to a suggestion made by the Senator from Missouri [Mr. STONE], that the entire bill is shaped so that its operation lasts only during the war. I believe, of course, that this section regarding obstruction of trains should be a piece of permanent legislation, but we do not wish to raise a discussion with reference to these questions. All patriotic men will join in a movement to give the full powers that are necessary for the prosecution of the war, but many are hesitant lest we should gradually drift into a dictatorship, and so they are insistent that all these powers and these new conditions shall last only during the period of the war; and, I think, to avoid discussion and contention that, even though we believe many of these matters ought to be matters of permanent legislation, we should yield to that view.

LIMITATIONS AS TO PRIORITIES IN SHIPMENTS.

Now, Mr. President, with reference to section 2 of this bill——

Mr. McKELLAR. Mr. President, will the Senator yield to me?

Mr. NEWLANDS. In the beginning of my remarks I asked not to be interrupted. I will be glad to yield to the Senator and answer any question later on.

Mr. McKELLAR. Very well.

Mr. NEWLANDS. Mr. President, the Senate is familiar with section 2 of this bill. Opposition is made to it by the two Senators from Georgia; the junior Senator [Mr. HARDWICK] being absent, the senior Senator [Mr. SMITH], however, being in harmony with him in his views, I believe, and having expressed them yesterday. He expressed a very natural solicitude regarding one-man power. He thinks it is unwise to put too much of a burden upon the President, for one thing, and he thinks it is injudicious to put too much power in the hands of one man. He admits the necessity for priorities in transportation, but he says that those priorities should be confined to the necessities of the Government—priorities in the movement of cannon, guns, and munitions, and food supplies, perhaps—but that the principle should not be extended to the general commodities and industries of the country.

At first glance that would seem a reasonable limitation; and I myself was desirous of limiting these powers so as to disturb the business of the country as little as possible; but I felt that it was necessary at all times to bear in mind that we were engaging in the greatest war that has ever afflicted mankind; that the existence of democracy was at stake; that the prosperity and the happiness and security of this country were at stake; that in such conditions human experience had always taught that power must be concentrated; and that from that experience in every great war dictatorship had practically arisen. I found it difficult to state limitations in this bill which, whilst wisely cautious for the security of our industries and the consideration of individual rights, would not hamper the Government in its central purpose of carrying this war to a successful conclusion.

With reference, therefore, to the commodities to which this limitation should be prescribed, we found ourselves in confusion. Should we confine it simply to the things that were used on the battle fields or should we extend it to foods? Should we disregard the fact that in creating the very things that are to be used upon the battle field almost every industry of the country might be drawn upon; that whilst it would be important to move quickly guns and powder and shot and other munitions of war, it would be just as essential to move quickly the things that were the component parts of those things that were used in war—the steel which constituted the making of our ships, from which our rifles were made; the iron from which the steel was made; the coal and the coke used in the production of pig iron or steel; the lumber that is to be used in the ships, coming from every section of the country, and which it is just as important to move quickly, in order that the things used in war might be manufactured quickly and efficiently.

If you once attempt to put limitations upon the articles that enter into and form part of the things that are used in war, you will find it almost impossible; you will find that you have entered upon the whole field of human industry throughout the United States, and that the power which is given to move the things used in war expeditiously must logically involve conditions in the movement of things which are component parts of the things that are used in military strife, and which must be assembled from all parts of the country with military promptness and precision.

If you will read over the speech of Mr. Howard Elliott, inserted in the RECORD of June 8, you will find illustrations of how important it is. If you will read over the article by Mr. W. M. Acworth, also inserted in the RECORD of that date, you will find how important it has been in England. They practically had to put the entire passenger population of Great Britain, you may say, to inconvenience in the moving of their troops. They discontinued passenger trains, they discontinued sleeping cars, they put people and communities to inconvenience; and Mr. Acworth very graphically describes how the component parts of a shell, for instance, came from different parts of that great Commonwealth, and how essential it was to move those things with clockwork regularity and precision and speed in order to accomplish the ultimate purpose of creating the munitions themselves.

Mr. President, I will ask leave to put in the RECORD quotations from these speeches and articles.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

[Extracts from speech of Howard Elliott inserted in RECORD of June 8, p. 3331.]

FIRST ACTION OF COMMITTEE.

One of the first things we did was to put out what we called our efficiency circular. I will not burden you with the details of it, because you no doubt have seen it, but it was an earnest appeal to officers, to men, to the public, and to those who use the railroads to help and cooperate in every way possible to make a greater use of the existing American railway plant. As I have just said, this plant is inadequate in some directions for reasons that need not here be discussed, and it is essential to make every car, every engine, every track, every freight house, and every appliance do a little more work, if we can possibly arrange it, and to do that we must have the highest cooperation between the railroad owner, the railway employee, and the railroad users.

This circular was put out to try to stimulate that idea.

WEEKLY REPORT TO COUNCIL OF NATIONAL DEFENSE.

Then we make a report once a week to the National Council of Defense to show them what we have been doing or trying to do, so that they may be advised and may make suggestions to us. Our report of May 18 covers some 18 subjects, only a small part of the numerous subjects that our committee has considered, and we have been practically in continuous session here in Washington since April 23, trying to go home to our places of residence and to our railroad headquarters on Saturdays and Sundays to keep in touch with the detail of the properties that employ us.

MOVEMENT OF COAL.

But we have taken up many subjects. One of the first and most important was to try to help move a greater quantity of fuel, which must be moved if the manifold activities of the United States are

to go on and we are to make the things that we need and that the allies need; and, as a corrolary, to bring down the greatest quantity of iron ore from the upper lake ports so that the factories can make the steel and iron. A great deal of work has been done upon that and we are beginning to see the fruits of it.

COMMITTEE OF RAILROAD EXPERTS TO RUSSIA.

We have modified the so-called car-service rules, and we think there is a more fluid movement of such equipment as exists. We, at the suggestion of the council, obtained and turned over to the Government five trained railroad officers, who were commissioned to go to Russia to see what they could do to help the Trans-Siberian Railroad to move the freight piled up at Vladivostok toward the Russian front.

NINE REGIMENTS OF RAILROAD MEN RAISED FOR FRANCE.

We also at the request of the council and partly at the request of the French delegation are arranging to obtain about nine regiments of trained railway officers and trained railway employees to help the English and French people carry on their railroad activities principally in France, where, as you know, the man power is strained to the limit. We brought about, through Mr. Peabody, of Chicago, an experienced coal owner and dealer, and with the cooperation of our committee and of the lake carriers and the ore carriers, a pooling of coal, so that when it comes to the lower lake ports there will be a minimum amount of delay in putting the coal into the boats, releasing the cars promptly, and getting the boats forward promptly.

* * * * * * *

MEETING WITH STATE RAILROAD COMMISSIONERS.

There is another thing we have done which is of importance. We have had a meeting with a group of State railroad commissioners and have explained our position to them and our desire to work in a cooperative spirit with them.

* * * * * * *

SHORTAGE OF TRANSPORTATION.

I am afraid there may be a shortage of transportation. If that time comes, then it is going to be necessary, in the interests of the Nation and in the interest of the allies, to use such transportation as there is for the essential things, as one of your speakers called it a few minutes ago, and it is going to be necessary for the public and for you, who represent the public, to be willing to give up the nonessentials.

PREFERENTIAL MOVEMENTS.

In other words, it is going to be a great deal more important for this country to move food, fuel, and iron, and the essentials of life and manufacturing than it is to move what might be called the luxuries, the things that we can get along without in this terrible world crisis. We hope that we are going to be able to move it all, but I think it is only fair to point out to a body of gentlemen like this the facts, and to ask your cordial support and when the time comes when we must pick and choose that we have your cordial support in any effort we may make to move the essentials before the nonessentials.

NECESSITY FOR PRIORITY COMMITTEE.

That matter is so important that the Executive and the Congress have taken it up, and they have caused to be introduced in Congress, not at our suggestion, but of their own volition, because they see the difficulty, a bill which will empower some agency of the Government, under the direction of the President, to say what shall be given up and what must move. That bill has been favorably reported by the Senate, and I presume is now on its passage. It is essential to the welfare of the people and for the preservation of this great American railway system that some such measure be enacted, because we have courageously started out to do these things that we have been asked to do by the council, and yet in doing them we must of necessity run across some Federal laws and some State laws, and sooner or later we will have to stop in our efforts to get this maximum efficiency unless as a war measure the Federal power says "You must do this and you must do that" without being subjected to countless damage suits.

[Extract from article by W. M. Acworth, of England, appearing in the Outlook of May 16, 1917, and inserted in the CONGRESSIONAL RECORD of June 8, p. 3334.]

The railways have been taken over by the Government, but the management has been left undisturbed in the hands of the old men. There is nothing by which a shipper or a passenger can recognize that any change has taken place. Each general manager with his own old staff manages his railway as before. But there is for the first time an authority behind him. The informal committee of general managers that existed before the war was at the outset given full powers as the railway executive committee. And it exercises supreme control. Its nominal chairman is a cabinet minister. But the deputy chairman, the real head of the organization, is one of the general managers. The executive committee is in almost constant session, and its task is to insure that all the railways of the country work together as one harmonious whole.

The task is not light. Not only have troops had to be moved to the ports by the million, guns by tens of thousands, and military stores in millions of tons but when every factory in the country is impressed into military works the amount of traffic back and forth within the country itself is enormous. Steel is cast in one place and made into shell in another; the fuses come from a third district, and the explosives from a fourth; the boxes and baskets to hold the shells have to be brought from a fifth; the filling is done in a sixth place, before finally the finished shell can be delivered at the port of shipment. And similarly with all the other necessaries of the armies and the fleets.

And this is not all. Railways, like any other business concern, as they grow up develop an organization to meet the requirements of their normal business. And the requirements in England nowadays are wholly abnormal. Imagine a camp of 20,000 or 30,000 men, with all their multifarious needs in food and supplies, plumped down alongside of a petty way station, whose accommodation was meant to suffice for a score of passengers a day and three or four freight cars. Imagine half a dozen important ports taken up wholly by naval needs, and the whole of their normal traffic diverted to an adjoining port, or, it may be, to a port on the opposite coast of the island. Again, traffic has been thrown upon the roads that they never handled before. The collieries before the war imported pit props by the millions of feet from the Baltic through ports close at hand. That traffic has been stopped, and pit props have to be carried long distances by rail from remote parts of Great Britain.

* * * * * * *

I have laid stress on the fact that the railway officials manage their own lines exactly as before. But naturally the relation between the War Office and the railways is close and constant. And from the director general of military transport at headquarters, through the colonel in charge at the divisional command, down to the subaltern transport officer at the local entraining station, there is a whole hierarchy of military officers whose business it is to interpret the military needs to the railway officials and the railway possibilities to the military authorities. The point is that it is for the soldiers to say what they want done, for the railway officials to decide how to do it, or, it may be, to explain why it can not be done and to suggest a revision or modification of the order. On the whole, the system works excellently. An irate colonel who was so dissatisfied with the accommodation provided for his favorite charger that he was left expostulating on the platform alongside his horse while the train and the regiment went on without him was a fortunately rare exception.

Mr. NEWLANDS. So much for the commodities and articles that are to be moved and to which preference is to be given. I have asked the Senator from Georgia [Mr. SMITH] to present amendments specifying to what articles he would limit this power. He presented a suggestion yesterday, but it seems to be woefully insufficient, and I am afraid the Senator has failed sufficiently to designate the articles and commodities to which these priorities are limited simply because it is an impossible task. What is the standard of this bill? The standard is, "Whenever in his judgment such action is necessary to the public security and defense." That is the standard with reference to which the President must exercise his judgment. When he exercises his judgment, on the advice of the Council of National Defense and the advisory committee, then the things which he says ought to have priority must have priority, if we expect to have efficiency.

ONE-MAN POWER.

But the Senator suggests that no such power should be given to one man. In saying that he may be right, but he indicts the wisdom of our Constitution when he says it. The Constitution of the United States places all of the executive power in the President of the United States—one man—not in two men, three men, a council, or responsible ministry which acts both in legislation and in administration both in creating the laws and in executing the laws. It has made the President of the United States, a single individual, the sole repository of executive power.

Mr. President, we have put all the safeguards and all the aids around the President that we can, and we have done it at his suggestion. The President has not been eager for *one-man* power. If so, why did he suggest the creation of a Council of National Defense, who are to advise him upon these matters? Why did he advise the creation of an advisory commission, who are to advise the Council of National Defense, a commission spreading its members throughout the entire country, and representative of the character, the ability, the industry, the executive power, and the capacity to do, contained in the country? Congress has followed his suggestion, and there they are to advise, and he is advising with them. The source of every suggestion, almost, in reference to the details of this war, is not the President himself, but the ripened experience and judgment of the Council of National Defense, aided by this advisory commission. What better method could be devised, if you want to distribute power under the Constitution, than this, which bases the judgment of one man, intrusted by the Constitution with power, upon the advice of experienced and capable men organized under the law.

Mr. President, section 2 first gives the President, whenever, in his judgment, such action is necessary to the public security and defense, the power to direct that certain kinds of traffic or particular shipments as may be determined by him shall have preference or priority in transportation by any common carriers, by railroad or water, under such arrangements, rules, and regulations as he may prescribe. The Senator from Georgia [Mr. SMITH] suggested that that gave the power to discriminate as between shippers. I called the Senator's attention to the fact that there was nothing in the statute about shippers, about persons, about individuals. But there is something in this statute about things. We give the power to the President to determine the kinds of traffic, or particular shipments. He acts upon the things, not with reference to the persons interested in the things.

I can imagine a shipment that might embrace numerous kinds of traffic, so numerous that it would be almost impossible to enumerate them, certainly not without loss of time. If you are not content with the words "kinds of traffic"—although I assume the Senator from Georgia is—it might be necessary for him to have a commission to determine how many kinds of traffic there were in a particular shipment before he could order priority. Think of the waste of time if the execution of this power is to be attended with technicalities of that kind.

I proceed further. He may prescribe rules and regulations. If you give him the power why should you not give him the

power to make the rules and regulations? The rules and regulations are a necessary part of the power, the only way in which the power can be exercised in an orderly and expeditious way. Do you expect the President of the United States to inquire minutely, individually, into the character of every kind of traffic and of every particular shipment with reference to which priority is desired? He must act upon general rules; and the public interest is advanced by fixing general rules, because that means that individual preference can not be given; rules operating equally upon all and oppressively upon none.

The Senator from Georgia suggests that we should make the rules. I will ask him to submit an amendment declaring what rules he thinks, in his judgment, would cover the entire field. If he accepts that task he accepts a task that I would not accept, because I believe it is an impossible task. It is utterly impossible to tell to-day the conditions of to-morrow, or of the next day, or of the next month, or of the next year. And are we in our wisdom, sitting here to-day, to determine all the contingencies and possibilities that may arise?

The next sentence is:

He may give these directions at and for such times as he may determine, and may modify, change, suspend, or annul them.

What objection can there be to that? As a rule or a direction proves inadequate by experience, why should it not be changed or suspended or modified?

And for any such purpose he is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose.

Of course, that is a great power, but we have elected Mr. Wilson President of the United States, and the President of the United States is the executive department of the Nation. Where else shall we put the power? The people under the Constitution have put the executive power in his hands and the responsibility upon him. Would you change the whole theory of government and by the slow process of constitutional amendment establish a council of 10 in the place of the President, or establish a responsible ministry, half legislative and half executive, desirable though it may be?

Officials of the United States, when so designated, shall receive no compensation for their services received hereunder.

I think all will assent to that.

Persons not in the employ of the United States so designated shall receive such compensation as the President may fix.

There is some criticism of that. That is a great power. He can fix any compensation. The Senator from Georgia may suggest some limitation. I am sure the Senate will give it consideration. But I would not put any limitation. If I were the President, I would appoint to that position, to administer that power, the greatest transportation man of the country, provided his character and his reputation for integrity were such as to warrant the confidence of the people. I do not know what the compensation of such a man should be. He might perform the duties as a patriotic service, for aught I know. I should hope so. The President can, if he chooses, appoint an individual, a committee, or a board or commission through whom or through which he may give his directions or he can select any existing official or Government agency, the Interstate Commerce Commission itself, if he deems best. Why hamper him in this discretion?

Suitable offices may be rented.

Some criticism has been made of that. That will involve some expenditure, of course. But we must place confidence somewhere. Are we to choose the offices and to fix the rent?

THE RAILROAD WAR COMMITTEE.

The next clause is a very wise one, it seems to me:

All such common carriers are hereby directed to establish forthwith, and to maintain continuously in the city of Washington, during the period of the war, an agency by a committee of railroad officers or otherwise fully empowered by such carriers to receive on behalf of all the carriers notice and service of such orders and directions and to arrange for the prompt compliance therewith by such carriers.

Mr. President, that has already been carried out by the Council of National Defense, without the authority of law. Already a voluntary committee has been created by all the railroads of the country at the instance of the Council of National Defense. They could not wait for legislation. They have appointed a committee of five, and they are now in session at Washington. Let me read the names of these men. Is there one who does not inspire confidence?

Fairfax Harrison, the brother of the Governor of the Philippines, president of the Southern Railway, chairman.

Daniel Willard, of whom I have already spoken, president of the Baltimore & Ohio Railroad, member ex officio.

Samuel Rea, president of the Pennsylvania Railroad.

Julius Kruttschnitt, chairman executive committee of the Southern Pacific Co.

Hale Holden, president Chicago, Burlington & Quincy Railroad.

Howard Elliott, president New York, New Haven & Hartford Railroad.

Edgar E. Clark, Interstate Commerce Commission, member ex officio.

Are there any names connected with transportation that inspire more confidence than these? Have any of these men been connected with any of the scandals that have disgraced the history of railroad administration in this country?

Mr. President, in my opinion we must get out of that state of mind which for some years has impelled Congress to punitive legislation with reference to railroads, rather than to constructive legislation. There has been abundant occasion for criticism and dissatisfaction in the past. Doubtless the severe castigation that the railroads have received in past years was deserved. Doubtless there have been many maladministrations which have been deservedly punished, and many of which have escaped deserved punishment. But I believe that as a result of the punitive process through which railroads have passed during the past 15 years, there has been evolved a standard of morals among railroad men themselves which is vastly superior to the standards of former times; and, for my part, I applaud the Council of National Defense for bringing within their counsels such men as constitute this transportation committee, charging them with patriotic responsibility, and demanding of them that they, in their varied and important functions, perform substantial service for the State; and I believe they will do it faithfully, honestly, patriotically, and efficiently. We make it the duty of this executive committee to obey strictly and conform promptly to the orders of the President, and we make it an offense for them to neglect performance.

Division of earnings and compensation to railroads: The President is hereby authorized, whenever in his judgment it becomes necessary in order to expedite transportation and to do justice between carriers, to enter into agreements with two or more carriers looking to a proper division of earnings for a time to be specified and upon kinds of traffic to be prescribed.

Is there any objection to that? Some may say that authorizes pooling. Well, there is an honest pooling that may serve the public and there is a dishonest pooling that may trick the public. But we have here in the President the Chief Executive, with the best advisers provided by Congress around him, not only this Council of National Defense, of which Mr. Lane is a member—honored and trusted throughout the country as a student and an expert in transportation and as a man of practical information upon this subject—but we have the Interstate Commerce Commission itself, through one of its members, in active communication on the one hand with the Council of National Defense and the advisory commission and on the other with the railroad committee.

Would you say that no agreements of this kind should be made because experience has taught us in the past that voluntary railway poolings may inflict injury upon the public? I can imagine a condition of things where it will be absolutely necessary to require of one road that it shall carry mainly the low-priced products of great bulk, with reference to which the rates are very low, abandoning the profitable traffic in high-priced products either entirely or partially, whichever the case may be; and I can imagine that it may be necessary to concentrate upon another road the carriage of high-priced products in order that efficiency may be attained. In that case, would you condemn the one to loss in the exercise of its patriotic duty of yielding to the President's order and insure to the other exaggerated profits? I do not think so. I think some reasonable arrangement between the two roads looking to a division of profits, so that the one may not receive the entire benefit of the change and the other suffer the entire loss from the change, may be accomplished.

The next sentence is:

For the transportation of persons or property in carrying out the orders and directions of the President the lawfully established tariffs shall apply unless otherwise fixed by law; for the transportation of troops in carrying out the orders and directions of the President, reasonable rates shall be fixed by the Interstate Commerce Commission.

Does anyone object to that?

The next is:

And if the transportation be for the Government of the United States, it shall be paid for currently or monthly by the Secretary of the Treasury, out of any funds not otherwise appropriated.

Is there any objection to that? It is to the highest interest of the Nation that the railroads should be financially sustained during this period. They should not be allowed to wait for the compensation due them. All the operations of the Government should

be promptly paid for, for it is only from the moneys the railroads receive that they are enabled to keep up their transportation facilities and their equipment to the standards required by the Government and the public.

Now comes a proviso:

Provided, That if by reason of giving preference or priority in transportation under an order or direction authorized hereunder, or by reason of disarrangement of traffic caused by giving such preference or priority, any carrier shall suffer injury or damage, the Interstate Commerce Commission shall, upon application by the carrier and upon notice to the Attorney General of the United States, and after due hearing, determine the amount thereof, which amount shall be paid by the Secretary of the Treasury out of any funds in his hands not otherwise appropriated.

Can there be any objection to that? A Government commission determines the injuries done to an individual carrier by one of these preferential orders.

The next proviso is:

Provided further, That no application for any such damage or injury shall be presented to the commission after six months from the expiration of the order of preference or priority.

That is a statute of limitations. The law requires that if a railroad suffers any damage it shall promptly present its claim, and that it shall not go into the category of stale claims, which have so afflicted the country in the past.

The next sentence is:

In making such determination the commission shall have due regard for the terms of any acts of land grant or contract existing between any such carrier and the United States, and for the purpose of any such inquiry and determination the Interstate Commerce Commission is hereby vested with all the powers which it now has or may be authorized by law to exercise in investigating and ascertaining the justness and reasonableness of rates or charges. Any such findings of the commission shall be subject to review on the merits by a bill in equity, filed either by the Government or by the carrier in a court of competent jurisdiction, with right of appeal as in other equity cases. The final order or decree shall be certified by the court to the Interstate Commerce Commission, which shall enter the same as its own order. Any carrier complying with any such order or direction herein authorized shall be exempt from any and all provisions in existing law imposing civil or criminal pains, penalties, obligations, or liabilities upon carriers on account of any such action.

There certainly can be no objection to these provisions.

The amendment offered by the Senator from Iowa [Mr. CUMMINS], which the committee accepts, relieves the last clause of any ambiguity. It substitutes for the last words "on account of any such action" the words "by reason of giving preference or priority in compliance with such order or direction." Certainly the existing laws making it a criminal offense to give preferences or priorities should not be applied to these priorities which the Government of the United States, through its President, directs pursuant to law for the security and safety of the State.

THE INTERSTATE COMMERCE COMMISSION.

Mr. President, I have now gone through this bill. I am as anxious as the Senator from Georgia is not to place undue power anywhere. I am as anxious as he is not to overburden the President of the United States. I am as anxious as he is to ease his labors by giving him all the aid that he requires as the chief of the executive department. We considered the question as to whether or not we should give these powers to some board or commission. We considered the question as to whether we should give these powers to the Interstate Commerce Commission. I may say that the railway executives wanted these powers given to the Interstate Commerce Commission. They felt that that body was a quasi judicial body, and that with its large experience in transportation it would be able to discharge the duties with greater efficiency, for one thing, and with greater justice both to the carriers and to the public for the other. But objection was made to that both by the Senator from Iowa and myself, and I think our objection was sustained by the committee. That objection was that it would not be wise to confer upon the Interstate Commerce Commission powers which were contradictory and to change the quasi judicial character of that body.

Under the law—and we want that law to stand—no preferences or priorities can be given. "First come, first served; special privileges to none; equal rights to all"—that is the doctrine of the interstate-commerce act. The Interstate Commerce Commission, as a quasi judicial body, is authorized to administer that act. We do not believe that it is well to give such a body power to fix priorities and preferences, to get it into the habit even of considering priorities and preferences. We want it to administer that law in the interest of the public; and as to these great powers created as the result of the war emergency, and absolutely necessitating and compelling diversion from accustomed methods, we do not believe that this body, honored and trusted as it is, should be called upon to act. We believe that these war powers belong to the President of the United States as the Commander in Chief of the Army and Navy of the United States, made so by our organic act, and that the responsibility should be put upon him, and that the action should come from him, either directly or through such agencies as he may direct. We preferred also not to hamper his discretion by requiring a special board or commission. Recall what Gen. Goethals says about a board—that it is long, narrow, and wooden. Recall the difficulties in the organization of the Panama Canal Commission and the final placing of all power in the chairman in order to expedite decisive action. Boards and commissions are good for deliberation and advice and judgment, but they are not always quick and decisive in action. Let the President choose whatever agency he thinks will best meet the requirements of the hour.

I presume that if after deliberation and consultation with the Interstate Commerce Commission it should be deemed wise to make that commission a part of the machinery of the administration of this priorities provision, there would be nothing in the act to prevent the President from directing that the powers should be exercised by the Interstate Commerce Commission. But we felt that as this was a great war power, we should not confer upon the Interstate Commerce Commission war powers; that we should place this power, with all the other war powers, in the hands of the Commander in Chief of the Army and Navy, as provided in our Constitution.

HOW ENGLAND HAS DONE.

Now, Mr. President, I wish to read just a few words from Mr. Acworth's notable communication to the Outlook, as showing how efficiently England has acted under these conditions. I shall read only a few quotations which illustrate my argument. Speaking of the executive committee of the railroads, which is appointed by the minister, but consists of the chief managers of the railroads, he says:

The informal committee of general managers that existed before the war was at the outset given full powers as the railway executive committee. And it exercises supreme control. Its nominal chairman is a cabinet minister. But the deputy chairman, the real head of the organization, is one of the general managers. The executive committee is in almost constant session, and its task is to insure that all the railways of the country work together as one harmonious whole.

The task is not light. Not only have troops had to be moved to the ports by the million, guns by tens of thousands, and military stores in millions of tons, but when every factory in the country is impressed into military works the amount of traffic back and forth within the country itself is enormous. Steel is cast in one place and made into shells in another; the fuses come from a third district, and the explosives from a fourth; the boxes and baskets to hold the shells have to be brought from a fifth; the filling is done in a sixth place, before finally the finished shell can be delivered at the port of shipment. And similarly with all the other necessaries of the armies and the fleets.

This shows how necessary it is that all these supplies shall go to the places where they are needed with absolutely military precision. He continues:

Nor are these the only difficulties against which the railways have to contend. With more traffic than ever to handle, there are fewer men to handle it. One man out of every five—and they not the least active and efficient—has gone to fight. Shops that should be building new engines and overhauling old ones are given up to making shells or building airplanes or motor lorries. Steel that should be rolled into new rails has been commandeered for ship plates and guns and shells.

He speaks of the substitution of women as porters, carriage cleaners, and so forth, and says:

Early in the war all cheap fares except commuters' and workmen's tickets were cut off, and a few months ago the ordinary fares were increased 50 per cent. So the ordinary passenger now pays 3 cents. The increase was put on quite as much to reduce travel as to obtain revenue. Gradually the passenger service has been very greatly reduced—

And so forth. Then he says:

I have laid stress on the fact that the railway officials manage their own lines exactly as before. But naturally the relation between the war office and the railways is close and constant. And from the director general of military transport at headquarters, through the colonel in charge at the divisional command, down to the subaltern transport officer at the local entraining station, there is a whole hierarchy of military officers whose business it is to interpret the military needs to the railway officials and the railway possibilities to the military authorities. The point is that it is for the soldiers to say what they want done, for the railway officials to decide how to do it, or, it may be, to explain why it can not be done and to suggest a revision or modification of the order. On the whole the system works excellently.

* * * * * * *

Of course, Great Britain, with 12 per cent of its total population under arms, and with almost as many more engaged in the manufacture of military supplies, is in the war deeper than the United States is ever likely to be. But if the experience of the United Kingdom has any lessons for the people of the United States they would seem to be twofold: (1) Even if the Government should think fit to take over the railways it should leave the management and operation wholly in the hands of the old staff; and (2) if it does take them over, or if, without taking them over, it so far interferes with the normal traffic as to upset the customary balance between income and expenditure, it should at once come to a fair agreement with the proprietors, securing the result that they receive the normal return of income from their property, and not wait for subsequent discussion and possible litigation, with heated charges of blackmail on the one hand and confiscation on the other.

Mr. President, in this country we have not thought best to pursue the system which is pursued in England; but we have thought it essential, in the exercise of these powers regarding priorities by the National Government, to secure to the railroads immediately compensation for the service rendered and also compensation for any injury done to one line by devoting it to an unprofitable task in the interest of the public.

Mr. President, I have gone over the entire bill and these articles and speeches, involving, of course, some tedium, in order that there may be in the RECORD a complete, careful, and consistent explanation of the bill. I hope that we shall conclude the bill to-day and come to a vote; but if we do not, I trust that Senators will read over the report and will read over the RECORD of yesterday and to-day. I am sure if they do so we shall arrive at an early vote and do our part in the creation of that legislative efficiency which is just as indispensable to the Government at this time as is administrative efficiency.

Mr. REED. Mr. President, at this hour of the afternoon there are actually in the Chamber 13 Senators, I believe. There have been not more than from 4 to 10 Senators here during the last hour, and I move that the Senate adjourn.

Mr. SHEPPARD. I wish to deliver a few remarks on another subject, if the Senator from Missouri will permit me, if we can not get a vote on this question this afternoon.

Mr. NEWLANDS. I hope we will get a vote on the bill this afternoon, and I was about to suggest the absence of a quorum.

Mr. REED. I have very little hope that the Senator will be able to do so.

Mr. NEWLANDS. I appeal to the Senator not to press his motion to adjourn. Let us first test the question of a quorum.

Mr. REED. In view of the statement which has just been made by the Senator from Texas [Mr. SHEPPARD] that he desired to submit some remarks upon another matter, or upon this matter, I will withhold my motion.

Mr. NEWLANDS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. THOMPSON in the chair). The Senator from Nevada suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Johnson, Cal.	New	Smith, S. C.
Borah	Jones, N. Mex.	Newlands	Smoot
Brady	Jones, Wash.	Norris	Sterling
Calder	Kellogg	Overman	Stone
Culberson	Kendrick	Page	Sutherland
Cummins	Kenyon	Poindexter	Swanson
Curtis	King	Pomerene	Thomas
Dillingham	Knox	Ransdell	Thompson
France	Lodge	Reed	Underwood
Frelinghuysen	McCumber	Shafroth	Vardaman
Gallinger	McKellar	Sheppard	Walsh
Gerry	McNary	Shields	Weeks
Gronna	Martin	Smith, Ga.	Williams
Husting	Myers	Smith, Md.	
James	Nelson	Smith, Mich.	

Mr. SUTHERLAND. I desire to announce the absence of my colleague, the senior Senator from West Virginia [Mr. GOFF], on account of illness. I will let this announcement stand for the day.

Mr. POMERENE. I desire to announce that the senior Senator from Delaware [Mr. SAULSBURY] is necessarily detained from the Chamber on public business.

Mr. HUSTING. I desire to announce the unavoidable absence of the senior Senator from Arkansas [Mr. ROBINSON].

The PRESIDING OFFICER. Fifty-eight Senators have answered to their names. There is a quorum present.

Mr. SMITH of Georgia. Mr. President, objecting to the bill as it is drawn, I wish it distinctly understood that I do not oppose the broadest power to insure preference in transportation for all classes of military supplies and those commodities incident to their preparation or to the movement of foodstuffs incident to the support of combatants, either for the forces of the United States or of our allies. It is the scope of the bill which causes hesitation on my part and leads me to suggest a modification of the measure.

The bill as drawn applies to every line of transportation by rail or water and to every class of commodity. If it were limited to military supplies, or to things in which the Government was interested as an incident to the condition of war, the objections to the bill would be greatly removed.

Advocates of the bill have spoken of the necessity for giving these priorities as to transportation for the Army, for munitions, for foodstuffs needed for the Army, and for our allies; also for lumber and steel needed in connection with military construction or the construction of ships. Let me repeat, it is not to preferences of that kind, so far as I know, that any of us object; but the bill does not stop there. It allows classifications and preferences for all kinds of traffic and for "particular shipments," using its language. "All kinds of traffic" we understand. Any kind of commodity may be made the subject of preference under the authority given by this bill; but it goes further and applies to "particular shipments," which means discrimination between shipments of the same kind of traffic. It allows priorities as to classes and permits discrimination in a particular class. Why, Mr. President, no such power is necessary as a result of the condition of war that exists; no such power is in any sense required anywhere for the purpose of performing the obligations incident to war.

I desire to show that under this bill the discriminations are not to be made by the President; that he is barely mentioned in the bill. These priorities that are to be made, these classifications as to kinds of traffic and special shipments are to be made by somebody who will develop out of the Council of National Defense, from some one of the advisory committees located at present in the Munsey Building, but needing the largest quarters now of any organization in the city. Nobody knows who this commission will be.

The Senator from Nevada says that we must put the power of mobilizing our forces back of the President. I say, yes; and I am in favor of the Senate doing its part intelligently, not simply to abandon all responsibility for it; that is all. I want to do it, and I want to keep some of the responsibility on the Senate and the House of Representatives. I am opposed to legislative abdication; that is all.

I say that this bill, fairly construed, transfers the entire responsibility from the President to some set of men who are not even officers, and will not be officers, of the National Government. I am going to prove that by an analysis of the bill a little later on.

But before I get to that I want to emphasize and keep in our minds the breadth of the power. What is the effect of the privilege of discrimination as to transportation? What has transportation to do with the products of the soil of our country or the products of the factory? Is it of any real importance? It furnishes the very arteries of commercial life. When we stop it we commercially die.

You transfer your commercial life, therefore, to the pleasure of some unknown men, some men we may never know, and may have to fish to find out. We passed a little innocent bill allowing the Council of National Defense to have an advisory commission, a board of some sort to advise them in some way. That little provision has developed until its magnitude passes my ability of description. I only hope that none of these men who are buying for the Government are selling at the same time for themselves. I hope that none of these committees charged with the duty of arranging purchases have something themselves to dispose of.

I know a number of them are splendid men, and the head of this subordinate railroad committee I regard as one of the very best men in the land, a railroad president who really carries his office with a due regard for his responsibility to the public, and feels that railroad companies are quasi-public corporations and that he owes public duties. I refer to Mr. Harrison, a brother of the Governor of the Philippines, the President of the Southern Railway Co. I think he is a rare man, and I have the utmost confidence in him. I have stopped to mention this because he, I think, is named as the chairman of one of the committees looking after these railroad problems.

The power of these men, whoever they may be, who will take charge of these transportation questions under this bill, I think will be far greater than the powers of the Interstate Commerce Commission. I think the powers are much more far-reaching, and yet we do not say how many they shall be. We prescribe no qualifications; we fix no salary; we do not require that the Senate should even be notified who they will be, much less that they shall be subject to confirmation. There is a great deal in the purpose of this bill that appeals to me, but there is a great deal that I think is most objectionable. I think it is capable of substantial improvement.

I said that the real responsibility under this bill would rest upon some party unknown to us. I want to show that that is the meaning of the bill. I present a case. The President has named, or somebody has selected for him and there has been named, a committee of three or five men who take charge of this matter, who determine priorities in kinds of traffic, who make a priority as to particular shipments of the same kinds of traffic, saying that the shipment of lumber shall come from this point rather than from that point, determining the particular shipment of the particular kind of traffic to take preference. They order it. The railroad declines to obey, an indictment follows, and the defense set up is that the intention of the bill was that the President should pass upon each classification and the President should pass upon the particular shipment,

I am required to show that the bill could not have meant anything of the kind, and now I show why it could not have meant anything of the kind. Let us read it. On page 2, section 2, it reads:

SEC. 2. That during the continuance of the war in which the United States is now engaged the President is authorized, whenever in his judgment such action is necessary to the public security and defense, to direct that certain kinds of traffic or particular shipments, as may be determined by him, shall have preference or priority in transportation by any common carriers by railroad or water, under such arrangements, rules, and regulations as he may prescribe.

Let us stop there. The kinds of transportation spread from the Atlantic to the Pacific, from the Lakes to the Gulf. The "particular shipments" are at almost every station. We have here in the RECORD this morning, while we are considering this bill, information from the advisory council of the large number of railroad men who are now engaged in handling this subject, covering much space in the RECORD. I think the statement is made that they are spending more than $500,000 of their own money working it out. Does this bill mean that the President is to pass on the kinds of traffic? The evidence is before us, and it is physically impossible for him to do so.

I would urge before the court that Senators are men of average intelligence, and that they knew when they passed the bill that no human being could personally pass on the kinds of traffic or the particular shipments. And if they put that power on the President, they necessarily meant that he should select somebody else to look after it, for one man could not possibly do it. And if there were nothing else in the bill, I would be able to invoke the construction by the court of review that what the Congress meant was not that the President should do it himself, but that he should authorize somebody else to do it, as it was impossible for one man to do it.

Let us go on:

He may give these directions at and for such times as he may determine, and may modify, change, suspend, or annul them, and for any such purpose he is hereby authorized to issue orders direct or through such person or persons as he may designate for the purpose.

What does that mean? It means he is to attend to it personally, or let somebody else that he may designate attend to it. I say it means the President is to have some one else do the work, in the first place, because it would be physically impossible for any human being to do the work himself; that therefore it is absolutely essential for the bill to be workable to provide that the President may designate others to perform the duties.

What does this provision mean?

He may issue the orders direct, or through such person or persons as he may designate.

Does it mean that the person is simply to be designated to issue the order, the President having passed upon it, the President having adjudicated each particular instance? Then nothing was needed but a stenographer and a messenger to carry the order over to the railroad office.

But let us look further and see what the bill really contemplated that these people should be upon whom the President was to thrust the duty.

Officials of the United States, when so designated, shall receive no compensation for their services rendered hereunder.

That evidently contemplates more than a mere scribe or a messenger, but officials who are to work out the problems.

Persons not in the employ of the United States so designated shall receive such compensation as the President may fix. Suitable offices may be rented and all necessary expenses, including compensation of persons so designated, shall be paid as directed by the President out of funds which may have been or may be provided to meet expenditures for the national security and defense. All such common carriers are hereby directed and required to establish forthwith, and to maintain continuously in the city of Washington, during the period of the war, an agency by a committee of railroad officers or otherwise fully empowered by such carriers to receive on behalf of all the carriers notice and service of such orders and directions, and to arrange for the prompt compliance therewith by such carriers.

Mr. President, it is perfectly evident that this organized force that is to issue these orders is not to be mere scribes, but they are to be what necessarily they must be, men who practically do the work. It is the only feasible way in which the bill could be executed. So that I come to the conclusion that what it means is, and what we would practically have would be, a board of some kind, without official responsibility, and that they would pass upon the questions of priority, both as to the kinds of traffic and as to particular shipments. That was the suggestion which I made on yesterday, and about the correctness of which there seemed at that time some doubt. Further study of the measure satisfies me beyond any question that such must be its meaning and its practical operation.

Are we prepared to transfer this immense authority to men without official designation, without really official responsibility, and with practically no indication in the legislation upon the subject of classification, without a line in the bill indicating the kinds of traffic and the particular shipments with reference to which priorities should be given? I do believe that it is our duty to make some expression in the bill itself with reference to the kinds of traffic and particular shipments, if we intend to permit priorities. I really do not think there is any necessity for any priorities, except for those things that pertain to military affairs.

It has been suggested to me, and was on yesterday, that I ought to be able to present something in the shape of an amendment to indicate a line of classification. I have not had time. I believe that we ought to be able to obtain it from the committee that has been making classifications. I see in the CONGRESSIONAL RECORD, and I see in the report on the bill, that they have been making some classifications, and they have been giving priorities already. Nobody knows how long the war will last. Nobody knows for what length of time we subject by this bill the entire transportation of the country to control, and to unlimited control.

I think I have demonstrated that of necessity the effect of this bill is to put the control in the hands of men unknown and without real status as public officers. If it is necessary—which I do not believe—to go to the extent of placing such a power, then I think we ought to create a tribunal of three or five men, as is suggested by the president of the Baltimore & Ohio Railroad in the letter that he wrote to the Senator from Nevada. And I think we ought to indicate the nature of their duties, and I think we ought to give the privilege of appeal in some way from their action. This bill will wipe out every liability of the railroad companies to shippers. In the close of this bill it does away with every right that a shipper has now either by statute or common law. The close of the bill provides:

Any carrier complying with any such order or direction herein authorized shall be exempt from any and all provisions in existing law imposing civil or criminal pains, penalties, obligations, or liabilities upon carriers on account of any such action.

So that this bill wipes out every right of a shipper under existing law, whether statutory or common law. There is no provision that a shipper can present his claim for his damage against the Government and the Government pay it. There is no provision for any character of redress for the shipper. There is provision for redress for the carrier. There is provision that if the action interferes with the carrier's profit, the carrier can apply to the Interstate Commerce Commission within six months and obtain an adjudication of his damage *and collect* the money from the Treasury of the United States. But every right of the shippers is wiped out without any redress whatever. I hardly think the committee means to go that far. I am seeking to make a criticism that may possibly induce cooperation from members of the committee to modify some of the terms of this bill. I am trying to attract attention to some of the hardships in this bill as I see them in the hope that the good may be preserved and the evil eliminated.

Mr. GORE. Mr. President, I make the point of no quorum.

The PRESIDING OFFICER (Mr. KING in the chair). The point of no quorum is made. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Husting	New	Smith, S. C.
Borah	James	Newlands	Smoot
Brandegee	Johnson, Cal.	Norris	Sterling
Calder	Jones, Wash.	Page	Stone
Chamberlain	Kellogg	Penrose	Sutherland
Culberson	Kendrick	Pittman	Thomas
Cummins	Kenyon	Poindexter	Thompson
Curtis	King	Pomerene	Trammell
Dillingham	Kirby	Ransdell	Underwood
Fletcher	Knox	Reed	Vardaman
France	La Follette	Shafroth	Walsh
Gallinger	McCumber	Sheppard	Weeks
Gerry	McNary	Smith, Ga.	Williams
Gore	Nelson	Smith, Md.	

Mr. POMERENE. I desire to announce that the Senator from Delaware [Mr. SAULSBURY] is detained on public business.

Mr. THOMPSON. I wish to announce that the Senator from Tennessee [Mr. MCKELLAR] is detained from the Senate on official business.

The PRESIDING OFFICER. Fifty-five Senators have answered to their names. A quorum is present.

Mr. SMITH of Georgia. Mr. President, I was calling attention to the fact that under the terms of this bill, really some board, not exactly official, of an indefinite character, must perform the duties nominally assigned to the President, but really by this bill to be delegated to the board, the number of whose members is not prescribed, the qualifications not indicated, the salaries not fixed, the responsibility of whom to the Senate is removed, because they are not to be confirmed, and that they act practically with no legislative mandate or standard to indicate the way in which they are to discriminate between kinds

of traffic or particular shipments. Then I was calling attention to the fact that this bill provided that shippers lost every right by statute and at common law which before had been theirs, the same being superseded by the direction fixing priority of shipment on the part of this board.

Are we prepared to say that a board with such indefinite authority and of such an indefinite character, without limitations as to its discretion—unless it is held that the limitations are found in the suggestion in lines 16 and 17 that they must determine that the discriminations are necessary to the public safety or defense, which is doubtful, and which is itself very indefinite when applied to the many lines of transportation not connected with the public safety or the public defense—shall control the problems of shipments, and that all existing rights of shippers shall be wiped out by such a law?

Let me turn again to the close of the bill:

Any carrier complying with any such order or direction herein authorized shall be exempt from any and all provisions in existing law imposing civil or criminal pains, penalties, obligations, or liabilities upon carriers on account of any such action.

The right of the shipper is wiped out.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Montana?

Mr. SMITH of Georgia. Yes.

Mr. WALSH. I inquire of the Senator from Georgia whether any explanation has been made on behalf of the committee of what that concluding clause is intended to mean?

Mr. SMITH of Georgia. I do not recall any.

Mr. WALSH. Does the Senator understand that it was the deliberate purpose of the committee to wipe out all right of recovery on the part of the shipper?

Mr. SMITH of Georgia. I think so. I think the language is so clear that there can be no doubt about it.

Mr. NEWLANDS. Mr. President——

Mr. WALSH. I shall be very glad to be advised by the committee. My understanding about the matter was that a shipper suffering by reason of the priority given by the Government would have his right of action against the railroad company.

Mr. SMITH of Georgia. Not at all.

Mr. WALSH. And that the railroad company would have a right to recover, very properly, of the Government; but it looks as though this statute should bear the construction which is given to it by the Senator from Georgia; namely, an effort to wipe out all remedy of the shipper.

Mr. NEWLANDS. Mr. President——

Mr. SMITH of Georgia. I yield to the chairman of the committee.

Mr. REED. Mr. President, if I might interject, I call the Senator's attention to the fact that Congress has the right to regulate interstate commerce. There seems to be very little, if any, limit to that power. Now, if Congress, in the exercise of its right to regulate commerce, does repose in the President of the United States the power and authority to direct that a certain shipment shall be sent at a certain time and that a certain other shipment shall not be sent until another time, that would be a regulation of commerce; it would be the exercise of a constitutional power; and no citizen could recover against a railroad company for obeying an order constitutionally issued, limiting and regulating freight, it would seem to me.

Mr. WALSH. Mr. President, I would hardly agree with the Senator about that. I think it is beyond the power of Congress to take away from the shipper the right he would have under the contract; and I doubt whether it would be within the power of Congress to take away the right that he would have under the common law, because it seems to me that would be depriving him of property without due process of law, contrary to the provisions of the fifth amendment of the Constitution. But I should like to hear, if the Senator from Georgia will consent to yield that far, what the Senator from Nevada has to say about this matter.

I might say, by way of explanation, that I am most positively in favor of the passage of the bill in its general aspects. I think it is very necessary, and very wisely framed; but I should be very glad to be advised of the idea that prompted the inclusion in the bill of this paragraph.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Iowa?

Mr. SMITH of Georgia. Certainly. I desire to repeat that there is much about the measure to which I am favorable, and I want to help give the Government all it really requires; but I am nervous and disturbed about the extreme limit to which the bill goes.

Mr. CUMMINS. Mr. President, I can express my own opinion only with regard to the effect of the provision to which the Senator from Montana refers. I believe that it relieves the railway company from liability to a shipper if the injury to the shipper arises out of obedience to the order of the President. That, at least, was my understanding of it, and I think it is absolutely necessary that it shall be so. The whole purpose of this bill is to make the railroads of the country, for the time being, public instrumentalities—that is, governmental instrumentalities. As I said yesterday, it is one of the alternatives between taking possession of the railway property and operating it for the benefit of the Government primarily for the prosecution of the war, and directing through a proper official the operation of the property.

The principal idea, the paramount object, is this: That in the prosecution of the war the Government wants to use these railroads for the transportation of things that make for the vigorous and successful prosecution of the war. It has two ways in which it can accomplish that purpose. It can take the railways, and for the period of the war use them as Government property, as Great Britain has done, in which event it would, of course, always give to the war necessity the first opportunity in transportation. The other way is to authorize some official of the Government to give war material and war purposes priority in transportation.

If we choose the latter way, we must, of course, relieve the railway companies of the consequences which otherwise would ensue from the obedience of an order made by the President, or by one authorized by him, directing priority. That is only just and fair. It would be monstrous, it seems to me, if the President decides that the war requires that certain property be moved over a certain railway in preference to other property which has been tendered it for transportation, to say that therefore the railway company shall become responsible to a shipper whose freight is delayed in transportation.

Mr. REED. Mr. President——

Mr. CUMMINS. Just a moment. Now, whatever else may happen, the railway company ought not to suffer a liability of that kind. Whether the Government should also undertake to compensate the shipper for the loss which he sustains by reason of the order and its execution by the railway company is quite a different matter. If Congress desires to pass a law which shall compensate the shippers who are injured in that way, no one can complain; but that is not within the purview or scope of this bill. It can be taken up at any time that may seem desirable. But I repeat, that my understanding of this provision is that the railway companies are exempted from all liability imposed by existing law incurred in the execution of an order of preference or priority made by the President.

Mr. WALSH. Mr. President, the Senator from Iowa has made the provision perfectly clear, and I am entirely satisfied with his explanation. I want to ask him another question, however. That being the case, the railroad company being entirely relieved from any liability on account of compliance with the order, how can the railroad company suffer anything, and what kind of injuries could it sustain payment for which is provided for?

Mr. CUMMINS. Only this: Under the interstate commerce law, it is the duty of every common carrier to transport property without discrimination; and I assume that if a carrier selects certain kinds of property to which it gives priority or preference in transportation, it might thereby violate that provision of the law, and would become responsible to any one who was injured by the violation of the law. Under this bill, if it passes, were the President to order that priority, then the railway company is relieved of the liability which otherwise would be imposed upon it. It is not relieved from any liability except the liability which grows out of the preference or priority.

The bill has been amended now so that that proposition is made perfectly clear.

Mr. WALSH. Yes; but, if the Senator will pardon me, that is just the point of my question. The railroad company being entirely relieved so far as the shipper is concerned on account of the priority which it gives pursuant to the order, yet elaborate provision is made here for compensation to the railroad for whatever damage it may sustain by reason of compliance with the order. Now, what damage can it sustain? There is a further provision——

Mr. CUMMINS. I would not undertake, of course, to go through the whole range of possibilities, but I can instance one which comes to my mind.

Suppose that a railway company is required to use all its facilities for a given time in the transportation of coal—a product which is carried at a very low rate, and, as is asserted by carriers, without much profit. In so doing it must refuse to carry or fail to carry merchandise of greater value, which has a higher rate for transportation. In that arrangement of traffic or dislocation of traffic the railway company may be injured. In other words, it may be prevented from having the opportunity of earning a profit, whereas otherwise it might earn a profit.

Mr. WALSH. I appreciate that; but let me inquire of the Senator, now, whether those conditions would not be taken into consideration in fixing the rate of carriage for the thing to which priority is thus given?

Mr. CUMMINS. I think that could be done. It could be taken care of in one of two ways—either in that way, or in the way that is provided here. Under this bill, in the first instance, the railway company or carrier is compelled to transport the product at the established rate; that is, the rate that is provided for in the tariffs which have been filed with the Interstate Commerce Commission.

Mr. WALSH. But that is subject to special change, as I understand.

Mr. CUMMINS. And it receives that rate for it; and then, if there is injury on account of the things I have suggested, or like things, it may present its claim for damages before the Interstate Commerce Commission. Now, if it were thought better, the Interstate Commerce Commission could fix an adequate rate in advance; but my judgment is that it is better to leave the adjustment of the damage or injury to the Interstate Commerce Commission after the carriage has been had.

Mr. WALSH. It is really, then, the equivalent of fixing a special rate for the particular commodity.

Mr. CUMMINS. Precisely; I think it is.

Mr. REED. Mr. President, I might suggest this by way of illustration; it may throw a little light on the matter. I want to say that the Senator from Georgia was called to the telephone, and I make this suggestion in order that he may not lose the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Missouri.

Mr. REED. Suppose a trainload of cattle is being shipped from a point in the West to a point in the East; that an emergency arises, and that the President or some board in the exercise of the authority here conferred should order that train sidetracked and all traffic suspended upon the road for a period of time, long or short, whereby two things would result: First, the cattle would be enormously damaged by shrinkage, that damage falling either upon the owner or upon the railroad company. Second, the railroad company itself suffers a distinct damage in the total disarrangement for the time being of the general traffic of the railroad; and that, indeed, is referred to almost specifically in the bill, where the language appears in the clause relating to damages:

Provided, That if by reason of giving preference or priority in transportation under an order or direction authorized hereunder, or by reason of disarrangement of traffic—

I am reading from line 17, on page 4—

caused by giving such preference or priority, any carrier shall suffer injury or damage, the Interstate Commerce Commission shall, upon application by the carrier and upon notice to the Attorney General of the United States, and after due hearing, determine the amount thereof, which amount shall be paid by the Secretary of the Treasury out of any funds in his hands not otherwise appropriated.

Manifestly the language of this bill as it now exists is intended to protect the railway company against such damage as it may suffer; but it seems to me perfectly plain that it deprives the shipper of any possible claim for damage. For instance, in the illustration I just used the man is shipping a trainload of cattle from St. Paul, Minn., to Chicago, Ill. The train is sidetracked by order of the Government for three or four days in order to move troops. Thereupon the owner of the cattle sues the railroad company for damages, alleging that the railroad company had contracted to carry his cattle promptly from St. Paul, Minn., to Chicago, Ill.; that they sidetracked his cattle, and that the shrinkage had damaged him to the extent of a large sum of money. Having made that allegation in the court, the railway company, by way of answer, would plead that they did make the contract with him; they would confess the contract, and avoid it by saying that the President of the United States, under the authority of an act of Congress, had ordered them to sidetrack all that train, and to hold it at a given place, in order that the track might be clear, and that the act of Congress had imposed pains and penalties upon them, and had prescribed that it was—

The duty of any and all the officers, agents, or employees of such carriers by railroad or water to obey strictly and conform promptly to such orders, and failure knowingly and willfully to comply therewith, or to do or perform whatever is necessary to the prompt execution of such order, shall render such officers, agents, or employees guilty of a misdemeanor, and any such officer, agent, or employee shall, upon conviction, be fined not more than $5,000, or imprisoned not more than one year, or both, in the discretion of the court.

Having pleaded that, the company would ask to be discharged of any liability, for that it had only obeyed the order of the President issued pursuant to the authority of the law passed by Congress controlling interstate commerce, and I think the plea would undoubtedly have to be admitted by the court.

Mr. SMITH of Georgia and Mr. CUMMINS addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. SMITH of Georgia. I yield to the Senator from Iowa.

The PRESIDING OFFICER. The Senator from Georgia yields to the Senator from Iowa.

Mr. CUMMINS. Mr. President, speaking again only for myself, I have no hesitation in saying that the Senator from Missouri [Mr. REED] has correctly stated the outcome or consequences of the transaction he mentions. I believe it was the purpose of the committee—and it certainly is the effect of this bill—to relieve the railway company from liability to the shipper under the conditions stated by the Senator from Missouri. I would feel that I was participating in a flagrant wrong if I did not attempt to relieve the railway company of liability in such a case as that.

Of course, the instance is not likely to occur. It is not probable that any officer of the Government will arrest a trainload of cattle midway between the point of shipment and the point of destination; but, if the instance should occur, it would only be under imperious necessity. If it became necessary for the safety of the country that the railway company transporting the trainload of cattle should give its facilities to the United States for the transportation of troops, or for any war material for the safety of the country in the prosecution of the war, the cattle ought to be detrained and ought to be delayed until the exigency should have passed.

The Senator from Missouri, however, it seems to me, indicates what may be from his standpoint a weakness in the bill. I do not think it is a weakness, but it is a thing that we ought to consider, at any rate—namely, whether under those circumstances the Government ought to make some provision for compensation to the shipper who is thus injured, who *suffers* the consequences of giving the Government of the United States the superior right over the railways of the country; and I shall not be found in opposition to such a proposal, if it be made, although I do not think that this bill is the proper place in which to make it.

Mr. REED. Mr. President, will the Senator permit me to say a few words?

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Missouri?

Mr. CUMMINS. I do.

Mr. REED. Without committing myself in any way on the question which the Senator has just mentioned, I have not up to this time meant to do more than to express my opinion as to the legal consequences of this particular bill as it now stands.

Mr. SMITH of Georgia and Mr. WALSH addressed the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. WALSH. Mr. President, will the Senator from Georgia yield to me?

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Montana?

Mr. SMITH of Georgia. I yield to the Senator from Montana.

Mr. WALSH. I should like to inquire of the Senator from Georgia—for he is discussing in an interesting way this most important feature of the bill—just what he thinks about the case put by the Senator from Missouri [Mr. REED], who has presented to us in very concrete form the condition. Under those circumstances, what does the Senator from Georgia think; should the liability of the railroad company to the shipper be preserved under the bill?

Mr. SMITH of Georgia. I do not think that the liability of the railroad to the shipper should be preserved when we compel the railroad company to abandon its duty to the public under the penalty of putting its officers in jail. The railroad company must be relieved; but I do insist that cases may arise where we ought, even in this bill, to provide that the shipper ought not to be ruined. I think the bill is defective in that it does not go further and provide some remedy with reference to the rights of the shipper.

I think it is defective in another respect along this same line. I have undertaken to show that the duties nominally placed upon the President can not possibly be performed by him;

that it is a vast responsibility, this classifying kinds of shipments and the shipments themselves; that it must be performed by some board to be created by the President. If it is to be performed at all, if it is necessary that these duties shall be performed and this privilege of unlimited discrimination shall exist, we ought ourselves to provide for some distinct board to be named by the President and confirmed by the Senate, and known to the public, who will consider these questions, in order that the parties in interest may know who are passing on their rights, and shippers should have a chance to go to the board and to be heard.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Montana?

Mr. SMITH of Georgia. Yes.

Mr. WALSH. Is not all that really already done, let me inquire of the Senator?

Mr. SMITH of Georgia. No.

Mr. WALSH. We have created the advisory commission and the Council of National Defense, which is a body existing by virtue of law. We have authorized that body to appoint subcommittees, which exist by virtue of law. One of those subcommittees, the committee on railway transportation, exists by virtue of law. So we know that these five gentlemen occupy their positions not outside of the law at all, but under the law. Of course we agree with the Senator that the President of the United States will not establish these rules and regulations; he will not undertake to oversee every shipment; there is no doubt in the world that this board will run the thing. Now, what is the objection the Senator has to that?

Mr. SMITH of Georgia. I will answer the Senator just by practical experience that I have been through. I have been called on during the last three or four weeks by constituents whose business is located somewhere between the advisory council, the subcommittees and officers of the Quartermaster General's Department. It is difficult to find where to go or who has authority. You go to one person, and he is waiting for advice; and you go somewhere else, and they are only advisory. You go to the colonel from the Quartermaster's Department of the Army, and he is waiting to get the opinion of somebody else. The law does not name, the statute does not say, when or how the opinions are to be given. It is so indefinite a responsibility that it is difficult to obtain satisfaction.

When this great question, involving the transportation of the country and the rights of all shippers, is to be considered and passed upon by some board I think this board should have authority fixed by legislative action. The Advisory Board disclaims all authority. "We can only advise," they tell us.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Iowa?

Mr. SMITH of Georgia. Yes.

Mr. CUMMINS. I think the Senator from Georgia must be mistaken about that—I mean about his view of not being able to find anybody who is responsible. I am not authorized to defend this administration, and I do not want to be thought impertinent in assuming a function that nobody has conferred upon me; but the Senator from Georgia must remember that we are passing from a country that has been expending less than a billion and a half dollars a year to a country which is expending eight billion dollars a year; and that there will be a great deal of confusion, a great deal of inefficiency in the transition, is as certain as the lapse of time. Those of us who are inclined to be critical must remember the immensity of the task which this Government has assumed. I expect to see a great deal of wastefulness; I expect to see a great deal of our business done in a way that will not commend itself to the people of the country. It is impossible for us to conscript anybody but human beings; and human nature is so frail that it can not encompass successfully in a short period of time the tremendous duties which have been imposed upon the country.

Mr. VARDAMAN. Mr. President, if the Senator will pardon me, I should like to ask him why Congress can not conscript anything except human beings? Why can not it conscript money in this emergency?

Mr. CUMMINS. That is just what I am saying. We can conscript money; but human beings must expend the money. When we enlarge in the twinkling of an eye the scope of government so enormously, we must expect this confusion to which the Senator from Georgia has referred.

As a matter of law, the Secretary of War is the responsible person in the case which the Senator puts. The Quatermaster General is the person, and the only person, who has any authority to make contracts of the kind suggested by the Senator from Georgia; but when you think of what is now required of the Quartermaster General when he comes to make contracts for the housing and the equipment of millions of men, I have the greatest toleration for the confusion and uncertainty which exist. He expects aid, and we attempted to give him that aid when we passed the law for the establishment of the Council of National Defense; we attempted simply to give him an advisory board; and it is not wonderful or strange that he waits until he receives the advice of that board before he acts.

I am saying so much because I do not want the Senator from Georgia to base his opposition to this bill upon the ground that we are giving any one man more than he can do. I know the President of the United States can not do personally what he is authorized to do in this bill. I know that he must delegate the responsibility to some board or some other person; and my only hope is that he will select the wisest and the strongest man or body of men in the United States to exercise the authority or to help him exercise the authority which we are granting in this measure. I believe he will. If he does not, he must suffer the criticism which will inevitably follow.

Mr. SMITH of Georgia. Well, Mr. President, I am not concerned about criticisms of the President. I am considering neither criticisms nor praise of the President. I am considering this question from what I believe is the standpoint of the shippers of the country. What I meant by referring to the advisory council as I did was this: They are an indefinite body of men under the statute; they have not any authority under the statute. I think the majority of them are doing the very best they can, and doing it well. I think the Secretary of War is doing the very best that a man can, and so are many of the men under him. I realize fully the enormous increased responsibility placed upon them, and I agree with the Senator from Iowa that it would be superhuman for them to execute these responsibilities without some blunders and without some loss.

Mr. NEWLANDS. Mr. President——

Mr. SMITH of Georgia. I do not desire to yield now. I wish to finish the statement, if the Senator will excuse me for a moment.

The PRESIDING OFFICER. The Senator from Georgia declines to yield.

Mr. SMITH of Georgia. In just a moment I will yield.

What I was calling to the attention of the Senate was that these indefinite boards, these indefinite advisers, do not occupy a relation toward the public which ought to be occupied by men who are to pass upon the problem of transportation with authority to determine what commerce shall move and what lose the privilege. They are not named as officers in a statute; they are not formally recorded as officers anywhere, and when it is desired to secure their names nobody is under obligation to furnish them. What I want is, if we must give this power to somebody, if there must be some man to exercise these vast discretionary powers, that we name the men as public officers and have them known as such with definitely defined duties. If a board of men is to have the privilege of saying whether lumber or fruit and melons shall be hauled from south Georgia, and the fruit and melons rot where the farmers have produced them, I want a responsible board, known to all, charged by law with the responsibility of deciding the question, and I want a chance for my constituents to present their case to them, and to have a hearing.

Under this bill the President can not hear anybody. It would be inhuman to expect him personally to investigate these problems, and nobody does expect him to do so. If some board is to investigate them, let us prescribe the number of the board in the bill; let us give them official responsibility and know who they are; let them be confirmed by the Senate, and let them be situated where men whose interests are involved can be heard. Under this indefinite plan there is practically no chance for those whose rights are to be sacrificed, and no definite responsibility rests upon those who will really act.

Surely the rights of shippers should not be denied by men unknown and to whom shippers have no opportunity to present grievances.

Mr. KELLOGG. Mr. President——

Mr. SMITH of Georgia. The Senator from Nevada [Mr. NEWLANDS] wanted to interrupt me first. I have finished with the thought I had in mind, and now yield to him.

Mr. NEWLANDS. Mr. President, the Senator speaks of an indefinite board. Does he mean indefinite in its membership—that is, as to the number of persons who constitute it—or indefinite as to its duties and responsibilities?

Mr. SMITH of Georgia. Both.

Mr. NEWLANDS. Well, now, let me explain as to that. This particular committee of railway executive officials—they call it the "railway war board"—is a board appointed by the

railways. They are one of the subordinate committees of the advisory council. They were invited by the Council of National Defense to devise a system, and Secretary Lane offered the following resolution:

Resolved, That Commissioner Willard be requested to call upon the railroads to so organize their business as to lead to the greatest expedition in the movement of freight.

I understand it has been the purpose of the Council of National Defense in the organization of the various subcommittees of the advisory board to create boards which will, in the most expeditious, in the most economical, and in the most efficient way, meet the demands of the Government and of particular industries in the performance of certain functions. Hence, we will find that the industries of the country have been divided up and put under the jurisdiction of the various subcommittees, the members of which are noted men in the various industries, who are supposed patriotically to cooperate with the Government in securing the highest efficiency and economy.

It is true that every such board will be subject to the suspicion that, inasmuch as they have knowledge of the particular industry and are interested in the particular industry with which they are identified, they may seek advantageous bargains from the Government; but, as I understand, the purpose of this is to enlist the patriotic effort of every industry, and so far as I am concerned I believe that that is the best way of appealing to every industry—to ask their advice and cooperation, instead of dealing with them simply at arm's length.

Now, if the Senator will pardon me just a few moments longer, with reference to this particular railroad committee which was called into existence practically by the Council of National Defense, in the speech of Mr. Howard Elliott he states:

After conference and deliberation and after a very inspiring address from Secretary Lane, we passed this resolution, which is our platform: "*Resolved*, That the railroads of the United States, acting through their chief executive officers here and now assembled, and stirred by a high sense of their opportunity to be of the greatest service to their country in the present national crisis, do hereby pledge themselves, with the Government of the United States, with the governments of the several States, and one with another, that during the present war they will coordinate their operations in a continental railway system, merging during such period all their merely individual and competitive activities in the effort to produce a maximum of national transportation efficiency. To this end they hereby agree to create an organization which shall have general authority to formulate in detail and from time to time a policy of operation of all or any of the railways, which policy, when and as announced by such temporary organizations, shall be accepted and earnestly made effective by the several managements of the individual railroad companies here represented.

They responded to the patriotic demand of Secretary Lane and passed this resolution and they have become as a committee a part of this advisory commission.

The Senator from Montana [Mr. WALSH] is under a misapprehension in assuming that this board will act as the arm of the President. Not so. The President gives the orders; the railway war board receives them, and obeys them. The railway war board, as a part of the advisory commission, is charged with the duty of showing what would be the most satisfactory way of accomplishing the purpose of the President and the purpose of the Government; but its duty is as a servant to obey the orders of the President. It is not made the board which issues the direction.

Mr. REED. Mr. President——

The PRESIDING OFFICER (Mr. GERRY in the chair). Does the Senator from Nevada yield to the Senator from Missouri?

Mr. NEWLANDS. With the permission of the Senator from Georgia, I yield.

Mr. REED. That is a very interesting statement the Senator is making, and I want to get his mind back to it. Does he mean to say that the order or regulation that recently went forth by which cars shipped west loaded were to be sent back empty really originated with the President? Was that not in fact the plan that was worked out by the railroad men themselves, and does it not necessarily follow that the only men who can make these orders regulating transportation in the manner provided in this bill must be the practical railway men themselves, and hence that the regulation or scheme of regulation will originate with them be passed up to the President and by him sanctioned and returned to them? Does not that necessarily follow?

Mr. NEWLANDS. I can not say what particular process was pursued in that case, because I do not know, but I shall assume that it was the natural process. I assume that the Council of National Defense and the President, having first aroused the patriotic instincts of these organizations and having permitted them to organize a committee for helpful effort in connection with the Government, would say to them, "Here is our problem; now give us your advice." But the President himself is to determine whether or not their advice is good, and he is, of course, to accept it or to modify it as he sees fit. One purpose of this bill is not only to give him the power to give the order, but to get the aid of the best talent of the country, not men necessarily employed by railroads, but independent men, to act as between him and this railroad committee, so that every suggestion of the railroad committee can be thoroughly sifted.

I wish to state that this organization does not mean that this executive committee of the railroads is a Government board at all for the execution of anything. They are to give no orders. They simply stand there ready to give their advice. They receive orders, they obey orders, they execute orders. The order is given by the President of the United States, with the aid of the competent men that this bill gives him, and whether he will organize those competent men into a board or not I do not know.

Mr. NELSON. Mr. President, will the Senator yield?

Mr. NEWLANDS. Mr. President, I yield to the Senator from Minnesota.

Mr. NELSON. There is one thing, Mr. President, that strikes me about this bill. It provides compensation for the railroad companies for disarranging their traffic by this Executive order, does it not?

Mr. NEWLANDS. Yes.

Mr. NELSON. And provides for the payment. But it makes no provision at all for a shipper. Why should not his damage arising from the disarrangement of the traffic be taken care of in the same manner as that of the railroad company? It seems to me that is a great defect in this bill which ought to be remedied. Certainly the shipper ought to be put on a par with the railroad company.

Mr. NEWLANDS. Mr. President, I believe, in the first instance, that the injury to the shippers is very much exaggerated. I believe that the railroads will endeavor so to coordinate and to make their instrumentalities efficient as to meet the demands of the Government, and yet at the same time meet the demands of their patrons. Individually, I should have no objection at all to the consideration of legislation that would give that right to the shippers for compensation from the Government.

Mr. NELSON. It ought to be in the same bill, and compensation ought to be provided in the same manner, so that they can be paid as promptly as the railroad companies are paid. The traffic of the shippers is likely to be damaged far more than that of the railroads.

Mr. NEWLANDS. I think that a large number of the injuries that individuals will receive in this gigantic war will practically be damnum absque injuria, and I believe that they will have to be patriotically suffered by the masses of the people.

I am intent on prosecuting the war, and I am not inclined to go off into every line of ascertainment of every possible or minute injury to the individual or the citizen when we are engaged in making a gigantic national effort to save the world and save the country.

Mr. NELSON. Why not, then, if the Senator is actuated by such patriotic motives, apply it to the railroads, and eliminate from the bill this plan of compensation to them? Let patriotism enter the soul of the railroads, as well as of the shippers.

Mr. NEWLANDS. I will state to the Senator that there is a reason for this. We know very well that this bill may work no inconsiderable damage to individual roads, and we also know that, as a matter of fact, the railroads are great public instrumentalities, and their ability to serve the country rests upon their receipt of income, and that if they are compelled to render service without compensation a great injury will be done, not simply to them but to the country itself, in the impairment of the efficiency of its public instrumentalities.

Mr. President, it is easy enough to drag us off in the pathways of diversion from our real purpose in an effort to satisfy every possible and minute claim of a citizen or a corporation or an individual for damages suffered from this war. I do not want to be diverted into those pathways. We have been diverted too much in our debates thus far. So far as I am concerned, I wish to keep my eye upon the central purpose, and that is aid to the President as Commander in Chief of the Army and the Navy to prosecute this war efficiently. I will be glad to consider in other bills, when they can be considered more deliberately, these other questions so as to insure justice to all. I think the first thing to advance is the security and safety of the Republic, and I am for that, and am confining my effort to legislation having that end in view. I prefer not to be diverted from that purpose by the consideration that the normal equilibrium may be affected here and there.

Mr. VARDAMAN. Will the Senator from Georgia permit me to bring Senators into the Chamber to hear this illuminating debate? It is a very important question, and I therefore raise the point of no quorum so that Senators may attend and hear this debate.

Mr. SMITH of Georgia. It is the Senator's right to do that without permission.

Mr. VARDAMAN. I have not the right to do it when the Senator from Georgia has the floor.

Mr. BRANDEGEE. Yes; you have.

Mr. VARDAMAN. The Chair has ruled repeatedly that to do that would lose the floor to the Senator from Georgia.

Mr. BRANDEGEE. No; that is not the rule.

Mr. VARDAMAN. Then I will make the point of no quorum.

The PRESIDING OFFICER. The Senator from Mississippi makes the point of no quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Borah	Hale	Newlands	Smith, S. C.
Brandegee	James	Norris	Smoot
Calder	Johnson, Cal.	Overman	Stone
Chamberlain	Jones, Wash.	Page	Sutherland
Culberson	Kellogg	Pomerene	Thomas
Cummins	Kendrick	Ransdell	Thompson
Curtis	Kenyon	Reed	Underwood
Fletcher	Knox	Robinson	Vardaman
France	Lewis	Sheppard	Walsh
Gerry	McNary	Smith, Ga.	
Gore	Martin	Smith, Md.	

Mr. POMERENE. I have been requested to announce that the Senator from Delaware [Mr. SAULSBURY] is detained on public business.

Mr. THOMPSON. I desire to announce that the Senator from California [Mr. PHELAN] and the Senator from Tennessee [Mr. MCKELLAR] are detained from the Senate on official business.

The PRESIDING OFFICER. Forty-two Senators having answered present, there is not a quorum present.

Mr. NEWLANDS. Mr. President, it is near the regular hour of adjournment, and I will not press the bill further for consideration this afternoon. Therefore I move that the Senate adjourn.

The motion was agreed to; and (at 3 o'clock and 42 minutes p. m., Saturday, June 9, 1917) the Senate adjourned until Monday, June 11, 1917, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

SATURDAY, *June 9, 1917.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Thy blessing, Almighty God our Heavenly Father, attend, we pray Thee, these Representatives of a great people; that their legislative acts may be to uphold the ideals of our Republic, handed down by our fathers and sustained by their sons through the years that have come and gone. Grant that the work of this Congress may be to uphold and safeguard our soldiers in the mission that has been laid upon them, so far as human ingenuity and the light of Heaven can guide them; that order may be brought out of chaos, peace out of war, to the eternal good of mankind, in the spirit of the Master. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 1852. An act authorizing the Secretary of War to transfer to the city of New York the title of the United States to certain lands in Kings County, State of New York.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 2133) to amend an act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, and for other purposes.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 995) to authorize the issue to States and Territories and the District of Columbia of rifles and other property for the equipment of organizations of home guards.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent that the bill H. R. 4050, a similar House bill amending the act to authorize the establishment of a Bureau of War-Risk Insurance, be laid on the table.

The SPEAKER. The gentleman from Georgia asks unanimous consent that the similar House bill be laid on the tabfe. Is there objection?

There was no objection.

CHANGE OF REFERENCE—H. R. 4504.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent that reference of the bill (H. R. 4504) to amend an act entitled "An act making an appropriation for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved March 3, 1899, be changed from the Committee on Rivers and Harbors to the Committee on Interstate and Foreign Commerce.

The SPEAKER. The gentleman from Georgia asks unanimous consent that reference of the bill H. R. 4504 be changed from the Committee on Rivers and Harbors to the Committee on Interstate and Foreign Commerce. Is there objection?

Mr. MCARTHUR. Mr. Speaker, I reserve the right to object.

Mr. SMALL. Mr. Speaker, if unanimous consent is asked, I object, and I ask unanimous consent to proceed for one minute.

Mr. ADAMSON. Then, Mr. Speaker, by direction of the Committee on Interstate and Foreign Commerce, authorized this morning unanimously, I move that reference of the bill H. R. 4504 be changed from the Committee on Rivers and Harbors to the Committee on Interstate and Foreign Commerce.

The SPEAKER. The question is on the motion of the gentleman from Georgia that reference of the bill be changed from the Committee on Rivers and Harbors to the Committee on Interstate and Foreign Commerce. The gentleman from North Carolina [Mr. SMALL] asks unanimous consent to proceed for one minute. Is there objection?

Mr. ADAMSON. Mr. Speaker, this is not debatable.

The SPEAKER. But the gentleman asks unanimous consent to be permitted to proceed for one minute.

Mr. ADAMSON. Mr. Speaker, reserving the right to object——

The SPEAKER. If the gentleman desires to object, he should object.

Mr. ADAMSON. I will not object, but I shall ask unanimous consent to proceed for one minute in reply.

The SPEAKER. Very well. The gentleman from North Carolina asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. SMALL. Mr. Speaker, I introduced this bill and it was referred to the Committee on Rivers and Harbors. I simply wish to say that I think there is no question but that the Committee on Rivers and Harbors has jurisdiction, and, supposing the matter would be decided by the Speaker, I spoke to the Speaker and asked for time in which to file a brief upon the matter, stating that I would do so after the river and harbor appropriation bill is disposed of. This question of the development of water power on navigable streams—and that is the extent of this bill—was formerly considered entirely by the Committee on Rivers and Harbors, and only of late years has jurisdiction been assumed by the Committee on Interstate and Foreign Commerce. It seems to me that this is an unusual proceeding. I think the jurisdiction of the Committee on Rivers and Harbors of this question ought to be sustained by the House.

The SPEAKER. The gentleman from Georgia asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. ADAMSON. Mr. Speaker, the only basis for the Committee on Rivers and Harbors making the claim that it has is that in 1899, before we passed the general dam act, there was placed in a river and harbor appropriation bill a section about obstructions in rivers, and we of the Committee on Interstate and Foreign Commerce induced the chairman of the Committee on Rivers and Harbors to couple with it a provision that they might build these dams inside of States in which the stream was entirely located without further consent of Congress. That is all that was ever done by the Committee on Rivers and Harbors about water power used in the generation of electricity. Soon afterwards the gentleman from Illinois [Mr. MANN] and I took up the subject of general dam legislation and have prosecuted it ever since. It has never been before the Committee on Rivers and Harbors since that time to which I referred, and every proposition in this bill is general dam legislation, and most of it has been repudiated by this House on three different occasions.

The SPEAKER. The question is on the motion of the gentleman from Georgia to discharge the Committee on Rivers and Harbors from further consideration of the bill and refer the same to the Committee on Interstate and Foreign Commerce.

Mr. MOORE of Pennsylvania. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MOORE of Pennsylvania. Is this the proper time under the rules to make the motion that the gentleman from Georgia has made?

The SPEAKER. It is.

Mr. MOORE of Pennsylvania. I understood the rule to provide that the change of reference should be made immediately after the introduction of the bill.

The SPEAKER. The gentleman is mistaken about that. This is the proper time. The question is on the motion of the gentleman from Georgia.

The question was taken; and on a division (demanded by Mr. MCARTHUR) there were—ayes 62, noes 19.

Mr. MCARTHUR. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Oregon makes the point of order that there is no quorum present. Evidently there is not. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 222, nays 47, answered "present" 11, not voting 150, as follows:

YEAS—222.

So the motion was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. BOOHER with Mr. TREADWAY.

Mr. GARNER with Mr. FORDNEY.

Mr. DENTON with Mr. COOPER of Ohio.

Mr. SHOUSE with Mr. VOLSTEAD.

Mr. TAGUE with Mr. KENNEDY of Rhode Island.

Mr. MARTIN of Illinois with Mr. SIEGEL.

Mr. DOOLING with Mr. SMITH of Michigan.

Mr. HULL of Tennessee with Mr. HILL.

Mr. STEPHENS of Nebraska with Mr. SLOAN.

Mr. TALBOTT with Mr. BROWNING.

Mr. FLYNN with Mr. DAVIS.

Mr. DEWALT with Mr. FRANCIS.

Mr. DALE of New York with Mr. HASKELL.

Mr. DIXON with Mr. FOSS.

Mr. LITTLEPAGE with Mr. COOPER of West Virginia.

Mr. LOBECK with Mr. GRAHAM of Pennsylvania.

Mr. BELL with Mr. HAMILTON of New York.

Mr. MCANDREWS with Mr. HAYES.

Mr. KEY of Ohio with Mr. FULLER of Massachusetts.

Mr. CLARK of Florida with Mr. FULLER of Illinois.

Mr. MAHER with Mr. HULL of Iowa.

Mr. SCULLY with Mr. MCKINLEY.

Mr. THOMAS F. SMITH with Mr. POWERS.

Mr. LEE of Georgia with Mr. GRIEST.

Mr. DICKINSON with Mr. FESS.

Mr. WALTON with Mr. PETERS.

Mr. SULLIVAN with Mr. PAIGE.

Mr. LONERGAN with Mr. KAHN.

Mr. RAINEY with Mr. LANGLEY.

Mr. ESTOPINAL with Mr. BACHARACH.

Mr. GLASS with Mr. DUNN.

Mr. KEATING with Mr. FULLER of Massachusetts.

Mr. STEVENSON with Mr. MOORES of Indiana.

Mr. NICHOLLS of South Carolina with Mr. WINSLOW.

Mr. BRUCKNER with Mr. WILLIAMS.

Mr. GOODWIN of Arkansas with Mr. SNYDER.

Mr. FIELDS with Mr. COSTELLO.

Mr. GALLIVAN with Mr. DYER.

Mr. EAGAN with Mr. WHEELER.

Mr. HAMILL with Mr. FREEMAN.

Mr. KETTNER with Mr. GARLAND.

Mr. EAGLE with Mr. RAMSEY.

Mr. HARRISON of Virginia with Mr. DRUKKER.

Mr. CALDWELL with Mr. WALDOW.

Mr. GODWIN of North Carolina with Mr. ROBBINS.

Mr. POU with Mr. KIESS of Pennsylvania.

Mr. LINTHICUM with Mr. HUSTED.

Mr. MAYS with Mr. IRELAND.

Mr. PARK with Mr. KEARNS.

Mr. CAREW with Mr. ROGERS.

Mr. GRIFFIN with Mr. RODENBERG.

Mr. RIORDAN with Mr. MCCULLOCH.

Mr. SAUNDERS of Virginia with Mr. KENNEDY of Iowa.

Mr. RUCKER with Mr. HUTCHINSON.

Mr. SHALLENBERGER with Mr. KRIEDER.

Mr. COADY with Mr. ROWLAND.

Mr. SISSON with Mr. MCKENZIE.

Mr. CHARLES B. SMITH with Mr. KELLEY of Michigan.

Mr. HEFLIN with Mr. FOCHT.

Mr. HOUSTON with Mr. HEATON.

Until end of session:

Mr. STEELE with Mr. BUTLER.

Mr. FULLER of Illinois. Mr. Speaker, I voted "aye." I am paired with the gentleman from Florida, Mr. CLARK, and I wish to withdraw that vote and answer "present."

The name of Mr. FULLER of Illinois was called, and he answered "Present."

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present; the Doorkeeper will unlock the doors.

LEAVES OF ABSENCE.

By unanimous consent, leaves of absence were granted as follows:

To Mr. BELL, indefinitely, on account of illness in his family.

To Mr. SHERLEY, for one week, on account of important business.

To Mr. HULL of Iowa, indefinitely, on account of death in his family.

EXTENSION OF REMARKS.

Mr. GORDON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an article from the Louisville Evening Post of June 7, entitled "Prussia crushed German liberty."

The SPEAKER. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. SEARS. Mr. Speaker, I ask unanimous consent to have printed in the RECORD two editorials, one appearing in the Evening Star, of Washington, on June 7, 1917, entitled "The men in gray," and one appearing in the Washington Times of the same date on "The men from Dixie."

The SPEAKER. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. CARY. Mr. Speaker, I wish to ask unanimous consent to extend my remarks in the RECORD on the registration in the city of Milwaukee.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. LITTLE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a Memorial Day oration delivered by Congressman ERNEST LUNDEEN, of the Twelfth Minnesota Volunteers, at the Congressional Cemetery, Washington, D. C., on May 30, 1917.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an article from the Evening Sun, of New York City, entitled "A hundred thousand aeroplanes are needed from America for the western front."

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection? [After a pause.] The Chair hears none.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to be permitted to extend my remarks in the RECORD by printing some resolutions adopted by the Farmers' Union of Virginia in reference to the nitrate plant.

The SPEAKER. The gentleman from Virginia asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

APPROPRIATIONS FOR THE ARMY.

Mr. DENT. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 100, making the appropriations in the annual Army appropriation bill immediately available.

The SPEAKER. The gentleman from Alabama asks unanimous consent for the present consideration of House joint resolution 100, which the Clerk will report.

The Clerk read as follows:

House joint resolution 100, to make immediately available the appropriations provided for under an act making appropriations for the support of the Army for the fiscal year ending June 30, 1918, and for other purposes, approved May 12, 1917.

Resolved, etc., That the appropriations provided for under an act making appropriations for the support of the Army for the fiscal year ending June 30, 1918, and for other purposes, approved May 12, 1917, be, and the same are hereby, made immediately available: *Provided*, That no appropriation contained in said act shall continue for a period longer than two years from the date of the approval of this joint resolution.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, I think with the gentleman from Alabama [Mr. DENT] that it may be desirable to make the appropriations in the Army bill immediately available. I would have no objection to it if it were not for another parliamentary situation. We passed in the House here the other day a motion sending back to conference the big Army bill, a deficiency bill, appropriating in the neighborhood of $3,000,000,000. We asked for a conference with the Senate. That was several days ago. We have received no word from the Senate stating that they agreed to the conference or that they have taken any other action upon this large Army bill. Now, this bill is mere "chicken feed" compared with the other. I propose, if I can, and as far as I can, to call attention to the delay in disposing of the big Army bill, while we are talking about making available a few days earlier the little appropriations in the Army bill, and in order to emphasize it I am going to object to the immediate consideration of this resolution.

Mr. DENT. I hope the gentleman will reserve it.

Mr. MANN. I reserve the objection.

Mr. DENT. Mr. Speaker, the statement made by the gentleman from Illinois is in and of itself a conclusive reason why this resolution ought to be adopted. If the so-called big urgent deficiency bill for the support of the Army and the Navy had been passed it would not be necessary to have this joint resolution. The Committee on Military Affairs reported this joint resolution about 10 days ago with a unanimous favorable report. I have been waiting during that period for the conferees on the big Army and Navy bill to agree. In the meantime, the Secretary of War and the Quartermaster's Department have been urging me to bring up this resolution, because there are a great many contracts already, particularly for clothing, that have been filled by the contractors, and they have been waiting for days and weeks for their money. And I have actually been told that some of them are on the verge of bankruptcy unless the bona fide contracts which they made with the Government and which they have fulfilled are carried out on the part of the Government. And that is the object of this resolution.

Mr. GREENE of Vermont. Will the gentleman yield?

Mr. DENT. I yield to the gentleman from Vermont.

Mr. GREENE of Vermont. This larger appropriation bill, now known as the urgent deficiency bill, represents appropriations made by another committee and not made by the Committee on Military Affairs, in whose jurisdiction the matter now is, and was simply to expedite matters, was it not?

Mr. DENT. That was one of the arguments by which they took from the Committee on Military Affairs jurisdiction over that bill and give it to the Committee on Appropriations.

Mr. GREENE of Vermont. And now the Military Committee, having finished its work, is waiting on the committee that was to help it by expediting matters?

Mr. DENT. That is very true.

Mr. GILLETT. The delay has not been here, has it?

Mr. DENT. I make no such charge.

Mr. GILLETT. The delay is simply because the Senate refuses to act. The House has turned down the Jamestown Exposition purchase, a local proposition, and because of that the Senate is unwilling to bring the bill up. So the delay is there, is it not?

Mr. DENT. That is the fact. I will state to the gentleman from Massachusetts that I am making no charge of neglect of duty or delay on the part of the Committee on Appropriations of the House.

Mr. GILLETT. The gentleman from Vermont [Mr. GREENE] intimated that.

Mr. DENT. The gentleman's statement was an accurate statement of the facts; that was one of the arguments for assuming jurisdiction, was expeditious, and the bill is still being held up. There are two Committees on Appropriations in Congress, one here and the other at the other end of the Capitol, and certainly delay has taken place in the final disposition of the matter.

Mr. GILLETT. Has the gentleman any assurance that the gentlemen at the other end of the Capitol will be any more speedy on this resolution than they have been on the other bill?

Mr. DENT. I think there will be no trouble in the world to have this resolution passed in the Senate to-day by unanimous consent if it is adopted here to-day.

Mr. GILLETT. Why should there be any delay at the other end of the Capitol with the other bill?

Mr. DENT. Well, I can not answer for that.

Mr. GILLETT. It is the party that is dominant on that side of the aisle that is making the trouble.

Mr. MANN. I think the delay may be in the body at the other end of the Capitol, but whether the delay is caused by the people in the body at the other end of the Capitol is another question. It looks to me as if one department of the Government was causing the delay and thereby seriously incommoding another department of the Government. The two departments ought to be working together up there, and I have no doubt will be after this debate is reported.

The SPEAKER. Is there objection?

Mr. MANN. I object.

The SPEAKER. The gentleman from Illinois objects.

RIVERS AND HARBORS.

Mr. SMALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill; and, pending that motion, Mr. Speaker, I desire to ask if we can not have some agreement as to limiting general debate on the bill. I would suggest that general debate close in three hours, one-half of the time to be controlled by the gentleman from Ohio [Mr. SWITZER] and one-half by the chairman of the committee.

Mr. MANN. I think considerably more time than that is asked for in opposition to the bill.

Mr. SWITZER. I have requests for nearly that length of time myself.

Mr. SMALL. I have no desire to limit debate on the bill myself, but only to expedite the consideration of the bill. How does this suggestion strike the gentleman from Illinois—that no limit be fixed at this time, but that the time be controlled jointly by the chairman of the committee and the ranking member present, the gentleman from Ohio [Mr. SWITZER]? There will be no trouble about the length of debate.

Mr. GALLAGHER. Reserving the right to object, Mr. Speaker——

Mr. MANN. My colleague [Mr. GALLAGHER] desires time. Who will yield to him? He wants an hour.

Mr. SMALL. I will be glad to yield to him.

Mr. GALLAGHER. I want an hour, and there are other Members who want an hour here. The question of controlling the time by two men who are in favor of the bill does not seem to me to be fair. Both of these gentlemen are in favor of this bill.

Mr. MANN. Well, I think both gentlemen would be fair, so far as that is concerned.

Mr. GALLAGHER. I do not object if we can get the time we wish.

Mr. MANN. I understand the gentleman from North Carolina agrees to yield to my colleague an hour's time?

Mr. SMALL. Yes; I will yield to the gentleman.

Mr. MANN. That is easy enough to say.

The SPEAKER. What is the request?

Mr. SMALL. The request is that the time be controlled, one-half by the gentleman from Ohio [Mr. SWITZER], the ranking minority member present, and one-half by the chairman of the committee.

The SPEAKER. How much time is the gentleman asking for?

Mr. SMALL. I suggested three hours, but it was stated that that was not sufficient. I would like to have the attention of gentlemen when I am making this request, that general debate close to-day.

Mr. MANN. We could not agree to that at this time of the day.

Mr. SMALL. The request now, Mr. Speaker, without attempting to limit the time, is that the time be controlled one-half by the gentleman from Ohio [Mr. SWITZER] and one-half by the chairman of the committee.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that he control one half of the time and that the gentleman from Ohio [Mr. SWITZER] control the other half. Is there objection?

Mr. LENROOT. Reserving the right to object, Mr. Speaker, I would like to have an understanding on both sides that the time is to be equally divided as the debate proceeds between those for and those against the bill.

Mr. MANN. I think more time will be occupied by those against the bill than by those in favor of it.

Mr. SMALL. I have no objection to the amendment of the request.

The SPEAKER. What is the amended request?

Mr. SMALL. That the time of general debate be controlled by the gentleman from Ohio and the chairman of the committee, to be equally divided.

Mr. MANN. Oh, no; not to be equally divided. The opposition to the bill are entitled to more time now than those in favor of the bill.

Mr. GALLAGHER. Those for the bill have already used more time than those against it.

Mr. LENROOT. Let the time be yielded alternately to those for and against the bill.

Mr. MANN. We must trust to the fairness of these gentlemen.

Mr. SMALL. There will no disposition to curtail debate.

Mr. MANN. Has my colleague [Mr. GALLAGHER] obtained an hour from the gentleman from North Carolina?

Mr. SMALL. Yes.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina that the time of general debate be controlled one-half by the gentleman from Ohio and one-half by himself?

Mr. MOORE of Pennsylvania. I suggest to the gentleman from North Carolina, will he not couple with his request the request that the debate shall be confined to the bill?

Mr. MANN. Oh, no.

Mr. MOORE of Pennsylvania. There are enough gentlemen to speak on the bill to take all the time.

Mr. SMALL. I will be gratified to have that done.

Mr. MADDEN. Then you can not have it. [Laughter.]

The SPEAKER. Is there objection to the request of the gentleman from North Carolina that the time be controlled one-half by the gentleman from Ohio and one-half by himself?

There was no objection.

The SPEAKER. The question now is on agreeing to the motion that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill.

The motion was agreed to.

The SPEAKER. The gentleman from Mississippi [Mr. HARRISON] will take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill, with Mr. HARRISON of Mississippi in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 4285) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. SMALL. Mr. Chairman, I yield one hour to the gentleman from Illinois [Mr. GALLAGHER].

The CHAIRMAN. The gentleman from Illinois is recognized for one hour.

Mr. GALLAGHER. Mr. Chairman and gentlemen of the committee, I regret very much to be compelled to differ with any of the members of my committee in regard to this bill. I realize that every Member who has a project for river and harbor improvement is laboring under certain difficulties, because there is no other way of getting river and harbor improvements except through the omnibus bill as presented for your consideration to-day.

This measure is put forth here as a war measure, and that is the reason that it is brought here to-day for your consideration. I want to say at the outset that this is not a war measure. It is practically the same river and harbor bill that was before this House at the last session of Congress, and you will recollect that that bill received 132 votes in this House against its passage. Now we are told that it is a war measure. I am going to show that it is not a war measure. And, to start with, I want to inform the House that at the request of certain members of the committee, when it was determined that this bill was to be forced upon this House, I went to the Secretary of War and asked for an interview. When I got to the Secretary's office I was told that the Secretary was very busy, but that I could talk to his private secretary. I told his private secretary that there were members of the River and Harbor Committee who had decided views regarding the passage of a river and harbor bill at this time, and as the bill was proposed as a war measure some of us would like to talk with the Secretary of War before he made any recommendations, because we believed we could inform him to some extent as to what the bill ought to be, and that possibly he might change his mind with reference to some of the items in the bill. His private secretary told me he would call the attention of the Secretary of War to our proposition, but I heard nothing more about it from him, and, as far as I know, none of the members of the minority signing this report have had any conversation with the Secretary of War with reference to the bill.

The next step was when the committee was called to order, when I made a motion in the committee that the Secretary of War and the Chief of Engineers be invited to come before the committee. We wanted to hear from them the necessity for a river and harbor bill, as a war measure at this time, and other matters, so far as river and harbor improvements were concerned. The River and Harbor Committee adopted that motion, but at the very next meeting we were told that the Secretary

of War was too busy and that he could not attend any meeting of the River and Harbor Committee. Neither did the Chief of Engineers come. But the same methods that are always employed in the manufacture of a river and harbor bill were employed in making this bill.

The chairman of the committee [Mr. SMALL] stated to you yesterday that the way this bill originated was that the Secretary of War took it up with the Chief of Engineers and tried to put the responsibility on the latter as a war measure.

I now quote:

Col. NEWCOMER. Mr. Chairman, I will state that these recommendations originated from a recommendation made by the Chief of Engineers to the Secretary of War at a time when it appeared very doubtful whether any river and harbor legislation would be enacted this year.

It is quite clear here as to the source from which this bill springs. It came, as it always does, from the Chief of Engineers, and the statement of Col. Newcomer as to its being very doubtful whether any river and harbor legislation would be enacted this year shows conclusively that as a war measure it was not considered.

Nor does this sound as though the Secretary of War prepared this bill as a war measure.

I further quote from Col. Newcomer, to show this is the work of the Chief of Engineers, and not that of the Secretary of War:

He felt that the situation of the general transportation service of the country was such as to require some work, not only for the more urgent commercial needs but also for certain military purposes as a matter of defense. For that reason he prepared a brief memorandum, which he took up to the Secretary of War, accompanied by a copy of the bill.

It is evident from this language that no distinction is made between transportation for commerce and for war. We must remember we are in this special session of Congress alone considering war measures, and the Secretary of War had no knowledge or information before him but a "brief memoranda," so furnished him by the Chief of Engineers.

Mind you, this is the old bill that was lost in the last session of Congress.

Col. Newcomer said:

He took this Senate bill as the basis for his action, and in arranging the program for the more urgent military and commercial needs we struck out the items which we felt might be omitted at this time. We do not mean, of course, that we consider those items that were stricken out unimportant or not useful, but they were simply considered as ones that might be eliminated in the process of pruning in order to get down to what might be considered as the essentials most necessary at this time.

Listen to this:

That memorandum and the proposed schedule of items were taken by the Secretary to the President, and it was understood that they received his assent.

Col. Newcomer says it was "understood" that they received his assent.

In fact, we were convinced from what took place later—

I do not know what that was that took place later, nor does any other Member of Congress—

that the administration was quite willing to have a bill substantially the same as the bill as it passed the House and was amended by the Senate Committee on Commerce.

Now, this is the bill we have before us—"the old bill."

Mr. FREAR. Will the gentleman yield? Will the gentleman please give the page of the hearings from which he is reading?

Mr. GALLAGHER. This is from the first page of the hearings before the River and Harbor Committee.

Mr. FREAR. And that testimony was given by Col. Newcomer, who was the only Army engineer who ever appeared before the committee.

Mr. GALLAGHER. Yes, sir. He is the only man upon whose authority we are acting. He represented the Chief of Engineers. Now, it must be clear to everybody that the statement of Col. Newcomer shows just how this bill has been made up, and if there are any items in this bill that can be considered as war measures I fail to find them. I have been on this committee as long as any other member now serving on it, and feel just as competent to examine this bill as any Member of the House, and I will be obliged to any Member if he will point out any item here that can be considered a war measure.

Mr. HULBERT. Will the gentleman yield for a question?

Mr. GALLAGHER. I do not like to be interrupted in my argument. If it is anything very important, I will yield.

Mr. HULBERT. Does the gentleman consider that the East River and Hell Gate items are war-emergency measures?

Mr. GALLAGHER. Oh, I do not think so. Neither does Col. Newcomer. [Laughter.] Nor does he show us that it is a war measure. It is about the same old bill that we passed before there was any declaration of war. The chairman of the committee wants to bolster up his position that this is a war measure by producing a letter from the Secretary of War. My opinion is that the Secretary of War does not know very much about this bill, that he knows very little about it, and only that which has been told to him. He could not spare the time to go through the bill and study it. He is too busy a man, and his time is occupied otherwise. Why, he could not even come before the committee to tell us what he thought our bill ought to be.

The chairman when asked if this bill was necessary at this time said that it was, because "we have been passing annual appropriation bills for river and harbor work for the past 10 years, and to omit a bill at this time would cause great injury to the work in hand." Why, we have plenty of money to go ahead with the work. The engineers have all the money that is necessary to take care of the immediate wants and maintenance of the work they have entered upon. I do not think that that fact will be disputed.

The reason that I called upon the Secretary of War was to inform him that if there was to be any war measures I was as anxious to help out in that particular as any other member of the committee, and that if he could show the minority that there was anything proposed that was a war measure we would be glad to consider it. But I can not find a single item in this bill that could be construed really as a war measure.

The gentleman from New York [Mr. HULBERT], speaks about Hell Gate. That is one of the principal items in the bill that is going to be paraded here as a war measure. I would like to read from the hearings a statement of Col. Newcomer regarding that proposition. I am reading from page 4. He says:

For instance, for East River, New York, the Navy Department has asked for a depth of 40 feet to the navy yard, while we propose 35 feet. Thirty-five feet is ample for all commercial needs, but the Navy wants a greater depth, and primarily that should be provided from some other fund than the river and harbor fund.

I have no objection to that, because it is intended mainly for war purposes.

Now, if they want to improve East River, and it is a war measure, there is a commission appointed under an act of Congress contained in the last naval appropriation bill that covers this very important river and harbor improvement necessary for naval defense.

Mr. SMALL. Will the gentleman yield?

Mr. GALLAGHER. Yes.

Mr. SMALL. Simply to keep the record straight. My colleague probably refers to an item in the last naval appropriation bill directing the Secretary of War and the Secretary of the Navy to report any such improvements as were necessary for the operation of the fleet and the use of the Navy.

Mr. GALLAGHER. Yes.

Mr. SMALL. They had no legislative function; they were to report to Congress.

Mr. GALLAGHER. They have made their report to Congress. But it was not before our committee for deliberation and was not considered by the committee. This belongs to the Naval Committee.

Mr. SMALL. They have; but my colleague will remember that their recommendations are embodied in the bill.

Mr. GALLAGHER. No; some are attempted to be embodied in the bill but are not. You have failed here to specify them. You know war measures are not handled by our committee and our funds are for commercial needs.

Mr. SMALL. All of them are embodied in this bill.

Mr. GALLAGHER. They are not; and if they were, they do not belong here. I have the report of that commission. They made an exhaustive study of all the river and harbor needs in the great harbors of the country that are necessary for military purposes. I have the document right here, and if it is for naval purposes, let the Naval Committee handle it and not take it out of the funds which ought to go for the commercial needs of the country.

Mr. HULBERT. Will the gentleman submit to an interruption?

Mr. GALLAGHER. Let me read this statement.

The Navy Department does not now foresee the need of improvements of rivers and harbors specifically mentioned in Senate resolution other than is tabulated below.

Then they specify New York, Norfolk, San Francisco, Hunters Point, Puget Sound, Boston, Philadelphia, Santiago, and Mare Island Navy Yards. They say in connection with that:

The only connecting channel the construction or improvement of which the Navy Department considers necessary is the channel through Hell Gate and East River between New York Harbor and Long Island Sound. The channel should be given a depth of 35 feet as soon as practicable, and eventually 40 feet.

Mr. HULBERT. Now will the gentleman yield?

Mr. GALLAGHER. I will yield to the gentleman from New York.

Mr. HULBERT. Of course, as a member of the Committee on Rivers and Harbors, the gentleman must appreciate that it would neither be expeditious nor economical if the River and Harbor Committee were to authorize the Army Engineers to dredge or deepen Hell Gate to a depth of 35 feet, and at the same time the Naval Committee should authorize the Secretary of the Navy to deepen the channel an additional 5 feet—to have two pieces of work going on at the same place under different contracts and different departments for precisely the same purpose.

Mr. GALLAGHER. There was a joint board to consider that.

Mr. HULBERT. Not a board.

Mr. GALLAGHER. A commission.

Mr. HULBERT. Not a commission, but two departments of the Government were respectively asked to coordinate and report back under provisions in the naval appropriation bill.

Mr. GALLAGHER. I will read into the record——

Mr. DUPRÉ. Will the gentleman yield?

Mr. GALLAGHER. Yes.

Mr. DUPRÉ. Is not the gentleman aware of the fact that both the Secretary of the Navy and the Secretary of War are in accord as to this item at this time for deepening Hell Gate 40 feet?

Mr. GALLAGHER. I will inform the House as to that fact in a moment. Let us see whether they are or not. We might as well get to that now as at any other time.

Mr. HULBERT. Will the gentleman yield? I want to give the gentleman some information.

Mr. GALLAGHER. I do not need any; I have all the information I need right here, and I want to give it to the House. [Laughter.] Here is what Col. Newcomer says about this important item, supposed to be the principal war item in the bill. I read from the testimony of Col. Newcomer:

It seems to me that 35 feet at Hell Gate is really adequate, for this reason: The depth of 35 feet, with 5 feet of tide, gives you practically 40 feet. The draft of our heaviest battleship contemplated is about 33 feet. It seems to me that 35 feet will answer. Of course, there would be a certain advantage in having access to the navy yard for a crippled vessel; but whether you would want to go to the very large expenditure that would be involved in the 40 feet all through Hell Gate in order to provide that facility, in addition to the other across Diamond Reef, I do not know. The Navy Department has not asked for it.

This is a specific answer to the questions of the gentleman from New York and also to the gentleman from Louisiana.

Mr. DUPRÉ. Does not the gentleman know that the Navy Department did ask for it?

Mr. GALLAGHER. I have just read you Col. Newcomer's statement.

Mr. DUPRÉ. Yes; but subsequently to that.

Mr. GALLAGHER. This is Col. Newcomer's statement and is a part of the record here.

Mr. HULBERT. Mr. Chairman, will the gentleman yield?

Mr. GALLAGHER. Yes.

Mr. HULBERT. Col. Newcomer was the gentleman whom my colleague objected to having this committee limited to having the privilege of hearing during the sessions of the committee, was he not?

Mr. GALLAGHER. Well, would it not be a good thing for the gentleman if we did limit it?

Mr. HULBERT. Did not the gentleman want to have the Secretary of War brought down before the committee?

Mr. GALLAGHER. Yes.

Mr. HULBERT. Has the gentleman seen the letter of the Secretary of War written on the 15th of May to the chairman of his committee?

Mr. GALLAGHER. I heard a letter read here yesterday.

Mr. HULBERT. This letter that I am referring to was not read yesterday.

Mr. GALLAGHER. I have made all of the reference necessary to the position of the Secretary of War with regard to these improvements, because I know that the Secretary of War does not know and has not the knowledge that is necessary to inform this House as to what kind of a bill we should pass. [Applause.]

Mr. DUPRÉ. I think he has as much knowledge as the gentleman from Illinois.

Mr. GALLAGHER. Possibly; for this is a part of his duty, but he evidently left it to others.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. GALLAGHER. I yield to my colleague.

Mr. MADDEN. Did my colleague hear the speech of the gentleman from New York [Mr. HULBERT] yesterday?

Mr. GALLAGHER. Yes.

Mr. MADDEN. In the course of his speech he stated that there was large commercial necessity for the improvement of this East River Channel as well as necessity for naval purposes, and he made the statement that it would be necessary to have this channel improved and the docks built in order that we might be able to ship the supplies that we are going to send to Europe, at the same time admitting that it would be three years before the docks were built. Can my colleague reconcile the necessity for this as an emergency measure in view of that statement made by the gentleman from New York?

Mr. GALLAGHER. I agree with my colleague this is not an emergency matter, and the object had here as expressed by him can never be accomplished, for if we are obliged to wait until those piers are built, and these can not be built within the period of three years, then Europe or our allies will be starved.

Mr. HULBERT. Mr. Chairman, will the gentleman yield in the interest of being accurate?

Mr. GALLAGHER. I do not want to lose my time here before the committee. We heard it stated here on the floor yesterday by a number of gentlemen that it would be a shame to neglect our river and harbor improvements, when all of the belligerent countries are going ahead proceeding with their improvements as if there was no war going on at all. That statement was made here yesterday, and on pages 8 and 9 of this majority report there is a communication from the War Department, office of the Chief of Engineers, dated Washington, April 20, 1917, and I want you to listen to it.

This is a memoranda in regard to the activities of the belligerent governments in prosecuting water improvements during the progress of the present war:

Welland Canal: Since November 5, 1914, construction operations have progressed on a large scale. Excellent progress has been made on all sections of the work under way. These comprise practically all the important engineering features of the $50,000,000 enterprise.

Unfortunately this statement is untrue. I now call your attention to a report made under an act of Congress, July 27, 1916, providing for the improvements necessary on the Great Lakes to meet those of the Welland Canal when enlarged by the Dominion of Canada. This report is signed by Col. J. G. Warren and contains the following as to the prosecution of the work on the Welland Canal.

After speaking of the small part of the work done, he says:

The following is quoted from a letter received from the engineer in charge during January (Welland Canal), 1917: "In regard to the probable date of completion, I am sorry I am unable to give you any information on this point, as all work on the canal has been suspended on account of the war."

How does that sound in comparison with the communication here that tells us of all the great works that these belligerent countries are doing? [Applause.] If the rest of this report is like the report on the Welland Canal, which is one of the greatest waterways in the world, then it is not worth the paper it is written on.

Mr. SMALL. Will the gentleman submit to an interruption?

Mr. GALLAGHER. I will.

Mr. SMALL. What date does he state the work was suspended?

Mr. GALLAGHER. His letter from the Canadian engineer is dated January, 1917. He can not give the information as to when the Welland Canal will be completed, as all work is suspended. This is his reply to a letter from Col. Warren.

Mr. SMALL. My colleague is aware that the letter from the Chief of Engineers telling of the work on the Welland Canal refers to work in 1914, 1915, and also in 1916?

Mr. GALLAGHER. It refers to work that is being done, while the war is progressing, on the Welland Canal. I have given you the words of your own engineer, and they are not true.

Mr. SMALL. I can refer my colleague to page 9 of the majority report——

Mr. GALLAGHER. I call your attention to page 9 of this majority report, under the caption "Canada." In the thirty-third line, commencing with the words "Welland Canal," you find the words I quoted. I am calling this matter to the attention of the House, and I think the House can understand just what I am saying in regard to these matters. I do not think that the House will be misled in face of the fact I am presenting here an official communication. I do not know what Gen. Black will think about it. It is official and it is business.

Now, what we are trying to do in this country, or have been trying to do, is to improve the waterways for commercial purposes; and, as you were told yesterday by the gentleman from Wisconsin [Mr. FREAR], that after all the money that we have spent in improving these rivers the boats upon them are disappearing and there is little, if any, tonnage left. Why, if we had spent this money in improving roads and highways, with the new mode of transportation that we have and the rapid transit we can obtain from automobiles, we could increase the com-

merce of the country on our highways manyfold where we are putting money into rivers where we will never receive any benefit from it.

Mr. MOORE of Pennsylvania. Will it disturb the gentleman if I ask a question?

Mr. GALLAGHER. Not a bit.

Mr. MOORE of Pennsylvania. Has the gentleman considered the value of these waterways as feeders to railroads in these times of transportation stress?

Mr. GALLAGHER. Yes; I called the attention of a member of the committee from Pennsylvania to that fact when we were grouping the rivers tributary to the Chesapeake Bay. For the information of the House I will say that there are some 25 or 30 rivers grouped that are tributary to Chesapeake Bay, and I think that nearly every boat on the rivers tributary to the bay is controlled by railroad influence; that every harbor is controlled by the same influence; and that there are no harbors that a boat could tie up to except these railroad-owned harbors, and these boats are simply feeders for the railroad system.

Mr. MOORE of Pennsylvania. They are now very much clogged in endeavoring to get foodstuffs to the country.

Mr. GALLAGHER. Well, I do not think that the passage of this bill will make any particular difference so far as relieving that situation.

Mr. MOORE of Pennsylvania. So long as the gentleman has answered by referring to territory in which he knows I am somewhat interested, may I ask him whether he knows that under the Panama Canal act it was proposed to dissociate the steamship carriers, to which he refers, from railroad ownership, and that the people along the coast rose in protest, as that kind of transportation was their only method of getting to market?

Mr. GALLAGHER. I think that it would be as difficult to separate railroad influence from the control of the boats as anything we might attempt.

Mr. MOORE of Pennsylvania. The gentleman surely would not destroy the boat service?

Mr. GALLAGHER. Oh, no. I am in favor of river transportation. I am in favor of maintaining every project that we have here. I do not want to disturb actual necessities, but in the face of the war and the demands that we have for money to prosecute the war I believe it would be useless to pass a bill here that has in it $25,000,000 or $27,000,000—it may be $35,000,000 or $40,000,000 when it comes back from the Senate—when we can get along without it without interfering with the business of the country.

Mr. MOORE of Pennsylvania. One more question. I do not want to disturb the gentleman, but in view of the fact that we passed through the House day before yesterday an urgent deficiency measure which carried an appropriation of $750,000,000 with which to build ships, why is it so great an offense against the Government to pass a bill carrying $26,000,000 for rivers and harbors to accommodate those ships?

Mr. GALLAGHER. We need all the money that you propose to spend for this river and harbor work to build the ships and for war purposes, instead of sinking it in some of the useless rivers and mud hills.

Mr. MOORE of Pennsylvania. We certainly would not put $750,000,000 worth of ships in mud hills. And why we should neglect our rivers and thus leave ourselves in a state of unpreparedness to carry those ships I do not understand.

Mr. GALLAGHER. When we get through with the intercoastal canal we will have all the preparation necessary.

Mr. MOORE of Pennsylvania. That may be true.

Mr. GALLAGHER. If we take the $26,000,000 or $27,000,000 proposed here and sink it in waterways, it will make it impossible to use it to build a good many ships that are really necessary, and I hope that is what they will do with the money if we can provide it.

WATERWAYS COMMISSION.

Now, then, about this commission. There is one provided for in this bill. There appears to be some dissatisfaction by somebody somewhere in regard to the way that these river and harbor bills are manufactured, and in order to obviate the difficulties complained of it is proposed to create a new commission. On page 44 of this bill, section 16, such a commission is provided for. And it says:

A commission to be known as the Waterways Commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce, and three additional members.

Now, let me call your attention to these four important secretaries. Did you notice that the Secretary of the Navy is not mentioned in this commission? Well, if there is any Secretary in the Cabinet who is closely allied with navigation it is the Secretary of the Navy. And he now has had some years of experience, and if they are going to create a commission of Secretaries that would in any way be valuable I should judge that they would put on it the Secretary of the Navy, who has something to do with navigation. I do not believe that this commission will be created by this bill if the bill does pass.

SURPLUS WATER.

There was another provision in this bill that the House acted upon to-day and referred it to the Committee on Interstate and Foreign Commerce. We were told that it was a water-power proposition, but it was in this bill for war purposes; and the gentleman from Oklahoma [Mr. FERRIS] read a letter from the Secretary of War yesterday disclaiming any knowledge of it. I simply mention this to you to show that the Secretary of War never knew it was included in the bill.

MUNICIPALITIES SHOULD AID.

If from a business standpoint we were to proceed to improve rivers and harbors, municipalities ought to proceed, if they are interested in river improvement, to provide suitable dockage and suitable wharves. The chairman of the committee called your attention to this fact yesterday, to tell you that in many cases where there was river transportation the cost of handling the goods from the dock to where the goods could be further transported added more than the additional amount of expense by railroad carriage.

Mr. BORLAND. Will the gentleman yield?

Mr. GALLAGHER. I will.

Mr. BORLAND. The gentleman is doubtless aware that that is being done now in many places. It has been done in Kansas City and is being done in St. Louis.

Mr. GALLAGHER. Yes. I am simply calling attention to the fact that few municipalities are interested in this work that is made so important before the Members of this House. It seems to me the municipalities themselves ought to make some headway toward providing the right kind of docks and the right kind of wharves at which boats can be accommodated. But the fact is that nearly every important harbor in the country on nearly all the rivers of the country wharves are shut off from the people by railroad lines, and that was looked after by the very enterprising railroad people some years ago.

It was said here yesterday that some of us voted for a lump-sum appropriation bill. I do not know whether that means me or not. I doubt whether I did. But the grouping of items as provided in this bill, to which your attention has been called, means much, because nobody can tell where the money is to be diverted or upon what river it is to be spent or what work it is to be used for.

Now, I think I have said all I care to on the subject of river improvement, but I want to call attention to the items in this bill and how it was reduced from the amount carried in the last bill. I read from the minority report:

The bill as reported carries an appropriation of about $26,900,000. The bill which passed the House but which failed to pass the Senate at the last session of Congress carried about $38,000,000. It can not, however, be argued that the present bill is a material reduction from the last one, as will be seen by an examination of certain items. The item of $6,000,000 for the Mississippi River is now carried in the sundry civil bill. The appropriation of $1,300,000 for the purchase of the Chesapeake & Delaware Canal is omitted, but a clause ultimately much more expensive is added by the item authorizing the condemnation of this obsolete waterway.

* * * * * * *

Two other large items are reduced, one reaching $975,000 for the Columbia River, and another of $900,000 for the Beaufort Canal, but the general appropriation carried by this bill is in reality practically as large as that which passed the House at the last session. It is a sad commentary on legislative methods when Congress preaches conservatism and economy to the people of the country but itself would practice extravagance.

Now, those are the facts in reference to this bill. I do not want to conclude without calling your attention to one fact that was mentioned here yesterday, namely, that the Canadian commissioners or Canadian Government was going to ask the House for an appropriation for the improvement of the Portland Harbor, as it was necessary for war purposes. I think that was the statement made. Well, if the Canadian Government can not find the money with which to proceed with their own improvements over in Canada for river and harbor work I do not see that it is very good policy for them to come over the line to tell us what harbors to improve when we are furnishing a good deal of money to their mother country for war purposes, and make it appear that this harbor work is for like purposes. Of course, if it is, I am willing to consider it.

Mr. SMALL. Will my colleague permit an interruption there, just to permit me to give him some information? The request from the Canadian Government for the adoption of this project for the further improvement of Portland Harbor is predicated upon this fact, that the Grand Trunk Railway has large terminals up there. During the winter all the Canadian ports for a certain period are frozen, and therefore shipments from

Canada which would ordinarily come from Canadian ports during the winter season are to be shipped from Portland. Further improvement is necessary in order to make possible those shipments, and the purpose to be accomplished is a matter in which the United States is greatly interested.

Mr. GALLAGHER. The Grand Trunk Railroad, if I size up the situation properly, is pretty much a Government-owned road. I think it is controlled by the Government of Canada. And if it is simply for the accommodation of the Grand Trunk Railroad, it is a question that remains with the House whether it wants to make appropriations to help the Canadian Government and its railroads.

Mr. SMALL. It is for the accommodation of the United States and our allies.

Mr. GALLAGHER. The whole bill is an accommodation to the United States, it seems. It is put forward as a war measure. But I think that if the House will consider what I have said in regard to this bill there is not a man who is free to act as he sees the justice of the situation but will cast his vote against the passage of this bill.

I sympathize with those men who have projects in this bill, as I stated in the first instance, that their constituents are asking for, because there is no other way except by this omnibus measure to get the improvements they want, but I believe that if they will explain to their constituents the situation which confronts us here and the necessity we have for every dollar that we can gather by taxation from the people, under existing circumstances, they will not look for unnecessary improvements. I want to thank the House for its kind attention. [Applause.]

Mr. Chairman, I yield back any time I may have remaining.

Mr. SMALL. The gentleman yields back his time.

The CHAIRMAN. The gentleman yields back five minutes.

Mr. GALLAGHER. I ask unanimous consent, Mr. Chairman, to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. SWITZER. Mr. Chairman, I yield 30 minutes to the gentleman from California [Mr. OSBORNE].

The CHAIRMAN. The gentleman from California is recognized for 30 minutes.

Mr. OSBORNE. Mr. Chairman, I approach the discussion of this rivers and harbors bill from the standpoint of the national defense as it applies to the harbors and rivers of the western continental border of our common country.

It is difficult for the millions of our citizens who have never crossed the Rocky Mountains and Sierras and have never looked out over the blue waters of the Pacific toward the distant shores of Asia to realize that our Pacific Coast States of California, Oregon, and Washington have an ocean front nearly as extended as that of the Atlantic coast, and, including the shores of Alaska, a very much greater length of coast line.

It is also difficult to realize that the greatest danger to the United States of foreign invasion is along this Pacific coast line, and particularly that of southern California, from Point Concepcion south to the Mexican line. This western border of our country, in the event of war, would be especially inviting to a foreign invader, and particularly if that foreign enemy were inhabiting a country bordering the Pacific Ocean. It would not be impossible, however, for a European nation, if it were successful in capturing the Panama Canal, to land a force by transports on the Pacific coast, and at no place at the present time is there so much danger of a successful invasion.

The 300 miles of coast between Point Concepcion and the Mexican border is protected by the channel islands of Santa Cruz, San Miguel, Santa Rosa, Santa Catalina, and San Clemente, and below the border by the Mexican islands of Coronado. So calm is the ocean along this 300 miles of beach that there are frequent wooden wharves run out into the ocean, and many of them, although of slight construction, withstand the usually moderate seas for many years. It would be possible to land an army at literally hundreds of points along this coast. Having once effected a landing, the fertile valleys of southern California would furnish a very extensive food supply, while the wealthy city of Los Angeles, with bank deposits approximating $250,000,000, and manufactories now turning out $150,000,000 of products annually, would constitute an object of attack for the wealth that might be acquired by a foreign foe and the loot which could be extracted by foreign soldiers from the people. Low grades and an absence of high mountains to the east would furnish a convenient route for a foreign foe to invade the Mississippi Valley, while several transcontinental railway lines, once in their hands, would comprise a valuable transport.

The Pacific coast north of Point Concepcion, while not so accessible as the coast to the south, still has hundreds of places that would constitute a convenient landing for a foreign foe—notably at Monterey Bay.

The fortifications on the Pacific coast are few and far apart. San Francisco Bay is fairly well defended from ocean approach and Los Angeles and San Diego Harbors have fortifications that would be serviceable in repelling a direct attack upon those harbors. An invading force, however, would naturally avoid an attack where we were strong and would land their forces in any one of the hundreds of places that are undefended and approach these fortified places from the rear. That would be simply common sense, which is the basis of military strategy.

What I have said about California applies also to the Oregon and Washington coasts.

My purpose in referring to this is to call the attention of the House of Representatives and of the country to the deep interest which our people—whether they reside along the Atlantic coast, the Mississippi Valley, or the great Middle West—have in the defense of our country along the line of the Pacific Ocean. That is our western continental boundary, and a foreign foe which lands upon that coast is very likely to bring war and disaster to the other portions of the country. If a landing could be effected on the Pacific coast by a first-class foreign power, with the line of the Sierras or of the Rocky Mountains as the defense it could possibly be held for years before we could dislodge such a foe. I do not doubt the spirit of the American people, that they would unceasingly seek to regain the Pacific coast if it were to be lost temporarily. It is the wiser plan, however, to recognize the fact that the beach of the Pacific coast from British Columbia to the Mexican line is our first national defense, on which no foreign force should ever be allowed to effect a landing.

I make this appeal not on behalf of the people of California and Oregon and Washington, as their interests, while very great and worthy of consideration, are only a portion of those of the entire American people.

Having spent nearly 40 years of my life as a citizen of California, with only occasional trips to the eastern portions of our country, I have always been impressed with the unconscious lack of realization in the Eastern States that the Pacific Coast States were not in some respect different from the remainder of the country—almost foreign in their character. I always find an interest in California, Oregon, and Washington, but it is that mild interest of curiosity with which people regard foreign countries presumed to be in some way different from themselves. This attitude finds its expression in pretty nearly everything that is proposed for the development of the Pacific coast—the defense of the coast by the proper appliances of the Army and Navy, forts, etc.; the lighting of the coast by lighthouses properly placed. There is much to be desired and much that ought to be done to render safer the lives of our sailors who go down to the sea in ships and sail up and down the Pacific coast, parts of which are most dangerous; and especially the improvement of our harbors, where we are building up a great foreign commerce, particularly with the populous nations of the Far East and of South America.

These are considerations which ought to be contemplated from the standpoint of national interest, and the enterprising pioneers and people who have removed from the more populous sections of the country to that great and promising land of the future should not be subjected to the implied criticism of selfish interest when they ask the Nation to take care of the national interest on that great coast. [Applause.]

The manifold advantages of climate and soil of the Pacific coast is attracting a great and a select population. This natural movement will continue, and I am entering upon no idle speculation when I express the belief that a century hence the Pacific coast of America will be the equal in population and in all the material and spiritual accessories of the desirable features of human existence of the Atlantic coast States.

Referring more concretely to my own State of California, and particularly to the southern portion of the State, where I reside—it may not be out of place to refer to the marvelous expansion of that favored section. The city of Los Angeles itself in its marvelous growth illustrates this point. While I have been a resident of California nearly 40 years, I became a citizen of Los Angeles in 1884, 33 years ago. At that time it had a population of less than 15,000 souls, a large proportion of which were native Californians; that is, citizens of Mexican or Spanish birth. In the third of a century I have seen the city expand—month by month and year by year—until now it has a population of more than 600,000 people, and is the ninth city in population in the United States. It is sustained by great natural and

other resources and is built up with a beauty of architecture and artistic surroundings hardly equaled by any other modern American city. It is sustained by a great commerce, by a mineral-oil industry tributary to Los Angeles approximating 100,000,000 barrels of oil per year; a citrus-fruit industry, which will this year turn out 60,000 carloads; a manufacturing industry of $150,000,000 annually; a metal-mining industry that extends throughout the Pacific coast States and into Mexico; and as a city it is on a safe and firm basis.

At the Los Angeles Harbor, which is within the tenth congressional district, which I have the honor to represent, a large and rapidly growing shipping business is established. Those who have read Richard H. Dana's Two Years Before the Mast will recall the delightful description which that eminent writer made of what was then known as San Pedro Harbor, as witnessed by him in 1836 and described in his entertaining book published in 1840. Even in that early day San Pedro was one of the considerable shipping ports of the Pacific coast, when sailing ships were accustomed to make the triangular voyage from San Pedro, Santa Barbara, and San Diego to Valparaiso, in Chile, thence to the Sandwich Islands, and then back to the southern California coast.

San Pedro at that time was a notable shipping point for hides and tallow, the entire southern California country being used for grazing lands and the raising of cattle for herd products.

After Dana's time San Pedro, or Wilmington, Harbor became the landing point for a wide area in the Southwest, and the early Mormon settlers of Utah in the fifties were accustomed to send their teams of oxen and mules eight or nine hundred miles across the desert and over the mountains to San Pedro Harbor for their supplies. Such a trip would take about three months.

In 1896 the National Government commenced the construction of a breakwater at Los Angeles Harbor, which was completed in 1910, with a length of 11,152 feet; the width of the base of this breakwater is 198 feet, and on top it is 20 feet. It protects a deep-sea area of 570 acres. The principal landing place for vessels, however, is within what is called "the inside harbor," where a very heavy shipping business is done.

Los Angeles Harbor has the unique distinction of receiving a greater quantity of lumber than any other port in the United States, or in the world. This lumber is distributed throughout the entire Southwest.

The National Government has expended upon harbor work from the beginning of the Government to the present time $5,927,431. I now desire to call attention to the public spirit of the people of Los Angeles, who have, since 1896, expended nearly dollar for dollar with the National Government upon their harbor, in which they have the most supreme confidence. The entire amount expended by the city of Los Angeles for harbor work is $5,343,661. This was up to June 30, 1916. The construction of wharves has amounted to 35,283 linear feet, about one-half of which has been constructed by the city government and the remainder by railroads and private corporations. The city also has constructed piers, warehouses, and other structures of value to commerce. I desire to lay particular stress upon the activities of the city at this harbor.

I also wish to call attention to the recognized importance of Los Angeles Harbor to the national defense, as evidenced by the fact that within the past month contracts have been entered into by the Shipping Board—or by Gen. Goethals—for the construction of eight steel ships, each with a tonnage of 8,800 tons, to be built within Los Angeles Harbor. Further, that there has just been recommended by the Navy Yard Commission, headed by Rear Admiral James M. Helm, a submarine training base, and aviation base for the use of hydroplanes, within Los Angeles Harbor, at an estimated cost of $2,250,000. This eminent commission—the duties of which were imposed upon it by Congress, to investigate and report as to the necessity, desirability, and advisability of establishing submarine and aviation bases on the Atlantic, Gulf of Mexico, and Pacific coasts and other possessions of the United States—have rendered an official report to the President, recommending Los Angeles Harbor as the best submarine training base in southern California, and also recommending it as an operating base for submarines in time of war, and for an aviation base.

This high testimony to the importance of Los Angeles Harbor removes it entirely from the criticism of being in the most remote way connected with any unworthy purpose, as is unjustly insinuated in the minority report, in a vague reference to "reclamation schemes." This reference, so far as Los Angeles Harbor is concerned, is entirely unrelated to any fact which would give it a shadow of justification.

Mr. RANDALL. Mr. Chairman, will the gentleman yield right there?

Mr. OSBORNE. I will.

Mr. RANDALL. In connection with that criticism in the minority report, is it not a fact that the Government has already recognized the value of Long Beach, Los Angeles, and Twin Harbors by the letting of contracts for five submarines in those harbors?

Mr. OSBORNE. That is true.

The present Rivers and Harbors bill contains but two small items for Los Angeles Harbor—one of $25,000 for maintenance and one of $50,000 toward the work of straightening and widening the entrance to the harbor, which is now narrow, crooked, and dangerous.

What I have said about Los Angeles Harbor as to its necessity and importance as a measure of national defense I believe could be said of every item in this bill applying to Pacific coast harbors. Most of them have been severely cut in this appropriation bill—notably the mouth of the Columbia River, Crescent City Harbor in California, Anacortes Harbor, Skagit River and Puget Sound in Washington, and other points.

The gentleman from New York [Mr. HULBERT] yesterday made a most interesting and instructive address on New York Harbor and its needs of increased depth to 40 feet on Diamond Reef. New York is our greatest international trade mart. Its conveniences, and especially its safety from foreign attack, is, or should be, the concern of every American citizen. The concern of the gentleman from New York is little greater than that of every other Member of this House. Should disaster come to New York from a foreign attack, the disgrace and damage to American prestige would be as great to the citizen of California, looking out upon the Pacific Ocean, as to the citizen of New York itself. Equally the possible invasion of the Pacific coast is the concern of every citizen of every one of the United States. We are one people and our harbors are all national harbors.

I was deeply interested in the statement made by the gentleman from Kentucky [Mr. SHERLEY] that, including the urgency deficiency bill, the amount authorized by Congress for war purposes has reached the enormous sum of $4,285,867,000. It is entirely right that Congress should vote for the conduct of the war whatever sums are necessary to bring about victory. The amount, however, is staggering, and its very magnitude emphasizes the necessity that we should maintain every agency for continuing in its highest efficiency the production and commerce of the country. It is no time to cease operations on our harbors and waterways, when every agency of national productiveness and profit should be exercised to its utmost. The policy of allowing our harbors to fill up with silt, the mouths of our great rivers to be impeded with sand bars washed back by the waves of the ocean, or in any way to obstruct the pathways to our dry docks, where the Nation is constructing merchant ships and warships for immediate use, would be a neglect of national duty unpatriotic and criminally stupid in its nature.

There never was a time when it was more important that a river and harbor bill constructed upon the theory of national defense and the maintenance of commercial and business facilities was so necessary as at the present time.

I earnestly appeal to every Member of this House, without regard to his political affiliations or the location of his residence in the United States, to consider this question upon high national considerations and to avoid all local and partisan views. Especially do I urge those Members representing interior States, which are comparatively safe—perhaps absolutely safe—from foreign invasion, so far as their immediate localities are concerned, to consider and act upon this great question in that broad and liberal way which is characteristic of the American people when they have been fully informed as to the importance of their action. We are all Americans and are all equally interested in the safety of the ocean boundaries of our country.

Let every man, whether he be a citizen of the interior States where he might never hear the boom of the guns of a foreign warship, show the same patriotic ardor for the protection of the borders of his country, whether on the Atlantic or Pacific coast, as is felt by residents of the coast States. If the Nation is attacked, it is the Nation of the citizen of Wisconsin, and Nebraska, and Tennessee, and Oklahoma, precisely as it is the Nation of the citizen of Massachusetts, New York, South Carolina, or California, Oregon, and Washington. Remember that the Pacific coast and transmoutain States are the hope for the future expansion of the American people. We have no colonies. We have over 100,000,000 people, and 25 years hence we will have more than 200,000,000 people. These rich States and coasts of the great West are the scene of the future hopes of your children and your children's children. There is growing up into stalwart life a great people, thoroughly American in their ideals and development—more American, if possible, than any other part of our common country. The Pacific coast is capable of infinite expansion, and with a conservation of its great resources of

water power and fertile lands, and with harbors worthy of the commerce of a great nation, and with a courage and confidence in its own merits, it never asks for the National Government to enter into great enterprises involving large expenditures without itself boldly taking a large part of the burdens upon its own shoulders and paying from its own funds a large proportion of the expenses of all public work. It is, therefore, entitled, as the hope of the future of the Nation, to the approval and generous consideration of this Congress and of the American people. [Applause.]

Mr. Chairman, I yield back the remainder of my time.

Mr. SMALL. Mr. Chairman, I yield to the gentleman from Missouri [Mr. BORLAND] 30 minutes.

The CHAIRMAN. The gentleman from Missouri is recognized for 30 minutes.

Mr. BORLAND. Mr. Chairman, it is somewhat unfortunate for such a great measure as the river and harbor bill, affecting as it does so intimately the commercial life and the industrial life and the national defense of the country, to resolve itself into a matter of specific localities. There is the constant feeling—natural, perhaps—that men are here not to represent the common interests of the country, but to represent some special locality or some favored project. It has happened, of course, that men who are more familiar with particular navigation projects, more interested in those particular projects, have presented the facts in regard to them; and yet I have tried, and hope to try at this time, to take a much larger sweep and scope in this matter than if I had any particular project in the bill. As a matter of fact, I have none. There is not a dollar of any money in this bill that will be spent in my congressional district, and any interest I have or any knowledge I have of the situation is confined purely to the question of the navigation of one of the great natural arteries of commerce of the United States.

I do know something about the condition of the Missouri River, and I think I may be able to tell the House something about it, as I have done in the past. But I would regard it, if it were true, as has been alleged by certain gentlemen on the floor of this House, as a most unfortunate thing for the country if in this national stress, where every channel of commerce and of transportation is needed to its utmost capacity, this particular bill should be laid aside, and that what other nations are doing as an imperative war measure—to feed their people and to supply their armies in the field—we should decline to do on the score of economy, or on the score of the expenditure in other necessary ways of the money. My constituents are interested in the Missouri River as a navigation project solely, and in this respect it benefits the entire West. I think it would be a most unfortunate and calamitous thing for this country to abandon the great natural system of highways, the inland waterways of America.

I have here a brief of a hearing at Kansas City on October 15, 1915, before a board of Army Engineers in which is quoted a statement from the old Burton waterways commission of 12 years ago, in which they say that if the Mississippi River system were in Germany it would be improved from end to end and be the great natural dependence of the country. We know that Germany has not neglected to improve her Rhine nor Austria to improve her Danube, nor is even stricken France to-day abating one dollar in her improvement of the great Rhone Valley. In fact, France is constructing a canal 350 miles long from Arles to Marseilles, to improve the great highway of the Rhone. The French look upon these improvements as great imperative war measures, and so do we.

I want to present this thought also: To-day there is a congestion of traffic on all the railways of the country, such as never have been witnessed before. We of the West realize that congestion of traffic and car shortage are almost an annual occurrence when the time comes for the movement of crops. But to-day the congestion of traffic and the shortage of cars are so acute that we are to have legislation in addition to what we have already had to relieve the situation of car shortage. What just argument is there that a shortage of cars for railroad transportation is an imperative war measure, but the improvement and enlargement of navigation upon the waterways is not an imperative war measure?

Gentlemen undertake to argue from technicalities as to whether the Secretary of the Navy or somebody else should have jurisdiction of it if it is a war measure. That has not been the dividing line in this House, for every department of the Government has risen to the occasion and the exigency of the situation, and has presented its particular activity that could aid in the defense of the country. We are going to have legislation upon common carriers as a war measure, and on no other ground. Why, they created a committee on railway transportation, subordinate to the Committee of National Defense, as a war measure, and then they found they had made a mistake in including only the railroad transportation. Yesterday there was created a subcommittee on waterways as a subcommittee of the Council of National Defense. That is the complete answer, as I take it, to the argument of gentlemen that waterways are not, although railroads may be, an important element in national defense at the present time. Upon that committee are such men as Mr. Joy Morton, of Chicago; Mr. Walter S. Dickey, of Kansas City; Mr. Saunders, of New Orleans, and other men who have made a study of this situation. It was found that a mistake had been made and we had taken hold of only one handle of the plow. The committee found that it could not produce any results unless it had its hands on both the rail and the water transportation; that it needed both handles of the plow or it could not plow a furrow. That is the situation to-day.

So now they have a waterways committee in the Council of National Defense.

Now, let me tell you something about the Missouri River and its place in this great problem. You may know that in the valley of the Missouri River and within 100 miles of it, west of the Mississippi River, is the center of production of farm products in this country. It is the center of production of mineral products in this country. It is the center of production of forest products in this country. It is the center of production of live stock in this country. All of those centers of production are in the Missouri Valley, within 100 miles of the Missouri River, and west of the Mississippi River.

The Missouri River finds its channel to the sea by turning southeast and finally east. It is the one great eastbound river, as the Ohio is the one great westbound river. Now, I should like to have time to explain to you gentlemen why the Missouri and the Ohio produce commerce when the Mississippi does not, but I can only say briefly that the Mississippi runs north and south, whereas the Missouri and the Ohio run east and west, and our railroad system has been constructed on east and west lines to connect with the Atlantic seaboard. The Mississippi can not be supplied with traffic without the aid of the Missouri and the Ohio. You can grasp that situation at a glance. I wish I could elaborate upon it. I know thoroughly the situation, and I know the movement of traffic.

Gentlemen have said that river commerce is disappearing. Whatever justification they may have for other stretches of the navigable streams of this country, they have no justification for that statement as to the Missouri River. This project was adopted in 1912. At that time Congress told us that unless commerce was restored to the Missouri River the project would not be adopted, and we Kansas City people agreed that commerce should be restored. I want to tell you an interesting story about that. The citizens of Kansas City were interested not in a reclamation project or in a land-saving scheme but in navigation. They raised $1,250,000 capital and established a boat line, which has been a most conspicuous success as solving the problem of inland waterways. They did that on the promise of the Federal Government that it would complete our project in 10 years, at the rate of $2,000,000 a year. But the Federal Government has never given the Missouri $2,000,000 a year except on one occasion. Instead of completing the project in 10 years, if Congress fools along like this it is going to complete it in 30 years, and it will cost the Government a great deal more than it ought to.

We established that boat line. We found that on the inland waterways the old traffic was carried on by the occasional boat. There was no regulation of rates, and your steamboat captain would come along, and if you had a jag of freight on the bank he would take it for you at some price that you and he agreed upon. If there were no boats coming for a long time he would get what he charged, but if there were two or three boats coming along he would take it for almost nothing; but in the long run he made almost a fortune on every trip. He lost a boat about every three years, but that did not make any difference, because his boat paid for itself every season. That was the old Texas deck boat. It was so inflammable that a man could not throw a cigarette on the deck without setting it on fire. It was a flat-bottomed boat with high galleries around, and it was loaded and unloaded by hand labor. A gang of roustabouts were at every landing, and they would come trooping down to the shore to load and unload those boats by hand. All of the freight was stored on deck open to the weather, and sometimes there were extra decks carried out to hold the cotton and the grain. These boats were loaded in the mud, or at stone levee landings, such as they have in St. Louis and New Orleans. These boats were not run on schedule. If there had been any other method of transportation in the West they would not have survived, and they did not survive the introduction of a new method of

transportation, to wit, the railroads. They disappeared as soon as the railroads came into existence.

Now, gentlemen, recollect that which I state to you to-day—that there never was as much traffic carried on the Missouri River in the palmiest days of the old steamboats as there is carried on that river to-day. I speak from positive knowledge on that. Although the steamboat occupies a picturesque place in our western history, the amount of traffic that was carried was almost insignificant. But it was the only method of transportation in those days. Now, when we came to restore the Missouri River traffic, we found nothing in the way of river craft but the so-called Texas deck boats. They were so inflammable that you can not get marine insurance on them. You would not dare trust your cargo to them. You can not get business men to ship on them. They have to be unloaded by hand, and you can not get hand labor to load and unload these boats as was formerly done. You can not compete with the railroads under these circumstances. It is perfectly manifest that you can not do it, and so there is no use in a man wasting his money trying to do it.

Now, what did we do? As soon as we got together this $1,250,000 capital we sent for an expert, a man by the name of von Pagenhart, educated in the University of Berlin, as a naval architect. He was sent to every navigable stream in the world, and in this country particularly, to draw designs for navigable boats suitable for inland waterways. He finally got up a design which has been accepted in this country. It consists of a steel barge of a sufficient size adjusted to the channel. Our project calls for a 6-foot channel. We must have a complete channel between two terminals just as you have between terminals of a railroad. You can not navigate over 20 miles of the river here and 20 miles there; you have to navigate 300 or 400 miles or 1,000 miles. We were promised a 6-foot channel and the boats as designed required a 6-foot channel. We built those boats of steel. They are noninflammable, nonsinkable, and all freight put in the boat is absolutely safe. There is no marine insurance needed for the company absorbs the marine insurance and never has lost a dollar's worth of freight except by occasional and rare cases of theft.

Here [showing photo] is the steel boat drawing 4½ feet when fully loaded and 18 inches when empty. It draws 1 foot for every 200 tons of freight. We ought to be able to navigate the Missouri River to-day with a steel barge of 2,000 tons. We did build one of 1,400 tons but found with the unimproved river and the shoal places between Kansas City and St. Louis we could not load the boat to its capacity and that it had to be loaded light. It costs as much to operate a boat half loaded as when fully loaded. We have gone ahead and built smaller boats—boats of 1,000 tons, boats of 600 tons—and still Congress has not improved the river. We have built boats of 300 tons to get over the shallow spots. We are operating to-day with 300-ton boats, one 600-ton boat, and two 1,000-ton barges.

Here is the difference between the Texas boat and the steel barge. Our steel barge can be tied up to a wharf. There is no power in it; no engineer or fireman to be paid; only the deck hands. It is tied up against the wharf to be loaded or unloaded. When it is loaded along comes the power boat, of which we have two, picks up the barge and perhaps another barge, and takes them down the river. When the power boat gets down, it drops the barge and picks up another loaded barge, does not lose an hour of time, and starts back upstream. Now, you have the basis of actual competition between the railroad and river navigation. It is like a locomotive picking up loaded cars instead of waiting for the cars to be loaded or unloaded. And this is the first time in our country that you have a real attempt at continuous river navigation. We eliminate all marine insurance; we eliminate the risk; we eliminate the expense of power; and the only difficulty is we did not have the terminals. So Kansas City provided a municipal terminal. By a lawsuit with the railroad it regained control of the water front. Then it built a great municipal terminal, with electric unloader, which reaches down into the barge and takes the freight out and swings it into the warehouse. If it is not needed in the warehouse, it swings it into the cars from the boat and from the cars to the boat. One can not do business on a wharf in this country unless one is ready to exchange business with the common carrier that reaches the same point. That is the second problem that we solved. We have made connection between the railroads and the waterways. I can show you a picture which will interest you. Here [showing photograph] is a picture of a steel barge going downstream loaded with flour. I want to say that 50 per cent of the downstream freight is flour and grain products. There is the interior of the boat made of chilled steel; the flour is piled up there in noncombustible water-tight compartments, so that if the boat strikes a snag—and no snag can go through that steel hull—but if it should be penetrated it could not lose more than one-tenth of the cargo, and under no circumstances could it sink. We have completed the terminal at Kansas City, and they have voted to build a municipal terminal at St. Louis. Now, you propose to stop this progress toward successful navigation.

Mr. SMALL. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. SMALL. If the gentleman has not stated, will he describe the equipment for transferring freight at Kansas City terminal, and whether the terminal is connected with the railroads that run into Kansas City?

Mr. BORLAND. Yes; I want to describe that a little more fully. The railroad leads down to the municipal terminal. We transfer by electric crane from the boat to the railroad car and from the railroad car to the boat. There is no exposure of goods, no delay, and no expense of hand labor. The cost of transfer is very small, a fraction of a cent a ton.

Now, we have found that a great majority of heavy shippers are no longer located on the river banks, as they were in the early days, but are scattered all over the city on switch tracks. Every heavy shipper and manufacturer has a switch track, and when we compete with the railroad we have to meet that situation. What did we do? We have absorbed the switching charges within the switching area of Kansas City. It does not cost the merchant a cent for transfer to the boat. The freight is loaded into a car, switched to the municipal terminal, transferred to the boat, and carried to East St. Louis to its destination, and the switching charge is absolutely absorbed by the boat company. That is what gives us such a basis for competing with the road. That is what has given us so much business, and the boat line has never been able to handle it in a single season.

All the difficulty is that the river has 25 or 30 shoal places between Kansas City and St. Louis, which prevents the loading of barges to full capacity. If we could load to the full capacity we could make more money than we could count, because business is rolling in so strongly. The trouble is that when low water comes we have to lighter the boat over the shoal places or use smaller boats, or we have to load our big boats to half capacity. The money spent by Congress has steadily improved the channel, and the completion of the project as authorized will give a permanent 6-foot channel, able to be navigated by barges of 1,400 tons or larger.

Mr. HARDY. Mr. Chairman, will the gentleman yield?

Mr. BORLAND. I promised first to yield to the gentleman from Nebraska [Mr. KINKAID].

Mr. KINKAID. I yield to the gentleman.

Mr. HARDY. Even loading at half capacity, is it not a fact that river transportation is cheaper than rail transportation ever can be?

Mr. BORLAND. Yes; very much cheaper. The rates between Kansas City and St Louis are 80 per cent of the rail rate. The rail rate is 60 cents, and our boat charges 80 per cent of the rail rate and absorbs all of the switching charges. The boat line has made money on every pound of freight that it has handled. It has not absorbed all of its overhead charges, of course, and the reason is that it is not able to maintain a large enough fleet.

Mr. HARDY. Is it not admitted, however, that the actual cost of service by water is far under that of rail?

Mr. BORLAND. Yes. Our people tell us that if we had a permanent 6-foot channel between Kansas City and St. Louis so that it would be possible to run nights as well as daytime and on regular schedules five days going up and 48 hours coming down, so that the merchants could depend upon it, we could do that business for nearly 40 per cent of the rail rate, instead of 80 per cent.

Mr. KINKAID. Mr. Chairman, granting, just as the gentleman has stated and as the gentleman from Texas has agreed to, that freight transportation by water will be far cheaper than by rail, what in the long run will be the benefit of the water transportation, taking into consideration the fact that the railroads must still exist and can not be driven out of business by water competition? What will be the public benefit in the long run? Suppose you bring the rates down, and you will have to keep up the river traffic in order to keep the rail rates down, what will be the result?

Mr. BORLAND. Mr. Chairman, I am very glad that my friend has asked that question. It will cost $20,000,000 to improve the 400 miles between Kansas City and St. Louis to a permanent depth of 6 feet. Congress has spent now a little less than $5,000,000 upon that project, and it will cost $20,000,000, all told. You can not to-day build a single-track railroad between Kansas City and St. Louis with its terminals for $20,000,000—$50,000 a mile. You can not do it to save your

life. The traffic is growing so great in the Missouri Valley that you are going to have to double-track every line between Kansas City and St. Louis. It is a mistake to believe that the people only pay the bills of improvement of waterways. It is a mistake to say that if you stop improving the waterways the people do not pay the bills of the added cost of transportation. The people pay for every rail that is laid down in the long run. Nobody else pays. If you had to build a double-track railroad between Kansas City and St. Louis to handle the business the shippers have to pay of it. We people must pay for it one way or the other and the question for us to determine is the cheaper and more expansive method. We say that an improved river will handle one hundredfold the tonnage and traffic of a single-line railroad between Kansas City and St. Louis. If both cost the same to build, and in the long run the people pay for both the river and the railroad, as they unquestionably do, it is just a question of the best judgment as to which method we shall choose. But if it were exactly the same cost there would still be the necessity for the expansion of commercial arteries by using the river as well as the railroads, because there are things that the river can carry more cheaply—bulky freight—than the railroads and which the railroads ought not to be clogged with handling.

Mr. LONERGAN. Mr. Chairman, will be gentleman yield?

Mr. BORLAND. Yes.

Mr. LONERGAN. I am interested in what the gentleman say's because I am a believer in the development of waterways for commercial purposes. How many boat lines are there on the Missouri River between Kansas City and St. Louis?

Mr. BORLAND. Three. One that runs clear through from St. Louis to Kansas City, one that runs from the mouth of the Gasconade to St. Louis, and one that runs from the mouth of the Osage to St. Louis.

Mr. LONERGAN. And they are competitive lines with the railroad companies?

Mr. BORLAND. In the territory they cover; yes.

Mr. LONERGAN. Are they owned by the railroad companies?

Mr. BORLAND. No. The one at Kansas City is owned by the business men of Kansas City.

Mr. LONERGAN. A short time ago, and the gentleman may be interested in this as well as other members of the committee, I heard a man who for several years occupied a high position in the Federal Government make the statement that a boat line independently owned and operated could not thrive in this country.

Mr. BORLAND. We have shown that it can and does. One drawback to our boat line is that we are operating upon an unimproved river, and it is just like operating a railroad where some of the bridges are out, and you have to stop and carry the freight on mule back across the stream and then put it on the cars again and send it around. That is practically what we do with an unimproved river. We were told that we could do it for 10 years, and we prepared to do it for that time, but we did not prepare to do it for 30 years. I want to say to these gentlemen who now say we ought to quit, that $5,000,000 or $6,000,000 were spent on the Missouri River years ago, and they quit, and it went to wreck and ruin, and if you quit now you will have another large sum charged up to the Missouri River; and then when these same gentlemen get up to tell about money wasted in river improvements, they will add these figures, and they are the very men who are doing it. They want us to put up a house and not put a roof upon it, and then let it fall down and put up another one.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. BORLAND. If the question is brief.

Mr. MADDEN. I do not know how brief I can make it. How much tonnage——

Mr. BORLAND. I decline to yield if the gentleman will not make it brief.

Mr. MADDEN. The gentleman will not give me a chance to answer the question. Does the gentleman say that he declines to yield after he has yielded?

Mr. BORLAND. I have declined to yield.

Mr. MADDEN. The gentleman did yield, however.

Mr. BORLAND. I decline to yield. Mr. Chairman, you will find that in the Missouri River territory there has been such a congestion of traffic in the last year that the deliveries by the boat line even on upstream business have been more rapid than the deliveries by rail. You will not believe that at first glance, but so many cars are tied up in the terminals of the railroads and on sidetracks that you can get freight through from East St. Louis to Kansas City by boat more quickly, although it takes five days upstream, than you can by rail; and the result is that the merchants are trying their best to divert business from East St. Louis to the boat line, and the boat line is working to capacity.

Now they have succeeded in dividing the west-bound business at St. Louis. Why? Because of the railroad car shortage. Every time a boat takes a carload of stuff at East St. Louis it gives the empty car to the railroad, but they will not take the westbound business. Why? Because the railroads put an embargo on us and will not furnish empty cars at St. Louis to continue the shipment east.

Mr. MADDEN. Mr. Chairman, I make the point of no quorum present. The gentleman ought to have an audience.

Mr. BORLAND. The gentleman has tried to delay this bill repeatedly, and can keep up those tactics if he wants to do so.

The CHAIRMAN. The Chair will count.

Mr. SMALL. Mr. Chairman, I hope the gentleman will withdraw the point of no quorum, or withhold it for a moment, until I can make this statement.

Mr. MADDEN. I asked the gentleman from Missouri a courteous question, and asked him to yield and he agreed to yield and then declined to yield before I put the question.

Mr. BORLAND. I agreed to yield to a brief question, but the gentleman would not make it brief and therefore I declined to yield.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BORLAND. Mr. Chairman, I should like to have 10 minutes more.

Mr. SMALL. I yield the gentleman 10 minutes additional.

Mr. STAFFORD. Mr. Chairman, I hope the gentleman will yield to the gentleman from Illinois.

Mr. BORLAND. I will yield to a brief question, but I will not yield for a speech.

The CHAIRMAN. Does the gentleman from Illinois withdraw the point of no quorum?

Mr. MADDEN. If the gentleman yields?

The CHAIRMAN. The gentleman withdraws the point of no quorum.

Mr. MADDEN. I want to ask the gentleman from Missouri how many boats there are on the boat line on the Missouri River he is talking about?

Mr. BORLAND. I have just been over that.

Mr. MADDEN. I did not hear the gentleman.

Mr. BORLAND. Of the fleet I am speaking of there are nine steel barges and two tow boats.

Mr. MADDEN. How much tonnage is moved in a year?

Mr. BORLAND. I will go over it again if the gentleman wants me to do so. There has been a statement here that there has been a decrease in tonnage. This particular boat line with which I am familiar has taken this year 22,000 tons, last year 26,000 tons, and the year before 37,000 tons. The decrease this year is solely due to the refusal of the railroads to furnish cars or to exchange business.

Mr. MADDEN. How much money is proposed to be appropriated by this bill to move that tonnage?

Mr. BORLAND. If the gentleman will pardon me, I would like to give the House some information.

Mr. MADDEN. I would like to have an answer to this one question and then I am through.

Mr. BORLAND. The gentleman knows how much money is proposed to be appropriated. I would not think the gentleman would——

Mr. MADDEN. It is $1,000,000, is it not? Twenty-six thousand tons at a $1,000,000 improvement and you can figure how much it will cost a ton.

Mr. BORLAND. Complaint has been made that tonnage has decreased on this river. There has not been a greater mistake than that. There has been a difference in the method of computing tonnage. Years ago we computed all the sand and gravel hauled on the river. To-day we have driven the sand and gravel off the river to make room for new navigation. The tonnage to-day is a different class of tonnage from that figured years ago. The gross number of tons is the most misleading thing on earth. What you must compare is the number of ton-miles, and you will find that the ton-miles have gone up from 3,000,000 to 11,000,000. There has been an increase of traffic because it has been hauled 400 miles instead of a 3 or 4 mile haul for a sand barge. Yet gentlemen say there has been a decrease of tonnage on the Missouri River. Why, the Government put sand barges off the Missouri River, and that is why they wiped out a certain amount of alleged tonnage. The tonnage carried three years ago was worth $3,000,000 and last year $5,000,000 and this year $7,000,000. That is the value of the products carried. That is the way to estimate the value of the river to the people, not by the gross amount of tonnage, which might be sand and gravel that is carried before the Government by regulation puts the sand barges off the river. I am not an enemy of the rail-

road, and I do not like to see this contest between the waterways and the railroads. We must have both the waterways and the railroads. The first thing we did in Kansas City when we got the boat line established and Congress passed a law permitting joint rates and through rates and through routes by water carriers was to bring a case before the Interstate Commerce Commission. That this boat line did and force the eastbound carriers to divide their rates and make a through bill of lading with the boat line. We have forced them to give through rates; we are going to connect with them, and we ought to force them to furnish cars to interchange freight. We connect at our wharf and at St. Louis wharf. You can not do business on these boat lines and rail lines without their being articulated and coordinated together. That is the problem to-day, and let no man mistake it. River transportation with the great system of inland waterways we have is absolutely essential to the growth of this country. To no district is it more essential than the agricultural regions west of the Missouri River. It is the agricultural products that find their way to market because of the cheap method of transportation. Every man here knows that if you control the rates or lower the rates or improve the service from any section of any through line you affect the rates and service of the whole line. You make possible not only a reduction of the freight handled and carried by that line but affect rates of all competitive lines.

Mr. STAFFORD. Will the gentleman yield?

Mr. BORLAND. For a brief question. They have limited me to 10 minutes.

Mr. STAFFORD. I understand the gentleman concedes that 40,000 tonnage could not be wharfed with the Government expending $3,000,000. I would like to inquire if it is capable of conveying 40,000 tons a year? If the traffic is there, why can not we increase it under existing conditions?

Mr. BORLAND. We have built only such boats as are adapted to a partially improved river. Our people are not willing to put their money into boats that can not be used. We put our money into 1,000-ton barges, and found they were too big to operate profitably. We put it into 600-ton barges, and found that the Government had not caught up with its improvement of the channel, and we put it into 300-ton barges.

Mr. MEEKER. And those 300-ton barges, absorbing those freight charges at both ends, are making money?

Mr. BORLAND. Yes. We send one power boat up from St. Louis with barges and it meets the other power boat on its way down from Kansas City, and exchanges barges and goes back. This is in order to keep the pilots informed of only their own half of the river. That is one of the difficulties of an unimproved river. You talk about why we do not increase the tonnage there. We are carrying all the tonnage the improvement of the river has justified up to date, and more.

Here is what I want to say, further: The railroads need the river because there are certain classes of freight carried by them, the natural outlet of which ought to be on the waterways, such as cement, structural iron, grain products, alfalfa, alfalfa meal, and packing-house products. But I need not mention packing-house products, because the packing houses will not give the boat line one dollar's worth of business, on account of the connection between the packing houses and the railroads. The packing houses are the only concerns in Kansas City that will not give the boat line any business. I regret that feeling against the rivers on the part of the railroad people. It is a mistake. And yet the railroad people have testified repeatedly before the Interstate Commerce Commission that if it were not for the Kansas City boat line they would raise their rates in all that district between St. Louis and Santa Fe, N. Mex. Everything between the Mississippi River and the Rocky Mountains would have its rate raised from 8 to 15 per cent if it were not for the operation of the boats on the Missouri River. That testimony has been given repeatedly.

Mr. MADDEN. Who fixes the rates?

Mr. BORLAND. The railroad fixes them, of course, and the Interstate Commerce Commission decides whether they are just or discriminatory.

Mr. MADDEN. They must be finally fixed by the Interstate Commerce Commission?

Mr. BORLAND. No; the railroad fixes them and the commission decides whether they are just or not.

Mr. MADDEN. Does the gentleman mean to say that the railroad companies have a right to raise the rates?

Mr. BORLAND. They have a right to file a new schedule, and it is subject to the approval of the Interstate Commerce Commission.

Mr. MADDEN. And the Interstate Commerce Commission says whether they shall be raised or not?

Mr. BORLAND. The Interstate Commerce Commission will not permit the lowering of rates except to meet actual competition, not potential competition, any more. Actual river competition means a boat in operation capable of carrying that freight. The minute you wipe that boat line out you have affected the freight rates of 1,500 miles of agricultural territory—the bread basket of this country. The railroads have been doing well enough. We have never been able to carry enough freight on that river with the unimproved condition of the stream to even keep down the traffic of the railroad. We have not caught up with the increase of traffic. We have not affected the transportation of the railroad, but we have made the situation level on the question of freight. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. SWITZER. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. DEMPSEY].

Mr. DEMPSEY. Mr. Chairman, those who have criticized bills of this nature in the past should not look at this bill as they do at the ordinary bill. It differs from the usual bill in two particulars. First, this bill comes before this House as one which has the approval of the district engineer in each instance, the Board of Engineers in each instance, and of the Secretary of War. Not only has it, as in the ordinary bill, the approval of all these checks upon extravagance and undue appropriations, but we have in this instance an added protection. Only those items are allowed to be included in the bill which were found upon examination by the Secretary and the department to be necessary for military or commercial purposes to the successful prosecution of the war. So in that respect this bill comes in an unusually favorable way before this House. Now, I do not claim from that that it necessarily follows there are no faults and mistakes in this bill. It is a long bill and there necessarily would be faults and mistakes in any bill however carefully it might be prepared and with whatever checks or safeguards.

Mr. LENROOT. Will the gentleman yield?

Mr. DEMPSEY. Surely.

Mr. LENROOT. Did I understand the gentleman to say that the Secretary of War had reported that all of the new projects in this bill were necessary from a military standpoint?

Mr. DEMPSEY. The Secretary of War has recommended each and every item in this bill as necessary for the successful prosecution of the war, either from a commercial standpoint or for military purposes.

Mr. LENROOT. Will the gentleman point to anything by way of letter or report from the Secretary of War substantiating the statement he has just made as to the successful prosecution of the war?

Mr. DEMPSEY. It depends, if the gentleman will permit me to say it, upon the testimony of the engineers who have charge of this matter, who came before the committee and who testified, after a consultation with the Secretary of War, as to the various items involved.

Now, mind you, I do not take the position which has been taken by those who have criticized river and harbor bills in the past, that these checks by engineers, the appropriation of a lump sum to be expended in their discretion, is a panacea for the ills of river and harbor bills. I do not believe that that is so. But I do believe that the engineers of the United States Army are highly educated men in their profession. I do believe that they are experts on engineering projects. I do believe that they are men of high character and that their purposes are beyond question. On the other hand, I believe that their ability and their experience are in the line of their profession, and that the things which are criticized here—the appropriations for projects which do not produce sufficient tonnage—are criticisms which are aimed at commercial purposes, and that commercial purposes can be better judged by men of experience in transportation problems.

Mr. SMALL. Mr. Chairman, I move that the committee rise for just a moment.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HARRISON of Mississippi, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 4285) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, and had come to no resolution thereon.

AMENDING FEDERAL RESERVE ACT.

Mr. GLASS. Mr. Speaker, I desire to present a conference report on the bill H. R. 3673 for printing under the rule.

The SPEAKER. The gentleman from Virginia presents a conference report on the bill H. R. 3673, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 3673) to amend the act approved December 23, 1913, known as the Federal reserve act, etc.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. GLASS. Yes.

Mr. STAFFORD. Can the gentleman inform the House just when he expects to bring up the conference report?

Mr. GLASS. I hope to bring it up next Tuesday.

RIVERS AND HARBORS.

Mr. SMALL. Mr. Speaker, I move that the House resolve itself again into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill.

The SPEAKER. The gentleman from North Carolina moves that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill. The question is on agreeing to the motion.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill, with Mr. HARRISON of Mississippi in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 4285) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The CHAIRMAN. The gentleman from New York [Mr. DEMPSEY] will resume.

Mr. MADDEN. Mr. Chairman, will my friend from New York yield for a question?

Mr. DEMPSEY. I will.

Mr. MADDEN. I am not sure whether I correctly understood the gentleman. Did I understand the gentleman to say that the Secretary of War recommended all the items in this bill as emergency war measures?

Mr. DEMPSEY. I said this: That my understanding, derived from the testimony of the engineers who were called before the committee, was that every project included in this bill was important for the prosecution of the war from one of two standpoints—either directly for naval purposes or indirectly as being so useful to the commerce of the country in transporting the food and supplies of the various kinds produced in the country as to be of great moment and use.

Mr. MADDEN. At the present time?

Mr. DEMPSEY. Yes.

Mr. MADDEN. Will the gentleman now tell the committee of how much use the removal of the water hyacinth will be for the movement of food supplies during the emergency of the war?

Mr. DEMPSEY. Well, I am not a southerner, and of course it is utterly impossible, as the gentleman knows, for one raised in the North and not familiar with the difficulties obtaining in the South to explain all of the details of this bill. But I entered upon my speech with this statement, that I have not any doubt but that there are errors in this bill; errors of judgment, errors of fact; that it is a long bill, and that it would be impossible for any bill to be without fault, but that I did believe, owing to the circumstances to which I have just adverted, that it had the safeguarding care of all of the usual checks, and the additional check of only permitting items to be included which were deemed to be necessary for military or commercial purposes and useful in the present emergency, and excluding all other items.

Mr. MADDEN. Of course I do not know anything at all about the food value of water hyacinth [laughter], and it may be very valuable as food to supply to the people during the period of the war; and if that is true, I would like to know it from the gentleman from New York.

Mr. DUPRÉ. When the time comes and the proposition arrives I shall be glad to enlighten the gentleman from Illinois on that subject.

Mr. DEMPSEY. It does seem to me that if they are an obstruction to navigation, that fact makes it a matter of some importance, in such important streams as those in which it grows, to remove them.

Mr. MADDEN. I understand that in the places where they are to be removed there is no navigation.

Mr. DUPRÉ. There is no navigation simply because the hyacinth prevents it.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield there?

Mr. DEMPSEY. Yes.

Mr. MOORE of Pennsylvania. On this question raised by the gentleman from Wisconsin [Mr. LENROOT], supplemented by the gentleman from Illinois [Mr. MADDEN], the food supply just now is an important war problem, is it not?

Mr. DEMPSEY. It is the primary problem.

Mr. MOORE of Pennsylvania. The President and all the foreign ambassadors are emphasizing that fact—the importance of getting the food supply to the coast to help the allies and the people of this country. If it should happen that in a fertile territory like Florida, on the upper reaches of the St. Johns River, miles of that river should be obstructed by the water hyacinth, would not the gentleman think it wise to clear out that obstruction so that vessels could get into that territory and draw upon that food supply?

Mr. DEMPSEY. The State of Florida has many times the waterway mileage in proportion to navigation of any other State in the Union, and I should suppose it was important to keep those streams open.

Mr. MADDEN. The question asked by the gentleman from Pennsylvania [Mr. MOORE] prompts me to ask the gentleman from New York one more question; and before doing that I may add that I will admit the importance of removing the water hyacinths if they are good for food; but if they are not good for food, what is there to be transported down there except the water hyacinth itself?

Mr. DEMPSEY. In order to enable the food to be transported it is important to clear the rivers of that obstruction to navigation.

Mr. MADDEN. Yes; but if there is no navigation on these streams, and no food along the surrounding banks to be transported, it would not be a good war measure to spend money for the removal of the hyacinth.

Mr. MOORE of Pennsylvania. The gentleman knows that water hyacinth is not used for food. The whole purpose of the paragraph is to prevent the obstruction of navigation.

Mr. MADDEN. That may be stated in the bill, but that does not make it true.

Mr. PLATT. Mr. Chairman, will my colleague yield?

Mr. DEMPSEY. Yes.

Mr. PLATT. I will ask my colleague if it is not a fact that you can make potash out of the water hyacinth as well as out of kelp?

Mr. DEMPSEY. I have no doubt my colleague from New York knows that to be a fact.

Now, the opinion of the engineers and the leaving to them the determination of what projects shall be included in the bill does insure this: It insures that no project shall be selected by logrolling among Members of Congress. It insures that there shall be no "pork" in this bill, and that surely has been done in this bill. Every member of the committee and every Member of the House knows that this bill has been prepared without any regard to membership on the committee, solely and simply upon the basis of what the engineers have recommended and what the War Department has indorsed as projects necessary in this present emergency.

Mr. MADDEN. I am not sure if I understood the gentleman correctly. Will he yield to me again?

Mr. DEMPSEY. Surely.

Mr. MADDEN. Did I understand the gentleman to say that this bill was prepared on the hypothesis that no logrolling was to be permitted by Members of the House with respect to items in the bill?

Mr. DEMPSEY. No; I did not say that. I am glad to answer his question. What I said was that there was not a project put into this bill—and it was thoroughly understood that no project should be put in it—simply because a Member of Congress wanted it or because a Member of Congress indorsed it; that it was bare of the objection or contention that the items were inserted as favors to Members; that there was no chance to say that there was "pork" in the bill; that the bill came here simply and solely the product of the recommendations of the engineers, the product of the indorsement of the department, and not only the product of such indorsement in ordinary circumstances, but with the added value of its being said that it was to be done growing out of and as an aid to the present emergency.

Mr. MADDEN. I am very sorry to hear the gentleman from New York say that there is no "pork" in the bill, because I think that would be more useful in the war emergency than many of the improvements which are contained in this bill.

Mr. DUPRÉ. The gentleman from Illinois, living in a packers' city, knows more about pork than the gentleman from New York does. [Laughter.]

Mr. DEMPSEY. The bill comes before Congress inviting favorable consideration in another sense, and that is this: For years past there has been a shortage of railway transportation in the United States, and I want to illustrate it by my own county. Niagara County, in the State of New York, is one of the great fruit-growing centers of the whole world. We raise apples, peaches, pears, quinces, and all small fruits in great abundance and of the very best quality. All of those fruits take very high freight rates, but in spite of the fact that they do take high freight rates car after car has been lost through delays in transportation. In the last six years there never has been a time when I have not had a large number of claims in my office for the spoiling of fruit through delays in transportation.

Now we come upon an emergency where the Government calls upon the farmer to increase his production, and the farmer is responding most nobly. The number of acres under cultivation has vastly increased and production will increase accordingly. The needs of the Government for military supplies are going to speed up every factory in the land. The result will be that what comes from the workshops will multiply in volume. The amount of shipments to be offered to the railroads will be doubled in the coming year, and the railroads are not increasing their transportation facilities. Why not? They are not permitted to fix their own freight rates. They have to go to the Interstate Commerce Commission, and they say that they have been so uncertain about rates and have obtained such low rates and have been so uncertain as to income that they have not increased their rolling stock or even kept it up to par. They have not kept their roadbeds in condition. Their transportation facilities instead of increasing have decreased. Now, whatever may be the merits of that contention, whether or not they have obtained adequate rates, the fact is that their rolling stock has decreased and their trackage has grown worse.

Mr. MADDEN. I do not like to interrupt the gentleman so much, but I should like to have him yield to me there.

Mr. DEMPSEY. I yield to the gentleman from Illinois.

Mr. MADDEN. The gentleman from Missouri [Mr. BORLAND] said that the railroad companies fixed the rates. The gentleman does not agree with him, does he?

Mr. DEMPSEY. The gentleman from Missouri [Mr. BORLAND] is in error. I have represented the Government in cases involving freight rates.

Mr. MADDEN. The gentleman agrees with me that the Interstate Commerce Commission fixes the rates.

Mr. MEEKER. Does the Interstate Commerce Commission object to their putting in lower rates?

Mr. MADDEN. Yes; sometimes.

Mr. DEMPSEY. Railroads can not fix their rates at all. They can submit a schedule, but before it goes into effect it must have the approval of the Interstate Commerce Commission, whether the rate be increased or decreased. I do not suppose they every day offer schedules decreasing their rates, but however that may be, here we are planning for a great increase of shipments. The transportation problem, which has been complicated enough for years past, will become vastly more difficult in the near future, and the proposition of those who oppose this bill is that we shall at once disable ourselves in one method of transportation—that we shall abandon waterway transportation and confine ourselves to the railroads, which have proved their utter inadequacy.

Now, take this bill, aside from the indorsement which it has had I say that a very brief examination of it will satisfy those who will look into the matter that the bill is, on an examination of the items, a meritorious bill.

The bill carries $26,000,000, of which $21,500,000 goes into improvements and $4,500,000 into maintenance items. Of the improvement items there are 64, and if you will examine those 64 items you will find this to be the fact. I hold in my hand a list of them which I will insert in the RECORD. You will find that there is practically not one improvement in that list which is not of a river or a harbor so well known that a student of geography in the primary class would admit that it belongs to one of the great classes of waterways in the country which is deserving of the improvement that it receives. Now, mind you, I said in starting that this bill had the imperfections, and only the imperfections, incident to all human undertakings, and some man, in examining the 64 items, might find some three or four which he could criticize. But I say, taking them by and all, taking them on a fair and just review of them all, every fair man will say that they are the projects which a student of geography who has studied it for only a few months would say are the great projects of the country, the ones which deserve and which should receive attention. Here is a list of these projects:

New London	$160,000
Connecticut River	70,100
Narrows of Lake Champlain	300,000
Port Henry Harbor	71,500
New York Harbor	50,000
Hudson River Channel (New York Harbor)	810,500
East River, N. Y	1,250,000
Schuylkill River	300,000
Delaware River	1,870,000
Waterway, Rehoboth to Delaware Bay	50,000
Baltimore Harbor	250,000
Norfolk Harbor and channels	900,000
James River	46,000
Waterway, Norfolk to Beaufort Inlet	100,000
Cape Fear River, below Wilmington	35,000
Charleston Harbor and channels	70,000
Savannah Harbor	500,000
Miami Harbor	160,000
Hillsboro Bay, Fla	300,000
Apalachicola River	18,000
Mobile Harbor and Bar	110,000
Alabama and Coosa Rivers	50,000
Pascagoula Harbor, Miss	113,000
Gulfport Harbor, Miss	80,000
Passes Mouth of Mississippi	1,825,000
Improvements Mermentau to Sabine River, La. and Tex	230,000
Lake Pontchartrain	32,000
Bayous, Louisiana	51,000
Sabine Pass & Port Arthur Canal	300,000
Port Aransas, Tex	100,000
Freeport Harbor, Tex	150,000
Cumberland River improvement, below Nashville	632,000
Tennessee River	401,000
Lorain, Ohio, Harbor	16,500
Cuyahoga River, Cleveland Harbor	500,000
Ohio River, locks and dams, for 9-foot channel	5,000,000
Ashland Harbor, Wis	10,000
Manistee Harbor, Mich	28,700
Harbor Beach Harbor, Mich	100,000
Indiana Harbor, Ind	395,200
Mississippi River, from the mouth of the Ohio to and including mouth of Missouri	350,000
Mississippi, mouth of Missouri to Minneapolis	1,200,000
Mississippi and Leach Rivers	50,000
Osage and Gasconade Rivers, Kans	20,000
Kansas River	10,000
Missouri River, for 6-foot channel, Kansas City to mouth	1,000,000
San Diego Harbor	154,000
Los Angeles Harbor	50,000
Oakland Harbor, Cal	92,000
Richmond Harbor, Cal	100,000
Humboldt Parkway and Bay	190,500
San Pablo Bay and Mare Island	330,000
Coos Bay, Oreg	70,000
Columbia and Snake Rivers	70,000
Willamette River	80,000
Lewis River, Wash	13,500
Columbia and Willamette	310,000
Grays Harbor Wash	85,000
Lake Washington Ship Canal	200,000
Yukon River, Alaska	45,000
Nome Harbor, Alaska	105,000
Honolulu Harbor	50,000
Hilo Harbor	150,000
San Juan Harbor, Porto Rico	400,000
Total	21,565,500

Mr. MADDEN. Will the gentleman tell the committee how much there is in the bill for harbor improvements altogether?

Mr. DEMPSEY. For harbor improvements as distinguished from rivers?

Mr. MADDEN. Yes.

Mr. DEMPSEY. I could not say offhand.

Mr. MADDEN. Approximately. I do not care about the exact figures.

Mr. DEMPSEY. I do not believe I could give an estimate of the rivers as distinguished from the harbors. I can figure that out, and I will tell the gentleman afterwards.

Mr. MADDEN. I want to say to the gentleman that I am very strongly in favor of all harbor improvements.

Mr. DEMPSEY. In this list of 64, the gentleman, I think, can readily figure out which are rivers and which are harbors, and I think he will find that in amount—perhaps not in the number of items, but in amount—a very large proportion, very much more than half, are for the improvement of harbors and not of rivers

Mr. MADDEN. Will the gentleman yield?

Mr. DEMPSEY. I will.

Mr. MADDEN. I have understood that there was only $4,500,000 for harbor improvement, and the rest was for river improvement where there is no navigation. I have not expert knowledge of that, and I ask the gentleman because he is an expert.

Mr. DEMPSEY. The gentleman is very kind, but I think his idea as to the amount can not be correct, owing to the fact that the East River, which means a harbor in New York, as the gentleman heard eloquently explained yesterday, has $1,250,000 alone.

Mr. MADDEN. That will not be finished for three years, and it is a war measure, too.

Mr. DEMPSEY. But I am talking about the proportion between rivers and harbors, and I was calling the gentleman's attention to the fact that East River, N. Y., took a million and a quarter alone.

Mr. SMALL. Was the gentleman from Illinois referring to new projects?

Mr. MADDEN. No; but to the maintenance of harbors.

Mr. SMALL. In order to get the clear distinction, there is a difference between maintenance and appropriating for improvements.

Mr. MADDEN. I am in favor of appropriations for all maintenance of harbors to facilitate the movement of traffic.

Mr. SMALL. Does the gentleman exclude the maintenance of river improvement?

Mr. MADDEN. Exactly, because as a rule the rivers are only appropriated for and the money expended on them as a matter of sentiment, as there is no navigation or commerce on them.

Mr. SMALL. I do not agree with the gentleman; but I was going to say that in the new projects much more than half of the appropriation for new projects are for harbors.

Mr. MADDEN. That may be true, but they can not under any circumstances be classed as an emergency war measure, because everyone will realize that you can not start a new project and complete it so as to be able to take advantage of it during the war.

Mr. MEEKER. Will the gentleman kindly inform us how long the war will last?

Mr. MADDEN. I do not know, but they are proceeding on the theory that it is going to last three years, and the nearest approach that anybody has been able to come to the completion of the most expeditious project is three years.

Mr. DEMPSEY. I will call attention to a few of the harbor items which catch my eye in scanning this list: New London, $160,000; Narrows of Lake Champlain, $300,000; Port Henry Harbor, $71,500; New York Harbor, $50,000; East River, N. Y., $1,250,000; Baltimore Harbor, $250,000; Norfolk Harbor and Channels, $900,000; Charleston Harbor and Channels, $70,000; Savannah Harbor, $500,000; Miami Harbor, $100,000; Hillsboro Bay, Fla., $300,000; Mobile Harbor and Bar, $110,000; Gulfport Harbor, Miss., $80,000; Sabine Pass and Port Arthur Canal, $300,000; Lorain (Ohio) Harbor, $16,500; Cuyahoga River, Cleveland Harbor, $500,000; Ashland Harbor, Wis., $10,000; Harbor Beach Harbor, Mich., $100,000.

Mr. MADDEN. All of these large sums are for new projects for enlargement of the channels?

Mr. DEMPSEY. No; what I have read to you are harbor improvements, and I should say that they constitute very much more than half of the improvement items in the present bill.

Now, yesterday morning those of us who read the Washington Post observed this, no doubt, that there was a report that this Government, facing the transportation problem to which I have adverted, knowing that there would be vastly increased products of the farm and the factory, knowing that the factories would be run at high speed, knowing the necessity of placing the products of the farm and the workshops at designated places for the use of the Army and our allies, was contemplating and had formed the project of expending $150,000,000 in the construction of 100,000 freight cars.

Now, they do not expect to increase the trackage or the switches. They could not increase any of the railroad facilities except simply the number of cars. There is not simply a shortage of cars. There is a shortage of all of the items which go into railroad transportation. Are you going to help the Government at this time, when it is taking such extraordinary measures to meet this emergency, by practically crippling river and harbor transportation?

Mr. STAFFORD. Will the gentleman yield?

Mr. DEMPSEY. I will.

Mr. STAFFORD. I know that the gentleman is quite cognizant with conditions in New York Harbor. I listened attentively to the address made by his colleague [Mr. HULBERT] yesterday, in which he advocated the expenditure of $600,000 in providing a new channel in the Hudson River. Those of us who have noticed the Delaware and the Hudson Rivers recently are impressed with the fact that there is less shipping plying on those streams by reason of the shortage of ships than at any other time before. Does the gentleman think there is need for an additional channel over the existing one?

Mr. MOORE of Pennsylvania. If the gentleman from New York will pardon me, I wish to say that the Delaware River has been busier within the last year than ever before in its history, and the remark of the gentleman from Wisconsin does not apply to that stream.

Mr. STAFFORD. I would like to have the gentleman give us the facts because any visitor going across the river knows that at the present time there is not the same activity in shipping that has been present heretofore.

Mr. MOORE of Pennsylvania. That river has never done more business than it has during the last few years.

Mr. DEMPSEY. I am glad that the gentleman from Wisconsin has asked the question. I think he propounded it in a spirit of good faith, and I want to give him, so far as I can, an answer, and I think I can answer him. There are two answers to his proposition. In the first place, the great barge canal in the State of New York is just nearing completion. The transportation upon that waterway has been practically in abeyance during the entire period of the construction of the barge canal. Of course, tonnage on the Hudson would decrease very largely in proportion to the decrease in the tonnage across the State on the Erie Canal. That is your first answer.

Now, as to ships. I quite agree with the gentleman that there is a shortage of ships. I quite agree with the gentleman that a study of statistics shows that there has not been the increase in shipping that you would naturally expect from the increase in tonnage in the country, except on the seaboards, and I say to you that that is to be explained in this way: Railroads have experts whom they hire at large salaries, experts not alone theoretically, but practically, who have proven through long years of service their ability to acquire traffic and to handle it after it is acquired, and it is their business to get the traffic and to handle it. Who looks after your tonnage upon the streams in the interior of the United States? Who provides terminal facilities? Who is there to solicit traffic; who is there to make it easy for traffic to go by water? There is no one, and I say in answer to the gentleman this, that while I believe there are weaknesses and will be weaknesses in such things as the Council of National Defense, yet I believe just as much in the patriotism and ability of the American people as I believe that the resources of the country are inexhaustible, and that in this time of stress and need this problem of water transportation will attract to its solution the brains which have been devoted to railroad transportation. They will find a way to make traffic go to the streams; they will find a way to provide the ships with which to transport that traffic, and in that way the problem of transportation by water will be solved. Take, for instance, in my own State. What do you find? You find up at Fort Henry, on Lake Champlain, that they produce 800,000 tons of ore annually.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. SWITZER. I yield the gentleman 10 minutes more.

Mr. DEMPSEY. What part of that traffic do you suppose has been transported by water? Every student of transportation problems recognizes the fact that ore, lumber, grain, steel, products of that kind that are not perishable, that are bulky, should be transported by water, and yet of those 800,000 tons only 5 per cent have been transported by water; and why? The harbor at Fort Henry has been so shallow that even the 12-foot barges of the canal could not get in there. It is but 5 feet in depth. If they could get into the harbor, then when they got down to the narrows of Lake Champlain the depth there is insufficient to enable them to get through. The Narrows are such under present conditions that they can only run a steamer through; they must disconnect from the barges or take them one at a time. I believe that as a result of the application of intelligence and thought and energy and brains to this problem you will find not only control of food production and distribution in the country but they will say that the kind of product which is fitted to be carried in a slow way by water shall go by water, and that those 800,000 tons must be transported in that way, and you will leave to the railroad the transportation of the lighter, more perishable products, and in that way and in that way only will you solve the transportation problem and enable all of the products of this country to properly get to market.

Mr. STAFFORD. How much is contemplated to be expended on this channel to which the gentleman refers?

Mr. DEMPSEY. Three hundred and seventy-one thousand dollars.

Mr. SMALL. If the gentleman will pardon me, I think the gentleman from Wisconsin means the total amount. It is $780,000.

Mr. DEMPSEY. I thought the gentleman meant the amount carried in this bill.

Mr. STAFFORD. No. Do I understand the gentleman to say that the total 800,000 tons will utilize this channel?

Mr. DEMPSEY. Not alone that. That is one item. That is one kind of product—iron ore—from certain mines at Fort Henry, but that is not the total product that will use it.

Mr. STAFFORD. What is the season of navigation in the district to which the gentleman refers?

Mr. DEMPSEY. I should imagine it is the same as it is on the Erie Canal, and their navigation is from May until December.

Mr. STAFFORD. So during the closed season they would have to necessarily utilize the railroads for transportation?

Mr. DEMPSEY. Yes.

Mr. STAFFORD. It would be the same situation that we have on the Great Lakes.

Mr. PLATT. Can the gentleman tell where the Fort Henry ore is smelted now?

Mr. DEMPSEY. I do not know.

Mr. PLATT. It used to be smelted at Poughkeepsie, my home town, and come down by canal boats, but the furnaces there have been destroyed and wiped out.

Mr. STAFFORD. If I understand the gentleman's colleague, it is not certain whether the 800,000 tons would be shipped in that way at all.

Mr. DEMPSEY. It would all be shipped.

Mr. STAFFORD. The question is which is the most economical way to reach the furnaces, whether it should be shipped by boat or partly by boat and partly by rail.

Mr. DEMPSEY. It is right there at the harbor.

Mr. STAFFORD. There is the further question of finding out whether any of it needs to be transshipped from boat to cars or entirely by a boat.

Mr. DEMPSEY. I do not think there is a steel plant or furnace in the United States that is not located where it has water facilities. I do not know of any.

Mr. STAFFORD. Take, for instance, the Great Cambria Steel Mills. They are located on the Conemaugh River at Johnstown, and they get their freight both by rail and by boat. I can cite many instances of large furnaces where they are not located on any navigable stream.

Mr. DEMPSEY. Yes——

Mr. STAFFORD. Take the furnaces in Pennsylvania. They get their ore part by lake and part by rail.

Mr. DEMPSEY. That is true, for instance, at Buffalo. The gentleman is entirely right. They get their limestone by rail. I think they get all their limestone by rail.

Mr. STAFFORD. Take the Bethlehem Works, take the Cambria Works—I can enumerate some of the largest works where they get their ore largely by rail and partly by rail and partly by water.

Mr. DEMPSEY. The gentleman is entirely correct. I want to call attention to the experience of the State of New York of the value of railway transportation. That State bears the proud title of the "Empire State." At an early day it constructed the Erie Canal, with a length of over 300 miles from Buffalo to Albany. The State has grown to have a population of 12,000,000 of people, and you will find to-day that the people have located and the wealth and population are along the Erie Canal. Now, I have not looked up the figures recently, but my understanding is that 90 per cent of the entire population of that great State is in the villages and cities on the length of that canal and at the foot of the Hudson River—New York City.

Mr. MADDEN. In the villages?

Mr. DEMPSEY. Cities and villages along the canal?

Mr. MADDEN. That includes New York City?

Mr. DEMPSEY. That includes New York City, at the foot of the Hudson.

Mr. MADDEN. Ninety per cent, over 10,000,000 people, living in the cities——

Mr. DEMPSEY. There is not really a city in the whole State away from the canal. The only two I can think of—and one of them is on the water—are Watertown and Elmira. So we have been proud of the fact that that State, which has justly won the title of the Empire State, in population, in resources, and in wealth, has constantly improved its waterways, and we believe that water transportation tends to the growth and the prosperity of any community which maintains it. [Applause.]

Now, there has been an argument advanced here from the saving standpoint, and the gentleman from Wisconsin [Mr. FREAR] said that the country had been saved $100,000,000 on several occasions by our failure to pass river and harbor bills. I want to give an illustration of that. Take a farmer: In the pride and vigor of youth, in the alertness and strength of middle age, he goes out on his broad acres and cultivates every field of them. He produces large crops. He puts forth a proportionate expense. Take the same man in the feebleness of old age: He cultivates only one field in four. He reduces the expenses, to be sure, but he produces practically nothing. Will anybody call that a saving? So I say that the failure of river and harbor bills in these past years has been just that kind of a saving. [Applause.]

Mr. FREAR. Will the gentleman yield?

Mr. DEMPSEY. I do.

Mr. FREAR. Will the gentleman cite a single instance where the Government has suffered or private interests have suffered by the failure of these waterway bills to be put through; that is, where the railroads have not in every case met the demands of the occasion?

Mr. DEMPSEY. I would say in my own county of Niagara, where I have had personal experience, that to-day I have 70 claims against the New York Central Railroad for the destruction of fruit through delays in furnishing transportation; and I say that as illustrative of the freight situation throughout the United States. Now, there is not anything that tends more to health than the use in moderation and in proper proportion of fruit as a diet; and here is one of the great articles of diet going to destruction through the fact that we have not adequate transportation facilities.

Mr. FREAR. Will the gentleman yield on that point?

Mr DEMPSEY. Surely I will.

Mr. FREAR. The gentleman is not claiming, of course, the waterways would be adapted for the carrying of that fruit? It is only by the ton of apples carried, as I remember the gentleman's district up there.

Mr. DEMPSEY. It is claimed, on the other hand, that if the Simonds saw factory, and if other factories which produce steel and commodities of a bulky and heavy nature and which can not be injured at all through delays in transportation had been shipped by canal and by water, that then there would have been all this increased facility for the transportation of light and perishable commodities.

Mr. FREAR. Will the gentleman yield again?

Mr. DEMPSEY. Surely.

Mr. FREAR. Upon the Mississippi River, which is the largest river in the country, there is not a single line running from St. Louis to New Orleans——

Mr. DEMPSEY. I say that is not to the shame of the waterways but it is to the shame of the men who have had the transportation problem in hand, we ourselves, that we have not found the brains to devote itself to acquiring freight for those rivers and having ships built to transport it.

Mr. FREAR. I would like to agree with the gentleman on this point, that it is an entire lack of proceeding with it in a systematic way, as under the present system we are simply placing money in there without any return.

Mr. DEMPSEY. This emergency will develop the brains and we ought to and will turn our energies in that direction——

The CHAIRMAN. The time of the gentleman has expired.

Mr. DEMPSEY. I would like to have about five minutes more in order to close.

Mr. SWITZER. I yield the gentleman five minutes additional.

Mr. DEMPSEY. Now, another argument that has been made here is that in this time of stress and emergency we should save money. And I do not agree with that argument. Why, gentlemen, with the expenditure of the enormous sums that will be expended this country is about to enter upon a rising tide of prosperity such as the world has never witnessed. Taxes will be high, but they will not rise even in proportion or in the same percentage as this swell of the tide of prosperity. People will have to pay high taxes, but they can meet them from increased returns, and they will meet them gladly and well.

And then one other argument that has been advanced is that we should not withdraw these engineers. Why, gentlemen, the principle of the conscription bill is that if a man is more valuable to his industry than he is at the front he shall be kept at his industry. And that is the principle that you should apply here.

Then they say there will be a shortage of labor. There is a shortage of labor, but instead of increasing it is going to decrease. Why? Gentlemen, in this time of stress and need we are going to see here as we have seen way across the Atlantic, in every country which is suffering under this dreadful war, woman arise to take the place that has been vacated by man. And while there is going to be a call upon the young manhood of the country for its military needs, woman will take its place in increasing numbers, and that problem will be solved in that way.

I thank you. [Applause.]

EXTENSION OF REMARKS.

Mr. LONERGAN. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by publishing a brief

statement and some editorials from Connecticut newspapers on the life and achievements of Nathan Hale, the Revolutionary patriot.

The CHAIRMAN (Mr. HOUSTON). The gentleman from Connecticut asks unanimous consent to extend his remarks in the RECORD as stated by him. Is there objection? [After a pause.] The Chair hears none.

Mr. DEMPSEY. Mr. Chairman, may I ask unanimous consent to revise and extend my remarks in the RECORD?

The CHAIRMAN. The gentleman from New York asks unanimous consent to revise and extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. SMALL. Mr. Chairman, I would like to make the same request as to some remarks I made yesterday.

The CHAIRMAN. The gentleman from North Carolina makes the same request. Is there objection?

There was no objection.

Mr. KETTNER. Mr. Chairman, I make the same request.

The CHAIRMAN. The gentleman from California makes a request now to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

RIVERS AND HARBORS.

Mr. SMALL. Mr. Chairman, I yield 30 minutes to the gentleman from California [Mr. KETTNER].

Mr. KETTNER. Mr. Chairman, yesterday the gentleman from Wisconsin [Mr. FREAR] mentioned a certain amount of money held by the engineers, and I personally thought he was trying to convey the thought that that money was available to use at the present time for new projects. At the time I tried to explain a certain project in which I am personally interested.

The last river and harbor bill that passed the Congress appropriated $220,000 for San Diego, on condition that San Diego deed a certain amount of land to the Government. The abstract is not finished and the money has not yet been spent. This sum is available for this project only when that deed or that transaction is finished and the land deeded to the Government.

The chairman of our committee also mentioned a great many cases that were along the same line. For that reason I am afraid that a great many people who read the RECORD will misunderstand the gentleman from Wisconsin [Mr. FREAR] and think that these millions are available for projects that we are considering in this bill.

Now, Mr. Chairman, I am in favor of this bill, for the following reasons:

First. The railroad companies have admitted before the Interstate Commerce Commission that they are not able to haul the freight at the present time.

Second. They have asked an increase of 15 per cent.

Third. If the Members will inquire they will find that Gen. Black, instead of being in the State, War, and Navy Building, is at the present time in the Munsey Building, with a corps of engineers, working with the department on river transportation, so as to be able to transport food products from one section of the country to another.

Fourth. I have been reliably informed that the money carried in this bill will complete a number of projects to such an extent that they may be utilized for transportation purposes.

It seems to me, Mr. Chairman, that if ever we needed a river and harbor bill we need it at the present time.

Mr. PLATT. Will the gentleman yield for a question?

Mr. KETTNER. I will.

Mr. PLATT. I wondered whether the railroads had asked for enough in that 15 per cent to enable the rivers to compete with them. Ought they not to ask 20 per cent? You want to get the railroad rates high enough so that the rivers can do business and keep them there.

Mr. KETTNER. If the gentleman will inquire—or take the time to look up the facts—he will find that the river transportation wherever it is opened up is cheaper than railroad transportation, and the railroads go to the Interstate Commerce Commission and ask for the privilege of reducing their rates to meet water competition.

Mr. PLATT. I know this: That the Hudson River, with 30 feet of water over half its length and 12 feet of water over the rest of its navigable length, loses traffic in spite of its depth. Why is that?

Mr. SMALL. May I ask the gentleman a question? The gentleman has referred more than once in this discussion to the low rates, the competitive rail rate with water rate. Is the gentleman in favor of permitting the railroads to lower their rates in competition with water and drive off the water carriers and recoup the higher rates from interior points?

Mr. PLATT. I think they can do that under existing law, but I do not think they would be allowed to put them down, and drive water transportation out. I think they should put them up so that the boats can run.

Mr. SMALL. The gentleman and I are not far apart. I believe the improvement of rivers is for the purpose of developing water commerce.

Mr. PLATT. That is what it should be, in my opinion.

Mr. SMALL. And that is primary justification for the expenditure of public money for that. Nevertheless they ought not to be permitted to lower the rail rates to drive out the water carriers and then recoup from the interior. Perhaps the time may come when the Interstate Commerce Commission may be clothed with the power to regulate competitive rail rates with the water rates.

Mr. KETTNER. Mr. Chairman, I hope this discussion between the gentlemen is not taken out of my time.

Mr. DEMPSEY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield further?

Mr. KETTNER. I yield to the gentleman from New York.

Mr. DEMPSEY. Is the gentleman aware of the fact, in answer to the question propounded by my colleague from New York [Mr. PLATT], that the reason for lessening the cost of transportation on the Hudson River is, as I stated, that the transportation is through transportation, which would go through the Erie Canal, and that the Barge Canal has been in process of construction for seven or eight years, during which time there has been practically no through transportation except by rail, and that is through to the north by Lake Champlain and through the Oswego Canal as well as by the Erie Canal. There has been an absolute abeyance of water transportation owing to the noncompletion of those two improvements.

Mr. PLATT. Mr. Chairman, will the gentleman yield?

Mr. KETTNER. No; I regret I must decline to yield.

The CHAIRMAN. The gentleman declines to yield further.

Mr. KETTNER. Mr. Chairman, yesterday I asked the gentleman from Wisconsin [Mr. STAFFORD] why the minority did not bring in a report advocating the projects that they claim they favor; in other words, seven members of the committee bring in a minority report and make the claim that they are in favor of river and harbor improvements to a certain extent, but not in favor of this bill. I have been a member of the committee for several years. I will admit that there have been a great number of projects in bills in the past that I did not approve; there are some in this bill, but I do claim that 80 per cent of the projects in this bill are meritorious and should be adopted.

Mr. MADDEN. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. KETTNER. I yield to the gentleman.

Mr. MADDEN. How many members are there on the Committee on Rivers and Harbors?

Mr. KETTNER. Twenty-one.

Mr. MADDEN. And 7 signed the minority report and 14 are in favor of the bill. I see 3 members of the 14 composing the majority on the floor—no; I see 4 of them and none of the minority.

Mr. COX. Three members of the majority?

Mr. MADDEN. Yes; and only four members of the whole committee are now in the House.

Mr. KETTNER. Mr. Chairman, the point I am trying to make is this: If those seven members are really in favor of certain projects, why do they not indorse those projects in their minority report, so that the House could vote and adopt what they thought was right? As they have left it, you must either kill the bill, including the 80 per cent that is good, or adopt it all.

I do not believe in the commission proposed in this bill. As a business man I have my own views. I was speaking to the gentleman from Wisconsin [Mr. STAFFORD] yesterday, and I agreed with him to a large extent. I really believe that we have the best engineers in our War Department that can be found anywhere in the world. I am not making the statement that they know all about traffic. But, gentlemen, if we came together as directors of a corporation, what would we do? We would select a traffic manager, and after the engineers had reported upon the advisability of a certain project and what the cost would be, the traffic manager would go over the figures and see whether the corporation should undertake it as a business proposition. I think that is a simple way of going about it, and why can not the Government secure the services of a thoroughly competent man who understands transportation, let him study the traffic conditions and submit his conclusions with those of the engineers. Then the Congress, sitting as a board

of directors could act intelligently and thus do away with all of this talk about "pork."

Mr. Chairman, I heartily indorse this bill. I want to say again that I think it is the best bill that has been brought before this House since I have been a Member. Every project in the bill has been indorsed by the local engineers, by the Board of Engineers, by the Chief of Engineers, by the Secretary of War, and by the President

Now, we may make statements here that the Secretary of War does not know anything about it, but I claim he does. He knows just as much about this as he does about any other bill that he recommends to Congress.

Mr. Chairman, the gentleman from Alabama [Mr. DENT], the chairman of the Committee on Military Affairs, introduced a bill on June 7, H. R. 4892, regarding an aviation site in California.

A bill (H. R. 4892) authorizing the President to take possession, on behalf of the United States, for use as sites for permanent aviation stations for the Army and Navy and for aviation school purposes of the whole of North Island in the harbor of San Diego, Cal., and for other purposes.

Be it enacted, etc., That the President be, and he is hereby authorized to cause possession to be taken forthwith, on behalf of the United States, for use as sites for permanent aviation stations for the Army and Navy and for aviation school purposes, of the whole of North Island, in the harbor of San Diego, Cal., and the provisions of section 355, Revised Statutes, shall not apply to the expenditure of any appropriations for improvements thereon for aviation purposes.

The Attorney General or the claimants to the said North Island are authorized to make application for the determination and appraisement of any rights private parties may have in the said island over and beyond any rights thereto in the United States to the District Court of the United States for the Souhern District of California; the proceedings to be prosecuted in accordance with the laws of the State of California relating to the condemnation of property for public use. Either party may take an appeal from the judgment of such court direct to the Supreme Court of the United States within 90 days after such judgment is rendered. Upon the final ascertainment of the value of any right, title, or interest adjudged to be in any private claimants to the said island there shall be paid into court the value of the same as so determined, together with interest thereon at the rate of 6 per cent per annum from date possession thereof was taken as herein authorized; and thereupon the United States shall be vested with title to said lands. The amount so paid shall be distributed by order of the court to the owner or owners of such right, title, or interest in said island as their respective interests may be determined by the court. The amount necessary to pay the awards in favor of private claimants is hereby appropriated, out of any money in the Treasury not otherwise specifically appropriated, to be disbursed under orders of the Secretary of War.

Mr. Chairman, since we are actually in the war our Army and Navy officers are looking for the very best places in which to perfect their organization for rapid and efficient training. Very little, if anything, in the way of political suggestion, in my opinion, has entered into the subject; and upon reports submitted by those officers, who are trained and have made the different matters a lifework, the Secretary of War submitted to the Military Committee on May 17, 1917, a recommendation that the United States acquire immediately for aviation purposes a piece of land situated on the Bay of San Diego and known as North Island, in the following communication:

THE CHAIRMAN, COMMITTEE ON MILITARY AFFAIRS, HOUSE OF REPRESENTATIVES.

SIR: The question of the selection of a site for an aviation school was considered by a commission appointed under act of Congress approved March 4, 1915 (38 Stat., 1064); the commission recommending the purchase of a site on North Island, San Diego Harbor, Cal., then in use by the aviation school, as the best site for the purpose, provided the Government has such rights therein, that the site could be obtained at a reasonable cost. If the Government has no such rights, the commission recommended, as its second choice, the acquisition of a site on Coronado Heights, San Diego, Cal., expressing the opinion that $300,000 would be a fair and equitable estimate for this site.

Based on the said estimate, an appropriation was made in the Army appropriation act of August 29, 1916 (39 Stat., 622), the language of the appropriation reading as follows:

"For the acquisition by purchase or by condemnation of a site or sites in the State of California for an aviation school and training grounds of the Signal Corps of the United States Army, not to exceed $300,000."

The naval appropriation act of August 29, 1916 (39 Stat., 556, 568), contains an item authorizing the Secretary of the Navy "to purchase 232 acres of land on or near the Bay of San Diego, San Diego County, Cal., to be used for advance base, expeditionary, and aviation purposes, to cost not exceeding $250,000: *Provided*, That at the same time the city of San Diego, San Diego County, Cal., donates, free of encumbrance, to the United States Government a parcel of 500 acres of adjoining tide lands of the Bay of San Diego, known as Dutch Flat without cost to the United States Government for the purpose of establishing a naval base thereon."

Following these appropriations the question of the acquisition of lands at San Diego, Cal., for aviation purposes was taken up with the Naval Board with the view of the acquisition of an area on North Island, by the consolidation of both appropriations, sufficient for the needs of both departments. It was the view of the board, concurred in by the commanding officer of the Army Aviation School at San Diego, Cal., that North Island was large enough to accommodate the needs of both the Army and the Navy; and that the site would be immediately available for use without any additional outlay of money for the improvement of the land, while Coronado Heights would require approximately $250,000 to improve the land alone so as to nearly accommodate the present demands of Army aviation at San Diego.

The question has received further consideration by a joint board of Army and Navy officers. The report of this board, dated May 5, 1917, has received the approval of the heads of both departments, and the findings and recommendation of the board, as approved, are as follows:

"The board is of the opinion that North Island, San Diego, Cal., is the best location in this country for the establishment of a joint Army and Navy aviation station for the primary training of pilots. The question of the legal ownership of North Island, and also the high price requested of the Government by its claimants, have prevented for a period of several years the final determination of the site for a Government aviation training station in Southern California.

"The board recommends that the authority of Congress be obtained for immediately taking possession of North Island, San Diego, Cal., for the joint uses of the Army and Navy air services * * *. The question of compensation can be settled at some later date."

I have the honor, therefore, to submit a draft of an act for authorizing the President to take possession of North Island for the aviation needs of the Army and the Navy, giving the claimants to the said island the right to proceed in the courts for the determination and appraisement of any rights they may have in the said island over and beyond the rights of the United States thereto, and making an appropriation of the amount necessary to pay the awards in their favor. The act has been so drawn, in view of the fact that the title of the claimants to North Island rests on the confirmation of a Mexican grant, under which grant the Government of Mexico retained the right to take and use the lands for certain defensive purposes. The matter has received consideration by the Department of Justice, which department expresses the opinion that, notwithstanding the issue of a patent based on the confirmation of the Mexican grant, the Government may legally claim the right to use these lands for the purposes specified in the Mexican grant, provided such right is asserted by congressional action. The question is not free from doubt, and it is the view of this department that the legislation should provide, as in the draft submitted, for the determination of the respective rights of the claimants and the Government to these lands and for the payment to the claimants of the appraised value of any rights they may have in said island over and beyond the rights of the United States in the premises. It is accordingly recommended that the legislation take this form and that authority be granted as promptly as possible.

Very respectfully.

NEWTON D. BAKER,
Secretary of War.

In this connection I wish to submit to the Members of the House an account of the events that have led up to this recommendation of the Secretary.

Interest in aviation in San Diego was crystallized some nine years ago, when an aero club was formed, of which Col. D. C. Collier was its organizer and president, and of which I was pleased to be a charter member.

Exhibition flights were held at Coronado, which were followed by a national meet at the San Dominguez field in Los Angeles, which drew the attention of aero enthusiasts to the advantages of southern California. Mr. Glenn Curtis was prominent at that meet and shortly thereafter selected a site for a school on North Island, on San Diego Bay, as one of the most favored spots in this country, and this is where he flew his first hydroplane.

In the fall of 1912 the Signal Corps of the United States sent the first detachment to North Island, and in June, 1913, another detachment was sent there from Texas City. I quote from a report by Col. Reber:

On its departure from Texas City a detachment was left for duty with the second division, and this detachment rejoined the school at San Diego in November, 1913. In June of 1913 a detachment was sent from San Diego to Hawaii and returned to the former place in August of 1914. In the early part of March, 1913, an aviation detachment was organized in the Philippine Islands. In December of that year the school at San Diego for the theoretical and practical instruction in aviation was announced to the Army as the Signal Corps Aviation School, per Special Orders No. 79, War Department, 1913, and was made a part of the educational system of the United States Army by paragraph 449, Army Regulations, 1913.

The report of the Chief Signal Officer for 1914, page 18, states:

From June, 1913, to February, 1914, an amount of flying quite unprecedented in the history of aviation in the United States was carried on at the Signal Corps Aviation School, San Diego, Cal.

He mentions the impetus given the work of aviation under the act of July 18, 1914, gives some of the cross-country records that were made, and states:

During the year there were a total of 3,340 flights made with an aggregate time in the air of 747 hours and 50 minutes, 796 passengers being carried.

On page 25 of this report he further states:

The wisdom of locating the Signal Corps Aviation School at San Diego, Cal., was shown by the results obtained during the year. Some of the most important points to be considered in the selection of a site for a training station are the following:

(a) There must be quiet air during some part of the day.
(b) The weather must be uniform, so that flying practice can be continued from day to day.
(c) There should be plenty of suitable landing places.
(d) There should be facilities for carrying on over-land and over-water flying in close proximity to each other.

If these conditions are fulfilled and suitable training machines and competent instructors provided, the danger involved in teaching men to fly is reduced to a minimum. As this work is extremely dangerous, however, even under the best conditions, it is most important that every advantage be given the men who are daily risking their lives in order to carry on this work.

All of the conditions for a suitable training station are more completely fulfilled at San Diego, Cal., than at any other point in the United States. This locality has been used as a training station for the past four years by the Army, the Navy, and several civilians. All agree that for training purposes it is unexcelled.

The Signal Corps Aviation School is now located on North Island, in San Diego Bay. The Government is indebted to the owners of the land upon which the school is situated for the use of this ground, which is not even leased and for which not one cent of rent has ever been paid. The owners are willing enough for the Government to use North Island, but are unwilling to enter into a lease for a definite period of time. This might appear like a very profitable arrangement for the Government, but it is not, for a plant is being built upon land which the Signal Corps might be called on to vacate at any time. * * * It is therefore recommended that steps be taken at once to secure a permanent location for the Signal Corps Aviation School on or near North Island.

In his report of 1915, on pages 11 and 12, the Chief Signal Officer, Gen. Scriven, gives an account of the development of the school, gives a number of records that have been established, and states:

During the year 3,458 flights of a total duration of 1,269 hours and 50 minutes were made and 1,730 passengers carried.

Only 118 more flights than in 1914, but 522 more hours, with 940 more passengers, which seems to indicate progression to the more difficult tasks.

During the year 1916, 7,206 flights were made, with a total duration of 3,333 hours and 51 minutes, 3,748 flights and a duration of 2,064 hours more than in 1915.

It was during this year of the expositions, 1915, that some 200 Senators and Representatives visited San Diego, and a number of them were passengers in the flights above referred to. I remember very well the flight of the gentleman from Ohio [Mr. GORDON], member of the Military Affairs Committee, who went up some 1,500 feet. On the same day the gentleman from Illinois [Mr. BRITTEN], as well as his good wife, experienced the sensations of flying in the care of an expert; and Senator MCCUMBER also availed himself of the opportunity and stayed in the air some 20 minutes. On other occasions I had the pleasure of watching Senator SMOOT, Senator ROBINSON, Mr. LEE of Georgia, Mr. TREADWAY, of Massachusetts, and others fly over the bay and city, starting from North Island. If I remember correctly, the hydroaeroplane type was used in all of those flights.

Very recently a party visited the island, including Mr. PADGETT, chairman of the Committee on Naval Affairs; Mr. BUTLER, of Pennsylvania; Mr. DILLON, of North Dakota; and Mr. RUBEY, of Missouri. At that time the betting odds were even on whether or not the House would be Democratic, and while it may have been that the only reason why the men did not fly was because they were too busy looking over the workshops and the equipment to take the time, the fact remains that Mrs. Padgett was the only one who was taken up, remaining some 30 minutes and going up about 2,000 feet.

The entrance of the United States into the war has made the situation acute. It is estimated that at the beginning of the war France had 300 aeroplanes, Germany 300, and Great Britain 100, and a little over two years thereafter about 10,000 military aeroplanes were being used in Europe.

A Washington paper a few days ago stated that arrangements had been made for the construction of 3,500 aeroplanes and the instruction of 6,000 aviators this year, as I understand it, in the United States. Besides these, there is a necessity for training aero reserves and the other units required for maintenance of the number of American aviators at the front. It is an enormous task and requires the greater effort, inasmuch as we are behind the procession in equipment and numbers.

In this connection the opinion of Lord Kitchener on the importance of aviation in the service should be remembered.

In the first year of the war: "One aviator and aeroplane are worth 4,000 men."

In the second year of the war: "An aviator is worth an army corps."

In a hearing before the Committee on Naval Affairs of the Senate, when they were considering the Helm reports, February 20, 1917, the following is recorded:

Senator SWANSON. What is the best place for an aviation school on the Pacific coast?

Admiral HELM. San Diego.

Senator PHELAN. Yes; that is the best place in the world.

San Diego at the present time, I believe, holds the record for the highest flight. I was present at North Island when the first wireless message was sent from one machine to another in the air.

Col. Glassford kindly presented me with the slip of paper upon which the message was written by the aviator who took it, which I had framed, and it now hangs in my office.

Col. A. L. Dade, of the Signal Corps, the present commandant in charge of the aviation school at North Island, in speaking of North Island, made the following remarks:

There may be somewhere in the world as good a location for aviation as North Island, but no one as yet has been able to find it.

In the Sixty-fourth Congress Senator Works, of Los Angeles, proposed and had adopted by the Senate an amendment to the Army bill for $300,000, to be appropriated for the purchase of land. When this bill reached the conferees, they agreed to the compromise which appears in the act of March 4, 1915, as follows:

The Secretary of War is hereby authorized and directed to appoint a commission of not more than three Army officers, whose duty it shall be to report upon the advisability of the acquirement by the United States Government of land near the Bay of San Diego, San Diego County, Cal., and elsewhere on the Pacific, Gulf, and Atlantic coasts, for an aviation school and training grounds of the Signal Corps of the United States Army, and said commission shall ascertain and report what would be the probable cost of acquiring such land, and the sum of $1,000, or so much thereof as may be necessary, is hereby appropriated to defray any expenses incurred by the said commission in the performance of the duties herein imposed upon it.

In compliance with that law the Secretary of War selected Col. Samuel Reber, Signal Corps, and Capt. R. C. Marshall, jr., Quartermaster's Corps to make the proper inspection and recommend sites. After an exhaustive study of the Atlantic and Pacific coasts, they submitted a voluminous report, House Document 687, which gives the weather conditions of 9 representative cities of different sections, the distribution of thunderstorms of some 123 cities, and the wind directions and velocity, with the following recommendation. I quote:

6. The site for the aviation school of the Signal Corps should possess certain geographical, climatological, and topographical characteristics. The site should be located on an ocean or bay and in close vicinity to existing railway lines, with easy access to them. The climatological characteristics should be such as to give the greatest number of working days possible throughout the year, with suitable air, moisture, and temperature conditions, while the topography of the terrain in the vicinity should be such as to contain many accidental features with good landing places. The flying field itself should be a fairly level tract of land, free from obstructions, and the landing beach should be easily accessible both from the land and water sides without a great expanse of tide flats, with fairly deep water close to the shore line.

7. The terrain in the vicinity of San Diego Bay, Cal., fulfills the foregoing conditions better than any other section of the United States. A study of the climatological data of the locations visited by the commission, which was compiled by the Chief of the Weather Bureau at the request of the commission (data hereto appended marked A, A 1, A 2, A 3, A 4, and A 5), clearly indicates that the littoral of San Diego Bay contains the best sites for the establishment of an aviation section, as far as weather and air conditions are concerned. The rail and water connections at San Diego are ample for the purposes of transportation and communication. The country in the vicinity of San Diego, as indicated by the accompanying map (hereto appended, marked B), shows terrain of every description from level land to mountains, and possesses characteristics that can be found in no other part of the country—the ocean on one side and the quiet waters of the Bay of San Diego on the other side, with a long peninsula connecting North Island and Coronado to the mainland.

One site is North Island, where the Signal Corps Aviation School is temporarily located and which has been occupied, through the courtesy of the Spreckels Cos., since the middle of 1913 without expense to the Government. The Spreckels Cos., in a letter dated December 1, 1915, copy of which is hereto appended, marked C, has requested the Signal Corps to vacate this tract of land as soon as practicable after March 31, 1916. North Island is the best possible site for the location of the aviation school.

9. When the Spreckels Cos. was requested to quote prices on these sites the vice president and managing director verbally advised the commission that site No. 1 is not on the market, and the prices in his letter of March 22, 1915 (Appendix D), were those at which the companies hold the land.

10. It having come to the attention of the commission that there is a doubt as to the validity of the title to land on the littoral of San Diego Bay, a request was made on the Judge Advocate General of the Army that the question of these titles be investigated. A preliminary report, a copy of which is hereto appended, marked G, was received on the 29th of this month. The final report dealing more extensively with the question of title can not be submitted prior to March 15, 1916. The nonarrival of the preliminary report before the date mentioned has caused the delay in the rendition of the report of the commission.

In this preliminary report the opinion is expressed that the United States has, for defense purposes at least, a title, or color of title, to land on the littorial of San Diego Bay.

11. It is recommended that in case it is finally ascertained that the United States has title to North Island the Signal Corps Aviation School be located thereon.

Based upon this report $300,000 was appropriated at the next session of Congress for the purchase of a site, no place being designated, the law reading as follows. I quote:

Purchase of land in the State of California for aviation school purposes: For the acquisition, by purchase or by condemnation, of a site or sites in the State of California for an aviation school and training grounds of the Signal Corps of the United States Army not to exceed $300,000.

It might be well at this point to show something of the opinion of people in civil life concerning the desirability of this location as a school for aviation.

Mr. Arnold Kruckman, former general secretary of the Aeronautical Society of America, who is also Fellow of the British Aeronautical Society, Fellow of the Japanese Aeronautical Society, and was chief of aeronautics at the Panama-Pacific International Exposition, has this to say:

I have visited every well-known flying field in the world. There is no site elsewhere which embraces all the qualities and advantages of the island in San Diego Bay, used by the United States Signal Corps for its aeronautical academy.

At Assouam, in Egypt, the British, with great pride, showed me the field where primary flying instruction is imparted to military aviators. Our British friends were proud of the climatic conditions, the uniform temper of the winds, the mildness of the temperature, the absence of rain, and the freedom from abrupt variations.

The island in San Diego Bay known as North Island is, in my opinion, the most perfect spot on earth for incubating human fledglings. The area is a huge, flat sirloin-steak-shaped preserve of 1,200 acres. It has no irregular surface contours, nor encumbrances like trees, telegraph poles, wires, or buildings, which disturb the smooth movement of the currents of the air and ocean, and which constitute dangerous obstacles to the man who is learning to fly. Being 1 mile out in the bay, North Island is isolated, free from the interference and distractions which modify the usefulness of almost every other field I know. And its location in the bay, sheltered from the turbulent ocean, makes it an ideal school base for airplanes used on the water. Finally, in spite of its complete isolation and its utility for marine flying, it is in closer proximity to a large city than any other flying field in the world. Obviously the nearer the flying field is to a large city, the more complete is its sphere of usefulness. It should have quick access to transportation and communication and to sources of supplies.

I know of no other flying field on earth where pupils actually may practice 365 days in a year and where they may get into the air during at least 10 hours each day. There is no difference between the velocity of the wind in summer or in winter. The temperature in the summer is really cooler than it is in winter. This prevents those variations in flying conditions created elsewhere when the earth is baked by intense sun heat or abruptly cooled by drenching rains.

I have rather thoroughly studied various spots on the Pacific coast, and I am convinced that the great aeronautical breeding grounds of the future will be scattered between San Francisco and San Diego, with the center of the activity at San Diego. I believe this region, by reason of its almost unbelievably ideal summer and winter climate and meteorological conditions, will be the outdoor aeronautical laboratory of America for the production of commercial as well as military aircraft.

When Gen. A. W. Greely, as Chief Signal Officer of the Army, was at the head of the United States Weather Service he contributed a paper on the climates of the United States.

In this article he said:

The American public is familiar on all sides with elaborate and detailed statements of the weather at a thousand and one resorts. If we may believe all we read in such reports, the temperature never reaches the eighties, the sky is flecked with just enough of cloud to perfect the landscape, the breezes are always balmy, and the nights ever cool. There is possibly one place in the United States where such conditions prevail—a bit of country about 40 miles square at the extreme southwestern part of the United States, in which San Diego is situated.

To show that the people of California are agreed as to the exceptional qualifications for an aviation school on North Island and the advisability of the Government locating there, I insert the following resolutions, adopted by the board of directors of the Chamber of Commerce of the city of Los Angeles, June 7, 1916:

Whereas it is the sentiment of all Pacific coast cities that the United States Government should establish an aviation training base on the west coast; and

Whereas the location of such a branch of the Government military service must of necessity be selected with due regard to climatic, defensive, and marine conditions; and

Whereas unanimous indorsement seems imperative to spur the Government to adequate consideration of this vital branch of national defense; and

Whereas special engineers of the War Department have reported that North Island, near San Diego, is the most perfect site for an aviation school on either coast of the United States: Therefore be it

Resolved, That the Los Angeles Chamber of Commerce urge that the proposed site on North Island, which combines the geographical, topographical, meteorological, and strategical advantages possessed by no other side on the entire seaboard or inland in the United States, be utilized by the Government for an aviation training base; and be it further

Resolved, That other commercial civic and military organizations of the Pacific coast be requested to take action toward centering the advocacy of locating the aviation school at this point.

I hereby certify that the above is a true and correct copy of resolutions adopted by the board of directors of the Los Angeles Chamber of Commerce at the regular meeting held Wednesday, June 7, 1916.

JOHN S. MITCHELL, *President.*

Attest:

FRANK WIGGINS, *Secretary.*

I also have a resolution from the San Francisco Chamber of Commerce indorsing North Island, signed by Mr. D. W. King, secretary; also a resolution of similar import from different cities on the Pacific coast. As far as I know, every city on the Pacific coast has indorsed North Island.

The War Department, having decided to locate a permanent training base on the Pacific coast, directed Col. William A. Glassford, who has been in charge of the school, to report on suitable sites upon which the Government could erect permanent buildings and establish a permanent base. He made a detailed examination of the coast from San Francisco down, and reported that North Island was the only site that combined all the required conditions. In a letter written at a later date to the Commission on Navy Yards and Naval Stations, known as the Helm Commission, he sets forth the situation in detail. (Shown on pp. 40–43 of H. Doc. 1946, 64th Cong., 2d sess., pt. 3.) After setting forth the essential conditions for an ideal site, he states:

By a process of elimination it can be readily shown that the only region offering an all-the-year-around training station is southern California.

North Island, on San Diego Bay, is recommended as the site for the aviation services because it is the best place for the purpose that can be found in the United States. Here are assembled the climatological, geographical, military, and aeronautical requisites for safe aviation, and combines them as no other locality does. The average wind velocity for the year around is but 5.6 miles per hour, and the maximum velocity ever reached is 45 miles per hour. San Diego has, therefore, the least climatic stress of any place in the United States. This absence of every hindering element makes it the most suitable, safe, and economical place for an aviation training school for the Navy and the Army.

This seems ample for the necessary land training machines for the Army and water machines for the Navy. Allowing 300 days of 10 hours each per year, it permits 72,000 flights of an hour's duration or double the number of half-hours' duration, which latter is about the average time of training flights. If the two services could get together and jointly acquire North Island and each install only that equipment applicable for training in its particular sphere; that is to say, the Navy prepare for training in water machines and the Army for training in land machines, there would be required a single plant only for each of these specialties. With these two installations close together, such instruction as the Navy needed in land machines could be given at the Army school, and the water training needed by the Army could be had at the Navy school. A reciprocity of this sort would make an economy of installations, and it has many other evident advantages.

Col. Glassford also makes the statement—

That the important economical factors to be considered in a school for aviation are (1) breakage and demolition of machines, and (2) loss of time. A naval and an Army aviation academy established on North Island, in San Diego Bay, would be an economy in the saving of breakage and demolition of many machines, the cost of which varies from about eight to nearly thirty thousand dollars. By continuity of operation any industrial plant finds its greatest efficiency and accomplishment.

He also refers to the record showing that not a day was lost in aviation work during the year, and that the organist of the outdoor organ on the exposition grounds, in his report, had shown that during the 365 days of 1915 there were but 7 days when organ recitals were omitted on account of weather.

In the naval act of August 29, 1916, Sixty-fourth Congress, a commission was provided to investigate and report on the advisability of establishing additional naval stations on the Pacific coast and on the Atlantic coast. I quote:

Said commission shall also investigate and report as to the necessity, desirability, and advisability of establishing submarine and aviation bases on the Atlantic, Gulf of Mexico, and Pacific coasts and other possessions of the United States, and as to the cost and location thereof.

In accordance with that law the Secretary of the Navy appointed Rear Admiral J. M. Helm, chief constructor; W. L. Capps, civil engineer; H. H. Rousseau, Capt. G. W. McElroy; Commander C. L. Hussy; and this group has become familiarly known as the Helm Commission.

This commission has submitted a report in three parts, House Document 1946, Sixty-fourth Congress, second session, part 3 being devoted to the results of the submarine and aviation base investigations. On page 14 of part 3 we find the following:

The commission's efforts have, therefore, been especially aimed, on the Pacific coast, to discover the best location for an aviation base for training and experimental work. In view of the requirements for such a station and the conditions found, it has had no difficulty in reaching a decision as to the locality in which such a base should be established. For not only are the service views, both Army and Navy, practically unanimous in regard to the superior advantages of San Diego Bay for this purpose, in which opinion the commission concurs, but a recent investigation of this subject by a commission of Army officers appointed in accordance with the act of Congress approved March 4, 1915, to report upon the advisability of acquiring land near San Diego Bay or elsewhere on the Pacific, Gulf, and Atlantic coasts for an Army aviation school and training ground has been of material assistance. The Army commission, of which Col. Samuel Reber, United States Army, was senior member, included in its report, dated December 29, 1915, a description of the San Diego Bay region and its climatology, and stated that "the terrain in the vicinity of San Diego Bay fulfills aviation requirements better than any other section of the United States," and that, so far as weather and air conditions are concerned, it is the best region for such an establishment. The report of this commission is contained in House Document No. 687, Sixty-fourth Congress, first session.

San Diego's advantages lie especially in the direction of low average velocity of wind, air free from eddies and irregular currents, the large percentage of clear days, the large amount of sunshine, and an equable temperature. From the inspection it has made, and from the information it has received, including the reports of the commission's aviation expert, Capt. A. A. Cunningham, United States Marine Corps (Appendix B), this commission similarly reports that the usually favorable conditions at San Diego make it desirable and advisable that the main naval aviation base for training and experimental work on the Pacific coast be established on San Diego Bay, and so recommends. Aside from the great distance separating the Atlantic and Gulf coasts from the Pacific coast, the fact that one training and experimental

base is not sufficient by itself to meet the growing requirements of the Navy makes it necessary that a training base, in addition to the training station at Pensacola, on the Gulf, should be established now, and, as stated above, this additional base should be at San Diego. The functions of such a base would in time of war naturally include those of an aviation operating base.

On page 16 I quote:

This commission is confronted with the same situation that confronted the Army commission as regards dearth of sites, except that for the Navy there is no alternate site available if North Island be not adopted. In view of its special suitability, there seems to be no question but that North Island should be obtained as the site of a Government aviation school and that appropriate measures to that end should be taken, and this commission so recommends. The land is assessed by the county at $400 per acre.

From statements made by the officer now in command of the Army aviation school at North Island it is believed that the unusual advantages of this site could be shared by the Army and Navy, and that it would thus serve the present essential needs of both the Army and the Navy as an aviation training station for land and water machines. The commission is therefore of the opinion that a policy of acquisition and occupation of this site would meet immediate requirements and permit greater experience and a more extensive aeronautical survey of the Pacific coast to determine whether or not there was necessity for another training base and, if so, the best locality.

What is known as North Island is really a peninsula, which lies across the bay from the city of San Diego, under the protecting guns of Point Loma. San Diego is a city of 96.000 population. It is the only place in the world, so far as known, that successfully conducted an international exposition for the full term of two years. The exposition buildings with the 1,200 acres of ground were turned over to the Navy free of charge and is now used as a naval training station.

I will again quote from the Helm report:

CONCLUSIONS AND RECOMMENDATIONS AS TO AVIATION BASES IN SOUTHERN CALIFORNIA.

19. In view of all the foregoing, the commission is of the opinion that—

(a) It is necessary, desirable, and advisable to establish a naval aviation base for training and experimental work on the Pacific coast.

(b) That the best location for this aviation base is in southern California on San Diego Bay.

(c) That the best site for the location of such a training and experimental aviation base is North Island.

(d) That this training and experimental base should also be used as an operating base in time of war.

(e) That the enactment of legislation to the following effect is desirable and recommended:

"That the Secretary of the Navy is hereby authorized to acquire by purchase, through condemnation, or otherwise, for aviation purposes, all or any portion of the land on San Diego Bay, Cal., known as North Island, that may be necessary for this purpose, and any funds that have been or may be appropriated for naval aviation purposes may be considered available to carry this into effect; and that the further sum of $500,000 is hereby appropriated toward its acquisition and development."

Mr. Chairman, I believe I have given all of the facts and the conclusions of the several committees that have been appointed by various acts of the Congress to select sites for aviation purposes. We have had three commissions appointed to investigate sites for aviation in the United States, and it is the unanimous opinion of all that North Island is the best. Under existing conditions it is absolutely necessary that the Government acquire an aviation base on the Pacific coast at the earliest possible moment. Since every commission and every aviation officer has unqualifiedly indorsed North Island, I am firmly convinced, and I believe that you will all agree with me, that the Congress should immediately acquire this piece of land which is so strongly recommended by the Secretary of War.

Mr. MADDEN. Mr. Chairman, I make the point of no quorum. We have had a lot of discussion to empty benches all the afternoon, and there ought to be a sufficient amount of interest shown in the expenditure of $26,000,000 as a war measure. The people of the United States are interested in the successful conduct of the war, and they expect the Members of Congress to appropriate their money with some intelligent consideration. It seems to me impossible to give intelligent consideration to the question without a quorum. I make the point of no quorum.

The CHAIRMAN. The gentleman from Illinois makes the point of no quorum.

Mr. SMALL. Mr. Chairman, will the gentleman reserve his point of order?

Mr. MADDEN. I will reserve it.

Mr. SMALL. I ask the gentleman to withhold the point in order to allow me to make this statement: It is quite evident that there is a demand for time in general debate on this bill, and the committee on both sides are anxious to meet that demand as far as possible. Those of us who are here are not responsible for the small number present. None of us desires to have a roll call in order to develop a quorum at this time. Besides that, I should like to state that there is a gentleman here who desires to speak next, who, for personal reasons, would like to conclude his remarks this afternoon.

Mr. MADDEN. I must insist on the point of no quorum.

Mr. SMALL. Will not the gentleman withhold it at least until we have one more short speech, which for personal reasons the gentleman desires to make to-day?

Mr. MADDEN. If it is for five minutes, I will not object to it.

Mr. SMALL. How long a time does the gentleman from Missouri [Mr. MEEKER] desire?

Mr. MEEKER. Oh, if the gentleman from Illinois [Mr. MADDEN] wants to crowd the hearing, we can wait until Monday.

Mr. MADDEN. I do not want to crowd the hearing. I do not think the gentleman is justified in making any such statement.

Mr. MEEKER. I beg the gentleman's pardon for making the statement. I want to speak about 30 minutes. Of course nobody except the Mississippi River and the South and the whole country is interested in this If the gentleman wants a quorum to listen to him, I will move a call of the House to bring a quorum here to hear the gentleman speak.

Mr. MADDEN. All right.

Mr. MEEKER. Mr. Chairman, I move a call of the House.

The CHAIRMAN. Is the point of no quorum made?

Mr. MADDEN. I make the point.

Mr. MEEKER. I move a call of the House.

The CHAIRMAN. The point of no quorum is made. Evidently there is no quorum present. The Clerk will call the roll.

Mr. SMALL. Mr. Chairman, I move that the committee rise.

The CHAIRMAN. The gentleman from North Carolina moves that the committee rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HOUSTON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 4285) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other puposes, and had come to no resolution thereon.

Mr. SMALL. Mr. Speaker, I ask unanimous consent that general debate on this bill close at 3 o'clock on Monday, and that the House meet on Monday at 11 a. m. That will give four hours for general debate.

Mr. MEEKER. Mr. Speaker, reserving the right to object——

Mr. GILLETT. Mr. Speaker, there are a good many gentlemen on this side of the House who have not yet had an opportunity to speak. How much of the four hours will be given to this side?

Mr. SMALL. Say two hours and a half.

Mr. SWITZER. We ought to have three hours.

Mr. MADDEN. All the debate this afternoon has been for the bill.

Mr. SMALL. Is the time on the other side desired on the bill or for general discussion of other subjects?

Mr. MADDEN. On the bill.

Mr. GILLETT. There is a little of it that is not on the bill. Most of it is on the bill.

Mr. SMALL. Then say 4 o'clock.

Mr. GILLETT. Yes.

Mr. SMALL. Unless general debate is concluded before that.

Mr. COX. Reserving the right to object, will that give me a chance to speak for about 35 or 40 minutes?

Mr. SMALL. Surely, considering the demands now.

Mr. COX. I do not think I shall want more than 40 minutes.

Mr. SMALL. Yes.

Mr. COX. With that understanding, I do not object.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that general debate close at 4 o'clock Monday, unless it breaks down sooner, and that the House meet at 11 o'clock a. m. Monday.

Mr. MADDEN. Mr. Speaker, reserving the right to object, I do not believe the House ought to meet at 11 o'clock. There is no stress. If we finish this bill Tuesday, as we are likely to do, the chances are we will adjourn over Wednesday and Thursday, and maybe Friday, and will not have anything to do. Why meet at 11 o'clock? Most of the Members have a lot of work to do between 7 o'clock in the morning and 12 every day, and I object to that feature of the request which calls for the meeting of the House at 11 o'clock.

The SPEAKER. Does the gentleman from North Carolina modify his request and make it simply that debate close at 4 o'clock on Monday?

Mr. SMALL. Yes.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that the general debate shall not run beyond 4 o'clock on Monday.

Mr. GILLETT. If we are not going to meet until 12, I think the debate ought to run until 5. We shall not get very

far in the five-minute debate Monday anyway. Why not give the whole of Monday for general debate?

Mr. MEEKER. Why not request that the House meet at 12 o'clock, and then that the general debate conclude on Monday?

The SPEAKER. It does not require any request for the House to meet at 12 o'clock.

Mr. SMALL. Then I modify my request, and ask unanimous consent that the general debate close not later than 5.30 o'clock on Monday.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that the general debate on this bill close on Monday when the House adjourns, not to be later than 5.30 p. m. Is there objection?

There was no objection.

ALCOHOLIC LIQUORS.

Mr. VENABLE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a petition from a committee representing 700 citizens of my district on the subject of the tax on alcoholic beverages.

The SPEAKER. The gentleman from Mississippi asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The petition is as follows:

MERIDIAN, MISS., *May 30, 1917.*

The HOUSE OF REPRESENTATIVES,
Care Hon. W. W. VENABLE, M. C.,
Washington, D. C.:

By unanimous vote a meeting of about 700 citizens representing all evangelical churches of this city earnestly oppose any increase of tax on alcoholic beverages or the destruction of food products in the manufacture of such liquors, and petition Congress by all constitutional means to establish national prohibition, at least during the period of the war, and that this petition be published in the CONGRESSIONAL RECORD.

S. R. E. WILBOURN.
L. P. BROWN.
WALKER BROACH.
J. H. MALLARD.
DAVID H. SCANLON.

SENATE JOINT RESOLUTION AND SENATE BILL SIGNED.

The SPEAKER announced his signature to enrolled joint resolution and Senate bill of the following titles:

S. J. Res. 70. Joint resolution relating to the service of certain retired officers of the Army; and

S. 2133. An act to amend an act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, and for other purposes.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United Sates, for his approval, the following bill:

H. R. 11. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1918, and for other purposes.

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee as indicated below.

S. 1852. An act authorizing the Secretary of War to transfer to the city of New York the title of the United States to certain lands in Kings County, State of New York; to the Committee on Appropriations.

ADJOURNMENT.

Mr. SMALL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock p. m.) the House adjourned until Monday, June 11, 1917, at 12 o'clock noon.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. BORLAND: A bill (H. R. 4945) to extend the time for constructing a bridge across the Missouri River near Kansas City, Mo., authorized by an act approved June 17, 1914; to the Committee on Interstate and Foreign Commerce.

By Mr. GOODWIN of Arkansas: Concurrent resolution (H. Con. Res. 12) congratulating the people of Russia on the establishment of a popular government; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. COOPER of Wisconsin: A bill (H. R. 4946) granting an increase of pension to William H. Carroll; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4947) granting an increase of pension to David Carter; to the Committee on Invalid Pensions.

By Mr. McLAUGHLIN of Michigan: A bill (H. R. 4948) granting an increase of pension to Eugene P. Willard; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4949) granting an increase of pension to Elias Johnson; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. CARY: Petition of John L. Redel, president of the Imperial Candy Co.; R. L. Meader Co.; Badger Candy Co.; American Candy Co.; and the George Zifgler Co., all of Milwaukee, Wis., protesting against direct tax being placed on confectionery, and suggesting that if the Government desires a further increase of revenues the tax be put on raw materials also; to the Committee on Ways and Means.

Also, petition of International Brotherhood of Stationary Firemen, of Milwaukee, Wis., against prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of the First National Bank; Francis J. Rickert, secretary Wisconsin Wholesale Grocers' Association; Fay Lewis & Bros. Co.; Milwaukee Association of Credit Men, E. C. Hoe, president; Charles A. Clark, chairman banking and currency committee of Milwaukee Association of Credit Men; Otto C. Knell, president Wisconsin Association of Coffee Roasters and Jobbers; F. Mayer Boot & Shoe Co.; John Campbell, president Marshall & Ilsley Bank; and Edward A. Farmer, president the German-American Bank, all in the city of Milwaukee, urging immediate and favorable consideration of the conference report with regard to the Federal reserve bank; to the Committee on Banking and Currency.

By Mr. DALE of New York: Petition of Associated Rifle Clubs of New York and New Jersey, favoring bill for a site for a target range in New Jersey; to the Committee on Military Affairs.

Also, petition of Wallace & Co., of Brooklyn, N. Y., against excise tax on confectionery; to the Committee on Ways and Means.

Also, petitions of sundry citizens of New York, protesting against any kind of prohibition; to the Committee on the Judiciary.

By Mr. DARROW: Petition of Germantown Monthly Meeting, Society of Friends, of Philadelphia, Pa., favoring prohibition of intoxicating liquors during the war; to the Committee on the Judiciary.

By Mr. FITZGERALD: Memorial of committee of New York citizens, urging tax exemption for bequests, legacies, and gifts to educational, philanthropic, and religious societies; to the Committee on Ways and Means.

Also, petition of citizens of the Borough of Brooklyn, N. Y., against any kind of prohibition; to the Committee on the Judiciary.

Also, petition of the Salvation Army of the United States, favoring the prohibition of the liquor business as a war measure and opposing war tax on same; to the Committee on the Judiciary.

Also, petition of sundry citizens of Brooklyn, N. Y., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. FULLER of Illinois: Petition of the Winston-Salem (N. C.) Board of Trade, opposing excess-profits tax and favoring a flat rate on net profits; to the Committee on Ways and Means.

Also, petition of Illinois Retail Hardware Association, protesting against the Hardwick amendment to the Federal reserve act; to the Committee on Banking and Currency.

Also, petitions of P. D. Marshall, F. A. Palmer, C. A. Kilmer, Robert O. Horrie, F. W. Schulte, William R. White, Charles Dickman, B. C. Small, Paul J. Neilsen, F. H. Swartz, Thomas R. Williamson, A. W. Dix, Joseph H. Osman, Hal H. Osmanson, and W. S. Strong, all of Morris, Ill., urging legislation to prohibit the manufacture and sale of all intoxicants during the period of the war; to the Committee on the Judiciary.

Also, petition of 34 citizens of Fairdale, Ill., for prohibition of the manufacture and sale of intoxicating liquors as a measure of food conservation and to conserve the health, wealth, labor, transport facilities, and military efficiency of the people; to the Committee on the Judiciary.

Also, petition of the La Salle (Ill.) Chamber of Commerce, protesting against any increase in first-class mail rates unless second-class rates are also equitably increased; to the Committee on Ways and Means.

By Mr. HERSEY: Petition of Sebasticock Grange, No. 306, Patrons of Husbandry, Newport, Me., urging national prohibition; to the Committee on the Judiciary.

By Mr. HUTCHINSON: Petition of Iron Molders' Union No. 267, of Trenton, N. J., protesting against the enactment of any law forbidding the manufacture and sale of beers and light wines; to the Committee on the Judiciary.

Also, petition of Trolleymen's Union No. 540, of Trenton, N. J., protesting against the enactment of any law forbidding the manufacture and sale of beers and light wines; to the Committee on the Judiciary.

By Mr. KELLEY of Michigan: Petition of C. M. Lounsberry and 162 others, of Walled Lake, Mich., favoring national prohibition; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Petition of Ethan A. Tourtelotte, Joseph Raymond, Thomas A. Holt, jr., James A. Ireland, Joseph J. Ellis, Edwin M. Taylor, Frederick C. Kern, Thomas A. Holt, Charles Clarkson, Rev. George H. Horton, David J. Watson, Richard Austin, Everett F. Andrews, Charles L. Hatch, Thomas F. Cox, and Timothy Harrington, of Pawtucket, and W. J. Bird, of Central Falls, all in the State of Rhode Island, favoring passage of food-control bills; to the Committee on Agriculture.

Also, petitions of Allied Temperance Committee of Rhode Island, in favor of prohibition and opposing increase of tax on liquors for revenue; to the Committee on the Judiciary.

Also, petition of colored women citizens of Rhode Island, favoring prohibition as an emergency war measure; to the Committee on the Judiciary.

By Mr. LINTHICUM: Petition of Merchants-Mechanics First National Bank of Baltimore, Md., favoring House bill 4630; to the Committee on Agriculture.

Also, petitions of the North Baltimore Improvement Association, members of the Home Missionary Society of Mount Vernon Place Methodist Episcopal Church, of Baltimore, and sundry citizens of Baltimore, Md., urging prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of Washington College, of Chestertown, Md., asking exemption from Federal taxation of educational, religious, and philanthropic bequests; to the Committee on Ways and Means.

Also, petition of the Blue Ribbon Candy Co., of Baltimore, Md., opposing direct tax on confectionery; to the Committee on Ways and Means.

Also, petitions of H. B. Wilcox, vice president Merchants-Mechanics First National Bank of Baltimore, Md., and the National Retail Hardware Association of Argos, Ind., relative to Hardwick amendment to the Federal reserve act; to the Committee on Banking and Currency.

Also petition of National Association of United States Civil Service Employees at Navy Yards and Stations, favoring bill for retirement of employees in the civil service; to the Committee on Reform in the Civil Service.

By Mr. LONERGAN: Petition of L. W. Breummer and others of New Britain, Conn., for national prohibition during the war; to the Committee on the Judiciary.

By Mr. LUNDEEN: Resolutions of the Ladies' Society of the Salem Mission Church, Mrs. C. W. Baquist, president, Mrs. A. Anderson, secretary, of Minneapolis, Minn., urging national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. POWERS: Petition of sundry citizens of Laurel and Whitley Counties, Ky., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. RAMSEYER: Petition of pastor and members of the Willard Street Methodist Episcopal Church of Ottumway, Iowa, urging prohibition as a war measure; to the Committee on the Judiciary.

By Mr. SANDERS of New York: Petition of Gertrude M. Casey and 12 other residents of Medina, N. Y., favoring the adoption of national prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of the employees of the German-American Button Co., of Rochester, N. Y., favoring the adoption of national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. SCULLY: Memorial of citizens of Chicago, Ill., relative to statement of terms of peace proposed by United States and European allies; to the Committee on Foreign Affairs.

Also, memorial of New Jersey State Organization for Public Health Nursing, favoring suffrage for women; to the Committee on the Judiciary.

Also, petition of citizens of Silverton, Pleasant Plains, Cedar Grove, and New Brunswick, N. J., favoring prohibition; to the Committee on the Judiciary.

Also, petitions of Central Labor Union and Carpenters' Labor Union, of Perth Amboy, N. J., protesting against prohibition legislation; to the Committee on the Judiciary.

By Mr. STRONG: Resolution of the Armstrong County Sabbath School Association, of Armstrong County, Pa., favoring prohibition during the period of the war; to the Committee on the Judiciary.

By Mr. TAYLOR of Colorado: Petitions of citizens of Olathe, members of the Methodist Episcopal Church of Palisade, and Darden Pomona Grange, No. 1, of Wheatridge, Colo., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, memorial of Darden Pomona Grange, No. 1, of Wheatridge, Colo., urging exemption of farm boys and men from military service for increased production of farm products; to the Committee on Military Affairs.

By Mr. TILSON: Petition of residents of Cheshire, Conn., and vicinity, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. WINSLOW: Petition of residents of Millville, Mass., in behalf of war-time prohibition; to the Committee on the Judiciary.

By Mr. WOOD of Indiana: Petitions of Methodists of East Chicago, First Methodist Episcopal Church of Gary, and citizens of Lafayette, all in the State of Indiana, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. WOODYARD: Petition of members of the Presbyterian Church and Sunday school of Williamstown, and P. S. Tarbox, of St. Marys, W. Va., favoring prohibition as a war measure; to the Committee on the Judiciary.

SENATE.

MONDAY, *June 11, 1917.*

Rev. Charles F. Steck, D. D., of the city of Washington, offered the following prayer:

Let us pray.

Merciful God, our Heavenly Father, who holdest in Thy hand all the might of man, who hast ordained the powers that be, and of whom are all rule and authority in the kingdoms of the world, look with favor, we humbly beseech Thee, upon our President and those who are associated with him in the national administration, and upon these, Thy servants, upon whom rest such weighty responsibilities. To their natural graces and endowments let there be added the graces of Thy Spirit and the enduement which is from above, that thus they may truly and godly serve Thee and the Nation, whose representatives they are. Bless our soldiers and sailors, and the great army of young men who are to constitute the new Military Establishment. Throw about them all the protection of Thy power and safeguard them from evil. Bless the homes out of which they come and compensate them in Thine own way for the sacrifices they have been called to make for their country's sake. Restrain the harmful power of those against whom we have been called to wage war; keep hate out of our hearts, and may there come to us and the nations with whom we are allied speedy victory, and to the world a lasting peace.

Our Father who art in Heaven, hallowed be Thy name. Thy kingdom come, Thy will be done, on earth as it is in Heaven. Give us this day our daily bread and forgive us our trespasses as we forgive those who trespass against us. And lead us not into temptation but deliver us from evil, for Thine is the kingdom, and the power, and the glory, forever. Amen.

The Secretary proceeded to read the Journal of the proceedings of the legislative day of Friday, June 8, 1917, when, on request of Mr. JAMES and by unanimous consent, the further reading was dispensed with and the Journal was approved.

NATIONAL PROHIBITION.

Mr. BRANDEGEE. I present 323 memorials of residents of the city of Danbury, State of Connecticut, remonstrating against the enactment of a national prohibition law. I ask that one of the memorials be printed in the RECORD without the signatures. They are all duplicates.

The memorials were referred to the Committee on the Judiciary, and one of the memorials was ordered to be printed in the RECORD, as follows:

DANBURY, CONN., *June 7, 1917.*

Hon. FRANK B. BRANDEGEE.

DEAR SIR: We wish to enter a protest against nation-wide prohibition and ask your aid in preventing legislation tending to that end, for the following reasons:

1. It would destroy a present Federal revenue of $250,000,000 and a future revenue of $500,000,000, almost immediately available, at a time when every dollar is needed for war purposes.

2. It would destroy State and municipal revenues amounting at the present time to $100,000,000.

3. It would require drastic and sweeping changes in the tax systems of many States and hundreds of cities, with heavy increases of taxation upon lands, buildings, and personalty of the residents thereof.

4. It would produce a feeling of anger, resentment, and disaffection among millions of American workingmen who have officially gone on record through their trade assemblies as opposed to such a step, and to whom a glass of beer has been a daily necessity, and upon whom our success in this war depends. Great Britain and other warring countries have preserved their brewing industries in order that their soldiers and workers may have an adequate allowance of their accustomed beverage.

Respectfully, yours, FRED ANDREWS.

ARMY AND NAVY DEFICIENCIES.

Mr. SMITH of Michigan. Mr. President, I should like, if the Chair will indulge me for a moment, to ask a question of the Senator from Virginia [Mr. MARTIN], the chairman of the Committee on Appropriations, as to the status of the urgent deficiency appropriation bill. What is the present status of that bill?

Mr. MARTIN. The bill to supply the Army and Navy deficiencies?

Mr. SMITH of Michigan. Yes.

Mr. MARTIN. On that bill the conferees of the two Houses reached a complete agreement, and the Senate adopted the report. It went to the House and was rejected. It has come back to the Senate now rejected by the House. The point of contention seems to be the acquisition of a site for a naval base on Hampton Roads. That seemed to be the only item in controversy, but the report so far as agreed to was rejected as a whole, and the House conferees were instructed not to yield on that item.

Mr. SMITH of Michigan. Then, Mr. President, from the statement of the Senator from Virginia it appears that the bill is being delayed in its final passage because of that purchase?

Mr. MARTIN. It is.

Mr. SMITH of Michigan. Does the Senator expect action on the bill soon?

Mr. MARTIN. I do. I will say, Mr. President, that that item was urged in the most extreme manner. The Secretary of the Navy stated that he could not conduct the naval operations unless a site was acquired on Hampton Roads. The Surgeon General of the Navy stated that the sanitary condition of the men—the personnel of the Navy—was in a horrible condition; that men were dying who had diseases that were curable and who ought not to die; and that he had been unable to save their lives because he lacked the facilities to care for them. The Secretary and all the chiefs of the Navy Department said they were without a place to train recruits who had come in; that some of them had to be sent back home because they could not take care of them; and that it was of the utmost importance for the preservation of the country and the protection of the Nation that this site should be acquired. I can not think with a full discussion of the matter and an understanding of it in the House the House will persist in its refusal to grant what is urged as absolutely indispensable for the conduct of the war.

Mr. SMITH of Michigan. Is it not a fact, Mr. President, that no pay has yet been given although pay day has passed for the officers' training camp, and that much of our needed expenditure is being delayed because of this disagreement between the two Houses?

Mr. MARTIN. I am not advised of any such condition. The bill is for deficiencies, and I have not had the head of a single department say to me that any injury or inconvenience is suffered by a few days of delay.

Mr. SMITH of Michigan. Then, if I may pursue the inquiry a little further, I should like to ask the Senator if it is not true that no money has been supplied to the Government for the payment of the Officers' Reserve Corps now in training, although their pay was due on the 1st of June, and another pay day will be due on the 1st of July? Is it not a fact that in the construction of necessary buildings to house the soldiers of the Government already recruited there is a lack of funds and the work is being seriously handicapped by reason of that fact?

Mr. MARTIN. So far as I know, Mr. President, that work has not been delayed. If it is, no chief of a department of the Government has made it known to me. On the contrary, the Navy Department has urged on me to give them an opportunity to explain the matter, and the Secretary of the Navy is now before the House Committee on Naval Affairs. He says he can not conduct the operations of the Navy unless he has greater facilities, and he is insistent that this provision shall be retained in the bill. I have been urged to give a few days to enable the Secretary to present his views to the proper committee of Congress.

Mr. SMITH of Michigan. My information, which is rather convincing——

Mr. MARTIN. Mr. President, I do not see why it is if there is such a trouble as that it should not have come to the chairman of the Committee on Appropriations instead of going to the Senator. All I can say is that not a human being has approached me on this proposition.

Mr. SMITH of Michigan. Is it not a fact that work is now being delayed and they are borrowing haphazard to construct buildings to house soldiers of the Government?

Mr. MARTIN. I know nothing of any such condition, and I do not believe it exists.

Mr. SMITH of Michigan. I assert it to be a fact.

Mr. MARTIN. I think the Senator is mistaken. Somebody has imposed upon him. The Government is not borrowing money haphazard for that purpose. I talked with the Secretary of War and got no such information from him. I have been to see him two or three times, and he has not intimated to me that he was not able to furnish the necessary money to construct cantonments.

Mr. SMITH of Michigan. I was so informed officially and formally, and if that is true it does not reflect any credit upon the legislative department of the Government.

I do not propose to pursue the matter vexatiously, because I want no controversy with the Senator from Virginia, who always does his full duty.

Mr. CHAMBERLAIN. If the Senator will permit me, I will state that in the general deficiency bill provision was made for the payment of the young men in the officers' training camps. It may be that there has been a little delay in the auditing of their accounts because of the crowded condition in all the departments, but the provision has been made to pay them.

Mr. SMITH of Michigan. Does the Senator know that the money is available?

Mr. CHAMBERLAIN. I am only speaking of provision having been made to pay them. I do not know whether the money has been available or not.

Mr. SMITH of Michigan. I am speaking particularly about the construction of buildings to house the soldiers in the Middle West. It is absolutely essential that they shall be appropriately housed before the cold weather sets in. It is a very great task to do so, but it must be done promptly and thoroughly; it will be done thoroughly I have no doubt; and if there is any unnecessary delay in furnishing money to the Government for that purpose it ought to be avoided.

I am making no criticism upon the Senator from Virginia, whose vigilance I strongly commend, but I am informed that the Government has already made contracts for the fulfillment of which they have been obliged to borrow money temporarily to pursue, and that it is very seriously inconveniencing the Government in its present indefinite condition.

I hope that we can at least speed up this appropriation. If there is any delay due to our negligence, we ought to assume it and the country should know it. I am advised that the funds for the purposes which I have described are not available, and that the Government is seriously handicapped in the pursuit of its plans by reason of that fact.

I am not going to pursue the inquiry, and I make no reflection upon the Committee on Appropriations.

Mr. MARTIN. I have seen the Secretary of War several times within the last week in connection with the construction of the cantonments about which there were many very troublesome and embarrassing conditions, but in none of those conversations has the Secretary of War intimated that there was a lack of funds. On the contrary, he told me that he was proceeding to enter into an agreement for the construction of 16 cantonments, and from no officer of the Government, from no department of the Government have I heard of any borrowing of money. I really think the Senator must have made some mistake about the fact that the Government is borrowing money in a haphazard way. The Senator must have been misinformed. I have not heard of any money being borrowed at all. On the other hand, Mr. President, I will say that the appropriations for the Government service have been given most diligent attention. The deficiency bill, it is true, is hung up right now in connection with the acquisition of a naval base in Hampton Roads, and it is held up to let proper information be gotten before Congress. The Secretary of the Navy, as I have just said, is doubtless at this very hour before the Committee on Naval Affairs of the House of Representatives. He takes a most serious view of it.

He says he can not conduct the operations of the Navy properly or defend the country unless he has a place to put this naval personnel that has been increased 160 per cent. There are over 200,000 men in the Navy now, and there were about 87,000 when the war commenced. I want the Senator to understand why there has been this delay for a few days between the Senate and the House in respect to that very important bill.

Mr. SMITH of Michigan. Mr. President, if the Medical Corps, the Signal Corps, and the Quartermaster General's Department are hampered because of the lack of funds to do the necessary work to put these camps in condition for our soldiers, it ought to be remedied, and it ought to be remedied promptly. Our delay is inexcusable.

Mr. MARTIN. It certainly ought. They have no place to put these people and they have to send them home after they are recruited. The Surgeon General before the Committee on Appropriations of the Senate said that he could not be responsible for the lives or the health of these recruits; that men had died who ought to have been saved, and died because he did not have a place to put them, and he urged that provision be made. The committee favored it and we are trying to get an agreement to meet the demands, largely, of the Medical Department of the Government.

Mr. SMITH of Michigan. I think the Senator is entirely correct about that. I know some southern men who are not accustomed to the northern temperature have been sent up to the Lakes and have become ill because of the extraordinary change in their climatic conditions. We should, at least, do our best to so fortify the Government that our soldiers will not be exposed in the fall of the year to the cold and the rigor of the climate of the Middle West by lack of appropriation and necessary buildings.

I assert again, and I assert it very strongly, that the Government is to-day borrowing money in a most unusual and extraordinary way to meet the demands that have come upon us because of a lack of appropriations.

Mr. MARTIN. I think, Mr. President, if that condition exists the representatives of the Government ought to have brought it to the attention of the Committee on Appropriations, which deals with that question, and they should not have gone to the Senator from Michigan to lay a tale of woe like this before him without coming to those whose duty it is to remedy the trouble.

Mr. SMITH of Michigan. Mr. President, I am not saying that any tale of woe has been brought out. I am talking about my solicitude for these soldiers who come from my State and from the Senator's State, and I am simply saying that the Government is being handicapped in important work. I shall not be backward about saying it, no matter what other Senators may think about it; I have the right to say what I am now saying; and I shall repeat it. If there is anything that we can do to hasten the passage of this appropriation bill it ought to be done.

Mr. MARTIN. Has the Senator any objection to stating what department of the Government has made this complaint to him; for none has been made to me. I should like to know who it is.

Mr. SMITH of Michigan. I will say to the Senator that I know the soldiers now in training camps at Fort Sheridan and Plattsburg have not been paid, and their pay day has passed 20 days.

Mr. MARTIN. If so much money was borrowed, I do not see why they did not pay them.

Mr. BRANDEGEE. Will the Senator allow me?

Mr. SMITH of Michigan. Certainly.

Mr. BRANDEGEE. I have heard in a more or less informal way several times that the Government was not paying its bills. I do not know what importance to attach to the statement, but to-day there was a manufacturer here from my own State who has made a great deal of cloth for the Government, and he is utterly unable to get his money. There is $100,000 due. I was in the Quartermaster General's office this morning, and the Quartermaster General told me personally that he did not have the funds to pay these bills with. I do not know what the reason is, or what particular bill the money is carried in, or why payments are held up, but there is a large amount of money due contractors and men over the country who have sold and delivered their products to the Government and are utterly unable to get their pay, according to my information, and something ought to be done.

Mr. SMITH of Michigan. I know of many cases. I have heard directly from those who supply the Government that they have not been paid. But I was speaking particularly about emergency work so necessary to our proper defense and subsistence for our soldiers. They are entitled to this subsistence and should have it promptly. They have made great sacrifices to aid the Government, and they intend to make still greater sacrifices if necessary, and it is disgraceful that the Government of the United States should not pay them their wages and their subsistence and that these men now in training camps should not have the money which Congress determined was their appropriate due. No fault lies with the War Department. In my opinion every branch of that department—the Secretary of War, The Adjutant General, the Quartermaster General—are all worthy of praise, but their hands should be strengthened. We should do our duty and stop quibbling about details.

Mr. MARTIN. Every appropriation bill except this military and naval deficiency appropriation bill, has been passed. All of them have been passed. We are using every effort possible to pass that. There has no grievance anywhere been brought to my attention. Only through the Senator from Michigan [Mr. SMITH] have I heard of any complaint whatever.

Mr. LODGE. Mr. President, may I ask if this item under consideration is relative to the purchase of the Jamestown site?

Mr. MARTIN. It is.

Mr. LODGE. I do not know why there has been a failure to meet these debts of the Government to which the Senator from Michigan and the Senator from Connecticut have referred, but I want to say a word about the Jamestown appropriation.

When I first saw it in the bill I confess my primary impulse was against it. I examined it with great care. The situation is this: We have very much enlarged the Navy and the Marine Corps; we have no place where we can house and care for those recruits. The department was obliged in Boston to place them on the only vacant land it could get, which was known as the Commonwealth Pier. The location in itself was healthy enough, but there were no proper means of housing and caring for those recruits. That led to a great deal of very serious sickness and to a very considerable number of deaths owing to the exposure in the early spring months. We must have some place where we can properly house and care for the naval recruits.

At Jamestown the buildings are all ready; they are the old exposition buildings. There is railroad transportation there; the sewerage is there; the troops can go onto that site and occupy it at once. There is a place there for barracks and for everything else needed. It is possible that an equally good place might have been found somewhere else, but I doubt it, on account of the buildings which are there. The site also reaches tidewater. I think it is of imperative necessity that we should have some place where we can house our recruits.

My original prejudice against the Jamestown proposition was the memory of that unhappy exposition—of the expenses that it placed upon the Government. There was not a very pleasant savor about that exposition and its results; but, as I have said, there is there a fine site; it has the buildings; it has the sewerage; it has the deep water; it has the railroad tracks. The buildings alone are worth to the Government five or six hundred thousand dollars.

Mr. MARTIN. They are worth $680,000, according to the estimate which has been put upon them by our naval officers.

Mr. LODGE. Those buildings are there; they are ready; they are constructed; and that is the great thing. It is for that reason that I gave my very cordial support to the amendment when the bill was before the Senate. I hope the Senate will stand by the appropriation, which I think a very necessary one.

I do not care to go into these other matters. I am sure there are abuses which ought to be cured. I would like to ask the Senator from Virginia if it is not true that one reason for the delay in the payment of the men at the Plattsburg camp—of which I have heard—and at other points, and the delay in paying for goods which have been delivered to the Government, is owing to the fact that the money is carried in this bill to pay those very expenses? Therefore, the best way to meet the situation is to get this bill made law.

Mr. MARTIN. Mr. President, I shall be glad if the Chair will lay before the Senate the action of the House of Representatives in respect to the military and naval deficiency appropriation bill.

The VICE PRESIDENT. The Chair lays before the Senate a message from the House of Representatives, which will be read.

The SECRETARY (reading)—

Resolved, That the House disagrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes, and that the House further insists upon its amendment to the amendment of the Senate No. 2 to the bill; further insists upon its disagrement to the remainder of the

amendments of the Senate still in disagreement, and asks a further conference with the Senate on the disagreeing votes of the two Houses.

Ordered, That Mr. FITZGERALD, Mr SHERLEY, and Mr. GILLETT be the managers at the conference on the part of the House.

Mr. MARTIN. I move that the Senate further insist upon its amendments still in disagreement, agree to the further conference asked for by the House, and that the Chair appoint the conferees on the part of the Senate.

Mr. GORE. Mr. President, I desire to ask the Senator from Virginia a question. I have to ask him because I have not had an opportunity to investigate the record of the other House relative to the matter in that body. What is the exact amount carried by this appropriation for the Jamestown site?

Mr. MARTIN. It is $1,400,000 for the property and $1,600,000 for its development and improvement, an aggregate of $3,000,000.

Mr. GORE. The reason I asked the question was that I have been informed by a Member of the other House that this property had sold within a year for $250,000, and I wanted to inquire whether or not that is true?

Mr. MARTIN. The trouble about the whole matter is that it is not true.

Mr. GORE. I do not know just what the facts are.

Mr. MARTIN. A very small part of this property sold for about $250,000. There are three parcels of it. The most valuable part of it was not sold at all. The Government has never even negotiated for that part of it, which has a water front of the depth of 35 feet, and which is an exceedingly valuable part of the purchase. That part of the property which is now proposed to be acquired by the Government has never been sold at any time for $250,000.

Mr. LA FOLLETTE. Mr President, I ask the Senator from Virginia what is the acreage of this property?

Mr. MARTIN. I think it contains about 470 acres.

Mr. SMOOT. It contains 440 acres.

Mr. MARTIN. The Senator from Utah, who is informed about the matter, states that it contains 440 acres. No doubt that is correct, though I thought it contained 470 acres. Four hundred and forty acres are above the water, and there are also about 600 acres that are so near the level of the water that only dredging would be necessary to make 600 acres of additional ground; but immediately available, without any work whatever, are 440 acres.

Mr. LA FOLLETTE. Would that tract have to be dredged?

Mr. MARTIN. No; that does not have to be dredged at all. That is a beautiful plateau, now ready for use.

Mr. LA FOLLETTE. How much of the property will require dredging?

Mr. MARTIN. Six hundred acres can be added by dredging.

Mr. LA FOLLETTE. What portion of the property sold for $250,000?

Mr. MARTIN. I can not give the exact acreage; but I repeat, there are three parcels of this land. I do not think half of it was embraced in that sale. The valuable buildings were not. The buildings on this property cost over a million and a half dollars to build. Naval officers went down and valued them, and they assessed them at what they are now worth to the Government in their present condition, and they put the sum at $680,000.

Mr. GORE. Who owns the buildings, I should like to ask the Senator?

Mr. MARTIN. The buildings are owned by different owners. I think there are 250 different owners. The buildings can not be obtained except through condemnation, because many infants are involved; and, I repeat, there are several hundred different owners.

Mr. SMITH of Michigan. Is this land now under contract to the Government?

Mr. MARTIN. No; it is not under contract. At the request of the Secretary of the Navy some parties got options on the property, such of it as was owned by people who were sui juris.

Mr. SMITH of Michigan. Has an option been secured on all of it?

Mr. MARTIN. No; they could not get an option from all of those people.

Mr. SMITH of Michigan. What I desire to learn is, how are we to know for just what amount these lands can be purchased?

Mr. MARTIN. Nobody knows absolutely; but the provision that I desire adopted is that the property shall not be acquired unless the President is satisfied that the prices are fair and just, whether the acquisition is by condemnation or by purchase. I repeat, however, the property can not be acquired by purchase, but will have to be acquired by condemnation because there are so many infants who are concerned. The buildings on this property cost a million and a half dollars, and those of them which are adapted to the Government service have, I think, been assessed at $680,000.

Mr. UNDERWOOD. Mr. President, if the Senator will yield, as one of the Senate conferees on the bill, I think I should make a statement as to why some provisions should go into this bill at this time to take care of the present situation.

The bill carries something like $76,000,000, I believe, to build cantonments for the Army to take care of 500,000 men. The Navy and Marine Corps have been increased from about 51,000 to something over 150,000 men.

Mr. LODGE. Mr. President, the enlisted strength of the Navy has been increased from the numbers that we had before the war began, about 54,000, to 150,000, and the Marine Corps from 15,000 to 30,000.

Mr. MARTIN. Mr. President, if the Senator will excuse me, in addition to that the Naval Reserve, which has been called into the service, adds fifty-odd thousand more.

Mr. LODGE. That is true.

Mr. MARTIN. So that now we have something over 200,000 men in the Navy and 30,000 in the Marine Corps.

Mr. UNDERWOOD. So that the increase in the Marine Corps and in the naval service, including the Naval Reserve Corps, has added more than 150,000 men, in addition to the number we had in the past. There is no provision in this bill, except the one under discussion, for taking care of these men immediately. It was expected, if this land were acquired, that a large hotel on the site and a number of other large buildings could be immediately made available—and when I say "immediately made available" I mean within the next week or two—to receive the recruits and take proper care of them.

If this item in the bill can not be passed, then, of course, it will be necessary for the Congress to provide some other place, some other means, for properly housing and taking care of these men. In all human probability it will cost vastly more to take care of them in some other place than the place provided in this bill—at Newport News—because at another site we will have to erect cantonments out of new lumber and new material with new work, and we will have to call on the energies of the country at present prices to erect new buildings to take care of these men; whereas, if this provision is agreed to, we will get a number of old buildings which can take care of a large portion of them, and the buildings will be immediately available. When the emergency passes we will then have a piece of land that can be used as a supply depot, and other grounds which it may be necessary for the Navy to use for supplies and other purposes.

Mr. LODGE. Mr. President——

Mr. UNDERWOOD. I yield to the Senator from Massachusetts.

Mr. LODGE. I should like to ask the Senator if he thinks the price of the land, apart from the buildings, is excessive?

Mr. UNDERWOOD. I have no personal knowledge of the value of the land. I think a very great mistake has been made in the public mind and in the minds of many of the Members of Congress in supposing that the entire $1,400,000 is going to be paid for the old Jamestown exposition site. That is where the mistake comes. The land proposed to be bought consists of three large pieces, and the Jamestown exposition site is only one of the pieces. The other pieces put together are much larger than the Jamestown exposition site. As I understand, the total amount of money out of this $1,400,000 appropriation that goes to the owners of the Jamestown exposition site is only about $350,000. The remainder of the amount goes to other owners. The most valuable part of the site is the part that fronts on the channel, on which a very large hotel is located.

Mr. BORAH. Mr. President, what is the acreage of the Jamestown exposition site?

Mr. UNDERWOOD. I think it is considerably less than half—I can not recall the total acreage——

Mr. SMOOT. Three hundred and twenty acres are in the Jamestown exposition site.

Mr. UNDERWOOD. The Senator from Utah advises me that 320 acres are in the Jamestown exposition site. That is the inner site. On the outer site, which, I think, costs the most money, is a tract of 120 acres of dry land, and a large portion of additional land can be filled in on the water front. On this 120 acres is the hotel to which I have referred. The buildings on these sites of themselves have been surveyed and valued at over $600,000 in their present condition; and, of course, they cost vastly more than we are giving for the site when they were originally constructed.

The real condition that the conferees have been confronted with in reference to this matter has been that the Navy Department is insisting and properly insisting, that we should give them a site and a place in which to house the men who have been enlisted in the Navy. They have now no place at which to care for them. The men are being recruited and sent home, there

being no place to assemble them. The Navy Department say that this is the most available site, and are still insisting on it.

If this item for the purchase of this site is rejected, then it is manifest that before this bill is passed, or in some other bill, an appropriation at some time must be made to acquire some other site and build cantonments to take care of these men.

Under these circumstances, with the Navy Department still insisting that this is the best and most available site that can be secured at once, my opinion is that we had better wait a few days, and that the Senate should insist on its amendment and on its disagreement with the House until a full opportunity has been given for the Members of the other House to understand the exact position of the Navy Department with reference to this matter, which, I am satisfied, from the debates in the House which I have read in the RECORD, they do not to-day understand.

Mr. NELSON. Mr. President, will the Senator allow me to ask him a question?

Mr. UNDERWOOD. I yield to the Senator from Minnesota.

Mr. NELSON. Is it not a fact that the main issue between the House conferees and the Senate conferees is not in respect to the site but as to the price? Is not that the real question? If it were not for the matter of price there could easily be an agreement, could there not?

Mr. UNDERWOOD. I will say to the Senator from Minnesota that, although for a while there was opposition on the part of the House conferees to this item, there was no serious disagreement when the facts were explained to them. They yielded to the Senate amendment and signed the report; they sustained the report in the House, but the opposition came from outside sources in the House, which defeated the conference report on what I believe was an entire misunderstanding and misapprehension of the attitude of the Navy Department and the Government in reference to the site. The opposition did not come from the conferees. Of course, I recognize that under the instructions they have now received, if the bill is sent back to conference, the conferees will have to report a disagreement, and the matter will have to go back to the House for action again; but I think it advisable that a matter of this importance should go back to the House and an opportunity be given them fully and clearly to understand the facts and conditions surrounding this item before it is finally eliminated from the bill.

Mr. VARDAMAN. Mr. President, may I ask the Senator from Alabama if the buildings upon this land are sufficient to meet the demands of the Navy Department for housing the recruits?

Mr. UNDERWOOD. Not by any means. They can not take care of the hundred thousand men who have been added to the Navy, but they can immediately take care of a very large number and thus relieve the situation to a very large extent.

Mr. VARDAMAN. I should like to inquire of the Senator whether any other place has been offered to the Navy, or to the Government, for the purposes for which this piece of land is to be devoted?

Mr. UNDERWOOD. I do not know about that. Of course, the Senator will understand that this proposition did not originate with the committee; it did not originate with Congress. It came from the Navy Department itself. The department investigated it and worked on the price. Originally there was a great deal more asked for this property than is asked for it now, and the Navy Department says this is a reasonable and fair price. As to whether any other sites were offered to the Government, I have no personal knowledge.

Mr, VARDAMAN. May I ask the Senator if the committee in charge of this matter made any investigation on their own account as to the value of this land?

Mr. UNDERWOOD. Yes; we did. I do not mean to say that we went to the site, or anything of that kind; but we had a hearing, and we examined witnesses as to the value of the land, and those witnesses stated that this was a fair and reasonable price for the land.

Mr. VARDAMAN. Was the land ever offered for sale before?

Mr. UNDERWOOD. I do not know about that. That is beyond my ken. I do not know anything about the land prior to the time it came before the Senate committee with the recommendation of the Navy Department.

Mr. VARDAMAN. The purpose of the question was that there is such an inflated idea about the price of everything now that I did not know but that the Senator had some information as to the value put upon this land before abnormal conditions came about.

Mr. UNDERWOOD. I really have not an opinion that is worth anything on it.

Mr. GORE. Mr. President——

Mr. UNDERWOOD. But I will say that in my opinion, from the testimony of the witnesses that came before us, this land is being sold to the Government at a reasonable price; and, more than that, I am thoroughly satisfied in my own mind that if this proposition is turned down and it is necessary for the Government to buy land elsewhere and build cantonments and buildings to take care of these men it is going to cost vastly more than they will have to pay under these circumstances.

Mr. VARDAMAN. Will they not have to erect buildings on this land?

Mr. UNDERWOOD. They probably will have to erect some more; but there are a large number of buildings already erected that were built at times when building was not so expensive that will take care of a great many men and relieve the situation.

Mr. SMITH of Michigan. Mr. President——

Mr. UNDERWOOD. The Senator from Oklahoma, I believe, desires to interrupt me.

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Oklahoma?

Mr. UNDERWOOD. I do.

Mr. GORE. Before I ask my question I will say that I think the point is not the purchase of the land, but the price of the land; and I was wondering whether the committee had ascertained the value of the land for purposes of taxation; and, if so, the basis of taxation in Virginia as to actual and taxable value.

Mr. UNDERWOOD. I will state to the Senator that so far as my knowledge is concerned that question was not raised in the hearings. So far as I know, the committee did not go beyond the hearings in the ascertainment of any of these questions. Of course in these war questions we were more or less compelled to take the estimates of the War Department. We have spent hundreds of millions of dollars here for guns and improvement of arsenals. It was impossible for your committee to go into an examination as to all these sites and all these points. We gave as full and complete hearing to this particular item as we did to any other item in the bill; and, as I stated a minute ago, I am satisfied that if this site is not purchased, and the Government is driven to some other site and the erection of new buildings at present cost, the cost to the Government is going to be vastly more than it will have to pay under these conditions.

Mr. GORE. I will merely observe that I think there is a very strong sentimental reason in favor of the purchase of this property. My only concern was to see that the price was not excessive.

Mr. SMITH of Michigan. Mr. President——

Mr. UNDERWOOD. I yield to the Senator from Michigan.

Mr. SMITH of Michigan. I should like to ask the Senator whether the committee considered the sanitary condition of these grounds?

Mr. UNDERWOOD. That was reported to us. We did not especially consider it. The naval officers who were before the committee testified that if we took these grounds they had sewerage already there, they had water already there, they had a lighting system already there, and the Government would be saved all that expense and could move at once. Then the Surgeon General of the Navy testified that it was a sanitary place, and a place where he was anxious to have an opportunity to build or to take care of the sick men at once, which I am satisfied he would not have testified to if the sanitary conditions had not been satisfactory.

Mr. McCUMBER. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from North Dakota?

Mr. UNDERWOOD. I do.

Mr. McCUMBER. I did not hear the Senator's answer to the question of the Senator from Oklahoma as to the price at which these lands were listed for purposes of taxation.

Mr. UNDERWOOD. I stated to the Senator from Oklahoma that I was not informed myself, but that so far as I know and recollect none of the witnesses that came before the committee testified as to that subject.

Mr. McCUMBER. Does not the Senator think that we ought to take some method of arriving at the value of those lands before we spend $1,400,000 for them, when probably the selling price of all of them is not $300,000?

Mr. UNDERWOOD. I agree with the Senator that in ordinary circumstances probably more thorough investigation should be made than we had the opportunity to make with a bill carrying over three billions of dollars and many items of more importance than this. The committee did have a number of witnesses before it who were supposed to have investigated the matter. They were officers of the Navy—men who were in the service. I am satisfied that they were entirely disinterested men, looking only to the good of the service. They stated that they had made a thorough and careful investigation and that

they believed the price that would have to be paid for this site to be entirely reasonable and fair.

Mr. SMITH of Michigan. Mr. President, if the Senator from North Dakota will permit me, while the inquiry of the Senator from Oklahoma is pertinent to the issue, nevertheless that can be obtained in any condemnation proceeding which the Government might institute. The question of the value of these lands for purposes of taxation would be a proper subject of inquiry in condemnation proceedings.

Mr. UNDERWOOD. I will state to the Senator that, so far as I am concerned, under ordinary circumstances I would say, let us condemn; but in my own judgment I think we are up to one of two things—either to accept or to reject this proposition, because it is like all other military and naval questions that are moving, now that we are in war. If we condemn this land by legal proceedings, when we get it we probably will not have the use for it that we want it for.

Mr. SMITH of Michigan. Oh, I do not agree with the Senator about that.

Mr. UNDERWOOD. Why?

Mr. SMITH of Michigan. We can condemn and acquire this property in much less time than we can duplicate the buildings anywhere else.

Mr. UNDERWOOD. I do not think we can.

Mr. SMITH of Michigan. Why, certainly, for such purposes as these. There is no reason in the world why it can not be condemned.

Mr. UNDERWOOD. I know of no way in which we can condemn property except by going through the courts. The condemnation proceedings will probably take a year, and at the end of the year we will have had to buy other ground.

Mr. STONE. Mr. President——

Mr. UNDERWOOD. The Senator from Virginia suggested a while ago that we would be only too glad to accept an amendment to this proposition providing that the President or the Navy Department shall not accept these lands until, after thorough investigation, they are satisfied that it is offered at a reasonable price; but the officers of the Navy have already testified to that.

I think the situation resolves itself into this: We have got to have a place for a cantonment. We have got to have a place to house these men at once. We can afford, at the present high prices, to give more than the place is worth to accomplish that. I do not think we are doing it in this instance; but even if it were more, we are paying more for ships, we are paying more for food, we are paying more for cars, we are paying more for everything that is going to make up this vast Army and Navy to-day than we did a year ago. We must respond to the requirements of the hour.

All that I ask the Senate to do with the matter is to put this bill in an attitude where we can ask the House of Representatives to consider it again with reference to all the facts. Then, of course, if the House of Representatives insists on rejecting the bill, we can not reject a $3,000,000 bill to take care of the Army and the Navy for one item, and we will probably have to provide in some other way for taking care of these men, which, in my judgment, is going to cost a good deal more money. But all we are asking is that you send the bill back to conference. We, of course, will have to reach a disagreement, because the House conferees are instructed not to agree, and then let it go back to the House, and then we will have an opportunity for further discussion.

Mr. STONE. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Missouri?

Mr. UNDERWOOD. I do.

Mr. STONE. May I ask the Senator from Alabama who owns this property?

Mr. UNDERWOOD. I think a committee that bought out the old Jamestown Exposition Co. owns part of it. Another company, that owns a hotel, owns another part. I do not recall the name of the company. Then a number of the pieces of property are in small holdings—people who have summer cottages and houses there.

Mr. STONE. The bulk of it, the large part of it, is in the old exposition grounds?

Mr. UNDERWOOD. I believe the majority of the acreage is; yes, if you do not include the acreage that is partially submerged.

Mr. STONE. There are houses on these grounds?

Mr. UNDERWOOD. A number of valuable houses; yes.

Mr. STONE. That can be used for the purposes intended?

Mr. UNDERWOOD. That is what they want to do with them right now. They have a very large hotel and a number of large houses. They want to use them as barracks immediately.

Mr. STONE. The Government of the United States appropriated a good, large sum of money to build houses down there. Are those houses available?

Mr. UNDERWOOD. I do not think they are. I am not sure about it, but they were not the houses that we had in mind. There is a large hotel down there that was built on the point, not on the exposition site. The valuable houses down there, as I understand, for use now are some houses that were built by the State. A portion of the houses may be the old exposition buildings, but I do not understand that they are. They may be, but that is not my understanding. I know, however, that the valuable houses are the ones that were not built by the Government. They were temporary buildings, and probably most of them have been destroyed.

Mr. KNOX rose.

Mr. STONE. Do I understand the Senator to say that the houses that can be used are not a part of the exposition buildings?

Mr. UNDERWOOD. I do not say that entirely. There may be some of the exposition buildings remaining; but the houses that are available, and in reference to which the witnesses before the committee testified, were not those houses. The largest and best and most available one is a very large hotel that has no connection with the exposition buildings; and the other houses are some handsome, strong, well-built buildings that were built by the State, and not by the Government, when the exposition was held there.

Mr. STONE. I have seen the old exposition hotel, and know what that is. I have been in it. That is not on the exposition grounds.

Mr. UNDERWOOD. It is not.

Mr. STONE. That is all I wanted to ask the Senator.

Mr. UNDERWOOD. The Senator from Pennsylvania [Mr. KNOX] started to interrupt me. I beg his pardon.

Mr. KNOX. Mr. President, I know nothing about the merits of the controversy as to the value of this property, but I thought the Senator from Michigan [Mr. SMITH] made a rather sensible suggestion—whether it would not be wiser to proceed to condemn the property, where there seems to be serious doubt as to the value. To that I understood the Senator from Alabama to reply that perhaps before the condemnation proceedings were concluded the necessity for the possession of the property might have passed. Now, I am surprised at that reply, because I have never known or heard of a case where the right of eminent domain was exercised where the right of possession had to await the final determination of the value of the property. If there is any such law applicable to the condemnation of property for public use by the Federal Government, it is an entirely new proposition to me.

Mr. UNDERWOOD. Of course, I made the statement in view of the provision in the bill that the property should not be taken above a certain value. That is what the bill provides for now. Of course, if there were the unlimited right of condemnation, the Government could take immediate possession, occupy the property, and at the end of a lawsuit pay whatever damages there were, which possibly might far exceed—I do not know whether they would or not—the amount fixed in this bill. But certainly if there is a limitation on the value at which the Government can take the property, the officers of the Government would not go into possession under condemnation proceedings until they had first ascertained whether or not the property could be condemned and taken over for the value fixed by the Government.

Mr. KNOX. But, Mr. President, I understand that the limitation which the Senator from Alabama suggests is a limitation which is imposed by the bill itself, and there is no necessity for the imposition of such a limitation. If this property is imperatively necessary for naval purposes, it ought to be taken possession of, no matter what is ultimately determined to be its value.

Mr. UNDERWOOD. So far as I am concerned I would have no objection to doing that, but the bill itself contemplates a limitation on the amount that shall be paid.

Mr. KNOX. That can be done away with.

Mr. UNDERWOOD. My viewpoint, in the light of what has been expressed here as to the price being high, is that the Senate would not allow a bill to go through the Senate without fixing a limitation on the price. Of course, if that is done, then it will be impossible to take possession until after condemnation proceedings.

I am inclined to think—I have no doubt in my mind—that this property can be purchased at a very fair and reasonable value, or it would not have been so reported by disinterested naval officers who want to get the property and have investigated it. So far as the committee of conference was concerned,

they had no desire to prevent any limitation being placed on the price. The only reason why they did not face the question of condemnation was that there was a limitation on the price, and if we kept the limitation on the price as a result of the condemnation we felt assured that the Government officials would not take possession until the condemnation proceedings were over.

Mr. KNOX. If the Senator will permit one other question——

Mr. UNDERWOOD. Certainly.

Mr. KNOX. I understood the Senator to say to the Senator from Michigan, in reply to the suggestion that the price was excessive—and again I avow no knowledge as to the merits of that controversy—that suppose it was a large price, or a greater price than normally one would be expected to pay for such property, are we not paying a larger price for everything? Are not ships being purchased for a larger price than they normally bring? Is not that fact, however, because other people are willing to buy the ships at advanced prices and other people are willing to buy steel at advanced prices for other purposes, but are other people willing to buy abandoned exposition buildings for any purpose?

Mr. UNDERWOOD. I do not think the Senator from Pennsylvania exactly caught the angle of my remark. I said that I thought this was a reasonable price, and as cheap and cheaper than the Government could accomplish the result in some other way. I do not know; this property may sell for a higher price to somebody else or may not, but if this property is abandoned, if the buildings on it are abandoned, it will be necessary to acquire property somewhere else for this purpose. I know of no other property—there may be other property, but I know of none—that is available that has buildings on it. What I meant to say and intended to convey in my statement was that if we abandon this property we will have to buy property somewhere else, and then erect new buildings on it, and with the high price of lumber, and the high price of labor, and the high price of all materials we will have to pay to-day, at the end of our venture it will cost the Government a good deal more than what is being offered in this site at present. That was the angle I intended to present.

Mr. FLETCHER. Mr. President, may I ask the Senator how much water front would be embraced in this purchase?

Mr. UNDERWOOD. It has quite a large water front. A full statement in that respect is in the hearings, and I would have to guess at it to tell the Senator, but it has a large water front that is available.

Mr. FLETCHER. The water front is very valuable, is it not?

Mr. UNDERWOOD. It is very valuable.

Mr. FLETCHER. And it fronts on deep water?

Mr. UNDERWOOD. One part of it fronts on the deep-water channel. There is another part of it with a front out on the bay that could be made available hereafter, but that is not contemplated at the present time.

Mr. GALLINGER. Mr. President, as a member of the committee I agreed to this appropriation with some reluctance, for the reason that we had no definite figures showing the assessed valuation of the property. But the circumstances were such and the exigency seemed to be such that I gave my assent to it, and I shall continue to support the proposition.

I do not think it would be a wise thing to force this property into condemnation proceedings. We have had a great deal of experience in the District of Columbia in the matter of the condemnation of property.

Mr. MARTIN. If the Senator will excuse me, there are so many interests involved that it will be impossible to acquire the property without condemnation.

Mr. GALLINGER. I was going to make my objection on a broader ground. We have had a great deal of experience in the District of Columbia.

Mr. BORAH. May I ask, does the Senator from Virginia say that it is impossible to acquire it except by condemnation?

Mr. MARTIN. I say some parts of it might be; but as a whole, as the Government wants the private ownership and interests in some of the property, it will necessitate condemnation proceedings.

I will say in this connection, if the Senator will excuse me, that if this bill passes the Government will be enabled to take possession of the property in less than a week. Arrangements can be made as to a great deal of it that is not in infant ownership, and the Government can utilize the property in a week, including the hotel. The owners of the hotel have been here and offered it to the Government, and the Government can use the property within a week after the passage of the bill.

Mr. GALLINGER. If that be so and condemnation is an actual necessity, of course it modifies what I was about to say. We have had a great deal of experience in the District of Columbia in condemning property with a view of saving something to the Government. We have always paid more than we would have paid had we accepted the offers of the owners. We have local juries to act upon the condemnation proceeding. There will be a local jury in this case if condemnation is resorted to, and while they doubtless will undertake to do their duty I am very apprehensive that the amount found will be in excess of the amount named in the bill.

Mr. President, in view, as I said a moment ago, of the urgency of this matter, the necessity for finding a place for these men and the fact that no alternative proposition has come to the committee or to Congress in any other section of the country, it seems to me it would be wise for Congress to make this appropriation and settle this controversy.

Mr. SHAFROTH. Mr. President, as a member of the subcommittee that heard the testimony which was presented, the most important feature of this purchase it seems to me was the fact, in the first place, that this is the most appropriate place on the Atlantic coast for a great naval station. Chesapeake Bay is well protected, and consequently when we acquire land at Hampton Roads or on Chesapeake Bay we have a protected territory that is of great value.

I inquired as to whether or not there was any other site which was available on Chesapeake Bay. I asked that of a number of persons who testified, and they said that there was not a single one that has the deep water this site has—water of a depth of 35 feet. That made this particular site of immense value, and consequently it was the determining factor with me as in voting in favor of the same.

Then, again, upon inquiry I found there were higher prices asked for this land; that they had been negotiating with the Navy Department for a considerable length of time, long before the war began, for the purpose of trying to get a naval station there, and their prices which they first asked were not the prices in this appropriation. It seems to me when we consider the buildings cost $1,500,000, and that they are now valued at $680,000, we are getting ready for occupancy a very valuable site.

Mr. BORAH. The Senator says they are valuable buildings, valued at $680,000. Who valued them at that figure?

Mr. SHAFROTH. I think the Navy Department.

Mr. BORAH. At what have the assessors and people in that region who have been dealing with the property prior to the war valued those buildings?

Mr. SHAFROTH. I do not know.

Mr. BORAH. Have we any information before us of any value upon this real estate or upon those buildings?

Mr. SHAFROTH. We know that they cost over $1,500,000, and they are buildings that can be occupied at the present time by the Navy Department.

Mr. LA FOLLETTE. If the Senator will yield, is it not a fact, I ask the Senator from Colorado, that these buildings, including the land, sold for $250,000?

Mr. SHAFROTH. That is denied by the chairman of the committee who has investigated the matter.

Mr. MARTIN. A small part of it did sell for $250,000. It did not include any of the deep-water front.

Mr. LA FOLLETTE. No; but it included the exposition site.

Mr. MARTIN. No; not all of it. It included a part of it.

Mr. LA FOLLETTE. How many acres did it include?

Mr. MARTIN. I can not tell the Senator without referring back.

Mr. LA FOLLETTE. It included the buildings.

Mr. MARTIN. It included some of the buildings.

Mr. LA FOLLETTE. Not all?

Mr. MARTIN. Nothing like all of them; not the State buildings erected, large fine brick buildings which cost from $30,000 to $50,000. Not one of them was included. A great many of the most valuable buildings were not included in it.

Mr. LA FOLLETTE. From the discussion in the other House I see that this matter has been before the Committee on Naval Affairs, and it appears that the Committee on Naval Affairs of the House made an investigation of this site some time ago and made a report upon it, and the chairman of the committee says in his report that the buildings would not be worth anything. Mr. PADGETT, as quoted by Mr. OLIVER, another member of the Committee on Naval Affairs, so stated.

Mr. SHAFROTH. I will state to the Senator in reply that we had before our committee officers who said that the buildings were of great value and could be used.

Mr. MARTIN. I can state from my own personal knowledge that the statement of the Senator from Wisconsin is absolutely incorrect. There is a very fine hotel there—a very large one—that will accommodate a great number of people that the Navy wants to use.

Mr. LA FOLLETTE. I know; but was not the hotel built just for temporary purposes?

Mr. MARTIN. It was not. It was not built in connection with the exposition.

Mr. LA FOLLETTE. Has it not been idle and unoccupied for some years?

Mr. MARTIN. I think not. It has been unoccupied for a short time; I do not know how long. I have been in the hotel; I have stopped at it. It is a very permanently constructed, valuable building and a very large one.

Mr. UNDERWOOD. If the Senator from Colorado will allow me to answer——

Mr. LA FOLLETTE. I yield.

Mr. UNDERWOOD. I think I can give some information to the Senator from Wisconsin. My understanding is that the original proposition that went before the Naval Committee of the House was to purchase the exposition grounds and not the point of land that leads out to the channel. The naval officers who were before the Senate committee testified that they would not approve a method of that kind; that it would not be of great value unless in connection with it they could buy the adjacent land that holds the large hotel and away down to a deep-water channel. It was only when the opportunity came when they could connect the old exposition grounds with the adjoining land that led to the channel that they were willing to give their approval. The position the bill now occupies is very different from that before the Naval Committee.

Mr. BORAH. Mr. President, just a word. The Senator from Virginia stated something in regard to the value of the hotel. I was making my inquiry with reference to what is known as the exposition property. I understood the Senator from Alabama in answer to the question of the Senator from Missouri to state that the hotel was not upon the exposition grounds at all.

Mr. MARTIN. That is correct.

Mr. UNDERWOOD. It is not.

Mr. BORAH. That did not throw any light on the question I asked. I wanted to know what was the value of these buildings and what is known as the exposition grounds. We have no estimate and no evidence.

Mr. MARTIN. The Secretary of the Navy sent a board down there and they put a valuation on it of $680,000; and I will say among them is one very large fireproof building and many buildings that are very valuable. They were valued by a board of naval officers at $680,000.

Mr. BORAH. I will not interrupt the Senator now except to say that employees of the Navy Department could not qualify legally before a jury to pass upon the value. They would have no knowledge as to the reasonable value of the property. They would know, of course, as to its desirability for naval use, but they would know nothing of its value according to rules which fix the value of property.

Mr. SHAFROTH. Mr. President, it seems to me that the answer which is conclusive to all these interrogatories is the proposition that there is no other site available, and the bill provides that if it can not be obtained by purchase it may be obtained by condemnation.

Mr. McCUMBER. Mr. President——

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from North Dakota?

Mr. SHAFROTH. In a moment. I will read the amendment:

Naval operating base, Hampton Roads, Va.: For the acquisition, by purchase or condemnation—

That is left to us, not left to the other side—

including all easements, riparian and other rights appurtenant thereto, of the tract of land known as the Jamestown Exposition site, on Hampton Roads, Va., and of such lands adjacent thereto as lie north of Ninety-ninth Street and Algonquin Street and bounded on the northwest by Hampton Roads and Willoughby Bay and on the east by Boush Creek, $1,400,000; and toward the equipment of this property as a naval operating base, including piers, storehouses, oil-fuel storage, training station, recreation grounds for the fleet, aviation, and other purposes, $1,600,000; in all, $3,000,000.

I now yield to the Senator from North Dakota.

Mr. McCUMBER. The Senator intimates that this property is absolutely essential for the Government; that it can not get it at any other place, and therefore they can hold up the Government for any price they see fit to ask Has it occurred to the Senator that the Government in war time has the right to take possession of that property to-day and use it and then pay for the use of it whatever it is reasonably worth? Would it not be better for us to do that rather than to be held up for three or four or five times the value of the property?

Mr. SHAFROTH. Mr. President, in answer to the Senator from North Dakota, I will say that this very bill provides for either purchases or condemnation at our suggestion. We can acquire the property instantly by putting up a forfeit, as we do in condemnation suits, and take immediate possession thereof and carry out the very policy which the Senator himself suggests.

Mr. McCUMBER. I did not suggest condemning the title. I suggested the Government taking possession and paying for the use of it during the war, and then when the war is over we can determine whether or not we are in such a position that we will have to submit to being held up for an extortionate price for old property that they can not sell to anyone else. I understand the amount of space and the buildings now suggested do not cover one-quarter of the space that will be necessary and that we shall still have to erect a large number of buildings; that we shall still have to make considerable storage room; and that it is not the most healthy place for our soldiers and sailors.

Mr. SHAFROTH. When the Senator proposes that the Government shall go and take possession and then surrender it back under a limited use thereof, he forgets that the object and purpose is to construct piers, to construct warehouses, to contruct oil and fuel storage, a training station, and recreation grounds, that are necessary now, and which we are constructing in various portions of the United States. Sixteen cantonments are being erected and those are very much more valuable than the ground. If we should take possession of it and then after we get through and expend money on it try to get title by agreement, as a matter of fact the price would rise. That is human nature, and it would unquestionably be so in this case.

Mr. McCUMBER. Mr. President, in a word, I simply want to deny that the Government is so helpless in this situation that it would allow itself to be held up for four or five times the actual value of the property.

Mr. SHAFROTH. I do not believe it is four or five times. I believe this is a reasonable amount, and I believe that this location is the ideal location for the entire Nation. It is about the middle of the Atlantic seacoast, north and south, and it is eminently desirable that we should acquire a site in that protected piece of water there so that we can build permanently a great naval base.

We should also take into consideration the question which I asked the witnesses as to whether there was any other site on the Chesapeake Bay or Hampton Roads that could be used for that purpose with a depth of 35 feet of water, and they all said no.

Under those circumstances, inasmuch as we must have this site and inasmuch as we are getting it at a reasonable figure, and inasmuch as the exposition put into the buildings there $1,600,000, which is $200,000 more than we are paying for the entire buildings and grounds, and we combine with the other grounds upon the outside, it seems to me to be a very fair and reasonable price for that land.

Mr. BORAH. How much money did the Government put into the exposition?

Mr. SHAFROTH. I do not know. I think probably it put in the usual appropriation of $250,000.

Mr. BORAH. I think it put in $1,000,000.

Mr. MARTIN. If the Senator will let me correct the statement made a few moments ago, the exposition company does not own a dollar of this property now. I will say that the property was sold under a foreclosure to satisfy mortgages on it. The exposition company has not a dollar of interest in it, and has not had for five or six years.

Mr. BORAH. There has not been a particle of evidence before this body upon which any reasonable man could come to a conclusion as to the value of this property. There has been no testimony taken and no report upon which we can pass judgment. There are all kinds of rumors floating around as to certain gentlemen having had a contract for the sale of the property, and for some time they have been peddling it around over the country, and they are here now for the purpose of making a sale to the Government at their own figure, and the Government is accepting their own figure without a particle of testimony before it or without a particle of evidence as to whether we are paying five or six times what the property is worth. There is a way of arriving at the value before the Government purchases it, and that way ought to be followed.

Mr. MARTIN. Can any better way be provided than by a condemnation proceeding such as is provided for in the bill? It can not be acquired in any other way. It will be impossible. Infants are concerned, and the title can not be acquired except by condemnation as to very much of it.

Mr. BORAH. Title in the exposition grounds?

Mr. MARTIN. Yes; title to the exposition grounds.

Mr. BORAH. Is it the purpose of the Senator to proceed by condemnation? In the meantime we offer by this bill much more than the property is worth.

Mr. MARTIN. There is no other way to get title. I never heard any other idea advanced. It is absolutely necessary and will have to be done.

Mr. BORAH. Is it the purpose to have the value ascertained by condemnation proceedings the same as in any other like proceedings?

Mr. MARTIN. Absolutely the same. There is no other way whatever but by process of condemnation.

Mr. KNOX. Can we have the provision of the measure read, so that we can judge of it? I think this is an entire change of the project.

Mr. MARTIN. At a price not exceeding $1,400,000. There are so many infants concerned that the title can not be acquired except by condemnation.

Mr. BORAH. I understand, so far as the exposition ground is concerned, all interests have been collected and are now in the possession of one or two gentlemen who have been long trying to sell it.

Mr. MARTIN. The Senator's information is absolutely incorrect on that point.

Mr. BORAH. I do not think so.

Mr. MARTIN. I know positively it is a mistake. I know that there are a large number of private ownerships in the limits of this boundary and I know in the next place that the owners of this property did not offer to sell it to the Government. The Secretary of the Navy asked them to come here, as he wanted to talk with them about it. They were not thinking of selling it to the Government, but they were invited to come here to find out at what price it could be obtained. The board went to see the owners and came as near a correct estimate as they could, and submitted it to the Secretary; and they told him that condemnation was necessary because of the large number of interests.

Mr. BORAH. Will the Senator read, for the benefit of the Senate, the clause with reference to condemnation proceedings? I am not able to put my hand on it at the moment.

Mr. MARTIN. I have it not in my hand; but if the Senator will excuse me for doing so, I will read a redraft of that provision, which I hope will be adopted. I will not say that I suggested it, but it has been under consideration by some of the Members who are considering the matter. I should be very glad to see the Government safeguarded in every possible way. It reads as follows:

> Naval operating base, Hampton Roads, Va.: If the President in his discretion and judgment shall determine that it is necessary for the proper conduct of military and naval operations and for the safety and defense of the country to acquire the tract of land known as the Jamestown exposition site, on Hampton Roads, Va., and such other lands adjacent thereto as lie north of Ninety-ninth Street and Algonquin Street, the entire property being bounded on the north and west by Hampton Roads and Willoughby Bay, on the east by Boush Creek, and on the south by Ninety-ninth and Algonquin Streets, including all easements, riparian and other rights appurtenant thereto, and including all the rights and properties of railway, electric light, power, telephone, telegraph, water, and sewer companies, he is hereby authorized and empowered to acquire said property, by purchase or condemnation, at a price not exceeding $1,400,000; and toward the equipment of said property as a naval operating base in case it is acquired, including piers, storehouses, oil-fuel storage, training station, recreation grounds for the fleet, aviation, and other purposes, $1,600,000; in all, $3,000,000: *Provided*, That for the acquisition of said property either by purchase or condemnation no greater sum shall be paid than shall be determined by the President to be a reasonable and fair price.

Mr. BORAH. Mr. President, that is a system of condemnation with which I have never before familiarized myself.

Mr. MARTIN. I will say to the Senator that is the practice in Virginia. After the condemnation price is fixed, unless the Government in a certain number of days—I forget the number of days—pays the money into court the whole proceeding fails.

Mr. BORAH. The Senator proposes to provide for the acquisition of this property either by purchase or by condemnation?

Mr. MARTIN. Yes.

Mr. BORAH. That leaves it in the discretion of the department either to purchase or to condemn? If we are offering far more than the property is worth, there will likely be no condemnation.

Mr. MARTIN. Yes; but the property can not be purchased, because the rights of infants are concerned. So it will have to be condemned.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from Virginia yield to the Senator from Colorado?

Mr. MARTIN. I yield.

Mr. THOMAS. I think the Senator from Virginia will recall in a moment that, generally speaking, there can be no such thing as successful condemnation which is not preceded by an effort to purchase.

Mr. MARTIN. That is the law in my State.

Mr. THOMAS. That is the common law, if my memory does not deceive me, and it is the statutory law in all of the States with which I am familiar. The filing of the suit for condemnation will be defeated if it is not preceded by an unsuccessful effort to purchase. Consequently, so far as the phraseology of the clause is concerned, I think it is not only proper, but necessary.

Mr. BORAH. I do not think that is necessarily true under the Federal procedure. It is not true in some States.

Mr. MARTIN. If the Senator will excuse me, the Federal statute says that proceedings shall be according to the law of the State; and in Virginia it is required that there shall not be condemnation until an effort is first made to buy, and until then you can not successfully negotiate for the property.

Mr. BORAH. Of course, then, if the Navy Department prefers to pay the amount for the property, all it would have to do would be to pay; there is no obligation on the part of the Navy Department to condemn. It could pay any amount that it saw fit within the provisions of the bill, and not proceed by condemnation at all. In other words, Mr. President, the condemnation proceedings do not amount to anything under this clause, because if the department proceed at once with all due dispatch and haste they will buy.

Mr. President, I am not going to delay the Senate at this time. I understand that the motion is that the Senate insist upon the amendment.

Mr. MARTIN. That is correct.

Mr. BORAH. I want merely to call for the yeas and nays, and to vote against the proposition. If the matter comes back here, I shall try to verify the facts which have been given to me within the last 24 hours in regard to it. If I find I am in error, I shall so state; but if not I shall try to convince the Senate that they ought not to insist on this amendment.

Mr. KNOX. Mr. President, I think we have been discussing some rather immaterial technicalities in connection with this matter. It makes no difference what the provisions of the Virginia statute may be or how they may differ from the provisions of the statutes of other States in respect to condemnation of property for public purposes. The general idea running through all the statutes, although expressed in different language, is that there must be an attempt to agree upon the value of the property before condemnation proceedings are begun; but, as I understand this situation, there is a maximum price fixed, which the President is authorized to pay for the property, which, of course, if he does so, eliminates all questions of condemnation.

I further understand, Mr. President, that, so far as objections have been raised to the value of this property on the floor of the other House and in the public mind, it is that the minimum price is far in excess of the actual value of the property. I think, Mr. President, it would be most deplorable, here upon the threshhold of this great war, when we are seeking to borrow vast sums of money and when the first public loan offered by the Government is going very slowly, to have it go out that there was any doubt as to the value of any property which the Government is condemning for military purposes. As a condemnation proceeding is a swift, sure, just, and equitable method to obtain the value of property, I think, for the moral effect it may have upon the country, we should not consider acquiring this property by any other means whatever.

Mr. MARTIN. Mr. President, will the Senator from Pennsylvania excuse me?

Mr. KNOX. Just a moment. I should like to finish this sentence.

It is most unfortunate that the impression has gone out that it is the purpose to pay more for this property than it is intrinsically worth because it is old exposition property. While this old exposition property may be an exception to the rule, there is a general impression in the mind of the public that abandoned exposition buildings, no matter what they may have originally cost, rapidly deteriorate in value.

Mr. MARTIN. I merely want to state, for the information of the Senator from Pennsylvania, that condemnation proceedings in Virginia can not be sustained unless there is first an attempt to agree with the owner on the price. Therefore there is provision made in the bill for purchase or condemnation, we well knowing that condemnation will be necessary, that the rights of infants make it necessary, even if there could be an agreement upon the price. By the law in Virginia, which by the Federal statute must govern the Federal courts, there must be an attempt to acquire by agreement before there can be condemnation proceedings.

Mr. KNOX. I perfectly understand that, Mr. President, but the laws of Virginia or of any other State do not provide that

there shall be an effort to agree upon a particular price fixed by the purchasers or the proposed purchasers.

Mr. MARTIN. Certainly not.

Mr. KNOX. My objection to this amendment is that the minimum price fixed by which this property may be purchased without condemnation is more than, according to the impression which exists in the popular mind, the property is worth. While, as I said a few moments ago, I have no information upon this subject—the property may be intrinsically worth 50 per cent more than the price that has been fixed—I think it will be deplorable to have any doubt about it when there is a method of acquiring the property that will solve all doubt.

There can be no difficulty whatever about possession. The right of possession exists in the Government peculiarly during a condition of war. We are taking factories; we are taking preferential deliveries, or we propose to, of cars; we are taking ships; we are taking, or proposing to take, all other kinds of property for immediate use for the purposes of the Government. Why, then, should the Government hesitate or halt or pause in respect to the taking of this abandoned property?

Mr. BORAH. Mr. President, I ask for the yeas and nays on the motion of the Senator from Virginia [Mr. MARTIN].

The PRESIDING OFFICER (Mr. ROBINSON in the chair). The Senator from Idaho asks for the yeas and nays.

The yeas and nays were ordered.

Mr. THOMAS. Mr. President, I am not generally upon the floor in advocacy of appropriations, particularly appropriations in emergency bills. But I have listened to the discussion regarding this particular appropriation with considerable interest; and while I have no doubt that the money asked for the purchase of this tract of land and improvements is more than they would bring upon the market, and while I do not want to see the Government pay any more than the actual value of this or any other property, we must take into consideration the urgent, immediate needs of the Navy Department for some means of housing the recruits to be assembled and now being assembled through the increase of our marine force recently authorized. You can not build structures, you can not even assemble tents and erect them with the degree of speed now demanded; and if it is true that as to men now under enlistment and as to the proper discipline and equipment of our marine forces the Government finds itself unable to give them proper accommodations, we can very readily understand how urgent is the need for something of this sort.

The amount of money carried by this appropriation for the purpose mentioned aggregates $1,400,000. I do not understand that to be a minimum bid or price for the property, as is here contended; that is the amount carried by the bill. My construction is that the Government under this appropriation can not pay in excess of the sum of $1,400,000. It may pay that, but it can not pay any more. It may be able to obtain the property for less. That is the maximum and not the minimum amount provided for the purpose. It can not in my judgment be considered otherwise.

Generally speaking, provisions looking to the acquisition of property through legislation by an alternative method may be open to criticism, certainly to discussion; but where, as in this case, Mr. President, condemnation must, as a prerequisite, be preceded by an effort at purchase, without which the condemnation proceedings must fail, as is the case in many of the States, including Virginia, as stated by the Senator from that State having charge of the bill, the omission of this proviso regarding purchase might be fatal to the purpose sought to be accomplished. If it be true—and I of course accept it as absolutely true—that the Navy Department took the initiative in this matter by calling the attention of the owners of the property to its needs, requested them to make an offer or agree to some amount for it, informed the committees of the two Houses of the fact, and impressed upon them as the only thing available for its emergency the urgent need for this property, I can readily understand, Mr. President, how that need would very largely interfere with, if not entirely prevent, the committee from making an investigation necessary to the protection of the Government under ordinary conditions.

I expect, Mr. President, in the preparation for the war and in prosecuting it that there will be a huge waste of the public funds. There always is, and I know of no way of avoiding it. War means vast circulation of money and that means high prices. We have had them in all of the industries of the country for the last two years. With our entry into the war, and the expenditure of these huge sums, waste is absolutely inevitable, and graft will exist to a greater or less degree, however honest and scrupulous those in charge of the administration are, and however vigilant they may be to prevent it. It will lurk in Army contracts, in the quality of supplies, in the purchase of locations, in equipment, and, unfortunately, in the exchange of the absolute necessities of life. Those, Mr. President, who will profit by these huge expenditures are men who assume that their duties as patriots are satisfied when they rise to the sound of the national anthem and stand while others sing it.

I think, Mr. President, in view of the emergency which is before us, of the necessity for housing these young men who are enlisting and about to offer their lives for their country, that we should be as expeditious as possible, due regard being had to the requirements of the Government in securing these or some other quarters for them. When the Navy Department comes to these committees and declares that this is an indispensable part of their immediate equipment, and when it appears that under the provisions of the bill the Government proposes to use its power of condemnation to secure the property as cheaply as it can, we should not hesitate any longer, but submit these matters to the conference committee in the hope that they will agree as soon as possible and dispose of them without further delay.

Mr. POMERENE obtained the floor.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Idaho?

Mr. BORAH. I thought a vote was being called for, and I desired to say just a word.

Mr. POMERENE. Mr. President, I have not been able to hear all the discussion, but I should like to know, if it has not already been stated, how the figures, $1,400,000, were arrived at?

Mr. SHAFROTH. By the naval officers, I will state to the Senator.

Mr. POMERENE. How did they arrive at that figure?

Mr. SHAFROTH. Negotiations have been going on with the Navy Department for some time, it being not only a war proposition, but a peace proposition as well. A board was sent down by the Secretary of the Navy for the purpose of ascertaining the value of the property. These lands were considered to be worth a very large amount, and a price was asked for them much greater than $1,400,000. It was shown that the buildings cost over a million and a half dollars, and that the board appraised them at $680,000. That left $720,000 for the three pieces of land. The lands consist of the exposition grounds and all the buildings thereon, another area which fronts on water having a depth of 35 feet, and then there is still another piece of ground.

Mr. POMERENE. I heard that statement made; but I wanted a little more specific information about it. The statement was also made that some minors had undivided interests in one of these tracts, I believe, or does that statement apply to all of the tracts?

Mr. SHAFROTH. It applies, I think, to two of the tracts. I will ask the Senator from Virginia if that is not correct?

Mr. MARTIN. Yes.

Mr. SHAFROTH. It applies to two of the tracts; and consequently condemnation proceedings in all likelihood will have to be undertaken; and in that event the Government will theoretically, at least, get the land at a fair valuation. Inasmuch as this site is the only site, as testified to by the witnesses, that is contiguous to deep water, is the only available site for a great naval station in a bay that is protected from attack, and is midway on the Atlantic coast, it does seem to me that it is most desirable that the Government should acquire it, especially in this time of war, when we must speed matters. With the buildings already erected it is worth a great deal more than would be a site on which buildings would have to be constructed, involving a delay of three or four months.

Mr. POMERENE. The measure of damages would be what the property is reasonably worth, not actually for this specific purpose but generally what it is worth?

Mr. SHAFROTH. That is true; but when the Government has a right to condemn, as is given in this amendment, I do not see what objection there can be to adopting the amendment.

Mr. POMERENE. There is not any objection, of course, if the property is to be condemned; but there is one of these pieces of land that could be purchased, I take it from the Senator's own statement, without condemnation proceedings.

Mr. SHAFROTH. Probably that is true; but the department is going to make the best bargain it can and negotiations have been under way. They have got the price down. I asked them whether they could possibly get the price any lower and they said they thought not, but would not say positively. They are still going to try to get the price lower. It seems to me, if we want to speed the war program, we had better undertake to buy that site, which is immediately available, and which has

on it buildings already constructed and ready for occupancy, so that we can proceed with the preparation for war.

Mr. POMERENE. Mr. President, I realize the necessity for haste, but at the same time, it seems to me, that the provision for purchase ought to be so hedged about that there can be no possible question about it. I do not mean to suggest by that that I question the motives, the integrity, or the ability of the men who are dealing with the subject.

Mr. SHAFROTH. The Senator knows that in condemnation proceedings we have a right to secure the property at a reasonable value, and we have a right to take possession of it immediately by putting up a deposit.

Mr. POMERENE. I understand that is true where there is a condemnation proceeding, but that is not necessarily true where there might be a purchase.

Mr. SHAFROTH. Somebody must exercise judgment as to which is the best course to be pursued, and I do not see that we can do so nearly as well as can the Department of the Navy.

Mr. BORAH. Mr. President, the Senator from Virginia [Mr. MARTIN] has handed to me two amendments covering this subject and he will, as I understand, insist that they be put into the bill if it is possible to do so.

Mr. MARTIN. That is correct.

Mr. BORAH. I desire to have the amendments inserted in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. POMERENE. Mr. President, I should like to have these amendments read.

The PRESIDING OFFICER. The Secretary will read the amendments.

The Secretary proceeded to read the amendments.

Mr. STONE. Mr. President, where does this matter come in? The Secretary gets up and reads something, and we do not know what it is.

Mr. SHAFROTH. It is to take the place of amendment numbered 68 in the bill, on page 72.

Mr. STONE. Then it ought to be so stated.

The PRESIDING OFFICER. The Secretary is reading the matter sent to the desk. Without objection the Secretary will read the proposed amendment as requested.

The Secretary read as follows:

Naval operating base, Hampton Roads, Va.: If the President in his discretion and judgment shall determine that it is necessary for the proper conduct of military and naval operations and for the safety and defense of the country to acquire the tract of land known as the Jamestown Exposition site on Hampton Roads, Va., and such other lands adjacent thereto as lie north of Ninety-ninth Street and Algonquin Street, the entire property being bounded on the north and west by Hampton Roads and Willoughby Bay, on the east by Boush Creek, and on the south by Ninety-ninth and Algonquin Streets, including all easements, riparian and other rights appurtenant thereto, and including all the rights and properties of railway, electric light, power, telephone, telegraph, water, and sewer companies, he is hereby authorized and empowered to acquire said property by purchase or condemnation at a price not exceeding $1,400,000; and toward the equipment of said property as a naval operating base, in case it is acquired, including piers, storehouses, oil-fuel storage, training station, recreation grounds for the fleet, aviation, and other purposes, $1,600,000; in all $3,000,000: *Provided*, That for the acquisition of said property either by purchase or condemnation no greater sum shall be paid than shall be determined by the President to be a reasonable and fair price.

At the end of the amendment also insert:

Provided further, That if in the opinion of the President military conditions require such action he may take immediate possession of all of the foregoing described property and thereafter shall take steps for the purchase or condemnation of the same as hereinbefore provided.

Mr. BORAH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. BORAH. As I understand now, in case the motion of the Senator from Virginia should not prevail—in other words, if the negative should predominate—that would have the effect of defeating the bill?

The PRESIDING OFFICER. The Chair thinks that it would depend upon the further action of the House at the other end of the Capitol. The Chair also thinks that the parliamentary inquiry of the Senator from Idaho comes at an inopportune time. The Chair feels that it is proper to advise the Senator that in the opinion of the present occupant of the chair, the House at the other end of the Capitol could take further action without encompassing the defeat of the bill. It would have the effect of preventing the passage of the bill unless other action were taken by the House of Representatives.

Mr. BORAH. If I am not inopportune in making the suggestion, then, so far as our action is concerned it would be conclusive.

The PRESIDING OFFICER. The question is on the motion of the Senator from Virginia [Mr. MARTIN] that the Senate further insist upon its amendments, agree to the further conference asked for by the House, and that the Chair appoint the conferees. As many as are in favor of that motion will say "aye."

Mr. LA FOLLETTE. Mr. President, a parliamentary inquiry. Were not the yeas and nays ordered?

The PRESIDING OFFICER. The yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. FLETCHER (when his name was called). I have a general pair with the senior Senator from New Hampshire [Mr. GALLINGER]. I transfer that pair to the junior Senator from Illinois [Mr. LEWIS] and vote "yea."

Mr. LODGE (when his name was called). I have a general pair with the senior Senator from Georgia [Mr. SMITH]. I do not see him in his seat. As I am advised, however, that he would vote as I am about to vote, I vote "yea."

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from Wyoming [Mr. WARREN], who is not in his seat. I therefore withhold my vote.

The PRESIDING OFFICER (when Mr. ROBINSON'S name was called). I am paired with the junior Senator from Michigan [Mr. TOWNSEND]. I transfer that pair to the senior Senator from Louisiana [Mr. RANSDELL], and vote "yea."

Mr. SAULSBURY (when his name was called). I have a general pair with the senior Senator from Rhode Island [Mr. COLT]. On questions of this character we have an understanding that we shall each vote. I therefore vote "yea."

Mr. MCKELLAR (when Mr. SHIELDS'S name was called). The senior Senator from Tennessee is absent from the city on important business. I ask that this announcement may stand for the day.

Mr. CURTIS (when Mr. TOWNSEND'S name was called). I have been requested to announce the absence of the junior Senator from Michigan [Mr. TOWNSEND] on account of illness in his family. I will let this announcement stand for the day. The pair of the Senator from Michigan has already been announced.

Mr. UNDERWOOD (when his name was called). I have a general pair with the junior Senator from Ohio [Mr. HARDING]. I transfer that pair to the senior Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. WOLCOTT (when his name was called). I have a pair with the senior Senator from Indiana [Mr. WATSON]. I transfer that pair to the junior Senator from Arkansas [Mr. KIRBY], and vote "yea."

The roll call was concluded.

Mr. OVERMAN. I understand that the senior Senator from Wyoming [Mr. WARREN], with whom I am paired, if present, would vote "yea." I therefore vote "yea."

Mr. BECKHAM (after having voted in the affirmative). I have a pair with the junior Senator from West Virginia [Mr. SUTHERLAND]. As he has not voted, I transfer that pair to the junior Senator from Louisiana [Mr. BROUSSARD] and will let my vote stand.

Mr. KING. I desire to announce the absence of the junior Senator from Illinois [Mr. LEWIS], who is unavoidably detained on official business.

Mr. DILLINGHAM. I have a general pair with the senior Senator from Maryland [Mr. SMITH], but I am informed that if he were present he would vote in favor of this proposition. I therefore vote "yea."

Mr. PENROSE. I have a general pair with the senior Senator from Mississippi [Mr. WILLIAMS]. I am informed that if he were present he would vote "yea." I therefore vote "yea."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from New Mexico [Mr. FALL] with the Senator from Wyoming [Mr. KENDRICK];

The Senator from West Virginia [Mr. GOFF] with the Senator from South Carolina [Mr. TILLMAN]; and

The Senator from Maine [Mr. HALE] with the Senator from New Jersey [Mr. HUGHES].

The result was announced—yeas 48, nays 22, as follows:

YEAS—48.

Ashurst	Johnson, S. Dak.	Phelan	Smith, S. C.
Bankhead	Jones, N. Mex.	Pittman	Stone
Beckham	Kendrick	Poindexter	Swanson
Chamberlain	King	Reed	Thomas
Dillingham	Lodge	Robinson	Thompson
Fletcher	McKellar	Saulsbury	Trammell
Frelinghuysen	McLean	Shafroth	Underwood
Gerry	Martin	Sheppard	Vardaman
Hardwick	Newlands	Simmons	Wadsworth
Hollis	Overman	Smith, Ariz.	Walsh
Husting	Owen	Smith, Ga.	Weeks
James	Penrose	Smith, Mich.	Wolcott

NAYS—22.

Borah	France	Kenyon	Page
Brady	Gore	Knox	Pomerene
Calder	Gronna	La Follette	Sherman
Cummins	Johnson, Cal.	McCumber	Sterling
Curtis	Jones, Wash.	McNary	
Fernald	Kellogg	Norris	

NOT VOTING—26.

Brandegee	Hale	Nelson	Tillman
Broussard	Harding	New	Townsend
Colt	Hitchcock	Ransdell	Warren
Culberson	Hughes	Shields	Watson
Fall	Kirby	Smith, Md.	Williams
Gallinger	Lewis	Smoot	
Goff	Myers	Sutherland	

So Mr. MARTIN's motion was agreed to.

The PRESIDING OFFICER. The Vice President will hereafter announce the conferees on the part of the Senate.

The VICE PRESIDENT subsequently appointed Mr. MARTIN, Mr. UNDERWOOD, and Mr. WARREN managers at the further conference on the part of the Senate.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the Vice President:

S. 995. An act to authorize the issue to States and Territories and the District of Columbia of rifles and other property for the equipment of organizations of home guards;

S. 2133. An act to amend an act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, and for other purposes; and

S. J. Res. 70. Joint resolution relating to the service of certain retired officers of the Army.

PETITIONS AND MEMORIALS.

Mr. SMITH of South Carolina. I present a communication signed by Rev. W. A. Betts, of the Methodist Episcopal Church South of Olanta, S. C., which I ask to have printed in the RECORD.

There being no objection, the communication was ordered to be printed in the RECORD, as follows:

OLANTA, S. C.

To the Congress of the United States of America:

In Florence County, S. C., at Olanta and in near-by rural communities, 126 men, 76 women, and 107 youths of teen age, totaling 309 persons, in public assemblies on the Lord's Day, by standing vote, recently signified their earnest desire for the enactment of such laws by your honorable body as shall—

1. Prohibit the sale or possession, except for medicinal use, of alcoholic liquor (including wine and beer) to our soldiers in the Army and Navy everywhere; and to authorize the President to establish a prohibitory zone, of such character and dimensions as he shall deem necessary, about our gallant soldiers and seamen, in camp and on shore leave, whereby to safeguard their sobriety and chastity.

2. Prohibit the use of food products in the manufacture of alcoholic liquor (including wine and beer) for beverage purposes during the war period, whereby to conserve our national food supply.

3. Prohibit throughout our States and Territories and insular possessions the sale or possession of alcoholic liquor (including wine and beer) for beverage purposes during the war period whereby to secure the highest possible efficiency of all our people.

W. A. BETTS.

Personally appeared before me the Rev. W. A. Betts, a duly accredited minister of the Methodist Episcopal Church South, resident in Olanta, S. C., and says the above-made statement is true to the best of his knowledge and belief.

Sworn to before me this 5th day of June, 1917.

[SEAL.]

A. S. KELLEY,
Notary Public for South Carolina.

Mr. HOLLIS presented a petition of the Ladies' Social Circle of the Main Street Methodist Episcopal Church, of Nashua, N. H., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Durham, N. H., praying for national prohibition as a war measure, which was referred to the Committee on the Judiciary.

Mr. FLETCHER. I present a resolution adopted by the Chamber of Commerce, of Lakeland, Fla., relative to the increased cost of living, which I ask to have printed in the RECORD and referred to the Committee on Agriculture and Forestry.

There being no objection, the resolution was referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

LAKELAND CHAMBER OF COMMERCE,
OFFICE OF THE SECRETARY,
Lakeland, Fla., June 6, 1917.

Whereas the attention of the Lakeland Chamber of Commerce has been called to the continual increase in the cost of living, which is growing at an alarming rate; and

Whereas we view with alarm the growing discontent of the people of the United States, and especially the laboring people, store clerks, and others working for small wages: Therefore be it

Resolved, That we request our Representatives in Congress to use their every energy and effort in aiding the Government to discontinue gambling in food products; and be it further

Resolved, That, in order to make the necessary legislation effective, it is suggested that violation of the law with reference to gambling in food products shall be punishable by a fine of not less than $50,000 or 10 years in the penitentiary for the first offense, and by both fine and imprisonment for future offenses.

LAKELAND CHAMBER OF COMMERCE,
C. M. CLAYTON, *President.*
A. J. HOLWORTHY, *Secretary.*

Mr. WADSWORTH presented petitions of sundry citizens of New Baltimore; of employees of the German-American Button Co., of Rochester; of sundry citizens of Gainesville; of the First Presbyterian Church of Medina; of sundry citizens of Vernon, Ithaca, Belfast, Candor, Schoharie, Stamford, Patchogue, and Jamaica; and of the Park Methodist Episcopal Church, of Hornell, all in the State of New York, praying for national prohibition as a war measure, which were referred to the Committee on the Judiciary.

Mr. PHELAN presented a petition of the Sacramento Valley Development Association, of California, praying for the enactment of legislation providing for the development of the large areas of land and for the conservation of the water in the Sacramento Valley, which was referred to the Committee on the Irrigation and Reclamation of Arid Lands.

Mr. LODGE presented petitions of the trustees of the Groton School, of Groton, Mass., and of the Massachusetts Society for the promotion of Agriculture, praying for exemption from the inheritance tax of bequests for educational, philanthropic, and religious institutions, which were referred to the Committee on Finance.

Mr. DILLINGHAM presented petitions of sundry citizens of Georgia, Albany, Manchester, and Hardwick, all in the State of Vermont, praying for national prohibition as a war measure, which were referred to the Committee on the Judiciary.

Mr. GALLINGER presented petitions of 165 citizens of Durham; of the Woman's Home Missionary Society of the Methodist Church of Antrim; of the Woman's Home Missionary Society and the Woman's Christian Temperance Union of Bethlehem; of Mrs. Mabel Hicks, of Dover; of Annie L. Durgin, of Concord; of the Auxiliary of the Woman's Home Missionary Society of Claremont; and of B. M. Howe, of Claremont, all in the State of New Hampshire, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. McLEAN presented a petition of sundry citizens of Ansonia, Derby, and Shelton, all in the State of Connecticut, praying for the raising of funds for war expenses by income taxes, etc., which was referred to the Committee on Finance.

He also presented memorials of the Watkins Art Store, of Bridgeport; of Sedgwick & Casey, of Hartford; and of the Fulton, Driggs & Smith Co., of Waterbury, all in the State of Connecticut, remonstrating against the proposed tax on talking machines, which were referred to the Committee on Finance.

He also presented petitions of the Connecticut Society of Social Hygiene and of the congregation of the Center Congregational Church, of South Manchester, Conn., praying for the abrogation of patents on salvarsan and its allied products, which were referred to the Committee on Patents.

He also presented petitions of Freja Lodge, No. 17, Independent Order of Good Templars, of Hartford; of the employees of the Stanley Rule & Level Co., of New Britain; of the Equal Francisco League, of Mystic; of the Swedish Temperance Union, of Bridgeport; of the Central Association of Congregational Churches, of Connecticut; of the Association of Congregational Churches of Windham; of the First Church of Christ of Glastonbury; and of the Young Woman's Christian Association of New Haven, all in the State of Connecticut, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of the Housewives Army of West Hartford, Conn., and of the State Lumber Dealers' Association of Connecticut, praying for Federal control of foodstuffs, which were referred to the Committee on Agriculture and Forestry.

He also presented a memorial of 336 citizens of Danbury, Conn., remonstrating against national prohibition, which was referred to the Committee on the Judiciary.

Mr. NELSON presented petitions of sundry citizens and of the congregations of the First Methodist Episcopal Church and of the Glen Avon Presbyterian Church, of Duluth, all in the State of Minnesota, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. HALE presented a resolution adopted at the Grand Court of Maine, Foresters of America, in convention assembled, at Bath, Me., May 9, 1917, pledging support to the President and to Congress, which was referred to the Committee on Foreign Relations.

He also presented petitions of the Sunday School Union of Bridgton and of sundry citizens of Unity, in the State of Maine, praying for the enactment of prohibition of the manufacture of alcoholic liquors as a measure of food conservation, which were referred to the Committee on Agriculture and Forestry.

Mr. HUSTING presented a memorial of sundry citizens of Chilton, Wis., remonstrating against the enactment of legislation to deprive farmers of the use of malted grains, which was referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Wisconsin, remonstrating against national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Wisconsin, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Appleton, Wis., praying for the enactment of legislation to prohibit the manufacture of alcoholic liquors during the war, which was referred to the Committee on the Judiciary.

He also presented resolutions adopted by the Rock County Auxiliary Council of Defense, of Edgerton, Wis., pledging aid in matters of economic efficiency, which were ordered to lie on the table.

He also presented resolutions adopted by the Irish Fellowship Club, of Kenosha, Wis., favoring home rule for Ireland, which were referred to the Committee on Foreign Relations.

He also presented resolutions adopted by the faculty of the University of Wisconsin, Madison, Wis., praying for the passage of the so-called daylight saving bill, which were ordered to lie on the table.

NATIONAL PROHIBITION.

Mr. OVERMAN, from the Committee on the Judiciary, to which was referred the joint resolution (S. J. Res. 17) proposing an amendment to the Constitution of the United States, reported it with amendments and submitted a report (No. 52) thereon.

ESTATE OF THOMAS H. HALL, DECEASED.

Mr. FLETCHER. On May 29 I introduced a bill (S. 2374) to relieve the estate of Thomas H. Hall, deceased, late postmaster at Panacea, Fla., and the bondsmen of said Thomas H. Hall, of the payment of money alleged to have been misappropriated by a clerk in said office, and it was referred to the Committee on Post Offices and Post Roads. I move that the Committee on Post Offices and Post Roads be discharged from the further consideration of the bill and that it be referred to the Committee on Claims.

The motion was agreed to.

INVESTMENT OF INDIAN FUNDS.

Mr. ASHURST. From the Committee on Indian Affairs, I report favorably with an amendment the joint resolution (S. J. Res. 73) authorizing the Secretary of the Interior to invest Indian funds in Government bonds, and I submit a report (No. 51) thereon. I ask that the report accompanying the joint resolution be read, because I intend to ask unanimous consent for its present consideration.

The PRESIDING OFFICER (Mr. ROBINSON in the chair). The report will be read.

The Secretary read the report submitted by Mr. ASHURST this day, as follows:

[Senate Report No. 51, 65th Cong., 1st sess.]

Mr. ASHURST, from the Committee on Indian Affairs, submitted the following report:

The Committee on Indians, to whom was referred the resolution authorizing the Secretary of the Interior to invest Indian funds in Government bonds (S. J. Res. 73) respectfully recommend that the resolution be adopted with an amendment as follows: In line 4, after the word "invest," insert the following: "for the benefit of any Indian or Indian tribe."

The communication of the Secretary of the Interior which refers to the resolution is quoted in full as follows:

DEPARTMENT OF THE INTERIOR,
Washington, May 31, 1917.

MY DEAR SENATOR: I inclose for your consideration and for introduction, if you deem advisable, copy of proposed joint resolution which would authorize me to invest Indian moneys in the United States liberty loan bonds, where the interests of the Indians and the United States justify such an investment. There are many millions of dollars of Indian money in the Treasury of the United States and other moneys will be paid in in the near future, a large part of which is at present either drawing no interest or less than 3½ per cent. The investment of such of these funds as can be spared in the liberty bonds authorized will, therefore, not only serve a public and patriotic purpose, but will increase the returns to the Indian beneficiaries. I hope you will see your way clear to press this resolution to early adoption.

Cordially, yours,

FRANKLIN K. LANE, *Secretary.*

Hon. HENRY F. ASHURST,
Chairman Committee on Indian Affairs,
United States Senate.

Mr. CURTIS. Mr. President, I hope no one will object to the unanimous consent which will be asked for the passage of the joint resolution. At a hearing before the committee last winter it was disclosed that there was in the Treasury a fund of $11,000,000 of money belonging to the Indians that was drawing no interest. In one case a tribe had $900,000 in the Treasury, $600,000 of which was drawing no interest, and yet it was reported that some members of that tribe were really starving. The interest at three and a half per cent would have brought that tribe $21,000 that year. In addition to the $11,000,000 of tribal money, which is now drawing no interest, there is about $29,000,000 of tribal funds which is drawing from 3 to 5 per cent. There is some $40,000,000 of individual Indian funds that are drawing from 3 to 5 per cent. All money belonging to individual Indians or to Indian tribes which is now drawing less than three and a half per cent, it seems to me, should be invested in these liberty bonds; and I hope there will be no objection to the request for unanimous consent.

Mr. ASHURST. Mr. President, I ask uanimous consent for the present consideration of the joint resolution.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

Resolved, etc., That the Secretary of the Interior be, and he is hereby, authorized to invest any Indian funds or moneys in the 15-30 year 3½ per cent gold bonds of the issue authorized by act of Congress approved April 24, 1917, where, in his judgment, the interests of the Indians and of the United States justify such investment.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 1, line 4, after the word "invest," it is proposed to insert "for the benefit of any Indian or Indian tribe."

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WATSON:

A bill (S. 2420) granting an increase of pension to Franklin Johnson; to the Committee on Pensions.

Br. Mr. WADSWORTH:

A bill (S. 2421) authorizing the President to reinstate Charles L. Poor as a lieutenant in the United States Navy; to the Committee on Naval Affairs.

By Mr. PHELAN:

A bill (S. 2422) for the relief of Charles Edward Lutz; to the Committee on Naval Affairs.

By Mr. CHAMBERLAIN:

A bill (S. 2423) to amend section 9 of the act entitled "An act to alter and amend an act entitled 'An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon, approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled 'An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon,' approved May 4, 1870, and for other puropses," approved June 9, 1916; to the Committee on Public Lands.

By Mr. HALE:

A bill (S. 2424) granting a pension to Charles E. Matthews;

A bill (S. 2425) granting a pension to M. Augusta Snow (with accompanying papers);

A bill (S. 2426) granting an increase of pension to David E. Seekins (with accompanying papers);

A bill (S. 2427) granting an increase of pension to Albert W. Hassan (with accompanying papers);

A bill (S. 2428) granting an increase of pension to Samuel C. Howe (with accompanying papers);

A bill (S. 2429) granting an increase of pension to John A. Patterson (with accompanying papers); and

A bill (S. 2430) granting an increase of pension to Allen C. Goodwin (with accompanying papers); to the Committee on Pensions.

By Mr. POINDEXTER:

A bill (S. 2431) for the construction and equipment of a naval base for fleet operation and for works of defense on the Island of Guam; to the Committee on Naval Affairs.

A bill (S. 2432) appropriating $24,000 for the providing and installing in the harbor of Seattle, Wash., four mooring buoys for the use of the Government; to the Committee on Commerce.

By Mr. McLEAN:

A bill (S. 2433) granting an increase of pension to Eva F. Holdridge (with accompanying papers); to the Committee on Pensions.

By Mr. NELSON:

A bill (S. 2434) authorizing the counties of Cass and Itasca, Minn., to construct a bridge across the Mississippi River between said counties; to the Committee on Commerce.

AGRICULTURAL PRODUCTS.

The PRESIDING OFFICER. There being no resolutions coming over from the previous day, the morning business is closed.

Mr. KENYON. I desire to ask the Senator from Oklahoma [Mr. GORE] a question with reference to the so-called food bill.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. KENYON. A week ago on Saturday the Senate passed what is known as the first of the food-control bills. It was a House bill with a number of amendments. I should like to ask the chairman of the committee, the Senator from Oklahoma, if any conferees have been appointed on the part of the House or if anything has been done looking to a conference on the bill?

Mr. GORE. In answer to the suggestion of the Senator I will say that the so-called food bill passed the Senate June 2. On that day the Senate appointed conferees and asked for a conference with the House of Representatives. I made inquiry this morning at the office of the chairman of the House Committee on Agriculture and was advised that no conferees have been appointed in behalf of the House.

I may state in this connection that whatever delay may be incident to the final passage of the bill the Senate is acquitted of any responsibility.

Mr. KENYON. Does the Senator know why conferees on the part of the House have not been appointed?

Mr. GORE. I have no advice on that point.

Mr. KENYON. I am simply anxious that the Senate shall bear no responsibility in the delay over the bill. The Senate acted over a week ago and the responsibility is not on the Senate for any delay, if I understand the chairman.

Mr. GORE. I think the Senator is entirely correct.

Mr. SMITH of Georgia. It is also true that the Senate requested a conference at the time of the passage of the bill and that conferees on the part of the Senate were named.

Mr. GORE. The statement of the Senator from Georgia is correct.

PUNISHMENT OF ESPIONAGE.

Mr. OVERMAN. I ask the Senator from Nevada if he will allow me to call up the conference report on House bill 291, what is known as the espionage bill.

Mr. NEWLANDS. I am very anxious to proceed with the consideration of the pending priority bill. I will ask the Senator whether he thinks it will take much time.

Mr. OVERMAN. It can not take much time, for the reason that the House has adopted the report unanimously and the report is substantially, with one or two exceptions, the bill that passed the Senate. Therefore no one in the Senate will object to it, because it is practically the Senate bill. The House took the Senate bill practically, except as to search warrants. The House would not agree to the Senate search-warrant provision and adopted what is known as the New York code, or practically the New York code. With those exceptions it is practically the bill as it passed the Senate.

Mr. BORAH. Mr. President, I have no desire to delay the adoption of this report. I know the large vote by which the bill passed the Senate, and any view which I might have would not change the situation. I am not even going to ask for a yea-and-nay vote, but I do want to say that I desire to vote against the bill, and I wish the RECORD to show that I voted against it on account of section 1 in Chapter XII of the bill.

Mr. NEWLANDS. I shall have no objection to temporarily laying aside the unfinished business, with the understanding that it shall be taken up immediately upon the conclusion of the conference report.

Mr. OVERMAN. I wish also to state that what is known as the Reed amendment was stricken from the bill, but in rearranging the bill, as the Senator from Missouri will see, we made his emergency measure apply to war time.

The PRESIDING OFFICER. The Senator from Nevada asks unanimous consent that the unfinished business be temporarily laid aside in order that the Senate may proceed to the consideration of the conference report on the espionage bill. Is there objection?

Mr. REED. Mr. President, the Senator from North Carolina [Mr. OVERMAN] called my attention to the conference report two or three days ago, and very kindly gave me a copy of it. I told him that I would examine it, but, although I have tried very hard to get to it, I have not been able to read it. An amendment which I offered to the entire bill limited the bill for the period of the war, and I was very much in earnest about that amendment. The Senator from North Carolina states that, in his opinion, the amendment has been made to apply to all parts of the bill where it should apply, and as to other parts it has been so arranged that there is no application, so that a part of this legislation would be permanent in its nature and a part of it would apply during the war.

I do not want to give my consent to the passage of this measure until I have examined the conference report. If the Senator will let it go over until to-morrow, I will be ready then to answer on the floor or I will be ready to waive objection.

Mr. OVERMAN. I will say to the Senator that I would like to finish it, but of course the Senator has the right to object. The Senator would not himself have his amendment to apply to the section entitled "Counterfeiting Government seal," or he would not have it apply to the title "Passports." I will say to him that most of the bill was framed before the war and it only affected neutrality. Half the chapters are neutrality chapters, and where anything applies of an emergency nature, if I may call the Senator's attention to page 5, we put in "when the United States is at war." We added that because we thought it was in compliance with the Senator's amendment. The Senator remembers that I came to him and told him the trouble in the conference committee, and while he did not say that he would consent to it, he said neither yea nor nay; we thought there was an emergency. Take his amendment, for example, on page 3, section 3, "Whoever, when the United States is at war, shall willfully make or convey false reports or false statements." Then, in section 6, "The President, in time of war or in case of national emergency."

The Senator will see by an examination that Title V, "Enforcement of neutrality," reads "during a war in which the United States is a neutral nation," and we have addded to section 4 "during a war in which the United States is a party." So I think the Senator will see we have covered everything his amendment really ought to cover. Title VII, "Certain exports in time of war unlawful." I think the Senator will find that where that clause is not used the language ought to apply in time of peace. These laws were gotten up, as the Senator remembers, because of our weakness in neutrality laws. It was when the allies were at war with Germany and there was no thought of this country going into war. The object was to protect our neutrality. Four or five of these chapters are nothing but neutrality laws. However, in some matters we thought it ought to be limited to the time of war, and we have done that in carrying out the amendment of the Senator from Missouri.

Mr. REED. Mr. President, of course I do not intend to discuss the matter now. I may find that what the committee has done is satisfactory. I ought to have had time enough, as far as the mere lapse of time is concerned, to have read the bill many times, but I have had many other things to do. There is some limit upon human endurance, as we all know.

I am aware of the fact, and have been all along, that the bill deals with some subjects that do not relate to the present war; but I am also aware of the fact that when the bill was first presented to the Judiciary Committee it came with the statement that the legislation was in the nature of emergency legislation, the emergency consisting in the fact that the war in Europe was on, and that it was necessary to have legislation to meet the conditions that existed. The committee was urged to great haste. When the legislation was passed here in the Senate at the last session of Congress, and before war was declared, the same emergency was put forward. Then, again, when the bill came up at this session since the war began there was a great deal of haste. The committee was overworked; the Senate was overworked, and in order to be sure we were not putting into our laws something that might rise up to plague us in the future I wrote the amendment limiting the entire legislation to the period of the war.

Until I have examined the text of the report I would not be willing to have the report adopted. I do not want to obstruct in the slightest degree the final passage of this act, but I am very earnest about the proposition that we are engaged now in passing legislation under stress and under excitement and under peculiar conditions, and while we must pass such legislation, I think it ought generally to be limited to the emergency now

confronting us, and there will be abundance of time when the war is over to sit down and coolly produce the legislation that is then necessary.

So while we are taking a good deal of time, I ask that this matter may lie over until to-morrow, and I shall either answer in one way or the other at that time.

Mr. OVERMAN. I think I should state to the Senate that there was one other change which I assume a large minority of the Senate will be glad to hear. The fight on the question of the use of the mails ranged around the words "or intended or calculated to induce, promote, or further any of the acts or things by any provision of this act declared unlawful." On account of the House conferees objecting to it and the large minority that voted for an amendment to strike it out, the Senate conferees struck it out.

I give notice that I shall call up the conference report to-morrow at the close of the morning business.

AMENDMENT OF INTERSTATE-COMMERCE LAW.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

Mr. NEWLANDS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Nevada suggests the absence of a quorum, and the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hardwick	New	Smith, Ga.
Bankhead	Hitchcock	Newlands	Smith, Mich.
Beckham	Hollis	Norris	Smith, S. C.
Borah	Husting	Overman	Smoot
Brady	James	Owen	Sterling
Calder	Johnson, Cal.	Page	Thomas
Culberson	Johnson, S. Dak.	Phelan	Thompson
Cummins	Jones, N. Mex.	Poindexter	Trammell
Curtis	Jones, Wash.	Pomerene	Vardaman
Dillingham	Kellogg	Reed	Wadsworth
Fernald	Kendrick	Robinson	Warren
Fletcher	Kenyon	Saulsbury	Weeks
France	McCumber	Shafroth	Wolcott
Frelinghuysen	McKellar	Sheppard	
Gerry	McNary	Simmons	
Gore	Nelson	Smith, Ariz.	

Mr. HUSTING. I desire to state that the senior Senator from Oregon [Mr. CHAMBERLAIN] is unavoidably absent on public business.

Mr. FRELINGHUYSEN. I wish to announce the absence of my colleague [Mr. HUGHES] on account of illness. I ask that this announcement may stand for the day.

Mr. WOLCOTT. I desire to announce the absence of the senior Senator from Maryland [Mr. SMITH] on official business. I ask that this announcement may stand for the day.

The PRESIDING OFFICER. Sixty-one Senators have answered to their names. There is a quorum present.

Mr. NEWLANDS. Mr. President, I wish to ask the Senator from Georgia whether he has any objection now to fixing a time for a vote upon the bill?

Mr. HARDWICK. I hope the Senator will not press that now. I have just returned, and I ask the Senator to postpone his request. I do not ask it with any view of delaying final action on the bill.

Mr. NEWLANDS. Later on I shall ask unanimous consent for fixing a time and for the limitation of debate.

The PRESIDING OFFICER. The bill is before the Senate as in Committee of the Whole and open to amendment.

Mr. SMITH of Georgia. I send to the desk an amendment which I wish to have read for information.

The PRESIDING OFFICER. Without objection, the Secretary will read the amendment which the Senator from Georgia asks to have read for information.

The SECRETARY. On page 4, line 2, beginning with the word "President," strike out down to and including the word "prescribed," on line 8.

On page 5, after line 23, insert the following:

Provided, That if by reason of freeing the carrier in consequence of compliance with any such order or direction from liability under existing law imposing civil penalties, obligations, or liabilities any shipper is damaged, the Interstate Commerce Commission shall, upon application by such shipper and upon notice to the Attorney General of the United States and after due hearing, determine the amount of such damage, which amount shall be paid by the Secretary of the Treasury out of any funds in his hands not otherwise appropriated, and further proceedings may be had upon such finding similar to those provided in this section where claims are filed for damages by carriers.

Strike out section 2 and substitute the following:

SEC. 2. That the President is hereby authorized to appoint, by and with the advice and consent of the Senate, a board of five members, which shall be known as the transportation priority board, which board shall hold office and exercise the authority herein conferred for and during the continuance of the war unless earlier terminated by act of Congress or order of the President. That for such period of time as said transportation priority board shall remain in existence it shall have power to investigate problems of transportation by common carriers by rail or water and when it finds that the national defense or the public welfare so requires it may decide and direct that certain traffic shall have priority or preference in transportation, and having so found and so notified the common carriers they shall carry into effect such directions notwithstanding any provision of law now existing to the contrary. Such directions may be made from time to time or for specific periods of time or may be modified or rescinded at any time by the board.

SEC. 3. That each member of such board shall receive compensation at the rate of ——— per annum. A majority of the board shall constitute a quorum. The board may select a chairman and adopt rules and regulations in regard to its procedure and the conduct of its business. The board may employ a secretary and employ and fix the compensation of such officers and employees as it may find necessary for the performance of its duties, and may rent suitable offices. All necessary expenses of the board, including traveling expenses of its members or its employees, shall be allowed and paid upon the presentation of vouchers therefor approved by the chairman of the board and by such person or persons as may be directed by the board. The expenses of the board, including the payment of salaries, shall be paid as may be directed by the President, out of funds which may be provided to meet the expenses of national security and defense.

SEC. 4. That all common carriers are hereby directed and required to establish forthwith and to maintain continuously in the city of Washington during the period of the war an agency or a committee of railroad officers or officials fully empowered by such carriers to receive on the part of all carriers notice and service of such orders and directions as may be issued by the transportation priority board and to arrange for a prompt compliance therewith by such carriers, and it shall be the duty of any and all officers and agents of such carriers by rail or water to obey strictly and conform promptly to such orders.

SEC. 5. That if by reason of giving preference or priority of transportation under any order or direction authorized hereunder or by reason of disarrangement of traffic caused by giving such preference or priority any carrier shall suffer injury or damage, the transportation priority board shall, upon application of the carrier and upon notice to the Attorney General of the United States, after due hearing, determine the amount thereof. If any shipper, by reason of the priorities of shipments, shall be deprived of his rights under existing law now imposing civil liabilities upon carriers, the transportation priority board shall, upon application by such shipper and upon notice to the Attorney General of the United States, after due hearing, determine the amount of such injury. Any carrier complying with any such order or direction herein authorized shall be exempt from any and all provisions in existing law imposing civil or criminal pains, penalties, obligations, or liabilities upon carriers on account of such action.

The transportaton priority board shall report to Congress from time to time any amounts covering damages to carriers or to shippers which they are required to investigate and pass upon as hereinabove provided.

SEC. 6. That all general rules adopted by the transportation priority board shall become effective only after they are approved by the President, and special orders creating priorities and preferences in transportation shall become effective only after they are approved by the Council of National Defense.

Mr. NORRIS. As I understand, the Senator from Georgia has had the proposed amendments read simply for information?

Mr. Smith of Georgia. That is all.

Mr. NORRIS. I desire at this time to offer an amendment.

The PRESIDING OFFICER. The Secretary will state the amendment proposed by the Senator from Nebraska.

Mr. SMITH of Georgia. I ask that the amendments which I have sent to the desk may be printed. There are three amendments involved in the matter.

Mr. NORRIS. I suggest to the Senator to have them printed in the usual form, so that we may have them on our desks.

The PRESIDING OFFICER. Without objection that order will be made.

Mr. SMITH of Georgia. I desire that they may be printed in the usual form so that we may have them in convenient shape for reference.

Mr. POMERENE. Mr. President, I desire to ask the Senator from Georgia a question.

The PRESIDING OFFICER. Does the Senator from Nebraska yield for that purpose?

Mr. NORRIS. I yield to the Senator from Ohio.

Mr. POMERENE. Does the Senator expect to ask for a vote on these amendments this afternoon?

Mr. SMITH of Georgia. No; I do not think so. I do not think we shall reach a vote on them this afternoon.

Mr. POMERENE. The amendments, if adopted, would very substantially modify the operation of the bill.

Mr. SMITH of Georgia. They would modify it very greatly, and they were intended to do so.

The PRESIDING OFFICER. The Senator from Nebraska has the floor.

Mr. NORRIS. I will ask the Secretary to state the amendment which I have sent to the desk.

The PRESIDING OFFICER. The Secretary will state the amendment.

The SECRETARY. On page 4, line 21, after the word "carrier," it is proposed to insert the words "person, firm, or corporation"; so that it will read:

Or by reason of disarrangement of traffic caused by giving such preference or priority, any carrier, person, firm, or corporation shall suffer injury or damage—

On the same page, in line 23, it is proposed to strike out the word "carrier," and to insert the words "party claiming damage"; so that it will read:

The Interstate Commerce Commission shall, upon application by the party claiming damage and upon notice to the attorney general—

On page 5, line 15, it is proposed to strike out the word "carrier," and to insert the words "party claiming damage."

Mr. NORRIS. Mr. President, this amendment consists of changes in three places in the bill to this effect. It gives to any person or corporation the same right which the bill proposes to give to a carrier in case damage has resulted, and they are able to prove it, on account of any orders made by the President in transportation matters.

Mr. POMERENE. May I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Ohio?

Mr. NORRIS. I yield to the Senator.

Mr. POMERENE. Do I understand from the Senator's explanation of these amendments that they are broad enough to cover any damage or inconvenience which a passenger, for instance, on a railroad might suffer?

Mr. NORRIS. No; not if the Senator refers to a personal-injury matter.

Mr. POMERENE. I refer to a case, for instance, where a prospective passenger might be injured or delayed by reason of the fact that he could not secure passage on a railroad train at the usual time.

Mr. NORRIS. I doubt very much whether that would be covered by the amendment; I am rather of the opinion it would be too remote for that; but the bill provides, commencing with the proviso at line 17, page 4, as follows:

Provided, That if by reason of giving preference or priority in transportation under an order or direction authorized hereunder, or by reason of disarrangement of traffic caused by giving such preference or priority, any carrier shall suffer injury or damage—

It then provides how he shall proceed to obtain recovery for this damage. My amendment proposes to apply the same remedy to any shipper, to any person, firm, or corporation who is damaged by the same order which damages the carrier.

Mr. KELLOGG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Minnesota?

Mr. NORRIS. I yield to the Senator.

Mr. KELLOGG. Then, as I understand the Senator's amendment, if, by reason of the necessities of the Government during war, the Government should transport troops and munitions which blocked the railways, every shipper in the United States, by reason of the Government transporting such troops and munitions, can call upon the Government for damages? In other words, the Government would become the guarantor of a sufficient transportation during the war, and every shipper in the United States could get damages out of the Treasury by reason of delays on account of the necessity of transporting munitions of war. Is that the purpose of the amendment?

Mr. NORRIS. The Senator, if he intends that to be a question, has propounded a proposition which will enable me at once to meet the real question involved. The bill provides—and the Senator is for the bill, as I understand—that that very thing shall apply to a railroad, but that it shall apply to nobody else. If the railroad suffers damage by reason of any disarrangement of traffic, we must pay that damage out of the Treasury.

Let us see how that could be. Suppose the bill was passed, and the President issued an order that in the State of California or in the State of Washington certain cars which were on the track there ready to be loaded with fruit that is ripe and must be shipped, should be turned to some other point and used for the transportation of something else—troops, coal, or anything of that kind—and the order is obeyed; afterwards the railroad company comes forward and says, "These cars that we had for the purpose of shipping the produce out of Washington or California would have produced us an income greater than we received for the purposes for which they were used by order of the President; therefore we are entitled to damages." That difference is provided for by the bill. If the railroad can show that it could have made more money in using its cars for some other purpose than the Government compels it to use them for, it gets paid for whatever the difference is; but the man who had the fruit, who had everything he owned, perhaps, involved in it, must lose it all, and there is no way for him to get payment. The railroad does not lose all even of the transportation proposition; it only loses a portion of it, while the individual may be bankrupted on account of the order.

Let us suppose that the Senator from Minnesota is a contractor and is constructing a building in Minneapolis. He has contracted to have that building finished by the 1st of July. A large quantity of steel is necessary for its construction. When he made the contract with the prospective owner of the building, he, in turn, contracted with somebody else in Pittsburgh to supply the steel. The steel is ready, and he is ready to receive it; he has filed a bond by which he must pay damages if he does not complete the building upon the day named in the contract; but just when the steel is ready to be shipped, the President issues an order taking those cars which were going to haul the steel from Pittsburgh to Minneapolis and diverts them to Georgia to haul something else for the troops or to haul the troops themselves. The Senator from Minnesota is unable to get the steel; he is therefore unable to complete the building. It is no defense to plead the presidential order when the owner sues for damages. He may have everything he has in the world involved in the transaction, but he has no remedy and he goes down to ruin; but the railroad company, if it can show that it could have made more in shipping the Senator's steel to Minneapolis than it actually makes in the other transaction, which the President has compelled it to execute, gets damages, and the taxpayers of the country pay them.

Mr. President, if it is right that the railroads should be paid damages, why, in that case, should not the Senator from Minnesota get paid for his damages, which are brought about by the same act of the President, and which are more severe on him than the loss in that case to the railroad because they only lose the difference?

Again, suppose if we are only going to protect the railroad and not going to protect anybody else, that in diverting these cars the Senator was going to use in shipping steel from Pittsburgh to Minneapolis or to some other locality, the railroad company actually makes a profit out of it? If they are the only ones who are going to be benefited and get damages, then the bill ought at least to provide that when the order is profitable, they should pay the excess profit to the Government. This ought to work both ways.

Mr. President, the Senator from Minnesota seems to be concerned when he says, "Why, this would pay damages to every shipper in the United States." If we damage every shipper in the United States, ought we not to pay for the damage that we inflict? Why should we say that the President shall issue an order that will injure a dozen different people, let us say, and that one person who was injured by the order shall be paid from the Treasury and the others shall not be so paid? If the shipper, the contractor, the laborer, must lose what he has involved and suffer damages because it is a patriotic duty, then, why should we single out one corporation that has suffered only a small loss? Why should we single out one individual and compensate him?

Mr. President, if this provision remains in the bill as it is now and becomes law, it will not only be the shipper who will be injured but at any time, especially when there is any possibility of a war with any foreign country, no man could get any contractor to do anything without charging him a price in which was involved insurance for just the kind of a risk which this proposed law compels him to take.

Would a wise man, if he were going to contract with the Senator from Nevada [Mr. NEWLANDS] to erect a building, to construct an irrigation ditch, or to do any other great work, knowing that the President of the United States during this war might make an order that would make it physically impossible for him to complete his contract, name a price in his bid unless he included in that price an insurance for the kind of risk that he would assume? It seems to me, Mr. President——

Mr. NEWLANDS. Mr. President——

Mr. NORRIS. In just a moment I will yield to the Senator.

If we are going to compensate one class of individuals, then we should compensate them all. The only objection which I have heard is that the amount may be large, cover a vast territory, and a large number of persons, which is true. That brings us at once to the consideration as to whether or not we ought to strike out the proviso which is now in the bill. It ought either to go out or we ought to include everybody who is in the class who are injured.

Mr. STERLING. Mr. President——

Mr. NORRIS. I yield to the Senator from Nevada, who first rose.

Mr. NEWLANDS. Mr. President, I should like to ask the Senator whether he proposes to confine his amendment entirely to shippers whose shipments have actually been accepted before the order is made and whose shipments are on the railway tracks, or whether he would apply it to those simply contemplating shipments?

Mr. NORRIS. It would apply, as I understand, to anyone who could prove an injury, just as it applies now to the railroad companies. I make no difference between the individual

shipper and the carrier. Shippers are included in the same language and in the same sentence.

Mr. NEWLANDS. Does not the Senator think, if his amendment should be adopted and should apply not only to shipments actually made and on the tracks when the priority order is made, but also to shipments contemplated, that there would be an avalanche of claims, many of them imaginative and exaggerated, that would simply overwhelm the Treasury of the United States——

Mr. NORRIS. Let me answer that.

Mr. NEWLANDS. And does not the Senator think, if his amendment is worthy of consideration, that it should be applied only to shipments that are on the tracks?

Mr. NORRIS. Mr. President, I think the Senator's question is a very proper one. To begin with, the amendment I have offered does enlarge the scope of the bill very greatly, and there might be an avalanche of claims; but that is no reason why we should not pay just and honest claims, if we are going to pay any claims on account of damages occasioned by a priority order. I could apply the same suggestion to the railroad companies, which the Senator has carefully protected in his bill. They may advance a multitude of claims likewise, for the bill covers all the railroad companies of the United States. The Senator says there might be many fictitious claims filed by individuals. That is true. So there might be many fictitious claims filed by the railroads, but that has not been regarded as a sufficient reason why the provision for compensation to the railroads should be kept out of the bill.

Mr. REED. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. REED. I call the Senator's attention to the fact that the language of the bill is substantially that the railroads can recover for disarrangement of traffic.

Mr. NORRIS. Yes, sir.

Mr. REED. That is substantially the language. Now, if we assume that a farmer is shipping a trainload of cattle and they are thrown upon a sidetrack, in order to make way for some through freights that are being sent under the terms of this bill, and the cattle are there held for a week or any other period and shrink largely, that damage can be accurately ascertained, because the weight of the cattle, the amount of the shrinkage, and the market value can all be ascertained; the facts are susceptible of estimate and ascertainment.

Mr. NORRIS. Much more accurately than the damages the railroad company may suffer in the same case.

Mr. REED. But suppose that the railroad company now comes in and says, "Our traffic was disarranged by reason of this order; we sidetracked not only the trainload of cattle, but we stopped all of our trains on that day," is it not quite likely that that kind of damage which the railroad would suffer would be so indefinite that almost any kind of imposition might be put upon the Government, and is it not a much more dangerous class of claims against the Government than the claim of the individual shipper?

Mr. NORRIS. I think it is much more dangerous. I think that is a good illustration of it; but I should like to carry the same illustration a little further. Remember that this bill, as it is now drawn, would give to the farmer, of whom the Senator from Missouri speaks, shipping his cattle no damage whatever. It takes away his right to recover from the railroad; he will have no right to recover from the Government; but the order of the President could take the same cars in which his cattle were loaded in the middle of their journey and the cattle could be put out of the cars on the street, or on the prairie, or in the desert if the Government demanded and needed the cars. As a result, the shipper might suffer a complete loss; it might mean bankruptcy to him and the loss of a lifetime of hard work; but there is no remedy provided in that case, because it is said, "If we let him in, we will let in some other fellows who do not have good claims, and there would be lots of them." Yet it is proposed to let in the railroad companies with any kind of an indefinite claim.

If we are going to base this legislation on the proposition of patriotism, that when the order of the President comes it is the duty of everybody to suffer his loss, however great it may be, then we ought to make no exception, and particularly no exception on behalf of the only ones that do get something out of the President's order. The bill provides that when the President takes cars or the traffic is disarranged by his order, and the President uses the cars for governmental purposes, he has to pay for them. He pays the railroad company for whatever use he puts the cars to. It seems to me the argument, the reason, and the logic are all in favor of giving the same right to a claim for damages to any shipper who may be injured.

My amendment would enlarge the bill greatly; I concede that; but there is no objection based on honesty or reason or logic against that enlargement, except that it is large and the bill is already oversize when we consider that it includes every railroad in the United States.

Mr. President, if this bill were amended as I have suggested in the amendment I have offered, the President would hesitate longer to issue an order than he would under the bill in its present form. It is a dangerous power. I presume, however, we must do something of this kind as a war measure; but it is going a long way in a dangerous direction. At least, we ought not to stop when we come to an honest, innocent individual who has been injured or ruined and say, "You must have patriotism enough to bear your damages," while the railroad company, which has only suffered a partial loss, and perhaps no loss, and perhaps made a gain, will be compensated for any loss which it may suffer. The individual, however, who may have his all tied up in the one transaction, has no remedy. Mr. President, it is too great a sacrifice to order any man to suffer. If the country gets into such a condition that such an emergent step is necessary to be taken, then we ought to be fair enough to pay to the men, no matter how many there may be, the damages which the order protecting us all has made necessary.

Mr. KNOX. Mr. President, I think that in many respects this is one of the most important bills which Congress will be called upon to act in connection with the war. As I understand the theory of the bill—and I shall first refer to the bill, and then afterwards to the amendment—it is that whenever "the public security and defense" require—and I quote the language of the bill, and I may say it makes no provision for any such authority under any other circumstances—the President, who is charged by the Constitution as Commander in Chief of the Army and Navy, and therefore having the supreme direction of the resources of the Government, in order to secure the public defense and insure the public safety, may do in respect to the transportation lines of the country the thing which the public security and defense may demand in the way of transportation of goods over the public highways.

Mr. President, it must go without challenge, because we have been legislating upon that theory here for the past six weeks, that in time of war, as well as in time of peace, when the public exigencies so demand, private property may be taken for public use, and not only may private property be taken for public use in toto, that is the full possession of private property and its administration taken for public use, but the taking may be to the extent only that the use demands, and that extent may only be partial. So my first proposition is, that without doubt, if the exigencies of war demanded, the President of the United States could take the absolute and undisputed possession of the railways of the United States and use them for the purposes of the Government; but evidently, Mr. President, in the judgment of those responsible for this bill no such situation has yet arisen.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield to the Senator from Missouri?

Mr. KNOX. I do.

Mr. REED. I do not want to interrupt the Senator, but I would like to get his view a little more fully. He states that the President could take the railroads over. Could he legally take them without due process of law?

Mr. KNOX. Absolutely not. I did not make that statement, because I assumed that it was understood, at least by the lawyers of the Senate, that he would have to take them over under the Constitution, which provides that compensation shall be provided.

Mr. HARDWICK. Mr. President, will the Senator permit me there?

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield to the Senator from Georgia?

Mr. KNOX. Yes.

Mr. HARDWICK. The Senator means, of course, under the authority of legislation?

Mr. KNOX. Of course, under the authority of legislation. I referred to the fact that we had been legislating upon that theory since we began the legislation in respect to the war.

I was about to say that those who are responsible for this bill evidently regarded that the exigency did not exist at present requiring the Government to take over the railroads under the Constitution and under legislation, and with provision for compensation, but that a partial exclusive use was an immediate necessity, or an immediate possibility, which is quite the same thing. So that, instead of taking over the railroads, this bill provides that where certain shipments of goods are, in the judgment of the Commander in Chief of the Army and the Navy,

necessary for the public security and defense all other traffic upon the railways shall give way to that public necessity. In that respect I regard this measure as not only wise and prudent but moderate—moderate in the sense that it imposes upon the Government a less liability to the railroad companies than would be imposed if the entire property were taken over and managed under governmental direction.

That, I think, is the correct theory of this bill; and adverting to the language used by the senior Senator from Georgia [Mr. SMITH] on Friday last, which I quote from the RECORD, I think, sir, that he has made one of the strongest arguments in support of the bill that has been advanced upon this floor. I read from page 3350 of the RECORD of the proceedings of the Senate of Friday last. The senior Senator from Georgia there used this language:

> I would not hesitate a moment to say that discrimination should be given in favor of moving war supplies—not a moment. If that were the standard, and it were limited to that, the bill would have my support.

Mr. President, I can not imagine how one can read this bill and fail to observe that that is the standard; for is it not perfectly evident that shipments of materials which are necessary for the public security and defense are war supplies? In time of war you can not assert that any material or any supply that is necessary for the public security and defense, which is the function of war, is not a war supply, and the President of the United States has not one iota of authority under the provisions of this bill to order a discrimination in respect to any class of freight or any shipment of any class of freight which does not measure up to the provision that it must be necessary for the public security and the public defense.

Mr. HARDWICK. Mr. President, would it bother the Senator if I should interrupt him on that precise point?

Mr. KNOX. Certainly not.

Mr. HARDWICK. I happen to have had some conference with Mr. Willard, a gentleman who is largely advised about this measure, and I happen to know that Mr. Willard's idea is entirely different from the Senator's present position.

Mr. Willard insisted to me, as I understood his insistence, that this bill meant a great deal more than the Senator from Pennsylvania maintains it can only mean; that it would be construed to mean, or operate to mean, something like this: That if two shipments were tendered to any one of the railroads, both of which were entirely disconnected with war supplies or with materials to be transformed into war supplies or with the movement of troops in any way, were utterly disconnected in any way with anything except the general industrial condition of the country, still the power of control to give priority between shipments of that class would inhere in the Government under this bill. An illustration that he gave me was that, for instance, if two shipments, one of pianolas and one of organs—and I can not conceive of either one of them having much to do with the war—were offered to a railroad, under this bill the Government would have and ought to have the right to say to the railroad which one of those shipments should receive priority.

Mr. KNOX. I have not the slightest hesitation in stating that there is not within the four corners of this bill the slightest authority for such construction.

Mr. HARDWICK. If the Senator will let me interrupt him for one more sentence, I just want to let him understand what is being contended for this bill in certain quarters. The Senator must realize, however, that the words "public defense and security" are pretty broad and elastic words, and that a great many people contend and are contending everywhere, in this Capitol and outside of it, that it is necessary to control all industry, all production, and all business in order, as they express it, to mass the entire Nation for war—to mobilize all the resources, as they put it, for war.

Mr. KNOX. Yes, Mr. President, the words are elastic, and necessarily so. War is a status whose breadth the human imagination can scarcely measure, and filled with infinite possibilities; and the discretion and the authority and the power to meet those infinite possibilities must be lodged in the Commander in Chief of the Army and Navy, else we fight to no purpose.

Mr. HARDWICK. Ah, yes; but, Mr. President——

Mr. KNOX. Mr. President, my remarks on this occasion will take but a very few moments more, and I should like to conclude that which I desire to say.

Mr. HARDWICK. I beg the Senator's pardon. I will answer him in my own time.

The PRESIDING OFFICER. The Senator declines to yield further.

Mr. NEWLANDS. Mr. President, I wish to ask the Senator whether he will permit me to correct here what I regard as a misapprehension of the Senator from Georgia with reference to Mr. Willard? Mr. Willard used to me the illustration regarding pianolas and organs, but he distinguished between the pianola and the organ on the one side as mere matters of luxury and the coal or iron on the other side as being absolutely essential to the industries that are creating the munitions of war.

Mr. HARDWICK. He used the illustration to me, if the Senator will pardon me, both ways. He said to me that the power was absolute to give priority as between them during the war.

Mr. KNOX. Mr. President, I have no doubt that Mr. Willard's expressions upon any subject are entitled to respect; but I am discussing this bill, and I am discussing it as I read it, and I am discussing it as I know the intelligence of the Senate will read it and interpret it, and that is in accordance with its language and its terms.

Mr. President, something has been said about the lodgment of power in the President of the United States. The senior Senator from Georgia [Mr. SMITH] has gone so far as to state that if he had his own way the Constitution of the United States would be so amended as that the Commander in Chief of the Army and Navy should no longer be the President of the United States, but that war should be directed in accordance with the instructions and the decisions of a board to be constituted for that purpose. Why, Mr. President, if there ever was anything that demands the single arm it is the prosecution of a war. Divided counsels in war are always fatal, and no one saw that more clearly than the fathers of the Constitution and those who expounded it contemporaneously.

I quote from Alexander Hamilton, who said that—

> The President of the United States is to be "Commander in Chief of the Army and Navy of the United States and of the militia of the several States when called into the actual service of the United States." The propriety of this provision is so evident in itself, and it is at the same time so consonant to the precedents of the State constitutions in general, that little need be said to explain or enforce it. Even those of them which have in other respects coupled the chief magistrate with a council have, for the most part, concentrated the military authority in him alone. Of all the cares or concerns of government the direction of war most peculiarly demands those qualities which distinguish the exercise of power by a single hand. The direction of war implies the direction of the common strength, and the power of directing and employing the common strength forms a usual and essential part in the definition of the executive authority.

So that, Mr. President, while of course it will be essential in respect to the administration of this power, as it is essential to the administration of all power, that the President shall act through those whom he may select and vest with authority and responsibility under his executive authority, yet if you make that objection to this measure, you make the same objection to every measure vesting in the President the power of executing the law.

So much for the bill, Mr. President. The bill, I repeat, proceeds upon the theory that we are taking in part the railways of the country for the public service. We are taking them in part in the sense that we are vesting in the President the authority to divert the ordinary traffic of the road in order that certain shipments essential for the public security and defense may pass expeditiously over the rails. In doing that and in providing compensation for that we are providing compensation for taking in a lesser degree than we would have authority to vest the President to take; and in that respect the bill is in entire consonance with the provision of the Constitution of the United States which provides that private property shall not be taken for public use without just compensation.

Now let me turn to the theory of the amendment, Mr. President.

The amendment does not deal with the relation between the railroads, which owns the highways, and the Government, which needs the highways. The amendment brings in the alleged claims or equities of a third party. It has no proper relation to the determination of the question as to how far we should go in vesting in the President the right to take the railroads, or take the use of the railroads, and the compensation that should be allowed for that use. It seeks to bring in the idea that one of the incidents or one of the effects of that taking is to take from the citizens of the country, who have shipments to make in the ordinary course of their business over the railroads, the privilege of making those shipments. Of course it does to a greater or less degree. It goes without the necessity of argument that if the Government requires the use of the rails in respect to a new class of shipments, and in respect to a class of shipments that the public security and defense demands shall be instantly made, the rails can not be occupied by two classes of traffic at the same time; and the preferential class of traffic which the President may designate as necessary for the public security and defense will, as I say, necessarily exclude the ordinary traffic of commerce, at least temporarily.

But, Mr. President, where was it ever heard of in any government that the inconveniences attendant upon war, even though resulting in pecuniary damage, were ever made the basis of a claim against the Government that was fighting that war for the people who were temporarily sustaining those inconveniences? Upon what higher ground does a shipment of cattle or of grain or of pianos or organs or pianolas, that have been mentioned, stand than the human factor in war? The Government of the United States reaches out and takes your son out of your business, upon whom you are depending for its success, takes your manager by force of the draft, aye, may take your entire organization. Has anyone ever heard of that being made a basis of a claim for damage against the Government?

It is true that under the Constitution of the United States if the Government takes your mule, which is worth $30, it must compensate you for the mule, because the Constitution so provides; but there is not in this land, and never was in any land, any provision of law that if it takes your son or your manager or your employees, even though the result of that taking might be your certain bankruptcy, it was the basis of a pecuniary claim against the Government.

Whose Government is this war being waged to maintain but the Government of the farmer and the manufacturer and the cattle dealer, and those who contribute to the ordinary merchandise of the country, and to its commerce?

Why, Mr. President, let us test the theory that lies at the bottom of this amendment by this illustraion: Suppose—and this is entirely a supposable case, and it is a case that may loom upon the horizon any day—that the exigencies of war demanded that we should at once transport several hundred thousand troops to Europe. Every vessel upon the Atlantic coast could be commandeered necessarily to perform that service, and every exporter upon the Atlantic coast would, as the result of the commandeering of those vessels, have to suspend his export business. Is it possible that we are to lodge a liability against the Government for that inconvenience?

That which to me seems to be the absurdity of this proposition could be illustrated by a thousand instances, but I know of no one that conveys to the mind the utter impossibility of a Government meeting that class of damages more clearly than the one I have given.

War is a dreadful necessity. War is a thing not to be lightly entered into. War is a condition that calls upon all for sacrifice—upon the father and the mother freely to give their sons; upon the farmer that if the highways of commerce are necessary for the common good and the preservation of our liberties and our land, he and his operations shall suffer temporary suspension; it falls upon us all in every way.

Mr. President, if this principle be incorporated in the bill, we will be making a precedent that will not only be novel in the history of civilized governments but will lead to the bankruptcy of our Nation.

Mr. POMERENE obtained the floor.

Mr. REED. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from Ohio yield for that purpose?

Mr. POMERENE. I yield.

The PRESIDING OFFICER. The Senator from Missouri suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Hollis	McKellar	Shafroth
Borah	Husting	McNary	Sheppard
Broussard	James	Martin	Smith, Ga.
Calder	Johnson, Cal.	Nelson	Smoot
Chamberlain	Jones, N. Mex.	New	Sterling
Cummins	Jones, Wash.	Newlands	Stone
Dillingham	Kellogg	Norris	Thomas
Fernald	Kendrick	Page	Thompson
France	Kenyon	Penrose	Trammell
Frelinghuysen	King	Phelan	Underwood
Gallinger	Kirby	Pittman	Vardaman
Gerry	Knox	Pomerene	Warren
Gore	La Follette	Reed	Wolcott
Hardwick	McCumber	Robinson	

Mr. KING. I desire to announce the unavoidable absence of the junior Senator from Illinois [Mr. LEWIS] on account of official business.

Mr. McKELLAR. I wish to announce the unavoidable absence of the senior Senator from Tennessee [Mr. SHIELDS].

The VICE PRESIDENT. Fifty-five Senators have answered to the roll call. There is a quorum present.

Mr. POMERENE. Mr. President, I desire to express myself very briefly with reference to this measure.

If an attempt were made to compensate those shippers whose merchandise was in course of transportation at the time an order for preferential shipment is made by the President, I believe I would support it. I can realize how considerable damage might accrue to a shipper who had made shipments, not having any reason to anticipate that his goods would be delayed en route.

I do not think this bill is going to cause the damage, generally speaking, that Senators seem to anticipate. This bill does not give the President at all times the right to declare preference or priority in shipments, but he has that power only when he comes to the conclusion that it is necessary to the public security and defense.

The Senator from Nebraska seeks to amend the bill by creating a claim for damages in behalf of any "carrier, person, firm, or corporation" that may be injured by reason of any declaration of preference or priority. Let us for a moment examine this and see to what extent the proposed amendment would go. If a producer in the ordinary course of business had in his employ 100 people and the President should find that the public security required him to make an order giving priority to the shipment of war supplies which would interfere with the shipments of this producer to the extent of 50 per cent, would a claim lie against the Government for that amount? If his goods were not manufactured at the time the order went into effect, would he still be justified in continuing his manufacture and let his goods remain in the warehouse, depending on the right to recover against the Government because it saw fit to declare preferential shipments in order that it might prosecute the war?

There is a vast deal of difference between the shipper to whom the Senator from Nebraska refers and the railroad company. Under this bill the Government simply declares that certain shipments shall be preferential. To that extent it controls the traffic of the railroads. To that extent, either directly or by proxy, it is in possession of the railroad and is operating it. But the President does not take hold of the manufacturing plant or the mine or the storehouse or the business establishment of the shipper. The point made by the Senator from Nebraska would be very effective and very illustrative if the President were to take possession of his manufacturing plant, or his mine, or his business establishment.

Mr. REED. Mr. President, I do not want to interrupt the Senator if it is at all disagreeable to him. He is discussing a very interesting point. He states that the Government does not take possession of the business of the manufacturer, but does take possession of the railroad in effect. I desire to suggest to him in the interest of what I think is fair a statement that he overstates one proposition and understates the other. The Government does not take possession of the railroads. The Government allows the railroads to remain in the hands of the railway officials, but directs them to use the property of the railway so as to prefer one shipment over another.

Now, what does the Government by that action do to the shipper? It is true it does not take possession of the factory of the shipper, but if it holds a train carrying the goods of the shipper in transit, has it not done to the shipper an act which is equally as much a seizure of his property as the act of ordering the railroad company to prefer one shipment over another constitutes a seizure of the road? Are not the two cases very close together?

Mr. POMERENE. Not at all, in my judgment.

Mr. REED. Very well.

Mr. POMERENE. I did not mean to be understood as speaking literally when I said we took possession of the roads. We are taking control of them pro tanto when we direct that certain shipments shall be made.

Mr. REED. And we control all the trains of cars containing the shipment of goods pro tanto when you order them to be sidetracked.

Mr. POMERENE. The Senator does not have in mind the statement that I made in opening my discussion. I said if this amendment were limited to shipments that were in the course of transportation at the time the order was made, I would be constrained to favor it; but when it comes to new shipments that have not yet started on their course, when it comes to shipments that may be still in the mine, or that may not have even been manufactured, then certainly an entirely different rule applies.

I realize that we must all be subjected to more or less inconvenience when we are prosecuting a great war, but I have too much confidence in the patriotism of the American people to believe that they want this Government to be harassed on account of every inconvenience that may be brought upon it because their shipments have been interfered with more or less by reason of a great public necessity.

If I may address myself further to the amendment which has been offered by the Senator from Nebraska, let us see to what

extent it would lead. His language is that if any person, firm, or corporation shall sustain injury or damage. Suppose we have a merchant who is serving a given community and he is shipping eggs and farm produce from his warehouses weekly. He finds he is not able to make these shipments, and because of that reason he refuses to buy from his neighbors who have been his customers, or pays them a less price for their products because he does not know whether he can make regular shipments or not. Would an action for damages lie in behalf of the farmer who is raising the produce? I am quite sure that the Senator would not go that far.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Will the Senator from Ohio yield to the Senator from Nebraska?

Mr. POMERENE. I yield to the Senator.

Mr. NORRIS. If the Senator is asking a question and expecting an answer I will say that, in my judgment, in the case the Senator puts there would be no claim for damages.

Mr. POMERENE. I am very glad to hear the Senator construe his own language, because I am afraid it might be susceptible of the construction which I have attempted to place upon it.

Mr. NORRIS. I, of course, can not control the Senator's construction, but I do not believe that by any possible construction of the language he could go back as far as he has gone and make a case for damages.

Mr. POMERENE. Does the Senator believe that this shipper should have a claim for damages because he could not ship goods during the ensuing month which he might buy?

Mr. NORRIS. If the Senator wants an answer, of course, he can get on ground where men might differ and the damages would be remote. As a question of law, with which the Senator is very familiar, of course, if the damages were too remote they could not be collected. They could not be collected against the railroad company in that case if no order were made by the President controlling the railroad company.

Mr. POMERENE. I recognize the difference between the rule of damages and remote damages, but this is an entirely new proposition, and the Senator is magnanimous enough to take care of people generally, no matter what may be the result to the Government.

I made some search of the legislation covering this subject and I have not as yet been able to find any statute which would permit the recovery of damages by shippers who might be incidentally injured by the Government taking possession of railroads or directing their operation. But we have a precedent in the legislation of Congress during the Civil War, and I want to call the attention of the Senate to it. I refer to the act approved January 31, 1862, entitled "An act to authorize the President of the United States in certain cases to take possession of railroads and telegraph lines, and for other purposes." The first section, in substance, provides—I will not read the entire text——

Mr. REED. Where is the statute found?

Mr. POMERENE. In the twelfth volume of United States Statutes at Large, 334.

In substance it recites—

> That the President of the United States, when, in his judgment, the public safety may require it, is authorized to take possession of any or all the telegraph lines in the United States, their offices and appurtenances; to take possession of any or all the railroad lines in the United States, their rolling stock, their offices, shops, buildings, and all their appendages and appurtenances; to prescribe rules and regulations for the holding, using, and maintaining of the aforesaid telegraph and railroad lines; and to extend, repair, and complete the same, in the manner most conducive to the safety and interest of the Government.

And to place them under military control when the public safety requires it. The third section of the act provides:

> That three commissioners shall be appointed by the President of the United States, by and with the advice and consent of the Senate, to assess and determine the damages suffered, or the compensation to which any railroad or telegraph company may be entitled by reason of the railroad or telegraph line being seized and used under the authority conferred by this act, and their award shall be submitted to Congress for their action.

During the time of the Civil War when it became necessary at certain times to entirely suspend the traffic upon certain roads Congress then did not find it necessary to take care of the shippers who might, directly or indirectly, be injured by reason thereof. The injury which they sustained was the injury which the country at large sustained because of the war.

Mr. KING. Damnum absque injuria.

Mr. POMERENE. Truly, as the Senator from Utah says, it was damnum absque injuria. I do not know that the shippers at that time were insisting upon being compensated in damages. I believe there is such a spirit of patriotism in this country today that the shippers, with rare exceptions, are not going to ask that they be compensated by the Government for any of the damages to which their business may be incidentally subjected. They are interested in having the movement of their freight interfered with as little as possible. And certainly we want to protect them in that behalf as much as possible.

Mr. HARDWICK. Will the Senator yield?

Mr. POMERENE. I yield to the Senator.

Mr. HARDWICK. I quite agree with the Senator—damnum absque injuria; but why does not the same principle apply also to railroads? We are going to compensate them for all they do for the Government? Why is it not exactly correct that they should both stand right together and neither one of them get a cent for any incidental loss that occurs?

Mr. POMERENE. No; Mr. President, the situation is entirely different in the two cases. In the one instance, we take the property of the railroad.

Mr. HARDWICK. But we pay them for its use, if the Senator will pardon me.

Mr. POMERENE. Just one moment. We take possession of the property of the railroads. We are directly interfering with their business. They are doing a carrying business, and we are interfering directly with their carrying of property from one point to another. It is not so when it comes to the manufacturer. We are only indirectly interfering with him. It may be that he has some other route by which he can send his shipments if he desires; but that is not true of the railroad. It may be that it would be for the good of the Government to say that on a given road only one kind of traffic shall be carried. It may be coal, to use an illustration, and the cars all going in one direction loaded to their destination. It may be that the Government will find it necessary to say that all the empties shall go to the original shipping point over another route. If so, is not that road being directly damaged because its traffic has been directly interfered with?

I should regret exceedingly to have any damage occur to anyone in this connection, but it seems to me that we are courting a lot of trouble, a lot of expense, when we attempt to say that every shipper shall be compensated for his damage, no matter how great or small and no matter whether the damage be direct or indirect.

Mr. STERLING. Will the Senator yield before he concludes?

Mr. POMERENE. I yield to the Senator.

Mr. STERLING. I note the Senator's criticism of the amendment offered by the Senator from Nebraska. I think myself that the amendment is too broad in the fact that it allows the prospective shipper as well as the actual shipper to recover damages. But suppose the shipment has begun or a contract of shipment has been entered into with the railroad company before this order or decision giving priority or preference is made. Does not the Senator think there is a contract right which is in fact property in itself and for which the shipper should be compensated?

Mr. POMERENE. The Senator evidently was not in the Chamber when I addressed myself to that very question. I stated that if an amendment were offered which would limit the claim for damages to shipments that were in the course of transportation at the time the order was made by the President, I would be disposed to favor it.

Mr. REED. Mr. President, the more one considers the proposition involved in the amendment of the Senator from Nebraska [Mr. NORRIS], the more one considers the text of the bill which he seeks to amend, the more we are driven, it seems to me, by irresistible logic and the equities involved to the position either that all shippers and shipping companies shall be compensated for the damages actually inflicted by reason of a governmental interference or else we are driven to the other view that neither the shipper nor the shipping company is to be compensated for damages.

I speak of damages in this sense in contradistinction to the term "service," a point I shall try to make clearer by this statement. If the Government of the United States were to demand from the Pennsylvania Railroad that it should send a special train from New York to the city of Washington, sidetracking all its business and rushing that train through, it would be demanding a special service from that company, one which it would be obliged to pay the railroad company for performing, and the railroad company would have no difficulty in recovering, because there are no schedules for special trains of that kind, it is bound down by no rate sheet or regulation, so that when the Government comes to demand a special service it, of course, will pay for that special service. In what I have to say hereafter I eliminate that element from the term damages as I propose to employ it.

Mr. NEWLANDS rose.

Mr. REED. I will thank the Senator if he will withhold his question for a moment until I conclude this statement. The

bill as it is drawn proposes to compensate the railroad company for any damage which it may have suffered by reason of giving a preference or priority of transportation or by reason of disarrangement of its traffic caused by giving such preference or priority. Plainly the intendment of the bill is not only to pay the railroad company for hauling the special train, but to pay the railroad company for any damage which may occur to it through some interference with its traffic, direct or indirect, caused by the hauling of that train.

So, to follow my illustration of the train running from New York to the city of Washington, specially ordered by the Government to be sent through, regardless of all other traffic, the railroad company would charge for sending that train through, and then the railroad company would present a claim in which it would say that by reason of sending that train through it was obliged to sidetrack perhaps two or three hundred other trains, that it lost the services of its engineers and its firemen and the full use of its track and its equipment, and thereby it was damaged and injured, for which it would ask just compensation.

Mr. President, that does not present a claim of the character discussed by the very distinguished Senator from Pennsylvania, who presents a claim where the Government has not taken the property of the railroad company, has not demanded a special service of the company which it has not paid for, but a damage which was incidental to the Government's demand for a special train, and that damage consisted in the fact that the railroad company was obliged to sidetrack certain trains instead of sending them on to their destination.

Now, how does that latter claim differ from the claim of the shipper? One of these trains that the railroad company has sidetracked, and for the sidetracking of which it asks damages, is loaded with my cattle, and the Government has actually in effect commandeered my train that I had chartered and that now includes my cattle and has put them upon a sidetrack and physically interfered with the sending of those cattle to their destination and physically has laid its hand upon my property.

If the railroad company can get damage because the train was put upon a sidetrack under this order of the Government, why should I not get damages because my train that I hired from that same railroad company was put on a sidetrack? I will defy any logician this side of the outer walls of the Senate to draw any real distinction between those two cases.

Mr. HOLLIS. Mr. President, does the Senator want a reply to that immediately?

Mr. REED. Yes; if the Senator thinks he fits my specification, I should be glad to have a reply.

Mr. HOLLIS. I do not claim to be a logician, but I have practiced law somewhat, and I have had to deal with matters of this sort. The distinction is this: When you interfere with a man in his public right he has no ground for damages. When you interfere with him in his private right he has a ground for damages. To illustrate: If a community should discontinue a highway or block it up for the purpose of repair, it would then interfere with the public rights of anyone who desired to use it at that time. For such an interference a man, as a member of the public, can not recover damages. But if a community in building a highway should cut off a man's private way of access to his piece of land, then the community would interfere with a man's private right, and the man could recover damages for cutting off his access to his private land.

Now, applying that to the case in hand, the man who ships cattle does not hire a train; he merely exercises his public right to ship under the ordinary rules and regulations by paying the ordinary tariff. That is his public right to ship. The railroad is not dealing with the Government in its public right but in its individual right as the owner of the property. So when the Government interferes with the railroad's direction and use of its private property the Government is interfering with the railroad in its private right of compensation and must compensate the road. When the Government interferes with the shipper who is trying to ship his cattle it is interfering with the shipper in his public right and the shipper has no right to recover. That is the distinction, as I understand it.

Mr. REED. Mr. President, I ought not to have employed just the language I did when the Senator rose, because the Senator is a logician and a very able lawyer, and I say that in all sincerity; but the Senator has not drawn a logical distinction. He has told us of a harsh, brutal old rule of law that has deprived many a man of his property, many a man of his just rights, and has outraged the spirit of equity thousands of times. I am talking about this question from the standpoint of right and wrong. I say that the Government can take possession of these railroads by the strong arm and can hold them without ever paying anything for them, if it wants to do it, regardless of law and Constitution and right. The power to do a thing does not mean that the exercise of that power shall be a just exercise. So I say, while it is true that the Government of the United States can pass this law and can leave the shipper's cars on the sidetrack and let him suffer, as a matter of principle there is no difference between the just right of that shipper, the equitable right of that shipper, to recover for putting his train containing his cars on a sidetrack and the right of the railroad company to recover because its train that the shipper had hired was put upon the sidetrack.

Mr. President, all this is by way of preliminary to what I think is inevitably the correct solution of the question so far as it is presented by this amendment. There are many other questions involved in the bill, but I want to confine my remarks to this question. It is this: A railroad company, when a train is ordered to be sent through, or when goods are ordered to be sent through, so that other traffic must be set aside will, in my opinion, be entitled to a special rate for that service, and will get that special rate, and they ought to be entitled to that special rate—a fair and a just rate. They ought not, in my opinion, to be entitled to anything except that rate. They should not be given any resultant damages; any damages for interfering with their traffic; anything except that which is covered by the rate itself, unless we extend the full right of recovery to all shippers who have their goods in transit, and for this reason——

Mr. CUMMINS. Mr. President——

Mr. REED. If the Senator will pardon me—and then I will gladly yield—for this reason: War, as has been justly said, visits its calamities upon a people. When you go beyond the mere direct compensation for property which you may take you have entered that vast field of consequential damages, the boundaries of which no man can draw. For instance, you say to the railroad company: "Your traffic was disarranged as to a certain train; therefore you can recover all the consequential damages." You say to the shipper whose train has been sidetracked, "You can recover your damages because your train was sidetracked." Then logic would lead you to say to the builder who had goods ordered and who had to stop his building, "You can recover." Yet you have now entered a field which includes practically every human being in the country, for it must be true that you can not disarrange the business of the land by war, by interference with commerce, unless it affects everybody to some extent. It is getting to be my opinion that the only thing to do is to pay the railroad company for the particular special service that it performs, and to allow no damages to anyone, but permitting the damage which will result from the interference with traffic to be regarded as one of those calamities incident to war; and that is so widely distributed that you can not possibly gather up and settle the various claims and equities which may exist.

I now yield to the Senator from Iowa.

Mr. CUMMINS. Mr. President, I do not know whether or not I ought to interrupt the Senator from Missouri, because, if I interrupt, it can not be through a mere question. I fear that the Senator from Missouri has not yet comprehended the view of those members of the committee who are responsible for this bill. If I may do it without seriously interfering with the argument of the Senator from Missouri, I should like to indicate to him how, at least, I feel about it, so that he might answer as he goes on.

Mr. REED. The Senator from Iowa has my permission to do so.

Mr. CUMMINS. The Senator from Missouri, of course, knows that for the purpose of merely giving priority to Government shipments we do not need any legislation of this kind. We have had legislation of this kind for many years. There is in the interstate-commerce law this provision, which is found in the latter part of section 6:

> That in time of war or threatened war preference and precedence shall, upon the demand of the President of the United States, be given over all other traffic for the transportation of troops and material of war, and carriers shall adopt every means within their control to facilitate and expedite the military traffic. And in time of peace shipments consigned to agents of the United States for its use shall be delivered by the carriers as promptly as possible and without regard to any embargo that may have been declared, and no such embargo shall apply to shipments so consigned.

If the only thing desired at the present time were to give preference to shipments made by the United States, either of troops or material of war, the authority in the law as it has existed for years is ample.

Mr. HARDWICK. Right there, if it will not interrupt the Senator, I should like to ask him a question.

Mr. CUMMINS. I feel that I am trespassing on the time of the Senator from Missouri. I should like to get this down to a real

issue; but I have no objection to listening to the Senator from Georgia.

Mr. REED. I have no objection to the interruption.

Mr. HARDWICK. In the opinion of the Senator from Iowa, does the provision as now contained in the law include this?—

To the prompt movement of the military and naval forces of the United States, and all supplies therefor, and all material necessary to be used in the manufacture of arms, munitions, and equipment therefor.

Mr. CUMMINS. I think that is not essentially different from the law as it now is.

Mr. HARDWICK. I should like to have the Senator's opinion as to that.

Mr. CUMMINS. I should not like to undertake an accurate definition of the words "war material."

Mr. HARDWICK. That is the point.

Mr. CUMMINS. Those words are used in the statute as it is now. Whether they are broader or narrower than the words used by the Senator in his proposed amendment, I would not like to say without reflection; but I beg the Senator from Missouri to remember that this law seems to be necessary in order to give the President authority to declare a priority or preference in shipments made by private individuals, not by the Government alone. It is that feature in the proposed statute which gives rise to all the difficulty that is foreseen by the Senator from Missouri.

One step further. We have a statute already in force which gives to the President in time of war the right—

To take possession and assume control of any system or systems of transportation, or any part thereof, and to utilize the same, to the exclusion as far as may be necessary of all other traffic thereon, for the transfer or transportation of troops, war material, and equipment, or for such other purposes connected with the emergency as may be needful or desirable.

Mr. REED. Will the Senator from Iowa give me the section which he has just read?

Mr. CUMMINS. The statute which I have just read is found in the "act making appropriations for the support of the Army for the fiscal year ending June 30, 1917, and for other purposes," approved August 29, 1916, and is on page 29 of the pamphlet copy of the law.

Mr. REED. The law was passed only recently?

Mr. CUMMINS. It was passed last year.

Mr. REED. Yes; it was passed in view of the war which now exists.

Mr. CUMMINS. Undoubtedly.

Mr. REED. As to the other section which the Senator read a few moments ago, which he said had been on the statute books for many years, and which he read from the interstate commerce act, is the Senator not in error? Is that not an amendment to that act which was adopted on the 2d day of August, 1916?

Mr. CUMMINS. I think not.

Mr. REED. It is so marked in the margin, and I never remember having seen it in the original interstate commerce act.

Mr. CUMMINS. I will not say definitely as to that.

Mr. REED. I call the Senator's attention—I have sent for the interstate commerce act—if he will pardon me, to the marginal note.

Mr. CUMMINS. I know the latter part of the act was amended in 1916, but my recollection is that the preference part of it has been the law for a long time.

Mr. REED. Perhaps the Senator from Iowa is right. I do not know.

Mr. CUMMINS. But that would make no difference one way or the other with what I am suggesting, because both provisions are now parts of the law.

The committee was attempting here to give the President authority to prescribe a preference or priority in shipments other than those made by the United States, and, if I may suggest it to the Senator from Missouri, the reasons for giving the railway companies or the carriers damages for the injury which they may suffer by reason of the order of preference or priority does not grow out of any tenderness or favor to the railway companies, but it grows out of a disinclination to allow the railway companies to recoup their losses by increased rates to be paid by the shippers instead of by the general public.

If the income of a railway company or a carrier is not sufficient, it is made adequate by an increase of rates, and the increase must be borne by those who employ the service of the carrier. We believed it to be vastly more equitable that the increase which might be made necessary by the interference of the Government for purposes of war should be borne, not by those who happened thereafter to employ the railway company in transportation, but that it should be borne by all the people of the United States. It is absolutely necessary that the railway companies shall continue to be efficient avenues of transportation. We do not need men more than we need adequate facilities for transporting the products of the country from one part of it to another; and if the revenues of the railroads are so depleted by the war that the lines can no longer answer their functions, we will suffer a disaster only second to the disaster which would follow the inadequacy of our troops. Now, somebody must pay that money. Who shall pay it? Shall it be the shippers of freight, or shall it be the people generally?

I thought I ought to say this much, because the thought I have just expressed at least furnishes the basis for my belief that we must maintain in some fashion or other the efficiency of our transportation systems, and I believe it is more equitable to maintain that efficiency through the allowance of compensation for such injury as may be suffered than to permit the railroad companies to add to their general freight charges to make up the deficit in their revenues.

I shall take occasion, Mr. President, a little later on, I hope, to pass through the various parts of this bill in a connected way, but I felt it was due to the Senator from Missouri to give him at least my view of the justice of the provision now in the bill.

Mr. REED. Mr. President, I am of course obliged to the Senator from Iowa for his remarks, always illuminating, and I shall, as I proceed, perhaps have occasion to refer to some of the views he has advanced; but now, in order to clear up the matter of the legislative status—and of course, with the question raised, while on my feet and depending largely upon recollection, I may be in error, just as the Senator from Iowa, who would not make an error if he sat down to collate the law, may have been in error; but as I understand the situation, the interstate-commerce act did not contain the language the Senator read, which is as follows:

That in time of war or threatened war preference and precedence shall, upon the demand of the President of the United States, be given over all other traffic for the transportation of troops and materials of war, and carriers shall adopt every means within their control to facilitate and expedite the military traffic. And in time of peace shipments consigned to agents of the United States for its use shall be delivered by the carriers as promptly as possible and without regard to any embargo that may have been declared, and no such embargo shall apply to shipments so consigned.

That, Mr. President, I am quite confident, was a part of a bill passed on the 2d of August, 1916.

Mr. CUMMINS. That may be true. I have not examined it. I never have had occasion to examine it. I was told in a discussion had not many hours ago that the first part of the paragraph has been the law for many years, but the Senator from Missouri may be right about it.

Mr. REED. I may be wrong, but I think I am right. I think that it is all new matter. While I have been on my feet one of the Senators kindly looked through the interstate-commerce act, and that was his view. So now it appears that as early as August, 1916, but since the European war has challenged our attention to these grave matters, we proceeded to legislate, and at that period we had conferred upon the Federal Government the right of priority as to troops, material of war, and so forth.

We again dealt with the question in a bill making appropriations for the support of the Army for the year 1917. That bill was approved as late as August 29, again the language being:

The President in time of war is empowered, through the Secretary of War, to take possession and assume control of any system or systems of transportation or any part thereof, and to utilize the same, to the exclusion as far as may be necessary of all other traffic thereon, for the transfer or transportation of troops, war material, and equipment, or for such other purposes connected with the emergency as may be needful or desirable.

Those two clauses give a very wide power. I am glad the Senator called attention to them, because they bring sharply before us the real purpose of this bill, and we might as well discuss the bill with that in view. They also throw a flood of light upon the meaning of the words so forcefully discussed by the Senator from Pennsylvania [Mr. KNOX], to wit, the language "public security and defense," because it is now manifest from the remarks of the Senator from Iowa, who is a member of the committee, and from the previous legislation to which he has called attention, that the purpose of this bill is to give to the President of the United States the power to control all shipments and all lines of transportation in any way which he may regard as necessary for the public security and defense, and that the terms "public security and defense" are to be so broadened in their meaning as to embrace all those acts which may, in the opinion of the President, conduce to the strengthening of the country.

I hope I can arrest the attention of Senators to this situation. It stands now practically admitted that the purpose of this bill is to confer upon the President the right to give a preference to the shipment of any kind of goods over any other kind of goods when he thinks that by so doing the public security and defense will be furthered, and that the power so to be exercised is vested in his discretion, and from his discretion once exercised there is, of course, no possible appeal. There is no tribunal to pass upon that discretion.

We understand, from the remarks of the Senator from Iowa and from the consideration of this bill in the light of the previous legislation which had already conferred upon the President or the Secretary of War the right to take possession of all the railroads for military purposes, that it is intended now to confer upon the President the additional right to do that which he may think will make for the success of this Nation in war. That, of course, necessarily means that if the President of the United States should conclude that it was desirable to stop traffic in anything, he could do so. In other words, it is intended to inaugurate upon this continent and in this country the same policy which now obtains in those countries where the enemy is thundering at the gates; where every resource of the private citizen, where every human being and every animal and every piece of property of any kind is regarded in law as already mobilized and under the control of a central government.

To state this matter more concretely, the proposition of this bill is to give the President the right to say, if he sees fit to do so: "You shall ship all the cars of the United States west loaded with coal, and nothing but coal, for the next 10 days. You shall stop absolutely all other traffic, and haul coal to the exclusion of any other kind of business. I do this because I believe it makes for the national defense, and it makes for the national defense because you must distribute coal over the country in order that the country may be strong." Or it would confer the right, if the President saw fit so to use it, to say that they should ship nothing but corn for a certain given period of time; or it would confer the right to say that cement should not be shipped, but that the cars should be employed for the purpose of hauling some other kind of goods. In a word, Mr. President, it is proposed now to legalize that which has been going on for a number of days or weeks or months, and to confer that power absolutely upon the Executive.

Mr. SMITH of Georgia. Mr. President, would it interrupt the Senator if I should ask him a question at this point?

Mr. REED. Nothing that the Senator might do would interrupt me.

Mr. SMITH of Georgia. Is it not also true that if the railroads could show that they were offered a high-class merchandise at a high-priced haul, and hauled the coal, under the terms of this bill they would be paid out of the Government Treasury for hauling the coal the difference between ordinary coal haul and high-class merchandise?

Mr. REED. Why, undoubtedly that might result.

That brings me, since I have been led aside from discussing directly the amendment offered by the Senator from Nebraska—and I should have taken my seat long before this if it had not been for the digression—to this proposition: It is now demanded that there shall be vested in the President the discretion to take every railroad in the United States, and every kind of goods that are shipped in the United States, and to dispose of those railroads and those shipments as he may see fit, because within the meaning of the term "the national defense and public security" is embraced, according to the analysis of the Senator from Iowa, the doing of all those things which, in the opinion of the President, may strengthen our Nation.

Mr. CUMMINS. Mr. President, I must not be misunderstood. I agree that a President could do the thing which has just been suggested by the Senator from Missouri, and there is no remedy; there is no appeal from his discretion; but a President who would do the thing, unless the preference or priority was in some way connected with the public defense, ought to be impeached.

Mr. REED. Then, Mr. President, again we find ourselves still more beclouded. I thought I understood the Senator, but it appears I did not. Plainly, therefore, we ought to adopt language here that is not susceptible of the construction I have just been contending this language was intended to embrace.

Mr. CUMMINS. I should be very glad to see the field of discretion narrowed if it can be done successfully; but I would rather trust the discretion of the President, believing that he would not abuse it, than to deprive him of a just power that might become absolutely necessary in the course of the war.

Mr. REED. Mr. President, we can not differ on that question. There is not a Senator in this body who does not want to see our Government, our people, win this war; to win it with the least possible loss of blood and of treasure and of tears. There is not anyone in this Chamber who does not believe that all the power that is necessary should be conferred. The sole difference between us is, What power is necessary? And upon that patriotic men, and men who respect or love the President, may honestly differ.

I hold to the view that Congress was obliged to give the President the power to have shipments of munitions or of troops preferred, and I voted for that measure and supported it. I likewise supported the measure which gives to the Secretary of War the right to take possession of the railroads for the purpose of moving the troops and munitions of war, and of course that means all the vast stores of supplies that the Army needs and everything that is essential to the Military Establishment. It perhaps is not broad enough to cover the right of the President to order a preference of iron or steel that is being sent to a factory to be employed by that factory in making munitions or building ships or similar uses. The language of the law as it now stands is perhaps not broad enough to cover the furnishing of the supplies that are about to be employed for sustaining the Army and maintaining the Navy, and in that respect I think we all agree the law ought to be broadened. Now we come to the sharp line of demarcation: Ought we to confer upon any human being the right, under existing circumstances, to prefer one class of goods or one shipment of goods by one private citizen over another class of goods or another shipment of goods by a private citizen, neither of them having anything to do with the maintenance of our Army or our Navy or of our defense?

Mr. CUMMINS. Mr. President, I am sure the Senator will be glad to have put into the RECORD at this point the fact that the part of the interstate commerce act which I read relating to the power of the President to direct a preference or precedence has been a part of the law for many years. As I recall, that part of it which relates to shipments made to agents of the United States, irrespective of any embargo that may have been declared, came in in 1916. The other part was enacted in 1906.

Mr. REED. Mr. President, I thank the Senator for clearing up the record finally on that. The act of 1916, however, which gave the right to take over the railroads themselves, of course, was even broader than the original act.

The question that presents itself now is this: Should we give to the President, under existing conditions, the right to declare an embargo upon one kind of freight for the benefit of another kind of freight, or a preference of one class of shipments over another class of shipments, when the transactions are purely private, and when neither of the shipments has anything to do with the matter of militafy supplies or equipment, but all of them may be said in the broadest possible sense to concern the general welfare, and in that sense to conserve our military strength?

I think that is the question we have to settle; and I think it ought to be entirely possible to find language that will give to the President every power he ought to possess, and yet will not confer the power to prefer the business of one concern over that of another, or to wreck the fortunes of private individuals when the ability to carry on the war is not concerned.

Mr. President, I know that it has become a sort of fetish with the American people and with Congress especially that all you have to do to solve any problem, and solve it right, is simply to pass the power and responsibility over to the President of the United States. I have heard distinguished Senators say—I think upon this floor—that the responsibility of this war is on the President; that he is Commander in Chief of the Army, and that we ought to give him full power because it is his responsibility. Mr. President, I utterly repudiate that doctrine. It is a convenient doctrine for the man who would himself escape responsibility.

Mr. CUMMINS. Mr. President, I hope that because I am supporting this bill the Senator from Missouri will not classify me as one of the Senators who believe that we ought to put all the responsibility for the conduct of affairs during the war upon the President.

Mr. REED. Mr. President, I was not referring to the Senator from Iowa—not at all. I am referring to a sentiment that is quite universal, and that I have heard expressed by Senators and by Congressmen, to the effect I have just declared; and I do not care to repeat the language now. I repudiate the statement. I call upon Senators of the United States to do their duty.

Why, Mr. President, the right to declare war is not in the President but in the Congress. The provisions of the Constitution are that Congress shall have the right to declare war and to carry on war. We vote the supplies; we declare the war; we say how large the Army shall be; we determine whether it shall be volunteers or drafted men; we determine the number of cannon and the number of rifles. The conduct of the war, sirs, is our responsibility, placed upon us by the Constitution of the United States, and we can not escape it.

Mr. VARDAMAN. Mr. President, if the Senator will pardon me, he should not overlook the fact that it is also the office of Congress to determine the terms of peace.

Mr. REED. Oh, yes. We were sent here by the people to perform these duties devolved upon us by the Constitution, and we can no more escape that responsibility than the President

can escape the responsibilities that are devolved upon him. It would be just as proper for the President of the United States to declare that he hereby turned over the command of the Army to the Congress of the United States as it would be for the Congress to turn over to the President the high functions devolved upon it by the Constitution of the United States.

One may stand and talk in this manner and talk to deaf ears; but as certainly as there is a God in Israel—and some of us still believe there is—the day will come in this country when an accounting will be had, and the question will be asked, "Have you been faithful servants?"

There is more involved in this than any question of personal regard for the President; there is more involved in this than the questions of the present time. That which we do to-day will become a precedent for to-morrow; and every responsibility we avoid will be taken as an excuse in the future for the assumption of power, upon the one hand, and for the escape of responsibility, upon the other hand, by another branch of the Government.

The foundations of republics are not swept aside in an hour. The citadel of human liberty has never been destroyed by one great tempest that suddenly burst upon it. Always by slow degrees, by almost invisible methods, power is concentrated and again concentrated. The representatives of the people lose a little here and a little there, sometimes because they are pusillanimous, sometimes because they are swept away by what they think is patriotism. But it is only after these sinister and evil acts have taken place that there comes the evil day with the man on horseback; and never did one of them come yet but he bore aloft in his hand the banner on which was inscribed, in flaming letters, his devotion to liberty, his love of the people, his desire to preserve the State.

I do not think we have any such menace to-day, and would not be so understood; but I appeal to the Senate to do its share, not by passing a law passing on responsibility and power, but by staying here and dealing with these great questions as they arise, and dealing with them as legislative questions.

But, Mr. President, whoever reads this bill, and reads it in the light of public experience, must know that there is no expectation that the President of the United States shall personally exercise these great powers. If that could be done, if the President could sit down and pass upon each one of these important questions as it arises—while I would regard Congress as having abandoned its just duties when it conferred such remarkable powers, I would nevertheless feel much better satisfied than I can under existing conditions, for I know Members of this body must know that the vast duties now devolving upon the executive department—the attempt to mass an army of considerably more than a million men, to gather these men from their homes, to put them in camps, to train them, to furnish them with equipment, to provision them, to build vast fleets of commerce and mighty argosies of war—will be delegated and turned over to individuals; and, if we are to judge by the experience of the past, to individuals who are not officers of the Government, to individuals who owe no responsibility to this Government or to the people of any State, to volunteers who have gathered here from the four quarters of our Nation, many of whom are undoubtedly men of the highest character and most exalted patriotism, but some of whom I believe are here for sinister and selfish purposes.

So, Mr. President, we must view this question from that aspect; and that it was the intent of those who drew the bill to confer this power so that it could be delegated to others can not be doubted by those who candidly read the language of section 2.

Mr. NEWLANDS. Mr. President——

Mr. REED. I yield to the Senator.

Mr. NEWLANDS. Do I understand the Senator to contend that these officials designated by the President to whom he may give his directions will not, when designated by him, be officials of the United States?

Mr. REED. I think they could be officials and they could be nonofficials.

Mr. NEWLANDS. I do not understand it so at all. As soon as they are so designated they are officials. The bill expressly provides that if they are existing officials they shall receive no compensation for their services, but the persons not in the employ of the United States so designated shall receive such compensation as the President may fix. Just as soon as they are designated and their compensation is fixed they become officials of the United States.

Mr. REED. I do not agree that it is so limited, but if that were true it would only mean that these powers could be exercised by unknown individuals to be hereafter selected by the President, and they are given a power that is greater than any king or potentate of earth has exercised in a time of peace within the memory of man. Let us see what the language of section 2 is:

> That during the continuance of the war in which the United States is now engaged the President is authorized—

Now, note the language—

> whenever in his judgment such action is necessary to the public security and defense, to direct that certain kinds of traffic or particular shipments, as may be determined by him, shall have preference or priority in transportation by any common carriers by railroad or water, under such arrangements, rules, and regulations as he may prescribe. He may give these directions at and for such times as he may determine, and may modify change, suspend, or annul them, and for any such purpose he is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose. Officials of the United States, when so designated, shall receive no compensation for their services rendered hereunder. Persons not in the employ of the United States so designated shall receive such compensation as the President may fix.

Now, Mr. President, let us analyze that language for a moment. Whenever in his judgment the President of the United States shall consider it necessary for the public security he may direct that certain kinds of traffic or particular shipments shall have preference under such arrangements, rules, and regulations as he may prescribe.

The language that follows is utterly irreconcilable with an idea that these men are merely agents to carry out the orders of the President. The part that follows clearly is intended to give the men the President shall select the right to originate the order. Here it is:

> He may give these directions at and for such times as he may determine, and may modify, change, suspend, or annul them, and for any such purpose—

That is for the purpose of giving, modifying, or changing—

> he is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose.

Mr. STERLING. Mr. President——

Mr. REED. I will yield in just a moment. I can not read this language in the light of any other conclusion than that it was intended and that the effect of the language is to give the President the power to name a man or a number of men and say to them, "Establish the rules and regulations that will govern the traffic of the United States," and that that power is conveyed by these words.

Mr. President, if that was not the intention the language would have been entirely different. The language would have been, "The President shall have the power to make these rules and regulations and may appoint agents to carry out those regulations and orders so made"; but here we find not that plain and simple language to which I have just given utterance, but the language is, "He is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose." There can be and is, in my judgment, no possible question but the intention is to give the President the right to appoint a board or a commission or to designate an individual, and that individual will have the power to make these rules and regulations. He will become the traffic censor of the United States. He will be the individual to whom all must look. If he be a wise and prudent man he may do little damage. If he be of a different character he may do much damage. My own opinion is that whoever undertakes this gigantic task in this country will not only invade the constitutional rights of the people of the land, but he will disrupt and disorganize business throughout the entire Republic. I now yield to the Senator from South Dakota.

Mr. STERLING. I desire to submit an amendment which I intend to propose to the bill. I ask that it may be printed and lie on the table.

The VICE PRESIDENT. It will be so ordered.

Mr. SMITH of Georgia. If it is agreeable to the Senator from Nevada, I would be glad to move that the Senate adjourn.

Mr. NEWLANDS. I would prefer to take a recess until 12 o'clock to-morrow.

Mr. SMITH of Georgia. I really think we ought to adjourn, because the Senator from North Carolina [Mr. OVERMAN] will bring up the conference report on House bill 291, the espionage bill, in the morning.

Mr. NEWLANDS. The Senator from North Carolina intends to bring that up in the morning?

Mr. OVERMAN. I intend to bring it up to-morrow.

Mr. NEWLANDS. In that view I would prefer an adjournment. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 7 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, June 12, 1917, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

MONDAY, *June 11, 1917.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father in Heaven, impart unto us wisdom, strength, righteousness, sufficient unto the needs of the new week which stretches before us, that we may take up our work in the faith that convicts, the hope that inspires, the love that rejoices in that good is stronger than evil, right than might, truth than error; for Thou dost live and reign. In the spirit of Him who taught us the beauty of holiness. Amen.

The Journal of the proceedings of Saturday was read and approved.

AMENDMENT TO THE ACT TO REGULATE COMMERCE.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent that after the disposition of the pending river and harbor bill, the bill S. 1816, which has been reported and is on the calendar from the Committee on Interstate and Foreign Commerce, reported by substitute, be given a privileged status under the usual conditions which we have been practicing, subject to other privileged bills and conference reports. I make this request because I fear it will not receive consideration on Calendar Wednesday. It is a bill to increase the Interstate Commerce Commission, and for other purposes.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read as follows:

An act (S. 1816) to amend the act to regulate commerce, as amended, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

Mr. MADDEN. Reserving the right to object, I would like to ask the gentleman from Georgia if he will not be kind enough to state what the bill covers and why it should have a privileged status now? There is nothing to prevent its being considered on Calendar Wednesday.

Mr. ADAMSON. Not if it is reached on Calendar Wednesday, but I see no hope of its being reached soon.

Mr. MADDEN. There is nothing on the calendar to prevent it.

Mr. ADAMSON. The Committee on the Judiciary has a large bill, and I think it will be called ahead of ours. I will state that this is one of the first propositions under the program of preparedness. The Interstate Commerce Commission has more work than members can manage, and they have been crying for an increase of membership. The Senate has added some other provisions to it, which our committee has not reported to the House. We have a substitute bill, which this House has passed more than once.

Mr. MADDEN. I have not had time to look into the bill reported and for the time being I will object.

EXTENSION OF REMARKS.

Mr. TIMBERLAKE. Mr. Speaker, I ask unanimous consent to print in the RECORD a resolution by the Federated Trades Council of Colorado Springs, urging a prompt and favorable report by the Judiciary Committee on the Susan B. Anthony amendment.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The resolution is as follows:

Whereas the United States has entered into an international war to fight for "democracy" and also for "the right of those who submit to authority to have a voice in their own governments," it is imperative that we first establish democracy in our own country by giving political freedom to our women citizens; and

Whereas women are now being called to aid the Government in the prosecution of war in defense of the Nation's interests, and without their aid this war could not be conducted: Therefore be it

Resolved, That we, the Federated Trades Council of Colorado Springs, Colo., urge a prompt and favorable report by the Judiciary Committee of the House of Representatives on the Susan B. Anthony amendment and immediate passage of that amendment as a war measure during this session of Congress.

Resolved also, That a copy of this resolution be sent to EDWIN Y. WEBB, chairman of the Judiciary Committee, to the President, to Speaker CLARK, to the Vice President, to Senator JACOB H. GALLINGER, Senator THOMAS S. MARTIN, Representative CLAUDE KITCHIN, Representative JAMES R. MANN, and the Colorado delegation, with the request to Hon. CHARLES B. TIMBERLAKE, of the House, and Senator JOHN F. SHAFROTH that it be read into the CONGRESSIONAL RECORD.

ARMY APPROPRIATION BILL.

Mr. DENT. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 100, making the annual Army appropriation bill immediately available.

The SPEAKER. The gentleman from Alabama asks unanimous consent for the present consideration of House joint resolution 100. Is there objection?

Mr. GILLETT. Mr. Speaker, reserving the right to object, I would like to make a very brief statement. On Saturday when this was brought up the gentleman from Illinois [Mr. MANN] objected. He is not present to-day. He based his objection on the ground which I think the gentleman from Alabama stated, that this resolution was really to take the place of some of the appropriations which are contained in the large deficiency bill, and that the need of it is occasioned by the delay of that bill.

The gentleman from Illinois [Mr. MANN] suggested that calling attention to this delay would probably accelerate the consideration of that bill in the Senate, so that this resolution would be unnecessary. But I observe that the result he wished did not follow, and that, although that deficiency bill which is so urgent passed the House last Thursday, and we asked for a conference with the Senate, they have not yet even condescended to agree to the conference the House asked for.

Now, I recognize the necessity which the gentleman from Alabama suggests. The money is needed at once. That necessity would be met by the deficiency bill, and it is also a fact that there are various other expenditures provided for in that bill which perhaps are quite as necessary as those which will be supplied if this resolution that the gentleman suggests is passed. This resolution applies simply for the appropriations for the Army, while that bill contains appropriations both for the Army and the Navy. The enormous expenditure for the building of ships, which perhaps is as necessary as any exigency before us, is provided for in that bill and will not be met if this resolution which the gentleman suggests is passed. If that bill should be passed at once all emergencies would be met. I think we ought not to ignore the fact that that big emergency bill, the appropriations in which are so necessary for the expedition of our war preparations, was agreed to in conference a week ago last Saturday; that on the same day, if I mistake not, it passed the Senate, and the gentleman from Alabama knew of this exigency then just as well as he does to-day. He had this resolution prepared then, but instead of enforcing it then or urging the passage of the deficiency bill, he consented that the House should adjourn over from Saturday until Wednesday, and practically until Thursday, and that no action should be taken on that bill, the importance of which he now feels so deeply. I think I ought to call attention to the fact that instead of passing that bill the House adjourned in order to give us the pleasure of social intercourse with the Confederate veterans in the city on Monday and Tuesday—a very laudable object, undoubtedly, but at the same time, if this exigency is so great as the gentleman now says, it seems to me that the House, instead of adjourning over until Wednesday, should have then taken up this measure. I appreciate that the exigency is great. I appreciate that the delay is now at the other end of the Capitol, which we can not control; and, although I think their action is subject to great criticism, and that they ought not to delay this great appropriation bill just because of one local item about Jamestown, and that they should not sulk in their tents and refuse to call up the bill so as to have conferees appointed—I say that is subject to criticism, and yet it is not in the power of the gentleman from Alabama to control it; and therefore, as I recognize the need of this appropriation, I shall not object to its present consideration, although I do think in the past week that side of the House has been exceedingly negligent and dilatory in not more speedily enforcing the passage of the other bill, and that, considering their own laches, they can not with any good grace complain of this emergency.

The SPEAKER. Is there objection?

Mr. MADDEN. Reserving the right to object, it seems to me, Mr. Speaker, that in view of the facts as we all know them to exist, that the appropriation of $3,300,000,000 for the Army and Navy having passed both Houses, having been agreed to in conference, the conference report having been rejected by the House because of an item inserted by the Senate which never had been given any consideration by the House, there ought to be no hesitation about preventing the unanimous consent asked for in this case. I think if unanimous consent is withheld on this joint resolution we will get earlier action on the other more important bill.

If we do grant the consent sought by the gentleman from Alabama [Mr. DENT], it is altogether likely that the other bill will be held up for an indefinite period of time, and that there will be nothing gained by the consent being granted here. I feel constrained to object.

The SPEAKER. The gentleman from Illinois objects.

Mr. DENT. Mr. Speaker, I hope the gentleman will reserve that for a moment.

Mr. MADDEN. Surely.

Mr. DENT. Mr. Speaker it is true that this resolution has been pending here for something over 10 days. When I first brought it in I intended to bring it up at once, but I went to the Committee on Appropriations, and they had every reasonable assurance, as they told me at that time, that this matter would be taken care of in a day or two in the conference report upon the big Army and Navy urgent deficiency appropriation bill.

Mr. MONDELL. Mr. Speaker, will the gentleman yield?

Mr. DENT. Yes.

Mr. MONDELL. Has the gentleman any assurance that if the House should pass this joint resolution it will have early action at the other end of the Capitol?

Mr. DENT. Of course, Mr. Speaker, I have no right to speak respecting the action of the Senate, but I believe that this case is such a strong one that it will appeal to everyone, and that the Senate will pass the resolution just as soon as the House sends it over there.

Mr. MONDELL. I agree with the gentleman, but has the gentleman any assurance at all?

Mr. DENT. I have no method of getting any assurance that it will pass. Of course, I have not taken a poll of the Senate, and I could only have that assurance by taking a poll of the Senate.

Mr. MONDELL. There are ways of finding out, as the gentleman knows.

Mr. FOSTER. Mr. Speaker, will the gentleman yield?

Mr. DENT. Yes.

Mr. FOSTER. In this bill is there not provision for the pay of these boys now in the training camps?

Mr. DENT. That is true.

Mr. FOSTER. And they are without money and can not get it?

Mr. MADDEN. Mr. Speaker, I hope my colleague does not pretend to say that we are to blame because the bill appropriating $3,300,000,000 is not passed?

Mr. FOSTER. The gentleman is certainly to blame if he objects to the consideration of this resolution.

Mr. MADDEN. I am going to object to it, I will say to the gentleman.

Mr. FOSTER. And every boy throughout the United States in the training camps will have to do without money that should be paid to him.

The SPEAKER. The gentleman from Alabama has the floor.

Mr. DENT. Mr. Speaker, I was making the statement that I intended when this resolution was first reported unanimously by the Committee on Military Affairs of the House to bring it up at once, until I had assurance that in all likelihood the conference report upon the other bill would be adopted in a day or two, and I am sure that assurance was honest and bona fide, and that everyone believed it would be, but a hitch has occurred in the proceedings of the conferees, a hitch that does not involve anything of a military character, that has absolutely nothing to do with carrying on the Military Establishment, connected with an entirely different department of the Government, a matter that I have no interest in one way or the other and care absolutely nothing about. But here is the proposition that is presented to the House. Contractors have fulfilled their contracts, and some of them are on the verge of bankruptcy because they expected the Government of the United States would respond when they had fulfilled their contracts and that they would get their money in order to carry out their obligations. In addition to that there are thousands of young men who have been sent to training camps in the United States, and we have agreed to pay them $100 a month while they are there. Unless this resolution is adopted then these young men can not get their pay. It seems to me that it is not fair to hold up a project connected with the Military Establishment in order to force action on the part of another body relating to a matter connected with the Naval Establishment.

Mr. MADDEN. Mr. Speaker, will the gentleman yield?

Mr. DENT. Yes.

Mr. MADDEN. The gentleman has just made a statement which, if true, would be very interesting——

Mr. DENT. I have not made any statement that is not true.

Mr. MADDEN. Of course, I know that the gentleman does not mean to. He states that this bill carries compensation for the men who are now in training in the military training camps.

Mr. DENT. I said that unless this bill was passed they could not get their compensation. We have passed a law upon the subject, but there is no appropriation to pay them.

Mr. MADDEN. But the appropriation to pay them is carried in the bill now pending in conference.

Mr. DENT. That is true, and it is tied up.

Mr. MADDEN. And they can not be paid out of this bill if we do grant consent. Therefore I object.

Mr. DENT. They can be paid if this resolution is passed.

The SPEAKER. The gentleman from Illinois objects, and that is the end of it.

FLAG DAY.

Mr. GILLETT. Mr. Speaker, I ask unanimous consent that on Thursday next, which is Flag Day, the gentleman from New York [Mr. HICKS] be allowed, immediately after the reading of the Journal and the disposition of business on the Speaker's table, to address the House for one hour upon the history of the American flag.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that on Thursday next, Flag Day, after the reading of the Journal and the disposition of business on the Speaker's table, the gentleman from New York [Mr. HICKS] be permitted to address the House for not to exceed one hour upon the history of the American flag. Is there objection?

Mr. SMALL. Mr. Speaker, reserving the right to object, could the gentleman reduce the time for which he asks consent? He asks for an hour.

Mr. GILLETT. Yes; on next Thursday.

Mr. SMALL. I have no objection.

The SPEAKER. The Chair hears no objection, and it is so ordered.

RIVER AND HARBOR APPROPRIATION BILL.

Mr. SMALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor appropriation bill, with Mr. HARRISON of Mississippi in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of the bill the title of which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 4285) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. SWITZER. Mr. Chairman, I yield one hour to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. Mr. Chairman, we have entered upon a course of preparedness which the American people hope will enable us to meet successfully the emergency which exists. We are now operating 16 training camps, training men who are to command the forces which are to constitute the Army in the not far distant future. We are enlisting men in very large numbers, both in the Army and the Navy. We have committed the Government already to an expenditure of something like $12,000,000,000 in connection with the enterprise upon which we have started. We have taxed the American people to the limit of their endurance in order to meet the obligations which are involved in the war. We have thus far met with patriotic response from the young men of this country who have registered to the number of about 10,000,000 and who propose to go to the battle lines in order to preserve the honor and the integrity of the Nation. We have drafted men without means and men with means to fight the battles of the country and we are drafting the men and the means of men who are unable to fight the battles of the country, and it must be realized on every hand that the burden to be placed upon the people by the war will be felt as no burden has ever been felt in this country before. My hope was that we would not burden the Treasury by the imposition of new appropriations except to meet the present emergency. As a rule I am not in favor of legislation by caucus, but on this occasion I am in hearty accord with the Democratic caucus decree to the effect that no legislation should be considered at this special session of Congress except such legislation as has to do with the war. The members of the Committee on Rivers and Harbors are no more or no less patriotic than the members of the other committees of the House. They are no more or no less able than the membership of the other committees of the House. They are more industrious, perhaps, than most of the members of the committees of the House, outside the war committees, and they are seemingly more enthusiastic to impress their personality and their individual preferences upon the membership of the House in attempting to force upon the American people legislation which will take from the Treasury $26,900,000 at a time when the Treasury is not only empty but every man in the United States has imposed upon his back a load of taxation which he is already unable to bear. It can not be truthfully said that this bill, or any item in the bill, is an emergency item with respect to the war, and I am not willing, as one Member

of this House, to enact any legislation at this special session that has no bearing whatever upon the war.

We were called together for the purpose of meeting the emergency—for the purpose of enabling the President of the United States to meet the emergency which is imposed upon him as the Commander in Chief of the Army and the Navy. We were called together by the President of the United States that we might be enabled to enact laws to give him power which he did not already possess. The American people are looking with great impatience upon the actions of Congress. They are anxious to know whether we are making the preparations that are necessary to be made to enable this country to meet its responsibilities successfully. They are looking forward to conservatism on the part of the Congress in the expenditure of public moneys for all other purposes except the war such as we have never exercised before. They are willing and anxious that we do everything within our power to enable those charged with the responsibility of conducting the war to conduct it to a successful conclusion, but they are not willing that we should expend money at this time which can just as well go unexpended. They are not willing that we should spend money to sink artesian wells to furnish water to dry creeks in the name of war. They are not willing that we should expend money for the removal of hyacinths from creeks upon which there is no navigation, and do that in the name of navigation as an emergency war measure. They are not willing that we should expend their money and impose new burdens of taxation upon them in order to satisfy the desire of Members of Congress or certain sections of the country for appropriations for the improvement of creeks upon which not a single dollar of navigation has existed or ever will exist. They are not willing that we should squander the funds of the Nation to supply the fancy of those who believe that this is an emergency war measure. They will not be satisfied with any excuse that anyone can make that this bill is an essential necessity for the successful conduct of the war. They have become prone to believe that everything we do recently is an essential necessity for the successful conduct of the war, but I submit to gentlemen that there ought to be a limit to our belief that the people will not understand when we make statements that have no foundation based on fact. It is said that the President and the Secretary of War have recommended this bill as an emergency war measure. Well, I think if the President and the Secretary of War had examined the proposition—and I do not believe they did examine it—they would easily conclude that there is not anything in the bill that has anything to do with the war or its successful conduct.

I have examined the bill; I have examined it a good many times. I have had more time to examine it than the President or the Secretary of War could have, and I fail to see anything in the bill that has anything whatever to do with the war, except to add to the already overburdened load of taxation on the people. If that is a good reason to pass this bill, then we ought to pass it. If it is not a good reason to pass the bill, we ought to defeat it, for if there ever was a time when Members of Congress ought to adhere to the strictest laws of justice and economy in the conduct of Government affairs this is the time.

Mr. GRAHAM of Illinois. Will the gentleman yield?

Mr. MADDEN. I will yield to the gentleman.

Mr. GRAHAM of Illinois. What effect does the gentleman think this would have on the minds of those who are being urged to buy liberty bonds when they learn we have passed this bill?

Mr. MADDEN. Well, we are having more trouble to sell liberty bonds than we ought to have, and I am sorry we are having so much trouble. How can you wonder when there is no disposition manifested by the party in power to exercise any proper economy in the expenditure of public money?

They have entered upon a mad race of extravagant expenditure of money to an extent never before known in the history of America. How can the people have confidence in such management? How can you hope to sell the bonds when nobody knows how many bonds we are going to be compelled to issue; when no one here in power is willing to give any evidence of an exercise of judicious expenditure of public money? How can you hope to gain the confidence of the American people by such practices? Why do you not begin to economize? Why do you not begin to show some evidence of interest in the welfare of the people?

Mr. SEARS. Will the gentleman yield?

Mr. MADDEN. Surely.

Mr. SEARS. Why does not the gentleman vote as he is now talking?

Mr. MADDEN. I do vote like I am now talking, always.

Mr. SEARS. Maybe I misunderstood the gentleman. You voted for appropriations.

Mr. MADDEN. You do misunderstand me, for there never has been a time in all my service in the House when you found me voting for an extravagant expenditure of public money, never.

Why, you are not only creating places by the thousands for your favorites, putting them on the pay roll outside of the civil service, adding to the ordinary expenses of the Government without limit in order that you may be able to get political preferment for your friends, but you are not willing to consider in a judicious way the proper expenditures of money for any other purpose. I want you to realize and to understand that we are going to fight every inch of the way to compel you to do the best that we can in the enforcement of an economical, systematic method of conducting the Government. [Applause on the Republican side.] And while we are ready, every one of us, and no one more willing than I, to expend every dollar needed for the successful conduct of the war, I am not willing that a single dollar shall be paid out of the Public Treasury that has nothing to do with the war through any action of this Congress at this special session.

Mr. BORLAND. Will the gentleman yield?

Mr. MADDEN. Yes; surely.

Mr. BORLAND. Does the gentleman agree that the question of car shortage and increase of railway transportation is a necessary war measure?

Mr. MADDEN. Why, I do not admit there is a car shortage.

Mr. BORLAND. Then the gentleman has been badly advised if he does not admit that.

Mr. MADDEN. I think I am as well advised as the gentleman from Missouri. I think I know something about the transportation of commodities, and I think if there is any car shortage anywhere it is due to an order recently issued by those in power in the advisory committee of the Council of National Defense, where they have prevented the movement of cars by an arbitrary order.

Mr. BORLAND. Does he not know they are contemplating taking competitive passenger trains off in order to get the engines with which to haul freight? If that is true is not the transportation by the lakes and rivers and harbors just as important as by the railroads?

Mr. MADDEN. We will admit that the statement of the gentleman from Missouri is true for the sake of argument, and then I will ask him this question: Suppose it is true, how much of additional facilities would be granted by the expenditure of this $26,000,000 that we are about to appropriate, wher the fact is that most of the money goes into creeks upon which there never has been a dollar's worth of transportation and never can be? [Applause on the Republican side.]

Mr. BORLAND. Will you permit me to answer that? I do not think the gentleman seeks to go on record as saying that most of this money goes into creeks. Most of it goes into rivers and harbors.

Mr. COX. Will the gentleman yield?

Mr. MADDEN. I will.

Mr. COX. If the statement of the gentleman from Missouri [Mr. BORLAND] is correct, that there is a car shortage in this country, a thing about which I express no opinion, does not the gentleman think we would relieve the situation much quicker by taking this money and building cars with it?

Mr. MADDEN. That would be a sensible thing to do; it would be an honest thing to do; it would be the business thing to do; and the only thing you could do to make this a war measure.

Mr. GALLAGHER. I have here a document stating what the railroads are doing to help in the war. I suppose the gentleman got one in the mail this morning. Mr. Howard Elliott says:

> On May 1 there was, according to the record, a so-called shortage of 150,000 cars. In round numbers, there are 2,500,000 cars in the United States. If, by a little better loading by the shipper, a little better unloading by the shipper, a little better movement by the railroad, and a little more alert work by every man in the railroads, from the president down to the water boy, each car was used a little better, it would not take very long to get that 150,000 cars out of the 2,500,000 cars. It is about three-quarters of 1 per cent.

Mr. MADDEN. The fact of the matter is that anybody who knows anything about the movement of commodities by rail knows that a good deal of time is wasted by the stoppage of trains in yards that is not necessary at all; that many of these cars go into yards, put there by the engine that takes them from their starting point, and then they are allowed to remain there for a day or two before they are sent to the consignee. And then there is a switch engine sent to the yard and the cars are removed to the place of unloading, and then allowed to stand a day or two before unloading. It is a question of

railroad management, a matter that ought to be easily corrected. The Interstate Commerce Commission has the power to correct that.

Mr. LENROOT. The gentleman from Missouri [Mr. BORLAND] spoke of the shortage of cars. I would like to ask the gentleman what his opinion is on this proposition: Assuming that the Missouri River is utilized from Kansas City to St. Louis, that grain is shipped to Kansas City in cars, unloaded in boats, and transported to St. Louis, where the grain is again loaded upon cars. I would like to ask the gentleman whether more cars would not be required for that kind of an operation than if the cars were sent straight through direct?

Mr. MADDEN. Certainly. Twice as many cars would be required.

Mr. BORLAND. I do not care about the gentleman's opinion given as mine. That is not my opinion.

Mr. MADDEN. But it is I that am making this speech.

Mr. FREAR. Mr. Chairman, will the gentleman yield there?

Mr. MADDEN. Yes.

Mr. FREAR. If the gentleman will allow me to add something to the remarks that are being made. I will suggest this: If it should develop at this time that 40,000 tons of freight is all that is shipped in a year on the Missouri River, and that the amount of money available under past appropriations for that project is $1,692,639, to be applied to the credit of that proposition which the gentleman from Missouri [Mr. BORLAND] enlarged upon a day or two ago, does the gentleman from Illinois think that any more money at this time should be appropriated to carry on that particular project?

Mr. MADDEN. No. I do not think the Missouri River project has any merit. You can not keep a channel on the Missouri River. It first moves to one mile's end and then to another, and you can not tell where the channel is. [Laughter.] It is continually going from one side to another, and it does not make any difference how much money is spent on it; you can not maintain a channel at any depth.

Mr. BORLAND. Mr. Chairman, will the gentleman yield right there?

Mr. MADDEN. Just a moment. I know that the gentleman is very interesting, and I like to hear his voice, but I want to make this speech myself.

Mr. BORLAND. If the gentleman voted as well as he talks, he would be a great man. [Laughter.]

Mr. MADDEN. Well, the gentleman himself just missed being a great man. [Laughter.] In the first place, I think the average tonnage moved on the Missouri River for the last three years has been only about 26,000 tons a year, and we are expending a million dollars a year for the improvement of the channel on the Missouri River, and that would be at the rate of $40 a ton for every ton of traffic, and it would be better for us to buy the goods and feed them to the poor—and we will probably have to do that sort of thing if you are going to spend money recklessly as is proposed in the river and harbor bill. We are going to have a lot of poor people to provide for during the continuation of the war, and I advise you men who are so prolific in schemes for the expenditure of public money where you do not have any part of the taxes to pay to go slow and conserve the Treasury of the United States, so that we shall have something with which to feed the poor if the occasion arises.

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. I do not want to see our revenues tied up in the interest of the transportation companies, such as those that are running only one or two boats on the Missouri River.

Mr. BORLAND. Will not the gentleman yield?

Mr. MADDEN. I would be delighted to, my dear boy. [Laughter.]

Mr. BORLAND. I do not think the gentleman from Wisconsin [Mr. LENROOT] or the gentleman from Illinois was serious in figuring the tonnage in construction costs. Certainly both of them are better economists than to figure the tonnage in construction costs. But I want to speak of car shortages. There are two railway lines east of the Missouri River, the Pennsylvania and the Baltimore & Ohio, and if they exchange freight with the boat lines at St. Louis they release their own cars and keep them on their own lines, so that the gentleman from Wisconsin has only grasped a very small portion of the problem of releasing cars on the part of railroads on their own lines.

Mr. LENROOT. Mr. Chairman, will the gentleman from Illinois yield?

Mr. MADDEN. Yes.

Mr. LENROOT. Would it not take longer to unload those cars and keep them in the yards in St. Louis than to let them go clear through to their destination?

Mr. MADDEN. I object, Mr. Chairman, to further discussion between gentlemen out of my time.

Mr. BORLAND. If the cars were unloaded at St. Louis they would be released and could be kept on their own lines.

Mr. MADDEN. Is the gentleman from Missouri attempting to take up all my time? [Laughter.]

The CHAIRMAN. The committee will be in order.

Mr. MADDEN. You can start the cars from St. Louis to Kansas City and put them through direct before you could load and unload them.

Mr. BORLAND. The gentleman is mistaken there.

Mr. MADDEN. Aside from the initial cost of the improvement to which the gentleman invites my attention, I want to say that the initial cost is a continuous cost. You start to make the improvement to-day, and you continue it to-morrow, and you continue it on to the end of time, and you do not increase the tonnage of the river a pound.

The rivers that are proposed to be improved here are unworthy, in most of the cases, of the expenditure of any money out of the Public Treasury in the name of navigation. But whether that be true or not, it is true that there is no emergency due to the war calling for the passage of this bill. I am in favor of the improvement of harbors and their maintenance, and I want to see them maintained at the highest standard of efficiency, and so far as money for that purpose is concerned, I would consider it war emergency. I would consider it a commercial emergency in days of peace. I would consider that one of the meritorious expenditures of public money, because it would facilitate the transportation of the commodities of the country and enable them to reach from one section of the country to another, but there is no merit in most of the items in this bill. They say there are 32 new projects. Four of those projects are said to be "war measures," and none of the projects can be brought to a successful conclusion for 10 years. Now, in God's name, how can you call a matter a "war emergency" that will be in course of construction for the next 10 years without being able to be used?

Take the case of the project advocated by the gentleman from the city of New York [Mr. HULBERT]. I think there is more merit in the proposition he presents than in any other proposition in the bill—the deepening of the East River to enable the warships to enter and depart from the Brooklyn Navy Yard. I think there is some merit in that, but that involves the expenditure of a large amount of money and will be carried over a period of three years before it can be utilized. Now, is the war going to last three years or is it going to last 10 years? If it is going to last three years or less, then this can not be called a war emergency. The gentleman from New York [Mr. HULBERT] says the improvement that he advocates is necessary because the ships that carry the food supplies to the soldiers in the trenches in Europe will have to dock along the river at the point where the improvement is to be made; and when I asked him how long it would take to build these docks so that ships could land at them, he said three years. Now, if we can get no food to our soldiers through this means in less than three years, why the soldiers will go pretty hungry, do you not think? And it would not be considered a very important emergency war measure.

Mr. FESS. Will the gentleman yield?

Mr. MADDEN. I yield to the gentleman from Ohio.

Mr. FESS. This bill carries nearly $27,000,000.

Mr. MADDEN. It carries $26,900,000, to be exact.

Mr. FESS. How much of that will go to the four or six measures that they call war measures?

Mr. MADDEN. I can not tell exactly. Nobody knows. In the bill that they reported last year I think they had about $38,000,000. This bill proposes to appropriate $26,900,000. Six million dollars of the last bill have already been appropriated in the sundry civil bill, so that that would make the total $32,900,000.

Mr. FESS. I want to ask a further question.

Mr. MADDEN. Yes.

Mr. FESS. The bill assumes that it will take at least a year to expend this money. Suppose it would not take more than a day. Suppose we could reach in to-morrow's time what a year will reach. How much better off would we be with this money expended, as a war measure, than we are now?

Mr. MADDEN. If all this money could be expended before sundown to-day, and all the improvements that are contemplated should be completed, it would not add one dollar of facilities to the movement in which we are engaged—not a dollar.

Mr. FESS. Then how did this bill get into the House as a war measure?

Mr. MADDEN. The chairman of the Committee on Rivers and Harbors is a very industrious man. He is very enthusiastic over his work. He loves this work. He has been engaged in it

for a long time, and he is a man who can not bear to sit idle. He would not be idle if he could. He insists on working, and in the course of his industry he prepared this bill, in consultation with a few members of the Rivers and Harbors Committee. Of course in preparing a bill a man becomes very much enthused, and he believes that his handiwork is the work of God.

Mr. HAMILTON of Michigan. Oh, no.

Mr. MADDEN. And he believes that nobody will appreciate what he has done unless it comes out into the light.

Mr. FESS. Now, admitting all that, how did it run the gauntlet of the Democratic caucus?

Mr. MADDEN. I do not understand that it did run the gauntlet of the Democratic caucus. The Democratic caucus went on record, if I understand it, to the effect that nothing but war measures should be considered at this special session of Congress. But here the industry of the gentleman from North Carolina comes in again. I understand he saw the Secretary of War, and he pursuaded the Secretary of War that this was a war measure, and the Secretary of War certified to it. Then he persuaded the Secretary of War to persuade the President that it was a war measure, and the President certified to it, and here we have it.

Mr. FESS. May I ask whether the Secretary of War has had time to come down to the committee to make a statement concerning this bill?

Mr. MADDEN. I only know what one of the members of the committee said here on the floor. He said the vote of the committee was unanimous, requesting the Secretary of War to appear and testify as to the merits of the bill, with respect to the war emergency.

Mr. TREADWAY. Will the gentleman yield?

Mr. MADDEN. Let me tell my version of this, and then the gentleman can tell his.

Mr. TREADWAY. I just want to make it correct.

Mr. MADDEN. The Secretary of War and the Chief of Engineers did not have time to come, so they sent an assistant, who came and made the statement, so far as I know. I am only giving what a Member stated here on the floor.

Mr. FESS. It would appear that when the Secretary of War is called upon to ask Congress for war appropriations amounting to something like $4,200,000,000, if in addition the sum of $27,000,000 is asked for, and the Secretary of War calls this expenditure a war measure, he ought certainly to come and make the statement in person. I know he comes to other committees where matters less important are considered, if they are war measures.

Mr. MADDEN. I attribute to the industry of the gentleman from North Carolina [Mr. SMALL] the fact that this bill is on the floor. The gentleman from North Carolina is a very industrious man.

Mr. BORLAND. Will the gentleman yield?

Mr. MADDEN. In just a minute. The gentleman from North Carolina [Mr. SMALL] is painstaking in his researches of the details of intricate problems, and in the quiet of his studio he learned that the difficulties that confronted him in connection with the preparation of this bill involved an emergency war proposition, and he was able to persuade other people that that was the case, and so we have it here. I have a great deal of admiration for the gentleman's ability to present the case under such circumstances, and to convince a lot of otherwise skeptical people that that is the case.

Mr. DUPRÉ. But with all the gentleman's talent he has been unable to convince the gentleman from Illinois. [Laughter.]

Mr. MADDEN. I am not as unsophisticated and unsuspecting as some other gentlemen are.

Mr. TREADWAY. I do not think it is betraying any confidence of the committee to say that the letter to which the gentlemen refers expressed the desire that the committee meet either the Secretary of War or the Chief of the Board of Engineers. The gentleman from Illinois referred only to the Secretary of War. The communication referred to both those gentlemen, neither of whom appeared, but Col. Newcomer did appear before the committee, and undoubtedly he had more detailed knowledge of the matter than either of the other gentlemen referred to.

Mr. MADDEN. That is what I intended to say, but I, of course, did not know all the facts in the case.

Mr. BORLAND. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. BORLAND. Does the gentleman understand that the committee confined itself to things that were recommended by the Secretary of War, and therefore the Secretary of War had supervised in the beginning the construction of the bill?

Mr. MADDEN. I do not quite agree with the gentleman about that.

Mr. LENROOT. Will the gentleman from Missouri make that statement that the Secretary of War has supervised the framing of this bill and approved of all the items in it? The Republican side of the House would like to know it if that is the fact.

Mr. BORLAND. I gathered that from the opening statement of the chairman of the committee.

Mr. LENROOT. We are entitled to an absolute statement as to whether the Secretary of War approved all of the items in this bill.

Mr. BORLAND. Only such items as were specifically recommended, as I understand, are included in the bill.

Mr. MADDEN. The gentleman from Missouri knows that the Secretary of War never supervises the construction of any bill. The gentleman from Missouri knows that the Secretary of War knows nothing about the items in this bill, and he would say so if asked. There is no doubt about that. The Secretary of War, through the Chief of Engineers, the Board of Engineers, and the local engineers, approve of the different projects. These engineers consider them, make recommendations, and doubtless all the items in the bill have been approved by the Chief of Engineers through the Board of Engineers and the local engineers. But the mere fact that they have been approved does not mean that they are emergency war measures, or that it is necessary to expend this large sum of money at this time for this purpose.

Mr. SMALL. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. SMALL. I wish to answer the question asked by the gentleman from Wisconsin [Mr. LENROOT] as to the extent the Secretary of War approved of this bill and the items in it. I have here the letter of the Secretary of War, dated May 9, which I will read:

WAR DEPARTMENT,
Washington, May 9, 1917.

Hon. JOHN H. SMALL,
Chairman Committee on Rivers and Harbors,
House of Representatives.

MY DEAR MR. SMALL: In response to your oral inquiry and referring to the recommendation that I recently submitted for your consideration concerning the advisability of a river and harbor bill, I have the honor to state that the general subject of the character of river and harbor legislation that should be undertaken at this time was first presented to the President, and he expressed his approval of the policy that I proposed to him as a proper one to observe.

This contemplates such work as is required to enable our waterways to continue to play their necessary part in the transportation service of the country, and also to serve urgent military needs. It calls for the appropriation of sufficient sums to provide for necessary work of maintenance in channels already improved, for the more urgent work of continuing improvement of projects already begun, and the adoption of such new projects as are considered necessary under present conditions for military or naval purposes or as a part of the program of national defense and preparedness. The bill that has been prepared along these lines by your committee, in conference with the Chief of Engineers and his representatives, has my approval.

Very truly, yours,
NEWTON W. BAKER,
Secretary of War.

Mr. MADDEN. Of course, as a matter of form, the Secretary of War has approved of the action of the Chief of Engineers and his board, and he might do that without reading the paper that he signs. They give him these papers regularly, place them on his desk, they have the O. K. of the man below him, and he assumes that the O. K. of the man below him justifies his signature, and he signs them. That is what I do frequently in my business. I know the man I have under me would not present a case to me unless he thought it right, and I have confidence in him. The clerk of the Committee on Appropriations, on which committee I had the honor to serve for a number of years, would prepare a statement for the chairman of the Appropriations Committee to sign, which the chairman never read, and he would sign it, knowing that when he signed it he would not be disgraced. That happens in every great business concern. The Secretary of War is too busy a man to go into details of the items contained in this bill.

I wonder if the Secretary of War knew that there was an item in this bill for the removal of water hyacinth from one of the rivers in the United States. Did he consider when he signed the statement that the removal of water hyacinth was a war emergency? I know very well that Mr. Baker would not do anything of that sort. He has too much intelligence, too much integrity; he is a man of affairs, a man of honor, in whom I have great confidence. I would trust the Secretary of War anywhere with anything, and I know that he would tell you if he was called here now that he did not know that there was such an item in the bill for the removal of water hyacinth, and that he did not consider it a war measure.

Mr. MEEKER. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. MEEKER. The gentleman will appreciate that the illustration he gives of the clerk of the Appropriations Committee preparing papers for the chairman to sign would apply to this case of the Secretary of War.

Mr. MADDEN. That is just what I said.

Mr. FESS. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. FESS. Almost every measure that we have heretofore acted upon with reference to the war has originated in the department, has it not?

Mr. MADDEN. With the department or with the President.

Mr. FESS. Now, what I wish to know is, Has the President or the Secretary of War originated a project for river and harbor improvement which they consider a war measure and sent it down here asking us to pass it?

Mr. MADDEN. I do not think anybody would make such a claim, not even the industrious gentleman from North Carolina.

Mr. FESS. Then why is this called a war measure?

Mr. MADDEN. Because the industrious chairman of the Committee on Rivers and Harbors was so situated as to be able to get such a statement from somebody high up to the effect that it is.

Mr. FESS. In the gentleman's opinion, what portion of the bill is a war measure?

Mr. MADDEN. Not a dollar's worth—not a single dollar's worth.

Mr. GALLAGHER. It is the same bill, as appears from the hearings in the testimony of Col. Newcomer, that was passed last year.

Mr. MADDEN. It is a good deal worse than the bill passed last year, because that bill was then itemized, and this is not.

Mr. GALLAGHER. Yes.

Mr. MADDEN. This bill is grouped, and while there might be items under ordinary circumstances that would be considered meritorious, yet when grouped with five or six that are not meritorious—the Secretary of War and the Chief of Engineers are given the power to spend money for any item in the group, regardless of whether it is the worst or the best. That places the Congress of the United States in the attitude of appropriating money for indefensible improvements by covering up the unmeritorious and saying that the Secretary of War or Chief of Engineers will exercise his good judgment as to each of these items and will spend the money not for the worst but will spend it for the best.

Mr. TREADWAY. Will the gentleman yield?

Mr. MADDEN. Certainly.

Mr. TREADWAY. May I call the attention to the testimony of Gen. Newcomer, which has already appeared in the RECORD in connection with the way the bill was prepared, when he said:

> In fact, we were convinced from what took place later that the administration was quite willing to have the bill practically the same as the bill that passed the House and amended by the Senate Committee on Commerce.

Is not that absolute evidence of the manner in which the bill was prepared, and that it had no connection whatever with war emergency?

Mr. MADDEN. Certainly; and nobody pretends to say that it has any connection with the war or navy bill.

This bill is the same, except that the virtues in the other bill are destroyed by grouping up good items with bad items in this bill and not letting anyone know which one the money is to be expended for. That makes this odious. Instead of making it an emergency war measure, it makes it something that people do not dare to look in the face.

Mr. SMALL. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. SMALL. I am sure that the gentleman from Massachusetts would not knowingly make an incorrect statement, but the statement which he attributed to Col. Newcomer refers to the original attitude of the War Department before a change of attitude was brought about through the request of the Secretary of War and the President. In other words, the statement that the gentleman makes has no reference to the limitations imposed in the drafting of this bill.

Mr. TREADWAY. Mr. Chairman, may I have the time from the gentleman from Illinois just to answer the question of the chairman?

Mr. MADDEN. Certainly.

Mr. TREADWAY. I dislike very much to differ with the chairman of the committee, but the statement of Col. Newcomer was made on May 1, when the bill was absolutely before us, offered to us as the committee print, and the bill which the chairman of the committee had introduced in the House. I think it very evident that Col. Newcomer was referring to the bill we have before us to-day. It could not be any other bill.

Mr. SMALL. I shall not take up further time about it, but the gentleman, if he will read the hearings further, will find that it had no reference to this bill.

Mr. MADDEN. Mr. Chairman, last year they had an item of $1,300,000 for the purchase of the Chesapeake & Delaware Canal—one of these intracoastal canals that are said to be very useful for carrying off the fogs on the coasts. They can not be useful for anything else, because they have not sufficient water in them. They talk about that as one of the emergency war measures.

They have taken the $1,300,000 out of this bill, but they have put in a provision which contemplates the condemnation of the canal property. Of course, when that goes through the courts several years will have elapsed, and it will have cost the Government of the United States anywhere from eight to twelve millions dollars; but it is a pressing emergency war measure, we are told. That is what I can not understand. They, of course, facilitate the sale of the bonds and stock that are owned by private individuals that now own the canal, and these bonds have but nominal value, while the stock is said to have no value. Do you wonder at their anxiety to unload onto the Government?

Provision is made in this bill for the condemnation of this rotten, obsolete canal to be owned by the Government of the United States.

Mr. MOORE of Pennsylvania. I ask that the gentleman's words be taken down.

Mr. MADDEN. Why does the gentleman want to defend the owners of these stocks and bonds?

Mr. MOORE of Pennsylvania. I ask that the gentleman's words be taken down.

Mr. MADDEN. I am not reflecting on the gentleman.

Mr. MOORE of Pennsylvania. He is reflecting on the truth. I withdraw my request.

Mr. MADDEN. I insist on their being taken down.

Mr. MOORE of Pennsylvania. Take them down. I shall be glad to have his words taken down.

Mr. MADDEN. And I shall have the gentleman's words taken down.

Mr. MOORE of Pennsylvania. I have no desire to pursue the request if the gentleman wants to withdraw the words.

Mr. MADDEN. I want the words taken down because the gentleman has gone into the RECORD as making a statement that the words I stated are not parliamentary, and that they are not true, and I insist that I am not reflecting on anybody in this House and the gentleman has no right to ask that the words be taken down.

Mr. MOORE of Pennsylvania. Does the gentleman yield? The gentleman stated the bonds of this company were worthless.

Mr. MADDEN. I say that now.

Mr. MOORE of Pennsylvania. I say that statement is not true.

Mr. MADDEN. How does the gentleman know?

Mr. MOORE of Pennsylvania. Because the bonds are paying interest now.

Mr. MADDEN. Is the gentleman interested in anybody who owns those bonds——

Mr. MOORE of Pennsylvania. I am not; and that is a reflection unworthy of the gentleman, and he can not get away with it.

Mr. MADDEN. The gentleman should understand that he can not get on the floor and defend the owners of bonds and stocks of this canal at an expenditure of $12,000,000 of the money of the American people and call it an emergency war measure without my protest.

Mr. FREAR. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. FREAR. I thought the request was made that the words be taken down.

The CHAIRMAN. The Chair understood the request was withdrawn.

Mr. MADDEN. Mr. Chairman, I object to having the request withdrawn. I insist that the words be taken down.

Mr. SMALL. Mr. Chairman, I move that the committee do now arise.

The motion was agreed to.

Accordingly the committee rose, and the Speaker resumed the chair.

Mr. MAPES. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Michigan rise?

Mr. MAPES. To make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MAPES. Is there any question of order or discretion in the Speaker to refuse to have the words taken down if they are

alleged to be unparliamentary and it clearly appears that they are parliamentary?

The SPEAKER. Why, no; there is no discretion lodged in the Speaker.

Mr. MAPES. I call the attention of the Speaker to Jefferson's Manual, page 139:

> Then the person objecting to them and desiring them to be taken down by the Clerk at the table must repeat them. The Speaker then may direct the Clerk to take them down in his minutes; but if he thinks them not disorderly, he delays the direction.

The SPEAKER. Long since that proposition has become obsolete by the practice of the House. Mr. Chairman——

The CHAIRMAN (Mr. HARRISON of Mississippi). Mr. Speaker, the Committee of the Whole House on the state of the Union having under consideration the bill H. R. 4285, the river and harbor appropriation bill, in the course of certain remarks by the gentleman from Illinois [Mr. MADDEN], they were objected to by the gentleman from Pennsylvania [Mr. MOORE], and he requested that they be taken down, and the Chair desires to report to the House the words as taken down.

The SPEAKER. The Chairman of the Whole House on the state of the Union reports that pending the debate on the river and harbor bill that the gentleman from Illinois [Mr. MADDEN] had the floor and was interrupted by the gentleman from Pennsylvania [Mr. MOORE], and that the gentleman from Pennsylvania objected to certain words spoken by the gentleman from Illinois and asked that they be taken down.

Mr. BORLAND. Mr. Speaker——

The SPEAKER. Before the gentleman from Missouri suggests whatever he has in his mind the Chair will say to the gentleman from Michigan [Mr. MAPES] that if the Chair observes that a Member is speaking out of order, that, of course, is in his judgment and he can call him to order himself. The Chair has seen that done several times and has done it once or twice himself. The practice of the House has been—how long the Chair does not know, but ever since the Chair has been here—that whenever a Member says things that another Member objects to sufficiently to ask that the words be taken down, that immediately the House takes charge of the matter and proceeds to straighten it out.

Mr. MAPES. I submit, Mr. Speaker, that a Member who is proceeding in order and in a parliamentary way ought not to be taken off the floor because some one does not like what he is saying. There ought to be some discretion in the Speaker to decide in a clear case.

The SPEAKER. Oh, no.

Mr. SAUNDERS of Virginia. With reference to that, this situation arose in the Committee of the Whole House on the state of the Union. The gentleman refers to a situation developing in the House. There is no discretion in the Chairman.

The SPEAKER. For what purpose does the gentleman from Missouri rise?

Mr. BORLAND. To ask whether it be in order at this time to move that the gentleman from Illinois proceed in order?

Mr. MADDEN. I do not admit that I was not in order.

Mr. BORLAND. I do not admit——

Mr. GARRETT of Tennessee. Let us have the words read.

Mr. GILLETT. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Massachusetts rise?

Mr. GILLETT. I think the words ought to be reported by the Clerk.

The SPEAKER. That is exactly what is going to be done.

Mr. GILLETT. It ought to have been done while we were in the committee, but I do not care to raise the point.

The SPEAKER. No; you can not do it in the committee.

Mr. GILLETT. The Manual says you can.

The SPEAKER. The Clerk will report the words objected to.

The Clerk read as follows:

> Mr. MADDEN. Provision is made in the bill for the condemnation of this rotten, obsolete canal to be owned by the Government of the United States.
>
> Mr. MOORE of Pennsylvania. I ask that the gentleman's words be taken down.
>
> Mr. MADDEN. Why does the gentleman want to defend the owners of these stocks and bonds?
>
> Mr. MOORE of Pennsylvania. I ask that the gentleman's words be taken down.
>
> Mr. MADDEN. That is all right. I am not reflecting on the gentleman.
>
> Mr. MOORE of Pennsylvania. He is reflecting on the truth. I withdraw my request.
>
> Mr. MADDEN. I insist on their being taken down.

Mr. GREEN of Iowa. A point of order, Mr. Speaker.

The SPEAKER. What is the point of order?

Mr. GREEN of Iowa. The gentleman from Pennsylvania [Mr. MOORE] having withdrawn his request, the gentleman from Illinois [Mr. MADDEN] has no right himself to demand that the words be taken down.

Mr. MADDEN. I do not believe the gentleman had a right to withdraw his request, Mr. Speaker, except by unanimous consent.

The SPEAKER. He probably had the right to withdraw his request if he wanted to.

Mr. MADDEN. Only by unanimous consent. I said nothing that anybody had a right to object to.

Mr. MOORE of Pennsylvania. I objected to what the gentleman said.

The SPEAKER. The question is what the House is going to do about this thing.

Mr. STAFFORD. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. STAFFORD. Is it not in order for the chairman of the Committee on Rivers and Harbors to move that the House do now go into the Committee of the Whole House on the state of the Union for the consideration of the river and harbor bill?

The SPEAKER. The Chair thinks this matter has not proceeded——

Mr. HOWARD. Mr. Speaker, I move to lay the request of the gentleman from Pennsylvania [Mr. MOORE] on the table.

Mr. MONDELL. The gentleman withdrew his request.

Mr. MADDEN. I did not.

Mr. HOWARD. He has not got the consent of the Chair to withdraw it. I move to lay both requests on the table.

The SPEAKER. In the Committee of the Whole you can not withdraw a motion or anything else without the consent of the committee, but in the House, if a motion or anything of that sort is made, the gentleman has a right to withdraw it clear up to the time the vote is taken on it. This occurred in the committee.

Mr. HOWARD. Yes, sir; and under those conditions he had no right to withdraw his request. Now we are in the House. He has not renewed that motion to withdraw his request. The question is, as I understand it, whether the motion of the gentleman from Pennsylvania shall prevail or not. I move now to lay on the table the motion of the gentleman from Pennsylvania [Mr. MOORE] that the words of the gentleman from Illinois [Mr. MADDEN] be taken down, and that will end it.

Mr. STAFFORD. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Wisconsin rise?

Mr. STAFFORD. Merely to make an observation. I take it there are two motions that are in order. One is to move to allow the gentleman from Illinois [Mr. MADDEN] to explain, or, if the House sees fit, to expunge the words from the RECORD. If neither of such motions is made and no Member wishes to make such motion, then it naturally is in order for the chairman of the Committee on Rivers and Harbors to move that the House go into the Committee of the Whole House on the state of the Union for the further consideration of the bill.

Mr. MOORE of Pennsylvania. Mr. Speaker——

The SPEAKER. Wait until the Chair states the case. The motion to strike these words out of the RECORD is in order, and the motion to allow the gentleman from Illinois [Mr. MADDEN] to proceed is in order.

Mr. GARRETT of Tennessee. Mr. Speaker, I make the point of order that the language complained of does not transgress the rules of the House.

The SPEAKER. That is not a matter to be passed on by the Chair in the situation we are in now. A motion to strike out the words would determine the opinion of the House about that.

Mr. MOORE of Pennsylvania. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MOORE of Pennsylvania. Would it simplify matters, we now being in the House, to withdraw the request that the words of the gentleman, spoken in committee, be taken down?

The SPEAKER. It undoubtedly would.

Mr. MOORE of Pennsylvania. I withdraw the request.

Mr. MADDEN. Mr. Speaker, I maintain that the request made by the gentleman from Pennsylvania [Mr. MOORE] having been made in the Committee of the Whole House on the state of the Union, he can not withdraw it in the House. And I object.

Mr. KITCHIN. After he gets into the House, he can withdraw it.

Mr. MEEKER. Mr. Speaker, I move that the words of the gentleman from Illinois [Mr. MADDEN] and the gentleman from Pennsylvania [Mr. MOORE] be stricken from the RECORD.

Mr. LANGLEY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LANGLEY. Would it be in order to move that the House ignore the whole proposition?

The SPEAKER. No. The gentleman from Missouri [Mr. MEEKER] moves that the words of both the gentleman from Illinois [Mr. MADDEN] and the gentleman from Pennsylvania [Mr. MOORE] in that interrogatory performance be stricken from the RECORD.

Mr. STAFFORD. Mr. Speaker, I move to lay the motion on the table.

Mr. HARDY. Mr. Speaker, as a substitute for the motion of the gentleman from Missouri I move that the gentleman from Illinois [Mr. MADDEN] be allowed to proceed in order.

Mr. MADDEN. I was in order.

Mr. Speaker, if I may have just a moment, I would like the House to grant me unanimous consent for half a minute.

Mr. GARRETT of Tennessee. Mr. Speaker, I would like to be heard in favor of the point of order that I made.

The SPEAKER. The Chair will recognize the gentleman from Tennessee [Mr. GARRETT] in a minute. The gentleman from Illinois [Mr. MADDEN] asks unanimous consent for one minute. Is there objection?

There was no objection.

Mr. MADDEN. Mr. Speaker, I do not want the House to understand when it makes the suggestion that I may be permitted to proceed in order that I admit I was not in order. I maintain I was in order, and that I did not say a word in connection with my speech that was unparliamentary or in violation of the rules. And so I do not think that there ought to be that reflection cast upon what I said by moving that I be permitted to proceed in order.

Mr. MOORE of Pennsylvania. Mr. Speaker, may I have one minute by unanimous consent?

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to proceed for one minute. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. I do not care that any action shall be taken that will reflect upon my position in asking to having the words of the gentleman from Illinois [Mr. MADDEN] taken down. There is only one place on earth where people unjustly accused in the House of Representatives can be defended, and that is here. Gentlemen rise here, taking advantage of the constitutional privilege, and attack individuals and affairs outside of this House. The gentleman from Illinois did that, and did it openly and boldly. This is the only place where I can challenge him, and I did challenge him on the statement he made, and I do it now, and I will continue to do it so long as he makes statements about people whom I ought to defend who can not answer for themselves.

The SPEAKER. The time of the gentleman from Pennsylvania has expired.

Mr. GARRETT of Tennessee. Mr. Speaker, the practice in occurrences of this kind is not perhaps very well defined. I did not hear all of the remarks of the gentleman from Illinois [Mr. MADDEN], but as I understood it, that which was complained of by the gentleman from Pennsylvania [Mr. MOORE] was read from the desk.

Mr. MOORE of Pennsylvania. Mr. Speaker, will the gentleman yield for a question?

Mr. GARRETT of Tennessee. Certainly.

Mr. MOORE of Pennsylvania. Did the gentleman hear the gentleman from Illinois say that the bonds of a certain company were worthless? Did he hear the gentleman from Illinois ask the gentleman from Pennsylvania if he owned any of such bonds?

Mr. GARRETT of Tennessee. No; I did not. Is that the language that was taken down? That is not what was read.

Mr. MOORE of Pennsylvania. That part was not read.

Mr. GARRETT of Tennessee. That which was read from the desk was not in violation of the rules of this House. Whether there was anything said prior to that which was I do not know. I did not hear those remarks.

The reason I am making this point of order, Mr. Speaker, is that I think it is just as well to have a precedent to it established now. It is perfectly clear to my mind that the remarks read from the desk were not in violation of the rules of the House.

Now, it seems to me that the Chair should pass upon that question. Otherwise, if the matter is to be submitted to the House on demand, every time some gentleman conceives it to be his duty to raise that question, and it is submitted to the House, it opens the way for every character of filibustering that gentlemen would care to engage in. It is perfectly clear that the language read from the desk was not in violation of the rules of the House. There was no reflection upon any Member of the House.

Mr. MONDELL. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Wyoming rise?

Mr. MONDELL. To make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MONDELL. Does the Chair hold that the gentleman from Pennsylvania [Mr. MOORE] had a right to withdraw his request to have the words of the gentleman from Illinois [Mr. MADDEN] taken down?

The SPEAKER. Yes.

Mr. MONDELL. He had the right to withdraw that?

The SPEAKER. Yes, in the House. The gentleman has the right to withdraw any motion, and his request to take the words down is tantamount to a motion. In the committee he had to have unanimous consent to do it, but in the House a Member can withdraw a motion or any other proposition or amendment clear up to the time it is voted on without asking anybody's consent.

Mr. MONDELL. I understand that the gentleman from Pennsylvania has now asked, in the form of a motion, that his demand be withdrawn.

Mr. GARRETT of Tennessee. That comes too late. The words have already been taken down. That would not get us anywhere.

Mr. Speaker, I venture to direct the Chair's attention to paragraph 4 of Rule XIV, found on page 321 of the Manual I have in my hand. It reads this way:

> If any Member, in speaking or otherwise, transgresses the rules of the House, the Speaker shall, or any Member may, call him to order.

Now, I respectfully submit that somewhere there must be the power lodged to determine whether a person speaking has transgressed the rules of the House, and I think the Chair is the first authority to pass upon that. Otherwise we could have this House in confusion all the time. If there is no power lodged in the Chair to pass originally upon a proposition of whether or not some one transgresses the rules of the House; if any Member can at any time when another Member is speaking demand that his words be taken down in the Committee of the Whole and in the House, and thereby precipitate such a discussion as we are having now, it opens the way to a filibuster. It seems to me it is a very simple proposition for the Speaker to pass upon, whether it transgresses the rules of the House, and if any man disagrees with the decision, he can appeal from the decision to the House and it can be passed upon there.

Mr. SAUNDERS of Virginia. Mr. Speaker, I wish to say a word or two in support of the contention advanced by the gentleman from Tennessee [Mr. GARRETT].

It seems to me that it is a very clear proposition, that this matter once having reached the House, the determination of whether or not the words complained of are in order, or out of order, can be made by the Speaker prior to submitting to the House any motion in connection with these words.

Of course under the rules there was no escape from bringing this matter into the House. The rule expressly provides what shall be done in Committee of the Whole, and the form of procedure to be pursued in a situation of this character. This matter having been brought bodily before the House, a question of order is presented that should be determined according to the rules and practices of this body.

Suppose this colloquy had occurred in the House. The first question to arise would have been: Are the words of the gentleman from Illinois in order? I fully agree with the gentleman from Tennessee that the words asked to be taken down in the Committee of the Whole and just read in our hearing are perfectly parliamentary in their character.

If they had been uttered in the House, I think the Speaker would have promptly ruled that the gentleman from Illinois [Mr. MADDEN] was in order. The whole matter occurring in the Committee of the Whole having been returned to the House for disposition it occurs to me that the Speaker can determine whether the words of the gentleman violated any rule of parliamentary decorum. It is the function of the Speaker to maintain order and pass on all questions of order. So far there has been no ruling either adverse or favorable to the gentleman from Illinois. His words have been taken down and reported to this body for action. It is true that the House may deal with this situation by appropriate motion, but if the Speaker holds that the words are in order, there is no occasion for any action by the House, unless an appeal is taken from the Speaker's ruling, and that ruling reversed. This question of order occurring in the Committee of the Whole is remitted to this body for decision upon the manifest ground that a question of free speech is presented, and a question so vital should not be decided by any authority short of that of the House. If it was a question of order in the

committee, it has not lost that character by translation to this body, and as a question of order, it should be passed on by the Speaker, if the question of order is raised. Why not? There is nothing in the rules that either by direction or indirection takes this case out of the authority of the Speaker. It is true that the situation may be dealt with by motion, if no point of order is raised, but this is true of many parliamentary situations. The one question in issue is whether the gentleman from Illinois was in order when he used the words asked to be taken down. These words are now before this body. They were sent here to have their parliamentary character ascertained. If they were in order, then this incident is ended, and we should return to the Committee of the Whole in order that the gentleman from Illinois may proceed with his speech. If in the judgment of the presiding officer of this body these words are in order, then a simple holding to that effect will settle this controversy, and render unnecessary any motion, or action of the House. I submit that it is clearly within the authority of the Speaker to pass on the words complained of, and that the purpose of the rule providing that these words complained of in the Committee of the Whole shall be reported to the House, is that primarily they may be passed on by the Speaker, subject to appeal to the House, precisely as if they had been uttered in the House, and the Speaker had been asked to determine whether they were in order. A ruling of the Speaker will in no wise hinder the House from dealing with these words, if so disposed, by appropriate motion.

Mr. MONDELL. Mr. Speaker——

The SPEAKER. The Chair is ready to rule. Ordinarily in debate if A complain that the remarks of B are out of order, the Chair admonishes B to keep within the limits, and if he does not do so the Chair stops him. That is before the motion to take down the words is made. The Chair undoubtedly has a good deal of discretion about that. I remember very well one day, a long time ago, when Speaker Reed was in the chair and Mr. Allen of Mississippi was making a speech. In the course of his remarks he attacked the Senate, and the Speaker tapped his desk with the gavel and suggested to him that he was out of order. Now, Mr. Allen was a seasoned Member. He seemed puzzled. He did not know what he was out of order about. He started in again with the very same line of talk, and Speaker Reed went through the same performance again, rapping with his gavel, and told him he was out of order, but did not tell him why. Mr. Allen started in the third time, and Speaker Reed stopped him and explained to him that he was out of order because he was lashing the Senate.

Time and again a Member objects to remarks that some other Member makes, and the Chair in that case passes on whether the words are in order or out of order and admonishes the Member to proceed in order. But when this motion to take the words down is made, according to my way of thinking, an entirely different situation arises; and, it being in the Committee of the Whole, they could not deal with it in this case, so they referred it back to the House, or dumped it back into the House, as the gentleman from Virginia [Mr. SAUNDERS] has said. The gentleman from Missouri [Mr. MEEKER] made a very proper motion to strike out all these words about which this controversy has arisen, and the gentleman from Wisconsin [Mr. STAFFORD] made a motion to lay that motion on the table. That motion is not debatable, and the question is on the motion to lay on the table the motion of the gentleman from Missouri [Mr. MEEKER].

Mr. BURNETT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BURNETT. There seems to be a difference in the understanding of the gentleman from Pennsylvania and other gentlemen in regard to what the words were. I was not in the Hall at the time. If it is in order, I would be glad to have the language as taken down by the Official Reporter read for the information of the House.

Mr. MADDEN. I can tell the gentleman what the words were that were objected to.

The SPEAKER. The Clerk will report the language.

The Clerk read as follows:

Mr. MADDEN. Provision is made in the bill for the condemnation of this rotten, obsolete canal to be owned by the Government of the United States.

Mr. MOORE of Pennsylvania. I ask that the gentleman's words be taken down.

Mr. MADDEN. That is all there was to it.

The SPEAKER. The Clerk will read what he has.

The Clerk read as follows:

Mr. MADDEN. Why does the gentleman want to defend the owners of these stocks and bonds?

Mr. MOORE of Pennsylvania. I ask that the gentleman's words be taken down.

Mr. MADDEN. That is all right. I am not reflecting on the gentleman.

Mr. MOORE of Pennsylvania. He is reflecting on the truth. I withdraw my request.

Mr. MADDEN. I insist on their being taken down.

Mr. MOORE of Pennsylvania. Mr. Speaker, I ask that that part of the debate be read in which the gentleman from Illinois asked the gentleman from Pennsylvania if he owned any of these stocks and bonds.

The SPEAKER. That was subsequent to the demand of the gentleman from Pennsylvania to "take down the words."

Mr. MOORE of Pennsylvania. If this part is stricken out, the other part should be stricken out too. There is an implication there that I do not think Members of the House ought to let go into the RECORD. I am satisfied to have the whole thing stricken from the RECORD, but I do not think it is fair that the gentleman from Illinois or any other gentleman should reflect upon a colleague in the manner in which he did when he asked that question.

The SPEAKER. That part of the controversy was not demanded to be taken down.

Mr. MOORE of Pennsylvania. That is the part that is objectionable.

The SPEAKER. Here was the situation: The gentleman from Pennsylvania [Mr. MOORE] demanded twice that the words be taken down. He demanded it once. Then the gentleman from Illinois [Mr. MADDEN] made some other remarks, and the gentleman from Pennsylvania again demanded that the words be taken down, and then, just as the Speaker came into the Hall, the gentleman from Illinois [Mr. MADDEN] asked the gentleman from Pennsylvania if he owned any of the bonds. That was subsequent to the demand to take the words down.

Mr. GORDON. That was not asked to be taken down.

Mr. MOORE of Pennsylvania. This controversy began through the statement of the gentleman from Illinois [Mr. MADDEN] that the bonds of this company to which he referred were worthless.

Mr. MADDEN. I did not say that.

The SPEAKER. This motion to table is not debatable.

Mr. MEEKER. Mr. Speaker, I demand the regular order.

Mr. GARRETT of Tennessee. Mr. Speaker, if the gentleman will permit me for a moment, I do not wish to weary the Chair or exhaust the patience of the House, but I feel very strongly that the point of order which was made by me was well taken. I do not understand the Speaker to have ruled directly on that, though by inference I suppose he overruled my point of order. I would like to ask the Chair if he has at the desk there Volume V of Hinds' Precedents? I find this reference here in the small manual which I have in my hand, referring to section 5187 of the large volume of Hinds' Precedents:

After the Speaker has decided that the words taken down are out of order a motion that the Member be permitted to explain is in order before the motion that he be permitted to proceed is in order.

Clearly implying that it is up to the Speaker to determine whether or not the words complained of are out of order. That is the implication from the quotation in the small manual.

Mr. MAPES. Mr. Speaker, section 5159 goes further than the section to which the gentleman from Tennessee has called attention. While the point of order which he has raised was made in that case in the Committee of the Whole it seems as though the same rule would apply in the House. In that case the chairman of the committee decided that the words "objected to" were parliamentary and ordered the Member who had the floor to proceed. I read from Hinds' Manual, section 5159:

On April 10, 1906, the Post Office appropriation bill was under consideration in Committee of the Whole House on the state of the Union, when Mr. Frank A. Hopkins, of Kentucky, having the floor, was addressing the committee.

Mr. William S. Bennet, of New York, rising to a question of order, demanded that the words just uttered by Mr. Hopkins be taken down.

The Chairman said:

"The reporter informs the Chair that he has not been taking down the remarks of the gentleman from Kentucky for the reason that the gentleman from Kentucky informed him that his remarks were in manuscript and that there was no need of reporting them. If the gentleman from Kentucky will permit the Chair to see the manuscript, the question can be determined."

The Chairman, from suggestion made by Mr. Bennet, stated the objectionable words.

He says (referring to the gentleman from New York), "that 30.6 per cent of the voters of the country in which I live can neither read nor write," which is not true.

Mr. JOHN S. WILLIAMS, of Mississippi, made the point that the language was in order.

The Chairman said:

"The Chair rules that the language is not unparliamentary, and the gentleman from Kentucky will proceed."

The SPEAKER. That was done in Committee of the Whole.

Mr. MAPES. Yes; and it may be too late to raise the question now, but I call the attention of the Speaker to the fact that the

chairman of the committee has the right to decide that the words are or are not parliamentary.

The SPEAKER. The Chair has stated the very same thing. The Chair stated the ordinary rule, that the Chair can pass on the question, whether the words used are parliamentary or not, but that is not this case. That decision was rendered by the Hon. James S. Sherman, who, while he never was Speaker, was one of the most popular presiding officers the House ever had. But the case passed on there is not the case here.

Mr. MAPES. I understand; but it seems to me the Speaker would have the same authority that the Chairman of the committee had.

The SPEAKER. The trouble is that the gentleman from Pennsylvania demanded that the words be taken down; they were taken down in committee, and then the committee rose and came into the House with this report.

Mr. LONGWORTH. Mr. Speaker——

The SPEAKER. The Chair will hear the gentleman.

Mr. LONGWORTH. Assuming that the words are not in fact unparliamentary, is it in order to move that they be stricken out?

The SPEAKER. Yes; you can move to strike out anything.

Mr. LONGWORTH. Move to strike out parliamentary language?

The SPEAKER. Yes; but of course no one would vote for that motion.

Mr. LONGWORTH. That is the situation—the gentleman from Missouri is moving to strike out language that is parliamentary, as the House has decided.

Mr. PARKER of New Jersey. I call for the regular order.

The SPEAKER. The Chair has ruled and started to put the motion of the gentleman from Wisconsin, which is to lay the motion of the gentleman from Missouri on the table.

The question was taken, and the motion was agreed to.

Mr. MOORE of Pennsylvania. Mr. Speaker, that permits the RECORD to stand as it is.

The SPEAKER. Yes.

Mr. MADDEN. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MADDEN. The gentleman from Pennsylvania asked if that permitted the RECORD to stand as it is. I want to say that I refused to yield to the gentleman from Pennsylvania and he made two or three speeches of about five minutes, and I want to ask the Speaker if what he said when I refused to yield to him will be permitted to stand in the RECORD?

Mr. MOORE of Pennsylvania rose.

The SPEAKER. For what purpose does the gentleman from Pennsylvania rise?

Mr. MOORE of Pennsylvania. To submit a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MOORE of Pennsylvania. Is it proper for a Member of this House, in the presence of those who were here and heard the statement, to say to the Speaker that the gentleman from Pennsylvania inserted three or four speeches of five minutes——

The SPEAKER. The Chair will state the case to the gentleman from Illinois [Mr. MADDEN] out of his own experience. At one time I was making a speech that I had carefully prepared, I think with reference to the value of wooden and iron ships. I wound up that speech with a long and rhetorical sentence which I thought was a fine finish. [Laughter.] Right in the middle of the sentence Gov. Steele, of Indiana, without asking my permission, injected a remark of his own into the middle of the sentence, spoiling the sentence. After I had answered him I began the sentence over again, and it went through without interruption. So when I received the notes of my speech I struck out Gov. Steele's question and my answer. He rose the next morning to a question of privilege and wanted to know what I did it for. Speaker Reed harnessed me up and interrogated me, and I told him that there was no sense in the question, that it ruined the last sentence of my speech, and I did not propose to stand for it. [Laughter.] Then Mr. Speaker Reed kindly told me what the rule was, and I have never forgotten it, and it will answer the gentleman's question. When a Member has the floor and somebody wants to interrupt him he has the right to do one of two things: He can decline to yield, and then if the other Member insists upon injecting remarks into his speech he can cut out those remarks without asking anybody's consent. But if he yields to the interruption he has to put it in as it occurs.

Mr. SAUNDERS of Virginia. Mr. Speaker, I want to propound a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. SAUNDERS of Virginia. The situation as I understand the present one is this: A question of alleged unparliamentary procedure occurred in Committee of the Whole and under our rule that matter was referred to the House for disposition. It came into the House and the gentleman from Missouri moved to strike out the matter and a motion was then made to lay the motion on the table. The motion was carried. Does that settle the question whether or not the Member speaking was in order?

The SPEAKER. That is absolutely settled by the adoption of the motion to table.

Mr. SAUNDERS of Virginia. What does that settle? The motion was made to strike out the language.

The SPEAKER. That is true.

Mr. SAUNDERS of Virginia. And that motion is laid on the table. That means that the words are not stricken out. Does that settle whether the gentleman is in order or out of order?

The SPEAKER. Yes; in the opinion of the House he was not out of order when he made those remarks.

Mr. SAUNDERS of Virginia. If that is the result of the motion, that is all right.

HOUR OF MEETING TO-MORROW.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow. Is there objection?

Mr. GILLETT. Mr. Speaker, reserving the right to object, may I ask if anything in particular is coming up?

Mr. KITCHIN. The gentleman from Virginia [Mr. GLASS] has given notice that he will call up the conference report upon the amendment to the Federal reserve act, and that will take at least an hour, if not more.

The SPEAKER. Is there objection?

There was no objection.

RIVERS AND HARBORS.

Mr. MOORE of Pennsylvania. Mr. Speaker, the Chair having stated an experience of his own, which is upon all fours with that of the present case, certain remarks having been injected into the speech that were not pleasant to the Speaker, I ask now, in view of the inquiry of the gentleman from Illinois [Mr. MADDEN] as to whether he may strike from the RECORD certain things that appear in the RECORD, whether he has the right to do so.

The SPEAKER. The Chair laid down the rule, and the gentleman will have to observe the rule. If he yielded to the gentleman from Pennsylvania to make the remarks, he has no right to strike them out, it makes no difference what he said; but if he did not yield, then he has a perfect right of his own motion, without asking anyone's consent, to cut them out.

Mr. MOORE of Pennsylvania. But the ruling of the Chair, as I understand it, is that the House now has ruled that the RECORD shall stand as it is and that there shall be no change.

The SPEAKER. The House ruled practically that so far as these words that were read from the Clerk's desk are concerned, they shall stay in the RECORD.

Mr. MOORE of Pennsylvania. And that they shall not be altered according to the suggestion of the gentleman from Illinois?

Mr. MADDEN. Mr. Speaker, the gentleman from Illinois will serve notice now on the gentleman from Pennsylvania that everything that the gentleman said to which I did not consent will be stricken from my speech.

Mr. SMALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the river and harbor appropriation bill, with Mr. HARRISON of Mississippi in the chair.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] is recognized for seven minutes.

Mr. BORLAND. Mr. Chairman, I would like to ask my friend a question.

Mr. MADDEN. Very well.

Mr. BORLAND. I understand it was stated here a while ago that about $900,000,000 has been expended altogether in river and harbor improvements in the United States. Is it not a fact that a great deal of that was expended upon the Great Lakes, and that as a consequence thereof the Great Lakes cities have become the most populous and the greatest shipping centers in the interior of the country? Chicago has become one of the greatest of the interior ports of the United States by reason of that.

Mr. MADDEN. I think I may say for the information of the gentleman from Missouri that there has not been over $2,000,000 spent out of the Treasury of the United States in connection with the Chicago Harbor all told, although I would not undertake to state the exact figures. The improvement of the Great Lakes is not confined to Chicago. It covers almost all of the interior American cities.

Mr. BORLAND. It covers such splendid cities as Duluth, Cleveland, Buffalo, Detroit.

Mr. MADDEN. I said a while ago that I am in favor of the improvement of the harbors of the United States, and if this bill were confined to the improvement of the harbors there would be no man on the floor of the House more enthusiastically for it than I.

Mr. BORLAND. Have not the Lake harbors had a very fair share of improvement in the past?

Mr. MADDEN. Oh, no.

Mr. GALLAGHER. They have had less than a share.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. MEEKER. The gentleman states that he is in favor of improving the harbors. Does he mean that he is not in favor of improving the rivers?

Mr. MADDEN. I am not in favor of improving any river where there is not any justifiable navigation. I am not in favor of making appropriations for the improvement of such rivers as will cost $40 for every ton of freight carried on the river. I am not in favor of making appropriations as war emergency measures to remove water hyacinths from rivers upon which there is no navigation. I am not in favor of any appropriation at this time for rivers and harbors except such appropriations as may be necessary to maintain the harbors of the United States so that navigation may be facilitated. I am opposed to the appropriation provided for in this bill not only because it is not a war-emergency measure but also because we are already obligated for between ten and twelve billions of dollars for the conduct of the war, and the people of the United States are already overburdened with taxation, and for the further reason that this bill is not and can not be considered to be a war-emergency bill, and the still further reason, and perhaps a better reason, that there is $32,000,000 now to the credit of river and harbor projects in the Treasury of the United States already appropriated. That can be expended during the coming year, and every project of any consequence, at any rate every project of any merit, every project that is justified or justifiable will have every improvement in the way of maintenance that is necessary to keep the project in proper order to facilitate navigation and the movement of the commodities and the product of labor, of the factory and the farm, from one section of the country to the other without the expenditure of an additional dollar beyond that already in the Treasury to the credit of these projects.

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. BORLAND. How much did the gentleman say had been expended on Chicago Harbor?

Mr. MADDEN. I said I did not know, though I thought about $2,000,000.

Mr. BORLAND. Now, I find there has been appropriated $4,435,000 to the harbors. This is $200,000 for completion, which means virtually completed.

Mr. MADDEN. It is a breakwater.

Mr. BORLAND. I find for the Calumet Harbor, $1,640,000; Chicago River, $1,801,000; and Calumet River, $1,342,000, making about $8,000,000.

Mr. MADDEN. Yes; but we have got anywhere from eight to ten million tons of freight every year.

Mr. BORLAND. Chicago gets the benefit of it.

Mr. MADDEN. Whereas the Missouri River——

Mr. BORLAND. I am for it.

Mr. MADDEN. The ultimate cost of which will be $20,000,000, can only show 26,000 tons of freight in any given year.

Mr. BORLAND. I want to say I think Chicago is justified in the expenditure.

Mr. MADDEN. And the cost to the Government every year will be $1,000,000, or $40 for every ton of freight carried on the Missouri River. We have eight to twelve million tons of freight every year on the Chicago Harbor at a cost, from the foundation of the Government according to the gentleman's own figures, of $4,000,000, and this tells the House what the difference in the merit of the Missouri River proposition and the Chicago Harbor proposition is. I yield up the balance of my time.

Mr. BORLAND. When these improvements were begun in Chicago, Chicago was less than one-third the size of Kansas City now.

The CHAIRMAN. The gentleman yields two minutes.

Mr. SMALL. If the gentleman from Ohio will yield to me for just a few minutes. The gentleman from Illinois [Mr. MADDEN] has spoken for an hour on the river and harbor bill. When I had the honor of addressing the House on Friday I made the challenge to gentlemen to show that any provisions of this bill for the new projects were not meritorious, were not emergencies in the interest of commerce, or were not necessary in the national defense. The gentleman in an hour's time made a great many general statements, but he only referred specifically to the Chesapeake and Delaware waterway and the Missouri River, and perhaps to the Mississippi River. But certainly his discussion of these specific projects was not serious or did not include any statements of facts involving their demerits which would bring conviction to the House or show that they were unmeritorious. The gentleman did indulge in some innuendoes and indefinite statements. He said people were not willing to appropriate money to sink artesian wells, to remove hyacinths, and clear out worthless creeks, or help Members of Congress. I think the majority of the committee desire a candid and frank discussion of the items of this bill with full opportunity to anyone to show their demerits, and I suggest that general statements of that kind are not convincing. But, Mr. Chairman, the remarks of the gentleman, and the remarks of some other gentlemen who have opposed this bill, bring this point to my mind. I have not any desire nor would I impugn the motives or the veracity of the gentleman from Illinois, and I do not do it. After all, the opinions of any Member in this House, the impression which he makes upon the House by his advocacy or opposition of any proposition, must depend upon his own personality and the confidence of the House in his fairness and in his sense of right in advocating or opposing a proposition. That is the criterion by which the House will judge the gentleman from Illinois and others who are opposing this river and harbor bill and those who are advocating it, and it will contribute nothing to the discussion to indulge in any expression which affects the character or good faith of gentlemen here upon either side.

Mr. MADDEN. Will the gentleman yield to me right there?

Mr. SMALL. I will.

Mr. MADDEN. Does the gentleman wish to have the committee understand that I intended to reflect on the character of any Member of the House in my speech?

Mr. SMALL. No; I did not intend to say so. I did not indulge in any such expression.

Mr. MADDEN. I thought maybe what the gentleman said intended to convey that impression.

Mr. SMALL. No; I did not. I have before me a resolution which was introduced, as I recall, by the gentleman from Illinois [Mr. FULLER] and referred to the Committee on Rivers and Harbors, and which embraces resolutions passed by the Chamber of Commerce of East St. Louis, Ill. The resolutions are as follows:

Whereas commerce of this country has developed to such an extent that the railroads are unable to take care of all the traffic offered them, with no prospects of relief: and

Whereas there are many navigable rivers in the United States on which transportation of a large volume could be developed and, as a matter of fact, is being developed, three important lines of transportation having been established out of East St. Louis within the past year: Therefore be it

Resolved, That the Chamber of Commerce of East St. Louis, Ill., urge Congress at the extra session to be held in the near future to make adequate appropriation for rivers and harbors, in order that river channels may be kept open and that the development of river transportation, which is absolutely necessary, may be encouraged; and be it further

Resolved, That a copy of this resolution be mailed to each of the Representatives from Illinois and the two Senators from Illinois.

Upon their merit I submit these resolutions as an answer to the argument of the gentleman from Illinois [Mr. MADDEN].

Mr. SWITZER. Mr. Chairman, I yield five minutes to the gentleman from New Jersey [Mr. PARKER].

Mr. PARKER of New Jersey. Mr. Chairman, I do not know very much and we do not know and can not know very much about the particulars of a bill like this. I know and you know and the country knows that we want no money spent; it is more than money. We want no energy of this country at the present time devoted to anything except what is absolutely necessary for the carrying on of a war for our preservation. I think this House desires to say this. The details of this bill are in 20 or 30 pages; the appropriation is in the first nine lines, making immediate appropriation to the President and the Secretary of War of certain moneys for certain public works, and after those nine lines I give notice now that I propose to move this amendment:

Insert the following provision: "*Provided*, That during the continuance of the present war no money shall be so expended except for necessary repair and preservation of existing public works or for construction and completion of public works of immediate military necessity, to be determined by the President."

And I shall ask every patriot to vote for that limitation upon this bill.

We are in war. The measures to be taken are to be determined by the Commander in Chief. It is not a question so much of money. Even $26,000,000 is little compared to the cost of this war. We want men. There are men in factories, skilled mechanics, carrying on work for locks and dams, and other works on the rivers and harbors. We want them for the war. There are men on board ships acquainted with our coasts and used to storms. We want them. There are dredging machines, and we may want to turn those dredging boats into boats that will lay and take up mines. We want them. But most of all, we want the officers of the United States Army, of the Engineer Corps, to be at their own work—the business of contriving and planning forts and defenses and arranging for sieges, and doing work in the field. We want them. We have too few officers. There are in the Engineer Corps a little over 300 officers authorized. The enlargement of the Army has made it impossible to get enough of the best West Point graduates, and there are only 252 officers now, according to the list of the Engineers. One brigadier general, 17 colonels, 22 lieutenant colonels, 55 majors, 78 captains, 74 first lieutenants, 5 second lieutenants. Every one of them is needed for war, and more yet. There can not be too many to lay out trenches and siege lines if men are to go into war in France. We should not divert to digging channels. In addition, every officer of the reserve should go back into the active Engineering Corps. They are the cream of the graduate officers of West Point. They are needed now in the camps. They say we can not have larger camps because of the lack of officers to instruct the men; and we can not detail more officers from the Regular Army without hurting that Army.

Mr. Chairman and my friends, let us remember that it is brains and education that are needed in carrying on war, and in training our people for a task such as we have never had before. Let us insist that no part of our energies be diverted to ordinary river and harbor work. The way to secure this is to leave it to the sole responsibility of the Commander in Chief that no money shall be spent during the war under this bill except for the necessary repair and preservation of existing public works and in the completion of such works as are of immediate military necessity, to be determined by the President.

That motion for this amendment will come up with the first clause of that bill, and I ask you to be present and vote.

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

Mr. SMALL. Mr. Chairman, I yield 20 minutes to the gentleman from Missouri [Mr. MEEKER].

Mr. MEEKER. Mr. Chairman, I ask unanimous consent to extend and correct my remarks.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend and correct his remarks. Is there objection? [After a pause.] The Chair hears none.

Mr. MEEKER. Mr. Chairman and gentlemen, we are facing a vastly different condition of affairs in the Mississippi Valley than you have been led to believe exists there now by the gentlemen who have opposed this bill. One of the great factors in the carrying on of this or any war is transportation, and any man who knows anything at all about the transportation situation in the Mississippi Valley country, and especially west of the river, knows that for more than a year our manufacturers and merchants and farmers throughout that country have been suffering almost irreparable losses because they could not get transportation facilities. And now, just at the moment when, for the first time in the history of this Nation, the railroads have acknowledged that they must have the assistance of the rivers, gentlemen come onto the floor of this House to defeat the measure which will provide that assistance.

Mr. Daniel S. Willard, the president of the Baltimore & Ohio Railroad, who is now chairman of the advisory commission of the Council of National Defense, is a railroad man that we might say, putting it mildly, has never before favored river transportation. But the moment Mr. Willard was put into a place of responsibility where he had to look at the question of transportation from the standpoint of a national necessity rather than from the standpoint of the interests of his own railroad, he comes to the men of the Mississippi River and asks them to call a conference, and offers to those men every assistance that he, with other railroad men, can give, in developing this river traffic to meet the present emergency.

Gentlemen who are speaking on the floor of this House in opposition to this bill are evidently not in touch with the last six weeks' history of the transportation project now under way on the Missouri and Mississippi Rivers, else they would not be here opposing the bill. And certainly when this crisis is now on, when the railroads shipping from the center of the continent have admitted their breakdown long ago, and when in these very days the Government has provided its own boats and barges for the carrying of coal to St. Paul to be delivered throughout the Northwest, after the railroad companies have announced that they can not be depended on to deliver that coal for this winter's use, when the barges are now being loaded and started up the river to deliver that coal, men should not come on the floor of this House and try to discredit this bill by talking about water hyacinths and artesian wells simply because they do not know what is going on in this country. [Applause.] It speaks very little for their up-to-dateness, to say the least. When we are facing the problem of transportation for the foundries of the Mississippi Valley country——

Mr. WALSH. Will the gentleman yield?

Mr. MEEKER. Not now. I will not yield to anybody.

When we are facing the problem now in our Mississippi Valley foundries, when this Government has asked those men in the iron industry to turn out materials for their warships, they reply to the Government, "If you will give us water transportation from St. Paul whereby we can bring the iron from the Mesaba Range we can do it," and the Government says it will. I do not know what a man could consider as an emergency measure greater than that. When the Government calls on men in the mid-Mississippi territory to use their lumber for the building of freight cars, and the men on the lower Mississippi in the lumber companies of the South say that their mills must close down unless they can get up-river transportation on barges, if that is not an emergency situation, what is? I will ask the opponents of this measure to show where they expect to lay one single new mile of trackage on which to carry the cars if they were constructed, and how they expect to relieve this congestion if they do not do the ordinarily sensible thing of going to the river for all the transportation that it can possibly carry?

Now, what has occurred? On the 6th and 7th of May, in response to a call that was sent out, 300 delegates, representing 35 cities, met in the city of St. Louis to take up the problem as to what could be done toward relieving the freight congestion existing in the valley and how the rivers of this Nation might be utilized.

The Secretary of War was represented there by Gen. William M. Black, Chief of Engineers. There grew out of that conference a specific request that went from the Secretary of War himself that these men along the river should put into the service every kind of barge and steamboat and craft, old and new, in order to relieve the congestion. After that conference was held a body of men came on to Washington and held a conference here about two weeks ago in which the representatives of the railroads and the representatives of river transportation for the first time ever in the transportation history of the United States went into a conference. The railroad men admitted that they were down and out and on the flat of their backs and helpless. When men come on the floor of this House now, probably never having heard of those things, and still discuss water hyacinths and artesian wells in the South they know nothing about what is going on.

Growing out of the conference here three weeks ago a committee was appointed, consisting of representatives of a number of Mississippi River cities and regions. These men have been in conference during the last week with the railroad transportation committee in the Council of National Defense. The committee consists of the following men: Mr. James E. Smith, of St. Louis, one of the best posted river transportation men in America; Mr. Walter S. Dickey, of Kansas City, who has loyally contributed out of his fortune for the development of it, and I would rather have the word of Walter S. Dickey, who is willing to put his money into a barge line from Kansas City to St. Louis, than the word of gentlemen who never rode the river; Mr. George E. Bartol, president of the Philadelphia Bourse; Mr. M. J. Saunders, of New Orleans; Mr. Joy Morton, of Chicago; and Gen. William M. Black, Chief of Engineers of the United States Army.

During the past week this body of men have been here working with Mr. Willard's committee; Mr. Willard's committee having confessed at last, after we men who have stood for river transportation have said that the railroads are fighting this thing—these men at last, not from the standpoint of railroad men but from the standpoint of transportation men taking in the whole problem of transporting the Nation's products—have come in and laid their cards on the top of the table, saying, "We have got to have relief from the river or we are swamped."

Why, God bless you, if we put every dollar of the $26,000,000 on the Mississippi River alone it would be a good investment now. The ridiculous statement of the gentleman from Illinois [Mr. MADDEN] to the effect that if this money were spent over-

night it would not add a dollar to the value of the waterways is too childish to warrant a reply.

A great deal has been said here as to why the rivers have not been used, why the companies have not used the transportation facilities thus offered. I would like to have somebody explain what would be the freight carriage of the Union Pacific Railroad if every third mile of it were out. Everybody knows that one sand bar in a river causes a depreciation in traffic.

Talk about not making this appropriation. Stop this river improvement now and you actually throw away every dollar you have put into it heretofore. We had just as well call a spade a spade. The gentlemen who are opposing this measure now have never yet answered that one question that has been put to them so frequently, as to what would be the effect on the freight if all the sand bars were taken away. They do not dare. They might fool some of the unsophisticated, but the ridicule of the transportation by river, holding it up to the country and saying that so many million dollars has brought so many thousand pounds of freight, may go for children, but it does not go with practical men. This thing has come to be regarded in some quarters as a sort of "pork fest." But we have got to do one of two things. We have got now, as never before, to develop our waterway transportation or abandon it forever. There has never been a time when the shortsightedness of this Nation as to how it should have treated its rivers a half century ago is so patent as now. Oh, it is easy to come in here and abuse the antipreparedness man and the pacifist and to say that because he opposed our building of ships and opposed this or that project three or four years ago we are now unprepared. But, gentlemen, we are learning a lesson at this moment of the congestion of freight transportation in this country which points back to 50 years of neglect such as no other nation has ever neglected its waterways.

Now, what is going on? Right at this moment the question is asked, as I said a moment ago, What are the cities doing to use water transportation facilities? If there is anything in God's world that would discourage the investment of money in river transportation lines, the annual gab fest that is held here against it certainly would drive money out of the business. Every 12 months business men are going to have to depend upon another attack upon a legitimate enterprise. I do not think the average sound-headed investor would want to bet upon Congress's good judgment that far. There is nothing that is holding back such investment in large sums more than this everlasting nonsensical claim that you can not make the Mississippi River and the Missouri River fit to carry boats.

Now, what has occurred? New Orleans has completed the most magnificent dock front of any city in this country, possibly. The building of the Panama Canal and the promise of business and the expectation of trade legitimately coming down from the Mississippi and her tributaries have made New Orleans the Chicago of the South, and it has resulted in the renovation and the rebuilding of that whole section of country.

Coming on up to Memphis. Before Memphis could really improve her river front as she should it was necessary for her to obtain by act of the legislature the right to condemn the property. That has been obtained, and Memphis is now preparing for municipal river front, dock equipment, and terminal facilities second to none in the world.

Come on up to St. Louis. In the belief that Congress in its deep-waterway talk in the past meant what it said, and that we were not going to be compelled every 12 months to go up against the old opposition of useless and senseless talk about hyacinth and artesian wells, and that Congress was getting down to business on the question of deep waterways, within the last three months we have taken over 10 miles of the St. Louis river front, with a double-track railway all the way down. We are planning to extend that double-track down to terminals which will connect with the belt line, encircling the entire city. A $285,000 loading and unloading equipment is now under construction, and $1,250,000 is to be spent in new units, when for the past 40 or 50 years men to get to the river have had to go by dray up and down. This was a part of our last municipal campaign.

Mr. SMALL. May I ask if this belt-line railroad which connects the water terminal with the railroads that serve the city of St. Louis is owned by the city of St. Louis?

Mr. MEEKER. Yes; the belt-line railway is owned by the city of St. Louis.

Mr. SMALL. And what is the proportion of completion of the municipal water-front terminal?

Mr. MEEKER. I can not tell exactly, but the first unit is probably three-fourths finished.

Mr. SMALL. That is near enough.

Mr. MEEKER. We know what Kansas City has done. Her docks are completed, an honest, fair, and square deal in anticipation that this Government is going to do its part, and forever silencing this continual clamor about hyacinth and wells.

We go on up the river the other way, and we find that Keokuk is already at work constructing her facilities. Davenport has her work completed. St. Paul and Minneapolis have theirs under construction. I want to say to you, gentlemen, that when you consider that in this hour you are trying to discourage the development of the enterprises along the Mississippi, you are striking the deadliest blow at the transportation facilities of the Mississippi Valley that you ever struck in your lives. [Applause.] You can not come in here and in the name of economy or anything else undertake to belittle waterways extending over 1,600 miles, by talking about some little corner place. There may be a few hyacinths in this bill. I do not know. There are very few bills that do not have a few hyacinths in them somewhere along the line; but I am talking to you about a different enterprise than hyacinths, and we the people of the Mississippi Valley serve notice on you right here and now that you are going to fix the Mississippi and the Missouri, and we do not intend to let the lake and the coast cities run us out of the game. [Applause.]

The CHAIRMAN (Mr. CONNELLY of Kansas). The time of the gentleman has expired.

Mr. MEEKER. I want 10 minutes more.

Mr. SMALL. I yield 10 minutes more to the gentleman.

Mr. MEEKER. Now let us see. Here is the Department of Agriculture, daily receiving complaints that the farmers throughout the country can not be accommodated in the shipping of their products to market. Every department of this Government which touches the commercial life of the Nation is feeling all the time a stronger and ever stronger protest against the shortage of cars and the congestion of freight. Not one man who has spoken against this bill has offered a single line of sensible suggestion as to how to reduce this difficulty in the Mississippi Valley. Men say they did not know that freight congestion was going on. I had a constituent in my office last Saturday who ordered goods out of New York City last November, and who paid for them months ago, but who has not yet seen them in St. Louis. When automobile firms are shipping automobiles from Detroit to San Francisco by express, everybody except some gentlemen on the floor of this House knows that there is a freight congestion. Suppose you build your 100,000 cars, where will you get your railroad tracks over which to run them? Your trackage is going down every day. The railroads are burdened and have been burdened into receiverships, more hundreds of miles than were ever heard of before in the history of this country, and you hear no announcement of any new railway building. Now, we come to this question: I want to say to the men of the Northwest States, up through the Dakotas and that part of the country, that if you do not know it, it is simply because you have not been keeping in close touch with conditions in your own communities. The railroads are practically serving notice that the only way to get fuel to the Northwest for this winter is by barge up the Mississippi River and from there out. This is not child's play that we are discussing here. This is not for the moment only. This is a problem that is going to touch and affect the fireside and the home of every man who lives in that great northwest stretch of territory from here to the Canadian line. Talk about an investment of $100,000,000! Gentlemen, I believe that before we are through with this river problem, some day, and probably through this experience that we are now undergoing, the people of this country are going to rise up and do what every other civilized nation on earth has done, make of its rivers the great arteries of transportation. [Applause.] That is our problem here; and for a man to say that the United States Government can not manage the Missouri River, or that this Government has not engineering power or money enough to manage the Mississippi River, is to acknowledge defeat at the hands of mother nature. I have a greater faith in my people than that.

The men of New York are awake to the situation in the Mississippi Valley, for just as we are ready now, and are forming the organizations of two companies, one of $2,000,000 capital to carry freight from St. Louis to New Orleans, and another of a million and a half dollars capital to carry freight from St. Louis to St. Paul and Minneapolis, the New York gentlemen having discovered that the very necessity of the situation would call out that capital, came in and suggested very kindly that they would like to provide the funds. Business men can see that if Congressmen can not. The New York bankers are ready to get in on that barge subscription, but the business men of the Mississippi Valley intend that we shall

keep that business out there rather than place it in the hands of gentlemen down East.

Now, gentlemen of the committee, you hear some little picayune opposition here and there to this bill. You will hear men in the next two or three hours giving you some more hyacinth talk, but I want to put you squarely against this practical question. If it is 46,000 tons or if it is 12,000,000 tons of transportation that can be carried on that river, every pound of that freight that is carried relieves the congestion of the railways, and it means just that much assistance in relieving our transportation congestion throughout the United States.

Furthermore, let us remember this when we are taking up the problem of transportation in the Mississippi Valley, we must consider the North and the South and the East and the West. We know that since the Civil War days the great lines of interest of the people have run toward the West. Until of late we all advertised western real estate, farm lands, and timber, and everything of that sort, and our continent has been cut across by transcontinental lines. But, gentlemen, the movement of industry to-morrow will be north and south in this country rather than east and west. There is a new South that is yet to be built up, and any man who has traveled in the South—and it has been my great privilege in the last 25 years to be there much of the time—any man who has cast his eye on the South knows that her great farming communities, her mines, her forests, all that she has yet undeveloped will make her some day the garden spot of the world. [Applause.] And the man who gets in line now with the movement for carrying freight up and down the great river rather than crosswise, as we have always been doing, will only be in line with the prophet who has a vision of the greater and larger day. I thank you. [Applause.]

MIAMI.

Mr. Chairman, in further extending my remarks, I desire to call the attention of the House to the effect the defeat of this bill will have on the city of Miami, Fla. The citizens there are now in the process of spending $575,000 in constructing a channel across the bay, a turning basin, and terminals. The railroads have spent about $300,000 in addition for the equipment of terminals. Thus far the Government has appropriated $240,000, and in this bill is asking for $160,000 additional for the completion of the Government's part of the agreement. Unless the $160,000 is appropriated that which has already been done will be practically a total loss. Who shall say that even in the stress of war we should not complete that work and thereby keep faith with Miami? Surely, where the local people are ready to put up two dollars for every one which the Government puts into a project, we should not fail them when it is our turn to pay the last bills which will complete and save all that has been done thus far.

And so, if we had the time to enumerate, we would discover that from the Gulf to the very upper reaches of our north and south rivers the citizens are turning as they have never done before to the rehabilitation of river terminal facilities.

WATER-RATE ADVANTAGES.

As to the advantages of water transportation facilities, I desire to call your attention to the following facts:

Of the 15 States that stand at the head of the list for value of manufactures, census of 1910, the first, second, fourth, sixth, eleventh, twelfth, and fifteenth have ocean ports.

The third, fifth, seventh, eighth, ninth, and thirteenth touch the Great Lakes.

The tenth and fourteenth touch navigable rivers.

Note that the first and second have both Lake and ocean ports, while the third, fifth, ninth, and thirteenth touch both the Lakes and navigable rivers.

1. New York.
2. Pennsylvania.
3. Illinois.
4. Massachusetts.
5. Ohio.
6. New Jersey.
7. Michigan.
8. Wisconsin.
9. Indiana.
10. Missouri.
11. California.
12. Connecticut.
13. Minnesota.
14. Kansas.
15. Maryland.

Of the 21 cities that had manufactures to the value of $100,000,000 or over, only one, Indianapolis, is not on navigable water.

1. New York.
2. Chicago.
3. Philadelphia.
4. St. Louis.
5. Cleveland.
6. Detroit.
7. Pittsburgh.
8. Boston.
9. Buffalo.
10. Milwaukee.
11. Newark.
12. Cincinnati.
13. Baltimore.
14. Minneapolis.
15. Kansas City, Kans. (Kansas City, Mo., No. 42).
16. San Francisco.
17. Jersey City.
18. Indianapolis.
19. Providence.
20. Rochester.
21. Louisville.

Of 28 cities having a population of 200,000 or over, Denver and Indianapolis are the only two not on navigable water.

Of 19 cities having 250,000 or over, none not on navigable waterways.

Of 50 cities having 100,000 or more in 1910, all but 12 are on navigable water.

The why of the foregoing is very plainly set out in an address delivered by Mr. P. W. Coyle, traffic commissioner of the St. Louis Business Men's League, before the Commercial Club of St. Louis, January 18, 1912. I ask you to note in particular what Mr. Coyle says in regard to the rate from New York to Kansas City, and the rate from New York to St. Paul:

MR. PRESIDENT AND GENTLEMEN: The first competitive freight rates of importance were those made by the New York Central Railroad between New York and Buffalo in competition with the Erie Canal. That those rates affected the rates on traffic at other points in the State is shown by the fact that in 1879 Mr. George R. Blanchard, than whom the country has never produced a greater traffic expert, then vice president of the Erie Railroad, was called before an investigating committee of the New York Legislature and gave the first testimony of which we have any record attempting to justify the maintenance of lower rates to terminal than to intermediate points. Apparently this was the first attempt on the part of the Government, State or National, to regulate the long and short haul features of rates. Mr. Blanchard justified to some extent the maintenance of the low rates between New York and Buffalo, without regard to his rates to intermediate points, on the ground of canal competition through its effect on the rates of the New York Central Railroad. It is plain, from the record of that investigation and the subsequent adjustment of the rates throughout the State, that the legislature and the railroads recognized that the intermediate territory should be protected by a more intimate relation between the through and the local rates, as the intermediate rates were reduced. Thus were the through rates established between New York and Buffalo on a basis of water rates, and the water rates reflected in the local rates throughout the State.

In the early days of these trunk lines the bulk of their westbound traffic was delivered to the Lake boats at Buffalo and Dunkirk, N. Y. Gradually, as the railroads were built into Chicago from the East, this freight was diverted to the rail lines west of Buffalo. In order to secure this thaffic, however, the railroads were obliged to meet the Lake competition, and thus were the rail rates established between Buffalo and Chicago, and the through rates fixed between New York and Chicago.

CONSTRUCTION OF OFFICIAL CLASSIFICATION RATE FABRIC.

Now, keeping these facts clearly in mind, and taking into account the construction of the great fabric of rates in the official classification territory, as I shall briefly explain, and which I consider the nearest approach to a scientific structure of rates ever made in this country, I believe I shall be able to show you that this structure of rates, covering practically all of the territory between the Mississippi River and the Atlantic Ocean north of the Ohio and the Potomac Rivers to the Canadian border, has not only for its foundation the water rates between New York and Chicago, but that those rates are reflected in all the rates throughout that vast territory.

In 1876, after furious rate wars between the Baltimore & Ohio, on the one hand, and the railroads working through the northern gateways, such as Buffalo, etc., on the other, all fighting for supremacy in the West and the Northwest, an ingenious rate clerk named McGraham, in the office of the Pennsylvania Railroad, evolved a scheme of rate making which was generally adopted about 1880, and is in effect still in the territory I have described. In brief, that scheme is this: The New York-Chicago rate constitutes a basis upon which all other rates are made in percentages according to their relative distances from New York. Thus, assuming Chicago to be nine hundred and odd miles from New York a point or group of points 600 miles inland takes about 66 per cent of the Chicago rate, whatever that may be, and a point or group of points one thousand and odd miles from New York, say, St. Louis and points within this group, takes 117 per cent of the Chicago rate. It must be clear, therefore, that whatever factors are taken into account in making the New York-Chicago rate must be reflected in all other rates in the territory described.

FINDING OF INTERSTATE COMMERCE COMMISSION SUPPORTING THIS THEORY.

I would not, however, have you accept my assumption alone that the water rate is a potent factor in making that unit rate, for I believe I am fully supported by a recent decision of the Interstate Commerce Commission, as I shall show. The rate from New York to St. Paul is but 40 cents higher than the Chicago rate. The rate from New York to Kansas City is 80 cents higher than the Chicago rate. The distance from New York to St. Paul is 1,322 miles. The distance from New York to Kansas City is 1,335 miles, or but 13 miles or 1 per cent greater than to St. Paul, while the rate, as you will note, is 40 cents more, or 38 per cent greater than to St. Paul. Kansas City, St. Joseph, and Omaha recently complained to the Interstate Commerce Commission of this discrimination, and prayed for the same rates as to St. Paul. The commission declined to consider their complaint on the ground of unreasonable discrimination, holding that the rates from New York to St. Paul are under the influence of water rates, although St. Paul is 160 miles inland from Duluth and the rate is practically on the mileage scale above the New York-Chicago unit.

EFFECT OF WATER COMPETITION ON WICHITA RATES.

Just in passing, and with St. Paul in mind, fancy the conditions which might prevail at Wichita and other interior towns in Kansas, practically the same distance inland from Kansas City that St. Paul is from Duluth, if the waterways between New York and Kansas City were fully developed and ample modern facilities afloat. Look at the map!

RESULT OF WATER COMPETITION IN BUILDING UP THE COMMERCE OF OFFICIAL CLASSIFICATION TERRITORY.

Attribute it to whatever cause you may, that section of country east of the Mississippi described as official classification territory has more miles of railroad, more miles of double track, a greater density of traffic per mile of railroad, more inhabitants per square miles, more capital employed in manufacture and commerce, and more wealth per capita than any other traffic subdivision in this country. I say you may attribute this generally remarkable prosperous condition, which has been developed practically within the past 60 years, to whatever cause

you will, you can not get away from the fact that water competition is reflected to a greater or less degree in every rail rate in that territory and has been a potent factor in contributing to this result.

WATER COMPETITION POTENTIAL AND ACTUAL.

Water competition is potential or actual, just to the degree that facilities and methods of handling the traffic are kept apace with the facilities and methods employed by the railroads. The competition of the Erie Canal, because of a lack of such facilities, may be said to-day to be merely potential, while that of the Great Lakes is actual, because harbors are amply developed and protected and modern facilities and methods are employed in conducting transportation.

CONDITIONS ON THE MISSISSIPPI.

What are the conditions on the Mississippi? In the reach between St. Louis and St. Paul the competition may be considered actual to some degree from the fact that we have regular through service, although the facilities and methods are antiquated. Between St. Louis and New Orleans for the past 15 or 20 years it has been merely potential, because, while the right of way is there, we do not use it.

To illustrate the point I wish to make: To-day the rail rate from St. Louis to St. Paul is 63 cents. The rail rate from St. Louis to New Orleans is 90 cents. Something like 20 years ago they were the same to both points—75 cents. Since then, you will observe, St. Paul has been reduced and New Orleans has been advanced.

I desire to quote further from the address of Mr. Coyle, wherein he quotes from an address of Mr. J. S. Powell, president of the Southwestern Shippers' Association, before the Interstate Commerce Commission March 18, 1910, and to follow the quotation from Mr. Powell with the additional observations of Mr. Coyle:

"The southwestern country has been prosperous, but that is due entirely to the fact incident to a good country. There probably is no richer country or one blessed with more abundant natural resources than the country embraced in the States of Oklahoma, Texas, Kansas, Colorado, and New Mexico. The influx of emigrants and the rapid advances in realty values, the extraordinary amounts of money which have been brought into this country to develop it, have tended to mark an era of great prosperity. And these people have all prospered in spite of the fact that they were laboring under very grave natural disadvantages. This is true of all countries. * * * But this southwestern country is now approaching this condition: They feel that the natural development of the country is rapidly attaining its end; that very soon we will be confronted with a proposition that we have arrived at a maximum condition of development, with the necessity of proceeding on a much more careful and conservative basis for the operation of our business than has heretofore been necessary to do.

"We would not expect any concessions in our favor if we were inland beyond other points nearer seaboard territory, but we discover in our investigations that we are contiguous to deep-water points to our south that have not been fully utilized. The Government has spent millions of dollars in developing these ports, evidently with the desire that we should utilize them. So in Oklahoma City last winter there came together representatives from 10 or 12 different cities. These cities were following and carrying out the desires of the communities in which their representatives lived, and they organized this association for the purpose of endeavoring to seek some redress through the Gulf of Mexico gateways."

PHYSICAL CONDITION OF GALVESTON HARBOR.

Now, let us see what the conditions are at the principal Gulf of Mexico port affecting the Southwest, as suggested by Mr. Powell. From the Galveston Chamber of Commerce we learn that "the natural conditions at Galveston a little over 10 years ago by the obstruction to navigation were presented by two bars immediately outside of the harbor. Over the outer one of these bars there was approximately 12 feet of water, and over the inner one approximately 9 feet of water at mean low tide. At that point the majority of the freight had to be lightered—the ocean-going boats anchoring outside of the harbor and the freight being transferred to lighters and being hauled to the docks within the city limits. The development for deep water at Galveston began a little over 10 years ago and has involved an expenditure by the Federal Government of something like $11,000,000. At the present time, according to the last report of the United States engineer, the maximum depth in that channel is 33 feet and minimum 31½ feet. The depth immediately in front of the wharves on Galveston Island is approximately 30 to 31 feet.

"Over at Texas City, on the mainland side, are the terminal facilities of the Texas City Terminal Co. At the present time they consist of one completed pier, but they are now progressing on two additional piers. All of these facilities are available for ocean-going boats."

ESTABLISHMENT OF COAST SERVICE BY TEXAS STEAMSHIP CO.

Recognizing this situation, in 1908 the Texas Steamship Co., operating one boat between New York and Texas City, practically Galveston Harbor, established an open rate of 25 cents per hundred against the normal rate of 85 cents, New York to Galveston, on practically all commodities except on coarse iron and steel articles, which were carried at from 5 to 12 cents per hundred. Early in 1909 the Mallory and Morgan Lines met these rates, thus reducing the through rates from New York to Texas common points, which means practically two-thirds of the State of Texas, from $1.72 first class to approximately $1.20, as against our rate of $1.47 from St. Louis.

While there has been a slight advance in the coastwise rates, the conditions in general are not materially changed.

REDUCTION OF RATES BY WATER COMPETITION.

While water competition inevitably reduces rail rates, it must not be assumed that the chief object of the establishment of modern boat service on the Mississippi River to New Orleans and Galveston is to reduce rates. New York reaches the Southwest by way of Galveston with at least six sailings a week, making the run from port to port in six days, and this is the result:

TONNAGE MOVED BY COAST SERVICE BETWEEN NEW YORK AND GALVESTON.

A recent report of the movement of vessels in the coastwise trade for one year shows total arrivals at Galveston via the Mallory Line, 100 ships; via the Morgan Line, 173 ships; via the Texas Steamship Co., 33 ships. Prior to the establishment of the Texas City Steamship Co. the Mallory Line operated regularly two ships a week and the Morgan Line operated regularly three ships a week. During the year 1910 this statement shows no increase in the Mallory ships over their regular schedule, but they have put on steamers which are considerably larger than the ones they had previously been using, so that their tonnage is considerably greater.

According to an estimate made by the Chamber of Commerce of Galveston, there was an increase in that business, due to the rates which had been established because of the Texas City competition, of approximately 150,000 tons for the year 1910. The inbound cargoes consist largely of manufactured products, such as canned goods, of dry goods manufactured on the Atlantic coast, boots and shoes, hats, machinery, and iron articles manufactured in the Pittsburgh district.

CONGESTION OF RAIL TRAFFIC.

Another boom in business such as we had a few years ago would, in my estimation, again congest railroad traffic in short order, and the cities lacking efficient water transportation service would suffer most in such an emergency.

The last report of the American Railway Association, embracing practically all of the railroads of the country, shows the total number of idle freight cars as 88,646. Now, that sounds big, but when we consider that the total number of cars owned by members of that association on November 1, 1911, was 2,341,000, and that about 7 per cent of this surplus of idle cars consists of crippies, it will be found that the available surplus amounts to only about 3½ per cent of the total equipment, or practically an average of about one car for every station, big and little, in the United States. Furthermore, it is a fact that there are railroads otherwise amply equipped which have not sufficient motive power to handle their present traffic. And during the past year Mr. Finley, president of the Southern Railroad, in an address delivered in this city, showed clearly the necessity for double tracks in the South. Again, the freight cars of this country are not pooled, but each railroad may at its option call in its surplus from foreign lines and restrict the use to their own rails, so that the circulation of freight cars may be said to resemble the currency of the country

The railroad manager, scenting a boom in business, calls in his cars and holds them to protect his business, just as the banker, scenting a panic, calls in his surplus to protect his interests, thus limiting the supply when general circulation is most needed. Hence, how easily this surplus of empty cars may be turned to a general shortage and the movement of traffic by rail restricted upon the first symptoms of a general revival of business. Therefore, when we consider also that New York forwards by water an equivalent of two train loads of merchandise per day through Galveston and an average of one train load a day to the Pacific coast across the Isthmus of Panama and the Peninsula of Mexico, how important it is that we should be prepared to meet this possibly restricted rail service and the competition of New York with ample modern water service, and not wait until such a congestion of traffic as prevailed in 1907 is again upon us.

IMPROVEMENT OF MISSISSIPPI RIVER SERVICE NOT ANTAGONISTIC TO RAILROADS.

I do not share the belief of those who hold that the railroads are antagonistic to the development of the Mississippi River traffic. The progressive railroad management to-day recognizes the importance of the economic development of all the resources of the territory through which it operates, and welcomes any facilities which tend to cheapen production to the end that the railroad may increase its revenue by the transportation of a greater amount of the finished products and participate in the general prosperity incident to such development. Modern boat service on the Mississippi is a means to that end. Deprive Buffalo, Cleveland, or Pittsburgh of water transportation in the movement of their raw materials, and consider the cost to the railroads by the shrinkage of their revenue due to the contraction of the output of finished products which would inevitably follow such a condition.

POSSIBILITIES OF DEVELOPMENT IN THE MISSISSIPPI VALLEY.

And where are the possibilities for development greater than in the Mississippi Valley, with its vast mines of raw material, its extensive and diversified forest products, and a soil and climate productive of everything from the hardy cereals of the North to the delicate tropical fruits of the South.

No river in the world flows through a country so prolific in diversified commodities for the use and comfort of mankind as the Mississippi; and the commerce of this valley should be as extensive and as prosperous as that of the territory which I described in the beginning, and I believe will be when this river is amply improved and utilized as are the water courses of the North.

Supporting the central thought which I have endeavored to follow, that water rates affect rail rates, and that rail traffic is intensified thereby, and that it is therefore equally as important to the railroads as to the shippers that all water courses be developed and utilized to the fullest extent, I am pleased to find that a gentleman eminently qualified to forecast traffic conditions has expressed similar views.

Mr. F. B. Bush, president of the Missouri Pacific, Iron Mountain, and the Denver & Rio Grande, in an interview published in the Republic, this city, on the ninth instant, regarding the effect of the opening of the Panama Canal upon the railway situation, said: "While by lower transportation rates than now prevail, the canal may be instrumental in reducing the volume of through business now carried by the railroads to and from the Pacific coast, I think it likely that the effect of these lower canal rates will act as an impetus in building up the trade of the Pacific coast and the interior country for long distances east thereof. The canal will also tend to increase trade between the United States and the Orient, and the west coast of Central and South America. These, in my opinion, will in time intensify the traffic of the railroads operating within a thousand miles of the Pacific and Atlantic coasts to a greater degree than will be the loss sustained by the operation of the canal."

PACIFIC COAST AND SOUTH AMERICAN TRAFFIC.

We have no water service to the Pacific coast. For a short time, up to two months ago, we had it. The California & Atlantic Steamship Co. furnished the only service from New Orleans, but withdrew its boats, and I understand will not restore the service until assured of better patronage. That company still operates boats between New York and the Pacific coast by way of the Panama Railroad. The American-Hawaiian Steamship Co. furnishes the Atlantic Coast States with similar service via the Tehuantepec & National Railroad across the peninsula of Mexico.

As a coffee-roasting center St. Louis is second only to New York, and in the distribution of roasted and green coffee it stands first in this country.

The total imports of coffee for the year 1910 through New York and New Orleans were 5,781,907 bags. Total imports from Brazil through New York and New Orleans were practically 4,500,000 bags, of which St. Louis received through the port of New Orleans about 400,000 bags. Reduced to tons, this shows that there is distributed through the port of New Orleans for consumption in the Mississippi Valley and the West about 130,000 tons of coffee. Of this St. Louis consumes and distributes about 30,000 tons of Brazilian coffees alone.

The vessels bringing this coffee to New Orleans for the Mississippi Valley are now obliged to go to New York for reloading, and our manufacturers and jobbers if they would develop their trade in Brazil or the Argentine Republic must do so through the port of New York. The development of trade in the countries on the west coast of South America is of equal importance to this market. Are we to sit idly by and contribute nothing to the development of traffic which will justify the operation of regular steamship service from New Orleans to South America and the Pacific coast, or shall we surrender that trade to New York and Europe?

INVESTMENT IN PANAMA CANAL ENTERPRISE.

It is officially estimated that the Panama Canal will cost $375,000,000. This means that, based on the present population of this country, each individual would contribute on an average about $4.50, or each head of a family about $22.50. St. Louis will therefore have an interest in that enterprise of approximately $2,800,000. Shall we use that right of way, in which we have this interest, for the upbuilding of the commerce of this city or leave it to our competitors?

SOME INTERESTING FACTS.

I introduce at this point just a few illustrations to show whether even potential river transportation facilities affect railroad rates.

For ready reference and as a matter of information I direct attention to the following statement, which is a table of comparative freight rates between St. Louis and points having water competition and inland points to which water competition does not become a controlling factor.

To illustrate, the first-class rate from St. Louis to St. Paul, Minn., is 63 cents, all rail. The first-class rate by water from St. Louis to St. Paul is 50 cents, being an insured rate, and the first-class rate from St. Louis to Oklahoma City, Okla., is $1.30, the distance from St. Louis to Oklahoma City being 30 miles shorter than the rail distance from St. Louis to St. Paul. Notwithstanding the shorter distance to Oklahoma City the first-class rail rate is more than twice as great as the first-class all-rail rate from St. Louis to St. Paul, and the fifth-class rate is three times as great to Oklahoma City as the rate from St. Louis to St. Paul.

Freight rates showing comparative basis between points having water competition and inland points which do not obtain the benefit of water rates.

As a matter of information and in explanation of the class rate adjustment, I wish to state that first class ordinarily includes articles of considerable value, such as dry goods, boots and shoes, hats and caps, clothing, drugs, and so forth. The second class usually includes hardware, spices, agricultural implements of certain description. The third-class rate includes wire cloth, baking powder, dried fruit, roofing paper. The fourth-class rate includes iron castings, and iron and steel articles in general, soap, canned goods, and so forth. The fifth-class rate, under the western classification, does not include any articles in less than carload quantities, applying only on carload shipments. There are some commodities rated lower than fifth class, but the larger percentage of the carload ratings are at fifth class, and therefore only the rate for that class is shown.

The rate on flour from New Orleans to Amite, La., a distance of 68 miles, is 34 cents per barrel; the rate on flour from New Orleans to Memphis, Tenn., a distance of 396 miles, is 25 cents per barrel. Needless to say Amite is not on a waterway.

The following is a memorandum showing rates for the first six classes from St. Louis to New Orleans and rates from Philadelphia, New York, and Boston to New Orleans by rail, rail-and-water, and all-water routes. The rail-and-water rates apply through South Atlantic ports. There is a difference in the rates applicable from Boston by water, some of the class rates applying only on certain commodities. This statement also shows the first five class rates from St. Louis to Galveston and the rail rate, as well as water rate, from New York, Philadelphia, and Boston to Galveston. The class rates are shown instead of rates on specific commodities or articles, because the class rates are generally accepted as the basis and they more clearly show the relationship existing as between competing communities to a given point.

[1] Standard rates from Boston. [2] Certain commodities excluded.

Following the observations I have just made I wish to insert a letter from Mr. P. W. Coyle, traffic commissioner of the St. Louis Chamber of Commerce, to Mr. James E. Smith, president of the Mississippi Valley Waterways Association.

ST. LOUIS CHAMBER OF COMMERCE,
St. Louis, June 2, 1917.

Mr. JAMES E. SMITH,
President Mississippi Waterways Association,
St. Louis, Mo.

DEAR MR. SMITH: Referring to conversation this morning, I am inclosing copy of a little talk I made to the Commercial Club in 1912 which, as I suggested, may possibly give you an idea of the general situation with respect to water transportation as affecting St. Louis and the Mississippi Valley.

You will recall that when we were before the Rivers and Harbors Committee of Congress, during the the "14 feet through the valley" campaign, that Mr. Burton asked us the pertinent question, "Why do you not use the water you have?" Since that time I have been delving into the subject with a view to being able to intelligently answer this question.

I first found that the boats in use were antiquated and the methods employed in securing and handling freight were equally so; or, in other words, that the boat lines were trying to meet up-to-date rail competition with these antiquated boats and methods. Since then we have succeeded in getting, in one instance, modern boats and two or three of the boat lines have adopted modern methods of securing and handling freight traffic, the result of which is that our tonnage has been increased. This increase, however, has been to a larger extent in the movement of higher class merchandise than in the basic or raw material commodities, due to the fact that the improved facilities offered are for the handling of higher class merchandise. To illustrate, the Inland Navigation Co., operating between St. Louis and New Orleans a steel hull, self-propelling barge, with all the modern improvements, capable of carrying 1,600 tons, giving to the shippers insured bills of lading and insured rates at 80 per cent of the railway rate; the Streckfus Steamboat Co., operating five boats, carrying both freight and passengers, between St. Louis and St. Paul and intermediate points, have established five uptown stations in St. Louis from which shipments are delivered to the boat, and from which the boat rate, which is also 80 per cent of the rail rate will apply. Thus the movement of merchandise by water has been stimulated in the last three years.

What we are particularly in need of, however, is transportation facilities for the movement of coal, ore, lumber, etc., for which just at the present time, the carriers are unable to furnish equipment, and which under normal conditions the carriers would be more than glad, I am sure, to be relieved of. I feel sure of this from the fact that when I was actively engaged in the traffic affairs of the carriers, it was the general policy to handle these basic commodities on a very low margin, and sometimes without any marginal profit, in order to stimulate the output of the finished product on which the carriers might get higher and more profitable rates.

The importance of this river service as a rate regulator is illustrated in these facts. Twenty-five years ago the first-class rate, St. Louis to St. Paul and St. Louis to New Orleans, was 75 cents. We have had continuous boat service between St. Louis and St. Paul within that time. With the exception of the past three years we have had no regular service between St. Louis and New Orleans. To-day the first-class rate St. Louis to St. Paul is 63 cents, the first-class rate St. Louis to New Orleans is 90 cents, and all other rates on the same relative basis.

In view of the fact that New York and the other Atlantic port cities can reach Texas by a combination of water-and-rail rates through the port of Galveston much lower than our all-rail rates to the same points, and the further fact that the combination of water-and-rail rates through Galveston are not under the control of the Interstate Commerce Commission while our all-rail rates are, New York and the other eastern cities are putting into Texas and the Southwest substantially twenty-five hundred or three thousand tons of merchandise daily through the port of Galveston. Obviously, therefore, to protect the commerce of this city we must have water transportation to Galveston, so that we may take advantage of the low State rates of Texas in order to meet this competition of eastern cities.

With the completion of our municipal dock we will be in splendid position to interchange traffic between boat-and-rail lines, and in that manner enable the industries on private tracks in St. Louis to take advantage of water transportation facilities. We have of all classes practically 900 such industries, approximately 500 of these would use these facilities to a greater or less extent. In any event, I am well satisfied that with modern, up-to-date facilities, with frequently salings say not less than once a week between St. Louis and New Orleans, a traffic could be developed of from fifteen hundred to two thousand tons weekly.

From the conversation we had this morning with Mr. Kavanaugh, and what I am sure you know of the present conditions, we may be safe in assuming that there will be ample tonnage for a barge line between St. Louis and St. Paul.

In conclusion let me refer you to page 12 of the pamphlet containing my talk to the Commercial Club, in which I attempted to outline the general aspect of water transportation. My view then, of course, was along strictly commercial lines, but as I view it to-day, in the light of the present crisis. I am forced to the conclusion that the development of transportation facilities on the Mississippi River is a national question. Obviously the Panama Canal was constructed as a transportation facility for the development of commerce of the entire Nation, which commerce to-day must be utilized in support of the Government in the conduct of war. Its immediate effect was the freer interchange of traffic between the Atlantic and Pacific, but we are overlooking not only our opportunity for the development of commerce in the Mississippi Valley, but one of the essential elements of national support, when we fail to develop transportation facilities on the Mississippi River and its tributaries, so that we may have freer intercourse between the producing points in this most prolific valley in the world, and the consuming districts on our coasts from Maine to Alaska.

It is not beyond the possibilities of war that our Navy might seek shelter on the Mississippi, or that New Orleans might become an important base point or be besieged. In any such emergency the trend of traffic would be changed from East to West to North and South, immediately overtaxing the capacities of the railroads. A well-equipped barge line on the Mississippi River in such circumstances would be an element of national strength of inestimable value.

Yours, very truly,

P. W. COYLE,
Traffic Commissioner.

As an evidence of the change of attitude on the part of men who have in the past been either ignoring or opposing our river transportation projects, I insert here a telegram from Mr. F. C. Schwedtman, of the National City Bank, New York, to Mr. Clarence Howard, president of the Commonwealth Steel Co., of St. Louis. I insert also the telegraphic reply of the Commonwealth Steel Co. and the letter which this telegram elicited from the traffic commissioner of the St. Louis Chamber of Commerce:

NEW YORK, *June 1, 1917.*

CLARENCE H. HOWARD,
President Commonwealth Steel Co., St. Louis:

The subject of water transportation to aid national shipping facilities is at present under special consideration in Washington. Report must be made to President Monday morning. Can you give your views covering this subject, especially regarding the Mississippi River and the cities of the Mississippi Valley in condensed form by wire to Elliott S. Norton, Secretary's Office, Department of Commerce, Washington? You will be of material service to the Nation.

F. C. SCHWEDTMAN.

ST. LOUIS, *June 1, 1917.*

F. C. SCHWEDTMAN,
Care National City Bank, New York City, N. Y.:

In Mr. Howard's absence have referred your telegram on subject of water transportation to St. Louis Chamber of Commerce, who are actively interested in this matter.

COMMONWEALTH STEEL CO.

ST. LOUIS CHAMBER OF COMMERCE,
St. Louis, June 2, 1917.

Mr. ELLIOT S. NORTON,
Department of Commerce, Washington, D. C.

MY DEAR SIR: In response to a telegram from Mr. F. C. Schwedtman, of New York, in which he asked us to give our views covering the subject of water transportation on the Mississippi River to aid our national shipping facilities under the present emergency, we are writing you this.

Efforts are now being made through the assistance of the Government to put additional boats on the Mississippi River, so that the present car shortage may be relieved to as great an extent as possible.

There is a serious shortage of coal in the Northwest, which we are called upon to relieve, and we will start a fleet of six Government barges loaded with Illinois coal for St. Paul within the next few days. This one tow of barges will carry 100 carloads of coal and will release that number of cars for the handling of other commodities. These barges will bring back Minnesota iron ore for St. Louis furnaces, which movement will release another hundred cars from this service. As the round trip can be made in two weeks 400 cars can be released per month by the use of this one small fleet of barges upon the upper Mississippi River, enabling this large number of cars to be used for the handling of other products.

We expect to continue this movement for several months, but more boats are needed for this important service and many more could be used for the transportation of other products.

The increased use of the Mississippi River at this time would largely solve the problem of relieving the serious shortage of railway equipment in the Central West. The situation is, indeed, alarming even now, and when the great crop movement begins a few months later our whole country, and indeed the greater part of Europe, will undoubtedly suffer because of the shortage of transportation facilities in this the great food-producing area of our country. Surely anything that can be done to relieve this threatened danger should be done as promptly as possible.

Our Government is now building hundreds of vessels to carry food, munitions, and supplies of all kinds to our allies across the sea, and this action is being commended by all patriotic citizens. Practically all of the food and many of the other products to be carried on these vessels must be furnished in the Mississippi Valley. It will be just as necessary to get this tonnage to these vessels as it will be to transport it upon the ocean, and the Mississippi River is the natural highway and outlet for the movement of this enormous tonnage.

There is therefore no good reason why the Government should not furnish the means for this necessary transportation, at least during this great emergency. Both movements are equally important, in fact, such coordination and cooperation is necessary in order to secure the desired results.

Yours, very truly, ST. LOUIS CHAMBER OF COMMERCE.

I next insert two telegrams which are self-explanatory, the one from myself to the Hon. Henry W. Kiel, mayor of the city of St. Louis, and the second his reply to me, this reply having been received just this evening:

JUNE 8, 1917.

Hon. HENRY W. KIEL,
Mayor City of St. Louis, Mo.:

Wire me outline of all steps taken by St. Louis to utilize the Mississippi for transportation purposes.

JACOB E. MEEKER.

ST. LOUIS, MO., *June 11, 1917.*

Hon. JACOB E. MEEKER,
Washington, D. C.:

Replying to your telegram 8th, St. Louis River front 20 miles long, one-half privately owned, one-half publicly owned. For many years St. Louis has followed uniform policy of not permitting private usurpation of public 10 miles of front by long-term franchises, but has renewed expiring franchises and granted new rights by revocable permits, in order that river terminals might be established when required. Remaining 10 miles privately owned offer private capital ample room for unrestricted developments. City owns and operates a river-front railroad extending 8 miles south from north city limits. Has just acquired a 7-mile extension making total length 15 miles of river-front railway. Plans and estimates completed and next bond issue will include funds for further extension of city railroad along entire 20 miles and a partial belt line, making total length 25 miles. This river front and belt railroad will connect with all railroads and all docks and wharves. Its use will be permitted by all railroads and boat lines. To expedite interchange of river traffic, by special concession, city has enabled marine railway and docks for boat construction and repair to continue in business. This will accommodate handling out of water, nine 300-foot barges or steamboats simultaneously. City has acquired for public use former car-transfer incline to enable freight cars to be switched alongside and level with barges at all stages. To promote interchange of rail-river freight, city has built and equipped and provided for free use of boat lines a landing dock and warehouse 500 feet long, served by tracks and paved streets. City has appropriated funds, let contract for, and has under construction for com-

pletion during coming low-water season modern concrete docks and warehouses 1,000 feet long with railroad tracks and all modern elevators, cranes, ganaries, inclined conveyors, and other devices for mechanical freight handling. City maintains 2 miles of paved river front for use of present boat lines at nominal license costs. Riverfront situation has been studied exhaustively and outline of future use of entire front has been worked out. Next bond issue will include necessary sums for furthe development at city expense of such river and rail terminals, docks, wharves, warehouses, and mechanical equipment as will take care of all river business. Present facilities will accommodate largely increased tonnage and city stands ready to develop its plans for additional facilities as fast as required. Many private industries and grain elevators now located and equipped to take advantage of river transportation facilities.

HENRY W. KIEL.

In closing I wish to say that it has been plainly brought out by gentlemen who are acquainted with the southern rivers that even the much-ridiculed hyacinth item in the bill is essential if some of the best waterways of the South are to be kept open for transportation purposes.

The noisy opponents of this measure have failed absolutely to bring in a valid bill of particulars against it. If ever in the history of river and harbor legislation there was just cause for making appropriations to make usable the streams and harbors of our country that time is now.

Rapidly are the crops of the Mississippi Valley ripening for the harvest. Transportation facilities must be provided. Already are the cities of the Northwest apprehensive as to their fuel supply for the oncoming winter. The mines of the Northwest can no longer send their product by rail to the furnaces of St. Louis and vicinity. The lumber shippers of the South know not what to do in their effort to put their products at the doors of the manufacturers. Everywhere up and down this valley, which is within itself a vast empire, is rail freight congestion bordering almost upon freight paralysis. The railroad operators are doing everything within human power to relieve this congestion, but such a thing is absolutely impossible in the present crisis. The people along the rivers—farmers, merchants, manufacturers, and all—know better than anyone else knows that we have waited too long already in the matter of actually providing adequate river facilities. The railroad advisers of the Council of National Defense, speaking for the Nation at large, have said that this work must go on, and surely they would not advise our entering upon this new activity and in addition pledge their most loyal cooperation and support unless they were convinced beyond the shadow of a doubt that there is no other relief in sight for the railroads and the Nation than the turning to these long misused and nationally abused natural lines of transportation.

The cities along the river are swinging into line; they had come to believe that the time of congressional dallying with this question had forever passed. It is now up to Congress to continue to play fair with these communities, and furthermore, it is now up to Congress to see to it that a transportation congestion, which may easily become a national calamity, shall if possible be avoided. And the only way out is by the way of our rivers.

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had further insisted upon its amendments to the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes, disagreed to by the House of Representatives, had agreed to the further conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. MARTIN, Mr. UNDERWOOD, and Mr. WARREN as the conferees on the part of the Senate.

RIVER AND HARBOR APPROPRIATION BILL.

The committee resumed its session.

Mr. SWITZER. Mr. Chairman, I yield 15 minutes to the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE of Pennsylvania. Mr. Chairman, I expect to support this river and harbor bill because I believe it a proper bill to pass at this time. I believe the exigencies of the country warrant the passage of it. I am not in sympathy with those members of my own party, some of whom have spoken here, who believe that political capital can be made out of opposition to this bill. I am sorry to differ from them on this question. I am inclined to think the passage of this bill will be just what it is said the President and the Secretary of War believe with respect to the bill—that it will be an important adjunct to the speedy prosecution of the war. I shall support the bill not only because it will tend to promote commerce, which ought not to be checked in time of war, but because the improvements provided for are important and perhaps an absolutely necessary aid to the military forces in the prosecution of the war. They will certainly help in the distribution of foodstuffs.

Some gentlemen seeking to make political capital have made speeches in opposition to this bill. I do not accuse my distinguished and eloquent friend from Illinois [Mr. MADDEN] of attempting to make political capital by opposition to the bill. His speech was too scattering to be effective as a political document in any campaign, and it lacked that force and fire which is ordinarily characteristic of the gentleman from Illinois.

During the discussion the gentleman from Illinois, who has announced that a certain portion of my remarks interjected into his speech will be stricken therefrom, because he thought it improper to insert some truths in his speech, has seen fit to become a reformer upon river and harbor topics. But he has become a reformer at the eleventh hour. I do not put him in the same class with my vigorous and energetic friend from Wisconsin [Mr. FREAR], who has made something of a reputation opposing river and harbor bills, but I put him in that class which at this time thinks perhaps it may attain public applause if it strikes when the opportunity is ripe for attracting public attention.

I would not accuse my friend from Wisconsin of entertaining any such purpose, but humbly and respectfully lay the suggestion at the door of the gentleman from Illinois, who, as I observed before, is going to correct his remarks by striking out of them that portion of mine which was helpful and pertinent to what he said.

Now, when I call him a reformer I hope it will not be stricken from the RECORD, because one may not become a reformer until after he has done something to reform for. [Laughter and applause.] When a man has led a hilarious life—and of course the gentleman from Wisconsin and the gentleman from Illinois are not to be placed in that category—the time for reformation comes when the hair is silver and the respect of the public is courted.

When I came into this House in 1907, or thereabouts, I was not altogether a reformer, because I came here upon a campaign which stood for the improvement of the waterways in my section of the country that had long been neglected, and I have consistently stood for the improvement of these waterways from that time to this, with more or less success. I found the distinguished gentleman from Illinois here before me on a similar mission. His mission was to improve the waterways of the Middle West, and, moreover, he had a scheme. It has been charged by him to-day, in effect, that I had a scheme, so it is fair to recall that when I came here he had a scheme. Whether his scheme has been put through or not I shall leave it to him to say in his own time, in such remarks of his as he may fix up to suit his own convenience, without interruption from me; but his scheme, when I came here in 1907, the scheme of our eleventh-hour reformer to-day, was to put through a little appropriation of $3,000,000 for connecting up the waters of the city of Chicago with the waters of the Mississippi River, and in the course of the debate the gentleman from Illinois [Mr. MADDEN] waxed eloquent upon the value of waterways, not for the destruction of the railroads of the country—oh, no—but for the leveling of freight rates and for the proper distribution of the food supply of the country, mostly, I gather, from his speech at the time, through the porthole of Chicago. You see men have axes to grind even in Congress, and while they may not have stocks and bonds in corporations that they malign upon the floor, they still may have pet measures they would like to get through, and having gotten through, sometimes they forget to help others to get theirs through. Having "got theirs" they now conclude it is time to reform.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Oh, no; not now; because I might have to cut it out of my remarks. No; if I did yield the gentleman might ask to have my words taken down.

Mr. MADDEN. But I did yield to the gentleman.

Mr. MOORE of Pennsylvania. I would yield to the gentleman if he promised me not to cut out what was said.

Mr. MADDEN. I did yield to the gentleman.

Mr. MOORE of Pennsylvania. Then I yield to the gentleman.

Mr. MADDEN. I was more courteous to him than he was to me.

Mr. MOORE of Pennsylvania. I am going to be courteous, because the gentleman and I have been friends and will continue to be.

Mr. MADDEN. The gentleman says that I had a scheme.

Mr. MOORE of Pennsylvania. Yes; I am going to tell about the scheme in a minute.

Mr. MADDEN. I want to state to the gentleman that we are building that scheme that he talks about out of the treasury of the State of Illinois.

Mr. MOORE of Pennsylvania. But at the time of which I speak the gentleman wanted $3,000,000 plus about $27,000,000 out of the Treasury of the United States.

Mr. MADDEN. Not one dollar ever came from the Treasury of the United States.

Mr. MOORE of Pennsylvania. But that was not the fault of the gentleman. He tried to get it. The gentleman is a reformer now.

Mr. MADDEN. Oh, the gentleman——

Mr. MOORE of Pennsylvania. Now I yield.

Mr. MADDEN. The gentleman wants to be facetious.

Mr. MOORE of Pennsylvania. I am facetious—I admit it.

Mr. MADDEN. He thinks he can disturb somebody's mental equilibrium by being funny.

Mr. MOORE of Pennsylvania. I could not disturb the gentleman's equilibrium.

Mr. MADDEN. But it might be better for him if he would endeavor to be serious and state something about the facts instead of being facetious and talking about nothing.

Mr. MOORE of Pennsylvania. I tried to get the gentleman to tell something about facts, but he wandered away——

Mr. MADDEN. I was not interested in listening to the gentleman's speech.

Mr. MOORE of Pennsylvania. The gentleman was interested in attacking the river and harbor bill, in which he has no interest this year, but in which in 1907 he was very much interested.

Mr. MADDEN. The gentleman is mistaken.

Mr. MOORE of Pennsylvania. Really, the gentleman will admit that it depends upon whose ox is being gored.

Mr. MADDEN. There is one thing certain, and that is, that if the gentleman from Illinois is interested in anything, it will be a meritorious thing and not a chimerical something such as the gentleman is interested in.

Mr. MOORE of Pennsylvania. The gentleman said in 1907 his scheme was meritorious. I am glad that he admits it now, because that makes no point of difference between the gentleman from Illinois and myself. Has the gentleman any further questions now, because I am going to let what he has said stand in my remarks? [Laughter.]

Mr. MADDEN. The gentleman can either let it stand in his remarks or take it out of his remarks, as far as "the gentleman from Illinois" is concerned.

Mr. MOORE of Pennsylvania. It is too good to take out, I will tell the gentleman. I want to confine my remarks to this $30,000,000 proposition that the gentleman did not get.

Mr. MADDEN. The gentleman can make any statement he pleases if he is willing to stand sponsor for it.

Mr. MOORE of Pennsylvania. I am standing sponsor for it, and I would like the gentleman to stand sponsor for some of his statements.

Mr. MADDEN. If I yielded to the gentleman, I would.

Mr. MOORE of Pennsylvania. But the gentleman has given notice to the House, and, in fact, to the whole country, that he proposes to eliminate the few truths which I injected into his speech.

Mr. MADDEN. I am going to eliminate the few impertinences that the gentleman injected into my speech.

Mr. MOORE of Pennsylvania. The impertinences were very appropriate at the time.

Mr. MADDEN. When the gentleman insisted upon talking, regardless of the rules of the House and the permission of the gentleman who had the floor.

Mr. MOORE of Pennsylvania. I suggest to the gentleman that I was impertinent, possibly, because the gentleman was abusive.

Mr. MADDEN. I reserve the right to decide for myself whether I was abusive or not.

Mr. MOORE of Pennsylvania. I know; but the gentleman is going to take it out of his remarks. He has given notice.

Mr. MADDEN. I take it out of my remarks because the gentleman had no business to inject it.

Mr. MOORE of Pennsylvania. And I am nailing it down in my own remarks that the gentleman is going to take my remarks out of his remarks, so that if he does, then the whole country which reads the CONGRESSIONAL RECORD will know he has eliminated the best part of his speech. [Laughter.]

Mr. MADDEN. I am very glad the gentleman from Pennsylvania has such a high opinion of his intellectuality and ability to make a speech.

Mr. MOORE of Pennsylvania. I have been following my distinguished friend from Illinois so long I would be ashamed of my intellectuality if it were not now equal to his.

Mr. MADDEN. Of course, if the gentleman has not a good opinion of what he says or thinks himself, it can not be wondered at if nobody else has.

Mr. MOORE of Pennsylvania. I have an excellent opinion of what I think, seeing with whom I fraternize here each day.

Mr. MADDEN. If the gentleman thinks he is being contaminated by his associates, there is nothing to prevent his resigning from the House.

Mr. MOORE of Pennsylvania. The gentleman is not contaminated, but amused, and he is particularly amused just now at the alleged retorts of the gentleman from Illinois.

Mr. MADDEN. It is easy to amuse the gentleman. His mind is so simple he laughs at anything.

Mr. MOORE of Pennsylvania. The gentleman from Illinois is too innocent—in the vernacular of the street, he is too innocent to "put it over his colleagues" as a reformer in the waterway development of the United States. The gentleman's record upon waterways does not admit of his attacking a meritorious bill at this late day.

Mr. MADDEN. If I were the gentleman I would not take up so much of the time of the House on a personal matter. Why does he not talk about the bill?

Mr. GREENE of Vermont. Will the gentleman yield? I want a little information. I want to ask the gentleman——

Mr. MOORE of Pennsylvania. If the gentleman from Vermont seeks information why does he not ask the gentleman from Illinois?

Mr. GREENE of Vermont. I am asking the gentleman who does have the floor and seems to be able to keep it, if this is a war emergency that was supposed to make this bill necessary?

Mr. MOORE of Pennsylvania. Yes; and this is war. The gentleman from Illinois and I are continuing it to the best of our ability, and the gentleman from Illinois is no small fighter. His reputation in this regard is well known, and I am pleased, in the presence of a multitude of my colleagues and the people of the country who fill the galleries, to make acknowledgment of the benefits I have received in parliamentary warfare through contact with the gentleman from Illinois.

Now to business. The gentleman from Illinois introduced an amendment February 6, 1907, to the river and harbor bill proposing that there should be appropriated $3,000,000, to begin with, on a scheme that was to cost from twenty-eight to thirty million dollars, affecting the sanitary district of Chicago, near Lockport, Ill. The amendment is too long to read in my time and perhaps too good for me to incorporate in my remarks in full. In supporting that amendment the vigorous and eloquent gentleman from Illinois, amongst other things, said this:

> If all the country is to profit by the opportunities which are to be created by the construction of the Panama Canal—

This, you see, was not visionary at all—Chicago and the Panama Canal united was not visionary—

> we ought to be at work on this improvement now, so that when a survey is reported on the Mississippi River from St. Louis to New Orleans we will have proceeded so far with the work as to save valuable time and be prepared to take advantage of the situation thus created several years sooner than we will otherwise be able to do.

The gentleman from Illinois in those days, you observe, was connecting Chicago with the Panama Canal; he was building a magnificent waterway from his city to the Illinois River and by way of the Illinois River to the Mississippi, where he joined with a $128,000,000 proposition, to carry a 14-foot depth to the Gulf, and thence to the Panama Canal.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE of Pennsylvania. May I have some more time?

Mr. SWITZER. How much time does the gentleman desire?

Mr. MOORE of Pennsylvania. Fifteen minutes.

Mr. SWITZER. I yield the gentleman 10 minutes.

Mr. MOORE of Pennsylvania. Very well. The gentleman from Illinois had 1 hour, and I ought to have at least 15 minutes to answer him. [Laughter.] But the gentleman from Illinois then had a vision, just such a vision as he accuses men of having along the Atlantic seaboard who seek to save life and promote trade by utilizing our natural waterways inside the coast. The gentleman from Illinois made a number of speeches, because at that time he was new in the House and it was necessary for him to make a noise, and amongst the things he said in support of inland waterways was this:

> And I do not agree with the gentleman—
>
> That is, Mr. Burton—
>
> when he says that we would not be conserving the rights of the people of the Nation should we vote for the expenditure provided in this amendment. We believe that the Federal Government owes it as one of its

paramount duties to the people of the Nation to expend the money to create the necessary facilities for the movement of the Nation's products at the cheapest possible cost, and we believe, too, that in the creation of this waterway and the expenditure of the money proposed in this amendment the Government would be doing one of the most beneficial things, not only for the commerce of the Nation, but for the development of the agricultural, mining, and manufacturing interests of the great Mississippi Valley.

Mr. GORDON. Will the gentleman yield?

Mr. MOORE of Pennsylvania. That is the argument to-day in favor of a river and harbor bill, and it was the argument the gentleman from Illinois then made when he was opposing the gentleman from Ohio, Mr. Burton, then chairman of the committee—yes; I yield.

Mr. GORDON. What does the gentleman say about the charge of the gentleman from Illinois that the only moisture in the intracoastal canal is fog?

Mr. MOORE of Pennsylvania. I said the gentleman's mind was full of fog when he made that statement. [Laughter.]

Mr. GORDON. The gentleman denies the statement?

Mr. MOORE of Pennsylvania. But the gentleman is going to cut it out of his remarks. I said then that the gentleman was befogged, and it was true, and that is no reflection upon the gentleman's intellectuality either.

But Mr. Burton, of Ohio, puncturing a little bit the scheme of the gentleman from Illinois [Mr. MADDEN], the waterways advocate of 1907 and the reformer of 1917, 10 years later, said:

So it seems, Mr. Chairman, that there is an incidental benefit worth $3,000,000 a year that would arise from the building of this waterway, which capitalized at 4 per cent would mean a value of $75,000,000. Would it not be well for us, before the money is appropriated from the National Treasury to build this waterway, to find out who will have the benefit of that $75,000,000, besides 350,000 acres of land, not of very great value, a large share of which will be reclaimed by this waterway?

Talk about schemes. Mr. Burton evidently was "on" in those early days back in 1907.

How can we tell what share of this agitation—

And it was a fierce agitation at that time, along the Mississippi Valley—a regular 14-foot-to-the-sea cyclone—

comes from the desire for navigation of this waterway and what share comes from a desire to use that water power, worth $3,000,000 a year—

Just exactly the amount of the appropriation asked for in the amendment of the gentleman from Illinois—

or what share of it is due to the desire to reclaim a large share of 350,000 acres of land.

And then comes a lot of correspondence, intimating that this is a water-power scheme, a reclamation scheme, and that navigation bore but a small portion in it. This is a long statement, gentlemen, and will take much time to read, but to those who are interested in the performances of our modern-day reformers I commend the RECORD.

Now, let us see about the present bill. Is it a sectional one? It can not be so charged. Appropriations are made in this bill for the waterways of New England. Appropriations are made in this bill for the waterways down along the Atlantic seaboard. Appropriations are made in this bill for the waterways entering the Gulf. Appropriations are made for waterways, many of them, all up the Mississippi Valley to the Great Lakes, and appropriations are made for the streams empting into the Pacific Ocean. And appropriations are made to keep the work going on the Great Lakes. But the gentleman from Illinois [Mr. MADDEN] says that this bill ought not to pass because it does not partake of the nature of those bills which the White House has commonly denominated in these days as war measures. I contend that this bill is an essential war measure apart from the great appropriation bills that we have been passing. I contend if we appropriate freely—and the gentleman from Illinois [Mr. MADDEN] voted for it—a bill that provides $750,000,000 to build ships, many of them wooden ships of shallow draft, that we ought at least to prepare the harbors and the waterways of the country by so small a sum as this $26,000,000. To put the cart before the horse is the proposition of the gentleman from Illinois. He would build the ships and send them out on the ocean and have the Government put war risks on them—and he voted for that the other day, $50,000,000 of it—and yet would close up the rivers and harbors of the United States. The gentleman would vote our money to protect all these foreign-trade interests, and yet he would close up the ports of entry of the United States, close up the rivers, close up the connecting links by which the products of the farm and products of the mine and the products of the factory come from the people and go to the sea.

Mr. MADDEN. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes; I will yield to the gentleman.

Mr. MADDEN. What would the gentleman do with the ships if he did not put them on the ocean? Would he put them on the land?

Mr. MOORE of Pennsylvania. I have not the notion that the gentleman from Illinois has, that we should make all our business for the foreign trade. I would do some of it in the United States, and I would not do all the business exclusively with the railroads all the time, either.

Mr. MADDEN. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes. Because the argument here has been to favor a monopoly and control by the railroads of the country, a change from the gentleman's attitude in 1907, when the waterways agitation swept the West because the railroads could not keep up with the business. The Council of National Defense is now putting the problem up to the railroads. We should give them help to carry our products, and not so sectionalize this country that trade and commerce will arise only in spots, and will be distributed only in spots and through certain great ports exclusively for shipment abroad.

Mr. MADDEN. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. MADDEN. Does not the gentleman know that as a matter of fact we have the greatest merchant marine on the Great Lakes that exists anywhere in the world, and that it is three times as big as the merchant marine that crosses the ocean and belonging to any two or three of the important nations of the world?

Mr. MOORE of Pennsylvania. The gentleman is never done boasting of his merchant marine on the Great Lakes. It is creditable, but not so great relatively as the gentleman thinks it is. The gentleman knows that when he refers to the commerce on the Great Lakes he refers to ore and bulking raw material. He does not refer to grain and cotton and merchandise that people of the country need. The gentleman knows that the railroads have been laying embargoes upon the trade of this country, and that his particular section of the country is favored in this, because whereas up in New England, yes, in the very city of Boston, a great port of this country, they have but one great railroad system; the gentleman has 18 or 20 or 25 trunk lines reaching into the city of Chicago, and he does not have to worry so much about congestion of freight.

Mr. MADDEN. We have 29.

Mr. MOORE of Pennsylvania. That makes it better for the gentleman's city.

Mr. SMALL. Mr. Chairman, will the gentleman from Pennsylvania yield there for an interruption?

Mr. MOORE of Pennsylvania. And the gentleman from Illinois ought to be liberal to other sections of the country that are not so favored as his own——

Mr. MADDEN. And give them something they ought not to have. [Laughter.]

Mr. SMALL. In all these Lake ports that have a large commerce in consequence of improvements that have been made there the original depth has been increased in some cases 5 feet, and other cases 10 feet, and in some cases 15 feet, over and above the original depth, and those improvements have made possible this great commerce.

Mr. MOORE of Pennsylvania. Yes; that is true. But there is another side to that Great Lakes depth business. I will read a resolution that I have here.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MOORE of Pennsylvania. Can I have five minutes more?

Mr. SMALL. I yield to the gentleman five minutes.

The CHAIRMAN. The gentleman from Pennsylvania is recognized for five minutes more.

Mr. MOORE of Pennsylvania. I did not know the gentleman from North Carolina [Mr. SMALL] intended to ask this question about Lake port depths, but I shall take advantage of it. The gentleman from Illinois [Mr. MADDEN] comes from a great city which is dependent upon other sections of the country, and I am afraid he was a little selfish in his argument to-day. He is not altogether as considerate of other people in the United States as he was in 1907, when he was pleading for the masses and for that $30,000,000 appropriation for the Chicago Drainage Canal. He is not as liberal now as he was before they got the money they wanted. He is not even as liberal as the people down South are, who have got to get their cotton out to the ports by way of the rivers because they can not get their products out by railroad; and they did not surely in 1907, when the gentleman was making his waterways speech and not insisting that they should confine all the business to the great trunk lines that are now overdone. He was not fair even to the people of the Great

Lakes. Here are some resolutions passed by the Merchants and Manufacturers' Association of Milwaukee, Wis., only recently, in which they say, regarding the Chicago Drainage Canal, which the gentleman was seeking to extend in 1907:

Whereas the primary object of the Chicago Drainage Canal was the sanitary disposal of the sewage of the city, but the scope of the canal's function now includes navigation, and water power and hydro-electric enterprises, which money-making projects the State of Illinois is endeavoring to promote at the expense of port cities from Chicago to the St. Lawrence River; and

Whereas the harmful situation resultant from the circumstances hereinbefore narrated is in danger of being perpetuated and enhanced by selfish influence: Therefore be it

PROTEST.

Resolved by the executive heads of port cities on Lake Michigan and Green Bay, in convention assembled, That we most emphatically protest against the authorization by the national authorities of any project which will call for additional drainage of the waters of Lake Michigan, and as emphatically insist that more vigorous steps be taken by the Federal Government to put a stop to the unlawful diversion of water represented by the amount now abstracted in excess of the original grant of 4,167 cubic feet per second.

We further firmly insist that the original permit, just mentioned, be permanently revoked if the observations of the United States Lake Survey indicate that the levels of the lakes involved continue to recede under the continued extraction of the once seemingly reasonable amount which said permit grants.

In making this sweeping protest we do not underrate the importance of providing for the physical welfare of any unit of population, but we hold that as far as the city of Chicago is concerned there are ample methods available for the scientific disposal of its sewage without the adoption of a system which places a perpetual burden of expense upon others. The waters of the Great Lakes are primarily and wisely dedicated to the uses of navigation. In this respect they represent a valuable asset, not only to the communities we have the honor to represent but to the people of the entire Nation. We insist, therefore, that no one section of the country should be allowed to advance its own interests at the expense and to the detriment of other sections.

This resolution makes the point I am making—that the gentleman from Illinois is viewing the waterway proposition from a very narrow viewpoint, rather a selfish viewpoint.

Mr. SMALL. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. SMALL. I have just looked the matter over in order to give an illustration to the proposition I was speaking of a moment ago. At Ashtabula, Ohio, one of the great harbors on the lake, the original depth there was 6 feet, and it has been increased from time to time until now they have a ruling depth of 21 feet, with a tonnage of more than 14,000,000 tons of commerce. But the Government of the United States has invested, in order to get that increased from 6 to 21 feet, more than $2,282,000. We figured that it was well spent, and that the expenditure of it has been justified by the result.

Mr. MOORE of Pennsylvania. I am very glad the gentleman from North Carolina has thus supplemented my remarks.

The CHAIRMAN. The time of the gentleman from Pennsylvania has again expired.

Mr. MOORE of Pennsylvania. Can I have five minutes?

Mr. SMALL. I yield to the gentleman five minutes.

The CHAIRMAN. The gentleman from Pennsylvania is recognized for five minutes more.

Mr. MOORE of Pennsylvania. I hope the gentleman from Illinois will not interrupt me now. [Laughter.] Let us see whether the gentleman is as liberal as he ought to be. Let us see whether he is as broad, partiotic, and humane as he ordinarily is as a Republican leader upon this floor. Let us see whether, when he attacks as "worthless" and "rotten" and "useless" certain meritorious projects in this bill he is just and fair to himself. Let us see whether he speaks in the interest of those plain people for whom he fought, bled, and died upon this floor in 1907. [Laughter.] Let us see whether his great big manly heart throbs with that same enthusiasm for the producers of the country whose products he wanted to equitably and cheaply distribute in 1907 when he inveighs against this measure in 1917. Over there along the Atlantic seaboard—and this is without prejudice to any other section of the country—we have a little more than one-third of the entire population of the United States east of the Appalachian chain, and while I refer to the great trunk lines going into the city of the gentleman from Illinois, let me say parenthetically that we do business for those 30,000,000 people in that congested territory along the Atlantic coast on one-fourth of the railroad mileage of the United States. Let us see whether, when we consider these facts, he is as fair to us as we would expect him to be, being as he was the spokesman of the golden rule in 1907. Over there along the Atlantic seaboard the railroads have embargoes now, and have had embargoes off and on for years, since this European war broke out against certain kinds of freight. Let me read what one well-informed upon this subject wrote me a short time ago:

BOARD OF COMMISSIONERS OF NAVIGATION,
Philadelphia, Pa., May 23, 1917.

Hon. J. HAMPTON MOORE, M. C.,
Washington, D. C.

MY DEAR MR. MOORE: I received from your Philadelphia office this morning an inquiry concerning statistics with regard to the Chesapeake & Delaware Canal for the calendar year of 1916, with the request that I should forward the same to your care at Washington.

I want to supplement these statistics with some views concerning the early acquisition by the United States Government of this important waterway, from a commercial point of view and as a matter of preparedness in the conflict which this country has entered.

The demand from a commercial point of view for the opening up of this antiquated waterway is greater than ever, and it is no exaggeration to say that the proper development of this section is now at a practical standstill through the inability of consumers to get such raw materials into this market as originate in the South and to ship out the manufactured products destined in that direction.

For the past three years, since the breaking out of the great European war, it has been a physical impossibility to get lumber into this market from the South.

The railroads, as you well know, have embargoes against this commodity and the communities such as Wilmington, Carneys Point, Chester, and other localities in close proximity are handicapped through their inability to erect houses for the mechanics they have had to employ, with the result that in many instances they are forced to charter steamboats to carry their labor from Philadelphia and back, with a consequent loss of time in a day's work approximating from two to three hours.

The great demand for tonnage to carry supplies to the allies has taken from our coastwise trade all the remaining available vessels engaged in the outside routes, and the shoal and restricted width of the locks in the present Chesapeake & Delaware Canal have made it impossible to operate through this waterway modern barges such as would have tended to remedy this shortage in tonnage.

Our lumbermen find it impossible to supply building materials to those corporations and individuals desiring to erect houses, with the result that it is not possible to operate many of the large manufacturing plants to anything like their capacity.

But the gentleman says, "Go outside; do not use the inside waterways. Do not improve them, but send your ships to sea." Yes; we have done that. It costs twice as much to do that as it does to send them inland, and the risk is greater and the loss is more frequent. But I am informed that ocean freights, by reason of the hostilities, have made it more profitable for vessel owners to discontinue the coastwise trade and engage in the foreign trade, raising prices to both producers and consumers of the United States.

We have not even got the facilities in the coastwise trade out on the ocean to do the business for the great communities along the Atlantic seaboard. The foreign trade that the great granaries of the country have been forcing with Europe, has taken from us the coastwise ships that formerly did business from port to port along our coast. Mr. Sproule continues:

If shipbuilding in the interest of the United States Government is to be pursued, how are the materials for their construction to be gotten to the shipyards unless waterways, such as the Chesapeake & Delaware Canal are modernized and opened up?

It is impossible for the railroads to handle the freight offering, and there are instances too numerous to mention right here of ships in distress being held up for weeks awaiting the receipt of parts of their machinery coming from points no further distant than Connecticut and Rhode Island and New York.

Ocean freights, by reason of the hostilities, have made it unattractive to vessel owners to continue their craft in the coastwise trade. Only yesterday the schooner *John B. Biemiller* was chartered to load 6,000 barrels of oil at New York for Genoa at a freight rate of $17 a barrel. Under ordinary conditions $0.96 a barrel to this point would have been an attractive freight

This vessel in normal times carried lumber, and this is what the lumbermen and dealers in building materials are confronted with to-day.

One schooner, the *Josephine*, has loaded lumber at Mobile for Philadelphia at $16 a thousand feet. Under normal conditions her freight would have been from $6.50 to $7.50 per thousand feet.

In no other way will the conditions be remedied than by the opening up of this inland waterway, as this will permit of the construction and operation of the cheaply built and cheaply manned inland barges.

The value of this canal to the Navy, if modernized, is too well known by you Washington officials to be dwelt upon by me.

Now, these statistics which follow should not be considered indicative of the importance of this waterway to our section of the country, as the business is minimized by its antiquated condition.

During the year 1916, 1,164 vessels of the gross tonnage of 521,343 tons arrived here with cargo via this canal, and during the same period 1,133 vessels, with the gross tonnage of 521,632 tons, left Philadelphia for points in the South via this canal.

Within the same period 110,049,182 feet of lumber, 219,807 railroad ties, 19,930 tons of cinders, 62,430 tons of mine props, 8,110 tons of piling, 3,408 tons of pig iron, 27,277 cords of pulp wood, 11,750 tons of sand, and 3,230 tons of nitrate of soda arrived here from the South, via this canal, and within this same period, 381 regular line steamers departed, and 382 regular line steamers arrived via this waterway.

Of course you will understand that there was much miscellaneous freight, the details of which would make this letter too voluminous.

Very truly, yours,

GEO. F. SPROULE, *Secretary.*

Gentlemen, I could go on with hundreds of illustrations of this kind, showing the difficulties that the producers and consumers of the land have in getting their freight carried to its destination. I ask whether it is not time that we open up and use our rivers, use them as burden bearers in these times of stress, so that the producers and consumers of America shall

have an equal chance with those who are buying our products abroad? [Applause.]

Mr. SWITZER. I yield 30 minutes to the gentleman from Massachusetts [Mr. TREADWAY].

Mr. TREADWAY. Mr. Chairman, after the very entertaining personal interchange back and forth between the gentleman from Illinois [Mr. MADDEN] and the gentleman from Pennsylvania [Mr. MOORE] it will be more or less difficult to ask the Members of the House to concentrate their ideas and thoughts on the problem at hand. I had hoped that the gentleman from Pennsylvania would use some portion of his time in the defense we know him to be so capable of making of that well-known and well-worn project which brought on the colloquy between the two gentlemen. But rather than do that, he evidently prefers to continue the colloquy with the gentleman from Illinois [Mr. MADDEN] and reserve the batteries of his eloquence in behalf of the Chesapeake & Delaware Canal for later debate.

Now, Mr. Chairman, I am not intending in any way to enter into a discussion of the merits or demerits of any item appearing in this bill. I would like nothing better than to accept the request that the chairman of the committee [Mr. SMALL] made this morning, when he asked those who are opposed to this bill to point out certain specific items of demerit. As a matter of fact, Mr. Chairman, when you start out on the basis laid down by the Secretary of War in his so-called communication to the Rivers and Harbors Committee, you attack practically every item in the bill, because we were told at the very beginning of our hearings that the only items that should be included in a river and harbor bill under the existing circumstances were those directly bearing on the war, either for preparedness or the commercial needs having to do with national defense. There are perhaps half a dozen such items in the bill. You can pick out those half a dozen items and then attack seriatim every other one.

We are living in a time different from that under which we have ever before considered river and harbor legislation. We are spending the money of the people of this country in the most extravagant manner ever known. But, Mr. Chairman, we are doing it in a most righteous cause, and I claim that the only money we should expend under these circumstances must have a direct bearing upon that very feature. The money of the people of this country that we appropriate in this Congress must either be for the support of the various executive departments and the administrative needs, or it must be clearly shown that it has a direct bearing upon the war in which we are engaged and its outcome. That can not be shown in the present bill. It is impossible, because, Mr. Chairman, in what way can we connect up with national preparedness an appropriation of $5,000,000, for instance, for additional locks and dams in the Ohio River? Does the champion on this floor of the lock-and-dam system in the Ohio River claim that the war with Germany will be shortened one day by an appropriation—not by the construction, but by an appropriation—for additional locks and dams in the Ohio River?

I, for my part, Mr. Chairman, can not see the connection between the removal of the water hyacinth, which is so frequently referred to, and a shortening of the war with Germany. The remark of a gentleman from Pennsylvania, not a Member of this Congress—in the Sixty-fourth Congress—that it would be very much cheaper to take the water out of the rivers rather than to take out the hyacinth, is certainly a very appropriate remark here to-day. We must economize, and if we can economize a little by a few less hyacinths coming out of those streams, all well and good.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. TREADWAY. Yes; certainly.

Mr. MOORE of Pennsylvania. We have heard a great deal about hyacinths. I want to ask the gentleman how much we appropriate in this bill for that purpose?

Mr. TREADWAY. The actual amount is very slight. I appreciate the gentleman's argument, but it is the principle that is involved and not the dollars and cents.

Mr. MOORE of Pennsylvania. If it is a matter of principle, and a certain section of the country could be served by a navigable river which is clogged up by water hyacinths, would it not be in the interest of the Nation in time of war to open up that navigable stream and remove the hyacinths? Would not that be a fair proposition?

Mr. TREADWAY. I think it would. If much else that is in this bill were as fair, I would be disposed to vote for the removal of the hyacinths. I think some gentleman brought up the point that the hyacinths could be used instead of hemp.

Mr. MOORE of Pennsylvania. Used for food, he said.

Mr. TREADWAY. Yes.

Mr. MOORE of Pennsylvania. The gentleman will admit that that is a ridiculous proposition.

Mr. TREADWAY. But no more ridiculous than the proposition for the removal of the hyacinths under existing conditions.

Mr. MOORE of Pennsylvania. I think the gentleman has already admitted that the principle is a proper one, if the stream can be made navigable. Now, if the stream is sluggish, miasmatic, clogged up, why not——

Mr. TREADWAY. If it is miasmatic, let us capture some Germans and send them there and let the hyacinths remain.

Mr. MOORE of Pennsylvania. The gentleman will admit that that is not a fair answer.

Mr. TREADWAY. It is just as fair as the gentleman's question. Now, I suppose we do not either of us want to spend half an hour in the expurgation of these remarks.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. TREADWAY. I shall be delighted to yield, but before doing so let me suggest that the gentleman took 30 minutes of his own time in a passing colloquy with his friend from Illinois [Mr. MADDEN], and I should prefer not to have all my time taken up in the same kind of colloquy.

Mr. MOORE of Pennsylvania. If the gentleman puts it on the ground of time wasted, I will not pursue the matter further; but there are hundreds of streams that should be opened up in order to make the fertile lands available, and there are water hyacinths in some of them.

Mr. TREADWAY. Would it not be as desirable to take out the water and build railroads?

Mr. MOORE of Pennsylvania. Well, if the gentleman is in favor of railroads exclusively and the prices they charge——

Mr. TREADWAY. I am not in favor of the railroads particularly, but I am in favor of the taxpayer in opposition to this bill.

Mr. MOORE of Pennsylvania. But if the gentleman——

Mr. TREADWAY. I prefer to have the gentleman continue his remarks in his own time.

Mr. SEARS. Will the gentleman yield?

Mr. TREADWAY. Briefly.

Mr. SEARS. I do not think the gentleman from Massachusetts intends or desires to mislead the House. Does the gentleman realize that in this fight against the water hyacinth the traffic on the St. Johns River will, unless it is removed, be absolutely stopped?

Mr. TREADWAY. I have been on that river and I appreciate the gentleman's question. It may be a fair proposition in getting to Palatka to have the hyacinth removed, but that has nothing to do with the streams in Louisiana and other States, although I suppose Members would defend the streams in that section on the same ground.

Mr. SEARS. There is a commerce amounting to a million dollars and over on the St. Johns River.

Mr. TREADWAY. I prefer that the gentleman would not draw me into a discussion of any special item. I was only referring to the water hyacinth in a general way, showing what we had put into the bill, items that were far away from war measures for national defense. I am not criticizing the gentleman's desire to clean up the St. Johns River; I think that is perfectly proper.

Now, the recommendation of the Secretary of War came about in a peculiar way. When this Congress came into session it was very generally understood that there should be no river and harbor legislation this year. That was the general expectation, and a very wise one it seems to me, in that we should, as I have already endeavored to show, save the last dollar in these outside appropriations for the benefit of the great cause in which we are engaged. But a very ingenious sort of scheme was developed whereby a supposed recommendation of the administration came before us. On this side of the House the Republicans were given to understand that in a Democratic caucus the vote of the majority of the Democrats present was against the consideration of a river and harbor bill. It is always said that this bill is a nonpartisan bill, and so I have no criticism to make of Democrats that brought it up in spite of the fact that their own caucus voted against it. Our committee was told that it should be based on this one great thought that was in the minds of the American people. The recommendations from the Secretary of War says that it should be—

> Designed to provide for the continuance of river and harbor improvements already in process and the maintenance of existing works wherever in either event substantial loss would be entailed by a suspension of work, and that he should include such new projects as are intimately associated with the question of national defense in a military way.

We are carrying in this bill 34 new projects. Has the Congaree River anything to do with national defense in a military

way? Possibly it has, but I for one as a member of the committee was not shown how it had. Now, as far as continuance of projects that would otherwise deteriorate. The House realizes that there is a balance to the credit of the various projects scattered throughout the country of $32,000,000. There was in addition to that $1,000,000 which the Board of Engineers could use in any way they saw fit. Now, who for one moment can claim that the work on rivers and harbors so far as maintenance is concerned will deteriorate if no river and harbor bill should pass at this session of Congress? We are carrying very large balances for some of these very projects which are dearest to the hearts of many Members of the House. With all due respect to the chairman of our great committee, I must, as an illustration, refer to the balance side for the Beaufort Canal project. On March 1 that item was about $900,000. We have in the bill as reported here another $100,000. Will not $1,000,000 take pretty good care of that project? We have balances to all these important items—and I say "important" in the sense that we have carried in previous bills very large appropriations for these items. I, for one, do not consider many of them important in the sense of benefit to the people of the country.

Now, a word about the project the gentleman from Pennsylvania has spoken about so eloquently, or rather which I supposed he would speak about in the time he had, but which he will speak about eloquently before the debate closes—in the last river and harbor bill which passed the House but did not pass the Senate, we carried an item of $1,300,000 for the purchase of that canal. I never, as a Yankee, saw the time when I wanted to buy anything that I did not want the fellow that had it for sale to tell me what he asked for it. The United States Government has never as yet been able to get a price at which the owners of the Chesapeake & Delaware Canal would dispose of their property. In the Sixty-third Congress the estimated value was arrived at by a then leading member of the Committee on Rivers and Harbors, the gentleman from Mississippi [Mr. HUMPHREYS]. He arrived at a value in his mind of $1,300,000, and that was put into the bill on his argument carrying out his idea as to what that project was worth to the United States Government.

It was not satisfactory to those who were trying to have this country become the owner of that canal. They wanted a condemnation procedure. Well, suppose we adopted condemnation, it is very easy to estimate that it would cost ten or fifteen million dollars before the Government could secure a 12-foot channel, and it would consume from three to five years of time even after the condemnation procedure was completed. Can the supporter of that project come before the House and say that to-day the condemnation of the Chesapeake & Delaware Canal is an emergency war measure when its usefulness to the people, no matter what its merits may be eventually, can not probably be brought about within five years?

And so we can continue to criticize these various items, and I am only using these as illustrations, not in particular criticism of the individual projects. A question was asked Col. Newcomer during the progress of the hearing as to the possibility of making contracts under existing labor conditions. He himself told us that the Government would be very greatly embarrassed in either making contracts or carrying on the work itself by the high cost of labor, its scarcity, and the excessive cost at the present time of materials. Is it a good time under that sort of testimony to take on new work? Do we need under those conditions to assume the burden of $50,000,000 as this bill calls for eventually in these new contracts? I do not think a Member of this House, acting in his individual capacity, exercising his own business judgment, would say it was the time he wanted to go into unnecessary construction work.

If we can maintain for commercial purposes our present depths of channels in the harbors and in the large rivers with the balance on hand, it seems to me that we are expending all of the money of the people in the cost of river and harbor work that we ought to be called upon to spend. The majority report speaks of the fact that many people will be thrown out of work unless this work is continued. They say the river and harbor section of the War Department maintains in the aggregate a large force of assistant engineers and employees in the several districts, many of whom will have to be discharged, and the personnel of the force disorganized. Mr. Chairman, I do not ask for any better argument in behalf of the defeat of this bill than that very sentence in the majority report. Who are these engineers and the personnel of the force that would be disorganized? They were the leading men in their respective classes in West Point. Their services are in the greatest demand to-day in the very cause in which we are all engaged. Why take them away from that kind of work for which they have been fitted especially by the United States Government, and ask them to continue to work over these various projects which we are trying to adopt?

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. MEEKER. Can the gentleman tell us whether or not any of the belligerents abroad are curtailing their waterway activities during the war?

Mr. TREADWAY. I would say this to the gentleman, that while we are acting as allies with the powers abroad in the carrying on the war, nevertheless it seems to me that so far as the conduct of our own governmental affairs are concerned we ought to be the judges of our own internal matters and act upon our judgment rather than be guided by whether Germany or France or Great Britain may continue in a similar line of work.

Mr. MEEKER. Just a word more.

Mr. TREADWAY. Yes.

Mr. MEEKER. I think we should attend to our own business, but I was asking the question to raise the point as to whether they value their waterways as war-relief measures or not.

Mr. TREADWAY. Of course geographical conditions and various things enter into a suitable answer to the gentleman.

Mr. CANNON. Mr. Chairman, will the gentleman yield?

Mr. TREADWAY. Yes; with pleasure.

Mr. CANNON. If we can trust the reports of the Interstate Commerce Commission, notwithstanding the waterways in Germany and elsewhere in the countries of our allies, the freight rates in this country are less than one-half what they are upon the railroads abroad, notwithstanding the competition of the waterways.

Mr. TREADWAY. Mr. Chairman, I am very glad for the suggestion of the gentlman from Illinois. The freight rates are not made, as I understand it, by the railroads themselves. They are made and approved by the very board to which the gentleman from Illinois refers. They must be approved by the Interstate Commerce Commission.

Mr. HARDY. My Chairman, will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. HARDY. I just wish to inject in that remark that the freight rates of America are always compared in that per ton per mile way. It is stated they are seven-tenths of a cent per ton per mile. While that embraces long distance and short distance, carload and every other style, as a matter of fact the rates are nothing like as cheap here as they are abroad, because these are carload rates that enter into it.

Mr. TREADWAY. Mr. Chairman, there are other very serious defects, as I say, in the bill before us. One of them is this so-called grouping system which has been previously referred to. A grouping system is nothing more nor less than an effort to cover up unmeritorious projects. You take a dozen or 20 or 30 projects, and just because they are geographically near together, allow a "come-and-go" process on the part of the engineers, and Congress loses its control over the maintenance of these particular projects. It is concentration of power in the Executive, and nothing else. It is the same thing that has been criticized here over and over again on this floor. To-day it is stronger in the river and harbor bill than it has ever been before. The door was opened in previous bills. Every little while you would see three or four streams grouped together in previous bills, and they went through. Now it is being done very openly and some 20 or 30 are grouped together in various places. It is a direct blow at the legislative power in Congress itself, and if we want that sort of method, let us vote it in. I for one do not. I want to see the power of Congress kept here in this body, but you do not keep it here when you enter into this so-called group system.

Mr. SMALL. Mr. Chairman, will the gentleman yield?

Mr. TREADWAY. Certainly.

Mr. SMALL. May I remind the gentleman that the grouping system has been in vogue in river and harbor bills for 20 years or more?

Mr. TREADWAY. I said that there had been various groupings heretofore, but it is very much larger in this bill than has ever been undertaken before.

Mr. SMALL. That is true.

Mr. TREADWAY. Another thing is the so-called commission that is going to be established. I shall not take up the time of the House to read or call particular attention to the actual phraseology of the language creating that commission, but I do hope before you vote upon this bill you will read what that commission is going to be asked to do. If the Secretary of War, the Secretary of Agriculture, the Secretary of the Interior, and the Secretary of Commerce—I do not know why they left out the Secretary of the Navy—individually in their own official positions carry out the instructions that are put into that clause,

there will be nothing in the heavens above nor on the earth beneath that these gentlemen do not investigate before they report to the House.

This commission went out on a point of order in the consideration of the bill last year, and there is no reason why it should not go out again. But I am informed, or the committee was informed, that that was the one item that made a river and harbor bill possible this year, otherwise it would not receive Executive sanction. We started out on that basis, and this is exactly where the matter stands to-day, that unless the concentration of power was continued and this commission established to study all these various problems of nature—man, beast, and all the rest of it—that the river and harbor bill would not receive Executive approval. What about surveys? Why, there are innumerable surveys not yet completed. This bill carries 74 new ones. What did Col. Newcomer say on the subject of surveys? I will not take up the time of the committee to find the actual statement, but I will insert it in the RECORD. He said they had too much else to do; that they had not had time to look it over to see whether the surveys were meritorious or not that went in the bill; that the bill was made up as a result of the passage of the previous bill by the Senate. Not that it was given consideration, Mr. Chairman, by the department. or was recommended as a war measure by the Board of Engineers; not that, but that the bill that had passed this House in the last Congress and then been amended by the Senate was to-day to be adopted as a war measure. Was there ever a more ridiculous argument made before a committe of this House?

Mr. PLATT. Will the gentleman yield?

Mr. TREADWAY. I will.

Mr. PLATT. The gentleman spoke a few moments ago about the iniquities of the grouping system. I find four magnificent harbors grouped together here in the bill. Saugerties, Rondout, Peekskill, and Tarreytown Harbor, for maintenance, $3,500.

Mr. TREADWAY. That means that they will not have more than $3,500 to spend there.

Mr. PLATT. Does that mean they are going to expend the insignificant sum of $3,500 on those four large harbors?

Mr. TREADWAY. They will put it on the one the gentleman selects, in all probability.

Mr. PLATT. These harbors are not in my district.

Mr. TREADWAY. They are in the gentleman's neighborhood.

Mr. PLATT. The stream is in my district.

Mr' SMALL. What group?

Mr. PLATT. It is a series of habors in the State of New York, Saugerties, Rondout, Peekskill, and Tarreytown Harbor, with an item of maintenance, $3,500. Those harbors have an enormous traffic and I would like to know whether $3,500 is to be spent on each one or on the whole lot?

Mr. SMALL. The only one of those projects for which estimates are made is by inserting for maintenance at Peekskill and the only reason those are grouped is to anticipate any unforeseen emergency, such as storms or floods. They are grouped in order to provide for such an emergency that might occur.

The CHAIRMAN. The time of the gentleman has expired.

Mr. TREADWAY. May I ask for five minutes additional?

Mr. SWITZER. I yield to the gentleman five minutes more.

Mr. McLAUGHLIN of Michigan. Mr. Chairman, I am interested in some harbor work in the process of construction. I have not heard what is to me a sufficient explanation of the policy to be pursued by the gentlemen of dropping all that work, leaving the contractors flat with their machinery and appliances all on their hands.

Mr. TREADWAY. I will state to the gentleman that there are continuous contracts that are appropriated for under the sundry civil bill. There is a balance to the credit of every project practically that is carried in a good large sum, and further than that I would state that of course the contractor originally makes his price based on any contingency of the contract not being continued. If a project is meritorious. I believe myself in the continuing contract and think that the Government would have saved a great deal of money had continuing contracts been entered into, but the contractor, such as the gentleman from Michigan refers to, must necessarily take that very thing into consideration when he assumes the responsibility of a contract.

Mr. McLAUGHLIN of Michigan. Yes; but is he not justified in taking into consideration also that the Government will play fair when the Government of the United States enters into a contract with him and he buys supplies, buys dredges, and his trucks and his machine shops and appliances ready to carry on the contract, that they will furnish the money and have it come along from time to time instead of stopping short off as the gentleman proposes to do?

Mr. TREADWAY. These are not continuing contracts that appear in this bill, they are made from year to year, and I tried to explain to the gentleman that continuing contracts are provided for in the sundry civil bill.

Mr. McLAUGHLIN of Michigan. I know some places where as low as $28,000 was appropriated for continuing a very important work in my district, and I believe that if that money is not appropriated it will be necessary for the contract work to be stopped.

Mr. GALLAGHER. There are a million dollars.

Mr. TREADWAY. Yes; a million dollars remain under the lump-sum appropriations, over which the engineers have full authority and which they can spend in carrying out any contracts they may approve.

Mr. McLAUGHLIN of Michigan. That is, for all over the country; the million dollars.

Mr. TREADWAY. Now, Mr. Chairman, I want just to make one brief statement, and that is this. Let us play fair with the taxpayers of our country. Let us play fair with ourselves. If we are in favor of extravagant river and harbor appropriations, let us say so. Do not let us take pork and cut it up into slices and say it is for national defense.

It is the most silly argument that I have ever heard put forth in my term in Congress, that this is a bill for national defense. It is the same kind of a bill—only worse—that has been objected to on this floor and has been objected to by the American people in years gone by. Do not let us deceive them and deceive ourselves by trying to cloak it under any such title as preparedness or national defense. It is another pork bill, and as such let us either vote it up or down. [Applause.]

Mr. GALLAGHER. Will the gentleman yield?

Mr. TREADWAY. I will.

Mr. GALLAGHER. I think the gentleman was diverted from the statement he was going to make in regard to the engineers and laborers, and so forth, in the first of the hearings, that were going to be thrown out of employment.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MEEKER. Mr. Chairman, I ask unanimous consent that the gentleman have a minute in order that I may ask him a question.

The CHAIRMAN. The time is in control of the gentleman——

Mr. SMALL. Mr. Chairman, I yield half a minute to the gentleman.

Mr. MEEKER. Did you vote for the last bill we had here?

Mr. TREADWAY. I certainly did.

Mr. MEEKER. Was it a pork bill then?

Mr. TREADWAY. It is a very different bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. TREADWAY. I would like a minute more to answer the gentleman.

Mr. SMALL. I yield a minute to the gentleman.

Mr. TREADWAY. If I remember rightly, I voted for two and opposed two of the last river and harbor bills. I never have tried to conceal my opposition to a river and harbor bill, and sometimes I am in favor of them and sometimes I am not. I have continually opposed many items. This bill is not the bill—it is not as good a bill as passed the House last session, for many reasons. And, further than that, we did not at that time foresee the national emergency in which we are now involved.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SMALL. Mr. Chairman, I yield 30 minutes to the gentleman from Texas [Mr. DIES], a member of the committee.

Mr. DIES. Mr. Chairman, I was pained to hear my distinguished friend from Massachusetts [Mr. TREADWAY] admit just at the conclusion of his speech that he had been a voter for pork-barrel appropriation bills so recently as the last Congress. I was surprised, in the first place, that he said this was a pork-barrel bill, and then, when he admitted that he had voted for it recently, I was shocked.

What is a pork-barrel bill? A pork-barrel bill is a bill produced, as Mr. Jefferson said in some of his writings, by log-rolling in Congress. You tickle me and I tickle you. You help me to put over a bad one, and I will help you put over a bad one. We will swap work, and when the barrel is filled with pork you take a ham and I take a ham; you get a jowl and I get a jowl. And we divide up the pork and mulct the people. Now, that is a pork-barrel bill.

I am surprised that the gentleman from Massachusetts [Mr. TREADWAY] should denominate this a pork-barrel bill. Either that gentleman or some one else opposing the bill criticized it because the Chief of Engineers of the United States and the Secretary of War had dared to tell Congress what kind of a bill to pass. Let us be honest with ourselves, even though we can not be consistent. If the Secretary of War and the Chief of Engineers made up the bill, how can it be a pork-barrel bill?

[Applause.] The gentleman from Massachusetts [Mr. TREADWAY] is a member of the Committee on Rivers and Harbors. I challenge him to point to a single member of that committee, or probably any Member of the House of Representatives itself, that offered to barter with him or trade with him or say to him, "You support my measure and I will support yours." [Applause.] You know about all the reputation to be made out of calling the river and harbor bill a pork-barrel bill has already been made by the loquacious, delectable, spotlight gentleman from Wisconsin [Mr. FREAR]. He has carried away all the honors of an appeal to the galleries about this being a pork-barrel bill. Having found himself the gallery god of the Congress, and having had the news carried back to Nincompoop Creek that he is the champion who fought the last pork-barrel bills, there are no diadems for the gentleman from Massachusetts [Mr. TREADWAY].

I have a very dear affection for my friend from Wisconsin [Mr. FREAR]. Sometimes I scarcely blame him. This is a great place in which to make reputations. Some years ago, I am told, there was some question about the propriety of certain items in the river and harbor bill. Probably much of the criticism against it in those days was true. Great bodies administer their affairs with waste. I do not care what great supply bill you pass in this House, you will find items of waste in it. It is impossible that it could be otherwise, and it does seem hard that the gentleman from Wisconsin [Mr. FREAR], after having won a reputation by assaulting this measure, should continue to jump against his own mark. And I want to tell him now that he is likely to lose the reputation that he made some years ago if he continues to denominate this a pork-barrel bill in one breath and tell the Congress that we ought not to allow the Secretary of War and the Chief of Engineers to recommend it.

Mr. FREAR. Who is it in the House made the statement that the Secretary of War drew the bill?

Mr. DIES. You charged the Members of the Congress with abrogating their functions to the Secretary of War and the President and the Chief of Engineers, because they dictated this bill to Congress.

Mr. FREAR. Surely you do not charge me with having made such a statement, and now practically you are putting the words into my mouth.

Mr. DIES. You are a member of the Rivers and Harbors Committee, and you know the Chief of Engineers is largely responsible for this bill as a war measure.

Mr. FREAR. Continuing the old bill practically as it was last year.

Mr. DIES. He took what he conceived to be to the interest of the American people, and you call it pork.

Mr. FREAR. That bill was killed in the Senate, the gentleman remembers.

Mr. DIES. Let me tell you a story at the risk of tiring you. I told a little dog story here many years ago, and I am going to take a chance and repeat it, because so many new Members have entered Congress since I told it before. I think it was seven years ago. The reason I am going to tell my old hunter story over again is that I have discovered a new kind of dog, and I want to tell you about him. My old hunter dog was this kind of a dog: He was raised in the cross timbers of Texas, where I was raised on a farm as a boy. In the timber land we had little cotton-tailed rabbits. A dog could catch one of these ordinary cotton tails in three or four hundred yards, and on plowed ground in a hundred yards. Time went on and our family got a little bigger, and my father did not have enough land to keep all of us boys busy, and a little distance away was a prairie section, and he sent a wagon with we boys and the dog over to cultivate a crop there. They had the mule-eared rabbit in that region. An ordinary cur dog could not make them back their ears and put down their fourth foot. This is a true story, and I will never forget the first one of those mule-eared rabbits that old hunter got after. Of course, he knew he had that rabbit; that was a foregone conclusion. [Laughter.] He ran out at it as he would like a covey of quail flying, but in half an hour he came back with his tongue hanging out and panting distressingly. Pretty soon another mule-eared rabbit came by, and he went after it, but presently came back in the same condition as the first time. The next day, when a mule-eared rabbit came by, he just raised his head up and then lay back again to sleep. [Laughter.]

It is the same way, gentleman, with Members of Congress. It was the same way with me, in my early service in this body, when somebody rushed into the cloak room and said, "They are about to waste a million dollars out there." I was aroused and came leaping down the aisle, hoping to save the imperiled million. [Laughter.] But, like old hunter, since then, seeing many of these schemes running by which could not be stopped, I have just risen up and looked at it. [Laughter.]

But there are some kinds of dogs that can not be discouraged. I will not say that this has anything to do with my friend from Wisconsin [Mr. FREAR]. It has nothing to do with him unless he wants himself to make the application. [Laughter.] One of those kinds of dogs that can not be discouraged is what we call the automobile dog. He is not mad at anything in the wide world. If you go by in your car he runs out madly, apparently, and from his manner you would fancy he was going to bite the tires off your vehicle. He races after one car, and then he does it to the next, and then to the next, and so on indefinitely, all for amusement to himself and not at all with purpose to do you an injury. Now, Mr. Chairman, it is possible that there are a few automobile dogs running around here, that break out once in a while as a matter of habit, simply to disport themselves in the morning sun. [Laughter.] There are some gentlemen who are opposed to the river and harbor bill, as I said, because reputation is to be made at it. The public gets onto things rather slowly. Ten years ago there was criticism of the river and harbor bill. Probably it was justified. The people considered there was something wrong about it, and since that time they have fixed up the river and harbor bill all right. But my friend from Wisconsin is in on the tail of the storm. Well, he should remember——

Mr. FREAR. Mr. Chairman, will the gentleman yield?

Mr. DIES. Oh, certainly.

Mr. FREAR. The gentleman says that at this time I am "on the tail of the storm," and he makes it personal.

Mr. DIES. I am speaking hyperbolically. [Laughter.]

Mr. FREAR. Just a moment.

Mr. DIES. Let the gentleman ask his question, then. If he is going to make a speech, I do not want to yield to him.

Mr. FREAR. Three out of the last four river and harbor bills have been defeated, and this bill is along the line of the last bill, so that that is not a fair application.

Mr. DIES. Oh, because the gentleman has done his country an injury three times is no reason why he should seek to do it a fourth injury.

Mr. SMALL. Mr. Chairman, will the gentleman yield?

Mr. DIES. Yes.

Mr. SMALL. The gentleman will remember that the bill of 1914 passed the House, but failed in the Senate, and the bill of 1916 was enacted into law practically as it passed the House. The last bill failed, just as some other bills failed, at that session.

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. DIES. Yes.

Mr. COOPER of Wisconsin. Do I understand the gentleman from North Carolina to say that the last river and harbor bill failed? The bill of 1916 was signed by the President.

Mr. SMALL. It was the bill for 1917 that failed in the Senate. The bill of 1916 was enacted and became a law.

Mr. DIES. Some animals, when you feed them until they are full, will neither growl nor run nor jump the fence. [Laughter.] That does not apply to a Congressman, but a Congressman who has gotten along nicely in this bill heretofore can see nothing more except "pork" in the bill that will develop the undeveloped sections of the country.

My friend from Wisconsin talked about what Mr. Burton said concerning the Ohio River, and I thought about prophets. He was talking about the small amount of tonnage on the Ohio River. I believe the gentleman said Mr. Burton, for whose judgment and patriotism I have a high regard, I will say, secured an appropriation of about $60,000,000 for the Ohio River. Maybe that was the amount when the project was completed. I remember very well that while Mr. Burton was getting that appropriation, or finishing up the getting of it, I, in conjunction with other gentleman from the State of Texas, came here and tried to get an improvement for our State at Sabine Pass and Beaumont and Orange. I recollect that Senator Burton said my river down there was so crooked that no amount of money could make it navigable. I expect the Neches River, or the Sabine River, that he was then talking about, now carries per mile more tonnage than probably any other river in the United States. One-half of the tonnage of the entire State of Texas passes in front of Port Arthur, which just a few years ago was a cattle range, and Congress would not only not give it an appropriation but would not make it a subport of entry until the people of that locality had struggled for years. And my people down there dug the waterway and gave it to the Government; and to-day I think it is the tenth or eleventh port in the United States and carries 6,000,000 tons of commerce. On registration day it registered more soldiers to answer the call of the country than the capital of the State of Texas. That was a cow ranch a few years ago. The Neches River, which, since I

have been in Congress, Senator Burton prophesied could never be navigated, is carrying, as I recall it, over 1,000,000 tons of commerce, and it has been open for traffic only a little over 12 months. [Applause.]

Why, Mr. Chairman, some gentlemen talk here about this bill in connection with the war. My friend from New Jersey [Mr. PARKER] grew very eloquent and said that we want all the engineers and all the dredges taken out of the harbors and rivers and turned over to the Army and sent to France. Well, if you sent them to France they would set them to dredging out their rivers and harbors, for they have sense enough to know that it is useless to build ships unless you have harbors and navigable streams in which to float them. [Applause.] Turn the dredges over to the Army to be sent to France? No civilized, first-class nation in the world is so far behind with its harbor and river work as we are to-day.

In this bill here I have for my district a little item for a survey that will cost a very small sum, and my people are so impatient because the river and harbor work does not keep up with the commerce that they are about to have a survey of their own made and vote more bonds upon themselves to accommodate the great commerce of the country. Yet men stand here and say this is a pork-barrel bill, and that you ought to stop the wheels of progress in our harbors and rivers and send the dredges to France.

Oh, a thousand wooden ships to bridge the sea is preparedness and 300,000 box cars to carry the stuff to the water's edge is preparedness, but what use to get your freight to the water's edge or to have a vessel to put it in if your harbor is neglected and full of mud and silt and the vessel can not unfurl her sails and carry her burden upon the bosom of the ocean? [Applause.] I tell you, no more reputations are to be made by calling this a pork-barrel bill. [Applause.] Let my friend from Wisconsin [Mr. FREAR] take his crown of bay and roses and wreathe it around his brow and keep it watered and perfumed, because he will get no more. The people of this country are not to be hoodwinked with the proposition that this is a pork-barrel bill. [Applause.] My friend from Massachusetts [Mr. TREADWAY] finds a mare's nest in the water hyacinth. I doubt if he knows what a hyacinth is. There is nothing in this world that I know of that impedes the navigation of a stream more than the water hyacinth. How much do you suppose this bill carries, how much do you suppose the American people are being robbed of in this bill, to open the streams against the water hyacinth and to protect the commerce that goes down those streams? Oh, you Pharisees who criticize this bill, how much does it carry for that? Twenty million dollars? No. Two million dollars? No. Two hundred thousand dollars? No. Twenty thousand dollars to accommodate the rivers in five States.

Mr. SMALL. Thirty thousand dollars. There are two items—$20,000 and $10,000.

Mr. DIES. Thirty thousand dollars. Well, even $30,000 to open up the rivers in five States, where the navigation is impeded by water hyacinths, would not hurt anybody. [Applause.] I admire the way my friend from Wisconsin [Mr. FREAR] disposes of statistics as found in a report of the engineers with regard to rivers and harbors. His method is truly refreshing. I am only sorry that Conan Doyle did not have him when he wrote the Hound of the Baskervilles and those other wonderful stories that have entertained us so often, and I am sorry also that the Nick Carter series did not have the benefit of the genius of my friend from Wisconsin [Mr. FREAR]. He has no respect at all for a fact. He just shunts the fact away. If the report says the commerce is 30,000 tons, he says, "Oh, well, most of that is lumber," as if lumber was not commerce; or he says, "That does not amount to anything; most of it is coal. That does not count." And he talks like a flock of geese, la-la-la-la-la. [Laughter.] He talks as if coal was not commerce. That is his way of disposing of those statistics.

Now, I will tell you the truth about it is, as far as I am able to see, this is a good bill. The man who does not want to keep the harbors of this country open ought not to want to build 200 wooden ships and a thousand steel ships and 300,000 box cars. The man who does not want to keep the arteries of trade open in this country ought not to be willing to pour out the billions of the people to help bring more trade. They say that now and then they find a little fly speck on the bill. My friend from Massachusetts [Mr. TREADWAY] found the hyacinth. Gentlemen, having gone up and down the rivers of the South, I tell you that these deep, sluggish rivers—some of them, like the Sabine River, 40 feet deep in places—are beginning to clog with water hyacinths, and yet my friend [Mr. TREADWAY] says it would be cheaper to take the water out of the river than to appropriate $30,000 for five States to take out the water hyacinths.

It is reasonable to suppose that they picked out the worst that could be found in the bill to criticize, and if this is the worst they can find there must not be very many bad things in this bill. [Applause.] Of course there is no politics in it; there ought not to be any sectionalism in it, and I do not believe there is. Of course some of our boys on the right and some of our boys on the left once in a while match a little sectional tilt of talk. It may sound good back home, but I believe the heart of the great body of this Congress is for the North, the East, the South, and the West of this common country. [Applause.] I know that you down East and you up North have progressed faster than we have. You have your great harbors perfected in many cases. We have moved more slowly. The drubbing you gave us down there half a century ago stunned our growth, and the South is just coming into its own. As I say, the people in one county in my district have taken out of their own pockets $2,000,000 to make facilities for commerce. It just shows the spirit of the people, and it shows the progress with which the country is developing. I do not think anybody ought to say, as some gentleman said in a paper, that this is a pork-barrel bill to accommodate southern Congressmen. That is not the spirit of the Members of this House, and it is not the spirit of the American people. [Applause.]

Do you know that one old Confederate soldier after another that I met and shook hands with in Washington a few days ago, almost to a man, said to me that they were never more royally treated than by the people of this city and the old Federal soldiers with whom they came in contact. [Applause.]

Ah, Mr. Chairman, this is our country; it belongs to all of us—our great Republic which, bless God, shall give faith and hope to those who believe in free government the world over. [Applause.] I want to tell you that I am glad that it was given to me to see the light in this great free Republic where a rail splitter can become the greatest of Presidents, and where to every man, woman, and child the door of hope is flung wide open. [Applause.] Patriots live in the North, patriots live in the South, they live in the East, and they live in the West, and the boys are marching from every hamlet and every city in this country to show their appreciation for the freedom and the privilege of living in the greatest Republic in the world. [Applause.]

It is a mighty bad time to talk about sectionalism. There ought not to be any sectionalism, there must be no sectionalism in this great Republic of ours. [Applause.] The country is big enough to challenge the patriotism, the humanity, and the energy of all the children of every section of our glorious country. Buy a liberty bond! Your Uncle Samuel rarely ever acts in the roll of a borrower. You have boasted of your liberty, you have said that this grand old flag shelters the greatest and freest people in the world. Your fathers before you and in the Providence of God the children that come after you shall share this liberty and this protection and this freedom. Buy a liberty bond from the old gentleman. Quit talking sectionalism and win the war. Win the war! [Applause.]

This great Republic is the only free government worthy of the name that lives in the world to-day. It is the only place where the plowman's son is equal before the law of the land with the son of the noblest or the richest in all the realm. It is worth speaking for, it is worth living for, it is worth dying for, and it is worth laying down our sectionalism for. [Applause.]

I had not thought to say that, but it will not hurt. If I thought that this bill appropriating this money to keep the harbors open and keep the streams open would interfere with my country in the progress of the war, I would vote against it, and you know I would vote against it. But I know, as any sensible business man knows, that without it it is impossible to keep the harbors and streams open. What do you want to stop the machinery for, lay off the hands, let the dredges deepening the harbors go off, and come back and find all the plants disorganized, rust and deterioration everywhere, machinery tumbling down from neglect. No more foolish thing could be done. Prepare your harbors to float your ships and prepare them to take the bursting cargoes of the 30,000 freight cars that you are going to build.

May I say a word aside. I have been reading a great amount of criticism of Senator HARDING, of Ohio, because he said he wished that we all in America loved our flag as the Germans love the German flag. Now, I do not see anything in that to criticize. You know I hear a good deal of talk about the cloakroom that does not please me. I have picked up Viereck's paper and Berger's paper and a good many papers of more respectability and read the editorials that did not sound good to me. I am almost disposed to reiterate Senator HARDING'S words and say

I wish that every man, woman, and child in America were seized with the burning love of America to go and fight for it as the Germans are fighting for their fatherland. You know we need the old-fashioned religion and patriotism in this country. We are in war. We are not voting on conscription now; we are in the war. We are not discussing preparedness. My country has chosen to fight; we are there to go forward to a glorious victory for this great Nation of 110,000,000 people, or crawl back in ignominious defeat. I want to tell you that no patriot ought to continue to discuss the conscription or volunteer system. [Applause.] No patriot in America ought to give further comfort or solace to the enemy by talking about the antibellum disputes that we had in this House. Our country has unsheathed her sword, Liberty has gone forth to vindicate herself, and I wish that a baptism of spiritual patriotism would descend upon every man, woman, and child in this country—not about what we said yesterday or the day before, but with God's help and with the help of the strong arms of our sons to get our shoulders together, our hearts together, and whip the Germans and win the war. [Applause.]

This is no time to say "I don't like the way the general is leading." We have got to have a head.

A MEMBER. Have we got one?

Mr. DIES. Yes, sir; you have got one of the greatest patriots, the greatest statesmen that was ever produced in America in the White House to-day. [Applause.] I would say it if Mr. Hughes was there. I would say it if you were there. Great god of freedom! are we to do like Russia has done—decentralize in front of the enemy? Are we to do like Mexico has done—disorganize, throw away the heritage of liberty? Republics should decentralize in peace and centralize and concentrate in time of war. We need one leader, and him the Commander in Chief of the Army and Navy, and as God shall judge me, every patriot in this country ought, as he will, to get under the flag of the one leader, made so by the Constitution of the United States, the Commander in Chief of the Army and the Navy of this country. You can not follow my friend, Judge BURNETT. You can not follow me. You could do like the Russians. You could break up into petty squads. You can do like the Chinese. You can do like the Mexicans, fight 40 in an army and fight one another. But if this great Republic is wise in its day and generation, it will concentrate to a man the leadership of the President, trust God and love liberty, and give this glorious Republic the strength to win this conflict. [Applause.]

Mr. SWITZER. Mr. Chairman, I yield 10 minutes to the gentleman from Wisconsin [Mr. LENROOT].
